Page 4, line 15, after the word "commissioner," insert "shall cause notice of such application to be published at least once in the Official Gazette. Any person who believes that he would be injured by such extension may within 45 days from such publication oppose the same on the ground that any of the statements of the application for extension required by section 1 of this act is not true in fact, which said notice of opposition shall be verified before an officer authorized by the laws of any State or Territory or the District of Columbia to administer oaths. In all cases where notice of opposition is filed the Commissioner of Patents shall notify the applicant for extension thereof and set a day of hearing. If after such hearing the Commissioner of Patents is of the opinion that such extension should not be granted, he may deny the application therefor, stating in writing his reasons for such denial. Where an extension is refused the applicant therefor shall have the same remedy by appeal from the decision of the commissioner as is now provided by law where an application for patent is refused. If no opposition to the grant of the extension is filed, or if, after opposition is filed, it shall be decided that the applicant is entitled to the extension asked for, the Commissioner of Patents."

Page 6, line 2, strike out the word "as" and insert in lieu thereof the word "is."

The SPEAKER. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

REPEAL OF SECTION 1445, REVISED STATUTES

The next business on the Consent Calendar was the bill (H. R. 12879) to repeal section 1445 of the Revised Statutes of the United States.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. EDWARDS. Reserving the right to object, what is this statute?

Mr. WOODRUFF. Congress, in passing the retirement law for naval officers, inadvertently failed to take care of dental officers. All naval officers below the grade of admiral, except dental officers, are now retired at the age of 64. The law today requires dental officers to serve until they are 70 years of age.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That section 1445 of the Revised Statutes of the United States is hereby repealed.

SEC. 2. Section 1444 of the Revised Statutes of the United States is hereby amended to read as follows:

"When any officer below the rank of vice admiral, including any officer of the Dental Corps, is 64 years old, he shall be retired by the President from active service: *Provided,* That the retirement of officers at the age of 64 years subsequent to August 29, 1916, is hereby validated."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

DEVELOPMENT OF VOCATIONAL EDUCATION

The next business on the Consent Calendar was the bill (H. R. 12241) to provide for the further development of vocational education in the several States.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, I object.

CREATION OF INDIAN TRUST ESTATES

The next business on the Consent Calendar was the bill (H. R. 7204) to authorize the creation of Indian trust estates, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. SPROUL of Kansas. Mr. Speaker, I object.

Mr. CRAMTON. Will the gentleman from Kansas reserve his objection for a moment?

Mr. SPROUL of Kansas. I will.

Mr. CRAMTON. Mr. Speaker, I am entirely in accord with the gentleman in his objection and I want to emphasize here that objection. The Government of the United States is responsible for the property of those Indians. I am entirely opposed to any proposition which would involve our turning the custody of their property over to some institution for 40 or 50 years, the Government still retaining a responsibility and with no opportunity of exercising that responsibility. Secondly, the bill opens the way for the taxation of the resources of these Indians. Those reasons, I think, justify the gentleman entirely in his objection.

The SPEAKER. Is there objection?

Mr. SPROUL of Kansas. Mr. Speaker, I object.

KANSAS OR KAW TRIBE OF INDIANS

The next business on the Consent Calendar was the bill (H. R. 8901), to amend and further extend the benefits of the act approved March 3, 1925, entitled "An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any and all claims, of whatever nature, which the Kansas or Kaw Tribe of Indians may have or claim to have against the United States, and for other purposes."

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, in view of the two vetoes by the President the other day and this having been already disapproved by the department, it would seem idle to pass the bill, so I object.

Mr. HASTINGS. If the gentleman will permit, this Kaw Tribe of Indians already has a jurisdictional bill and they are in court. As I understand it, this is an amendment of a jurisdictional bill which has heretofore been passed.

Mr. CRAMTON. But this broadens that bill in a way that the department disapproves and there seems no doubt it will be vetoed if passed.

Mr. HASTINGS. I did not know there had been a disapproval by the department.

Mr. CRAMTON. There has been.

The SPEAKER. Is there objection?

Mr. CRAMTON. Mr. Speaker, I object.

WINNEBAGO TRIBE OF INDIANS

The next business on the Consent Calendar was the bill (H. R. 7346), conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment thereon in claims which the Winnebago Tribe of Indians may have against the United States, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, I have discussed this bill with the gentleman from Nebraska [Mr. HOWARD] and he is willing to accept certain amendments. The most important amendments would be to strike out the language on page 7 which authorizes interest at 5 per cent to the time of judgment. It is not customary to allow interest in these cases. Secondly, to provide, as we did in the recent California Indians bill, that the judgment, if obtained, shall not be available for per capita payments, but shall be held for appropriation for health, education, industrial assistance, and so forth. Since the gentleman from Nebraska is agreeable to those amendments I will not object to the bill.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That all claims of whatsoever nature which the Winnebago Tribe of Indians or any band thereof may have against the United States which have not heretofore been determined by a court of competent jurisdiction, may be submitted to the Court of Claims for determination of the amount, if any, due said Indians from the United States under any treaty or agreement or law of Congress, or for the misappropriation of any of the property or funds of said Indians, or for the failure of the United States to administer the same in conformity with any treaty or agreement with the said Indians: *Provided*, That if in any claim submitted hereunder a treaty or an agreement with the Indians be involved, and it be shown that the same has been amended or superseded by an act or acts of Congress, the court shall have authority to determine whether such act or acts have violated any property right of the claimants, and, if so, to render judgment for the damages resulting therefrom; and jurisdiction is hereby conferred upon said Court of Claims, with the right to appeal to the Supreme Court of the United States by either party, to hear and determine all legal and equitable claims of whatsoever nature which said Indians may have against the United States, it being the intent of this act to confer upon the said Court of Claims full and complete authority to adjust and determine all claims submitted hereunder so that the rights, legal and equitable, both of the United States and of said Indians may be fully considered and determined and to render judgment thereon accordingly.

SEC. 2. Any and all claims against the United States within the purview of this act shall be forever barred unless suit be instituted or petition filed as herein provided in the Court of Claims within five years from the date of approval of this act, and such suit shall make the Winnebago Tribe of Indians or any band thereof party plaintiff and the United States party defendant. The petition shall be verified by the attorney or attorneys employed to prosecute such claim or claims under contract with the Winnebagos approved by the Commissioner of Indian Affairs and the Secretary of the Interior; and such contract shall be executed in their behalf by a committee chosen by them under the direction and approval of the Commissioner of Indian Affairs and the Secretary of the Interior. Official letters, papers, documents, and records, or certified copies thereof, may be used in evidence, and the departments of the Government shall give access to the attorney or attorneys of said Indian tribe to such treaties, papers, correspondence, or records as may be needed by the attorney or attorneys of said Indian tribe.

SEC. 3. That if any claim or claims be submitted to said court it shall determine the rights of the parties thereto, notwithstanding lapse of time or statutes of limitation, and any payment which may have been made by the United States upon any claim so submitted shall not be placed as an estoppel, but may be pleaded as a set-off in any suit; and the United States shall be allowed credit subsequent to the date of any Executive order, law, treaty, or agreement under which the claims arise for any sum or sums heretofore paid or expended for the benefit of said Indians, including gratuities.

SEC. 4. That if it be determined by the court that the United States, in violation of the terms and provisions of any Executive order, law, treaty, or agreement, has unlawfully appropriated or disposed of any money or other property belonging to the Indians, damages therefor shall be confined to the value of the money or other property at the time of such appropriation or disposal, together with interest thereon at 5 per cent per annum from the date thereof; and with reference to all claims which may be the subject matter of the suits herein authorized, the decree of the court shall be in full settlement of all damages, if any, committed by the Government of the United States and shall annul and cancel all claim, right, and title of the said Winnebago Indians in and to such money or other property.

SEC. 5. That upon the final determination of any suit instituted under this act the Court of Claims shall decree such amount or amounts as it may find reasonable to be paid the attorney or attorneys so employed by said Indian tribe for the services and expenses of said attorneys rendered or incurred subsequent to the date of approval of this act: *Provided*, That in no case shall the aggregate amounts decreed by said Court of Claims for fees be in excess of the amount or amounts stipulated in the contract of employment, or in excess of a sum equal to 10 per cent of the amount of recovery against the United States.

SEC. 6. The Court of Claims shall have full authority by proper orders and process to bring in and make parties to such suit any other tribe or band of Indians deemed by it necessary or proper to the final determination of the matters in controversy.

SEC. 7. A copy of the petition shall, in such case, be served upon the Attorney General of the United States, and he, or some attorney from the Department of Justice to be designated by him, is hereby directed to appear and defend the interests of the United States in such case.

SEC. 8. The proceeds of all amounts, if any, recovered for said Indians shall be deposited in the Treasury of the United States to the credit of the Indians decreed by said court to be entitled thereto, and shall draw interest at the rate of 5 per cent per annum from the date of the judgment or decree. The costs incurred in any suit hereunder shall be taxed against the losing party; if against the United States such costs shall be included in the amount of the judgment or decree, and if against said Indians shall be paid by the Secretary of the Treasury out of the funds standing to their credit in the Treasury of the United States: *Provided*, That actual costs necessary to be incurred by the Winnebago Indians as required by the rules of court in the prosecution of this suit shall be paid out of the funds of the Winnebago Tribe in the Treasury of the United States.

With the following committee amendment:

"Strike out all after the enacting clause and insert the following:

"That jurisdiction be, and is hereby, conferred upon the Court of Claims, with the right of appeal to the Supreme Court of the United States by either party as in other cases, to hear, examine, and adjudicate and render judgment in any and all legal and equitable claims arising under or growing out of the treaty of February 27, 1855 (10 Stat. 1172), and the act of February 21, 1863 (12 Stat. 658), or arising under or growing out of any subsequent act of Congress, Executive order, or treaty which said Winnebago Tribe of Indians, or any band thereof, may have against the United States, which claims have not heretofore been determined and adjudicated on their merits by the Court of Claims or the Supreme Court of the United States.

"SEC. 2. Any and all claims against the United States within the purview of this act shall be forever barred unless suit be instituted or petition filed as herein provided in the Court of Claims within five years from the date of the approval of this act, and such suit shall make the Winnebago Indians, or any band thereof, party plaintiff and the United States party defendant. The petitions shall be verified by the attorney or attorneys employed to prosecute such claim or claims under contract with said Winnebago Indians approved in accordance with existing law; and said contract shall be executed in their behalf by a committee or committees to be selected by said Winnebago Indians as hereinafter provided. Official letters, papers, documents and records, or certified copies thereof, may be used in evidence, and the departments of the Government shall give access to the attorney or attorneys of said Winnebago Indians to such treaties, papers, correspondence, and records as they may require in the prosecution of any suit instituted under this act.

"SEC. 3. In said suit or suits the court shall hear, examine, and adjudicate any claims which the United States may have against said Winnebago Indians, but any payment, including gratuities, which the United States may have made to said Indians subsequent to February 21, 1863, shall not operate as an estoppel but may be pleaded as an offset in such suit.

"SEC. 4. If it be determined by the court that the United States in violation of the terms and provisions of any law, treaty, Executive order, or agreement as provided in section 1 hereof, has unlawfully appropriated or disposed of any money or other property belonging to the Indians, the damages therefor shall be confined to the value of the money or other property at the time of such appropriation or the disposal thereof, together with interest thereon at 5 per cent per annum from the date thereof; and with reference to all claims which may be the subject matter of the suit herein authorized, the decree of the courts shall be in full settlement of all damages, if any, committed by the Government of the United States and shall annul and cancel all claim, right, and title of said Winnebago Indians in and to such money or other property.

"SEC. 5. The Court of Claims shall have full authority by proper orders and process to bring in and make parties to such suit any other tribe or band of Indians deemed by it necessary or proper to the final determination of the matters in controversy.

"SEC. 6. A copy of the petition shall, in such case, be served upon the Attorney General of the United States, and he, or some attorney from the Department of Justice to be designated by him, is hereby directed to appear and defend in the interest of the United States in such case.

"SEC. 7. Upon final determination of such suit the Court of Claims shall have jurisdiction to fix and determine a reasonable fee, not to exceed 10 per cent of the recovery, and in any event, not more than $25,000, together with all necessary and proper expenses incurred in preparation and prosecution of the suit, to be paid to the attorneys employed by the said tribe or bands of Indians, and the same shall be included in the decree and shall be paid out of any sum or sums found to be due said tribe.

"SEC. 8. The proceeds of all amounts, if any, recovered for said Indians shall be deposited in the Treasury of the United States to the credit of the Indians decreed by said court to be entitled thereto, and shall draw interest at the rate of 4 per cent per annum from the date of the judgment or decree. The costs incurred in any suit hereunder shall be fixed against the losing party; if against the United States such costs shall be included in the amount of the judgment or decree, and if against said Indians shall be paid by the Secretary of the Treasury out of the funds standing to their credit in the Treasury of the United States: *Provided*, That actual cost necessary to be incurred by

the Winnebago Indians as required by the rules of court in the prosecution of this suit shall be paid out of the funds of the Winnebago Tribe in the Treasury of the United States."

Mr. CRAMTON. Mr. Speaker, I offer several amendments to the committee amendment.

The SPEAKER. The gentleman from Michigan offers amendments to the committee amendment, which the Clerk will report.

The Clerk read as follows:

Amendments offered by Mr. CRAMTON to the committee amendment:

Page 6, line 19, strike out the word "five" and insert in lieu thereof the word "three."

Page 7, line 11, strike out the word "but" and insert in lieu thereof the word "and."

Page 7, line 13, strike out the words "subsequent to February 21, 1863," and insert in lieu thereof the words "prior to the date of adjudication."

Page 7, lines 23 and 24, strike out the words "together with interest thereon at 5 per cent per annum from the date thereof."

Page 9, strike out all of the first sentence of section 8 and insert in lieu thereof the following:

"The amount of any judgment shall be placed in the Treasury of the United States to the credit of the said Indians, and shall draw interest at the rate of 4 per cent per annum, and shall be thereafter subject to appropriation by Congress for educational, health, industrial, and other purposes, for the benefit of said Indians, including the purchase of lands and building of homes, and no part of said judgment shall be paid out in per capita payments to said Indians."

The amendments were agreed to.

The committee amendment, as amended, was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

PROTECTION OF TRADE-MARKS

The next business on the Consent Calendar was the bill (H. R. 13109) to protect trade-marks used in commerce, to authorize the registration of such trade-marks, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, I want to ask the gentleman from Indiana, the chairman of the committee, if section 33 of the bill, page 42, is not a new departure. It authorizes an appropriation of an additional $50,000 annually.

Mr. VESTAL. It is probably necessary to have this much money in order to carry the provisions of the bill into effect.

Mr. LAGUARDIA. What I can not understand is this: We now appropriate annually for the Patent Office, which covers the protection of trade-marks, and the gentleman is seeking to codify the various laws on matters of trade-marks, but there is added in section 33 an authorization for an annual appropriation of $50,000. What is this for?

Mr. VESTAL. I think we need it because we are trying to collect all the trade-marks in the United States into the Patent Office where persons seeking to get new trade-marks will have some place to make a complete search. We have not such a thing now.

Mr. LAGUARDIA. Then this is to carry on the provisions which the bill makes for perfecting the work of the trade-mark division of the Patent Office.

Mr. VESTAL. Absolutely.

Mr. LAGUARDIA. The report does not say so. With that explanation, I shall not object.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the owner of a trade-mark in use in commerce within the control of Congress may register such trade-mark—

A. By filing in the Patent Office—

(a) A written application addressed to the commissioner, signed and verified by the applicant before any officer mentioned in section 15, stating the applicant's name, citizenship, domicile, residence and business address, upon what goods the trade-mark is used, the duration of such use, how the right was acquired, and, if by succession or assignment, from whom, and upon information and belief that the applicant is entitled to the exclusive use of the trade-mark in the United States, and that the applicant is using it in commerce. A description of the trade-mark may be included if desired by the applicant or required by the commissioner;

(b) A drawing of the trade-mark; and

(c) Such number of specimens or facsimiles of the trade-mark as actually used as may be required by the commissioner;

B. By paying into the Patent Office the sum of $10; and

C. By complying with such rules or regulations not inconsistent with law as may be prescribed by the commissioner.

If the applicant resides or is located in a foreign country, and the trade-mark has been registered by the applicant or an application for the registration thereof has been filed by him in such foreign country the application shall set forth this fact and shall give the date of such registration or application. In such cases the applicant need not allege use in commerce.

SEC. 2. No mark by which the goods to which it is applied by the applicant may be distinguished as to source or origin shall be refused registration as a trade-mark on account of its nature unless it—

(a) Consists of or comprises immoral, deceptive, or scandalous matter.

(b) Consists of or comprises the flag or coat of arms or other insignia of the United States, or of any State or municipality, or of any foreign nation, or any simulation thereof.

(c) Consists of or comprises the portrait or signature of a living individual unless by his written consent, or the name, portrait, or signature of any deceased President of the United States during the life of his widow, if any, unless by her written consent.

(d) Consists of or comprises a mark which so resembles a trade-mark previously used by another as to be likely, when applied to the goods of the applicant, to cause confusion or mistake or to deceive purchasers as to their source or origin.

When such previously used trade-mark is applied to merchandise of the same descriptive properties it shall constitute prima facie grounds for refusing registration.

(e) Consists of a mark which when applied to the goods of the applicant has merely a descriptive or geographical meaning or is merely a surname.

Rejection on any of the foregoing grounds shall be subject to rebuttal by evidence of relevant facts.

(f) Except as expressly excluded in paragraphs (a), (b), (c), and (d) of this section, nothing herein shall prevent the registration of any mark used as a trade-mark by the applicant in commerce which, in accordance with the principles of common law, shall be shown by proof convincing beyond a reasonable doubt to have acquired a secondary meaning distinguishing the applicant's goods.

(g) Registrations of a mark except under paragraph (f) of this section shall be prima facie evidence of ownership as of the date the application was filed. Registration of a mark by virtue of paragraph (f) shall be prima facie evidence of secondary meaning distinguishing the registrant's goods as of the date of registration.

SEC. 3. In addition to the registration provided in sections 1 and 2 of this act the commissioner shall keep a register of all marks communicated to him by an international bureau organized under the provisions of a treaty or convention to which the United States is a party and in connection with which the fee required by such conventions for international registration and the fee for registration provided by the laws of the United States have been paid where the mark so communicated is deemed by the Commissioner of Patents to be such that protection can be granted thereto in accordance with existing law. The communication from the international bureau shall show the name and address of the owner of the mark; the date of application for registration in the State of first registration or deposit, which State must be one of the signatory countries; the number of the registration and the date of expiration in the State of first registration or deposit; a facsimile of the mark; a statement of the goods on which the mark is used in the State of first registration or deposit; the date of the application for recognition of the rights claimed under the convention; and such other data as may be useful concerning the mark. If objection is made to the registration of such mark, notice thereof shall be communicated by the commissioner to the said international bureau.

Registration effected under the foregoing paragraph shall be subject to renewal and to cancellation in accordance with the provisions of this act.

When protection is refused to any mark communicated by an international bureau as above specified by reason of a prior registration or pending application for registration, the proprietor of the mark claiming recognition of rights under the treaty or convention shall have the right to seek and obtain the cancellation of the previously registered mark upon proving, according to the procedure fixed by existing law, such refusal and—

(1) That he had legal protection for his mark in any of the contracting States before the date of use of the mark the registration of which he seeks to cancel; or

(2) That the registrant had no right to the ownership, use, or employment of the registered mark at the date of its deposit; or

(3) That the mark covered by the registration which he seeks to cancel has been abandoned.

The time within which such application for the cancellation of a registration may be made shall be two years from September 30, 1926, if the refusal to register was made prior to that date, and in all other cases it shall be one year from the date of the receipt by the international bureau of the refusal to register.

The foregoing section shall be construed in accordance with the reservations adopted by the Senate of the United States on February 24, 1925, in ratifying the convention for the protection of commercial, industrial, and agricultural trade-marks and commercial names, signed at Santiago, Chile, on April 28, 1923, the third, fourth, and fifth of said reservations being as follows:

Third. That the expressions in Article I "without prejudice to the rights of third parties" and in Article II "in the absence of other proof of ownership of a mark" are, and shall be, interpreted to protect every user of a trade-mark in the United States having ownership thereof by reason of adoption and use, and with or without subsequent registration, from any claim of priority under this convention based upon an application or an entry in a signatory State subsequent to the actual date of such adoption and use in the United States.

Fourth. That the expression "legal protection for his mark" in section 2 (a) of Article V shall be interpreted to include ownership of the mark in the United States acquired by adoption and use and with or without subsequent registration.

Fifth. That nothing contained in this convention shall take away or lessen any trade-mark right or any right to use a trade-mark of any person residing or doing business in the United States heretofore or hereafter lawfully acquired under the common law or by virtue of the statutes of the several States or of the United States.

The commissioner may record transfers or assignments of trade-marks upon regular notification of such transfers or assignments received from the proper international bureau upon the payment of the statutory recording fee.

Owners of marks so registered, being domiciled in any country which is a party to said convention, shall enjoy, while the registration remains in force, all the rights and benefits conferred by said convention.

SEC. 4. In addition to the registrations hereinbefore provided for, the commissioner shall keep a register of marks as a continuation of the register of marks heretofore registered under paragraph (b) of section 1 of the act of March 19, 1920, entitled "An act to give effect to certain provisions of the convention for the protection of trade-marks and commercial names, made and signed in the city of Buenos Aires, in the Argentine Republic, August 20, 1910, and for other purposes." Whenever any person engaged in manufacturing in, or exporting from, the United States shall apply for registration of any mark which distinguishes or is adapted to distinguish the goods as those of the applicant (including, for the purposes of this section, a trade-mark, symbol, label, package, configuration of goods, name, word, or phrase) other than those expressly excluded by paragraphs (a), (b), (c), and (d) of section 2, which is used upon goods manufactured by or for such applicant and exported, or about to be exported, to any foreign country, accompanied by a verified statement that such mark distinguishes or is adapted and intended to distinguish the goods as those of the applicant, and shall pay into the Patent Office the sum of $25, the commissioner, subject to prompt examination and search and determination that the mark distinguishes or is adapted to distinguish the goods as those of the applicant and is not excluded by paragraphs (a), (b), (c), and (d) of section 2, shall forthwith register said mark in said register and issue a certificate of registration for such mark, which shall be evidence of the date of filing the application therefor, and of the claim of the registrant of right in such mark. Registrations under this section, including marks heretofore registered under paragraph (b) of section 1 of said act of March 19, 1920, shall give the registrant the same protection in commerce of the marks so registered as the common law affords. Applications under this section shall not be published for opposition, as provided in section 7, and shall not be subject to opposition as provided in section 13, but the registrations shall be subject to cancellation under section 13, paragraph (b), or section 14, paragraph (f). Such registration shall not be used to stop importations under section 28. Registration under this section shall not preclude reregistration to the owner of a trade-mark under any other section of this act.

Upon the filing in the Patent Office of the written consent of a registrant under sections 1 and 2 hereof, a subsidiary or subsidiaries or representative or representatives of such registrant may register the same trade-mark under this section. By written notice to the commisioner the said registrant may withdraw such consent, whereupon the registration under this section shall be transferred on the records of the Patent Office to the name of the registrant under sections 1 and 2 hereof, or his nominee, or canceled at the said registrant's option.

SEC. 5. A. In order to have available for search purposes a collection of unregistered marks, the commissioner is authorized to form such a collection and to that end to accept, file, and classify such unregistered marks as may be entered as provided in this section.

(1) Any mark (including, for the purposes of this section, a trade-mark, symbol, label, package, configuration of goods, name, word, or phrase) used in commerce and identifying any merchandise or business may be entered in the Patent Office by the user by filing one or more copies, facsimilies, or representations thereof, as the commissioner may direct, on a form to be furnished by the commissioner, and under oath, and by paying into the Patent Office a fee of $2. Any person using in commerce any such mark which shall not have been registered and for which no application for registration has been filed before this act becomes effective, who shall fail either to apply to register or enter such mark before the expiration of one year after the first use thereof in commerce, or within one year after this act takes effect, shall, on applying to register in any form under this act, pay, as a fee for such registration, in lieu of any other fees prescribed in this act, the sum of $30. There shall be excepted from the foregoing the trade names embraced in article 8 of the convention mentioned in section 6 hereof, but such trade names may be entered under this section at the option of the user thereof. Any user of a mark solely within a State may, at his option, enter the same under this section.

(2) The commissioner shall not accept for entry any mark already registered, or for which an application for registration is pending, for the same goods.

(3) The commissioner shall mark as abandoned or canceled and may remove from this collection abandoned marks and marks which are immoral, scandalous, or otherwise unlawfully entered.

(4) Any mark entered under the provisions of this section shall be marked as abandoned or canceled and may be removed from said collection of unregistered marks at the end of five years following the date of entry thereof, unless within three months next preceding the expiration of such five years the entrant or his successor in business shall file in the Patent Office an affidavit in such form as may be prescribed by the commissioner to the effect that said mark is still in use by the entrant or his successor in business. A form of such affidavit shall be mailed by the commissioner to the entrant not less than three months prior to the expiration of such five-year period, but failure to receive such form shall not excuse the failure to file such affidavit. At the expiration of each succeeding five-year period thereafter a similar procedure shall be followed in the case of each entered mark and the entered mark shall be marked as abandoned or canceled and may be removed from said collection unless such affidavit is filed by the entrant or his successor in business within three months preceding the expiration of each such five-year period.

(5) An entry under this section shall have no legal effect except as evidence that at its date the entrant claimed a right in the entered mark.

(6) An entered mark shall not of itself be ground for rejection of an application for registration, but if the commissioner believes that an entered mark conflicts or may conflict with an application for registration under sections 1, 2, or 23 hereof, the commissioner, upon the publication of the applied-for mark, shall notify both the applicant and the entrant.

B. (1) The commissioner shall cause to be assembled for search purposes, in such form as the commissioner may determine, all marks—

(a) Now registered and which may hereafter be registered;

(b) For which applications for registration are pending;

(c) Which may be entered under section 5 A; and

(d) Any other marks in actual use which the commissioner may direct.

Such collection of marks shall be open to public inspection at such times as the commissioner may prescribe.

(2) The commissioner may remove from the file for search purposes abandoned or other marks at his discretion.

SEC. 6. (a) An application for registration of a trade-mark, filed in this country by any person who has previously regularly filed an application for registration of the same trade-mark in a foreign country wherein he is domiciled, and which is his first application in any country, if such country by treaty, convention, or law, affords similar privileges to citizens of the United States, shall be accorded the same force and effect as would be accorded to the same application if filed in this country on the date on which the application was first filed in such foreign country, if such application is filed in this country within four months from the date on which the application was first filed in such foreign country. Applications under this section shall conform as nearly as practicable to the requirements of section 1, but need not allege use in commerce.

(b) Every owner of a trade-mark, being domiciled in any country which is a party to the international convention entered into at Paris March 20, 1883, revised at Brussels December 14, 1900, and at Washington June 2, 1911, shall enjoy with respect to the registration of said trade-mark, and while such registration remains in force all the rights and benefits concerning trade-marks and unfair competition conferred by said convention. Rights of priority under such registration shall be determined as provided in said convention.

(c) Foreign or alien owners of trade-marks used in this country shall, unless otherwise provided by treaty, enjoy the same right to such trade-marks at common law, and the same right to register or enforce such trade-marks under the other sections of this act as citizens or residents of the United States, and their rights of priority, unless otherwise provided by treaty, shall be determined by their actual use of such trade-marks within the United States.

SEC. 7. Upon the filing of an application for registration under sections 1, 2, or 23 hereof, and payment of the fees herein provided for, the commissioner shall cause an examination thereof to be made, and if on such examination it shall appear that the applicant is entitled to

registration under the provisions of this act, the commissioner shall cause the mark to be published at least once in the Official Gazette of the Patent Office. If no notice of opposition, as hereinafter provided, is filed within the period specified in section 13, paragraph (a), the commissioner may issue a certificate of registration therefor. If on examination an application is refused, the commissioner shall notify the applicant, giving his reasons therefor. Applications under sections 3 and 4 shall not be published for opposition, but shall be published when registered. This section (section 7) shall not apply to marks entered under section 5.

SEC. 8. Every applicant for registration of a trade-mark or for renewal of registration of a trade-mark, who is not resident within the United States, shall, before the issuance of the certificate of registration or renewal, as herein provided, designate, by a notice in writing filed in the Patent Office, some person residing within the United States on whom process or notice of proceedings affecting the registration of the trade-mark of which such applicant may claim to be the owner, brought under the provision of this act or under other laws of the United States, may be served, with the same force and effect as if served upon the applicant or registrant in person. Such designation shall be continuously maintained. Any nonresident registrant shall in like manner designate such a representative; and after this act takes effect no suit or action shall be brought under any registration owned by such nonresident registrant, and no profits or damages for infringement of such registered mark shall be recoverable under this act, until and unless such notice of designation has been filed and maintained. Such service may be made by leaving a copy of the process or notice at the last address of which the commissioner has been notified or by mailing it to such address.

SEC. 9. In an ex parte case, appeal may be taken to the commissioner in person from the decision of the examiner in charge of trade-marks and from the decision of the commissioner to the Court of Appeals of the District of Columbia. The conditions required in case of an appeal from the decision of the Board of Appeals by an applicant for patent, or a party to an interference as to an invention, shall be complied with in an appeal to said court of appeals under this section, and the same rules of practice and procedure shall govern in every stage of such proceedings, as far as the same may be applicable.

SEC. 10. (a) All certificates of registration of trade-marks shall be issued in the name of the United States of America, under the seal of the Patent Office, and shall either be signed by the commissioner or have his name printed thereon and attested by an assistant commissioner or by one of the law examiners duly designated by the commissioner, and shall be recorded, together with printed copies of the drawing and application, in the Patent Office in books to be kept for that purpose. The certificate shall state the date on which the application for registration was received in the Patent Office. Certificates of registration of trade-marks may be issued to the assignee of the applicant where the assignment has been recorded in the Patent Office. In case of succession or change of ownership the commissioner may, upon a proper showing at the request of the owner or successor and upon the payment of a fee of $10, issue to such owner or successor a new certificate of registration of the said trade-mark in the name of such owner or successor.

(b) The commissioner, upon application of the registrant, may permit any registration under this or any previous act to be canceled or for good cause to be amended or disclaimed in whole or in part, at any time, provided when so amended it shall still contain registrable matter, and shall make appropriate entry upon the records of the Patent Office and upon the certificate of registration or if said certificate is lost or destroyed upon a certified copy thereof.

(c) Copies of any records, books, papers, or drawings relating to trade-marks belonging to the Patent Office, and of certificates of registration, authenticated by the seal of the Patent Office and certified by the commissioner or in his name by a chief of division duly designated by the commissioner, shall be evidence in all cases wherein the originals would be evidence; and any person making application therefor and paying the fee required by law shall have such copies.

(d) Whenever a mistake in a trade-mark registration, incurred through the fault of the Patent Office, is clearly disclosed by the records of the office, a certificate stating the fact and nature of such mistake, signed by the commissioner and sealed with the seal of the Patent Office, may be issued, without charge, and recorded in the records of trade-marks and a printed copy thereof attached to each printed copy of the trade-mark registration, and such certificate shall thereafter be considered as part of the original, and every trade-mark registration, together with such certificate, shall have the same effect and operation in law on the trial of all actions or causes thereafter arising as if the same had been originally issued in such corrected form. All such certificates heretofore issued in accordance with the rules of the Patent Office and the trade-mark registrations to which they are attached shall have the same force and effect as if such certificates had been specifically authorized by statute.

(e) Whenever a mistake has been made in a trade-mark registration and a showing has been made that such mistake occurred in good faith through the fault of the applicant, the commissioner is authorized to issue a certificate of correction upon the payment of a fee of $10, provided the correction is not such as to necessitate republication of the mark.

SEC. 11. Each certificate of registration shall remain in force for 20 years and shall be effective throughout the United States: *Provided*, That the registration of any mark under the provisions of this act shall be canceled at the end of five years following the date of said registration, unless within three months next preceding the expiration of such five years the registrant shall file in the Patent Office an affidavit in such form as may be prescribed by the commissioner to the effect that said mark is still in use by the registrant. If, however, nonuse is due to special circumstances beyond the control of the registrant and not to any intention not to use or to abandon such trade-mark, the registrant shall file an affidavit to this effect at the time and in the manner provided for the affidavit of continued use, in which case the registration shall not be canceled because of such nonuse. Forms for such affidavits shall be mailed by the commissioner to the registrant or to his duly authorized attorney or to his representative designated as provided in section 8 hereof, not less than three months prior to the expiration of such five-year period, but failure to receive such form shall not excuse the failure to file such affidavit.

Certificates of registration may be renewed for like periods of 20 years from the end of the expiring period on payment of the renewal fees required by this act upon requests by the registrant, and such requests may be made at any time within six months prior to the expiration of the period for which the certificates of registration were issued or renewed. Certificates of registration in force at the date at which this act takes effect shall remain in force for the period for which they were issued and shall have the same force and effect as if the acts under which they were issued had not been repealed, but they shall be renewable only under the provisions of this act, and when so renewed shall have the same force and effect as certificates issued under this act.

SEC. 12. (a) Registration under sections 1 and 2 hereof or under the act of February 20, 1905, shall, from the date when this act takes effect, be constructive notice as of the date of registration to all persons of the fact of registration and of the fact that the registrant claims the right to the exclusive use in commerce of the mark so registered.

(b) It shall be the duty of the registrant to accompany a trade-mark registered under sections 1, 2, and 3 hereof and trade names, marks, and devices registered under section 23 hereof with the words "Registered in U. S. Patent Office" or "Reg. U. S. Pat. Off.," and in any suit for infringement under this act by a registrant failing so to mark, no profits and no damages shall be recovered except on proof that the defendant had actual notice or knowledge and continued to infringe after such notice or knowledge, and no such profits or damages shall accrue except after such notice or knowledge.

(c) It shall be unlawful for any person to accompany any mark, name, or device used in commerce and not registered under sections 1, 2, 3, or 23 hereof or a mark merely entered under section 5 hereof, or merely registered under section 4 hereof, with the words "Registered in U. S. Patent Office," or "Reg. U. S. Pat. Off.," or "Deposited in the U. S. Patent Office," or "Entered in the U. S. Patent Office," or "Recorded in the U. S. Patent Office," or with any other letters, words, or abbreviations of like import; or to use in commerce in connection with any such mark any such words or abbreviations on any label or in any catalogue, circular, or advertising matter.

(d) Any person who violates the provisions of section 12 (c) of this act shall be guilty of a misdemeanor punishable by a fine of not less than $100 or more than $250.

SEC. 13. The following shall be the contested proceedings in the Patent Office:

(a) Opposition: Any person who would be damaged by the registration of a mark may oppose the same by filing notice of opposition in the Patent Office, in such form as the commissioner may by rule prescribe, within 30 days after the publication in the Official Gazette of the mark sought to be registered. A notice of opposition may be filed by an authorized attorney, but shall be void unless ratified by the opposer within a reasonable time after such filing. For good cause shown the time for filing notice of opposition may be extended by the commissioner not more than 30 days and for good cause shown the commissioner may receive a notice of opposition filed within 60 days from the date of publication.

(b) Cancellation: Any person who is damaged by the registration of a trade-mark, except a person against whom a suit is pending thereunder, may at any time apply to the commissioner to cancel the registration thereof by filing a petition in the Patent Office in such form as the commissioner may by rule prescribe. Abandonment shall be among the grounds for cancellation. Nonuse by the registrant for more than two years shall be prima facie evidence of abandonment unless such nonuse is shown to be due to special circumstances beyond the control of the registrant and not to any intention not to use or to abandon such trade-mark.

(c) Interference: Whenever application is made for the registration of a trade-mark which so resembles a trade-mark for which a certificate of registration has previously been issued to another, or for the registration of which another has previously made application, as to be likely, in the opinion of the commissioner, when applied to the goods of the applicant, to cause confusion or mistake or to deceive purchasers as to their source or origin, the commissioner may declare that an interference exists.

(d) In every case of opposition to registration, petition for the cancellation of a registered trade-mark, or interference, the commissioner shall direct the examiner in charge of interferences to determine the issues according to the common law or treaty rights of the parties, and under rules prescribed by the commissioner.

(e) Appeal may be taken to the commissioner in person from the decision of the examiner of interferences.

(f) The commissioner may refuse to register the mark against the registration of which opposition is filed, may cancel the registration of a registered trade-mark, or may refuse to register both of two interfering marks, or may register the trade-mark for the person entitled thereto. Action shall be stayed for 60 days after final decision by the commissioner to give time for proceeding as provided in section 14.

(g) Whenever there shall be pending in the Patent Office an interference and an opposition or cancellation concerning the same trade-mark and involving the same or like issues, so that the proceedings may conveniently be determined upon the same evidence, such proceedings may be consolidated upon motion of any party thereto or by direction of the commissioner.

(h) In any suit pending in a Federal court between the parties to a contested proceeding in the Patent Office involving the same trade-mark, the commissioner shall, on the request and at the expense of any party to such suit, certify and transmit to the clerk of the court a transcript of the record in such contested proceeding, including the testimony and exhibits, or such portion thereof as the parties may stipulate. The record so certified shall be treated as evidence in the suit and shall have the same force and effect as if taken and produced therein.

SEC. 14. (a) Upon the decision of the commissioner any party to any of the proceedings mentioned in section 13 hereof may, within 60 days after the decision of the commissioner, file a bill in equity for relief in any court of original jurisdiction named in section 21 hereof in the district of the residence or principal place of business of the adverse party; or, if there are two or more such parties, then in the district of the residence or principal place of business of any of them; or, if such party is not domiciled in the United States, then in the court of the district of the residence of the representative designated as provided in section 8 hereof; or, if no representative is so designated, then in the District of Columbia. The court shall then issue its process (which may be served anywhere in the United States) to all parties to such proceeding, and shall thereupon have general jurisdiction of the controversy and of the parties.

(b) In all suits brought hereunder the record in the Patent Office shall be admitted in whole or in part, on motion of either party, subject to such terms and conditions as to costs, expenses, and the further cross-examination of the witnesses as the court may impose, without prejudice, however, to the right of the parties to take further testimony. The testimony and exhibits or parts thereof of the record in the Patent Office when admitted shall have the same force and effect as if originally taken and produced in the suit.

(c) The court may determine the right to registration, order the cancellation of registrations, restore canceled registrations, and otherwise rectify the register, and shall make and enter such orders and decrees as the case may require, including relief by way of injunction, damages, profits, costs, and otherwise, as provided in section 18, and such judgment or decree may be enforced as provided in section 22 hereof.

(d) Except in ex parte cases, the provisions of section 4915 of the Revised Statutes shall not apply in trade-mark cases.

(e) Any order of the court with respect to the right of registration, the cancellation of registrations, the restoration of canceled registrations, or otherwise rectifying the register shall be served upon the commissioner, who shall make appropriate entry upon the records of the Patent Office and be controlled thereby.

(f) In lieu of the method provided in paragraph (b) of section 13 any person damaged by any registration of a trade-mark may have relief by a suit in equity against the registrant for cancellation of such registration brought in the district of the residence of the registrant or if the registrant is not a resident of the United States then in the district of the residence of the representative designated, as provided in section 8 hereof, or if no representative is so designated then in the District of Columbia, and the court on due proceedings had may, according to the circumstances of the case, adjudge the right to cancellation of such registration in whole or in part or to other rectification of the register. And such adjudication in favor of the right of a party shall authorize the commissioner to cancel such registration in whole or in part or otherwise rectify the register as the case may require, on the party filing in the Patent Office a copy of the adjudication and otherwise complying with the requirements of law.

SEC. 15. (a) Every registered trade-mark and every mark for the registration of which application has been made, together with the application for registration of the same, shall be assignable in connection with the business and good will in which the mark is used, or the portion thereof to which the mark is appurtenant, by an instrument in writing, duly acknowledged or otherwise proved, according to the laws of the country or State in which it is executed or made; any such assignment shall be void as against any subsequent purchaser for a valuable consideration, without notice, unless it is recorded in the Patent Office within three months from the date thereof or prior to such a subsequent purchase. The commissioner shall keep a record of such assignments.

The commissioner shall not accept for record any such assignment in which the assignee therein named is not a resident within the United States unless and until such assignee shall designate by a notice in writing filed in the Patent Office some persons residing within the United States on whom process or notice of proceeding affecting the registration or entry of the mark of which such assignee may claim to be the owner, brought under the provisions of this act or under other laws of the United States, may be served with the same force and effect as if served upon the assignee in person.

(b) If any such assignment be acknowledged before any notary public of a State or any clerk or commissioner of any United States district court, or before any secretary of legation or consular officer authorized by the laws of the United States to administer oaths or perform notarial acts, or before any notary public, judge, or magistrate of any foreign country authorized to administer oaths or perform notarial acts in such country and whose authority shall be approved by certificate of a diplomatic or consular officer of the United States, the certificate of such acknowledgment shall be prima facie evidence of the execution of such assignment, and when recorded in the Patent Office such record shall be prima facie evidence of the execution of such assignment.

SEC. 16. Fees payable to the Patent Office under this act shall be as follows: On filing each original application for registration of a trade-mark except under section 4, $10; under section 4, $25; on filing each such application after one year, as provided in section 5, additional, $20; on filing application under section 23, $10; on filing each application for renewal, $10; on issuing a new certificate under section 10, paragraphs (a) and (e), $10; on each entry under section 5, $2; on filing notice of opposition or a petition for cancellation (except under section 10 (b)), $10; on filing a disclaimer or an amendment to a registration, $10; on appeal from the examiner in charge of trade-marks to the commissioner, $15; on appeal from the decision of the examiner in charge of interferences to the commissioner, $15; for manuscript copies, for every 100 words or fraction thereof, 10 cents; for each printed copy of registration and drawing, 10 cents; for comparing other copies, 5 cents for every 100 words or fraction thereof; for certifying in any case, additional, 75 cents; for each additional registration or application which may be included under a single certificate, 25 cents additional; for recording every assignment or other paper of 300 words or under, $1; of over 300 and under 1,000 words, $2; and for each additional 1,000 words or fraction thereof, $1; for each additional trade-mark or application included, or involved in one writing where more than one is so included or involved, additional, 25 cents.

SEC. 17. The commissioner is authorized to refund fees paid by mistake or in excess.

SEC. 18. Any person who shall infringe in commerce any trade-mark registered under section 1, 2, or 3 hereof shall be liable—

(a) To an injunction restraining infringement of such registered trade-mark.

(b) To pay to the owner such damages as he may have suffered from the infringement.

(c) To pay to the owner all profits which the infringer shall have made from such infringement, and in proving profits the plaintiff shall be required to prove sales only, and the defendant shall be required to prove every element of cost or deduction claimed; but there shall be no recovery of profits from any defendant whose adoption and use of an infringing trade-mark was in good faith and without knowledge of the plaintiff's right thereto, except such profits as accrued therefrom after such defendant had actual notice or knowledge thereof.

(d) If the court shall find that the damages or profits, or both, are either inadequate or excessive, the court may, in its discretion, decree the payment of such sum as the court shall find to be just according to the circumstances of the case, such sum to constitute compensation and not a penalty.

(e) To deliver up, on oath, upon such terms and conditions as the court may prescribe, all copies, counterfeits, or colorable imitations of the registered trade-mark, to be impounded during the pendency of the proceeding.

(f) To deliver up, on oath, for destruction, all copies, counterfeits, or colorable imitations of the registered trade-mark, and all plates, molds, matrices, or other means of making the same.

(g) To deliver up, on oath, for destruction, all printed matter containing any copies, counterfeits, or colorable imitations of the registered

trade-mark, and all plates, molds, matrices, or other means of making the same; but when such printed matter is a catalogue, or otherwise consists mainly of noninfringing matter, the objectionable contents thereof may be obliterated or otherwise removed as the court may direct.

(h) The remedy of injunction against infringement of a registered trade-mark may extend throughout the United States or any lesser territory, as may be determined by the court according to the circumstances of the case, and need not be limited to be merely coextensive with the territory within which the owner has used such registered trade-mark; and the court may give the plaintiff the benefit of all other remedies named in this section.

(i) This section shall be applicable only to infringements committed after this act shall take effect; for infringements previously committed the remedies shall be those provided by the statutes heretofore in force.

(j) The benefits of this section shall not inure to entries made under section 5, or to registration under section 4.

(k) Rules and regulations for practice and procedure under this section and under sections 14 and 28 (c) may be prescribed by the Supreme Court of the United States.

SEC. 19. Any court given jurisdiction under this act may, in any action, suit, or proceeding, enter a judgment or decree enforcing the remedies herein provided. It shall be the duty of the clerks of said courts upon the filing of any pleading in any action, suit, or proceeding under this act to give notice to the commissioner, giving the title of the case and the numbers of the registrations or of any entry which may be involved therein, and upon the entry of each judgment or decree to give notice thereof to the commissioner; and for each such notice the clerk shall tax a fee of 50 cents as costs of suit. It shall be the duty of the commissioner on receipt of each such notice to enter the same in the file wrapper of each registration so named.

SEC. 20. The proceedings for an injunction, damages, and profits, and those for the seizure of infringing trade-marks, plates, molds, matrices, or other means for making such infringing marks may be united in one action.

SEC. 21. The district and territorial courts of the United States, the District Court of the Canal Zone, and the Supreme Court of the District of Columbia shall have original jurisdiction, and the circuit courts of appeal of the United States and the Court of Appeals of the District of Columbia shall have appellate jurisdiction of all actions, suits, and proceedings concerning registrations and registered trade-marks, trade names, and devices under this act, without regard to diversity or lack of diversity of the citizenship of the parties and irrespective of the amount in controversy, and the judgments of such appellate courts shall be final, except that they may be reviewed by the Supreme Court as provided by sections 239 and 240 (U. S. C. 346–347), respectively, of the Judicial Code.

SEC. 22. Any injunction which may be granted according to section 18 may be served anywhere in the United States, and shall be operative, and may be enforced by proceedings to punish for contempt, or otherwise, by the court by which such injunction was granted, or by any other Federal court having jurisdiction of the party enjoined. The clerk of the court or the judge granting the injunction shall, when requested to do so by the court before which application to enforce said injunction is made, transfer without delay to said court a certified copy of any necessary papers on which the said injunction was granted that are on file in his office.

SEC. 23. Subject to the same provisions as appear in section 2 hereof relating to trade-marks, so far as the same may be applicable, any person, firm, corporation, union, agricultural or other association, being the owner thereof, may register any trade name or device, including union labels, collective marks, and the marks of associations, used in commerce upon or in relation to specific goods or specific service, in the same manner and with the same effect, and when registered they shall be entitled to the same protection and remedies against infringement as provided herein in the case of trade-marks used upon goods. Applications under this section shall comply as nearly as practicable with the requirements of section 1, and the same procedure shall be followed so far as applicable with respect to trade names and devices as is provided in the sections of this act relating to trade-marks.

SEC. 24. Nothing in this act shall prevent, lessen, impeach, or avoid any remedy at law or in equity which any party aggrieved by any wrongful use of any trade-mark might have had at common law; nor shall anything in this act deprive a defendant in a suit upon any registered trade-mark or in any proceeding under this act of any defenses against the validity of the trade-mark which he would have had if the trade-mark had not been registered.

SEC. 25. All applications for registration and all contested proceedings pending in the Patent Office at the time of the passage of this act shall be proceeded with under the provisions of this act.

SEC. 26. Any person who shall file application for or procure registration or entry of a trade-mark in the Patent Office by a fraudulent declaration or representations, oral, written, or by any fraudulent means, shall be liable to pay any damages sustained in consequence thereof to the injured party, and such fraudulent declaration or representation shall constitute perjury.

SEC. 27. The commissioner may make rules and regulations, not inconsistent with law, concerning the registration of trade-marks, trade names and devices, the entry of marks under section 5 (a) hereof and practice in proceedings in the Patent Office. He may require of the applicant or entrant such information and in such form as he deems necessary. He may require nonregistrable matter to be disclaimed, but no such disclaimer shall affect any common law rights. He may establish a classification of merchandise, for convenience of Patent Office administration, but not to limit or extend the applicant's rights. The applicant may register his trade-mark in one application for any or all goods included in one class upon which the mark has actually been used in commerce. The commissioner may establish a classification under section 23 hereof.

SEC. 28. (a) Any merchandise, whatever may be its source or origin, which shall bear any registered trade-mark or any infringement thereof, shall not be imported into the United States or admitted to entry at any customhouse of the United States unless the written consent of the registrant to such importation or entry be first had and obtained, or unless such offending mark be removed or obliterated; and if brought into the United States in violation of the provisions of this section, any person selling, offering for sale, or dealing in such merchandise shall be amenable, at the suit of the registrant, to the liabilities prescribed in section 18 hereof, and in addition be required to reexport or destroy such merchandise or to remove or obliterate such infringing trade-mark therefrom, and such merchandise shall be subject to seizure and forfeiture for violation of the customs laws. In order to aid the officers of the customs in enforcing this section the registrant may require a copy of the certificate of registration of his trade-mark to be recorded in books which shall be kept for this purpose in the Department of the Treasury, under such regulations as the Secretary of the Treasury shall prescribe, and thereupon the Secretary of the Treasury shall cause one or more copies of the same to be transmitted to each collector or other proper officer of customs.

(b) Any merchandise, whatever may be its source or origin, which shall bear the name or a simulation thereof of any domestic manufacture or manufacturer or trader, or of any manufacturer or trader located in any foreign country which by treaty, convention, or law affords similar privileges to citizens of the United States, shall not be imported into the United States or admitted to entry at any customhouse of the United States unless the written consent of such manufacurer or trader to such importation or entry be first had and obtained, or unless such offending name be removed or obliterated, and if brought into the United States in violation of the provisions of this section, any person selling, offering for sale, or dealing in such merchandise may be enjoined from dealing therein and in addition be required to export or destroy such merchandise or to remove or obliterate such name therefrom, and the merchandise shall be subject to seizure and forfeiture for violation of the customs laws. In order to aid the officers of the customs in enforcing this section, any such domestic or foreign manufacturer or trader may require a statement of his business or commercial name and the locality where his business is located and where his goods are manufactured to be recorded in books which shall be kept for this purpose in the Department of the Treasury under such regulations as the Secretary of the Treasury shall prescribe, and thereupon the Secretary of the Treasury shall cause one or more copies of such record to be transmitted to each collector or other proper officer of customs.

(c) The owner, importer, or consignee of merchandise refused entry or seized under paragraphs (a) and (b) of this section may have relief against the registrant, manufacturer, or trader by a bill in equity or by a summary proceeding on petition in any court of original jurisdiction named in section 21, in the district where such merchandise is held, or where such registrant, manufacturer, or trader or a designated representative under section 8 is an inhabitant or may be found, and after such notice and upon such proceedings as the court may direct, the court may determine whether the plaintiff or petitioner for any reason has the right to import such merchandise under the names or marks which it bears.

(d) A decree or order of such court for the plaintiff or petitioner, upon being certified to the collector of the port where the merchandise is held, shall be warrant to such collector to release the merchandise from arrest or seizure or forfeiture under this section.

(e) Such order or decree, whether interlocutory or final, shall be appealable, and the court making such order or decree may, in its discretion, suspend the operation thereof pending appeal.

SEC. 29. Any person who shall affix, apply, or annex, or use in connection with any article or articles of merchandise, or any container or containers of the same, a false designation of origin, or any false description or representation including words or other symbols, tending falsely to identify the origin of the merchandise, or falsely to describe or represent the same, and shall cause such merchandise to enter into commerce, and any person who shall knowingly cause or procure the same to be transported in commerce, or shall knowingly deliver the same to any carrier to be so transported, shall be liable to an action at law for damages and to a suit in equity for an injunction, at the suit of any person doing business in the locality falsely indicated as

that of origin, or in the region in which said locality is situated, or of any person who is or is likely to be damaged by the use of any false description or representation, or at the suit of any association of such persons, and any article marked or labeled in contravention of the provisions of this section shall not be imported into the United States or admitted to entry at any customhouse of the United States. The owner, importer, or consignee of merchandise refused entry in any customhouse under this section may have any recourse by protest or appeal that is given under the customs revenue laws, or may have the remedy given by paragraphs (c), (d), and (e) of section 28.

SEC. 30. In the construction of this act, unless otherwise plainly apparent from the context, the United States includes and embraces all territory which is under the jurisdiction and control of the United States. The word "States" includes and embraces the District of Columbia, the Territories of the United States, and such other territory as shall be under the jurisdiction and control of the United States. The word "commerce" means all commerce within the control of Congress. The terms "person" and "owner" and any other word or term used to designate the applicant or other entitled to a benefit or privilege or rendered liable under the provisions of this act include a firm, corporation, or association, or any legal representative or entity capable of possessing and transferring title, as well as a natural person. The terms "applicant" and "registrant" embrace the legal representatives, successors, and assigns of such applicant or registrant. The term "commissioner" means the Commissioner of Patents. The term "trade-mark" includes any mark so used as to distinguish the source or origin of the users' goods, and a trade-mark shall be deemed to be applied to an article when it is placed in any manner in or upon either the article itself or the receptacle or package or upon the envelope or other thing in, by, or with which the goods are packed or inclosed or otherwise prepared for sale or distribution. The term "registered" means registered under this act or under any of the prior acts named in the following section so long as such registration shall remain in force, but has no application to marks entered under section 5. Words used in the singular include the plural, and vice versa. Except as otherwise expressly provided, this act is declaratory of the common law of trade-marks, trade names, and devices and applies such law, so far as concerns registered trade-marks, trade names, and devices, to commerce within the control of Congress, and in case of doubt its provisions are to be construed accordingly.

SEC. 31. This act shall be in force and take effect 60 days after its passage. All acts and parts of acts inconsistent herewith are hereby repealed, including the following, namely: The act of Congress approved March 3, 1881, entitled "An act to authorize the registration of trade-marks and protect the same," the act approved August 5, 1882, entitled "An act relating to the registration of trade-marks," the act of February 20, 1905 (U. S. C., title 15, secs. 81 to 109, inclusive), as amended, entitled "An act to authorize the registration of trade-marks used in commerce with foreign nations, or among the several States, with Indian tribes, and to protect the same," the act of March 19, 1920 (U. S. Code, title 15, secs. 121 to 128, inclusive), entitled "An act to give effect to certain provisions of the convention for the protection of trade-marks and commercial names, made and signed in the city of Buenos Aires, in the Argentine Republic, August 20, 1910, and for other purposes," and section 526 of the "tariff act of 1922" (U. S. C., title 19, secs. 141 to 143, inclusive), except that this repeal shall not affect the validity of registrations under said acts, respectively, or rights or remedies thereunder for infringements committed before this act shall take effect. Registrations under the act of March 19, 1920, shall expire in 20 years from the date of registration, and such registrations shall not be used to stop importations under secton 28 of this act. Sections 13 and 14 of this act (except paragraph (a) of section 13) shall apply to registrations under the act of March 19, 1920.

SEC. 32. Section 4 of the act of January 5, 1905 (U. S. C., title 36, sec. 4), as amended, entitled "An act to incorporate the National Red Cross," and secion 7 of the act of June 15, 1916 (U. S. C., title 36, sec. 27), entitled "An act to incorporate the Boy Scouts of America, and for other purposes," are not repealed or affected by this act.

SEC. 33. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, for clerical service, office equipment, stationery, and supplies for carrying into effect this act for the fiscal year ending June 30, 1929, $50,000, and thereafter such sums as Congress may deem necessary, to be expended by the Commissioner of Patents.

SEC. 34. This act may be cited as the "trade-mark act, 1928."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

REISSUE OF DEFECTIVE PATENTS

The next business on the Consent Calendar was the bill (H. R. 7112) amending the statutes of the United States with respect to reissue of defective patents.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. VESTAL. Mr. Speaker, I ask unanimous consent that the Senate bill, S. 2823, may be substituted for the House bill.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The Clerk read the Senate bill, as follows:

Be it enacted, etc., That section 4916 of the Revised Statutes of the United States be, and the same is hereby, amended to read as follows:

"SEC. 4916. Whenever any patent is wholly or partly inoperative or invalid, by reason of a defective or insufficient specification or by reason of the patentee claiming as his own invention or discovery more than he had a right to claim as new, if the error has arisen by inadvertence, accident, or mistake and without any fraudulent or deceptive intention, the commissioner shall, on the surrender of such patent and the payment of the duty required by law, cause a patent for the same invention, and in accordance with the corrected specification, to be reissued to the patentee or to his assigns or legal representatives for the unexpired part of the term of the original patent. Such surrender shall take effect upon the issue of the reissued patent, but in so far as the claims of the original and reissued patents are identical, such surrender shall not affect any action then pending nor abate any cause of action then existing, and the reissued patent to the extent that its claims are identical with the original patent shall constitute a continuation thereof and have effect continuously from the date of the original patent. The commissioner may, in his discretion, cause several patents to be issued for distinct and separate parts of the thing patented, upon demand of the applicant, and upon payment of the required fee for a reissue for each of such reissued letters patent. The specifications and claims in every such case shall be subject to revision and restriction in the same manner as original applications are. Every patent so reissued, together with the corrected specifications, shall have the same effect and operation in law, on the trial of all actions for causes thereafter arising, as if the same had been originally filed in such corrected form; but no new matter shall be introduced into the specification, nor in case of a machine patent shall the model or drawings be amended, except each by the other; but when there is neither model nor drawing, amendments may be made upon proof satisfactory to the commissioner that such new matter or amendment was a part of the original invention, and was omitted from the specification by inadvertence, accident, or mistake, as aforesaid."

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

A similar House bill was laid on the table.

OSAGE INDIANS OF OKLAHOMA

The next business on the Consent Calendar was the bill (H. R. 13407) relating to the tribal and individual affairs of the Osage Indians of Oklahoma.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent that the bill may be passed over without prejudice.

Mr. HOWARD of Oklahoma. Will the gentleman withhold that for a moment?

Mr. CRAMTON. Yes. I will simply say that I have the impression this is not urgent and we might just as well let it wait a little while. I have not made a thorough study of the bill. The gentleman from Montana [Mr. LEAVITT] urges that it be passed, but if the bill came up to-day I would have to object, and I am making this request so that I may have a chance to study it.

Mr. HOWARD of Oklahoma. Mr. Speaker, reserving the right to object to the consideration of this measure, I want to say that all the land and mineral rights and practically all the Indians affected by the bill live in the district which I have the honor to represent. There is some legislation relative to Osage Indian matters necessary. I am not in thorough accord with this bill myself, Mr. Speaker; but it has been worked out, I think, honestly by the members of the Indian Affairs Committee, of which I am a member. Being not in accord with the bill, I realize I could object and stop the consideration of the bill, but I realize that being asked for by the department it can be passed under a suspension of the rules. There is some legislation necessary, and I will say to the gentleman from Michigan that under the conditions I have thought it best to let the bill pass here and go to the Senate where it will not pass this session, but can be ironed out in committee and in conference.

Mr. CRAMTON. Does the gentleman state that this bill which concerns chiefly his constituents will not be passed at this session of the Senate?

Mr. HOWARD of Oklahoma. Yes; and it was my idea, although I object to some of it, not to object, but to let the bill pass the House and go to the Senate and be considered by that body.

Mr. CRAMTON. That confirms my impression that there is no necessity for the House to hurry its consideration.

Mr. HOWARD of Oklahoma. I withdraw my objection to the request of the gentleman from Michigan.

The SPEAKER. May the Chair be permitted to suggest that in view of the length of the Consent Calendar and its importance and interest to many Members, if gentlemen have made up their minds to object to a bill, may the Chair suggest that they do so?

Mr. CRAMTON. Mr. Speaker, my request was that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

UNITED STATES COURT FOR CHINA

The next business on the Consent Calendar was the bill (H. R. 12955) to amend an act entitled "An act creating the United States Court for China and prescribing the jurisdiction thereof," and an act entitled "An act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1921."

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. COOPER of Wisconsin objected.

INTERNATIONAL CONFERENCE FOR SAFETY OF LIFE AT SEA

The next business on the Consent Calendar was House joint resolution (H. J. Res. 266) authorizing an appropriation of $100,000 for the expenses of participation by the United States in the international conference for the revision of the convention of 1914 for the safety of life at sea, to be held in London, England, in 1929.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection?

Mr. LAGUARDIA. Reserving the right to object——

Mr. PORTER. Mr. Speaker, I ask unanimous consent to substitute Senate Joint Resolution 131 in lieu of the House resolution.

Mr. LAGUARDIA. I would like to ask the gentleman why it is necessary to appropriate $100,000 to send a delegation to this conference which is far in excess of what is usually appropriated?

Mr. PORTER. This resolution was approved by the Secretary of State and by the President. It is unnecessary for me to go into the importance of safety at sea. There has been no conference since 1914.

Mr. CRAMTON. But why is it necessary to appropriate $100,000?

Mr. PORTER. The department recommends that sum.

Mr. LAGUARDIA. How many delegates will there be?

Mr. PORTER. I do not know.

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent that this may go over without prejudice until we can get the proper information.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

TWENTY-THIRD INTERNATIONAL CONGRESS OF AMERICANISTS

The next business on the Consent Calendar was the Senate joint resolution (S. J. Res. 97) authorizing the President to appoint three delegates to the Twenty-third International Congress of Americanists, and making an appropriation for the expense of such Congress.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the resolution, as follows:

Whereas the Twenty-third International Congress of Americanists will be held in New York City during the week beginning September 17, 1928, for the consideration of (1) the aboriginal races of America and their relationship to other peoples, (2) the archæological remains found in America and time relations as revealed by them, (3) the habits and customs of the various groups of American Indians and questions of the origin and distribution of these in the Old and New Worlds, (4) the native languages of America, (5) the early history of America, especially in regard to its discovery and early settlement, and (6) geographical and geological questions, especially as related to human activities: Therefore be it

Resolved, etc., That the President is authorized to appoint three delegates to represent the United States at the Twenty-third International Congress of Americanists, to be held in New York City during the week beginning September 17, 1928.

SEC. 2. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $5,000, to be paid by the Secretary of State to the proper officials of such congress as the contribution of the United States toward defraying the expenses of such congress.

The resolution was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

VIADUCT ACROSS THE MAHONING RIVER AT NILES, OHIO

The next business on the Consent Calendar was the bill (H. R. 12894) granting the consent of Congress to the board of county commissioners of Trumbull County, Ohio, to construct a free overhead viaduct across the Mahoning River at Niles, Trumbull County, Ohio.

The Clerk read the title to the bill.

The SPEAKER. Is there objection?

There was no objection.

The following committee amendment was read:

Strike out all after the enacting clause and insert:

"That the times for commencing and completing the construction of the overhead viaduct across the Mahoning River at or near Niles, Trumbull County, Ohio, authorized to be built by the board of county commissioners of Trumbull County, Ohio, by the act of Congress approved July 1, 1926, are hereby extended one and three years, respectively, from the date of approval hereof, and the said act of Congress approved July 1, 1926, is hereby revived and reenacted for such purpose.

"SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended.

A motion to reconsider was laid on the table.

BRIDGE ACROSS THE TENNESSEE RIVER AT CLIFTON, TENN.

The next business on the Consent Calendar was the bill (H. R. 13141) authorizing T. S. Hassell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Tennessee River at or near Clifton, Wayne County, Tenn.

The Clerk read the title to the bill.

The SPEAKER. Is there objection?

Mr. LAGUARDIA. Reserving the right to object, does the gentleman from Tennessee know T. S. Hassell?

Mr. ESLICK. I have known Mr. Hassell for a number of years. I know he is of the best type of our citizenship. I have in my possession a petition from practically every business man of the town of Clifton, and a large number of farmers, asking the passage of this bill, and in addition to that, Mr. Hassell is a man of large means and able to build the bridge himself. Neither the county of Wayne nor the county of Decatur will ever build this bridge. The State is building three other toll bridges across the Tennessee River, and the commissioners of highways for Tennessee say there is no possibility of the State building the bridge.

Mr. LAGUARDIA. I withdraw my objection.

The following committee amendment was read:

Page 2, line 16, strike out the words "twenty-five" and insert the word "twenty" in lieu thereof.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

BRIDGE ACROSS THE NORTH FORK OF THE CUMBERLAND RIVER AT BURNSIDE, KY.

The next business on the Consent Calendar was the bill (H. R. 13203) authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the North Fork of the Cumberland River at Burnside, Pulaski County, Ky.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

There was no objection.

The committee amendments were read, as follows:

Page 1, line 7, strike out the words "the town of."

Page 1, line 8, before the word "Kentucky," insert the words "Pulaski County."

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

BRIDGE ACROSS MISSOURI RIVER, COUNCIL BLUFFS, IOWA

The next business on the Consent Calendar was the bill (S. 3693) authorizing the city of Council Bluffs, Iowa, and the city of Omaha, Nebr., or either of them, to construct, maintain, and operate a free highway bridge across the Missouri River between Council Bluffs, Iowa, and Omaha, Nebr.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in order to facilitate interstate commerce, improve the Postal Service, and provide for military and other purposes, the city of Council Bluffs, a municipal corporation of the State of Iowa, and the city of Omaha, a municipal corporation of the State of Nebraska, or either of them, are hereby authorized to construct, maintain, and operate a free highway bridge and approaches thereto across the Missouri River, at a point suitable to the interests of navigation, between Council Bluffs, Iowa, and Omaha, Nebr., in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. There are hereby conferred upon the city of Council Bluffs and the city of Omaha, or either of them, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

RAILROAD BRIDGE ACROSS BOGUE CHITTO RIVER

The next business on the Consent Calendar was the bill (S. 3808) to authorize the construction of a temporary railroad bridge across Bogue Chitto River at or near a point in township 5 south, range 13 east, St. Helena meridian, St. Tammany Parish, La.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, can any of my colleagues from New York inform me when Tammany became saintly?

Mr. O'CONNOR of New York. The gentleman apparently has not read the history of that great organization.

Mr. LAGUARDIA. I have been living with it, and hence the inquiry.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Lamar Lumber Co. (Inc.) is hereby authorized to construct a temporary railroad bridge across Bogue Chitto River at or near a point in township 5 south, range 13 east, St. Helena meridian, St. Tammany Parish, La., some few miles below where the New Orleans Great Northern Railroad crosses that stream, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendment:

Page 2, line 2, after the figures "1906," insert a colon and the following: "*Provided*, That if the bridge authorized by this act shall at any time be abandoned and no longer used for railroad purposes the same shall be removed from the river by the Lamar Lumber Co. (Inc.), or its assigns, at its or their own expense."

The committee amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

BRIDGE ACROSS THE MISSISSIPPI RIVER AT HELENA, ARK.

The next business on the Consent Calendar was the bill (H. R. 13380) authorizing D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Helena, Ark.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, may I ask the gentleman from Arkansas whether he is acquainted with the grantees named in this bill?

Mr. DRIVER. Yes; I know both of the men named. Mr. Hargraves is a resident of the locality at which place it is proposed to construct the bridge and the other man is a resident of the county immediately beyond in Mississippi.

Mr. LAGUARDIA. And there is no desire on the part of the counties to construct the bridge?

Mr. DRIVER. They are unable to do so, financially and legally. The bill has all of the necessary limitations and protective features in it.

Mr. WHITTINGTON. I may say that I am acquainted with Mr. Dulaney, who is named in the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in order to facilitate interstate commerce, improve the Postal Service, and provide for military and other purposes, D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, be, and they are hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Mississippi River, at a point suitable to the interests of navigation, at or near Helena, Phillips County, Ark., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon the said D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The said D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, are hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, either the State of Arkansas, the State of Mississippi, any public agency or political subdivision of either of such States, within or adjoining which any part of such bridge is located, or any two or more of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation or expropriation, in accordance with the laws of either of such States governing the acquisition of private property for public purposes by condemnation or expropriation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation or expropriation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; (2) the actual cost of acquiring such interests in real property; (3) actual financing and promotion cost, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interest in real property; and (4) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall at any time be taken over or acquired by the States or public agencies or political subdivisions thereof, or by either of them, as provided in section 4 of this act, and if tolls are thereafter charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the amount paid therefor, including reasonable interest and financing cost, as soon as possible under reasonable

charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient for such amortization shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the amount paid for acquiring the bridge and its approaches, the actual expenditures for maintaining, repairing, and operating the same, and of the daily tolls collected, shall be kept and shall be available for the information of all persons interested.

SEC. 6. D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, shall, within 90 days after the completion of such bridge, file with the Secretary of War and with the highway departments of the States of Arkansas and Mississippi, a sworn itemized statement showing the actual original cost of constructing such bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, and upon request of the highway department of either of such States shall, at any time within three years after the completion of such bridge, investigate such costs and determine the accuracy and the reasonableness of the costs alleged in the statement of costs so filed, and shall make a finding of the actual and reasonable costs of constructing, financing, and promoting such bridge; for the purpose of such investigation D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, shall make available all of their records in connection with the construction, financing, and promotion thereof. The findings of the Secretary of War as to the reasonable costs of the construction, financing, and promotion of the bridge shall be conclusive for the purposes mentioned in section 4 of this act, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act, is hereby granted to D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

DEVELOPMENT OF PARK AND PLAYGROUND SYSTEM, NATIONAL CAPITAL

The next business on the Consent Calendar was the bill (S. 1284) amending the act approved April 30, 1926, entitled "An act amending the act entitled 'An act providing for a comprehensive development of the park and playground system of the National Capital,' approved June 6, 1924."

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the proviso in section 1 (a) in the act approved April 30, 1926, entitled "An act amending the act entitled 'An act providing for a comprehensive development of the park and playground system of the National Capital,' approved June 6, 1924" (Stat. L., vol. 44, p. 374), is hereby amended by striking out the words "subsistence not in excess of $10 per day and of travel when attending meetings of said commission or engaged in investigations pertaining to its activities," and inserting in lieu thereof the following: "travel when attending meetings of said commission or engaged in investigations pertaining to its activities and an allowance of $8 per day in lieu of subsistence during such travel and services," and is hereby reenacted so as to read as follows: "*Provided*, That the first members appointed under this act shall continue in office for terms of three, four, five, and six years, respectively, from the date of the passage of this act, the terms of each to be designated by the President; but their successors shall be appointed for terms of six years, except that any person chosen to fill a vacancy shall be appointed only for the unexpired term of the member whom he shall succeed. All members of the said commission shall serve without compensation therefor, but each shall be paid actual expenses of travel when attending meetings of said commission or engaged in investigations pertaining to its activities, and an allowance of $8 per day in lieu of subsistence during such travel and services. At the close of each Congress the Presiding Officer of the Senate and the Speaker of the House of Representatives shall appoint, respectively, a Senator and a Representative elect to the succeeding Congress to serve as members of this commission until the chairman of the committees of the succeeding Congress shall be chosen. The Director of Public Buildings and Public Parks of the National Capital shall be executive and disbursing officer of said commission."

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

PERMITS FOR DRIVERS OF GOVERNMENT-OWNED VEHICLES, DISTRICT OF COLUMBIA

The next business on the Consent Calendar was the bill (S. 1281) to amend section 7 (a) of the act of March 3, 1925 (43 Stat. 1119), as amended by section 2 of the act of July 3, 1926, (44 Stat. 812), so as to provide operators' permits free of cost to enlisted men of the Army, Navy, Marine Corps, and Coast Guard operating Government-owned vehicles in the District of Columbia.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. COLLINS. Mr. Speaker, I object.

PRIVATE CONDUIT ACROSS LINCOLN ROAD, DISTRICT OF COLUMBIA

The next business on the Consent Calendar was the bill (S. 2542) for the construction of a private conduit across Lincoln Road NE., in the District of Columbia.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Commissioners of the District of Columbia be, and they are hereby, authorized to grant permission to Trinity College to lay a conduit for the transmission of power from their power house under and across Lincoln Road NE., between Michigan Avenue and Fourth Street, in the District of Columbia, into and upon the property of Trinity College, which is located on both sides of Lincoln Road, under the regulations and subject to the limitations prescribed in the act entitled "An act regulating permits for private conduits in the District of Columbia," approved May 26, 1900.

SEC. 2. That Congress reserves the right to alter, amend, or repeal this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

PROTECTION OF FISH, DISTRICT OF COLUMBIA

The next business on the Consent Calendar was the bill (S. 2972) for the further protection of fish in the District of Columbia, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 2 of the act of May 17, 1898, entitled "An act for the protection of fish in the District of Columbia," and so forth, as amended by the act of March 3, 1901, entitled "An act to amend the acts for the protection of birds, game, and fish in the District of Columbia," be, and the same is hereby, further amended so as to read as follows:

"SEC. 2. That no person shall catch or kill in the waters of the Potomac River or its tributaries within the District of Columbia any black bass (otherwise known as green bass and chub), crappie (otherwise known as calico bass and strawberry bass), between the 1st day of January and the 29th day of May of each year, nor have in possession nor expose for sale any of said species between the dates aforesaid, nor catch or kill any of said species of fish at any other time during the year except by angling, nor catch nor kill any of the aforesaid species by what are known as out lines or trot lines, having a succession of hooks or devices."

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

CHANGING NAME OF RAILROAD AVENUE

The next business on the Consent Calendar was the bill (H. R. 10073) to change the name of Railroad Avenue between Nichols Avenue and Massachusetts Avenue.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, what is the necessity for changing the name of this street?

Mr. JENKINS. This Railroad Avenue in this section has now become valuable property and the people think the name "railroad" militates against the value. They have had the matter up with the commissioners, and the commissioners are quite agreed to it.

Mr. LAGUARDIA. Do I understand that the name of railroad mitigates against the value of properties?

Mr. JENKINS. It does in that one locality, but not everywhere.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the name of the street now known as Railroad Avenue, between Nichols Avenue and Massachusetts Avenue, part of which is not yet cut through, but now on record as Railroad Avenue SE., be, and the same is hereby, changed to Parkside Avenue, and the surveyor of the District of Columbia is hereby directed to enter such change on the records of his office.

With the following committee amendment:

Line 7, strike out "Parkside" and insert "Fairlawn."

The committee amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

AMENDMENT OF SECTION 574, TITLE 28, UNITED STATES CODE

The next business on the Consent Calendar was the bill (H. R. 12250) to amend section 574, title 28, United States Code.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That paragraph 14 of section 574, title 28, United States Code, is hereby amended to read as follows:

"For the necessary expenses of keeping boats, vessels, or other property attached or libeled in admiralty, such amount as the court, on petition setting forth the facts under oath, may allow."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

ADDITIONAL JUSTICE, SUPREME COURT OF THE DISTRICT OF COLUMBIA

The next business on the Consent Calendar was the bill (H. R. 13116) to provide an additional justice of the Supreme Court of the District of Columbia, and for other purposes.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. I object, Mr. Speaker; and following the admonition of the Speaker, I shall not make the speech I had in mind.

The SPEAKER. Objection is heard. The Clerk will report the next bill.

MILITARY SERVICE OF AMERICAN CITIZENS OF FOREIGN BIRTH

The next business on the Consent Calendar was the resolution (H. J. Res. 268) requesting the President to negotiate with the nations with which there is no such agreement treaties for the protection of American citizens of foreign birth, or parentage, from liability to military service in such nations.

The title of the resolution was read.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Resolved, etc., That the President be, and he is hereby, respectfully requested to endeavor as soon as possible to negotiate treaties with the remaining nations with which we have no such agreement, providing that persons born in the United States of foreign parentage, and naturalized American citizens, shall not be held liable for military service or any other act of allegiance during a stay not exceeding two years in duration in the territory subject to the jurisdiction of any such nation.

With a committee amendment as follows:

Page 2, line 1, strike out the words "not exceeding two years in duration"; and on page 2, line 3, after the word "nation," insert the words "while citizens of the United States of America under the laws thereof."

Mr. JOHNSON of Washington. Mr. Speaker, I would like to ask some one in charge of the resolution why the amendment which strikes out the two-year clause? As I understand it, naturalized American citizens who remain abroad two years are deemed to have expatriated themselves unless they report to the American consul. They cure that expatriation by returning to the United States. Therefore I am inclined to think, while not knowing much about the resolution, that that amendment should not be adopted.

Mr. KELLY. The amendment of the committee covers that point exactly. After two years the presumption is that they have lost their American citizenship.

Mr. JOHNSON of Washington. I withdraw my reservation of an objection.

The SPEAKER pro tempore (Mr. SNELL). The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The House joint resolution as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

BONDING OF DISBURSING OFFICERS

The next business on the Consent Calendar was the bill (H. R. 12203) to authorize the designation and bonding of persons to act for disbursing officers and others charged with the disbursement of public money of the United States.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That any disbursing clerk, or officer, person, or agent who may be charged with the disbursement of public money of the United States, hereinafter referred to as principal disbursing officer, may, when considered necessary and approved in writing by the head of the executive department, or the independent bureau, establishment, or office in which employed, hereinafter referred to as heads of executive departments and establishments, designate and authorize a deputy or deputies, a supervisory officer or officers, or a clerk or clerks in his office, hereinafter referred to as acting disbursing officers, to act for him, and further may authorize one or more of such acting disbursing officers to issue and sign checks for and in the name of the principal disbursing officer for whom they are acting. Heads of departments and establishments shall require such acting disbursing officers to give bond to the principal disbursing officer, which bond, after approval as required for the bond of the principal, shall be filed with the bond of the principal disbursing officer, the form of bond to be approved by the Secretary of the Treasury, and where the bond of the principal disbursing officer is executed by a corporate surety the bond of each acting disbursing officer shall be executed by a corporate surety. In cases where the bond of the principal disbursing officer is $15,000 or less the bonds of the acting disbursing officers shall be in the same penalty as the bond of the principal; if the bond of the principal is in a penalty of more than $15,000 the bonds of the acting disbursing officers shall be in the same penalty, except where the head of the executive department or establishment shall be of the opinion that the safety of the public funds will not be jeopardized, in which event the bonds of the acting disbursing officers may be accepted in a penalty less than that of the bond of the principal but in no case with a penalty less than $15,000.

SEC. 2. In cases where an acting disbursing officer is designated and authorized to act for his principal for a period not exceeding 90 days in the aggregate during the year, to be so stated in the body of the bond, fractions of a day being counted as full days, the heads of the executive departments and establishments shall require such acting disbursing officer to give bond in the same penalty as the bond of the principal. In such cases principal disbursing officers shall include with each monthly or quarterly account, as the case may be, a certificate on form approved by the Secretary of the Treasury to the effect that the provisions of this section have been fully complied with during the period for which the account is rendered and for prior periods. Bonds required under this section shall not be approved if the annual premium rate therefor is over one-third the annual premium rate charged on the bond of the principal, except that a minimum charge of $5 may be made in any such case.

SEC. 3. The bond of the principal disbursing officer shall be answerable to the extent of the penalty of the bond of each acting disbursing officer for the act or acts of such acting disbursing officer; liability under the bond of the principal disbursing officer for his own acts shall not be reduced by any recovery or right of recovery thereon on account of the act or acts of the acting disbursing officers; liability under the bond of the principal disbursing officer for the act or acts of the acting disbursing officers shall not be reduced by reason of any recovery or right of recovery thereon on account of the act or acts of the principal

disbursing officer. The United States shall have the right to recover on the bond of the principal to the full extent of the aggregate penalties of both the bond of the principal and the bonds of the acting disbursing officers where losses occur due to the joint act or acts of the principal and the acting disbursing officers.

SEC. 4. All liabilities and penalties prescribed by law for official misconduct of principal disbursing officers shall from the effective date of this act apply in like measure to acting disbursing officers.

SEC. 5. Liability in accordance with the provisions of this act shall not attach to sureties on the bonds of principal disbursing officers where such bonds have been executed prior to the effective date of this act unless there first be secured from such sureties their written consent thereto.

SEC. 6. The provisions of this act shall not be held to modify or repeal any existing legislation under authority of which a deputy or deputies or other person or persons may act for and sign official checks in the name of any disbursing clerk or officer, person, or agent who may be charged with the disbursement of public money of the United States: *Provided, however,* That the provisions of this act shall be applicable in such cases where considered necessary and approved in writing by heads of departments and establishments. This act shall take effect January 1, 1929.

With a committee amendment as follows:

Page 4, line 6, strike out the word "also."

The SPEAKER pro tempore. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

INMATES OF INDUSTRIAL REFORMATORY AT CHILLICOTHE, OHIO

The next business on the Consent Calendar was the bill (H. R. 12249) to remove the age limit of persons who may be confined at the United States industrial reformatory at Chillicothe, Ohio.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Reserving the right to object, Mr. Speaker—and I am going to object—I want to call the attention of the House to this bill. I am certain that the distinguished chairman of the Committee on the Judiciary has not obtained all the facts. We created a reformatory on this farm and provided that the sentences of boys should be fixed by the Federal Government from the ages of 17 to 30, except boys convicted of murder of the first and second degree, rape, or arson. We have received communications stating that they want to remove the age limit of 17. That is the very purpose of the reformatory.

Mr. O'CONNOR of New York. Does the gentleman want to remove it down or up?

Mr. LAGUARDIA. I am coming to that. The first step is to remove the 17-year age limit, so that a judge can send a boy direct to the penitentiary. Then they go on and want to remove the 30-year limit, and that is the most drastic request ever made by the Department of Justice, so that any influential prisoner having sufficient influence, instead of being sent to the penitentiary, may be sent to this farm. I am going to object to this and oppose the proposition in every form.

Mr. GRAHAM. I do not suppose that I can remove from the gentleman's mind his objection to this proposition, but I want first to deny his assertion that I do not know the facts. This bill is not my creation, nor have I personally sponsored it. It was passed by the committee, which heard about the bill and realized its importance. There are cases where the 30-year limit works a great hardship on first offenders and there are cases where the 17-year limit works an equal hardship upon persons, where they are calculated to demoralize the institution instead of being themselves helped or promoted by it.

The SPEAKER pro tempore. Objection is heard, and the Clerk will report the next bill.

AGRICULTURAL DAY

The next business on the Consent Calendar was Senate Joint Resolution 61, to provide for an agricultural day.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

Mr. CRAMTON. Mr. Speaker, I object.

NAVAL AMMUNITION DEPOT, LAKE DENMARK, N. J.

The next business on the Consent Calendar was the bill (H. R. 12236) to provide an appropriation for the payment of claims of persons who suffered property damage, death, or personal injury due to the explosion at the naval ammunition depot, Lake Denmark, N. J., July 10, 1926.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, I want to suggest to the gentleman from New Jersey that on page 2, line 2, after the words "payment of claims" we insert the words "in full settlement," so that we may not have a repetition of these claims later on the ground that they did not receive adequate compensation. If the gentleman will accept that amendment, I shall not object.

Mr. ACKERMAN. Mr. Speaker, under the reservation, may I submit a further amendment, increasing the amount to $353,838.75, being the amount of claims as filed with the Navy Department and shown in House Document 202?

Mr. UNDERHILL. Mr. Speaker, this bill has been considered by the committee. It is of a very important character and an extremely complicated one. This method of settling or attempting to settle these claims was suggested because of the tremendous amount involved, and any amendment which might be offered at this time would not have the approval of the committee—and I am speaking more particularly of the chairman, because I would have no time to look into it.

The Navy Department was given authority to investigate the explosion at Lake Denmark. They spent a great deal of time in gathering evidence, in appraising the damage, and have brought in a most complete report. Now, if the gentleman or his constituents are dissatisfied with the amount which the Navy Department has awarded, their course should not be to offer an amendment which materially increases the amount carried in the bill as reported by the committee. To do that this afternoon is rather short notice to give the Committee on Claims and will jeopardize the proposed legislation. I will have to oppose the amendment, but I will not oppose the consideration of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, with the understanding that the amendment I have suggested will be accepted by the gentleman from New Jersey, I shall not object to the consideration of the bill; but I think I shall join with the gentleman from Massachusetts in opposing the amendment the gentleman from New Jersey has suggested. I think the gentleman from New Jersey should take the $161,000 as carried in the bill, because I can see the distinguished gentleman from Wisconsin on his feet now, and there is great likelihood that there may be an objection to the consideration of the bill.

Mr. ACKERMAN. I will accept the amendment suggested by the gentleman from New York.

Mr. LAGUARDIA. But what about the amendment the gentleman has suggested?

Mr. ACKERMAN. I will have to withdraw it.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the sum of $161,622.10 is appropriated, out of any money in the Treasury not otherwise appropriated, to enable the Comptroller General of the United States to make payment of claims for property damage, death, or personal injury due to the explosion at the naval ammunition depot, Lake Denmark, N. J., July 10, 1926, to the respective persons and in the respective amounts as recommended by the Comptroller General of the United States and as fully set forth in House Document No. 202, Seventieth Congress, first session, pursuant to the act of March 2, 1927 (44 Stat., pt. 3, p. 1800).

With the following committee amendment:

Page 1, line 3, strike out all of the language in lines 3 and 4 and insert in lieu thereof the following: "That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $161,622.10, or such portion as may be necessary, to enable the."

The committee amendment was agreed to.

Mr. LAGUARDIA. Mr. Speaker, I offer an amendment. On page 2, line 2, after the word "claims," insert the words "in full settlement."

The SPEAKER pro tempore. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Page 2, line 2, after the word "claims," insert the words "in full settlement."

The amendment was agreed to.

Mr. ANDRESEN. Mr. Speaker, I offer an amendment.

The SPEAKER pro tempore. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ANDRESEN: At the end of the bill add a new section, as follows:

"SEC. 2. That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to O. A. Alfson the sum of $5,000. Such sum shall be in full satisfaction of all claims against the United States for damages resulting from the death of Orlando M. Alfson, the son of the said O. A. Alfson, and late private in the United States Marine Corps, who on July 10, 1926, was killed in the fire and explosion which occurred at the naval ammunition depot, Lake Denmark, N. J."

Mr. UNDERHILL. Mr. Speaker, this bill is not complete; that is, not all of the claims are covered by the report from the Navy Department. There are a number of death claims which, I believe, have just been submitted to Congress by the Navy Department, which have not as yet even been printed. I do not know whether the name of this individual who was killed is included in the list of those who suffered death by this explosion. From the reading of the amendment, if he were a member of the United States Marine Corps, he certainly would come under the provisions of the law which provides pensions for dependents of soldiers. It is very dangerous to bring these amendments up on the floor of the House without any consideration whatever. This claim may be included in the report that has just been received from the Navy Department, and if so his dependents would probably be paid a double allowance under the amendment offered by the gentleman from Minnesota.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. UNDERHILL. Yes.

Mr. LAGUARDIA. And is it not the orderly procedure in the consideration of bills on the Consent Calendar that when an amendment is contemplated to serve notice of the amendment so that the House may be apprised of it before consenting to consideration? We can not legislate properly in this way.

Mr. SCHAFER. Will the gentleman yield?

Mr. UNDERHILL. Yes.

Mr. SCHAFER. If it had been known that these amendments were going to be offered to the bill, which has received the careful consideration of the Claims Committee, this bill certainly would not now be before us under unanimous consent. In view of this situation I think the amendment should be defeated.

Mr. UNDERHILL. That is the general procedure and every Member of the House knows that when these bills come up, either on the Consent Calendar or on the Private Calendar, if any Member has an amendment to offer, if he is dissatisfied with the report of the committee, he notifies the committee that he is going to offer an amendment, which gives the committee a chance to protect itself before the bill is even allowed consideration. I think it a dangerous practice to follow or precedent to establish to act on an amendment which may or may not have been properly considered by the committee. It certainly is unfair to the committee, and in this instance wrong to all the other claimants who have been injured or killed. I hope the House will not accept the amendment.

The SPEAKER pro tempore. The present occupant of the chair feels that if the gentleman were going to offer an amendment of this character he should have given notice before the time of objection had expired. So the Chair will open the bill for objection again, if the amendment is to be considered.

Mr. SCHAFER. Then I shall object to the consideration of the bill.

Mr. NEWTON. A point of order, Mr. Speaker.

The SPEAKER pro tempore. The gentleman will state it.

Mr. NEWTON. This bill came up here, it was unobjected to, amendments were submitted and have been voted upon. I make the point of order it is too late for an objection to be made. The gentleman from Minnesota [Mr. ANDRESEN] is attempting to perfect the bill to take care of the dependents of a man who lost his life in this explosion, who is not protected under the terms and provisions of the bill as described in the document. The committee that has deliberated over this whole business has had all the evidence before it. This is not something that is extraneous to the issue presented to the committee, and I submit the gentleman ought to have the amendment acted upon.

The SPEAKER pro tempore. The present occupant of the chair feels that when we are transacting unanimous consent business, where everything is done by unanimous consent, it is rather unfair to the House to bring in entirely new matter at the amendment stage. The present occupant of the chair will rule in this way, and if the gentleman desires to appeal from the decision of the Chair, very well.

Mr. NEWTON. I must confess I do not know of any precedent for the gentleman's ruling.

The SPEAKER pro tempore. The Chair thinks we have got to protect the membership of the House when we are acting by unanimous consent.

Mr. LAGUARDIA. Mr. Speaker, in order not to establish a precedent in the matter, I reserve my right to object to state that the action of the gentleman from Minnesota takes me entirely by surprise, and this being so, I now move that the action of the House in considering this bill be now vacated. This will bring the matter squarely before us.

Mr. DOWELL. Mr. Speaker, a point of order.

The SPEAKER pro tempore. The gentleman will state it.

Mr. DOWELL. I think the gentleman's motion is not in order at this time.

Mr. CRAMTON. Mr. Speaker, in order not to waste a lot of the time of the House, when there are so many bills awaiting consideration, may I suggest to the gentleman from Minnesota that he take the course that has always been taken in similar situations. The gentleman has suggested his amendment, there has been a protest against its consideration, and let me suggest that the gentleman withdraw his amendment and not hold up consideration of the calendar.

Mr. ANDRESEN. Mr. Speaker, I will say to the gentleman from Michigan that the only reason I am bringing up the amendment at this time is on account of certain statements made by officials in the Navy Department regarding death claims. I called at the Navy Department and they told me they did not regard the value of life as of such great consequence as they regarded damage to property.

Mr. SCHAFER. If the gentleman will yield, if this man was a member of the military or naval forces of the United States, his dependents would be entitled to pension benefits, the same as in the case of every other soldier, sailor, or marine killed in line of duty.

Mr. ANDRESEN. Mr. Speaker, I think I am entitled to speak on my amendment.

The SPEAKER pro tempore. The gentleman is recognized for five minutes.

Mr. ANDRESEN. This case is that of a farmer boy from my district.

Mr. CRAMTON. Will the gentleman yield?

Mr. ANDRESEN. I yield to the gentleman from Michigan.

Mr. CRAMTON. I want to state to the gentleman that the House has the right, when a question is asked if there is objection to consideration of the bill, to suppose that the question relates to the bill before the House and not to a bill with a number of amendments that have not been offered. The gentleman takes the House by surprise. If the gentleman desired to offer an amendment he should have given the House notice.

Mr. ANDRESEN. The bill has been considered by the Claims Committee. I did not know there was any particular individual in this House that we had to consult.

Mr. CRAMTON. You do not have to consult anyone, but you have to consult the House.

Mr. ANDRESEN. I have offered the amendment, and I presume that I consulted the House when I offered it.

Mr. CRAMTON. Without giving the House notice when the House could have stopped it by an objection.

Mr. ROMJUE. Will the gentleman yield? I want to call attention to the fact that the bill was not objected to, and one amendment was adopted, and after that the gentleman from Minnesota offered his amendment.

Mr. ANDRESEN. I can not yield further. I want to give the House some facts about this amendment. This young man was a marine. He was formerly a boy from my district, and he enlisted in the Marine Corps and was stationed at Lake Denmark, where the explosion took place and he lost his life. Prior to his enlistment this young boy was on an 80-acre farm with his father and mother. He worked there without compensation. He wanted to see a little more of life, and so he took an enlistment in the Marine Corps. His father and mother are along somewhere about 55 or 60 years old, and were partially dependent on the boy. They have two other children in the family, a girl and a boy. I feel in justice to them that they should have some consideration, and I propose in the amendment that his father shall have $5,000, which I think is the maximum amount under the law. I hope the amendment will prevail.

Mr. SCHAFER. Mr. Speaker, I rise in opposition to the amendment. If the House is going to adopt the policy of approving amendments to bills which the House does not have notice of prior to the bill passing the objection stage, and which amendments are opposed by the committee reporting the bill, I feel constrained to object to the consideration of every bill on the Unanimous Consent Calendar. We know that generally on the days that the Private and Consent Calendars are considered under the unanimous-consent rule that far from a majority of the membership is present.

Here we have a bill involving a good many thousand dollars which was very carefully considered by the Claims Committee, reported out by that committee, and placed on the Unanimous Consent Calendar. I agree that the father and mother may be dependent, but this young man was in the military service of the United States. If he was killed in line of duty that father and mother, if dependent, have the same pension rights that the father and mother of any other boy in the Navy, Marine Corps, or the Army who was killed in line of duty has.

Mr. O'CONNOR of New York. What does the gentleman mean by saying the House must have notice of the amendment? The gentleman offered his amendment just as other amendments have been offered all the morning of which the House had no previous knowledge.

Mr. SCHAFER. Generally when a bill is before the House, when a reservation to object is made the Member having amendments gives notice that he will offer such an amendment. The bill under consideration would never have passed the objection stage if members of the Committee on Claims thought that amendments such as the pending one would be offered.

Mr. CRAMTON. Will the gentleman yield?

Mr. SCHAFER. Yes.

Mr. CRAMTON. Of course, the gentleman from New York [Mr. O'CONNOR] will recall something of the practice in these cases, and that I am consistent even when it hurts me to be so. On a previous Consent Calendar day, a bill came up with reference to the transfer of seized automobiles to the use of the Immigration Service. No objection was made to the bill. When the bill came up for consideration, after it had passed the objection stage, I offered an amendment of which I had not given notice, making it apply also to boats, because there seemed to me to be good reason for that. The gentleman from Illinois, Mr. CHINDBLOM, on the committee, protested at my offering that amendment at that stage, not having given notice. He said that I took him by surprise. Therefore I sought to withdraw my amendment, although I believed in it, and there was sentiment here for it. I was not permitted to withdraw it, and then on a standing vote, I stood up and voted against my own amendment in order to keep faith with the House. That is what I feel the gentleman from Minnesota [Mr. ANDRESEN] should do, because Members who are here have a right to rely on the nature of the bill that is going to come up.

Mr. O'CONNOR of New York. Gentlemen talk about giving notice to somebody and calling it the House.

Mr. CRAMTON. But it is notice to the House.

Mr. O'CONNOR of New York. The gentleman offered amendments to-day. Did he give notice to anybody about them?

Mr. CRAMTON. I have not offered an amendment to-day that I did not give advance notice of before the objection stage was passed.

Mr. O'CONNOR of New York. To whom?

Mr. CRAMTON. By a public statement made here in the House.

Mr. O'CONNOR of New York. I am not aware that the gentleman did that.

Mr. CRAMTON. And the RECORD will show that I have done it on every occasion.

Mr. SCHAFER. I will say for the benefit of the gentleman from New York [Mr. O'CONNOR] that a bill came up to-day to create an additional judgeship in the State of New York. It was objected to this afternoon by three Members from New York. How would those three Members from New York feel if another bill to create a judgeship in another State should come before the House for consideration under unanimous consent, and after the objection stage was passed and the bill was before the House for consideration, a Member interested in creating the additional judgeship in New York should offer an amendment to do so?

Mr. O'CONNOR of New York. I would probably make a point of order that it was not germane.

Mr. SCHAFER. I hope this amendment is defeated. I intend to use every parliamentary advantage that I can to defeat it. If the House is going to adopt amendments which it does not have notice of prior to passing the objection stage and which amendments are opposed by the committee reporting the bill I am going to object to the consideration of every bill on the Unanimous Consent Calendar in order to protect the committees.

Mr. REED of New York. Mr. Speaker, I offer the following amendment to the amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. REED of New York to the amendment offered by Mr. ANDRESEN: At the end of the amendment insert "and to John Little, of Cattaraugus, N. Y., the sum of $5,000."

Mr. REED of New York. Mr. Speaker and gentlemen of the House, I must confess that this method of putting claims on a bill under unanimous consent takes me as well as others very much by surprise. However, I would be derelict in my duty if I were to stand by and not try to protect the parents of a heroic boy, John A. Little, from Cattaraugus County, N. Y. I shall never forget as long as I live the day his father, mother, and little crippled sister came to my home and told me their sad story. The little sister had become crippled about the time that the boy lost his life in this explosion. He was a marine and had gone out as a result of the lurid advertisements put out by the Navy Department. If you could see the letters of commendation from General Lejeune and others you would be very much inclined to agree to this amendment. The boy rushed in, at the risk of his own life, and lost his life trying to save the lives and property of others. It was tragic and heroic. If it is fair for the parents of one boy to get $5,000, it is certainly fair for this particular boy to get $5,000 under similar circumstances.

Mr. HUDSON. Was the case that the gentleman from New York presents and the case of the gentleman from Minnesota before the Claims Committee when this bill was adopted?

Mr. REED of New York. I have been before the chairman.

Mr. HUDSON. But they did have notice?

Mr. REED of New York. I had no notice of this coming up in this form. The only reason that the parents of this boy are not compensated is because of the usual technicality. He was in the service and killed in the discharge of his duty, but it so happens that his father and mother can not come forward and swear that they were absolutely dependent upon the boy; that he contributed to their support. As a matter of fact, when these boys go out and join the marines in most cases the money they get is not enough for their own support, at least not to the extent of sending money home to actual dependents.

Mr. HUDSON. Was this case presented to the Committee on Claims so that they had cognizance of it?

Mr. REED of New York. I have gone over it all with the chairman of the committee, and I am not criticizing him at all. There is a technicality that stands in the way just the same as in the way of this other bill for the boy from Minnesota. The parents of both of these boys have suffered, and they should be compensated. If we are going to bring these bills up in this way, it is as fair for the parents of one boy to be compensated as for the parents of the other boy.

Mr. NEWTON. As I understand it, the Navy Department takes the position that if the income of the father and mother exceeds $300 there is not a case of dependency made out under the pension law.

Mr. REED of New York. That is true, and they apparently attach little value to life, but for property destroyed they will give liberally.

Mr. NEWTON. Yes.

Mr. REED of New York. But here is this heroic boy, who is commended for his heroism in letter after letter; this boy who rushed in at the risk of his own life to save lives and property. They have this little crippled girl, they are heartbroken, and they have had a hard time to get along. This boy would in years to come have been their main support.

Mr. NEWTON. I think we ought to see that the dependents of every enlisted man and every officer who lost his life should be at least entitled to what he got while in the service.

Mr. REED of New York. I have letters on file showing that these soldiers who lost their lives had absolute notice that it was only a question of time until they would be brought out.

Mr. LAGUARDIA. Why do you take up one and not all?

Mr. REED of New York. I say let us take care of them all or none.

Mr. ACKERMAN. I understand another batch of claims was brought in on Saturday, but the document has not yet been printed.

Mr. UNDERHILL. Mr. Speaker, I think I can clarify the situation. There is no difference between the gentleman from New York [Mr. REED] and the gentleman from Minnesota and the Committee on Claims or the Navy Department, except that the Navy Department is carrying out the law as framed by Congress. There are 729 claims before you in this bill of Mr. ACKERMAN'S. Most of them are for property damaged, ranging from small sums up to thousands of dollars. There are only two death claims included. Last Saturday the Navy Department sent in a supplemental report with about 129 more claims, about 20 of them being death claims.

Now, irrespective of what the law says the Navy Department shall do in the way of pensioning dependents of service men killed in the performance of their duty, that does not bind or prevent those who are adjudicating these claims from

bringing in a favorable claim for $5,000 for the death of these men, and they may be included in this batch which has just recently been sent in, and which I have not seen.

Mr. REED of New York. They will not be included unless they prove to be absolute cases of dependency; unless they can prove that the boy was sending money home to his father.

Mr. UNDERHILL. That is with reference to the pension law. That does not refer to these claims. The Committee on Claims does not take that into consideration. A husband is killed, and the family is dependent on him. We give a certain amount as authorized for that. The wife of a man is killed. He is not dependent on her, but we make an allowance for the death of that woman. My understanding is that all these who were killed in this explosion are going to be considered. But the question this afternoon is, Do you want to stop payment to 729 deserving claimants who have been waiting for two years for the settlement of their claims in order that you may take up two cases, which may possibly be included in this new batch that has just been received by the House?

Mr. NEWTON. I notice from the House report that when a naval officer is killed the widow puts in her claim, and it comes here, and is turned down by the Comptroller General because under existing pension laws she has a pensionable right, and therefore gets no more. The committee approves that in their report. I am not questioning that, but I do say that here is a case of an enlisted man——

Mr. UNDERHILL. If she had not been allowed anything or had not come under the laws which Congress passed, it is not my fault, and not the fault of the Committee on Claims. It is the fault of Congress. But we are asked to make exceptions of one or two cases where several people lost their lives and much property was destroyed and many people permanently injured for life. You can not take two cases and because of two cases jeopardize the payment of the claims of 729 people who have been waiting for two years for the adjudication of their claims by the United States Government.

Mr. SUMNERS of Texas. Have these two claims been considered by your committee?

Mr. UNDERHILL. No.

Mr. ANDRESEN. My claim has been considered by the committee and rejected.

Mr. UNDERHILL. How could you do otherwise? Congress has authorized the Navy Department and the Comptroller General to make a thorough investigation of all these claims.

The SPEAKER pro tempore. The question is on the amendment to the amendment.

The question was taken; and on a division (demanded by Mr. REED of New York) there were—ayes 34, noes 43.

So the amendment to the amendment was rejected.

The SPEAKER pro tempore. The question is on the original amendment.

The question was taken; and on a division (demanded by Mr. ANDRESEN) there were—ayes 32, noes 47.

So the amendment was rejected.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

PRELIMINARY EXAMINATIONS OF SUNDRY STREAMS

The next business on the Consent Calendar was the bill (H. R. 13484) authorizing preliminary examinations of sundry streams with a view to the control of their floods, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, why are not these items included in the regular rivers and harbors bill?

Mr. KOPP. I make the answer to the gentleman by reason of the enforced absence of the chairman to-day. These were all considered by the Committee on Flood Control and they merely call for preliminary surveys.

Mr. LAGUARDIA. That is quite true.

Mr. HOOPER. Mr. Speaker, I object.

RECLAMATION OF KOOTENAI INDIAN ALLOTMENTS IN IDAHO

The next business on the Consent Calendar was the bill (H. R. 11468) authorizing the Secretary of the Interior to execute an agreement or agreements with drainage district or districts providing for drainage and reclamation of Kootenai Indian allotments in Idaho within the exterior boundaries of such district or districts that may be benefited by the drainage and reclamation work, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, I have two perfecting amendments which I have discussed with the gentleman from Idaho [Mr. FRENCH] and I expect to offer those amendments if the bill is considered.

Mr. O'CONNOR of New York. Mr. Speaker, reserving the right to object, does the gentleman think that is sufficient notice to give to the House—the statement that merely perfecting amendments are to be offered?

Mr. CRAMTON. I will give as much information as the gentleman from New York desires.

Mr. O'CONNOR of New York. These amendments may be perfecting amendments but there may be other important amendments.

Mr. LAGUARDIA. But somebody else can object.

Mr. CRAMTON. I have given the notice and it has given the gentleman from New York a chance to show his interest. In view of that interest I will take the time of the House for the purpose of stating that the amendments are as follows: On page 3, line 13, strike out the words "and for the benefit of the Indians" and insert in lieu thereof the following:

And the balance placed in the Treasury to the credit of the Indians to bear interest at the rate of 4 per cent per annum.

On page 3, lines 18 to 20, strike out the words:

And the balance owing at that time shall be due and payable in not less than 20 annual installments.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized to enter into an agreement with drainage districts now formed or to be formed in pursuance to the drainage laws of the State of Idaho providing for the drainage and reclamation of Kootenai Indian allotments situated within the exterior boundaries of any of such districts after he shall have first determined the plans submitted by such district or districts of the work to be accomplished that shall benefit the Indian allotments. The share of the cost that may be apportioned shall not exceed $114,000 for the total acreage of Indian lands approximating 2,436 acres, and said sum, or so much thereof as may be required to pay the Indians' share of the cost of the work, shall be payable in not less than 20 annual installments, payments to begin on the same date that payments are to begin for lands other than Indian that are within the respective irrigation districts, and such payments shall be made without interest: *Provided*, That should at any time it appear to the said Secretary that construction work is not being carried out in accordance with the plans submitted to him by any of the districts with which contract may have been executed as herein provided for, he shall notify the district of its delinquency and advise that payments will not be made under the contract until such work shall have been done in accordance with the said plans: *Provided further*, That in determining the share of the cost of such work to be paid on behalf of the Indian lands to the district within which such lands are situated, there shall be taken into consideration any deductions that may not properly be apportioned against the Indian lands, and in no event shall the Indian lands bear a share of the cost in excess of the ratio their acreage benefited bears to the total lands benefited within any such district, the total Indian acreage to be benefited to be definitely determined by the said Secretary of the Interior: *Provided further*, That the amount herein authorized to be appropriated to cover the share of the cost of the work on behalf of the Indian lands shall be reimbursed to the United States from the proceeds of leases covering the Indian lands benefited by the drainage work, and said Secretary is hereby authorized to lease such lands not actually being cultivated by the Indians themselves for agricultural purposes for periods not in excess of 10 years, and the proceeds derived therefrom shall be used for payment of the cost of said work and for the benefit of the Indian: *Provided further*, That there is hereby created against such lands a first lien, which lien shall not be enforced during the period that the title to such lands remains in the Indians but that in case of sale of any such lands said lands shall be sold subject to the first lien herein created, and the balance owing at that time shall be due and payable in not less than 20 annual installments: *Provided further*, That said Secretary of the Interior, through the Commissioner of Indian Affairs, or his duly authorized agent, shall be recognized by any district with which contract shall be entered into in accordance with the provisions of this act in all matters pertaining to its operation in the same ratio that the Indian lands bear to the total area of lands within the district, and that the district books and records shall be available at all times for inspection by said representative: *Provided, however*, That said Indian lands shall not be subject to the provisions of any district laws until such time as the Indian title in and to any such lands shall

become extinct, nor shall they be subject to operation and maintenance charges during the period that such lands remain in Indian ownership.

Mr. CRAMTON. Mr. Speaker, I offer two perfecting amendments.

The SPEAKER pro tempore. The gentleman from Michigan offers amendments, which the Clerk will report.

The Clerk read as follows:

Amendments offered by Mr. CRAMTON: Page 3, line 13, strike out the words "and for the benefit of the Indians," and in lieu thereof insert the following: "And the balance placed in the Treasury to the credit of the Indians to bear interest at the rate of 4 per cent per annum."

Page 3, lines 18 to 20, strike out the words "and the balance owing at that time shall be due and payable in not less than 20 annual installments."

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

MECHANICAL REPRODUCTION OF MUSICAL COMPOSITIONS

The next business on the Consent Calendar was the bill (H. R. 13452) to amend the act entitled "An act to amend and consolidate the acts respecting copyright," approved March 4, 1909, as amended, in respect of mechanical reproduction of musical compositions, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. HOOPER. Mr. Speaker, acting for the gentleman from Indiana [Mr. VESTAL] I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

LINCOLN NATIONAL FOREST

The next business on the Consent Calendar was the bill (H. R. 12113), providing for the acquirement by the United States of privately owned lands situated within certain townships in the Lincoln National Forest, in the State of New Mexico, by exchanging therefor lands on the public domain also within such State.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. HUDSON. Mr. Speaker, reserving the right to object, and I do not intend to object, I want to ask a question about the bill because of my interest in the policy with reference to these timber lands of the West. Does this bill provide for the exchange of lands within the national forest or forest reserve which have valuable timber on them or lands upon which the valuable timber has been taken away by private interests? In other words, is it taking cut-over lands and giving fresh timber lands to private concerns?

Mr. MORROW. As I understand, this is timber land now in the national forest that is privately owned. The national-forest people themselves desire to exchange this land for lands outside upon the public domain. The parties, I understand, live outside the State of New Mexico and are desirous of getting lands for grazing purposes without the national forest in exchange for lands within the forest which are valuable to conserve the watershed of the country and the rivers. The bill has the approval of the Forest Service itself. They want to eliminate the private holdings in the forest in order that they may supervise the forest to better advantage. These people are willing to exchange, and the exchange must be made on an equal-value basis and it must be approved by both the Secretary of the Interior and the Secretary of Agriculture in agreement with the private holders. No advantage can be taken in any way because it is upon an equal-value basis and they want to get, as I understand it, grazing land without the forest.

Mr. HUDSON. I am not so much concerned about the equal-value basis as I am about conserving the watershed, and this does that?

Mr. MORROW. That is exactly the purpose of the act.

Mr. JOHNSON of Washington. It is also in the interest of proper fire protection and general conservation.

Mr. MORROW. It will also improve the general supervision of the Forest Service.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That whenever the owner or owners of any privately owned lands, situated within townships 16 and 17 south, range 13 east, New Mexico principal meridian, within the county of Otero and State of New Mexico, and within the present boundaries of the Lincoln National Forest, shall submit to the Secretary of Agriculture a proposal for the exchange of said lands for lands upon the public domain situated elsewhere in the State of New Mexico, and such Secretary shall be of opinion that the acquirement of the same by the United States for national-forest purposes would be beneficial thereto, he is hereby authorized and empowered to transmit to the Secretary of the Interior such offer so made to him, together with such recommendations as he may see proper to make in connection therewith, together with a description of the property included in such offer and an estimate of the commercial or other value thereof, intrinsically or otherwise; and if he shall recommend the acquirement of the same by the United States under the provisions hereof, then, in such event, the Secretary of the Interior shall be, and hereby is, authorized and empowered, in his discretion, to enter into and conclude negotiations with such owner or owners thereof, and in exchange for such designated privately owned lands, and upon conveyance by the owner or owners thereof to the United States by a good and sufficient deed, to cause to be patented to such owner or owners such acreage of nonmineral, nonirrigable grazing lands not suitable for agricultural purposes, except for raising grass, situated within the said State of New Mexico, of equal value, as near as he may be able to determine, to the lands so conveyed to the United States.

SEC. 2. That any lands conveyed to the United States under the provisions of this act shall, upon acceptance of the conveyance thereof, become and be a part of such Lincoln National Forest.

SEC. 3. That before any exchange of lands as above provided is effected, notice of such exchange proposal describing the lands involved therein shall be published once each week for four consecutive weeks in some newspaper of general circulation in the county in which such lands so to be conveyed to the United States are situated.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

Mr. MORROW. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting the report upon the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

Mr. MORROW. Mr. Speaker, the enactment of this legislation (H. R. 12113) permits the national forest supervision to eliminate privately owned lands. It allows the Forest Service to carry forward conservation, in protecting the timber at the headwaters of the streams, in forest-fire control, and in the general preservation of this natural resource.

I am in favor of the National Forest Service policy as it is being carried out in our arid States. This policy, strictly complied with, will tend to protect the moisture which is so essential for arid-land development. As stated, with this policy I am in full accord. But in the exchange of land there must be careful supervision, so that the Government will at all times be fully protected. The report, which I attach, will explain clearly the purposes of the bill:

[H. Rept. No. 1526, 70th Cong., 1st sess.]

ACQUISITION OF CERTAIN LANDS IN LINCOLN NATIONAL FOREST, N. MEX.

Mr. MORROW, from the Committee on the Public Lands, submitted the following report (to accompany H. R. 12113):

The Committee on the Public Lands, to whom was referred H. R. 12113, providing for the acquirement by the United States of privately owned lands situated within certain townships in the Lincoln National Forest, in the State of New Mexico, by exchanging therefor lands on the public domain also within such State, having considered the same, report favorably thereon with the recommendation that the bill do pass without amendment.

In my opinion, this is proper legislation, especially in the State of New Mexico, where the national forest should be protected to conserve the moisture at the headwaters of streams, and also to remove from within the forest all privately owned lands. The bill contemplates doing this in the Lincoln National Forest. The lands proposed for exchange aggregate an area of approximately 11,520 acres. The selection will be on an equal-value basis.

I have the assurance of the Department of Agriculture that the exchange will be carried out in the most satisfactory manner possible; that the value placed on the lands to be exchanged within the forest is now estimated at $2.50 per acre. Lands without the forest are to be selected in lieu of these lands. It is to the advantage of the Forest Service to own all lands embraced within the forest area, and it is to the advantage of the State to protect the forests wherever possible, and especially in the arid belt.

The letters from the Secretary of Agriculture and the Secretary of the Interior are attached hereto and made a part of this report.

APRIL 6, 1928.

Hon. N. J. SINNOTT,
Chairman Committee on the Public Lands,
House of Representatives.

DEAR MR. SINNOTT: Reference is made to your letter of March 22, inclosing copy of H. R. 12113, a bill providing for the acquirement by the United States of privately owned lands situated within certain townships in the Lincoln National Forest, in the State of New Mexico, by exchanging therefor lands on the public domain also within such State, and asking for a report thereon.

The proposed legislation would authorize the exchange of privately owned lands within certain townships in the Lincoln National Forest, which were found to be valuable for forestry purposes, for an equal value of public nonirrigable grazing lands within the State of New Mexico not suitable for agriculture except for the raising of grass. The value of the privately owned lands is to be determined by the Secretary of Agriculture, while the publicly owned lands are to be valued by the Secretary of the Interior. The exchange can not be consummated except with the approval of the Secretaries of the Interior and Agriculture. The bill is identical with an act passed February 14, 1923 (42 Stat. 1245), except that it relates to different townships within the Lincoln National Forest.

Since it is the policy of the Federal Government to consolidate its holdings within the national forests whenever this can be done on an equitable basis, it is the feeling of this department that the proposed legislation would be in the public interest, particularly if it is the policy of the Federal Government to pass the unreserved public lands into private hands as rapidly as this can be done in an orderly and equitable manner. Congress has authorized several methods whereby private lands within the exterior boundaries of national forests and national parks may be acquired and the Government's holdings consolidated. The method most commonly used is to give Government timber in exchange for such land. However, the method authorized in this bill seems in every way the most desirable of all, since it passes to private ownership lands which the Government wishes to dispose of, gives the Government title to lands of a class it desires to reserve, and does not draw upon our limited supply of merchantable saw timber. It is especially desirable locally, since it materially increases the county's share of receipts from the national forests without reducing its income from the taxation of land.

In the judgment of this department, the enactment of the legislation contemplated by H. R. 12113 would be in the public interest. Since the public domain may be affected by the legislation, it is assumed, of course, that the views of the Secretary of the Interior will be obtained.

Sincerely yours,

R. W. DUNLAP, *Acting Secretary.*

DEPARTMENT OF THE INTERIOR,
Washington, April 7, 1928.

Hon. N. J. SINNOTT,
Chairman Committee on the Public Lands,
House of Representatives.

MY DEAR MR. SINNOTT: I am in receipt of your request for report on H. R. 12113.

The bill proposes to authorize the conveyance to the United States of privately owned lands within the Lincoln National Forest in Otero County, N. Mex., not described by legal subdivisions, but anywhere within townships 16 and 17 south, range 13 east, New Mexico principal meridian, for other lands within the public domain anywhere in the State of New Mexico, and since there is no provision in the bill for the selected land to be in a compact body, it would permit the selection of desirable 40-acre tracts, not contiguous.

This bill would in effect revive to a limited extent the act of June 4, 1897 (30 Stat. 36), which authorized the exchange of privately owned lands situated within the boundaries of national forests for equal areas of public lands without such reservations and which operated so injuriously to the interest of the Government that it was repealed by the act of March 3, 1905 (33 Stat. 1264).

This department has been consistent in declining to approve exchanges of privately owned lands in national forests for lands in the unreserved public domain, believing that adjustments of privately owned areas in the forests for the benefit of the national forests can be best accomplished in public interest under the act of Congress approved March 20, 1922 (42 Stat. 465), as amended by the act of February 28, 1925 (43 Stat. 1090).

I am opposed to the enactment of legislation authorizing an exchange involving lands outside a national forest, and am aware of no good reason for an exception in this instance. Therefore I recommend that H. R. 12113 be not enacted.

Very truly yours,

HUBERT WORK.

PRELIMINARY EXAMINATIONS OF SUNDRY STREAMS

Mr. HOOPER. Mr. Speaker, I ask unanimous consent to return to Calendar No. 759 (H. R. 13484) authorizing preliminary examinations of sundry streams with a view to the control of their floods, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, I believe a statement should be made to show why these surveys are not included in the regular annual rivers and harbors bill. I would like to have this information for the RECORD in order that this bill may not establish a precedent.

Mr. HUDSON. If the gentleman will permit, this has to do with flood control and not navigation. Therefore it comes from the Committee on Flood Control and not from the Committee on Rivers and Harbors.

Mr. KOPP. Will the gentleman yield?

Mr. LAGUARDIA. Certainly.

Mr. KOPP. Mr. Speaker, the gentleman from Michigan has given the proper reason. These are flood-control matters and are within the jurisdiction of the Committee on Flood Control, and this jurisdiction has been exercised in previous Congresses.

Mr. LAGUARDIA. That being so, the present tendency now is—we can see it—that we are going to have as many surveys with respect to flood control as we have with respect to rivers and harbors. Let this not be a precedent whereby bills of this kind may get by in the future on the Consent Calendar. Let the Committee on Flood Control use their day to bring up these matters when we can have time to consider them. I shall not object to this bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to cause preliminary examinations to be made of the following streams with a view to the control of their floods in accordance with the provisions of section 3 of an act entitled "An act to provide for control of the floods of the Mississippi River, and of the Sacramento River, Calif., and for other purposes," approved March 1, 1917, the cost thereof to be paid from appropriations heretofore or hereafter made for such purposes:

West Branch of the Susquehanna River, Pa.; Auglaize, Blanchard, and Ottawa Rivers, Ohio, and their tributaries; St. Marys River, Ohio; Kootenai River, Idaho; Mouse River, N. Dak.; Black River, Ark.; Mud River, Ky.; Lumber and Little Pee Dee Rivers, S. C.; Lynchs River, S. C.; Mayfield Creek, Ky.; Missouri River, near Elk Point, S. Dak.; and Salmon River, Alaska.

SEC. 2. The reports of the preliminary examinations of the West Branch of the Susquehanna River, Pa., and the Auglaize, Blanchard, and Ottawa Rivers, Ohio, shall also contain data relative to devising methods whereby the sources of pollution of said streams may be removed.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

POTASH DEPOSITS IN THE UNITED STATES

The next business on the Consent Calendar was the bill (H. R. 496) authorizing an appropriation for development of potash jointly by the United States Geological Survey of the Department of the Interior and the Bureau of Mines of the Department of Commerce by improved methods of recovering potash from deposits in the United States.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Whereas potash is one of the principal ingredients of commercial fertilizer; and

Whereas the preservation and prosperity of American agriculture are in large measure dependent on a readily obtainable, easily available, reasonably priced supply of fertilizing material; and

Whereas our dependence on foreign countries for probably 90 per cent of the potash used in making fertilizer for American farms makes eminently desirable every possible effort to develop potash supplies within our own borders; and

Whereas the United States Geological Survey of the Department of the Interior has made investigations and has reported officially that great surface potash deposits exist in the leucites of Wyoming in an amount calculated at 2,000,000,000 tons, running 10 per cent or more in potash and 10 per cent or more in aluminum and substantial percentages in other valuable by-products; and

Whereas it is the conclusion of the United States Bureau of Soils of the Department of Agriculture that natural raw material such as the leucites of Wyoming constitute an extensive source of potash and that

results so far obtained indicate clearly that practicable processes of recovery can be developed or the technology of manufacture so improved that this source can be made to yield potash of such purity and quantity and at such a price as to supplant the foreign commodity on the American market; and

Whereas it is the conclusion of the said Bureau of Soils that the minimum amount required to conduct systematic chemical, engineering, and manufacturing research of processes of recovering potash from said leucite would be $250,000 over a period of five years, or $50,000 annually; and

Whereas the difficult, expensive, and uncertain nature of such research and recovery work make it apparently impracticable to secure adequate research and recovery work by private enterprise: Therefore

Be it enacted, etc., That there be, and hereby is, authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $100,000 for the fiscal year ending June 30, 1929, and the sum of $50,000 for each succeeding fiscal year for three years, to be expended jointly by the United States Geological Survey of the Department of the Interior and the Bureau of Mines of the Department of Commerce, under the direction of the Secretaries of said departments, in the construction of the necessary plant; purchase, lease, or condemnation of necessary land for erection of a plant; purchase of leucite, operation of plant, chemical engineering and manufacturing research, and clerical and technical assistance, for the purpose of determining more improved methods and cheaper processes for recovering potash from the leucite deposits in Wyoming or other like deposits in the United States.

With the following committee amendments:

Strike out the preamble; and in line 5, on page 2, strike out "$100,000" and insert in lieu thereof "not to exceed $50,000"; and in line 1, on page 3, insert, after the word "of," the words "not to exceed"; and in line 2, after the word "year," strike out the remainder of the bill and insert in lieu thereof "for three years, to be expended jointly by the Department of Agriculture through its Bureau of Soils and the Department of Commerce through its Bureau of Mines, for the purchase of necessary incidental supplies for conducting chemical engineering and manufacturing research and employing clerical and technical assistance for the purpose of determining more improved methods and cheaper processes for recovering potash from the leucite, alunite, and other potash-bearing deposits in the United States."

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

The title was amended.

CRITICISM OF PUBLIC MEN

Mr. KEARNS. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman from Ohio rise?

Mr. KEARNS. Mr. Speaker, I ask unanimous consent to proceed out of order for five minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. KEARNS. The following editorial was published in the Daily Times, a newspaper published in Portsmouth, Ohio, and it appeared in the issue of that publication of Saturday, April 28, 1928. The author, Mr. George W. Payne, had in mind when preparing this editorial the many fake newspaper writers who know that it is easier to direct attention by public denunciation of Congress than it is to write the truth about the membership.

I ask unanimous consent that the Clerk read this editorial in my time.

The Clerk read as follows:

PITY THE MAN IN PUBLIC LIFE

Nothing is easier than to criticize the personality of the man in public life, particularly in Washington. He is always in the public eye and the searchlight of the press is always beating upon him. We all forget that the man in public life is a human being, even as we are. Once sent to Congress or appointed to office he becomes the legitimate prey of every critic, high and low. But these "public" men in Washington are the same sort of men we have back home. The only difference is their environment and their concentration in one city.

All this is overlooked by a recent critic of "public" men who writes in Harper's that the "public" men in Washington are "nearly illiterate and universally lazy," and as a class are working primarily for money or personal advancement. The writer is Henry F. Pringle, "who, during many years as a newspaper correspondent has known intimately scores of mayors, governors, Senators, Representatives, and other public officials."

Well, we don't know Mr. Pringle. We do know some Members of the House and Senate, and some of the public officials. Not one of them comes within the category established by Mr. Pringle, the erudite and experienced correspondent. Whatever Senator FESS may be, he is not illiterate. Senator WATSON, of Indiana, is not lazy. Congressman KEARNS is not working primarily for personal advancement. Speaker LONGWORTH is not illiterate, not lazy, not working for money. Would you call BURTON illiterate? Is Mellon, of the Treasury, seeking only personal advancement? We have no especially high regard for Secretary Wilbur but we do not doubt that he is far above Critic Pringle in every respect.

Mr. Pringle goes on to clinch his argument by saying:

"Ask any bookseller in Washington whether Congressmen buy books. Examine the type of magazine they read. Glance at the CONGRESSIONAL RECORD for their manner of speaking in public. Drop into the Senate or House Office Buildings and see how many of these notables are at their desks before 11 o'clock. Check up on the rarity with which either of the legislative bodies convenes at its scheduled hour."

In the name of all the gods and little fishes, what of it? Most of the men in public life have more books in their libraries in Washington and back home than they would ever have time to read if they never did anything else. Congressmen and public officials like to read books and magazines as well as do the rest of us, but what time have they for reading in Washington? Their committees, the requests from back home, the sessions of Congress, the entertainment of visitors, the demands of society—and in Washington society makes very real demands—calls at the various departments, correspondence, a thousand and one things take of their time. Late in getting to their offices? Of course they are. The wonder is that they ever get there or to the sessions of the House or Senate.

Mr. Pringle, if he has been a newspaper correspondent in Washington "for many years," knows all this. Then why doesn't he write it? Because the other slush is more popular. There are bad men in Congress, bad men in public office, illiterate and lazy men, just the same as there are back home, but the great majority of the "public" men in Washington are like the great majority of the men back home—they are literate, honest, industrious, patriotic, and, nine times out of ten, called on to do twice as much work as a Washington correspondent.

[Applause.]

ASSESSMENT OF IMPROVEMENTS ON LEVEE ROAD DRAINAGE, ETC.

The next business on the Consent Calendar was the bill (H. R. 10657) to authorize the assessment of levee, road drainage, and other improvement district benefits against public lands and lands heretofore owned by the United States.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. CRAMTON. I object.

Mr. DRIVER. Will the gentleman reserve his objection? If the gentleman will permit me, I will make a short explanation.

Mr. CRAMTON. I fear the precedent.

Mr. DRIVER. I want to make an explanation so that the gentleman will not be fearful of it.

Mr. CRAMTON. Why not ask that it go over without prejudice?

Mr. DRIVER. Mr. Speaker, I will ask that this bill go over without prejudice.

There was no objection.

STATE OF OHIO

The next business on the Consent Calendar was the bill (H. R. 12938) for the relief of the State of Ohio.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. SCHAFER. I reserve the right to object.

Mr. SPEAKS. Mr. Speaker, I desire to inform the House that the usual itemized statement covering every item lost or destroyed is on file with the committee report. A cyclone in 1924 wiped out a good portion of the city of Lorain, Ohio, with great loss of life and property. The National Guard was ordered there to protect life and property and to extend relief and assistance. Military stores were loaned and issued to the stricken people, some of the supplies being lost and stolen during the period immediately following the calamity. The State of Ohio is responsible to the Federal Government for the losses and can be relieved only by action of Congress. That is the purpose of this bill. There is a long line of precedents for its favorable consideration, some occurring during the present session.

Mr. SCHAFER. In view of the gentleman's statement I withdraw the objection.

Mr. CHINDBLOM. Has the War Department or any department of the Federal Government approved of this?

Mr. SPEAKS. The bill was drawn at the War Department.

Mr. CHINDBLOM. That does not answer my question.

Mr. SPEAKS. Surveys have been ordered in accordance with law and the losses have been fully itemized in every respect. The bill has been approved by the Military Committee.

Mr. CHINDBLOM. I will say that when I introduce a bill and send it to the gentleman's committee I am required to get a report from the department.

Mr. SPEAKS. That is not necessary when the authority and responsibility rests with Congress.

Mr. CHINDBLOM. I think it is the proper policy.

Mr. JOHNSON of Washington. Why should we do it with reference to this particular bill? One man might object because it had the approval of the War Department and another might object because it did not.

Mr. CHINDBLOM. I am not going to object. I simply wanted to know whether the War Department had approved this bill or not.

Mr. SPEAKS. I will say frankly that in matters where the responsibility devolves upon Congress I am not governed by departmental recommendation. I admit it may be desirable in some cases.

Mr. CHINDBLOM. This report shows nothing as to the attitude of the department.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the State of Ohio be, and it is hereby, relieved from all responsibility and accountability for certain quartermaster property, to the approximate value of $8,830.64, the property of the War Department, which was lost or destroyed incident to the tornado at Lorain, Ohio, on June 28, 1924, while in the possession of troops of the National Guard, State of Ohio, and the Secretary of War is hereby authorized and directed to terminate all further accountability for said property.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

GRANT OF LANDS FOR AGRICULTURAL COLLEGE, ALASKA

The next business on the Consent Calendar was the bill (H. R. 10157) making an additional grant of lands for the support and maintenance of the Agricultural College and School of Mines of the Territory of Alaska, and for other purposes.

The Clerk read the title to the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the consent of the Government of the United States to the levy of special assessments based upon benefits estimated to be derived from local levee, drainage, road, and other improvement districts within the boundaries of the St. Francis levee district of Arkansas, within the State of Arkansas, is hereby expressed and given. The laws of the State of Arkansas levying such special assessments and providing for the enforcement of such levy and the establishment of a lien and all the remedies pertaining thereto are expressly cured, confirmed, ratified, and established.

This act, however, shall not operate to permit the collection of any special assessment for tax from the United States Government nor from any person as to any tract of land until the date when the entryman or purchaser is entitled to a patent from the Government for such tract of land. The special assessment or tax shall not operate against the Government of the United States, but shall take effect and be in force as soon as the equitable title to any particular tract of land involved shall have passed from the United States to such entryman or purchaser and such entryman or purchaser may be entitled to patent therefor.

SEC. 2. All the acts, assessments, and proceedings in substantial accordance with the laws of Arkansas, and all the assessments of benefits against such lands, are hereby cured and confirmed, and the same shall not be set aside, vacated, or annulled by any court for want of jurisdiction or any irregularity in the proceedings or on account of the fact that the lands were not subject to assessment at the time the assessments were made or attempted to be made, or for any other ground or for any cause whatsoever, and the consent of the Government of the United States is expressed thereto subject to the conditions aforesaid.

SEC. 3. This act shall be available to the St. Francis levee district of Arkansas, and to any such improvement district within the boundaries of the St. Francis levee district heretofore created or hereafter created as expressing the consent of the Government to the special assessments fixed substantially in accordance with the laws of Arkansas.

SEC. 4. That in all cases where there has been a foreclosure of the liens of any improvement district and said lands have been purchased by the said districts, it shall be the duty of the Commissioner of the General Land Office, upon proof of such sale and purchase and upon the payment of the sum of $5 per acre, together with the usual fees and commissions charged entry of lands under the homestead laws, where such payment has not heretofore been made, to execute to said district or districts a patent to said lands; and in all cases of future foreclosures and purchases by said districts it shall be the duty of the Commissioner of the General Land Office, upon the payment of a like sum and proof of the foreclosure and purchase by the said districts, to execute to them patents for the lands so purchased upon the expiration of the period of redemption.

SEC. 5. If any portion of this act be held unconstitutional, such decision shall not affect the remaining provisions of the act.

SEC. 6. This act shall repeal all laws and parts of laws in conflict herewith and shall take effect forthwith.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

SEPARATION OF JURIES IN THE DISTRICT OF COLUMBIA

The next business on the Consent Calendar was the bill (H. R. 12350) to regulate the separation of juries in felony cases in the District of Columbia.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. LAGUARDIA. Reserving the right to object. When the bill was before the House on another occasion I made the objection that the second section of the bill was wrong.

Mr. ROMJUE. Mr. Speaker, let me say that I have an amendment to this bill, to the last line in section 2. The section provides that an agreement may be made between the attorneys in the case that the jury may be separated, and in the amendment I provide that whenever the attorneys on the two sides of the case do enter into an agreement that agreement shall be reduced to writing and filed with the court and entered on the record. The purpose of that, I will say to the gentlemen, is to prevent any dispute after the trial of the case between the attorneys as to whether or not it was agreed that the jury might be separated, because, having no record, it might be possible that there might be a disagreement arise in the future.

Mr. LAGUARDIA. In cases less than a capital offense the court ought to have some discretion as to whether juries should separate or not.

Mr. ZIHLMAN. The bill says that the judge may permit it. That is in the second section.

Mr. ROMJUE. The first section provides for the trial of capital cases and in cases where the jury is separated; under this section it has to be done on the recommendation of the court.

Mr. LAGUARDIA. That is all right. We agree on that.

Mr. ROMJUE. That covers that situation. In cases less than capital offenses this amendment applies. This bill, as it now stands, provides that the jury may be separated by agreement between the attorneys and this amendment merely seeks to preserve that agreement by having the court enter it of record so that it will show it has been agreed to.

Mr. LAGUARDIA. The gentleman is directing his amendment to one objection; and my objection is this, that in petty cases the separation of the jury is left to the discretion of the court, and does not require the consent of both sides.

Mr. BRAND of Georgia. This bill does not interfere with the trial of such cases to which the gentleman refers.

Mr. LAGUARDIA. Cases less than capital offenses.

Mr. BRAND of Georgia. Felony cases only.

Mr. LAGUARDIA. A great many felony cases are not so important.

Mr. BRAND of Georgia. I was answering the gentleman's inquiry that it deals only with capital cases and felonies less than capital cases. It met with the approval of every member of the committee, and with the approval of the Commissioners of the District and the attorney for the Commissioners of the District.

Mr. SCHAFER. Should not this bill have been referred to the Committee on the Judiciary?

Mr. BRAND of Georgia. No; I think not. At first I had that idea, but afterwards I found that it had to go to the District of Columbia. It applies only to cases in the District of Columbia.

Mr. LAGUARDIA. The gentleman's bill would put it in the power of either side to inconvenience and harass the jury. Such matters ought to be left to the discretion of the court.

Mr. ROMJUE. The gentleman has a misconception of this. Mr. BRAND, the author of this bill, very plainly states the matter. There can be no question about the separation of the jury unless the attorneys on both sides agree to it. This amendment seeks to have the agreement put in writing and entered of record by the court.

Mr. LAGUARDIA. Exactly; and one side can object.

Mr. O'CONNOR of New York. I want to get this clear, because this is a new idea in criminal jurisprudence. Unless

the district attorney consents, the jury must be "locked up," even though it be a case of stealing, say, $60, when $50 is the limit of petty larceny? That is, unless the judge, the district attorney, and counsel for defendant, all three, consent to free the jury, the jury must be locked up?

Mr. ROMJUE. This takes away no power from the court which the court already has. There is nothing in this bill to prevent the court supervising the custody of the jury, as he should do, but where a jury is kept overnight separation by agreement should be provided for.

Mr. O'CONNOR of New York. This section provides that the jury shall not be permitted to separate unless two things happen: First, that the judge may permit them to do so, and, second, that such separation is agreed to by the attorneys for both sides. In other words, they can not be separated; they must be "locked up"; and "locked up" is the technical term, unless both the judge and the two lawyers on the opposite sides consent that they may go home to their families. Such an outrageous proposal is beyond the comprehension of any one in an enlightened day like this.

Mr. GRAHAM. Mr. Speaker, reserving the right to object, I want to say a few words. This bill apparently is a measure to regulate judicial procedure in one of the courts of the United States. It ought to have been referred to the Committee on the Judiciary.

Mr. ROMJUE. Mr. Speaker, will the gentleman yield?

Mr. GRAHAM. No. It is not a matter that should go to the District Committee. It would be unwise to have a different practice in the United States courts here from that which obtains in the rest of the country. The bill should have been referred to the Committee on the Judiciary for action, with a view to uniformity. There is no reason why it should have been referred to the District Committee. I must, therefore, enter my objection to the bill.

The SPEAKER pro tempore. The gentleman from Pennsylvania objects. This bill requires three objectors.

Mr. SCHAFER. Mr. Speaker, I object.

Mr. STOBBS. Mr. Speaker, I object.

CARE OF CERTAIN INSANE CITIZENS OF ALASKA

The next business on the Consent Calendar was the bill (H. R. 170) to provide for the care of certain insane citizens of the Territory of Alaska.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, I should like some information from the gentleman from Washington [Mr JOHNSON] as to the main object of the bill. The first section reads as if the purpose was to make it possible to commit to the institution at Morningside and to maintain at Federal expense certain persons who at some time might have been in Alaska but who left there, thus providing for their maintenance at Federal expense and relieving the State of Washington.

Mr. JOHNSON of Washington. Not quite so.

Mr. CRAMTON. Partly so?

Mr. JOHNSON of Washington. No. If the gentleman will permit me to make a brief statement, I believe I can convince all of those who have made inquiries about this bill. It has been considered twice in the Committee on the Judiciary of two Congresses, but not on the floor. It has the indorsement of all of the departments that have to do with the subject in Alaska, and of the superintendent of Federal prisons, and of others, including the Delegate from Alaska.

Mr. CRAMTON. I might suggest to the gentleman, so that he will know to what to address his remarks, that I recognize that section 2 and section 3 are new law and are probably desirable, but I do not recognize anything new in section 1, except to make it a little easier to turn their maintenance from the State of Washington on to the Federal Government.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, I object.

Mr. JOHNSON of Washington. Will the gentleman withhold that for a moment?

Mr. LAGUARDIA. Yes; in deference to the gentleman from Washington, but it is my purpose to object to it.

Mr. JOHNSON of Washington. If the gentleman from Michigan [Mr. CRAMTON] will give attention——

Mr. CRAMTON. Yes——

Mr. JOHNSON of Washington. The mildly insane are sent to the Morningside institution in Oregon from the Territory of Alaska. The soldier insane are sent to American Lake Veterans' Bureau in the State of Washington, and are taken care of there. The criminal insane are sent out from Alaska, usually on the last boat, and dumped out of Alaska, and they belong here in the insane asylum in the District of Columbia. The department says there are no beds at American Lake to spare, and rather than send them to St. Elizabeths Asylum in the District of Columbia, where they belong, they are left in the State of Washington.

Mr. LAGUARDIA. You mean they are dumped on the State of Washington from Alaska?

Mr. JOHNSON of Washington. You might describe it as a policy of dumping.

Mr. LAGUARDIA. I object.

The SPEAKER pro tempore. Objection is heard.

INDEX TO THE FEDERAL STATUTES

The next business on the Consent Calendar was the bill (H. R. 9778) to amend an act entitled "An act providing for the revision and printing of the Index to the Federal Statutes," approved March 3, 1927.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. We have a bill here providing for the indexing of the Federal Code and the supplement to the Federal Code. What is this Scott and Beaman index? It comes down to the Seventieth Congress. What is this?

Mr. GRAHAM. This is in relation to the act which was passed by the last Congress providing for the index of the Statutes of the United States. There was an authorization of an appropriation of $25,000. When the matter came to be practically considered by the Librarian of Congress it was found that this work could not be done for less than $50,000.

Mr. LAGUARDIA. Who is doing the work?

Mr. GRAHAM. The Librarian of Congress.

Mr. LAGUARDIA. None of the law publishers?

Mr. GRAHAM. No.

Mr. LAGUARDIA. It might be a good thing if they were.

Mr. GRAHAM. They have undertaken to do it for $50,000. This is very important work and is needed by the courts and the bar of the country.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the act of March 3, 1927, entitled "An act providing for the revision and printing of the index to the Federal Statutes" (ch. 375, 44 Stat. L. 1401), be, and the same is hereby, amended to read as follows:

"That the Librarian of Congress is hereby authorized and directed to have the index to the Federal Statues, published in 1908 and known as the Scott and Beaman index, revised and extended to include the acts of Congress down to and including the acts of the Seventieth Congress, and to have the revised index printed at the Government Printing Office.

"SEC. 2. There is hereby authorized to be appropriated for carrying out the provisions of this act the sum of $50,000, to remain available until expended."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

AMENDMENT TO SECTION 321 OF THE PENAL CODE

The next business on the Consent Calendar was the bill (H. R. 7200) to amend section 321 of the Penal Code.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Is this amendment applicable to the Territory of Hawaii? The Territory of Alaska has made a similar request. They ask to have the Penal Code amended in this way.

Mr. GRAHAM. If the gentleman will permit, if he will frame a suitable amendment to include Alaska, I, as chairman of the committee, so far as I have authority to do so, will accept the amendment.

Mr. LAGUARDIA. Mr. Speaker, I will send up an amendment.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That section 321 of the Penal Code be amended to read as follows:

DEFINITION OF "PUGILISTIC ENCOUNTER"

By the term "pugilistic encounter," as used in the section preceding, is meant any voluntary fight by means of fists, or otherwise, without

gloves, between two or more men, for money or for a prize of any character, or for any other thing of value, or for any championship, or upon the result of which any money or anything of value is bet or wagered, or to see which any admission fee is directly or indirectly charged. The term "pugilistic encounter," as used in the preceding section shall not apply to boxing or sparring matches or exhibition, for money, or prize, or championship titles, at which admission fees may be charged, when the following conditions are observed: (1) That the contestants therein wear 5-ounce or heavier gloves, or where such boxing or sparring match or exhibition is not held on Sunday, or where the match or exhibition is not in each case in excess of 10 rounds, or where any one round of each such match or exhibition is not in excess of three minutes' duration, or where such match or exhibition is being held with one minute rest between each round; (2) That any person being a contestant in any such match or exhibition is over 18 years of age, that any person being a contestant shall, one hour prior to such match or exhibition, have been examined by a locally licensed physician, who shall certify in writing over his signature to the referee that such contestant is physically fit to engage in such match or exhibition.

SEC. 2. All acts in conflict with the above are hereby repealed.

With committee amendments as follows:

Page 2, line 2, strike out the word "The" and insert the words "*Provided*, That the"; line 6, strike out the word "when" and insert the words "in the Territory of Hawaii"; line 22, strike out all of section 2.

The SPEAKER pro tempore. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

Mr. LAGUARDIA. Mr. Speaker, I offer an amendment.

The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from New York.

The Clerk read as follows:

Page 2, line 6, strike out the word "Territory" and insert in lieu thereof "Territories" and after the word "Hawaii" insert "and Alaska."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

MEMORIAL HIGHWAY BETWEEN MOUNT VERNON AND ARLINGTON MEMORIAL BRIDGE

The next business on the Consent Calendar was the bill (H. R. 4725) to authorize and direct the survey, construction, and maintenance of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge across the Potomac River at Washington.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON, Mr. SCHAFER, and Mr. LAGUARDIA objected.

The SPEAKER pro tempore. Three objections are heard. The Clerk will report the next bill.

LAW CLERKS TO UNITED STATES CIRCUIT JUDGES

The next business on the Consent Calendar was the bill (H. R. 9054) to amend section 118 of the Judicial Code to provide for the appointment of law clerks to United States circuit judges.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. GILBERT and Mr. ROMJUE objected.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

VERIFICATION OF CERTAIN WRITTEN INSTRUMENTS

The next business on the Consent Calendar was the bill (H. R. 9343) to provide for dispensing with oath or affirmation as a method of verifying certain written instruments.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. STEVENSON. Reserving the right to object, Mr. Speaker, I would like to know what oath they are going to dispense with here? I reserve the right to object.

Mr. LAGUARDIA. The purpose of this bill is that where any return or oath is required a statement in lieu of the oath may be made, and any misstatement in such statement will be punishable in the same way as perjury will be punished if a man goes before a notary public.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That except in a judicial proceeding or in a proceeding in a course of justice, no written statement required by law shall be required to be verified by oath or affirmation before a magistrate if it contains or is verified by a written declaration that it is made under the penalties of perjury. Whoever signs and issues such a written statement containing or verified by such a written declaration shall be guilty of perjury and subject to the penalties thereof if such statement is willfully false in a material matter.

With the following committee amendment:

Page 1, line 6, after the word "magistrate," insert the words "or person authorized by law to administer oaths."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

AMENDMENT TO SECTION 8 OF THE FOOD AND DRUGS ACT

The next business on the Consent Calendar was the bill (H. R. 13071) to amend section 8 of the food and drugs act approved June 30, 1906, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. JOHNSON of Washington. Mr. Speaker, reserving the right to object, I would like to ask some member of the committee why it is deemed necessary to cause these marks to be placed on imported food products and not on local food products?

Mr. SWING. The reason is that local products are protected at the present time.

Mr. JOHNSON of Washington. How?

Mr. SWING. By the pure food and drugs act.

Mr. JOHNSON of Washington. As a matter of fact, the pure food law has fallen down in every respect with reference to fruits.

Mr. SWING. I do not agree with the gentleman.

Mr. LAGUARDIA. Is it the gentleman's intention to mark every fig that comes from Smyrna "Made in Smyrna" and have every date that comes to this country from another country marked so as to show the country from which it comes?

Mr. SWING. That is the law at the present time, written in the tariff act, that imported articles must disclose on the label the country from which they come. The practice has been that after they have gotten through the customs house they then break the packages and repack, and on the repacked packages there is no disclosure of the origin of the goods.

Mr. LAGUARDIA. But the gentleman knows that the quality of the products of California is so superior to anything else that that in itself is full protection.

Mr. SWING. The fundamental cause that brought this up was the practice of importing Manchurian and Chinese walnuts and then putting a label on stating that they were packed by the XYZ Co. in San Francisco, Calif., thereby giving the consumer the idea that they were California products.

Mr. LAGUARDIA. The gentleman knows it is exceedingly difficult to mark each walnut.

Mr. SWING. This provides for the marking of the package only.

Mr. LAGUARDIA. And then if a grocer takes a walnut out of one package and puts it in a bushel of other walnuts in his store he would be subject to a penalty.

Mr. McKEOWN. Mr. Speaker, I object.

CONTRACTS CONNECTED WITH THE PROSECUTION OF THE WAR

The next business on the Consent Calendar was the bill (H. R. 11411) to amend an act entitled "An act to provide relief in cases of contracts connected with the prosecution of the war, and for other purposes," approved March 2, 1919, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON, Mr. LAGUARDIA, Mr. SCHAFER, and Mr. SPROUL of Kansas objected.

FEDERAL RECLAMATION PROJECTS

The next business on the Consent Calendar was the bill (H. R. 9956) to provide for aided and directed settlement on Federal reclamation projects.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON, Mr. COLLINS, and Mr. HUDSON objected.

SUPPLEMENTS TO THE CODE OF LAWS OF THE UNITED STATES

Mr. ROY G. FITZGERALD. Mr. Speaker, I ask unanimous consent to take up out of order at this time two bills on the Consent Calendar as matters of emergency and of great interest to all Members of the House. The first bill on the calendar is H. R. 13621, to authorize preparation and publication of supplements to the Code of Laws of the United States with perfecting amendments, printing of bills to codify the laws relating to the District of Columbia, and of such code and of supplements thereto, and for distribution.

The bill provides for the printing of the supplements to the Code, the printing of bills to codify the laws relating to the District of Columbia, and the distribution of 10 copies of each to each Member of the House. If these bills are not passed at this session, the supplement to the Code of Laws can not be indexed and in the hands of Members until the next session. I therefore ask unanimous consent for the present consideration of H. R. 13621.

The SPEAKER. The gentleman from Ohio asks unanimous consent for the present consideration of H. R. 13621, which the Clerk will report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, this bill is so far down on the calendar that I have not had a chance to read it. I am in sympathy with the purpose of it, but does the bill provide for any extensive free distribution?

Mr. ROY G. FITZGERALD. No; the distribution is simply to Members of the House. Every Member of the House will get 10 copies, and then it will be put on sale at cost by the Public Printer. The estimated price is $1.25.

Mr. CRAMTON. Personally, I would like it better if the bill cut out most of the free distribution, and if that were done, I think it would be an improvement.

Mr. ROY G. FITZGERALD. This corrects the code, and the supplement to the code bill which will immediately follow contains 537 corrections of imperfections in the Code of Laws. Of these, 409 are clerical or typographical errors. There are corrections of 128 errors of substance and of these 40 were errors of omission. The small number of errors found in so great a work is astonishing and many less than could be expected from the experience with the Revised Statutes of 1874. The most diligent search has been made and hundreds of people enlisted to ferret out every error.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That there be prepared and published under the supervision of the Committee on Revision of the Laws of the House of Representatives a supplement to the Code of Laws of the United States in one volume, in the style and form of said code, to contain the general and permanent laws of the United States enacted during the Sixty-ninth Congress and in force December 5, 1927, a restatement of such statutes or parts of statutes as were inaccurately set forth in the code, and statutes of a general and permanent nature in force December 6, 1925, omitted from the code, and other perfecting amendments to the code, together with preface, table of contents, parallel reference tables, table of statutes repealed since December 6, 1925, and indexes on durable paper and bound in buckram with thumb inserts and other devices to distinguish the parts, and with such explanatory and advertising slips as seem suitable.

SEC. 2. That in addition there be prepared and published under the supervision of said committee a supplement containing the general and permanent laws of each session of the Seventieth and succeeding Congresses, cumulatively embracing the legislation and ancillaries of the preceding supplement or supplements.

SEC. 3. That said committee is hereby authorized to print bills to codify, revise, and reenact the general and permanent laws relating to the District of Columbia and cumulative supplements thereto, similar in style, respectively, to the Code of Laws of the United States, and supplements thereto, and to so continue until final enactment thereof in both Houses of the Congress of the United States.

SEC. 4. That in all courts, tribunals, and public offices of the United States, at home or abroad, of the District of Columbia, and of each State, Territory, or insular possession of the United States, the laws set forth in the supplements provided for by sections 1 and 2 of this act shall, together with the Code of Laws of the United States, so amended and supplemented, establish prima facie the laws of the United States, general and permanent in their nature.

SEC. 5. That copies of the Code of Laws relating to the District of Columbia, when and if completed, and copies of the supplements provided for by this act, printed at the Government Printing Office and bearing its imprint, shall be conclusive evidence of the original of such code and supplements in the custody of the Secretary of State.

SEC. 6. That copies of the Code of Laws relating to the District of Columbia, when and if completed, and of the supplements provided for by this act shall be distributed by the Superintendent of Documents in the same manner as bound volumes of the Statutes at Large: *Provided*, That no slip or pamphlet copies of the Code of Laws relating to the District of Columbia, when and if completed, and of the supplements provided for by this act need be printed or distributed: *And provided further*, That the Code of Laws relating to the District of Columbia, when and if completed, and the supplements provided for by this act shall, upon enactment, be published as separate parts of the Statutes at Large.

SEC. 7. That in addition to quotas provided for by section 6 of this act there shall be printed, published, and distributed of the Code of Laws relating to the District of Columbia, when and if completed, with tables, index, and other ancillaries, suitably bound and with thumb inserts and other convenient devices to distinguish the parts, and of the supplements to both codes as provided for by this act, 10 copies of each for each Member of the Senate and House of Representatives of the Congress in which the original authorized publication is made, for his use and distribution, and in addition for the Committee on Revision of the Laws of the House of Representatives and the Committee on the Judiciary of the Senate a number of bound copies of each equal to ten times the number of members of such committees, and one bound copy of each for the use of each committee of the Senate and House of Representatives.

SEC. 8. That in addition the Superintendent of Documents shall, at the beginning of the first session of each Congress, supply to each Senator and Representative in such Congress, who may in writing apply for the same, one copy each of the Code of Laws of the United States, the Code of Laws relating to the District of Columbia, when and if completed, and the latest supplement to each code: *Provided*, That such applicant shall certify in his written application for the same that the volume or volumes for which he applies is intended for his personal use exclusively: *And provided further*, That no Senator or Representative during his term of service shall receive under this section more than one copy each of the volumes enumerated herein.

SEC. 9. Section 5 of the act of July 1, 1902 (32 Stats. L., 631), is hereby repealed.

SEC. 10. That for preparation and editing an annual appropriation of $6,500, in addition to appropriations for the Code of Laws relating to the District of Columbia, is hereby authorized to carry out the purposes of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate insists upon its amendments to the bill (H. R. 6518) entitled "An act to amend the salary rates contained in the compensation schedules of the act of March 4, 1923, entitled 'An act to provide for the classification of civilian positions within the District of Columbia and in the field services,'" disagreed to by the House of Representatives, agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. DALE, Mr. BROOKHART, Mr. BLAINE, Mr. MCKELLAR, and Mr. GEORGE to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the amendments of the House of Representatives to bills of the following titles:

S. 1661. An act to authorize the Secretary of the Interior to transfer the Okanogan project, in the State of Washington, to the Okanogan irrigation district upon payment of charges stated; and

S. 4448. An act to amend section 4 of the act entitled "An act to extend the period of restrictions in lands of certain members of the Five Civilized Tribes, and for other purposes," approved May 10, 1928.

CONSENT CALENDAR

CODE OF LAWS OF THE UNITED STATES

Mr. ROY G. FITZGERALD. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 13622) to amend and supplement the Code of the Laws of the United States of America.

The SPEAKER. The gentleman from Ohio asks unanimous consent for the present consideration of the bill H. R. 13622. Is there objection?

There was no objection.

The Clerk read the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

MEMORIAL HIGHWAY FROM WASHINGTON CITY TO MOUNT VERNON VIA THE ARLINGTON MEMORIAL BRIDGE

Mr. ROBSION of Kentucky. Mr. Speaker, I move to suspend the rules and pass the bill (S. 1369) to authorize and direct the survey, construction, and maintenance of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge across the Potomac River at Washington.

The SPEAKER. The gentleman from Kentucky moves to suspend the rules and pass the bill S. 1369, which the Clerk will report.

The Clerk read the bill, as follows:

Be it enacted, etc., That the United States Commission for the Celebration of the Two Hundredth Anniversary of the Birth of George Washington (hereinafter referred to as the commission), created by Public Resolution No. 38, approved December 2, 1924, be, and the same is hereby, authorized and directed to take such steps as may be necessary to construct a suitable memorial highway to connect Mount Vernon, the home and burial place of George Washington, in the State of Virginia, with the south end of the Arlington Memorial Bridge, now being constructed across the Potomac River at the city of Washington, D. C., acting through and by utilizing the services of the United States Department of Agriculture.

SEC. 2. That the Secretary of Agriculture is hereby authorized and directed to cooperate with said commission in carrying out the provisions of this act. He shall cause to be made such surveys as may be deemed necessary of the route or routes between the points named in section 1 hereof. The said commission shall determine the route on which said highway shall be constructed. The Secretary of Agriculture shall cause to be prepared such plans, specifications, and estimates for the construction of said highway as may be necessary, which shall include provision for the planting of shade trees and shrubbery and for such other landscape treatment, parking, and ornamental structures as he may prescribe, such plans and specifications to be subject to approval by the commission. He shall advertise for bids and enter into contracts for and supervise the work of constructing said highway.

SEC. 3. That the highway authorized to be constructed under the provisions of this act shall have a right of way of such minimum width as the commission shall determine, and shall be constructed only of such durable type of surfacing as will adequately meet the present and probable future traffic needs and conditions thereon. The Secretary of Agriculture is hereby authorized to occupy such lands belonging to the United States or to the District of Columbia as may be necessary for the location, construction, and maintenance of the highway authorized herein.

SEC. 4. That the Secretary of Agriculture is hereby authorized to acquire such lands as may be necessary for the proper location, construction, and maintenance of said highway, including parking, by purchase, condemnation, gift, grant, dedication, devise, or otherwise, from any source whatsoever. The Secretary of Agriculture may accept funds from any State, county, or political subdivision of a State, or from any individual or association, for the purpose of aiding in carrying out the provisions of this act. Such lands as may be acquired by purchase or condemnation may be paid for from funds authorized to be appropriated under this act or from funds that may be donated for the purpose of aiding in carrying out the provisions hereof. Whenever it becomes necessary to acquire by condemnation proceedings any lands in the State of Virginia for the purpose of carrying out the provisions of this act, such proceedings shall conform to the laws of said State now in force in reference to Federal condemnation proceedings. No payment shall be made for any such lands until the title thereto in the United States shall be satisfactory to the Attorney General of the United States.

SEC. 5. That after the construction of said highway, the Secretary of Agriculture shall cause the same to be properly maintained, and shall pay the cost thereof from funds to be appropriated annually for that purpose, which appropriations are hereby authorized to be made. The Secretary of Agriculture shall have control over the vehicular and pedestrian movement on and over the highway constructed hereunder and may issue rules and regulations to govern such traffic and all uses of said highway, including limitations on the size, kind, weight, and speed of vehicles: *Provided*, That nothing herein shall be so construed as to conflict or interfere with the concurrent jurisdiction of the State of Virginia reserved by the laws of said State now in force over property acquired therein by the United States, or with chapter 494 of the acts of the General Assembly of Virginia, approved March 25, 1926, authorizing cooperation on the part of the State and interested subdivisions thereof in the construction of the highway herein provided for.

SEC. 6. That for the purpose of carrying out the provisions of this act there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the following sums, or so much thereof as may be necessary, to be available until expended: The sum of $500,000 for the fiscal year ending June 30, 1928; the sum of $2,000,000 for the fiscal year ending June 30, 1929; the sum of $1,000,000 for the fiscal year ending June 30, 1930; the sum of $1,000,000 for the fiscal year ending June 30, 1931.

SEC. 7. That out of the appropriations made under this act, or acts amendatory thereof or supplemental thereto, the Secretary of Agriculture is authorized to employ such assistants, engineers, clerks, and other persons, in the city of Washington and elsewhere, to pay the salaries of like persons regularly employed by the Government whose services may be utilized hereunder and to incur such travel and other expenses as he may deem necessary for carrying out the purpose of this act.

The SPEAKER. Is a second demanded?

Mr. CRAMTON. Mr. Speaker, I demand a second.

Mr. ROBSION of Kentucky. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

Mr. CRAMTON. Mr. Speaker, I object.

The SPEAKER appointed as tellers Mr. ROBSION of Kentucky and Mr. CRAMTON.

The House divided; and the tellers reported that there were—ayes 116, noes 25.

So a second was ordered.

Mr. ROBSION of Kentucky. Mr. Speaker, ladies, and gentlemen of the House, I have moved to suspend the rules and pass Senate bill 1369, looking to the construction of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge, which crosses the Potomac River at Washington, to honor the memory of George Washington. This Senate bill is identical with the House bill 4625, which was referred to the Committee on Roads of the House, and after hearings submitted a favorable and unanimous report. By public resolution approved December 2, 1924, the Bicentenary Commission was created in anticipation of the two hundredth anniversary of the birth of General Washington and with a view to celebrate this event in an appropriate manner. The personnel of this commission is as follows:

COMMISSION FOR THE CELEBRATION OF THE TWO HUNDREDTH ANNIVERSARY OF THE BIRTH OF GEORGE WASHINGTON

Senate

Hon. Simeon D. Fess, vice chairman, Yellow Springs, Ohio.
Hon. Arthur Capper, Topeka, Kans.
Hon. Carter Glass, Lynchburg, Va.
Hon. Thomas F. Bayard, Wilmington, Del.

House

Hon. Willis C. Hawley, Salem, Oreg.
Hon. John Q. Tilson, New Haven, Conn.
Hon. John N. Garner, Uvalde, Tex.
Hon. Joseph W. Byrns, Nashville, Tenn.

PRESIDENTIAL COMMISSIONERS

Mrs. Anthony Wayne Cook, of Pennsylvania, former president general of the National Society of the Daughters of the American Revolution, Continental Memorial Hall, Washington, D. C.

Mrs. Mary Sherman, of Colorado, president general Federation of Women's Clubs, Denver, Colo.

Henry Ford, of Michigan, Detroit, Mich.

Col. Hanford MacNider, Mason City, Iowa.

C. Bascom Slemp, Washington, D. C.

Edgar B. Piper, Portland, Oreg.

Prof. Albert Bushnell Hart, 775 Widener Library, Cambridge, Mass.

Bernard M. Baruch, 598 Madison Avenue, New York, N. Y.

EX OFFICIO COMMISSIONERS

Calvin Coolidge, President of the United States, chairman.

Gen. Charles G. Dawes, Vice President of the United States, Evanston, Ill.

Hon. Nicholas Longworth, Speaker of the House, 1612 First National Bank Building, Cincinnati, Ohio.

William Tyler Page, Maryland, executive secretary, Clerk's Office, House of Representatives.

You will observe that this commission is made up, among others, so as to include four Members of the Senate and four Members of the House. The ex officio commissioners are the President of the United States, Calvin Coolidge, chairman; Vice President CHARLES G. DAWES; Speaker of the House, Hon. NICHOLAS LONGWORTH; Hon. William Tyler Page, Clerk of the House of Representatives, executive secretary.

A suitable memorial highway project in honor of George Washington has the approval of the President, the National Capital Park and Planning Commission, the Fine Arts Commission, and a large number of the civic and patriotic organizations of the country. I call your attention to that part of the President's annual message to Congress, December 7, 1927, in which he said—

provision is being made to commemorate the two hundredth birthday of George Washington. Suggestion has been made for the construction of a memorial road leading from the Capital to Mount Vernon, which may well have the consideration of Congress.

This project has also been strongly commended by the Hon. Thomas H. McDonald, Chief of the Bureau of Public Roads, in his report of date January 17, 1927, to the chairman of the Committee on Roads of the House of Representatives. This investigation and report were made at the request of the Committee on Roads of the House and is as follows:

UNITED STATES DEPARTMENT OF AGRICULTURE,
BUREAU OF PUBLIC ROADS,
Washington, D. C., January 17, 1927.

Hon. CASSIUS C. DOWELL,
Chairman Committee on Roads,
House of Representatives.

MY DEAR MR. DOWELL: Complying with a resolution of your committee dated February 15, 1926, the Bureau of Public Roads has made a very careful study of the best location for a memorial highway between the city of Washington and Mount Vernon. A report has been prepared under the general direction of Capt. P. St. J. Wilson, chief engineer, which I am transmitting to your committee, together with maps and other detailed material.

The President expressed in no uncertain terms in his message to Congress of December last the spirit which has guided this bureau in the report which is now placed before you. Monumental highways have ever been a physical expression of conscious national power, authority, and beauty. The capitals of the great nations to-day have developed monumental boulevards and parks. The boulevards, parkways, and parks of Paris are world famous. The city of Washington could never become in a physical sense the vision expressed in the President's message unless the basic plan provides wide boulevards, parkways, and monumental highways. These are the foundation stones upon which any great plan for the building of a beautiful capital must rest.

There is only one location for a highway of fitting character to connect the city of Washington and Mount Vernon. There are other locations which would make possible the building of an ordinary highway. The location following closely, but not necessarily exactly, that of the report must be chosen if a memorial highway is to be built. No attempt has been made to plan in fine detail the construction or to set forth the exact line to be followed, but the report and estimates give a concrete and very definite conception of the type and character of a highway that this bureau believes necessary to do justice to the expectations of the citizens of this country. They should not be disappointed.

Respectfully submitted.

THOS. H. MACDONALD,
Chief of Bureau.

The Department of Agriculture, through its Bureau of Public Roads, has made surveys and submitted tentative estimates and plans. At least two routes are open for consideration. One of these is known as the river route and the other follows more the line of the highlands or ridge. If a 200-foot right of way is used with a grade 120 feet wide, a 40-foot hard-surfaced roadway, the upper route is about 12 miles long, and will cost approximately $3,100,000. It is estimated that the lower or river route is 14 miles long and will cost about $1,000,000 more. I might say, however, that this commission, headed by the President under this bill, has the power to make the plans and to fix the width and type of highway to be constructed. When the plans are once approved it will devolve upon the Bureau of Roads to secure bids by public advertisement and to supervise the construction of this highway. For the purpose of carrying out the provision of this act there is authorized to be appropriated so much as may be necessary, but not to exceed the sum of $500,000, for the fiscal year ending June 30, 1928; the sum of $2,000,000 for the fiscal year ending June 30, 1929; the sum of $1,000,000 for the fiscal year ending June 30, 1930; and the sum of $1,000,000 for the fiscal year ending June 30, 1931.

It will be observed that the sums referred to by me are merely authorized and not appropriated. If this distinguished commission, in its wisdom, desires to construct a highway of less width, of course, the total cost will be reduced in proportion. It has been intimated that perhaps much of this fund would be wasted or squandered. I can not conceive that a commission made up of such distinguished and capable men as President Coolidge; Vice President DAWES; Speaker LONGWORTH; Hon. William Tyler Page, Clerk of the House of Representatives; Senators FESS, CAPPER, GLASS, and BAYARD; and such distinguished Members of the House as HAWLEY, TILSON, GARNER, and BYRNS; and such outstanding citizens as Henry Ford, Hon. C. Bascom Slemp, Mrs. Anthony Wayne Cook, Mrs. Mary Sherman, Col. Hanford MacNider, Mr. Edward B. Piper, Prof. Albert Bushnell Hart, and Hon. Bernard M. Baruch will approve of plans or type or width of a highway that will involve any waste or useless expenditure of the public money.

Neither can we conceive that the Hon. Thomas H. McDonald who has been the Director of the Bureau of Public Roads and under whose supervision and direction this great highway is to be constructed will tolerate any graft or useless expenditure of the public funds authorized for this undertaking.

The gentleman from Michigan [Mr. CRAMTON] who is leading the opposition to this proposal asserts that he is not opposed to the construction of a suitable memorial highway from the memorial bridge at Washington to Mount Vernon, but he favors an extension of this proposition to the Great Falls, on the Potomac. The plan he has in mind, as I understand it, would cost the Government at least three times as much as is involved in this measure.

It is also argued that the construction of this highway will enhance the value of real estate adjoining or near to this highway. This may be true. It is difficult to make any improvement either public or private that does not reflect itself in enhancing the value of other property at or near the improvement. With this in mind, the members of our committee have urged that the people of Virginia contribute the rights of way, and we have been assured that all or practically all of the rights of way will be contributed.

There are two or more routes open from which a selection may be made. This will prevent the United States Government from being imposed on in the event they should not meet this pledge.

If the river route is adopted, we are advised that the Government already owns 25 per cent of the right of way involved, and there will be little opportunity for enhancing the value of other real estate along the river route.

Another objection to this is that part of the money will be used to build a highway or street in the city of Alexandria. We are advised that this proposed highway will traverse one of the streets of Alexandria that is well built and is from 60 to 80 feet wide and it will not be necessary to use any of these funds for the improvement of that part of the memorial highway.

The commission is not authorized to undertake the construction until a good and sufficient title has been procured for the rights of way to the United States from the owners of such rights of way.

WORK SHOULD BEGIN AT ONCE

One of the main considerations for the construction of this memorial highway is that it is needed and may be used for the 1932 two hundredth anniversary celebration. If the river route is selected, a considerable part of the road will be constructed over hydraulic fills and must have a long period to settle. The material with which to make these fills will be pumped from the Potomac River. It is estimated that there will be 2,500,000 cubic yards of this hydraulic embankment and the cost will be about 30 cents per cubic yard. If it is necessary to make these fills from earth and rock shipped in, the cost for this filling would be almost doubled, and therefore if the lower route is to be selected and this road is to be ready for use in 1932, by acting now we will save the Government about $750,000.

Some of the opponents to this measure have pointed out the large cost per mile for the construction of this highway. This highway will cross a number of small bays of the Potomac River and a number of creeks flowing into the Potomac. The bridges, culverts, and so forth, will entail a cost of something like a million dollars. Seventy-five thousand dollars of this sum is to be used for landscape treatment.

THIS HIGHWAY NECESSARY

There is no suitable or adequate highway to accommodate those who desire to visit Mount Vernon, the home and tomb of General Washington. A movement to provide a suitable highway to Mount Vernon and at the same time to provide a suitable memorial to the Father of our Country was started as early as 1886. This movement has been warmly commended and indorsed by various Presidents of the United States, Secretaries of War, hundreds of Members of Congress, and by nearly all the great national, patriotic, and civic organizations.

The need for improved highway facilities to Mount Vernon has greatly increased from year to year. In 1885 there were about 35,000 yearly visitors to Mount Vernon. In 1926 there were 395,636, and we are advised that last year this passed the 400,000 mark.

We began as early as 1924 to make preparations for suitable observance of the two hundredth anniversary of the birth of Washington in 1932. It has been estimated that there will be 2,000,000 or more people visit Mount Vernon during the year of 1932.

As the years come and go the need for additional highway facilities to reach the home and tomb of Washington will become more pressing. The highway facilities are such at this time that many of our distinguished visitors are taken to Mount Vernon on the *Mayflower* instead of by way of the present highway, so that admirers of Washington who visit his tomb may not see how we have neglected this important matter.

RICHLY DESERVED

Some have asked, Why build a road so wide and beautiful? If we are going to make an ordinary road, it will not be a memorial to Washington. [Applause.]

It has been well said that the principles which he championed and the unselfish service that he gave to our country changed alike the destiny of this country and the course of human history. His service, his sacrifice, and his fine example constitute the first and greatest lesson in American patriotism and devotion. His home and his tomb have come to be a shrine not to his countrymen alone, but to the lovers of liberty of every land. [Applause.]

At Mount Vernon we have the tomb of him who was first in war, first in peace, and first in the hearts of his countrymen.

I am advised that up to this time this great, rich Republic has made no expenditure at Mount Vernon to honor his memory.

In his eight years of service on the battle field and eight years as the President of this Republic he contributed more to the welfare of mankind than any king or potentate in all the centuries that had gone before; yet his tomb so far as the Government of the United States is concerned has received not one penny. It is true that we have a great monument for him here in the Nation's Capital. This was started and about two-thirds of the expense provided by popular subscription.

The Masonic fraternity of this country is now expending about five and a half million dollars in the erection of a Masonic temple at Alexandria, Va., as a tribute to Washington, the Mason, the citizen, and patriot.

No Mason has expressed the opinion that this is a waste of their funds. They built this great memorial joyfully and strongly commend this memorial highway.

I daresay no great nation has failed to contribute from its public treasury to the shrine of its outstanding soldier and statesman like Washington, except our own country.

Some of the opponents to this measure have stated Washington does not need a memorial highway to honor him. May I say that we need to build this great memorial that we may honor ourselves in honoring him and show our gratitude and devotion for his sacrifice?

This measure passed the Senate without a dissenting vote. May we indulge the hope that no votes will be cast against it in the House? Let us respond in honoring him as he responded to the call of the struggling colonies and by his sacrifice contributed more than any other man to the welfare of mankind and to the welfare of this the richest, the finest, and most wonderful country that the world has ever seen. [Applause.]

Mr. CRAMTON. Mr. Speaker, I yield myself 10 minutes. It is not to be believed that any vote that any American sitting in this Chamber casts to-day on an expenditure of money to build a road should be taken by anyone, anywhere, at any time as a test of our love, affection, and admiration for the Father of His Country. No; that love of Washington that is inherent in every breast in this House, in the breast of every American everywhere, is being traded upon in an improper way by this proposition to build for local benefit, for one section of one State, the most extravagant piece of road building that this country has ever known.

I have had some experience in the cost of roads that were difficult of construction. The most expensive road I know of is one now being built in the Mount Zion National Park in Utah—a road 8 miles in length, and that 8 miles includes over 1 mile of boring through solid rock. That 8 miles of mountain road and the tunnel through solid rock will cost $125,000 a mile.

The road under this proposition in the bill before you is to cost four and one-half million dollars for 15 miles, or $300,000 a mile; gross, gross extravagance, and an American can not properly honor the memory of the great Washington by gross extravagance at any time. [Applause.]

I looked up the debates when this committee was appointed for the celebration of the two hundredth anniversary of Washington's birth. The debate was very limited. But I did find that they quoted this from Mr. Eliot, the very distinguished American who was formerly president of Harvard University, a great scholar, who no doubt loved Washington as much as anyone here, and he said, speaking of the character that should be had in the celebration—"this celebration, however, of the birth of Washington should be solemn, not gay; spiritual, not materialistic."

Can anyone think of anything more grossly materialistic than the construction of this extravagant piece of road to benefit a certain section of Virginia?

Mr. ROBSION of Kentucky. Mr. Speaker, will the gentleman yield?

Mr. CRAMTON. I shall be glad to proceed without interruption until I complete it, and then I will be glad to yield.

The gentleman from Kentucky must realize that under the course that he is pursuing there is to be no amendment and very limited debate. I would have preferred a much longer debate. The report filed by the gentleman from Kentucky [Mr. ROBSION] sets forth the cost of this road. The gentleman seems quite uncertain where the road will be built. My information from the Bureau of Roads—and I saw a very beautiful map of the proposed road—is that the river road is to be followed, the cost of which is outlined on page 8 of the report. The great cost is due to two things: First, they propose to build a road very largely in the river; that is, it is to be made ground. Something like 7 miles of it are to be filled and made ground, and that will cost a tremendous amount of money. The other reason for the great cost is that the 7 miles of what amounts to bridge work is to be a duplicate in ornamentation and finish of the Arlington Memorial Bridge across the Potomac. I am not opposed to a road down the river to Mount Vernon. I have had in mind what to me would be a worthy honor to George Washington, and that is the development of the Potomac on both sides from Mount Vernon to Great Falls—from Mount Vernon, where he was born, along the river that he loved, through the city that he founded, and on up to Great Falls where he labored for the industrial development of the young Republic. Such a Washington memorial parkway from Mount Vernon to Great Falls would be a proper monument to his memory, if not marked by wasteful extravagance of the money of the people. This bill does waste it.

What does the President think about this kind of legislation? This bill has no provision for donation of the right of way, no provision for any contribution by adjacent property owners who are to be tremendously benefited by the building of this memorial road, no contribution now or hereafter to be made by the State of Virginia. We build the road and we perpetually maintain it at our sole expense. There is no provision for a contribution by the property owners who are benefited or by the State.

The other day Congress passed a bill authorizing the construction of roads at Federal expense of $3,500,000 a year for three years over the lands that the United States owns in the West, Indian reservations, public lands, forest lands.

In those sparsely settled regions, as, for instance, in Coconino County, Ariz., the second largest county in the United States, 89 per cent of the area is nontaxable, consisting of Indian reservation, national parks, national forests, public lands. A county such as that manifestly can not build the roads that are necessary to connect with the Federal-aid highway program, so Congress passed a bill to allow the Federal Government to build roads, through these lands that the Government owns itself, and which, therefore, are exempt from taxation, to connect up Federal-aid routes. The Bureau of Public Roads had in mind cheap construction to take care of the needs of the traffic and meet the needs of connecting up the road. The bill passed the House unanimously and passed the Senate unanimously. It was vetoed the other day by the President and why? The President said—

> The bill would provide for entire construction from Federal funds of main roads through unappropriated or unreserved public lands and nontaxable Indian lands. Such expenditures could not be justified on the basis of protection or development of Federal resources and would constitute a radical departure from the established policy of Federal aid on a cooperative basis in road construction.
>
> Having in mind the increasing ability of the States to finance road construction due to the general adoption of the gasoline tax and the increase in revenue from this source which would accrue to States from roads constructed through public and Indian lands therein, I see no reason why the States should be relieved from their contribution toward the construction of these roads as required by existing law.

Having vetoed that bill that proposed that the Government should expend 100 per cent in building roads across its own lands, land in great areas exempt from taxation, you can not make me believe that the President of the United States really approves of this bill which proposes, without any local cooperation, where there is abundant ability to cooperate, without State cooperation, that there shall be this extravagant squandering of the people's money.

Mr. COLTON. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. COLTON. Is it not a fact that one of the main purposes of that bill which was vetoed was to protect our forests where there is no fire protection?

Mr. CRAMTON. Oh, it was urgently needed to protect our own property. I reserve the remainder of my time.

Mr. ROBSION of Kentucky. Mr. Speaker, I yield two minutes to the gentleman from Massachusetts [Mr. TREADWAY].

Mr. TREADWAY. Mr. Speaker, very little can be said in favor of this bill in two minutes. I take exactly the opposite position from that taken by the gentleman from Michigan [Mr. CRAMTON]. This proposition is neither extravagant, nor is it one that will not appeal to the good judgment of the President of the United States. [Applause.] I call attention to the difference in the quantity of use of such a road as this in comparison to the road which was provided for in the bill which the President vetoed last week. Over the road suggested in this bill there probably will travel 1,000 people to 1 over the roads in the Indian reservation referred to. It connects this great city of Washington, our National Capital, with the home and burial place of George Washington, and the criticism of extravagance can not be leveled at such a connection as that. We are using the people's money for the best purpose it can be used for. Veneration for the memory of Washington and practical purposes of the people. Think of how many thousands of visitors come to this Capital City yearly. Do they not look with reverence on the home of George Washington at Mount Vernon? Do they not return to their homes better and prouder Americans? Let us see to it that Washington is not only a great Capital but that the memory of the man whose name it bears is forever honored. Further, the Masonic fraternity is recognizing its duty to the memory of George Washington by erecting a $5,000,000 memorial, contributed from the purses of the Masons of this country, on Shooters Hill as you go into Alexandria. Will the gentleman from Michigan say that the Masons of this country are also showing extravagance when they put this sum of money into a proper memorial to George Washington? There is nothing more of interest to the people of this country to-day than such a memorial to be dedicated at the time of the anniversary of his birth. Further than that, no route has been selected for this road. It is in the hands of the President of the United States to lay out the road. The report from the Bureau of Roads does not carry any weight, any more than the opinion of the men who made it. The power is given in this bill to the President of the United States, to act through the Secretary of Agriculture. I think we should pass this bill at this time. [Applause.]

Mr. CRAMTON. Mr. Speaker, I yield three minutes to the gentleman from New York [Mr. LAGUARDIA].

The SPEAKER. The gentleman from New York is recognized for three minutes.

Mr. LAGUARDIA. Mr. Speaker, the glory and the greatness of George Washington are such that they do not need a national road to emphasize them. [Applause.]

We have embarked upon and we have a fixed policy of road building, and the sponsors of this bill should be able either to stand or to fall under the requirements of Federal-aided roads in getting appropriations for this road. That is all there is to it.

I can understand a great monument, a great public improvement, after its completion being dedicated to the memory of any great American, as in the case of the Roosevelt Dam or the Wilson Dam or the Lincoln Highway, but I can not understand the philosophy of seeking to dedicate a great American to an asphalt road. If the veneration and admiration of Americans for George Washington are such that we shall not go to Mount Vernon unless we build a $5,000,000 road, I can not understand that admiration.

Yes; real Americans, real liberty-loving Americans, real admirers of George Washington, will go in pilgrimage year after year, even if there is a bad road, to pay tribute to the memory of the Father of our Country. If this road is to be built, decide the question upon the merits, but why pin it on to George Washington? [Applause.] I do not think much of Americans who refuse to go to Mount Vernon unless they have a $5,000,000 road to travel on.

We have already one of the greatest monuments in the world dedicated to the memory of George Washington—the Washington Monument. We have the Capital of the Nation named in his honor. We have a great State named in his honor; and I repeat that the love entertained for the memory of George Washington by the people of this country does not require the building of this road. Why, Mr. Speaker, after the World War every monument or proposed appropriation that had no merit was sought on the ground of being erected as a memorial. O Memorial, how many appropriations have been passed in thy name?

That is what we are doing here. We authorized the creation of the Washington Memorial and when that memorial was created the building of roads was not in the mind of any Member of this House. Why not a Federal road to Valley Forge, one to Gettysburg, and one to Grant's Tomb?

The gentleman from Massachusetts suggests another memorial being built. But we might just as well now appropriate for a Federal road from Washington to the city of Alexandria. The question is not a question of cherishing the memory of George Washington. The question is a question of building a State road with public funds.

I can see no sentiment in a 5-ton truck lumbering along an asphalt road. I can see no sentiment or honor to the founder of the Republic in wheedling $5,000,000 for a road a State should provide. This kind of veneration, this kind of patriotism, this kind of a memorial, is so sordidly material as to disclose its own sordid purpose.

Mr. ROBSION of Kentucky. Mr. Speaker, I yield two minutes to the gentleman from Massachusetts [Mr. UNDERHILL].

The SPEAKER. The gentleman from Massachusetts is recognized for two minutes.

Mr. UNDERHILL. Mr. Speaker, just as the gentleman from New York [Mr. LAGUARDIA] has said, Washington needs no memorial. The city of Washington is a memorial to him. But Mount Vernon is a shrine. The city of Washington is the Capital of the Nation. There is now no proper connecting link between the Capital of the Nation and the shrine to which the people of the country make pilgrimages. There are literally millions of people who come to Washington from all over this country during the year, and there will be more millions in the years to come than we can count.

Mr. ALLGOOD. Mr. Speaker, will the gentleman yield?

Mr. UNDERHILL. Not now. We have built a memorial bridge, or provided for one, across the Potomac River at an expense of $15,000,000.

Mr. TABER. Mr. Speaker, will the gentleman yield?

Mr. UNDERHILL. Not now. It ends at the river bank and it leads nowhere. You can not spend $15,000,000 for that project and leave the objective incomplete. You have got to carry it clear through to Mount Vernon before it becomes of real value to the community, and by the "community" I mean the whole country.

I have stood firm and steadfast in behalf of the $9,000,000 limit as the proper appropriation on the part of the Federal Government toward the annual maintenance of the Nation's Capital, but I am going to urge and stand for every proposition that advocates an improvement of Washington's surrounding within a radius of 20 miles. [Applause.]

Mr. CRAMTON. Mr. Speaker, I yield three minutes to the gentleman from Iowa [Mr. DICKINSON].

The SPEAKER. The gentleman from Iowa is recognized for three minutes.

Mr. DICKINSON of Iowa. Mr. Speaker, in my judgment this proposal sets a very dangerous precedent. When the gentleman from Michigan [Mr. CRAMTON] comes in with his proposal to go up and down the river 20 miles, I will oppose the same. When we built the Memorial Bridge everybody knew it led nowhere, and now it is simply being used as a means of getting money out of the Public Treasury to get to the other side of the river. You are not only proposing to spend $4,500,000 here for a road, but you are imposing upon the Federal Treasury its maintenance, not only for one year but forever. Who is going to travel over it? You have probably 400,000 visitors a year going to Mount Vernon. If they know how to go and look at that shrine from the viewpoint they ought to see it from, they ought to go down by way of the Potomac, and if we have not enough ships or boats to get them down there, we ought to get a boat or two and let them go that way.

But that is not the approved way to go and see that shrine. You are not only setting a precedent here that will be a tax upon the Public Treasury for years to come, but you are setting a precedent that will lead on and on indefinitely so far as the Public Treasury is concerned. You are not only building a road to the shrine of George Washington, but you are building up property along it everywhere. You are building up the value of property in Alexandria with no contribution from anyone, and by the time you get this down to Mount Vernon it may be considered a good thing to build a road to the city of Richmond in the name of the eminent generals who fought in the Civil War on both sides.

Then some men might be in favor of extending this memorial road to Gettysburg, where one of the great decisive battles was fought during the Civil War. There are some men and some Members of Congress who believe the United States Treasury

ought to be made the goat for all these pretended memorials in behalf of our great men.

If George Washington were alive to-day he would never build a 200-foot right of way from Mount Vernon to Washington for any purpose whatsoever, unless it was for the benefit of the people that travel that road. [Applause.]

The SPEAKER. The time of the gentleman from Iowa has expired.

Mr. ROBSION of Kentucky. Mr. Speaker, I yield two minutes to the gentleman from Virginia [Mr. MOORE]. [Applause.]

Mr. MOORE of Virginia. Mr. Speaker, the gentleman from Michigan has denounced the proposal contained in this bill as grossly extravagant and materialistic. I beg to point to the fact that the President of the United States, who has never on the floor of this House been charged with extravagance or undue materialism, is warmly and emphatically in favor of its passage. [Applause.] I thank him, remembering that another son of Massachusetts, afterwards President, was the man who at the outset of the Revolution rose on the floor of the Continental Congress and made the motion which put George Washington at the head of the struggle for independence. Now, another Massachusetts man, filling the great office Adams once occupied, believes, so we understand, that there is no more fitting and dignified way of commemorating the services of the man who did more than anyone else to establish the Republic of which we are all proud to be citizens than to construct the highway contemplated by this bill.

The gentleman has talked about the cost. Look at the bill. It proposes a maximum of $4,500,000, but it intrusts the commission with authority to make the expenditure what it pleases, because to the commission is given the duty of locating and planning the road, determining its width and, therefore, within the limit provided, determining its cost.

The SPEAKER. The time of the gentleman from Virginia has expired.

Mr. ROBSION of Kentucky. Mr. Speaker, I yield the gentleman one additional minute.

Mr. MOORE of Virginia. I, for one, am not prepared to entertain any lack of confidence in a commission made up as this commission is made up. It is so made up as to give it a standing rarely attaching to any commission that has been created. At the head of it is the President. Next is the Speaker of the House, the Vice President, four eminent Senators, and four Representatives whom we have gladly followed on many occasions—the gentleman from Connecticut [Mr. TILSON], the gentleman from Oregon [Mr. HAWLEY], the gentleman from Texas [Mr. GARNER], and the gentleman from Tennessee [Mr. BYRNS]. If we can not trust those men to show wisdom and fidelity to the public interests in discharging the duty which is to rest with them, then I say we may despair of trusting any set of men to whom a duty may be delegated. [Applause.]

The SPEAKER. The time of the gentleman from Virginia has again expired. The question is on the motion of the gentleman from Kentucky to suspend the rules and pass the bill.

Mr. CRAMTON. Mr. Speaker, I demand the yeas and nays.

The SPEAKER. The gentleman from Michigan demands the yeas and nays. Those in favor of ordering the yeas and nays will rise and stand until counted. [After counting.] Forty-two gentlemen have risen, not a sufficient number.

So the yeas and nays were refused.

Mr. CRAMTON. Mr. Speaker, I ask for the other side.

Mr. CHINDBLOM. There is no other side.

Mr. LAGUARDIA. We have not had a division.

The SPEAKER. The Chair thinks that could only be demanded on a division.

Mr. CRAMTON. Then, Mr. Speaker, I will ask for a division.

The House divided; and there were—ayes 177, noes 61.

So, two-thirds having voted in favor thereof, the rules were suspended and the bill passed.

A similar House bill was laid on the table.

EXTENSION OF REMARKS—MOUNT VERNON MEMORIAL HIGHWAY

Mr. LOZIER. Mr. Speaker, I have given the pending bill (S. 1369) careful consideration. As a result I find myself strongly opposed to its enactment. It authorizes the expenditure of $4,500,000 of public funds for the construction of a highway in the State of Virginia from the Arlington Memorial Bridge to Mount Vernon. It is argued by those who favor the bill that the expenditure is justified on patriotic grounds and by building this highway we will honor the memory of George Washington. I reverence the memory and achievements of George Washington—no Member of this House appreciates his accomplishments and sacrifices more than I, but I do not think we need to make this extravagant expenditure in order to show our appreciation of our revolutionary leader and first President. He was first in war, first in peace, and as long as our Republic endures he will be first in the hearts of his grateful countymen. The American people have not neglected to honor him. He was chosen President for two successive terms.

The Nation's Capital was named for him. One State and scores of cities bear his name. In sight of this Chamber the Washington Monument, 555 feet in height, bears mute but eloquent testimony of the high esteem in which he is held by the people of the United States, without regard to race, religion, or political creed. His birthday is observed as a national and State holiday. His achievements in statecraft are recognized and respected, and his wise counsel followed in the development of our institutions and in formulating our national policies.

Building this proposed highway will not add anything to his fame nor increase the reverence we have for him. This road is not being built for patriotic purposes. Extravagance and selfishness are the controlling motives behind this project. The road is to be built entirely in the State of Virginia. Its construction will tremendously increase the value of property along or through which it passes. It is not a national but a State project, and the expense should be borne by the State in which it is located, supplemented by such contributions as the Federal Government grants to States for road-building purposes under existing laws. I do not object to the Federal Government bearing a part of the expense of constructing a highway to Mount Vernon, but the contribution from the Federal Treasury should be made under the provisions of the law granting Federal aid to States for road-building purposes.

If the State of Virginia desires to improve the 15-mile strip of road between the Arlington Memorial Bridge and Mount Vernon, then let the Federal Government contribute in the same manner as it contributes to the building of highways in other States. We shall not depart from the well-constructed and definitely defined policy under which Federal funds are being allocated to States to aid our road-building projects.

It is estimated that the 15 miles of road in question will cost $300,000 per mile, a record-breaking price, which means a prodigal expenditure of funds derived by taxing the American people.

The Appian Way, constructed by Appius Claudius Cæcus, from the city of Rome through Padua to Brundusium, now Brindisi—the most famous highway of ancient times—was only 18 feet wide, but the pending bill contemplates the construction of a highway 200 feet wide, a portion of which will be utilized for planting shrubs, shade trees, and for parking and ornamental structures. The expenditure proposed, so far as I am informed, is the most extravagant for road-building purposes in the annals of time. I can not conscientiously vote $4,500,000 for the construction of this road. It will establish a bad precedent and invite similar raids on the United States Treasury. It will probably be followed by proposals to construct similar highways to Monticello, the home of Jefferson; Montpelier, the home of Madison; to Springfield, Ill., the burial place of Lincoln; to Philadelphia, where the Declaration of Independence was promulgated; and to other national shrines. There is just as much reason why the United States should construct other roads to these other national shrines as there is for spending $4,500,000 to build this exceedingly expensive highway to Mount Vernon.

I am just as patriotic as my colleagues who are promoting this prodigal expenditure of public funds. The claim that this road should be built for patriotic reasons is a mere cloak to direct attention from the palpable fact that this bill is nothing more or less than a raid on the National Treasury for the benefit of a few people who live in Virginia along or near this proposed American Appian Way.

Moreover, I do not think this bill should be considered on a motion to suspend the rules and pass the measure. Under this procedure no amendments can be offered or considered. If we had an opportunity to offer amendments, the specifications for the highway could be brought within reasonable limits, and the appropriation materially reduced. Furthermore, under the rules the debate is limited to 20 minutes on the side. In this short time only a few Members can be heard and the merits and demerits of the measure can not be deliberately considered. The bill is brought up in this way in the closing days of the session, and it is being railroaded through Congress under whip and spur. I regret that President Coolidge gave his approval to this extravagant and unjust expenditure of public funds. By no process of logical reasoning can anyone justify this rape of the United States Treasury. It is idle for the President and his party leaders to talk about economy when they sanction such extravagant and wasteful appropriations as are carried by the pending bill. For the reasons stated I will vote against this bill.

Mr. LUCE. Mr. Speaker, under leave to extend my remarks I would take the Mount Vernon memorial highway bill as a peg on which to hang sundry observations upon special assessments, or what are known in my part of the country as "betterments." This I do partly because of their bearing on the program for spending many millions of dollars on public improvements in and about Washington, and partly because the ignorance of the subject disclosed in the debate on the flood control bill indicates there are many States where information might accrue to the great benefit of the taxpayers and also might speed desirable public undertakings.

The merits of neither the Mount Vernon memorial highway nor flood control are here to be considered. The immediate question is purely of finance.

When the flood control bill came to the House from the Senate it contained this proviso:

Provided, That in all cases where the execution of the flood-control plan results in benefits to any person or persons, or corporations, municipal or private, such benefits shall be taken into consideration by way of reducing the amount of compensation to be paid.

The House committee advised limiting this to "special benefits" and also inserted "or public-service corporations," the latter change being of no consequence here.

Before debate began the committee had decided to recommend striking out all of this paragraph, and the House so voted, the proviso going out with the rest. When the bill reappeared, coming from the conference committee, the proviso had been restored, taking this form:

Provided, That in all cases where the execution of the flood-control plan herein adopted results in benefits to property, such benefits shall be taken into consideration by way of reducing the amount of compensation to be paid.

That has now become law.

Anticipating the removal of the proviso in the course of the House consideration of the bill, I offered to a preceding section this amendment:

Provided, That in all cases wherein execution of the flood-control plan results, in the opinion of the board created in section 1 of this act, in special benefits to any person or persons, or corporations, municipal or private, or public-service corporations, such benefit shall be assessed upon the property benefited and shall constitute a lien thereon, and shall be collected by such proceedings as the Secretary of War may prescribe, which proceedings shall provide for deferred payments to such extent as may be deemed just and reasonable under all the circumstances.

Immediately the cry of unconstitutionality was raised, and it is probable that some votes were thereby affected. Nevertheless, 110 votes were for the amendment to 118 against. Had debate not been under the five-minute rule, possibly this particular objection could have been adequately met and the outcome might have been otherwise.

That would be water over the dam were it not for the fact that the same argument would undoubtedly have been presented if it had been possible to offer a like amendment to the Mount Vernon Highway bill, which was prevented because action was under suspension of the rules, precluding amendment; and that the same argument will be raised in the matter of such parts of the coming park system here as are to be in Maryland or Virginia, and possibly even when it is proposed to apply the principle within the District. This makes it worth while observing that the flood control law as it now stands does recognize the principle of betterments. To be sure, it goes only to the point of applying that principle to lands of which some part is damaged, but does that of itself affect the principle? Suppose an improvement benefits the lands of Smith and Jones, side by side. Does the fact that the work happens to hurt one corner of Smith's property but does not touch the land of Jones make a betterment assessment on Smith constitutional while one on Jones would be unconstitutional? On the contrary, might not the imposing of such an assessment on Smith without imposing one on Jones be an inequality that of itself would make the assessment on Smith unconstitutional?

That question may bring trouble when the flood control law is set at work, but here it may be dismissed as a side issue. The main thing at the moment is to note that the flood control law does accept the principle of betterments.

My proposal to extend the principle to all property specially benefited received another characterization—one that suggests the need for spreading light on the subject throughout the country. A veteran Member from Illinois, usually well informed, proceeded to describe my amendment in saying:

A proposition socialistic in the extreme, and not dreamed of by any advocates of the single-tax system, narrowly escaped incorporation in the bill.

This strongly appealed to the sense of humor of some of my colleagues, as well as to my own, and it would in fact be altogether humorous but for its disclosure of a serious lack of information on a subject of much importance. In my own State this principle has been established for threescore years—so long that everybody nowadays accepts it as a matter of course. Illinois itself had authorized special assessments in 1837. Chicago in 1923, the latest year for which I have figures at command, raised $11,472,000 by their use. The principle is to-day applied in at least 37 of the 48 States.

Why, then, congressional ignorance about it? The reason must be that in almost all the States it is used only for matters relating to streets, sewers, and water; and in many of the States its use is so restricted that its bearing otherwise as a matter of principle has not become familiar. Massachusetts is almost alone in carrying the declaration of that principle to its logical conclusion, the language of her statute being—

Whenever a limited and determinable area receives benefit and advantage, other than the general advantage to the community, from a public improvement, such board * * * shall * * * assess upon each parcel thereof a proportionate share of the cost of such improvement, etc.

This language was the result of long development through a series of enactments beginning as far back as 1658. The idea was even then old, for it is known that there were statutes in force in England authorizing the levy of what would now be deemed special assessments as far back as 1427. Statutes were enacted in the reign of Henry VIII (1491–1547) of a similar character. In connection with the Mississippi problem it is interesting to note that these statutes related to damages caused by the inundations of the sea and related either to the repair of damages to sewers, bridges, causeways, and drains caused by such inundation, or to the erection of walls and dikes to prevent further damage. In all of these statutes the cost was apportioned among the owners of land benefited by the work in proportion to benefit.

Sundry drainage statutes following levied the assessment on the basis of value, and so were more in the nature of special taxes. With the rebuilding of the city of London, however, after the great fire of 1666, benefit was firmly established as the measure. The persons appointed to determine the location of all common sewers, drains, and vaults, and the order and manner of paving and pitching the streets and lanes were empowered—

to impose any reasonable tax upon all houses within the said city or liberties thereof, in proportion to the benefit they shall receive thereby.

In France, as early as 1672, the cost of widening a street was, in certain cases, imposed upon the property abutting on the street in proportion to the benefits conferred; and in 1807 a statute going the whole distance of what should be done in Washington brought in for special assessment private property, acquiring a marked increase in value as a result not only of street opening, but also of new public places, the construction of quays, or any other public work, general, departmental, or commercial, ordered and approved by the Government. Special assessments are also common in Germany, and the system has been longer under development and carried farther in Holland and Belgium than anywhere else.

For this information and other data herein I am indebted to a thorough and admirable discussion of the subject by Philip Nichols, Esq., of Boston and Newton, taking the shape of a report to the City Planning Board of Boston, and appearing in the annual report of the board for 1926. From this report I learn that in 1923 of the 248 cities in the United States having a population of more than 30,000, all but 15 financed the whole or part of their public improvements by special assessments. In the extent of the use of the system, however, States and cities vary greatly. Of the cities with more than 300,000 population, Indianapolis led in 1923, raising 19.9 per cent of its total revenue receipts by special assessments, with Seattle a close second by so raising 19.8 per cent of such receipts.

The Massachusetts law is not the best on the subject and sadly needs rewriting. As the result of its defects the system is by no means so productive there as it should be, but it has furnished at least one instance that might well set Congressmen and the taxpayers of Washington to thinking, in view of the park construction in sight. An area of marshland now known as the Fenway was filled in and developed with a park, parkways, streets, and other usual improvements at a cost of $1,247,189.70. The betterment assessments that were found

valid amounted to $330,333.89. To be sure, it was intended to get back the whole cost by such assessments, and the system failed to the extent of the difference; but to get back a quarter of the cost was something.

It would not have been an unreasonable or an unjust thing to have drawn the Mount Vernon boulevard bill so that the Government would recoup itself to the extent of at least one quarter of the cost, so lessening the net outlay by $1,125,000. That boulevard is to be about 14 miles long, and if none of it is directly on the river bank its two sides will have an abutting frontage of more than 112,500 linear feet. Is it improbable that this land will not rise on the average more than $10 a front foot in value, or about a cent a square foot on all the land within a fifth of a mile of the boulevard?

When we have spent fifty millions on making the triangle the site of the most wonderful group of public buildings in the world, how much will the land on the opposite side of Pennsylvania Avenue have risen in value? Should every cent of that rise accrue to its owners?

When we lay out a park, making every lot facing it more valuable for residence purposes, should the taxpayers carry the whole cost?

These are questions to which public-spirited citizens of Washington might well address themselves, and to which some thought might well be given by Congress, the guardian of the taxpayers of both the District of Columbia and the Nation.

FIFTEENTH AND SUBSEQUENT DECENNIAL CENSUSES

Mr. FENN. Mr. Speaker, I move to suspend the rules and pass H. R. 393, to provide for the fifteenth and subsequent decennial censuses.

The SPEAKER. The gentleman from Connecticut moves to suspend the rules and pass House bill 393, with amendments. The Clerk will report the bill and amendments.

The Clerk read the bill, as follows:

Be it enacted, etc., That a census of population, agriculture, irrigation, drainage, distribution, and mines shall be taken by the Director of the Census in the year 1930 and every 10 years thereafter. The census herein provided for shall include each State, the District of Columbia, Alaska, Hawaii, and Porto Rico. A census of Guam, Samoa, and the Virgin Islands shall be taken in the same year by the respective governors of said islands and a census of the Panama Canal Zone by the Governor of the Canal Zone in accordance with plans prescribed or approved by the Director of the Census.

SEC. 2. That the period of three years beginning the first day of July next preceding the census provided for in section 1 of this act shall be known as the decennial census period, and the reports upon the inquiries provided for in said section shall be completed within such period.

SEC. 3. That there may be employed in the Bureau of the Census, in addition to the force provided for by the appropriation act for the fiscal year immediately preceding the decennial census period, two assistant directors, one of whom shall act as executive assistant to the director, performing, in addition, the duties usually assigned to the chief clerk, and the other, who must be a person of known and tried experience in statistical work, as technical and statistical advisor; these officials to be appointed by the Secretary of Commerce, upon the recommendation of the Director of the Census, in conformity with the civil service laws and rules.

In addition to the force hereinbefore provided for, there may be appointed by the Director of the Census, without regard to the provisions of the classification act, for any period not extending beyond the decennial census period, at annual or piece-price rates of compensation to be fixed by him, as many temporary employees in the District of Columbia as may be necessary to meet the requirements of the work: *Provided*, That hereafter in making appointments to clerical and other positions in the executive branch of the Government in the District of Columbia or elsewhere preference shall be given to honorably discharged soldiers, sailors, and marines, and widows of such, and to the wives of injured soldiers, sailors, and marines, who themselves are not qualified, but whose wives are qualified, to hold such positions: *Provided further*, That all such clerical, mechanical, and subclerical appointments shall be made in conformity with the civil service laws and rules.

That special agents, supervisors, supervisors' clerks, enumerators, and interpreters may be appointed by the Director of the Census to carry out the provisions of this act and of the act to provide for a permanent Census Office, approved March 6, 1902, and acts amendatory thereof or supplemental thereto, such appointments to be made without reference to the civil service or the classification acts. The Director of the Census may delegate to the supervisors authority to appoint enumerators. The enlisted men and officers of the Army, Navy, and Marine Corps may be appointed and compensated for the enumeration of Army, Navy, marine, and other military posts. Employees of the Post Office Department may, with the consent of the Postmaster General, in cases of necessity and in far-distant and outlying localities, be appointed and compensated for work performed under the provisions of this act. The special agents, supervisors, supervisors' clerks, enumerators, and interpreters thus appointed shall receive compensation at per diem or piece-price rates to be fixed by the Director of the Census: *Provided*, That special agents appointed at a per diem rate shall not be paid in excess of $8 per diem except as hereinafter provided; and that the compensation on a piece-price basis may be fixed without limitation as to the amount earned per diem: *Provided further*, That during the decennial census period the Director of the Census may fix the compensation of not to exceed 25 special agents at an amount not to exceed $12 per diem: *Provided further*, That permanent employees of the Census Office and special agents may be detailed, when necessary, to act as supervisors or enumerators, such permanent employees and special agents to have like authority with and perform the same duties as the supervisors or enumerators in respect to the subjects committed to them under this act.

SEC. 4. That the fifteenth and subsequent censuses shall be restricted to inquiries relating to population, to agriculture, to irrigation, to drainage, to distribution, and to mines. The number, form, and subdivision of the inquiries in the schedules used to take the census shall be determined by the Director of the Census with the approval of the Secretary of Commerce.

SEC. 5. That each supervisor shall perform such duties as may be imposed upon him by the Director of the Census in the enforcement of this act, and the duties thus imposed shall be performed in any and all particulars in accordance with the orders and instructions of the Director of the Census; that each enumerator or other employee detailed to serve as enumerator shall be charged with the collection in his subdivision of the facts and statistics called for on the population and agricultural schedules and such other schedules as the Director of the Census may determine shall be used by him in connection with the census. It shall be the duty of each enumerator to visit personally each dwelling house in his subdivision, and each family therein, and each individual living out of a family in any place of abode, and by inquiry made of the head of each family, or of the member thereof deemed most competent and trustworthy, or of such individual living out of a family, to obtain each and every item of information and all particulars required for the census; and in case no person shall be found at the usual place of abode of such family, or individual living out of a family, competent to answer the inquiries, then it shall be lawful for the census employee to obtain the required information as nearly as may be practicable from the family or families or person or persons living nearest to such place of abode who may be competent to answer such inquiries.

SEC. 6. That the census of the population and of agriculture required by section 1 of this act shall be taken as of the 1st day of May, and it shall be the duty of each enumerator to commence the enumeration of his district on the day following unless the Director of the Census in his discretion shall change the date of commencement of the enumeration in said district by reason of climatic or other conditions which would materially interfere with the proper conduct of the work; but in any event it shall be the duty of each enumerator to prepare the returns hereinbefore required to be made and to forward the same to the supervisor of his district within 30 days from the commencement of the enumeration of his district: *Provided*, That in any city having 2,500 inhabitants or more under the preceding census the enumeration of the population shall be completed within two weeks from the commencement thereof.

SEC. 7. That if any person shall receive or secure to himself any fee, reward, or compensation as a consideration for the appointment or employment of any person as supervisor, enumerator, or clerk, or other employee, or shall in any way receive or secure to himself any part of the compensation paid to any supervisor, enumerator, clerk, or other employee, he shall be deemed guilty of a felony, and upon conviction thereof shall be fined not more than $3,000 or be imprisoned not more than five years, or both.

SEC. 8. That any supervisor, supervisor's clerk, enumerator, interpreter, special agent, or other employee who, having taken and subscribed the oath of office, shall, without justifiable cause, neglect or refuse to perform the duties enjoined on him by this act shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined not exceeding $500; or if he shall, without the authority of the Director of the Census, publish or communicate any information coming into his possession by reason of his employment under the provisions of this act, or the act to provide for a permanent Census Office or acts amendatory thereof or supplemental thereto, he shall be guilty of a felony and upon conviction thereof shall be fined not to exceed $1,000 or be imprisoned not to exceed two years, or both so fined and imprisoned in the discretion of the court; or if he shall willfully and knowingly swear or affirm falsely as to the truth of any statement required to be made or subscribed by him under oath by or under authority of this act or of the act to provide for a permanent Census Office or acts amendatory thereof or supplemental thereto, he shall be deemed guilty of perjury, and upon conviction thereof shall be fined not exceeding $2,000 or imprisoned not exceeding five years, or both; or if he shall

willfully and knowingly make a false certificate or a fictitious return he shall be guilty of a felony, and upon conviction of either of the last-named offenses he shall be fined not exceeding $2,000 or be imprisoned not exceeding five years, or both; or if any person who is or has been an enumerator shall knowingly or willfully furnish or cause to be furnished, directly or indirectly, to the Director of the Census or to any supervisor or other employee of the census any false statement or false information with reference to any inquiry for which he was authorized and required to collect information, he shall be guilty of a felony, and upon conviction thereof shall be fined not exceeding $2,000 or be imprisoned not exceeding five years, or both.

SEC. 9. That it shall be the duty of all persons over 18 years of age when requested by the Director of the Census, or by any supervisor, enumerator, or special agent, or other employee of the Census Office, acting under the instructions of the said director, to answer correctly, to the best of their knowledge, all questions on the census schedules applying to themselves and to the families to which they belong or are related, and to the farm or farms of which they or their families are the occupants; and any person over 18 years of age who, under the conditions hereinbefore stated, shall refuse or willfully neglect to answer any of these questions, or shall willfully give answers that are false, shall be guilty of a misdemeanor, and upon conviction thereof shall be fined not exceeding $500 or be imprisoned not exceeding one year, or both.

And it is hereby made unlawful for any individual, committee, or other organization of any kind whatsoever, to offer or render to any supervisor, supervisor's clerk, enumerator, interpreter, special agent, or other officer or employee of the Census Office engaged in making an enumeration of population, either directly or indirectly, any suggestion, advice, or assistance of any kind, with the intent or purpose of causing an inaccurate enumeration of population to be made, either as to the number of persons resident in any district or community, or in any other respect; and any individual, or any officer or member of any committee or other organization of any kind whatsoever, who directly or indirectly offers or renders any such suggestion, advice, information, or assistance, with such unlawful intent or purpose, shall be guilty of a misdemeanor, and upon conviction thereof shall be fined not exceeding $5,000.

And it shall be the duty of every owner, proprietor, manager, superintendent, or agent of a hotel, apartment house, boarding or lodging house, tenement, or other building, when requested by the Director of the Census, or by any supervisor, enumerator, special agent, or other employee of the Census Office, acting under the instructions of the said director, to furnish the names of the occupants of said hotel, apartment house, boarding or lodging house, tenement, or other building, and to give thereto free ingress and egress to any duly accredited representative of the Census Office, so as to permit of the collection of statistics for census purposes, including the proper and correct enumeration of all persons having their usual place of abode in said hotel, apartment house, boarding or lodging house, tenement, or other building; and any owner, proprietor, manager, superintendent, or agent of a hotel, apartment house, boarding or lodging house, tenement, or other building who shall refuse or willfully neglect to give such information or assistance under the conditions hereinbefore stated shall be guilty of a misdemeanor, and upon conviction thereof shall be fined not exceeding $500.

SEC. 10. That it shall be the duty of every owner, official, agent, person in charge, or assistant to the person in charge, of any company, business, institution, establishment, religious body, or organization of any nature whatsoever, to answer completely and correctly to the best of his knowledge all questions relating to his respective company, business, institution, establishment, religious body, or other organization, or to records or statisties in his official custody, contained on any census schedule prepared by the Director of the Census under the authority of this act, or of the act to provide for a permanent Census Office, approved March 6, 1902, or of acts amendatory thereof or supplemental thereto; and any person violating the provisions of this section by refusing or willfully neglecting to answer any of said questions, or by willfully giving answers that are false, shall be guilty of a misdemeanor, and upon conviction thereof shall be fined not exceeding $10,000, or imprisoned for a period not exceeding one year, or both so fined and imprisoned.

SEC. 11. That the information furnished under the provisions of this act shall be used only for the statistical purposes for which it is supplied. No publication shall be made by the Census Office whereby the data furnished by any particular establishment or individual can be identified, nor shall the Director of the Census permit anyone other than the sworn employees of the Census Office to examine the individual reports.

SEC. 12. That all fines and penalties imposed by this act may be enforced by indictment or information in any court of competent jurisdiction.

SEC. 13. That the Director of the Census is hereby authorized to make requisition upon the Public Printer for such printing as may be necessary to carry out the provisions of this act, to wit: Blanks, schedules, circulars, pamphlets, envelopes, work sheets, and other items of miscellaneous printing; that he is further authorized to have printed by the Public Printer, in such editions as the director may deem necessary, preliminary and other census bulletins, and final reports of the results of the several investigations authorized by this act or by the act to establish a permanent Census Office and acts amendatory thereof or supplemental thereto, and to publish and distribute said bulletins and reports.

SEC. 14. That all mail matter, of whatever class or weight, relating to the census and addressed to the Census Office, or to any official thereof, and indorsed "Official business, Census Office," shall be transmitted free of postage, and by registered mail if necessary, and so marked: *Provided,* That if any person shall make use of such indorsement to avoid the payment of postage or registry fee on his or her private letter, package, or other matter in the mail, the person so offending shall be guilty of a misdemeanor and subject to a fine of $300, to be prosecuted in any court of competent jurisdiction.

SEC. 15. That the Secretary of Commerce, whenever he may deem it advisable, on request of the Director of the Census, is hereby authorized to call upon any other department or office of the Government for information pertinent to the work herein provided for.

SEC. 16. That there shall be in the year 1935, and once every 10 years thereafter a census of agriculture and livestock, which shall show the acreage of farm land, the acreage of the principal crops, and the number and value of domestic animals on the farms and ranges of the country. The schedule employed in this census shall be prepared by the Director of the Census. Such census shall be taken as of the 1st day of May and shall relate to the crop year. The Director of the Census may appoint enumerators or special agents for the purpose of this census in accordance with the provisions of the permanent census act.

SEC. 17. That the Director of the Census be, and he is hereby, authorized and directed to collect and publish, for every second year after 1927, statistics of manufacturing industries; and the director is hereby authorized to prepare such schedules as in his judgment may be necessary.

SEC. 18. That the Director of the Census be, and he is hereby, authorized at his discretion, upon the written request of the governor of any State or Territory or of a court of record, to furnish such governor or court of record with certified copies of so much of the population or agricultural returns as may be requested, upon the payment of the actual cost of making such copies and $1 additional for certification; and that the Director of the Census is further authorized, in his discretion, to furnish to individuals such data from the population schedules as may be desired for genealogical or other proper purposes, upon payment of the actual cost of searching the records and $1 for supplying a certificate; and that the Director of the Census is authorized to furnish transcripts of tables and other records and to prepare special statistical compilations for State or local officials, private concerns, or individuals upon the payment of the actual cost of such work: *Provided, however,* That in no case shall information furnished under the authority of this act be used to the detriment of the person or persons to whom such information relates. All moneys hereafter received by the Bureau of the Census in payment for labor and materials used in furnishing trancripts of census records or special statistical compilations from such records shall be deposited to the credit of the appropriation for collecting statistics.

SEC. 19. That the act establishing the permanent Census Office, approved March 6, 1902, and acts amendatory thereof and supplemental thereto, except as are herein amended, shall remain in full force. That the act entitled "An act to provide for the fourteenth and subsequent decennial censuses," approved March 3, 1919, and all other laws and parts of laws inconsistent with the provisions of this act are hereby repealed.

During the reading of the bill the following occurred:

Mr. FENN. Mr. Speaker, I ask unanimous consent that the bill may be considered as having been read.

The SPEAKER. The gentleman from Connecticut asks unanimous consent that the bill may be considered as having been read with the amendments. Is there objection?

Mr. HOWARD of Nebraska. Mr. Speaker, I will not object if somebody will tell me what the bill is.

The SPEAKER. Is there objection?

Mr. HOWARD of Nebraska. If I can not learn what the bill is, I shall have to object.

Mr. FENN. If the gentleman will give me a chance, I will endeavor to tell him.

Mr. HOWARD of Nebraska. I am giving the gentleman all the time in the world.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. HOWARD of Nebraska. Mr. Speaker, I do object unless you give the gentleman an opportunity to tell me about the bill.

The SPEAKER. The Chair put the question, and there was no objection.

Mr. FENN. Mr. Speaker, I will withdraw the request.

The SPEAKER. It occurs to the Chair that if we are to make any progress this afternoon we should not read a bill of 15 pages, because anybody can tell what the bill is about by reading the title.

Mr. HOWARD of Nebraska. Mr. Speaker, I have not even heard the title.

The SPEAKER. The Clerk will report the title of the bill.

The Clerk read the title of the bill.

Mr. HOWARD of Nebraska. That is entirely satisfactory.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

The reading of the bill was dispensed with.

The SPEAKER. Is a second demanded?

Mr. KETCHAM. Mr. Speaker, I demand a second.

Mr. FENN. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

The SPEAKER. The gentleman from Connecticut is entitled to 20 minutes, and the gentleman from Michigan is entitled to 20 minutes.

Mr. FENN. Mr. Speaker, I yield myself five minutes.

Mr. Speaker and gentlemen of the House, I have been asked several times this afternoon if this is a reapportionment bill. This is not a reapportionment bill, although if a future Congress decides to reapportion under the 1930 census, this will be the bill, if adopted, under which the reapportionment of the House will be made at that time.

This is a bill providing for the taking of the 1930 decennial census. The census of population is a matter which the Constitution provides for and it is mandatory that the Congress should provide for the taking of the census in the decennial year 1930.

This bill in the main is a reenactment of the bill under which the census was taken in 1920, the only addition being that for distribution.

Mr. COCHRAN of Missouri. Will the gentleman yield?

Mr. FENN. Certainly.

Mr. COCHRAN of Missouri. There is a change in the date of the taking of the census, is there not?

Mr. FENN. I will come to that a little later.

Mr. COCHRAN of Missouri. I understood the gentleman to say there was only one change in the bill.

Mr. FENN. I did not say that. I said it was a reenactment in the main of the bill under which the census of 1920 was taken.

The bill provides for a census of population, agriculture, irrigation, drainage, distribution, and mines. All of these items were included in the last census with the exception of distribution, distribution being the new feature. The census of distribution, the Secretary of Commerce and other authorities, consider most desirable. From it will be ascertained the course of products from the manufacturer, through the various agencies, from the manufacturer to the wholesaler, the wholesaler to the retailer, and the retailer to the ultimate consumer.

The benefit of this will be to ascertain, through the 2,000,000 distributors, so-called, throughout this country, just how much business is done in respective localities.

After long and profound consideration the committee decided, and has so reported in this bill, that the census of population and agriculture and the others, as far as the law allows, should be taken on the same date, and that was determined as May 1.

It has been the practice to take a census of agriculture and of population on the same date, continuing throughout the several decennial years in which a census has been taken. If you will bear with me a moment I will give you those dates. Beginning with the Sixth Census, of 1840, the date was June 1, and population and agriculture were taken on that date. The same date was prescribed in the censuses taken in 1850, 1860, 1870, 1880, 1890, and 1900, all of the dates being as of June 1. In 1910 the census of population and of agriculture was taken on April 15, and the Fourteenth Census, of 1920, was taken as of January 1, both for population and agriculture.

Mr. O'CONNOR of New York. Will the gentleman yield?

Mr. FENN. Yes.

Mr. O'CONNOR of New York. Is this the first occasion when you have made a separate date for taking the population and the agriculture?

Mr. FENN. In this bill we have not provided a separate date.

Mr. O'CONNOR of New York. According to your report, you are going to take the census of population in May, and you are going to take——

Mr. FENN. Where does the gentleman find that?

Mr. O'CONNOR of New York. Page 3.

The SPEAKER. The time of the gentleman from Connecticut has expired.

Mr. FENN. Mr. Speaker, I yield myself five minutes more.

Mr. O'CONNOR of New York. In reference to the census of agriculture, the gentleman has amended the bill on page 13 to take it in May instead of November. There has been a protest from the farm organizations of my State, for instance, the Dairymen's League.

Mr. FENN. Yes; I am aware of that.

Mr. O'CONNOR of New York. They state it will put them to great inconvenience to change the date.

Mr. KETCHAM. Will the gentleman yield?

Mr. FENN. Yes.

Mr. KETCHAM. Is the gentleman from New York correct in the statement that he has a protest from the farm organizations to changing the date from November 1 to May 1?

Mr. O'CONNOR of New York. Yes. I have no doubt about the protest against taking the agricultural census on May 1 instead of November 1.

Mr. KETCHAM. If I may be permitted, I hold in my hand a copy of a letter from your own commissioner of agriculture——

Mr. O'CONNOR of New York. I am talking about the men who are engaged in the business and who constitute the Dairymen's League of the State of New York.

Mr. McFADDEN. Will the gentleman yield to me?

Mr. FENN. Surely.

Mr. McFADDEN. I do not care to dissent from my friend the gentleman from New York, but the Dairymen's League in my district desires this census be taken in November instead of May.

Mr. O'CONNOR of New York. That is what they want in New York State.

Mr. FENN. I wish to say to the House that the same disagreement has occurred on the floor here that occurred before the committee among the witnesses that appeared before us.

There seems to be no unanimity in regard to this date amongst representatives of agriculture throughout the country. The committee was obliged to fix a date, and therefore fixed this particular date. Let me also tell you that the cost of taking an agricultural census at a date different from the date of taking the census of population is estimated at from $3,000,000 to $5,000,000 more than taking it on the same date. This had some weight with the committee, I have no doubt, and I trust it will have some weight with the House.

Mr. THURSTON. Will the gentleman yield?

Mr. FENN. Certainly.

Mr. THURSTON. Referring to that portion dealing with the commodity data that used to be collected, no provision is made therein about the cost. Can the gentleman assure the House that when the distribution data is collected that the food costs will also be included?

Mr. FENN. I understand that is to be included. We were so informed by the Census Bureau. Of course, there will not be the cost of each item, but the aggregate cost of different products.

Mr. O'CONNOR of New York. Will the gentleman yield for a question for information?

Mr. FENN. I yield to the agriculturalist from New York.

Mr. O'CONNOR of New York. As I read the bill, the only change made in it is with reference to the date of the census, am I correct in that?

Mr. FENN. I think so.

Mr. O'CONNOR of New York. That is an amendment to the bill and the only one in it?

Mr. FENN. I believe it is the only one in the entire bill.

The cost of taking the census will be between $35,000,000 and $40,000,000. In the report it is stated as $36,000,000. It is necessary—and I trust the House will agree—to get the bill through this session if we can. It is a good bill, we have worked hard on it, and one reason we want to get it through as early as possible is so that the Census Bureau may get ready and give us an absolutely good population census that can not be found fault with.

Mr. Speaker, I reserve the balance of my time.

Mr. KETCHAM. Mr. Speaker, I yield myself five minutes. Mr. Speaker and Members of the House, I ask to be indulged for a few minutes, but I shall not take all the time that has been allotted to me. The gentleman from New York [Mr. O'CONNOR] stated that he was in receipt of word from various agricultural authorities in his State opposing the change that he understood had been made in the bill by putting the date of the agricultural census on the 1st of November. If I am correctly advised by the chairman, that change has not been made and the date for taking the agricultural population is of May 1.

Now, I want to say in justification of my position that I not only have definite statement from the commissioner of agriculture in New York that he is opposed to May 1 as the date for taking the agricultural census, but I want to refer to other distinguished authorities that I am sure the gentleman from New York will readily understand ought to have something to say about this date in his own State.

Mr. O'CONNELL. Did I understand the gentleman to say that the commissioner of agriculture was opposed to taking the census on May 1?

Mr. KETCHAM. I did.

Mr. O'CONNELL. That is what I said; that the Dairymen's League was opposed to it.

Mr. KETCHAM. When the gentleman gets the transcript of his remarks he will find that he stated it the other way.

Mr. O'CONNELL. They want to take it in November.

Mr. JOHNSON of Washington. It is clear that if we take these censuses on two dates we double the cost of taking them.

Mr. KETCHAM. Oh, that is not the case.

Mr. JOHNSON of Washington. It would greatly increase the cost.

Mr. KETCHAM. My understanding of the bill is that the population census and the agricultural census are to be taken as of May 1, 1930. Am I correct?

Mr. RANKIN. Is the gentleman from Michigan in favor of separating them and taking two censuses?

Mr. KETCHAM. I am in favor of having both of them taken at the same time. But if we can not agree, I do believe that the agricultural census in 1930 is going to be so vitally important that we can well afford the additional expense of having an extra agricultural census taken at the most favorable date. Now, what is the most favored date?

Mr. JOHNSON of Washington. It will cost $40,000,000 to take census anyway.

Mr. KETCHAM. The extra cost for taking an agricultural census would be a million and a half or two million dollars provided a separate census is to be taken.

Now, I want to talk very earnestly to all Members of the House who have agricultural constituencies. The census of 1930 is to be, in my opinion, the most important census that has been taken in recent years so far as ascertaining the real facts relating to agriculture is concerned. No question has been more recently debated on the floor of this House more earnestly than the question of agriculture, and we have had to depend on statements from the Census Bureau with reference to the condition of agriculture. If that be true, then certainly everything that can be done to make the census of 1930 absolutely accurate so far as agriculture is concerned ought to be done.

Mr. WILLIAM E. HULL. Mr. Speaker, will the gentleman yield?

Mr. KETCHAM. Not until I have completed this statement. You could scarcely select a more unfortunate date than May 1 for taking the agricultural census. The reasons are perfectly apparent to a man who thinks. You must remember, in the first place, that a very large proportion of the men who are upon the farms are tenant farmers. When May 1 has come around, in many instances they are not on the same farm they have been tilling the year before. If they are there, they have forgotten to a very large degree what they did the year before. Therefore, what information they could give is very inaccurate. But doubly so will it be inaccurate and of little value if they have gone, as a great many of them do, to another farm 25 or 30 miles away, and you have to depend on one who was not on that farm at all to gather and report figures for the preceding year. Therefore, if the census is to be accurate, I think you will agree that we ought to take it on another date, at a date when the tenant is still living on the farm that he has operated that year. Then taking the farmers who do live upon their own farms when the operations of the new season have begun, they are trying as best they can to forget what was done the year before; at least, their memory is not clear and distinct as to the transactions of the year before, and when the enumerator comes around and propounds the questions that are involved in the agricultural questionnaire they do not recall what has been done. That being true, it seems to me that this date ought to be changed, even if it is required that we shall have a separate date for the taking of the agricultural census and if it involves an expenditure of a million and a half or two million dollars. It is worth while from the standpoint of accuracy.

I have here requests from the two Secretaries of the President's Cabinet who are interested primarily in the farm census; first, the Secretary of Commerce; and second, the Secretary of Agriculture, both of whom, very earnestly, advocate a change of date for the taking of the agricultural census from May to November. I have here also communications which I shall not take the time to read from almost every agricultural State in the Union including testimonials and requests from practically every one of the leading farm organizations, showing how futile and of what little value an agricultural census taken in May will be. For these reasons I earnestly urge your consideration of this proposition.

Of course I understand the impossibility of the practical proposition involving any change here. We are not privileged to amend this bill under the suspension rule, but I am bringing these facts to your attention so that you may get in touch with your United States Senators in case the bill should pass in its present form, and see that it is properly amended in the Senate, so that we may have the best possible date for an agricultural census. I now yield to the gentleman from New York [Mr. O'CONNOR].

Mr. O'CONNOR of New York. The gentleman has answered the question that I was about to ask him and that is what we could do about it now?

Mr. KETCHAM. Yes; all we can do is to do what I have been doing, and that is to call the matter to the attention of the Members.

Mr. COCHRAN of Missouri. Mr. Speaker, will the gentleman yield?

Mr. KETCHAM. Yes.

Mr. COCHRAN of Missouri. I suggest to the gentleman that he offer a motion to recommit, to change both dates to November.

Mr. KETCHAM. Of course I could, but I hesitate to stand in the way of the passage of important legislation like this.

Mr. WILLIAM E. HULL. Mr. Speaker, will the gentleman yield?

Mr. KETCHAM. Yes.

Mr. WILLIAM E. HULL. Are those who will take the census for population the same men who will take the census for agriculture?

Mr. KETCHAM. Yes.

Mr. WILLIAM E. HULL. Is it not better to have both censuses taken on the same date, even if it is on November 1, because these men will go there and get the data on both matters at the same time. If they are going to change the date for taking the agricultural census, why not change the date for the population census and let the men take it when they go around.. Why duplicate the matter?

Mr. KETCHAM. I would be entirely agreeable to that change, but I do not want to take the position of opposing the best possible date for the population census. I believe May 1 is the best date for rural communities.

Mr. THURSTON. Mr. Speaker, will the gentleman yield?

Mr. KETCHAM. Yes.

Mr. THURSTON. I rise just to correct the gentleman in respect to the statement that a separate census for agriculture would cost only one and a half million dollars. The officials of the Census Bureau state that a separate agricultural census will cost more than $5,000,000. The gentleman is familiar with the facts of course that if these statistics are to be available and comparable, they must be in the zero year and if they are taken in November, they could not be of value for comparing them with another year.

Mr. KETCHAM. I think the gentleman's argument is not tenable, because so far as farm statistics are concerned, if they were taken as of November 1, practically complete figures could be taken for that year.

Mr. JOHNSON of Washington. If you take the agricultural census in November you do not get the zero year. If you take the population census in November you will find that the farmer population to a very large extent has migrated to the cities.

Mr. KETCHAM. I do not see why your agricultural census, if taken in November following the population census in May, would not be taken for the zero year, the year 1930.

Mr. JOHNSON of Texas. If an attempt was made to do that the same men would take the census about the same time and save $5,000,000.

Mr. KETCHAM. Even if it costs $4,000,000, I feel that its increased accuracy would be worth the additional cost.

Mr. JOHNSON of Texas. Following what was said by the gentleman from Iowa [Mr. THURSTON], I am impressed with the idea that on November 1 in the cotton section the crop will not have been gathered and they will not know what the crop is for that year.

Mr. KETCHAM. Of course, I could not speak of your conditions with authority; but certainly I do believe that a November farm census date is worthy of consideration, and I have taken this time this afternoon in order to bring the matter to your attention so that this change might be considered in the Senate.

Mr. FENN. Mr. Speaker, I yield five minutes to the gentleman from Mississippi [Mr. RANKIN].

Mr. RANKIN. Mr. Speaker, the gentleman from Michigan [Mr. KETCHAM] shows clearly that he is not familiar with the struggle through which the Census Committee has passed in trying to arrive at the details of this bill.

In the first place, he suggests that we take this census in November, 1929. Let me call his attention to the fact that the census of population must be taken within the 10-year period beginning January 1, 1930. It would be unconstitutional to take it before the 1st of January.

Mr. KETCHAM. Why could it not be taken in November, in 1929, the year before?

Mr. RANKIN. That is just what I say.

Mr. KETCHAM. Then in the following year.

Mr. RANKIN. They never have done it; and they have never taken the two censuses separately; and the Department of Agriculture has never successfully challenged one of these agricultural censuses. The trouble is that the Bureau of Agricultural Economics in the Department of Agriculture really wants to take this matter into their own hands, and, so long as I am on the Committee on the Census, I assure you that they are not going to do it with my consent. [Applause.]

As a rule, the census has been taken on the 1st of June, except, I think, twice. At one time it was taken in August, and in 1920 some people who did not know anything about the taking of the census had their way and had the census taken in January. We did not get a correct census of the population of the rural districts, and as a result of that we have not been able to make reapportionment under that census.

Mr. JOHNSON of Washington. It was off by millions.

Mr. RANKIN. Yes. We had this question up before the Census Committee, and the Bureau of Agricultural Economics and others have been represented, and finally every member of the committee agreed upon this bill—to take the census of both population and agriculture as of the 1st of May, 1930, and thereby save at least $5,000,000. If it takes $40,000,000 to take the two together, it would likely take $15,000,000 to take agriculture separately.

You are not getting anywhere by voting this motion down. You simply leave this bill exactly where it is, and at the next session you are going to have the same members of the Census Committee, and they will have the same opinions they have on this question to-day. You may possibly get a change in the Senate, but I do not think you will.

This is the very best bill we could work out. We discussed the question of taking the agricultural census in the fall of the year, but it was decided that that would not be best. We decided we could best get both the population census and the agricultural census as of May 1, 1930.

Mr. JOHNSON of Texas. Mr. Speaker, will the gentleman yield there?

Mr. RANKIN. Yes.

Mr. JOHNSON of Texas. Is it not true that in the month of May the agriculturists are on the farm more than at any other time?

Mr. RANKIN. Certainly.

They talk about "tenant farmers." Evidently the gentleman from Michigan [Mr. KETCHAM] is not familiar with tenant farmers. The fact is that just as soon as they get their crops gathered many of them go away to seek employment for the winter. If you go out in January or in November and take the census you will not find the tenant farmers. You will get a more accurate census in May than in November.

They say they are getting these propaganda reports, inspired by this bureau of economics in the Department of Agriculture. How long, I ask, are we going to legislate by telegram here? It has not been a week since we had a bill up here about which we received telegrams which influenced Members' votes to their sorrow.

The SPEAKER. The time of the gentleman from Mississippi has expired.

Mr. RANKIN. May I have five minutes more?

The SPEAKER. Is there objection?

There was no objection.

Mr. RANKIN. Members of Congress are yet trembling in their boots because last week they were misled by letter propaganda and telegram propaganda to vote for a measure they now repudiate. How many of the men who have written you know anything about this bill? Why have they not come in here and challenged the census taken in 1900, which was taken on June 1 of that year? Why have they not shown that there was something wrong with the census of 1890, which was taken on June 1? The truth is they have never found a flaw in the census of agriculture when it has been taken in the spring or early summer, and they will find no flaw in this one. We will get a more accurate census by taking both of them on the 1st day of May than if taken at any other possible time of the year.

Let me remind my friend from Michigan again that we are going to try to see that a thorough census is taken not only of agriculture, but of population, and when the report is made we will reapportion the House of Representatives on the basis of that census.

Mr. MOORMAN. Mr. Speaker, will the gentleman yield?

Mr. RANKIN. Yes.

Mr. MOORMAN. Is cotton ginned and corn gathered and other crops taken in by the 1st of November?

Mr. RANKIN. No. It has been brought out by the committee that a great many of these crops are not gathered by that time.

This is just the beginning of a lot of propaganda you are going to get to try to turn this over to the Bureau of Agricultural Economics.

Mr. MOORMAN. Will the gentleman yield further?

Mr. RANKIN. Yes.

Mr. MOORMAN. Here is a report given me at my request by the Census Bureau.

The statement that I desired to insert in the RECORD was a part of the hearings before the Census Committee, as reported on page 152, and giving the dates of the censuses since 1790, in response to a question I asked the witness, Doctor Hill, as follows:

Mr. MOORMAN. A statement was filed upon that discussion, I believe.

Doctor HILL. That is as to the dates. This gives three reasons.

Mr. MOORMAN. This gives the reasons. I think that this should be filed now.

Mr. RANKIN. Let it go in the record.

The CHAIRMAN. Very well.

The statement referred to is printed in the record in full as follows:

"See section 6, page 5, and section 16, page 12. The date of enumeration and the subjects of population and agriculture are shown below:

"First Census, 1790, first Monday in August—Population.
"Second Census, 1800, first Monday in August—Population.
"Third Census, 1810, first Monday in August—Population.
"Fourth Census, 1820, first Monday in August—Population.
"Fifth Census, 1830, June 1—Population.
"Sixth Census, 1840, June 1—Population and Agriculture.
"Seventh Census, 1850, June 1—Population and Agriculture.
"Eighth Census, 1860, June 1—Population and Agriculture.
"Ninth Census, 1870, June 1—Population and Agriculture.
"Tenth Census, 1880, June 1—Population and Agriculture.
"Eleventh Census, 1890, June 1—Population and Agriculture.
"Twelfth Census, 1900, June 1—Population and Agriculture.
"Thirteenth Census, 1910, April 15—Population and Agriculture.
"Fourteenth Census, 1920, January 1—Population and Agriculture.

"Three reasons why the census of population and agriculture should be taken together:

"(1) A more complete and accurate census of agriculture is secured by taking the two together, as has been shown by the experience of the Bureau of the Census in taking the census of 1920, which included agriculture and population, and the census of 1925, which included agriculture alone. The censuses of population and agriculture have been taken together and by the same enumerators ever since the first census of agriculture was taken, in 1840.

"(2) It will prevent a duplicate enumeration or a duplication in Government work. If taken together, the field force will be employed only one-half as long as if taken separately. A census is a personal canvass. Hence, the enumerator on visiting each farm in the United States will secure the information for population and for agriculture on one visit. If taken separately it would mean two separate canvasses at two different times and only a few months apart.

"(3) It will prevent additional cost for the field enumeration. It will mean a saving in Government expenditures. If taken separately it will cost approximately $3,000,000 or $4,000,000 more than if taken together."

All these years since 1790, when the census was taken in August and in June, agriculture had more consideration accorded it. Agriculture, then, was treated as meaning more in our economic system than to-day. Is it possible that the added feature of the census—distribution—can be better served by a November 1 date? Anyway, why was the date changed in 1920 to January 1? When we spend $40,000,000 and employ 100,000 people to do a job we should exercise the greatest care. I ask every interested Member to read the report of the hearings before our committee.

It will be observed that the Department of Agriculture seems not to have tried the experiment of taking the census in the wintertime until the census of 1920, which was taken January 1. Therefore since the first census, in 1790, the census of population has been taken in the month of August until 1830, when the date of June 1 was substituted. Each census thereafter until 1920 has been one of population and agriculture

combined, and up to 1900 was taken June 1. In 1910 the date of April 15 was substituted for the census of both population and agriculture. For some reason, in 1920, the date was shifted to January 1. What were the results? If you will turn to the majority report of the Census Committee, made on the reapportionment bill, recommitted last Saturday, you will find the chief reasons assigned for failure to reapportion were given in the report in the following language:

The technical reason given for failure to reapportion in 1920 was that the census of 1920 did not fairly represent the population of the rural districts. This charge was based on two grounds:

First. That the census of population was taken as of January 1, 1920, which was considered unfair to the rural districts, especially in the years following the close of the World War; and

Second. That the actual enumeration was not efficient.

I requested that Doctor Hill, and those associated with him representing the Bureau of the Census, before the Census Committee, give me the reasons why two censuses should be taken together. They are the ones above inserted in the RECORD. For some unexplained reason, after Doctor Stewart returned from Europe he was a witness before our committee, and you can see that his statements show a change of policy from that laid down by Doctor Hill. I respectfully refer those interested in this subject to his testimony, during which the chairman of our committee, Hon. E. HART FENN, placed in the RECORD a joint communication from Secretary Hoover and Secretary Jardine, recommending that the census be taken as of November 1. The Secretaries' letter is recorded on page 298 of the hearings.

The committee felt that a full and accurate enumeration of population was necessary, in the light of the complaints made of the 1920 census. It was unanimously agreed that the spring was the proper and best time for taking the census of population. This being agreed upon, the next question was whether we should have a separate census of agriculture or take them together. This made three to five millions difference in cost. It was for this reason that I requested the reasons of the Bureau of the Census for taking the censuses together. Their reasons seemed almost conclusive. So if the censuses had to be taken together, it was our duty to fix a date that was fairest to the country as a whole. This date was agreed upon finally as May 1. There are possibly some reasons why November 1 might be a better date for agriculture. However, these arguments presented before our committee came from statisticians and from the Department of Agriculture, all of whom are largely interested in the census from a standpoint of comparisons and other kindred angles.

November 1 was objected to by many from agricultural sections for several reasons, among which the following might be noted, namely:

1. Tobacco is not all stripped nor sold by November 1 and neither the amount nor the quality thereof is known.

2. Corn is not all gathered.

3. Cotton is not all ginned.

4. Cattle are on feed and unsold, and the same is true of the hogs.

5. When crops are laid by, many people, both landowners and tenants, go to the cities to work in the various industries.

6. Tenants begin moving from place to place, and they are usually settled somewhere by May 1.

7. Many roads are impassable after November 1, and taking the census would last four or five months, and it would be impossible to get from place to place in many sections. After November 1 the weather would be getting cold, and when the enumeration was in full operation would seriously interfere. If the persons visited kept books, he could give the figures as well May 1 as he could in November; and if he did not, he would have to rely on his memory any time. Another advantage argued for May 1 was that many teachers would be released in time to become enumerators. They would be somewhat familiar with the sections and would be qualified to do good work.

On the whole, considering that there is a great desire and demand for an accurate enumeration of population, and the committee practically unanimously agreeing that May 1 was the best time to take the census of population, especially in the rural districts, and believing that date would be fair to everybody, we fixed the date as of May 1.

Mr. RANKIN. I thank the gentleman from Kentucky [Mr. MOORMAN] for that statement, which further proves that May 1 is the best date for both the census of population and that of agriculture.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Connecticut to suspend the rules and pass the bill with amendments.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

PREFERENCE TO THE WIVES AND MINOR CHILDREN OF ALIEN DECLARANTS IN THE ISSUANCE OF IMMIGRATION VISAS

Mr. JENKINS. Mr. Speaker, I move to suspend the rules and pass Senate Joint Resolution 5, as amended, to grant a preference to the wives and minor children of alien declarants in the issuance of immigration visas.

The SPEAKER pro tempore. The gentleman from Ohio moves to suspend the rules and pass Senate Joint Resolution 5, with amendments. The Clerk will report the resolution.

The Clerk read the Senate joint resolution, as follows:

Resolved, etc., That section 4 of the immigration act of 1924 is amended by striking out the word "or" at the end of subdivision (d) and by striking out the period at the end of subdivision (e) and inserting in lieu thereof a semicolon and the word "or" and by adding after subdivision (e) a new subdivision to read as follows:

"(f) A woman who was a citizen of the United States and who prior to September 22, 1922, lost her citizenship by reason of her marriage to an alien."

SEC. 2. That subdivision (a) of section 4 of the immigration act of 1924 is amended to read as follows:

"(a) An immigrant who is the unmarried child under 21 years of age, the wife, or the husband, of a citizen of the United States;"

SEC. 3. Section 6 of the immigration act of 1924 is amended, to take effect July 1, 1928, to read as follows:

"SEC. 6. (a) Immigration visas to quota immigrants shall be issued in each fiscal year as follows:

"(1) Fifty per cent of the quota of each nationality for such year shall be made available in such year for the issuance of immigration visas to the following classes of immigrants, without priority of preference as between such classes: (A) Quota immigrants who are the fathers, or the mothers, of citizens of the United States who are 21 years of age or over; and (B) in the case of any nationality the quota for which is 300 or more, quota immigrants who are skilled in agriculture, and the wives, and the dependent children under the age of 18 years, of such immigrants skilled in agriculture, if accompanying or following to join them.

"(2) The remainder of the quota of each nationality for such year, plus any portion of the 50 per cent referred to in paragraph (1) not required in such year for the issuance of immigration visas to the classes specified in such paragraph, shall be made available in such year for the issuance of immigration visas to quota immigrants of such nationality who are the unmarried children under 21 years of age, the husbands, or the wives, of aliens lawfully admitted to the United States for permanent residence.

"(3) Any portion of the quota of each nationality for such year not required for the issuance of immigration visas to the classes specified in paragraphs (1) and (2) shall be made available in such year for the issuance of immigration visas to other quota immigrants of such nationality.

"(b) The preference provided in paragraphs (1) and (2) of subdivision (a) shall, in the case of quota immigrants of any nationality, be given in the calendar month in which the right to preference is established, if the number of immigration visas which may be issued in such month to quota immigrants of such nationality has not already been issued; otherwise, in the next calendar month."

The SPEAKER pro tempore. Is a second demanded?

Mr. DICKSTEIN. Mr. Speaker, I demand a second.

Mr. BOX. Mr. Speaker, I demand a second.

Mr. DICKSTEIN. Mr. Speaker, I yield to the gentleman from Texas.

Mr. JENKINS. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. The gentleman from Ohio is recognized for 20 minutes and the gentleman from Texas [Mr. Box] is recognized for 20 minutes.

Mr. JENKINS. Mr. Speaker, I yield myself five minutes.

Mr. ROBSION of Kentucky. Will the gentleman yield to me to prefer a unanimous-consent request?

Mr. JENKINS. Yes.

Mr. ROBSION of Kentucky. Mr. Speaker, I ask unanimous consent that those Members who spoke on the George Washington Memorial Road have the right to revise and extend their remarks.

The SPEAKER pro tempore. The gentleman from Kentucky asks unanimous consent that all Members who spoke on the George Washington Memorial Road bill have the right to revise and extend their remarks. Is there objection?

There was no objection.

Mr. JENKINS. Mr. Speaker, I ask unanimous consent that all Members who may speak on the pending resolution may have permission to revise and extend their remarks.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. JENKINS. Mr. Speaker and Members of the House, this is an immigration resolution. I might say at the outset that this is not the resolution about which you have been receiving communications within the last few days; in other words, it is not the Box bill. I think you will find that Judge Box will be in favor of this resolution. I might say also that this resolution carries with it the unanimous recommendation of the Committee on Immigration. It has to do with a very troublesome question, a question that has troubled the Immigration Committee for several years. It has to do with the reuniting of families. We have heard that matter discussed for years.

Now, what does this resolution do? If I am not interrupted by questions for about five minutes I think I can tell you, in substance, what this resolution proposes to do.

Mr. O'CONNOR of New York. Will the gentleman yield for a parliamentary inquiry?

Mr. JENKINS. Yes.

Mr. O'CONNOR of New York. Mr. Speaker, I want to inquire how the gentleman from Texas [Mr. Box] obtained the time in opposition to the resolution if he is not opposed to it.

The SPEAKER pro tempore. He was the only gentleman who claimed recognition.

Mr. LAGUARDIA. No; I was on my feet.

Mr. DICKSTEIN. Mr. Speaker, I was on my feet, and I yielded to Judge Box.

Mr. COOPER of Ohio. Mr. Speaker, I demand the regular order.

The SPEAKER pro tempore. The gentleman from Texas has been recognized, and the gentleman from Ohio will proceed.

Mr. LAGUARDIA. Mr. Speaker, I make the point of no quorum.

The SPEAKER pro tempore. The Chair will count.

Mr. CHINDBLOM. Mr. Speaker, a point of order. I want to suggest that the question of recognition has not yet been determined. It does not necessarily belong to the man who demands a second unless he can qualify when the time comes.

The SPEAKER pro tempore (after counting). Two hundred and twenty-five Members are present, a quorum.

Mr. JENKINS. Mr. Speaker and gentlemen of the House, this bill comes to us for consideration as a Senate bill. The Senate passed a bill dealing with the admission of families, but your Committee on Immigration thought it wise to amend that bill, and the amendments to the bill are of such a nature that the Senate bill itself is really lost sight of; in other words, it is clear that a parliamentary advantage might be had in striking out all after the enacting clause of the Senate bill and inserting in lieu thereof the Jenkins bill, which has been done. The bill for consideration, therefore, is the Jenkins bill, concerning which many of you have had many inquiries. Your Committee on Immigration has spent much time in hearings and discussions, and the Jenkins bill is the result of the most careful consideration of your committee. If it is not passed here to-day, there will be no chance for its passage at this session. It has the support of many organizations interested in immigration matters. It does not go far enough to suit many others. It is sanctioned by the restrictionists. It is a restrictionist measure, but is designed to smooth over some of the rough places in the law.

Now, what does the bill do? In the first place, it amends section 4 of the immigration act in two or three respects. These amendments let in but very few additional persons; they relieve some situations which have been a source of worry to many social and religious workers and which have excited the sympathies of many people. What is section 4 of the immigration act? Section 4 is that section that sets out in detail the various classes of immigrants that may come in outside the quota.

Now, how does this resolution amend that section? The first amendment provides that a woman who was a citizen of the United States prior to September 22, 1922, and who lost her citizenship prior to that time by reason of her marriage to an alien, might, if she wishes to return to the United States, be permitted to do so as a nonquota immigrant. This means any woman who was formerly a citizen of the United States who married prior to 1922, when the Cable Act went into effect, and lost her citizenship thereby, if she is now in some foreign country and wants to return, can return nonquota.

Now, how many are there of this class? I do not know. We are told by the department that there are very, very few of them. This applies, as I said before, to people who were citizens before 1922. This is one exception outside of the quota. This class will not be a continuing class. Those who want to come in under this class are those who were unfortunate in their marriage. Most, if not all, are women born in America, who, after a period of residence in some other country, wish to return. There can be no serious objection to this.

What is the next amendment? The next amendment to section 4 does this: Section 4 now says that wives of American citizens may come into this country nonquota. Those who were here when the original bill was framed have told me it was intended at that time that the word "husband" should have been included, but it was not included. There has been a great clamor among different classes of people to let down the bars that far; in other words, to let down the bars so that husbands of women who are American citizens may come in nonquota. If the wives of American citizens are permitted to enter nonquota, why should not the husbands of American citizens? The only objection is that this increase would be that many more in competition with American citizens already here. Recognizing restrictive immigration as a national policy, we are still consistent when we consider that a happy family life is the corner stone of Americanism. Your support or opposition to this amendment will depend somewhat on the number admitted hereunder. It is estimated that the number now awaiting to come in who come under this amendment are only about 700.

Mr. JOHNSON of Washington. Which is the accumulation of four years' time.

Mr. JENKINS. And as my chairman has said, this is an accumulation of four years. This does not mean that in the future there will be 700 a year, but means there will probably be 100 or 150. In fact, after this accumulation is absorbed, it is my judgment that the number will decrease. Should it increase so as to become at all alarming, Congress will still be able to reach out and, by amending the law, stop it. Now, what other class is provided for outside of the quota?

There was one other class. There has been a great clamor in this country to raise the limitation from 18 to 21 years of age for children of American citizens. Personally, I have not been much in favor of this, but it is claimed that the age of 18 is an important period in the lives of children who are attending school. This recession on the part of us who are considered restrictionists is an instance of compromise which is so often an important factor in procuring the passage of legislation. The fact that this does not apply to any but unmarried children changes the situation greatly.

It will be remembered also that these amendments apply only to husbands and children of American citizens. We hope and confidently believe that the passage of this will be accepted as a final solution of this question of the reuniting of families.

The SPEAKER pro tempore. The gentleman from Ohio has used five minutes.

Mr. JENKINS. Mr. Speaker, I yield myself five minutes more.

Now, how many does this class include? In my report filed with the original Jenkins bill and also with this Senate bill I say there is an accumulation of about 3,000 in four years.

This number will lessen very materially in my judgment in the next few years. This will result from the shifting and increasing of the preferences within the quotas as is done in another section of this bill. It is my judgment that when the last section of this bill begins to operate practically all the children will come in within the preferences for an immigrant who is here for legal residence will be able to get his children in sooner under the quota than by waiting until he becomes a citizen which he would be required to do in order to bring them in outside the quota. It is my judgment that in a short time this will adjust itself so that few children will come in outside the quota. This opinion is shared in part by the Department of State as will appear from a report of the committee prepared by myself.

Mr. COOPER of Ohio. Will the gentleman yield?

Mr. JENKINS. I gladly yield to my distinguished friend and colleague from Ohio.

Mr. COOPER of Ohio. Under your bill if a girl who is an American citizen went to a foreign land and married an alien, could he come in as a nonquota immigrant?

Mr. JENKINS. If she is an American citizen, yes. We went into that matter very thoroughly. We had representatives of the State Department and the Labor Department before us and they tell us that the number of husbands who go abroad to marry women just to bring them in in circumvention of the law are very few. The departments go into these cases very thoroughly and they hold that such a marriage is not a marriage in contemplation of the quota law. It is therefore safe to presume that they will be able to control the matter of American girls seeking to marry aliens in order that these men might come in. If this privilege is abused, the legislative arm

of the Government is ever ready to come to her defense with corrective legislation.

Mr. JOHNSON of Washington. Let me answer that question a little further. If she marries and goes out to an alien husband and stays there for two years, the presumption is she has lost her citizenship. We have provided a way whereby under certain circumstances they can come back nonquota, but to do that they have to go through the full process of getting a nonquota visa, which covers the situation.

Mr. COOPER of Ohio. But under the bill she could leave the country, go to a foreign land and marry an alien, and he could come in as a nonquota immigrant?

Mr. JOHNSON of Washington. Yes.

Mr. COOPER of Ohio. Now, I would like to ask the gentleman one other question. The present law contains a provision with respect to minor children up to 18 years and, as I understand it, this bill increases it to 21 years.

Mr. JENKINS. From 18 to 21; yes.

Mr. DYER. Will the gentleman yield?

Mr. JENKINS. Yes.

Mr. DYER. The gentleman stated that this bill applies to all American citizens. The gentleman will recall that American citizens born in this country of Chinese ancestry are not permitted even to bring in their wives under the law, and the bill does not remedy that.

Mr. JENKINS. No.

Mr. DYER. Some of them are World War veterans.

Mr. JOHNSON of Washington. The reason for that is that there is so much fraud in the Japanese and Chinese immigration that we are afraid at the present time to enlarge it for fear of more fraud.

Mr. DYER. I think the gentleman's statement is incorrect. I have not heard of so much fraud among the Chinese as among the other nationals.

Mr. JENKINS. Let me say that the Chinese immigration is controlled by a different law. The quota law of 1924, which is the law under discussion, does not deal with Chinese at all. The Chinese immigration is controlled by an entirely different law and under an entirely different policy.

Mr. BURTNESS. Will the gentleman yield?

Mr. JENKINS. Yes.

Mr. BURTNESS. What effect will this have on the present provisions of the act with reference to preference being given to agriculture?

Mr. JENKINS. It does not change it in the least. I am coming to that. The next provision in the bill that we deal with is section 6. What is section 6? That is the section that deals with preferences within the quota. By that I mean that those who come under the quota are classified as to priority of preference. Husbands and children between the ages of 18 and 21 and fathers and mothers have a 25 per cent preference under the present law, and farmers and their families of countries with quotas of over 300 have a preference to the extent of 25 per cent of the quota and that leaves 50 per cent for the general immigrants. Our bill—and I think this is the most important and vital part of this bill for those favoring the reuniting of families is in this next provision, and that is that this remaining 50 per cent that has been going to general immigration is given as a preference to the families of aliens in this country who are here for permanent residence. In other words, if there is an alien from Italy who has been here a number of years and has indicated his desire to make this his permanent home, and he has his own family back in the old country, then this bill gives him a preference over the alien who is waiting his turn to come in under the quota. In this way the family of the workingman and the man already here will come in, and he will be a more satisfied and better citizen, and new immigrants will be compelled to wait until these women and children are in. This feature of the bill is just and equitable and meets the approval of every fair-minded man.

Mr. O'CONNELL. Does that eliminate the man who wants to come to this country but who has no relatives?

Mr. JENKINS. If the preferences to members of families exhaust the quotas—yes.

Mr. CELLER. Then there is no possibility of any new blood coming in under this bill?

Mr. JENKINS. Oh, yes; there is abundant possibility. It will have no effect on the big countries. Take Italy as an example. The quota is 3,600, and 1,800 would be in this last class. If we give the preference to women and children of aliens in this country it will take about two years to consume that quota, and after that they will all come in as heretofore. That is in the order of their application and qualification for visas.

Mr. SCHAFER. It provides for the family of aliens who have signified intention to remain here?

Mr. JENKINS. Yes.

Mr. SCHAFER. Under subdivision 2, section 1, if an alien comes here and remains 20 years and is not naturalized——

Mr. JENKINS. He must indicate his intention that he is here for permanent residence.

Mr. KINDRED. Will the gentleman yield?

Mr. JENKINS. Yes.

Mr. KINDRED. Under this bill with reference to united families how much will be the total increase in immigration?

Mr. JENKINS. For the first year it will be a little over 3,000, which is an accumulation of four years, but in future years the total will dwindle until in five years, in my judgment, it will be practically nothing.

Mr. KINDRED. Two thousand five hundred total in any case?

Mr. JENKINS. As I have already stated not many more than 3,000 to start with and a gradual decrease in future years.

Mr. Speaker, I reserve the balance of my time.

Mr. BOX. Mr. Speaker, the gentleman from Texas is supporting the bill; and if he is not entitled to demand a second, he does not wish to.

The SPEAKER. The Chair thinks that some one opposing the bill is entitled to demand a second. The gentleman from Texas was the only Member demanding a second, and so the Chair recognized him.

Mr. DICKSTEIN. Mr. Speaker, I am opposed to the bill. I am a member of the committee, and I demand a second.

The SPEAKER. The Chair will recognize the gentleman from New York to demand a second.

Mr. DICKSTEIN. Mr. Speaker, I will yield myself 10 minutes. Mr. Speaker and Members of this House, those of you who believe that this is an immigration bill ought not to be alarmed—it is not an immigration bill at all. This bill does not do one solitary thing to increase the number in the quota. The quota is 163,000 under the act of 1924, and it is going to remain 163,000. The committee in its wisdom is simply switching the preference. In other words, instead of calling it A they call it Z. How do they do it?

They simply turn around and practically suspend immigration until the families will be united under certain provisions and in certain categories.

Mr. JOHNSON of Washington. Is the gentleman willing to accept the bill for what it is?

Mr. DICKSTEIN. I will come to that in a moment.

Mr. JOHNSON of Washington. It does not make much difference.

Mr. DICKSTEIN. Neither does it make much difference, because I do not think in reality you are uniting the families at all, and to leave the impression in this House that you are giving something away, is wrong, and the gentleman should get it out of his head, because you are giving nothing away, in so far as this immigration policy is concerned. One thing you are doing in this bill which we did in 1924 is to increase the age limit of American children from 18 years to 21 years. We had that in the act of 1924, but the Senate for some reason or other took it out.

The next thing you do is simply to change the preferences. You take the father and the mother of American citizens, and you take 50 per cent of the total of 163,000, and you throw them into one pot, and you say, "Go on and scrap it out, between yourselves," and who will come in first? Then you take the other 50 per cent, and you are going to unite the families, which means that a person who has been here in this country, who has a wife and children, may have the right given to the wife and children to come in here under the preference. We ought to unite the families. We ought to give the wife the benefit of coming to her husband, and we ought to give the children the opportunity to see their fathers and mothers. You are separating them because under your very preference it will take at least three to four years. Oh, but I am mindful of the fact that the time is growing late, and if we go back to the committee we will not get another bill out, and under these circumstances I shall probably vote for this bill for what it is worth, but it is worth very little.

Mr. CELLER. Mr. Speaker, will the gentleman yield?

Mr. DICKSTEIN. Yes.

Mr. CELLER. Is it not true, however, that under this enactment you will preclude new blood coming from the countries that have the small quotas?

Mr. DICKSTEIN. Absolutely. There is no new immigration that will come into this country until the preference of those I have enumerated is exhausted.

Mr. KINDRED. Is the gentleman's estimate the same as that of the preceding speaker, that the total increase will be at least in any case 3,500?

Mr. DICKSTEIN. No; I do not think so. There are 200 husbands of American citizens in the past four years and there is at least probably a thousand or fifteen hundred American children, or two thousand, who are over the age of 18.

Mr. STOBBS. This bill at least does reunite the families.

Mr. DICKSTEIN. It does not. It helps create a condition in this country by increasing the age limit of American children up to 21 instead of 18.

Mr. STOBBS. It does make possible, does it not, that the fathers and mothers of aliens who are already over here, or the wives and children of aliens already over here, who are not citizens, can come in?

Mr. DICKSTEIN. I also agree with the gentleman that under the present law if we are going to extend a waiting line that has been waiting there for several years and put them aside, naturally the father and mother under this preference that you find in the bill will come in first.

Mr. LAGUARDIA. The gentleman is a member of the committee?

Mr. DICKSTEIN. Yes.

Mr. LAGUARDIA. I understood him to state that he is opposed to the bill.

Mr. DICKSTEIN. I am opposed to the bill, but at the same time I want to be frank with the gentleman and say that I think I am going to support it, because I think that that is the best that you can get at this time.

Mr. MACGREGOR. I think the gentleman is confusing the situation when he says it does not permit the wives and children to come in. It does unite families to the extent of 50 per cent of the quota.

Mr. DICKSTEIN. Fifty per cent of the quota, and that is exactly what we are doing now under the present law. As I said, this bill was the only kind of a bill which I could prevail upon the committee to pass. As far as it goes it will bring some relief to American families which are now separated by virtue of our harsh immigration laws. But this bill is not going far enough and is certainly not going to help our American families to a very large extent. It certainly will not add one single immigrant to the total of immigration now allowed into the United States and it can hardly be said that Congress has done anything by this bill to relieve existing conditions.

This is not the first time that it has become my duty to call the attention of Congress to the fact that separation of families was one of the worst misfortunes that could be imagined. We have so many cases of fathers and mothers separated from their children and husbands separated from their wives. There is only one answer to it and that is our immigration policy which is embodied in our legislation.

The family relation is the most sacred known to man. It is the foundation of the state. Its maintenance makes for morality, decency, and happiness. The law as it now stands encourages immorality, indecency, and makes for unhappiness. Husband and wife should not be severed; and if they are separated, it can only result in distressing circumstances. The same reasoning applies to the separation of parents and children. To separate fathers and mothers from their offspring means not only cruelty to both but it leads to demoralization; and in the course of time must result in the creation of abnormal conditions and the destruction of the mental and moral fiber of both parents and children.

I believe that at this time it requires no citation of authority to prove that the man whose wife and children are living with him has a greater incentive to become an industrious and useful member of the community than one who has been separated from his family and who can not respond to those calls upon fundamental decency which the maintenance of a family makes upon any rightfully constituted man.

There are frequently instances where the father and mother have been forced to leave the country of their birth and where the children were left behind at a time when they were approaching the age of adolescence. Sometimes they may be girls between 13 and 14 years of age whose father has left them and who have reached the age of between 18 and 21 years. Fortunately, the Immigration Committee saw fit to include in the nonquota class children of American citizens between the ages of 18 and 21. This is a step forward.

But a mere granting of a preference to alien declarants is hardly going far enough to solve this question of uniting of families. Not only must children and their parents be united, not only husbands and wives be united, but why should not parents of American citizens be permitted to come to the United States without the quota? Their number is not large. What logical reason can be assigned for the keeping out of the United States of aged parents who are for the most part dependent upon their children, whose children are willing and ready to support them, but who simply can not come into the United States because of the arbitrary limitations in our existing immigration laws.

I reiterate there is not only the increase of the age limit of American children, but we ought to include the father and mother, and we ought to forget this arbitrary distinction which the bill now places between the quota and nonquota immigrant.

You are not increasing by one immigrant the number of those who can come in from the quota of the act of 1924. You are simply making it impossible for any immigrants to enter the United States unless they happen to have relatives in this country already. As far as you go, you have relieved the condition to some extent, but you have not done what in justice and humanity you should have done and for what I have been giving my time, energy, and effort during the entire time that I was a member of this august body and of the Immigration Committee.

I want to warn this country at this time of the dire consequences which this unfortunate haphazard and unscientific immigration policy has accomplished. We must once for all get away from the idea of forbidding desirable prospective citizens to enter this country under the restrictions placed by Congress. Some day you gentlemen will awaken to the truth of the situation and will come to realize that to create a great nation it is necessary to act without prejudice and without preconceived notions or views about the inferiority of a certain type of immigrant or superiority of another type. Do not, for Heaven's sake, count the number of desirable citizens who are to make their home with us. If the husband is good enough to stay here, I believe his wife and children are just as good. If the father is good enough to stay with us, I believe his wife and children are also good enough to stay with us.

You should have exempted all these desirable classes from the operation of the quota law, but as you do not see fit to do so, and as this bill is the only one which has a chance to pass before recess of Congress, I will have to reluctantly vote for it and trust to time and tide to change your views and to liberalize some of the provisions of immigration legislation which you saw fit to put in our statute books. [Applause.]

Mr. Speaker, I yield five minutes to the gentleman from Texas [Mr. Box].

Mr. WAINWRIGHT. Mr. Speaker, before the gentleman begins, will he yield to me for a question?

Mr. BOX. Yes.

Mr. WAINWRIGHT. Will the gentleman please tell us what the bill actually does?

Mr. BOX. This bill preserves the quota restrictions by admitting certain relatives of foreign-born people here within the restrictions of the quota so as not to increase the body of our immigration—to bring them to join their relatives here within the quota. There has been a strenuous effort for many years to admit numbers ranging from a few thousand to several hundred thousand relatives of immigrants outside the quota, which would add that much to the volume. We here reject that idea and require that such relatives as are admitted come within the quota, thereby preventing any substantial increase in the volume of our immigration, but at the same time permitting the greatest possible number of divided families to reunite themselves in a manner consistent with our policy to permit no increase of immigration. It does two things in that respect: First, it stops families from dividing themselves. Uncle Sam has never divided any families. It tends to stop families from dividing themselves and allows greater portions of the quotas to be used by relatives of those who have already legally come so as to reunite the families which have divided themselves. There are three small exceptions to the statement that such relatives must come within the quota. The original immigration act of 1924, as presented to the House and passed by it, provided that the husband of an American citizen should come to join the wife, just as the present law provides that the wife of an American citizen should come to join her husband.

It was changed before the legislation was finally enacted, so that the husband of the citizen wife could not be admitted to join her. This bill restores that provision to the law. I care not much for that.

We made the age of children of American citizens who are nonquota from 18 to 21 years. Originally it was 18 years, and here we make it 21 years.

Mr. CELLER. How many will that be?

Mr. BOX. That will be all together of both classes about 3,000, perhaps 3,500, of those who have accumulated during four years. The number of unmarried children of citizens, that is children between 18 and 21 years, is very small.

Mr. CELLER. How many from 18 years to 21?

Mr. BOX. About 750 or 800—something like that. That is a four-year accumulation. Only a slight annual dribble will follow. The total of both classes is about 3,500. Those within these classes coming hereafter will be exceedingly small unless we change the basis on which they are admitted which I shall oppose.

Then there are in Europe and elsewhere a few American girls who have lost their American citizenship by marriage prior to the time the Cable Act became effective. They can not return to the United States under the law except by waiting until they are reached in the quota, and in many cases that will be some time in the indefinite future, when their turn in the quota is reached, 4 or 5 or perhaps 10 years hence. In some cases perhaps they may never be reached. So we believe that the foolish girls, sweet, and unwise as they are, ought to get back under their fathers' roofs. [Laughter and applause.] We therefore ask that they be admitted, and we hope the next time they will marry American men and become the mothers of good American citizens. This bill is restrictive and constructive. Gentlemen, you can afford to vote for it. [Applause.]

Mr. DICKSTEIN. Mr. Speaker, how much time have I left?

The SPEAKER pro tempore. The gentleman has 11 minutes left.

Mr. DICKSTEIN. I yield four minutes to the gentleman from New York [Mr. LAGUARDIA].

Mr. LAGUARDIA. Mr. Speaker, the gentleman from Ohio [Mr. JENKINS] and the other sponsors of this bill tell you, without batting an eye, that it is the purpose of the Immigration Committee not to increase the immigration to this country. [Applause.] Keep your applause a moment. Wait until you hear the rest. They have forgotten to tell you that they have refused to prevent the entry of 300,000 Mexicans who come here and work on starvation wages.

Mr. BOX. Mr. Speaker, will the gentleman yield?

Mr. LAGUARDIA. In a moment. The Box amendment was before the committee and everybody was for it, but because three railroad men came before the committee and a couple of sugar-beet planters came before the committee you heard no more about the Box resolution; so that all this talk about keeping down the number in order to protect American labor is all bunk. As long as immigrant labor will submit to exploitation and work under miserable conditions at low wages there is no talk of immigration restriction. The committee had opportunity to do it, but they refused to do it. The hearings had before the committee speak for themselves. Those hearings are full, and fully prove beyond doubt that the Committee on Immigration have not really the interests of American labor at heart. I will stand by what is in those hearings. I want to say, in all fairness, that the gentleman from Texas [Mr. Box] is standing loyally by his flame and is in no way responsible for the neglect of the committee to act.

We have had a great deal of talk about the depression in agriculture. We have heard the talk that we have too many people engaged in agriculture. Here we provide for bringing some more in, always, of course, if they will work for low wages. This House would vote for any amendment to the immigration law that would permit the entry of fathers and mothers as citizens. The committee knows it and will not dare to put it to the House. We can not under suspension of the rules as this bill is being considered offer an amendment as to fathers and mothers of citizens, and the committee proposes to jam this measure down under a suspension of the rules; and the best test of their unwillingness to consider this matter upon the merits is that you divide the time for the discussion of the bill only among those who favor the bill. No other committee of this House would do that.

If it were the purpose of the Committee on Immigration to prevent competition with American labor they could have stopped 300,000 Mexicans each year at the boundary. When the immigrants come from southeastern Europe they already have their relatives here; they have their contact here; and they do not go to work for starvation wages under the padrone system. That is why they are undesirable to the committee and employers of cheap labor. But you go down to the Mexican border, as the hearings show, and there they hire those people and pay them shamefully low wages and work them all hours of the day and night, and you do not hear anything from them about the restriction of immigration.

Mr. JENKINS. Mr. Speaker, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. JENKINS. Do you favor this bill?

Mr. LAGUARDIA. No; I do not. [Applause.]

Mr. JENKINS. I have put you on record.

Mr. LAGUARDIA. Yes. You have put me on record and you put yourself on record. You do not do a single thing here except to provide for bringing in the titled husband of some girl who married a titled alien. A few American girls went to Europe and married, or rather bought, a title, and now you let the titled husbands in.

Mr. JENKINS. You say this bill does not do anything for the prospective Italian immigrants, women, and children. Can you answer that question?

Mr. LAGUARDIA. Of course I can answer the question. It will permit children of American citizens between the ages of 18 and 21 to come in, nonquota, that now come as preferential.

Mr. JOHNSON of Washington. If they can get a passport from the Italian Government, which is none of our affair.

Mr. LAGUARDIA. I want to try to help run the American Government without attempting to run the Italian Government. [Laughter.]

It was agreed at the beginning of this session, after the President's message was received, that you would come in here with some measure that would permit the entry of fathers and mothers of citizens as nonquota immigrants and to permit the coming of the wives of those immigrants who arrived prior to 1924 and who had declared their intention of becoming citizens, and you have not kept that promise. The American Federation of Labor appeared before the committee and approved an amendment to that extent.

Mr. JOHNSON of Washington. Within the quota. The gentleman should read the record.

Mr. LAGUARDIA. I have read the record and conferred with officials, and the American Federation of Labor placed no such limitation.

Mr. COOPER of Ohio. Mr. Speaker, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. COOPER of Ohio. The fact is that this bill does increase the number of nonquota immigrants.

Mr. CELLER. Yes; by 800.

Mr. LAGUARDIA. Well, make it 1,000.

Mr. COOPER of Ohio. The chairman says 3,700 while you say 1,000.

Mr. LAGUARDIA. Well, grant them 3,700. What of it? I want to keep faith.

Mr. CELLER. The gentleman from Texas [Mr. Box] said 800.

Mr. LAGUARDIA. I want the mothers and fathers of citizens to come here as nonquota immigrants.

Mr. COLE of Iowa. How many are there?

Mr. LAGUARDIA. A man can not have more than one mother.

Mr. COLE of Iowa. Does the gentleman mean to imply that he would have all parents of all American citizens come here?

Mr. LAGUARDIA. Yes; I want parents, fathers and mothers of citizens, to come here; certainly.

Mr. SCHAFER. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. SCHAFER. Is it not a fact that we do not have restricted immigration in this country to-day to protect the labor of the American workingman and that we have Mexicans coming here in droves and working for disgracefully low wages?

Mr. LAGUARDIA. Certainly; and every member of the committee knows that.

Mr. SCHAFER. They are driving down wages in the industrial cities of the country and American workingmen are walking the streets.

Mr. LAGUARDIA. To give an idea of the bunk contained in this bill and how little, if anything, is really being accorded, I want to point out that any American woman who is married to an alien—and I am not talking about the social riffraff who have purchased tarnished coronets and obsolete titles of nobility—may now enter without any difficulty. So that this meaningless bill is not granting anything to these American girls. The Department of State has promulgated a rule to the effect that a citizen of the United States who has made definite arrangements to return immediately in good faith to the United States for permanent residence may be considered in a position to overcome the presumption of noncitizenship and granted a passport valid for the journey to this country. And this ruling affects particularly American wives of alien husbands. So even that mite of pretended generosity must be subtracted from the bill. I consider this bill far from being in keeping with the President's message. I consider this bill by no means a fulfillment of the pledges and promises made by the majority party, and I consider this bill as granting so little relief of not deserving the slightest merit.

The SPEAKER pro tempore. The time of the gentleman from New York has expired.

Mr. DICKSTEIN. Mr. Speaker, I yield four minutes to the gentleman from New York [Mr. SIROVICH].

Mr. SIROVICH. Mr. Speaker, ladies, and gentlemen, a great philosopher, scholar, and sage once remarked that all the world loves a lover. If I may be permitted to paraphrase that beautiful sentiment, I would say, "All the world loves a fighter," particularly if he is fighting for an ideal, for a principle, for freedom, and for liberty. To-day, ladies and gentlemen, irrespective of what has been going on here in this great forum of public opinion, I realize every speaker has been fighting sincerely for an ideal and principle which he honestly believes in.

In regard to the quota restrictions under our laws it seems to me that this distinguished House can be classified in two groups on the principle of restricted immigration. First, those who believe in absolute restriction and maintain that there should be no letting down of the bars, while on the other hand there are Members of this House like myself who are fighting for the ideal of the preservation of the home and reuniting of families that have been severed by this inhuman immigration law that is now upon our statute books, irrespective of the quota. [Applause.]

The previous speakers have referred to the aliens who come into our country as immigrant foreigners. Mr. Speaker, ladies, and gentlemen, when you go out of the White House, the home of the President of the United States, there facing his home directly you will find a square which is hallowed by the statues of four great foreign soldiers. On one corner there stands a monument to that distinguished French general, Lafayette, who brought the aid of the French people to the cause of the American Revolution.

On another corner there is a monument to Rochambeau who, in conjunction with Lafayette and Washington, was responsible in lowering the colors of Cornwallis, bringing victory to the cause of the Revolution. On the third corner is a monument to that militant German strategist General Baron Von Steuben, who helped to train the undisciplined army of Washington at Valley Forge. While on the fourth corner there stands a monument to two Polish patriots Kosciusko and Pulaski, who fought in the battle of Saratoga. These men were all foreigners.

In the cemeteries of our country everywhere throughout the length and breadth of our land there are humble shafts that commemorate the lives of alien immigrants who fought for our country in time of war, and who gave their last full measure of devotion on the altars of industrial service to our country in time of peace, to make our Nation the greatest and most prosperous on the face of the earth. [Applause.]

In the modest dwellings of most of our American citizens we find the beautiful sentiment "God bless our home." How can a home be blessed that is devoid of father and mother who would love to be amongst their children, to complete and perfect the unity of home life? I want to see fathers and mothers permitted to come here to this country to join the children they have loved and worked and struggled for outside of the quota law. [Applause.]

I want to see the time when this wonderful land that we love and revere will help children to preserve that divine Fifth Commandment, which says: "Honor thy father and thy mother so thy days may be long on earth."

As a patriotic citizen of our country representing those who believe in the principles of humanity I contend it is our privilege, nay, our duty, to let these devoted children bring in their loved fathers and mothers who have struggled, toiled, and drudged for them before they came to this country, before Father Time calls them to eternal rest. [Applause.] I listened to the distinguished gentleman from Texas [Mr. Box] and I heard him say that the Government of the United States is not responsible for a man coming here alone and leaving his family over there. I say to you, honored sir, with all respect I have for you, that if you believe in that sentiment and believe in it sincerely it is your duty to pass a law preventing a man who is married from coming into this country unless he brings his wife and children with him. [Applause.]

Mr. BOX. Will the gentleman yield?

Mr. SIROVICH. I yield to the gentleman from Texas.

Mr. BOX. This bill is aimed at that very purpose.

Mr. SIROVICH. If this bill is aimed at that purpose, then you and your associates on the Immigration Committee should have given consideration in the original immigration bill to all aliens who came here in the past that they might have taken due notice and governed themselves accordingly. For the bill as it is breaks up the ties of family life. It disintegrates the home. It places a premium upon desertion. It invites illicit unions and bigamy. It produces divorce without the wife's consent. It neglects the education of the children. It impairs the health of the father here and the family over there. The United States suffers economically. So in my humble opinion from every conceivable angle, from a social, physical, economical, and humanitarian standpoint it is brutal to fathers and mothers, to children and to husbands and wives who are separated from one another. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from New York has expired.

Mr. DICKSTEIN. Mr. Speaker, I yield the balance of my time to the gentleman from New York [Mr. CELLER].

The SPEAKER pro tempore. The gentleman from New York is recognized for two minutes.

Mr. CELLER. Mr. Speaker and gentlemen of the House, I was rather startled at the statement made by the distinguished gentleman from Texas, that this bill has been brought forward to stop families from dividing themselves. We have been dividing families. The families do not want to divide themselves. I say to you gentlemen, however, that this bill is a mere sop. You give something with one breath and you take it away with another breath. In fact, you give nothing. You simply, in the main, rearrange the preferences within the quota.

Why, our whole country has been developed by immigrants, male immigrants, who came here first without families. I can name you many of the most historic men who came here alone and not with their families. Gallatin did not come here with his family, nor did Hamilton, St. Gaudens, or Carl Schurz. Invariably, all virgin continents and countries are built up by immigrants who first come alone, and then after they have their stake in the country they bring their families over.

This has been the history of this country as well as all other countries like Canada and Australia where there has been great immigration, but we have divided families. Strange to relate, too, the courts of this country have helped keep families divided. We have had this very anomalous situation—which still obtains in certain benighted parts of the country. An alien tries to bring his wife over here and the district courts say, "No; we are not going to allow you to bring your wife over here because you are not a citizen," and when they ask to become citizens some of the district judges say, "No; we are not going to allow you to become a citizen because you are immoral. You did not bring, in the first place, your wife over with you." So these poor devils are confronted with a two-edged sword that gets them coming and going. They can not bring their wives here because they are not citizens, and they can not be citizens because they did not bring their wives over.

Of course, it is argued that even if this bill creates a little benefit in the way of uniting families it should be accepted. I disagree. The principle of the necessity of preserving the family status is so overpowering that unless we go the full way the bill is unacceptable. The first portion of the bill permits children of citizens between 18 and 21 to come in as nonquota. It puts them in the same category as children under 18. This should have been done in 1924. You are not giving us anything. You have simply recognized your previous mistake. Why should a child of 18 be treated differently than a child of 17?

Heretofore only the husband citizen could bring over his alien wife, but the wife citizen could not bring over the husband. I never could understand this distinction. Now, again you recognize the error and you put both husband and wife on a parity. It is well to point out, however, that great hardship was caused for your failure to right this wrong.

The preferential immigration-alien clause practically remains undisturbed except that after immigrant fathers and mothers of citizens and skilled agriculturists are duly considered and there is any portion of the quota remaining, then that portion remaining shall be given to quota immigrants who are the unmarried children under 21 years of age, the husbands, or the wives of aliens lawfully admitted to the United States for permanent residence.

Let us analyze this clause. After the fathers and mothers of citizens and skilled agriculturists are considered there will be practically nothing remaining of the quota, particularly in countries like Italy, Poland, Russia, and other lands of southern and eastern Europe. But in any event, even if portions of the quota remain, see what the situation develops. You do not increase immigration. While it is true in a very limited sense you allow preference within the quota to the fireside relatives you do so at a great cost, the cost of totally shutting out new immigration blood. You do not permit any newcomers who have no relatives here.

Thus nothing whatsoever is given in this subterfuge bill. It is purely make-believe. It reminds me of the story of the married man who said to his friend that he could not understand his wife. "Yesterday she asked me for $5 and last night she asked me again for $5, and this morning once more she asked for $5." "My," said his friend, "what does she do with all that money?" To which the married man replied, "I do not know; I have not given her any yet." And so as to this

bill, we are supposed to get much but in truth and fact we get nothing.

Mr. JENKINS. Mr. Speaker, I yield one minute to the gentleman from Texas [Mr. Box].

Mr. BOX. Mr. Speaker and gentlemen, I believe there is no Member of this House who has paid any attention to the question of Mexican immigration who does not know that I have devoted a great deal of attention to efforts to stop it. We had hearings for some weeks in which I presented every available fact in support of my bill (H. R. 6465), which proposes to rigidly restrict Mexican immigration. If anybody will read those hearings he will see whether or not the gentleman from Texas was active in urging the passage of that necessary legislation. I have not come here to discuss it, gentlemen, because that is not the question here involved. The gentleman from Texas believes that that immigration ought to be restricted, and that when the country knows the menace to which it is exposed by this mass peon Mexican immigration that will be done. [Applause.]

Mr. SIROVICH. Will the gentleman yield?

Mr. BOX. I yield.

Mr. SIROVICH. Is the gentleman in favor of allowing the father and mother of American citizens to come in outside of the quota law?

Mr. BOX. I am in favor of holding the present restriction of immigration strictly in line. [Applause.]

Mr. JENKINS. Mr. Speaker, I yield the balance of my time to the greatest immigration expert in America, Hon. ALBERT JOHNSON. [Applause.]

Mr. JOHNSON of Washington. Mr. Speaker and gentlemen, in response to this compliment, which I appreciate, I desire to thank all the members of the Committee on Immigration, no matter on which side they have been on these highly debatable questions. The public wants restriction, and more restriction; the public wants the most distressing of the relative cases relieved. This bill does the latter. Members can tell from this sharp debate here of only 20 minutes on a side that the matter of deciding the question of certain relatives to join other relatives here is not one to be decided easily. It was one that has occupied much of the time of your committee.

This committee brought out a bill last year, somewhat similar, which we could not pass through the Senate owing to a last-minute filibuster. The bill now before you is a substitute for a Senate bill, and is a little more generous than the Senate bill. Our hope is that that body will see the necessity for the relief; will see that this measure does not weaken but protects the quota law. Full consideration has been given to this bill, and I am sure that if the roll were called, this bill would pass 30 to 1 in the House.

The question of admission of certain relatives has stood in the way of important and necessary bills that must be made into workable law in a short time, and among them are the following:

Regulation and restriction on the Mexican border and for this hemisphere.

Public opinion and conditions in the Southwest are forcing this bill to the front very fast.

A rewriting of the naturalization laws, doing away with the present style of declaration of intent which is now being used and misunderstood by surreptitious newcomers who are paying lawyers and others to get it for them on the ground it will give them citizenship which they never can get.

A set of the laws defining citizenship. We are getting a lot of lip service here among so-called citizens, fascists, and others that will not do at all.

These problems have all had to stand aside while the committee has wrangled and wrangled with the question of relatives.

Now, what is the present and immediate trouble? We analyzed a couple of thousand applications in the State Department from citizens for their relatives and we analyzed a two days' supply of similar applications in the Labor Department—200 or 300—and they both came out in the same percentage with respect to applications of citizens for their relatives: About 84 per cent for their fathers and mothers, 13 per cent for their wives, and 3 per cent for their children.

Our committee assumes that the application will continue to run in about that percentage.

We assume that if this bill is passed, which we ask you to vote for to-day, it will admit 3,500 to 4,500 the first year and thereafter will fall back to normal, and with the exception of a very few of the minor countries, such as Armenia and Turkey, the wives and children will be able to catch up and join their husbands here. One year should bring the situation to normal from most quota countries.

Now, then, the second part of the bill: After the farmer preference and the preference for certain relatives of Americans in certain places, it may take all the quota for wives and children for countries with small quotas. And that is why we have this present outcry. Do you know what it is? After we take care of wives and children we find standing by the hundreds of thousands over there, in all countries, the cousins, nephews, uncles, and aunts trying to come over here as new seed. We have heeded as far as we could the appeal for relatives. We will give the places to the legitimate relatives and the new seed will have to wait, for that is the purpose of the idea of restriction of immigration. In other words, we can not restrict and at the same time let everybody in. Some day after we have caught up with the wives, we may do something for the fathers and mothers of aliens, but not yet. The quota law is not going to be broken down no matter what you may read to the contrary. [Applause.]

The SPEAKER pro tempore. The question is on the motion to suspend the rules and pass the resolution.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the joint resolution was passed.

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent that all Members may have three legislative days in which to write their own views on immigration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. MORROW. Mr. Speaker, the question of immigration from alien countries into the United States is a problem which is now confronting the Nation. In the early history of the United States we were anxious and willing to admit people from other countries to help develop and settle what is now this great Nation of ours. With the tremendous increase of population within the Nation it would appear that we will have within the United States, in just a few more generations, sufficient people to completely fill the country.

It is true that we have to-day an excess of labor in various industries; especially is this true in the most thickly populated sections of our country. The quota restriction law, concerning all countries, is correct. The principle of quota should be fair in dealing with the foreign nations in not separating families where people are desirous of changing their country, but such quota should always be proper to protect home industry and labor.

Senate Joint Resolution 5, which passed the House yesterday, has for its purpose the uniting of families for the preservation of a home. This is humanitarian in its purpose and is certainly proper legislation.

There appears to be a demand from labor that the Mexican labor brought into the United States in great quantities tends to interfere with labor conditions in the United States along certain lines. The question is also raised as to this class of labor; the Mexican laborer is much more economical in his habits and lives on much less than the American labor family has been taught to use in their living conditions. It should be the purpose of the Committee on Immigration to prevent any unjust competition with American labor, and there should be a proper quota law concerning labor brought in from Mexico. It should not be so drastic as to interfere with our neutrality laws, but should be on a proper basis to protect our American labor. American labor has been taught certain living conditions, and a sufficient wage should be paid so that such living condition can be carried out.

It is claimed, and truthfully, that Mexican labor from the Republic of Mexico is taking the place of our own citizens upon the farm, upon railroads, in repair and construction work, in general upkeep labor, and upon the highway work. Mexican living conditions are much different from American labor. Thus the price of labor in the locality where the Mexican immigrants locate in numbers is brought down to a lower scale.

There should be restriction upon Mexican immigration, and especially as it applies to the bringing in of great numbers of laborers. Unless such a quota restriction is estabiished, the time is near at hand, in my opinion, when this class of labor will be in direct competition with our own citizens; it will bring to American labor a living condition which is not tolerable. This problem must be approached from an intelligent viewpoint.

The annual quotas allotted from other countries under the immigration law of 1924 amounts to 164,667 persons. Yet the immigration into the United States per year is more than one-half million. This is explained by the Department of Labor by the fact that during the last fiscal year, 1927, 95,704 nonimmigrant—which term includes government officials, temporary visitors, aliens in transit, and so on—and 284,227 nonquota immigrants were also admitted during the year.

These nonquota immigrants included 10,084 wives and 8,421 children of United States citizens, 95,910 alien residents of the United States returning from a visit abroad, 4,514 veterans of the World War who were admitted under special legislation, 1,833 students, and a smaller number of ministers of religious denominations and professors, and so forth. The largest number of immigrants admitted under a nonquota status were natives of Canada, Newfoundland, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and independent countries of Central and South America, who are exempt from quota requirements. The number admitted under this exemption was 158,637 during the fiscal year.

The control of immigration under the quota-limit system has been a gradual development. The permanent quota act of 1924 extended the quota system to all the world except natives of Canada, Newfoundland, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and independent countries of Central and South America. The total population of this nonquota territory is 105,000,000 people.

It is apparent that if all this great nonquota territory remains in such status there will be a great wave of immigration from those countries into the United States as time goes on.

The question that is now agitating the people of the United States, and especially the labor organizations, is whether we shall have a quota restriction on Mexico as to immigration.

Heretofore there has been little immigration from Central and South America, but there has been an increase in this immigration of late. Records concerning Mexico indicate that there is a wave of immigration coming from that country. Its population is estimated at 14,000,000 people.

Immigration from Mexico, as given by the report of the Secretary of Labor for the past 7 years, is averaged as 49,630 yearly, the lowest being 19,551 and the highest 89,336 for one year. The annual average for the 6 years previous to the World War was 17,435. The Mexican immigration during the past fiscal year was 66,766 persons.

It would appear, therefore, that the time has arrived in which some plan based upon the other quotas now prevailing should be applied, at least, to Mexico.

There can not be much objection made to the enactment of the bill passed in the House yesterday, Senate Joint Resolution 5; it has for its purpose the protection of families and the building of homes by uniting all members of a family; this is proper.

Mr. BERGER. Mr. Speaker, ladies, and gentlemen, I am glad that the Committee on Immigration and Naturalization has reported favorably the pending bill, which liberalizes in several respects the present immigration law. I hope that the House will pass it.

OFFERED AMENDMENT FOUR YEARS AGO

When the present immigration law was under consideration in this House on April 11, 1924, I offered an amendment which would have admitted as nonquota immigrants minor children under 18 years of age, parents over 55 years of age, the husband or the wife of one who has declared his or her intention to become a citizen of the United States as well as of those who are citizens.

MAKE IT POSSIBLE FOR IMMIGRANT TO HAVE HIS FAMILY

The purpose of that amendment—which was indeed modest enough—I said at the time, was to protect the family. The basis of our present civilization is the family. The tribe and the nation are only enlarged families.

If you destroy the family you destroy the fabric of our civilization as we know it. If you let an alien come in to make this country his home, you ought to make it possible for him to bring in his wife and children, especially after he has declared his intention of becoming a citizen.

OTHERWISE IMMORALITY IS CREATED BY LEGISLATION

I said at the time that there can be no doubt that the wives and children of the immigrants we have permitted to come in can not be considered a disturbing element in our country.

On the contrary, if you Congressmen do not encourage immigrants to send for their families as soon as these newcomers have the necessary money, you, by your legislation, help immorality; in fact, you create it.

My amendment was defeated.

TO-DAY COMMITTEE SPEAKS OF SANCTITY OF FAMILY

To-day, just four years after, those who voted against my amendment bring in a bill which liberalizes the immigration somewhat along the lines I advocated, although not to the same extent.

And to-day the members of the Committee on Immigration speak of the sanctity of the marriage institution and of its importance to civilization.

CRUELTY FINALLY ALWAYS AROUSES OPPOSITION

During the four years that have elapsed they have made the important discovery that the American people, no matter what they may think of the respective merits or demerits of restrictive immigration legislation, will not look with favor upon a policy that separates a husband from his wife and that keeps children from their parents.

In the long run, an inhuman and cruel policy, such as the one we have pursued—and such as we are still pursuing—will arouse the opposition of all fair-minded people.

THE PRESENT BILL

The present bill amends the immigration in three particulars.

In the first place a woman who was a citizen of the United States and who married an alien prior to the Cable Act, and who thereby lost her citizenship, will be able to return to the United States as a nonquota immigrant.

In the second place a wife who is a citizen of the United States will now be able to bring in her husband as a nonquota immigrant. Under the present law the husband who was a citizen could bring in his wife as a nonquota immigrant, but a wife could not bring in her husband.

In the third place children of citizens up to 21 years of age will be able to enter as nonquota immigrants. The present law places the limit at 18 years of age.

IS STEP IN THE RIGHT DIRECTION, BUT THOSE STEPS NECESSARY

As I said before, this bill does not at all meet the problem satisfactorily. A large number of declarants who would have been able to bring over their wives and children irrespective of the quota restrictions under the amendment I offered, will still be denied that opportunity.

To that extent our immigration policy remains immoral and inhuman. No good purpose can be achieved by denying to these people that happiness that comes from a home and family.

But the present bill is a step, although a short step, in the right direction. For that reason I shall vote for it.

I do hope, however, that the next time our Committee on Immigration considers legislation it will decide on a genuine humane policy. This it can do even without departing from the restrictions upon which our recent legislation is based.

CHARLES A. LINDBERGH

Mr. TILSON. Mr. Speaker, I ask to proceed for one minute.

The SPEAKER. The gentleman from Connecticut asks unanimous consent to address the House for one minute. Is there objection? There was no objection.

Mr. TILSON. Mr. Speaker, this is an important anniversary, and I believe that no one here has referred to it to-day. Just one year ago to-day, and almost at this very hour—for it was 10.21 p. m. in Paris and 5.21 p. m. here—that Lindbergh landed at Le Bourget Field, in Paris. [Applause, Members rising.]

ANNIVERSARY OF THE CONQUEST OF THE NORTHWEST TERRITORY

Mr. LUCE. Mr. Speaker, I present a conference report on Senate Joint Resolution 23, providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by George Rogers Clark and his army, and so forth, for printing in the RECORD.

COMPENSATION OF EMPLOYEES IN THE CUSTOMS SERVICE

Mr. BACHARACH. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 13143) to adjust the compensation of certain employees in the Customs Service.

The SPEAKER pro tempore. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That the following annual rates of compensation are hereby established for the employees in the Customs Service hereinafter specified:

(a) Laborers, $1,500.

(b) Verifiers, openers, and packers, $1,680, $1,740, $1,800, $1,860, $1,920, $1,980, and $2,040.

(c) Clerks, entrance salary, $1,700; clerks having one year's satisfactory service, $1,800; clerks having two years' satisfactory service, $1,900; clerks having three years' satisfactory service, $2,000; clerks having four years' satisfactory service, $2,100; thereafter promotion of clerks to higher rates of compensation shall be in accordance with existing law.

(d) Customs guards, $1,860, $1,920, $1,980, $2,040, $2,100, $2,200, $2,300, and $2,400.

(e) Inspectors $2,100, $2,200, $2,300, $2,400, $2,500, $2,600, $2,700, $2,800, $2,900, $3,000, $3,100, $3,200, and $3,300.

(f) Station inspectors, $3,000, $3,100, $3,200, $3,300, $3,400, $3,500, and $3,600.

SEC. 2. All new appointments of employees specified in section 1 shall be made at the minimum rate of the appropriate salary range.

SEC. 3. Nothing in this act shall be construed to prevent the promotion of any employee at any time to a vacant position in a higher grade, and when so promoted such employee shall receive the compensation fixed in accordance with law for such position; and nothing herein contained shall be construed to reduce the rate of compensation of any employee in the Customs Service.

SEC. 4. There are hereby authorized to be appropriated such sums as may be necessary to pay the rates of compensation herein established.

SEC. 5. (a) Sections 1 and 2 of this act shall take effect on July 1, 1928.

(b) The remainder of this act shall take effect on the date of its enactment.

The SPEAKER pro tempore. Is a second demanded? If not, the question is on the motion of the gentleman from New Jersey to suspend the rules and pass the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

Mr. BACHARACH. Mr. Speaker, I ask unanimous consent that all Members may have leave for five legislative days to extend their remarks in the RECORD on this bill.

The SPEAKER pro tempore. Without objection, it is so ordered.

Mr. BACHARACH. This bill comes to the House for consideration after a very thorough and complete investigation made by a subcommittee of the Committee on Ways and Means, appointed by the former chairman of that committee in February, 1927, and consisting of Messrs. TIMBERLAKE, of Colorado, WATSON, of Pennsylvania, KEARNS, of Ohio, CRISP, of Georgia, MARTIN of Louisiana, DICKINSON, of Missouri, and myself as chairman.

We began public hearings immediately following the appointment of the committee. Under authority granted by the House to the subcommittee to sit during the adjournment of Congress and to continue our investigation outside of the city of Washington, we resumed hearings in October, 1927, and in November the subcommittee visited the ports of New York and Boston, spending a week's time in obtaining first-hand information of the workings of the Customs Service and hearing representatives of the various groups of employees as well as many outside the service.

It will be seen from this brief history that our committee has been engaged in this important work covering a period of about 15 months. As chairman of the subcommittee I wish to take this occasion to make public recognition of the splendid service and cooperation accorded me by the members of the committee.

As a result of our investigation we were convinced that conditions in the Customs Service were not all that they should be particularly in the matter of salaries paid in the lower groups or grades.

I think I speak for all members of the subcommittee, and for the full committee, in stating that we are of the opinion that the Customs Service, because of its paramount importance, should be treated as a distinct and separate service in the matter of classification and salaries just as the Postal Service and the Foreign Service is treated. That is chiefly what we seek to do by this legislation.

In my opinion there is no branch of the Government so important to its needs as is the Customs Service, and there is no group of employees so necessary to the proper functioning of any governmental agency than the employees of the Customs Service, for they have the administration of two extremely important matters—the collection of revenues and the proper interpretation and application of the tariff law and the duties imposed by the law, which has a direct bearing upon the welfare of the Government and the protection of American industries; an incorrect or improper interpretation of the tariff law means a loss of revenue for the Government and permits unfair competition from the cheap labor markets of Europe and the Orient with American-made goods.

The bill comes to the House with the unanimous approval of the Ways and Means Committee.

It also has the approval of all the officials of the Treasury Department who have control over the Customs Service, although the Director of the Budget states that "it is in conflict with the financial program of the President."

While it may be well contended that this bill should cover all groups and grades in the service, the committee deemed it wise to limit it to those grades which make up the lowest paid employees. We have grouped these employees into six grades and have set a range of compensation within the grades which we believe may well act as a guide to the customs officials in establishing proper rates of compensation for those in the service who are not covered by this bill.

In determining the rates of compensation carried in the bill we approximate the pay given to employees in the Postal Service under the postal pay bill which was passed in the second session of the Sixty-eighth Congress. It might be well to remark that that bill passed the House under a suspension of the rules, and when it came back from conference it passed by a vote of 367 to 9; the opposition being to the postal rate provisions of the bill rather than to the salary schedules. There is no reason why one who voted for the postal pay bill can not support this bill.

The bill provides increased salaries for 4,834, or about 60 per cent of all the employees in the Customs Service.

Of this number 785, or 16 per cent, are laborers; they are at the present time receiving $1,320 per year. We propose to give them a flat salary of $1,500 per year, the same salary as is paid laborers in the Postal Service.

It might be well to point out that the work performed by laborers in the Customs Service is not of the ordinary variety; they are what is generally termed skilled laborers; their work requires mental judgment, as well as physical skill, and promotions from this grade are made to the higher grades of the service as experience is acquired. We propose for them a rate of pay commensurate with the character of their work and which more nearly approximates the pay scale for similar work in private enterprise.

One of the largest groups affected by the bill is that of the clerks. Of the 4,834 employees covered by the bill, 1,357, or 28 per cent, are in the clerical grades, and we have provided for them a range of salaries equal to that in the Postal Service, which is the greatest competitor of the Customs Service in the employment field. For the clerical service the bill provides an entrance salary of $1,700, with automatic promotions of $100 per year up to $2,100 for four years' service, and thereafter in accordance with existing law.

For the guards, numbering 784, or 16 per cent, we provide a scale of pay which is comparable with the pay given for work of similar character outside the Government service. Guards make up a very important part of the Customs Service and the pay which they are now receiving is not commensurate with the mental training they must possess and the duties they are required to perform.

The inspectors compose the remainder of the employees covered in this bill, and we have provided for them a scale of compensation which we believe they are justly entitled to receive, considering the very important work which they perform.

The Customs Service, as we all know, is a revenue-collecting body, with revenues approximating $600,000,000 annually, and it is especially necessary, therefore, that we have in the service men and women of the highest character and exceptional ability. A careless and inefficient personnel necessarily means the loss of revefiue, while an alert and efficient service means increased revenues. In recent years there has been a considerable turnover in personnel due to the more attractive pay that is available in employment outside the Government service. This is particularly true among the experienced men and women upon whose retention depends the efficiency and welfare of the service.

In this connection I want to quote from the testimony given before our committee by Mr. Camp, the Commissioner of Customs:

> With reference to the organization and salaries, in the early days, 45 years ago, the entrance salary of the Customs Service was attractive; it was one of the most attractive services from the standpoint of pay. College graduates competed in the civil-service examinations, and as a result many very well-qualified men were induced to come into the service. At the present time if you go to New York you will find the old stalwarts, most of them now beyond the retirement age, to be of that type—college graduates—and as the assistant collector up there states, a good many of them were country school-teachers, who from their experience are very careful and conscientious and make fine administrative officers. In 1884, for example, in reviewing an old pay roll, I find that the average salary at the port of New York was $1,435. That was over 40 years ago, and this committee understands that was then an attractive salary. At the present time the average pay at the port of New York is $1,990, an increase during this period from $1,435 to $1,900. I think it would be advisable for this committee to determine whether the policy of attracting people with a good basic education into the Customs Service was a good policy or whether it was a wasteful policy. We are benefiting much from the old policy now, and I am somewhat apprehensive that 10 or 15 years from now the Customs Service will suffer from a lack of personnel material.

And again he says:

> A review has been made this last year by the Bureau of Efficiency. The work has been well performed, but I do not believe the putting

of the classification recommended by the Bureau of Efficiency into effect will entirely correct the situation. My reason for saying that is that the Bureau of Efficiency takes the position that a file clerk should be paid the salary of a file clerk and should compare with a file clerk in any other office; that a stenographer is no better than a stenographer in business; that we ought to compete in the market for stenographers. There is, however, a difference in civil service and in private employment. In civil service these file clerks, these stenographers, are the material we have for making assistant collectors, liquidators, cashiers, and various other responsible officers. The company on the outside will employ stenographers with no idea that when vacancies occur in responsible positions they will be filled by the promotion of these stenographers. They go on the outside and find suitable men for the places. It would be exceptional now for a college graduate to compete in a civil-service examination for a customs position and, at the present time there is only one channel for obtaining material. We employ at the bottom and promote on through. The entrance salary is the measuring stick of the caliber of the people that will be in the Customs Service 10, 15, and 20 years hence, and the measuring stick is very much shorter than it was 40 years ago. And, while the report of the Bureau of Efficiency is a very fair report, there is a question of policy involved that I do not think adopting the conclusions of the Bureau of Efficiency will entirely correct.

Following what the commissioner has to say with respect to the difficulty which the Customs Service is experiencing in getting suitable personnel because of competition not only from the outside but from other services of the Government, particularly the Postal Service, it may be stated that at a civil-service examination recently held in Baltimore approximately 2,100 took the examination for appointmtnt in the Postal Service, while only 250 took the first-grade examination which is required for appointment in the Customs Service. In New York 5,500 applied for the postal examination, while only 1,500 took the first-grade test, and out of that number only 270 passed.

In the Customs Service it is necessary for one to have made an average of 85 per cent in arithmetic in order to be considered for appointment; this average is not required for appointment in other branches of the Government; and in addition to passing the civil-service examination an applicent for the Customs Service is required to pass an oral examination.

Bearing upon this phase of the question I quote from the testimony of Mr. Henry C. Coles, New York City district secretary of the United States Civil Service Commission:

Mr. COLES. Gentlemen, I have been interested in personnel problems for a great many years. I have been in New York since 1909, directly identified with the customs, and also representing the United States Civil Service Commission as its district secretary. In that time we have examined for civil service several hundred thousands of people, and all of the appointments to the civil service, to the local branches of the Federal Government have gone over my desk, so I have had quite an opportunity to observe. Furthermore, back in 1915, at the suggestion of the collector, a committee on personnel was organized here, of which I was designated as chairman, and that committee still holds together, probably one of the longest unauthorized committees by law specifially to stand together. In that time I believe I have talked personally with nearly every one of the approximately 3,000 employees in the Customs Service at this port. Many of them have laid bare their heartstrings, their difficulties, and their troubles to me in a way they would not to their immediate superiors. It has been obvious as the years roll on we are not bringing into the service the type of people that came in before the war. I have been particularly concerned and interested with the Customs Service because of my special work. It must be realized that the customs deals with the most technical law on the statute books. The tariff law requires real executives and the future must be built up from those who are coming into the service now; and it presents a serious problem. That also applies to other departments.

Now, with regard to the people who are coming into the Government service through civil-service examination, as an illustration: Prior to the war teachers in public schools in New York City started at $2 per day as substitutes. Then they had a chance to get an appointment at $1,200 per annum. To-day the teacher's salary to start is $1,900. Prior to the war our civil-service lists were filled with people that were educated to a point that they could have easily qualified as teachers in public schools. Some of our deputies to-day were educated for positions of that kind, I believe. To-day if you will look over the classes in the field service you will see a very different type of people. With a little research upstairs in my room I could present many illustrations to back me up, but I do not believe it is necessary.

I will tell you an experience in my own little office: I had a vacancy for more than a month and could not fill it from the civil-service list. We had some good eligibles on there and a great many who by reason of their personality, surroundings, etc., were extremely undesirable. I was authorized to fill the job at $1,500. I offered it to eight eligibles on the list. All but two declined, although that was about the highest they could hope to get. Two of them told me they would accept. Two days later each called me up and told me that when they went back to their employer to give him notice they promoted them largely in excess of what they were getting. They thanked me for offering the position to them, because it helped them. Finally, I had to go through the Washington register and get somebody from Norfolk. Those that would accept were obviously unfit to meet the public and deal with people in the way it was necessary in my office.

The hearings before our committee are replete with statements made by employees of the Customs Service bearing upon living conditions in the various cities and reciting the hardships which they are forced to undergo in order to maintain their families on their present salaries. Without taking up too much time, I wish to quote from the testimony of one or two of these witnesses:

STATEMENT OF ROY DONNECKER, CLERK, CUSTOMS SERVICE, PORT OF NEW YORK

Mr. KEARNS. How long have you been in the service?
Mr. DONNECKER. Four years.
Mr. KEARNS. You started with $1,500?
Mr. DONNECKER. Yes, sir.
Mr. KEARNS. And you are now making what?
Mr. DONNECKER. $1,600.
Mr. KEARNS. Are you married or single?
Mr. DONNECKER. Single.
Mr. KEARNS. Where do you live?
Mr. DONNECKER. I live in Mount Vernon, N. Y.
Mr. KEARNS. You live outside the corporate limits of New York?
Mr. DONNECKER. Yes; 14 miles out.
Mr. KEARNS Do you live at home?
Mr. DONNECKER. I board.
Mr. KEARNS. What do you have to pay for your room and board per week?
Mr. DONNECKER. I pay for my room separately. I have my breakfast separately, and I dine out separately. It costs me about $70 a month.
Mr. KEARNS. What kind of a room have you?
Mr. DONNECKER. A medium-sized room, perhaps 12 by 12.
Mr. KEARNS. How does it compare with the room in the average workingman's home?
Mr. DONNECKER. It is just an average room. It is neat and clean and comfortably furnished; nothing fancy. It is on the third floor.
Mr. KEARNS. Do you know what the other employees, single men, who rent rooms and board have to pay for their room and board?
Mr. DONNECKER. I think mine is about the average.
Mr. KEARNS. Of course, you have to buy your clothes and pay laundry bills?
Mr. DONNECKER. Clothes, laundry, and commutation is extra.
Mr. WATSON. How much does it cost you in way of fare to the custom-house?
Mr. DONNECKER. $10.60 a month on the railroad and 10 cents a day from the Grand Central Depot.
Mr. WATSON. Could you live in New York on $80 a month with the same conveniences you have now where you live?
Mr. DONNECKER. I do not think I could get a room like I have in New York. I think I would have to pay more.
Mr. KEARNS. You have to pay 10 cents a day car fare?
Mr. DONNECKER. Yes; from the Grand Central.
Mr. WATSON. That is more than $10 a month, then?
Mr. DONNECKER. Yes; for my railroad commutation ticket only.
Mr. WATSON. Then that makes it about $13 a month?
Mr. DONNECKER. Yes.
Mr. WATSON. You can not rent a room here for $83 a month with the same conveniences as where you live?
Mr. DONNECKER. I do not think so.
Mr. DICKINSON. You are paying $70 a month for room and board?
Mr. DONNECKER. That is very conservative, because I have only allowed $1.25 for my dinners and lunches, which is a small amount.
Mr. BACHARACH. You are living in Mount Vernon because you can get a better room there than you could get in New York?
Mr. DONNECKER. That is right; and I have other personal reasons.

STATEMENT OF JOSE A. GONZALEZ, CLERK, CUSTOMS SERVICE, PORT OF NEW YORK

Mr. KEARNS. Where do you live?
Mr. GONZALEZ. West One hundred and thirty-ninth Street, New York City.
Mr. KEARNS. Are you married or single?
Mr. GONZALEZ. Single. I can not get married.
Mr. KEARNS. Do you live at home or board?
Mr. GONZALEZ. Board.
Mr. KEARNS. What do you pay a month for room and board?
Mr. GONZALEZ. I pay by the week. I just rent a room and eat outside.
Mr. KEARNS. How much a week?

Mr. GONZALEZ. $7 for the room alone, and I give 50 cents a week tip to the woman who fixes the room up.

Mr. KEARNS. What does your board cost you?

Mr. GONZALEZ. I figured about $1.75 or $2 a day for breakfast, lunch, and dinner.

Mr. KEARNS. Is that the cheapest room and board you can get?

Mr. GONZALEZ. I am living very limited there. I would like to have a better room than I have.

Mr. WATSON. Is your room a front or back one?

Mr. GONZALEZ. Back room.

Mr. WATSON. Have you any bathing accommodations there?

Mr. GONZALEZ. There is one bath for all the tenants. We have to take turns.

Mr. WATSON. How many are there in the house?

Mr. GONZALEZ. Four more.

Mr. WATSON. And only one bath?

Mr. GONZALEZ. One bath; so we have to arrange it among ourselves.

Mr. WATSON. It costs you 10 cents a day for car fare?

Mr. GONZALEZ. Yes; and then there is laundry, shaving, newspaper, etc.

Mr. KEARNS. It costs you, then, around $100 a month?

Mr. GONZALEZ. I would be glad if I could make it $100.

Mr. KEARNS. You are paying more than $100?

Mr. GONZALEZ. Yes.

Mr. WATSON. Do you attempt to save anything out of your salary?

Mr. GONZALEZ. I can not save much. There is no use. If I put it in the bank, I would have to take it back again.

STATEMENT OF PATRICK GALVIN, CLERK, CUSTOMS SERVICE, PORT OF NEW YORK

Mr. KEARNS. Are you married?

Mr. GALVIN. Yes, sir; with a baby.

Mr. KEARNS. What is your salary?

Mr. GALVIN. $1,500 a year.

Mr. KEARNS. Do you live in an apartment?

Mr. GALVIN. In a two-family house.

Mr. KEARNS. How much rent do you pay?

Mr. GALVIN. $30 a month.

Mr. KEARNS. Where is it located?

Mr. GALVIN. Ridgewood, Queens County.

Mr. KEARNS. What does it cost besides the $30 a month rent to live?

Mr. GALVIN. Well, it costs $15 a week for food, and that is very economical; then there is $2 to $3 a month for gas and $1 for electric. Then there is coal to buy. About 2 tons keep the stove; that is about $30 for coal. At the end of the month I am just about $3 to $5 behind what I make. I make $120 a month and my living expenses average about $125 a month. That is for three people—my wife, the baby, and myself.

Mr. KEARNS. If you have no other income, how do you get along?

Mr. GALVIN. Sometimes I go out and hack for a while; sometimes I run a taxicab on Sunday. I may make between $5 and $10 on a Sunday. With that added money it just about pulls me through. I can not save anything. I can not live; I just exist. I dress, eat, and come to work and go home again.

Mr. KEARNS. This $30 a month rent you pay, is that the average rent paid by other men of like income?

Mr. GALVIN. No, sir.

Mr. KEARNS. Below or above?

Mr. GALVIN. Below it.

Mr. CRISP. We are not inquisitive and have no desire, of course, to delve into your private affairs; but we desire simply to get this evidence so as to have it in Washington, hoping that it will result in benefit to you. If we went back and recommended an increase and there was no special reason for our recommendation, it would be more difficult to get legislation.

Mr. BACHARACH. And, furthermore, we figure it is going to be beneficial to the committee as a whole and to the Members of the House.

Mr. KEARNS. I would say that I have no thought of asking these questions except that we want to have something to start our demand for an increase for you, if we are going to ask for an increase.

The committee was very much impressed with the morale of the Customs Service; while there was general complaint of the inadequacy of the pay of the service, there is throughout the service a fine esprit de corps which continues to uphold the fine traditions of the service. This is especially remarkable when we consider the temptations which daily confront the employees of the service, particularly those whose duties bring them in touch with the traveling public. It was very gratifying to the committee to learn that the number of employees who fall for these temptations is relatively small, while on the contrary we had brought to our attention numerous cases where professional smugglers and other misguided travelers who try to bring in dutiable merchandise without properly declaring it are daily detected by the guards and inspectors, resulting in the recovery of many thousands of dollars annually in duties, fines, and penalties.

Here is the record of one inspector who has been in the service for 19 years, and who is now getting $2,400 per year, as he gave it to the committee:

STATEMENT OF CHARLES E. M'KENNA, INSPECTOR OF CUSTOMS, PORT OF NEW YORK

Mr. MCKENNA. I have been an inspector of customs for 19 years. For the past two years my salary has been $2,400 a year. The maximum I could get now is $2,700. I believe the entrance salary should be high enough to attract better people into the service than the below-par men that have come into it lately. The men who came into it under the old régime were of a higher grade than we have been getting since the war.

Here is my record for the month of October: On one declaration the duties and penalties amounted to $2,797.04, not a dollar of which would have been collected unless I had put in two or three hours on baggage. On the next declaration duties and penalties amounted to about $2,580.70. The same conditions apply. On the third declaration duties and penalties amounted to $2,403. That is from the 3d to the 17th of October of this year. Since the first of the year I have examined probably 6,000 pieces of baggage.

Here is an abstract of the statement of W. W. Trumble, acting deputy surveyor in charge of customs guards, port of New York:

* * * They are subject to all kinds of temptations, and the wonder of it is that they stand up to the work as they do.

A gentleman here this morning, the president of the American Jewelers Association, presented himself here this morning and stated the case of a customs guard making four seizures. These seizures were made without a scrap of information. One was made from the purser of the S. S. *Leviathan*. He was carrying diamonds in his brief case, and the others were made from members of the crew.

This afternoon I sent up to the United States attorney's office a dozen men, half of them prisoners and half of them guards. We made a seizure of commercial diamonds, and it is the consensus of opinion of everybody that it will amount to about a million dollars.

That is what we are up against. That is what we are trying to school our men to combat, and how can we do it in the face of this proposition of underpay that they receive? I do not want to speak of the temptations they are up against, or anything like that. We all have temptations, and some of us fall; but I want to say that the most of the men are all right; they are good sturdy Americans. They mean to do right, and they will do right if they get where they should get, and that is on a proper salary basis.

The high efficiency desirable and necessary for the proper functioning of the Customs Service can only be maintained by the retention of experienced employees in the service. To accomplish this there must be offered to the employees some guaranty that faithful and efficient service will be rewarded by promotions in grades and compensation.

It is our opinion that the enactment of this legislation will materially encourage and improve the morale of the present personnel and in addition it will serve to attract to the service in the future the high type of men and women who have been identified with it in the past.

What we propose to do for the employees covered in this bill is only an act of fairness and justice. We have spent nearly a year and a half investigating this matter and no further investigation is necessary.

As a reward for faithful service rendered this bill should become a law.

Mr. O'CONNOR of Louisiana. Mr. Speaker and Members of the House, when I came to Congress nigh on to 10 years ago I met John Nolan, of California. A quick but lasting friendship sprang up between him and me. He was then championing what was known as the minimum wage bill. I joined my humble efforts to his heroic struggles for the underpaid Government clerks. The first speech that I made in this House was upon that now famous bill. I say famous bill because it really was the torch that lighted the way to those other brave souls who followed in his wake and made for the uplift of the many splendid men and women who devote the best of their lives to the service of the Government which they are proud to claim as their own. Poor John Nolan has gone west forever. He is out beyond the Pleiades and far beyond the sun at the great white throne of God. He was a hero in every strife and his spirit goes marching on. I loved him well, for he was a friend to mankind. He generously allowed me as his friend a good part of the time which was at his command to discuss the historic Nolan minimum wage bill. Nothing gives me greater pleasure than to vote to increase the pay of our public servants, because I know that a good governmental wage is not only an inspiration but a persuasive suggestion and gesture

to private interests to do commensurately as well by their employees. I know that I am promoting the public welfare by making happy and content a large number of men and women and their families through a decent wage. I know that this wage adds to the purchasing power of the community, and that the shop people and the wholesale people prosper as a result of good salaries when paid to the working people of our country. The passage of this bill will be good tidings of a great joy to a splendid crowd of workers, among whom I have a large number of friends.

The bill has the approval of the officials of the Treasury Department in charge of customs. Following is a letter, signed by the Undersecretary of the Treasury as Acting Secretary, which gives in tabulated form the changes in salaries carried in the bill as compared with present salaries:

APRIL 4, 1928.

Hon. W. R. GREEN,
Chairman Committee on Ways and Means,
House of Representatives.

MY DEAR MR. CHAIRMAN: Receipt is acknowledged of your letter dated February 16, 1928, inclosing a copy of H. R. 10644, which is a bill to adjust the compensation of certain employees of the Customs Service. You state that the committee would appreciate any comments or recommendations that I care to make in respect to this bill.

There are approximately 8,000 employees in the Customs Service, and this bill provides for the adjustment of the compensation of 4,834 employees. The balance of the employees in the Customs Service not covered by this bill are, as a rule, the higher paid and more technical positions in the service.

There is quoted below a statement covering the positions provided for in this bill. This statement under proper captions shows the number of positions, the present average salary, the proposed average salary according to the terms of the bill, and the total salary increase necessary to bring the employees to the average of the grade, as provided in section 2 (b):

Title	Number of positions	Present average salary	Proposed average salary	Total salary increase
Laborers	785	$1,319.00	$1,500.00	$142,085.00
Verifiers, openers, and packers	483	1,584.00	1,860.00	133,308.00
Customs guards	784	1,693.00	2,111.42	328,041.00
Station inspectors	60	2,700.00	3,300.00	36,000.00
Inspectors	1,365	2,118.00	2,700.00	794,430.00
Clerks:				
Less than 1 year	95	1,500.00	1,700.00	19,000.00
1 year	195	1,529.00	1,800.00	52,845.00
2 years	358	1,732.00	1,900.00	60,144.00
3 years	329	1,926.00	2,000.00	24,346.00
4 years	380	1,980.00	2,100.00	45,600.00
Total	4,834			1,635,799.00

The present entrance salary for first-grade clerks in the Customs Service is $1,500 per annum, with no definite assurance of an increase in compensation. The bill provides for an entrance salary of $1,700 per annum, with automatic promotions of $100 per annum for four years up to $2,100.

The above is furnished for the information of the committee.

The Director of the Bureau of the Budget advises that the proposed legislation is in conflict with the financial program of the President.

Very truly yours,

OGDEN L. MILLS,
Acting Secretary of the Treasury.

It will be noted from this tabulation that the bill provides increases for 4,834 of the approximately 8,000 employees in the Customs Service. The balance of the force is made up of those in the administrative and technical groups; while a considerable proportion of the latter groups, if not all, are no doubt entitled to salary increases, as stated above, the committee deemed it wise not to include the higher salaried groups in this bill.

The estimated total increase is $1,635,799. This represents an average increase of $338 per person over present salaries, or slightly less than 19 per cent.

During the course of its investigation the committee was very much impressed with the morale and fine esprit de corps of the Customs Service employees, although there was a general complaint of the inadequacy of the pay of the service. With the numerous and great temptations surrounding many of the employees and the opportunities which are offered daily for enriching their pockets for favors granted in disregard of their sworn duties, it is gratifying to note that but few, by dereliction to duty, have disgraced the high traditions of the customs service. But the committee was very strongly impressed with the high turnover in personnel, due to the fact that many experienced employees are leaving the service to enter private business, where salaries are more attractive and the opportunity for advancement more certain.

In the consideration of this legislation it is important to keep before us the fact that the Customs Service is a revenue-collecting body through which sums to the extent of $600,000,000 and over are collected annually. It is therefore especially necessary that the service shall be composed of men and women of high character and exceptional ability.

A careless and inefficient personnel necessarily means the loss of revenue, while an alert and efficient service means an increase in revenue. It is a service whose highest efficacy can be maintained only through the retention of experienced employees in the service. To accomplish this there must be offered to the employees some guaranty that faithful and efficient service will be rewarded by promotion in rank and compensation. A promise to do this is not sufficient; it should be promulgated by substantive law.

It is the opinion of the committee that the enactment of this legislation will materially encourage and improve the morale of the present personnel by holding out to all a definite prospect of advancement, both in grade and pay, and thus continue to attract to the service the high type of men and women who have been identified with it in the past and which is so necessary for its efficient and proper functioning in the future.

Now, let us pass the Welch bill, which I hope will carry a provision which will insure a substantial increase to every worker, but particularly to those humble mortals that are at the bottom of the list, near the "submerged tenth," "whose youth bore not flowers in its branches, whose hopes burned in ashes away."

Mr. CELLER. Mr. Speaker, your deliberations must lead you to the conclusion that the salaries of the men in the Customs Service are shockingly low. Forty years ago the average salary in the service was $1,435, while at the present time it is $1,990. During the same period the scale of living has advanced so rapidly and to such a height that all luxuries and many necessities are now far beyond the reach of the customs personnel. Customs receipts were over $579,000,000 in the fiscal year of 1926. Customs salaries were less than 3 per cent of that amount. Try to find any private industry where labor cost can be cut as low as that. That is not economy. It is parsimony.

At the port of New York it costs only two-tenths of 1 per cent to collect the customs, which in the fiscal year 1926 amounted to over $323,000,000. The reason is plain. We work our inspectors, appraisers, and guards like slaves and give them starvation wages.

I have often been down to the piers and watched these men examine passenger baggage. They work with unmatched energy, tact, and thoroughness. This summer I disembarked as a traveler from Europe on the steamship *Leviathan* at Pier 86, North River, N. Y. Two thousand seven hundred tourists rushed down the gangway to meet some 7,000 members of their families. Six thousand trunks and miscellaneous baggage were soon spread all over the pier. There was confusion, crowding, noise. Yet, despite this chaos the inspectors and appraisers quietly and patiently went about their duties and in a few hours the pier was cleared of travelers, their relations, and their baggage. They had worked with remarkable efficiency and celerity. That was a typical day. It was no novelty for these men.

Most of them have grown gray in the service. They know how to work with dispatch and cool-headedly.

The port of New York is a busy port, and during the tourist season it is a common occurrence to have seven and eight big ocean liners arriving each morning, loaded with tourists and baggage. One day, recently, 9,000 ocean travelers landed there. As soon as the inspectors and appraisers finish one ship, they tackle another. Only men of experience and intelligence can do this work with any degree of proficiency and with profit to the Government.

The tourist leaves the dock and has forgotten about the inspector and appraiser, but the work of the inspector and appraiser continues long after that tourist has left the dock. They have their declarations, manifests, entries, liquidations, and what not to consider. Their work is not by the clock. That work invades their evenings, their Sundays, and their holidays.

I have accompanied them down New York Bay from the Battery in the early winter mornings to meet the ships anchored at quarantine. I have climbed with them the shaky narrow ladder leading from the revenue cutter to the deck of the ship, high above. One mistep on that ladder means a plunge into the icy waters of the bay. Many of those men have gone up that ladder for over 30 years. Then, too, the revenue cutters used for the trip are mere rotten hulks over a quarter of a

century old. They offer no protection to the winter blasts and storms. But our men go about their tasks uncomplaining.

They have thus struggled and striven and will continue so to do in the interests of the Government, but they deserve better consideration at our hands.

Probably there is no branch of Government service, outside of the Prohibition Department, where opportunities for venal conduct are greater. Yet among customs men there is little or no graft. Particularly among the inspectors and appraisers there has always existed a pride of office. They are rightfully jealous of their reputation for professional honesty. I personally know many of the New York men. They are highly intelligent and have a thorough knowledge of customs affairs—an intelligence and knowledge worthy, indeed, of a far better compensation than now received.

If the fine traditions of the service are to be maintained, the salaries must be increased. The older men can not leave the service. But how are their ranks to be recruited when death removes them? Young men of tact and intelligence are not attracted. They go elsewhere. The future of the service is really in jeopardy. If we do not take heed, we may be converting the customs into another Prohibition Department, where the men, deprived of a living wage, will with "itching palms" stoop to chicanery and bribery—vices which do not now taint the customs branch, and never will as long as the present personnel remains. But they will not endure forever.

We heard the plea of the postmen and raised their salaries. We should do no less for the men in the customs branch. A laborer in the post office gets $1,500, while the same man doing the same work at the customhouse gets $1,320. Such disparity is breeding discontent. If the wrong is not righted, that discontent will become in time sullen resentment.

The collectors at the larger ports recommended, as far as inspectors were concerned, salaries ranging from $2,400 to a maximum for supervising inspectors, of $4,000. The collectors know the requirements and can gauge the proper salaries. Their advice should be followed. Such a range would permit a proper self-respecting entrance salary and allow for meritorious service leading to promotions.

Similar and proportional increases should be made in the appraisers' division and other branches of the service.

In any event it is well to keep in mind that the Bureau of the Budget is sympathetic to an increase. General Lord, in 1926, was willing to allow $800,000 for additional salary. That would be an average of $100 a man, there being 8,000 men in the service. But that, of course, is inadequate. Especially so when we recall that the postal employees averaged a $300 raise.

Mr. O'CONNELL. Mr. Speaker, I am very much delighted to find that after an exhaustive investigation by a subcommittee, the great Ways and Means Committee of the House brings before us at this time for final passage the Bacharach bill, intended to adjust compensation of the employees of the Customs Service of the United States.

Among the many bills that have received the attention of the Congress at this session this measure occupies a distinguished place.

The author deserves the thanks of his colleagues and the country for recognizing the splendid service this great and loyal army are rendering to the people. It is not to be wondered at that the committee makes a unanimous favorable report and thus gives us the long-sought-for opportunity to send it along to passage and to law. No one on the floor of the House has any doubt of the result. The officials of the Treasury, the Director of the Budget, the financial officers of the Government are enthusiastic supporters of this legislation.

The committee very wisely decided that for the present the bill should affect those grades which make up the lowest-paid employees. It grouped these employees into six grades and set the standard of compensation within the grades which it believed might well be a guide to the customs officials in arranging proper rates of compensation for those in the service for which this legislation does not provide.

The bill provides increased salaries for 4,834 or about 60 per cent of the entire personnel in the Customs Service. The figures in Mr. BACHARACH'S very comprehensive report show that of this number 785 or 16 per cent are laborers, who, at the present time, are receiving $1,320 per year. This bill brings up their annual salary to $1,500, putting them on the same level or basis as the laborers in the Postal Service.

The distinguished author of the bill [Mr. BACHARACH] very wisely said:

> It might be well to point out that the work performed by laborers in the Customs Service is not of the ordinary variety; they are what is generally termed skilled laborers; their work requires mental judgment, as well as physical skill, and promotions from this grade are made to the higher grades of the service as experience is acquired. We propose for them a rate of pay commensurate with the character of their work and which more nearly approximates the pay scale for similar work in private enterprises.

Then the bill gives consideration to the clerks. Of the 4,834 already referred to, 1,357 or 28 per cent are in the clerical division, and these also are brought up to the equality in compensation to that paid in the Postal Service. For this branch the new scale offers an entrance salary of $1,700 with automatic promotion increases of $100 per year up to $2,100 for four years' satisfactory service and thereafter they will operate under existing law.

The guards number 784, or 16 per cent; a scale of pay is arranged along the lines that prevail in other equal positions in the Government. It is gratifying to observe that the bill recognizes in a fairly substantial manner the efficient and important work that is being performed day and night by that courteous and competent group, the customhouse inspectors.

All of these affected classes bring into the Public Treasury annually about $600,000,000, showing how well these men and women carry on their always important duties.

For information I append at this point the bill as we are about to pass it, and I am glad to be permitted, as a Member of the Congress, to give it my full and enthusiastic support.

> *Be it enacted, etc.*, That the following annual rates of compensation are hereby established for the employees in the Customs Service hereinafter specified:
>
> (a) Laborers, $1,500.
>
> (b) Verifiers, openers, and packers, $1,680, $1,740, $1,800, $1,860, $1,920, $1,980, and $2,040.
>
> (c) Clerks, entrance salary, $1,700; clerks having one year's satisfactory service, $1,800; clerks having two years' satisfactory service, $1,900; clerks having three years' satisfactory service, $2,000; clerks having four years' satisfactory service, $2,100; thereafter promotion of clerks to higher rates of compensation shall be in accordance with existing law.
>
> (d) Customs guards, $1,860, $1,920, $1,980, $2,040, $2,100, $2,200, $2,300, and $2,400.
>
> (e) Inspectors, $2,100, $2,200, $2,300, $2,400, $2,500, $2,600, $2,700, $2,800, $2,900, $3,000 $3,100, $3,200, and $3,300.
>
> (f) Station inspectors, $3,000, $3,100, $3,200, $3,300, $3,400, $3,500, and $3,600.
>
> SEC. 2. All new appointments of employees specified in section 1 shall be made at the minimum rate of the appropriate salary range.
>
> SEC. 3. Nothing in this act shall be construed to prevent the promotion of any employee at any time to a vacant position in a higher grade, and when so promoted such employee shall receive the compensation fixed in accordance with law for such position; and nothing herein contained shall be construed to reduce the rate of compensation of any employee in the Customs Service.
>
> SEC. 4. There are hereby authorized to be appropriated such sums as may be necessary to pay the rates of compensation herein established.
>
> SEC. 5. (a) Sections 1 and 2 of this act shall take effect on July 1, 1928.
>
> (b) The remainder of this act shall take effect on the date of its enactment.

Mr. Speaker, I congratulate the author and the committee on the presentation of this bill, which is a long step forward in the right direction. It is fair, it is just, and shows the appreciation of the Government for services well and loyally performed. I shall always look back with satisfaction to a knowledge of the fact that my vote helped to enact the bill into law.

Mr. WINTER. Mr. Speaker, I am glad to embrace the opportunity afforded by the present consideration of H. R. 13143, a bill reported by the Committee on Ways and Means, by Mr. BACHARACH, for the purpose of adjusting the compensation of certain employees in the customs service, to say something in behalf of these employees and their work and the justice of providing for them a greater and more befitting compensation. Further, I desire in this connection to express some sentiments which I have long held regarding labor and the wage earner.

A thorough investigation and extensive hearings were held on this bill, and weeks of time were devoted to getting first-hand information as to the character of work performed by the various groups in the Customs Service. It was found and recommended—and I join in that recommendation—that there must be offered to the employees some guaranty that faithful and efficient service will be rewarded by promotion in rank and compensation. The increase of salary represented by this bill is an average increase of $330 per person per annum over present salaries. While this is liberal it is not overgenerous or extravagant. It is well merited, proper, and just.

"The laborer is worthy of his hire." We in America maintain the highest standard of living for our working people of any

nation in the world. It is double and thribble, and even greater than that as compared to other countries.

It is obvious to me that the same rule and standard should obtain with reference to Government employees as for labor in general. Many of the things formerly regarded as luxuries are now common and necessary things of all the people. Wages and salaries should be so adjusted that these things may be commanded and enjoyed by every wage earner in a fair proportion to the rest of the units of society.

I have supported these ideas by my voice and vote on a number of measures during this session. One of these was the bill imposing stricter standards regarding the employment of child labor in the District of Columbia. The bill has passed both Houses and is now in conference. I sincerely hope it will find a final vote. It makes the new minimum age for minor employment 14, except boys who deliver papers after school; requires more rigid physical examination; reduces the number of hours all may work; eliminates most all night labor; and sets up machinery for enforcement and establishes a system of penalties for violation.

I have worked and voted for the Lehlbach retirement bill, which will raise the annuities of Government workers after retirement from $1,000 to $1,200. I also am in favor of the increase of salaries of those engaged in the postal service, particularly the higher rate of wages for night work; also the bill providing for fourth-class postmasters, rent, fuel, and light. I am favoring H. R. 11141, a bill to require contractors and subcontractors engaged on public works of the United States to give certain preferences in the employment of labor to the end that the Federal Government should not be a party to upsetting labor conditions throughout the country when engaged in Federal construction work. This bill, H. R. 11141, was drawn by the Council of the Labor Department.

In his last message, President Coolidge stated his position when he said, "The Federal Government should continue to set the example as a good employer." The present law provides that an 8-hour day shall prevail on Federal construction work. This proposed legislation would supplement the present law. Further, it would prevent contractors from bringing in cheap outside labor supply disturbing local labor conditions. It will prevent discrimination against local contractors by the ability of outside contractors to bring in cheap, itinerant labor.

In this connection, I desire particularly to call attention to H. R. 11886 and H. R. 12263, bills to create in the Bureau of Labor Statistics of the Department of Labor a division of safety. We can not take too many precautions against sickness and accident in our factories and in our mines. The terrible disasters in our coal mines throughout the country have wrung the hearts of all of the people of the Nation. As a member of the Committee on Mines and Mining, I have been glad to take advantage of my opportunity to speak and vote for measures of greater safety in our mining operations with particular reference to our coal mines, which naturally are more dangerous than any other. Secretary Davis of the Department of Labor, is very much interested in these bills. They do not infringe upon the work of the States. There is no compulsion as to the States and they are just as free to proceed as they are now. They provide cooperation with the various States governments and various bureaus and industrial commissions. We have a Mine Safety Bureau, having jurisdiction over mines and mining and accidents incident to mining. We had before the Committee on Mines and Mining experts on mine safety from all over the United States and the Bureau of Mines. We intend, as far as possible, to inaugurate a campaign of education and have Government agencies place their safety-mine bureaus or subbureaus in different locations throughout the country.

Among the important measures of this session was the Hawes-Cooper bill (S. 1940 and H. R. 7729) presented by the Senate Interstate Commerce Committee and the House Committee on Labor. A conference committee comprised of representatives of the American Federation of Labor, the Joint Federation of Women's Clubs, and manufacturers strongly indorse the favorable reports of the committee on the bill, commonly called the convict labor bill. Hearings were held on every possible phase of the Hawes-Cooper bill. Members of the Senate and House committees were practically unanimous in their approval of the bill. The prison contractors were conspicuously absent from the proceedings. There can be no doubt that grave abuses have been associated with the prison-contract system. Employers of nonunion as well as the union labor were strongly on record in opposing prison idleness in every form or degree and have offered full cooperation in the practical development of prison industries. The bill takes away the interstate character of prison-made goods and subjects such goods when shipped into the State, upon arrival and delivery, to the laws of such State concerning prison-made goods.

I gave my support to the Smoot-Welch bill, which gave increased pay to 145,000 Government employees.

These are only a few of the measures I have been interested in. Time does not permit the enumeration of all of them.

One who has done physical labor can never forget that experience, and he never can ignore the claim of labor. Because I have worked on the farm and the ranch, helped build and lived in sod houses, labored in sawmills and wheel-scraper factories, swung a "double jack" in the mines, and stood in line to go past the paymaster's window to get my weekly pay envelope, I shall always sympathize with those who toil and favor every reasonable and proper demand they may present. I rejoice when legislation proposed is such that I can give it my support.

I congratulate labor that there is such an auspicious and significant day as Labor Day. The fact that there is such a day set apart by the State and recognized by the Nation and all its people is of itself a great tribute to the part which free labor has performed in the advancement and achievements of the Republic. I congratulate labor on its universal high standard of education and intelligence, its steady employment at good wages, its prosperity, all unequaled in all the world.

In a sense we are all employers and employees. No one's status in this country is fixed forever. The employee becomes the employer. We are all consumers. Labor in early times was applied to those who were employed in toilsome outdoor work, but later came to include domestic workers, then to include the application of skill, and all those who engaged in indoor industrial occupations. Technically, to-day the term "labor" is not applied to those possessing scientific or professional skill. As a matter of fact, we are all engaged in some form of labor, physical or mental or both. The term has ever become broader and more inclusive.

There has likewise been a steady advancement and improvement in the general rights of labor as is shown by the history of labor legislation. In early England the worker, under the law, was a bondman. Even after the form of bondage known as villenage was abolished, laws made labor compulsory, confined workers to an existing place of residence, and fixed a maximum wage. As men's minds and hearts were enlightened and broadended these tyrannous laws became obsolete and were finally repealed. Involuntary servitude is no more.

Subject to the restriction by the State in the interests of all the people, the right to dispose of one's labor is a right entitled to legal protection. This right is not superior, of course, to the same rights in others. The American courts have recognized the fact that the earlier English legislation and decisions were made solely in the interests of the employer; and accordingly, they have not only held efforts of labor organizations to improve their conditions lawful, but meritorious and praiseworthy.

By Federal legislation in 1914 labor of a human being is held not a commodity and labor organizations not in restraint of trade and not subject to the antitrust law. That is because the function of a labor union is for the rightful object of inducing employers to establish usages in respect to wages and working conditions which are fair and reasonable, and to regulate conditions between employers and employees.

The right to combine for concerted action is fully recognized, with a necessary limitation of due regard for the rights of others. The right to strike and the right of collective bargaining by an agent or representative is generally upheld. We will all agree with the law which forbids force or violence, intimidation and coercion, destruction of property or life in the assertion or prosecution of any right. There is, of course, the exception of self defense, a right which no law denies to any human being and which every law upholds.

Injunctions should be issued only to prevent the doing of specified unlawful acts. Congress has enacted a law in response to public sentiment prohibiting the Federal courts from granting injunctions unless necessary to prevent irreparable injury to property or property rights or where there is no adequate legal remedy. The same law provides that no restraining order shall prohibit the doing of certain things specified in the statute and that those specified acts shall not be considered violations of any law of the United States.

Much of our legislation, both Federal and State, is designed to promote the safety and protect the health of the workman. Modern industry and its conditions have compelled the enactment of these laws. Many employers provided these bettered conditions before the laws were passed. Some employers to-day provide more than the laws require. Some employers have to be compelled by law. We find on the statute books to-day

safety appliance acts, eight-hour laws, employers' liability acts, workmen's compensation laws, mechanics' lien provisions, statutes of preferences in claims, exemptions, child labor laws in the States, and laws regulating the conditions of the employment of women; special laws covering work in mines and smelters, manufacturing establishments, railroads and public works.

I cite these matters to show the gradual but sure betterment and security of labor, the certain establishment in the law of the land of the rights of those who toil.

We have kept pace with the dictates of humanitarianism. The sympathy and support of the American people have always been and always will be with labor in its just and reasonable demands. But gradually a better day has come about, always tending to bring capital and labor together in harmony rather than in conflict. Share holding in the business and the ownership of banks by labor help wonderfully to understanding. It is gratifying to all that some of the foremost representatives of both labor and capital are stressing more and more not only the desirability but the necessity of the application of the golden rule in the solution of their problems.

Labor forms a great proportion of the grand total of our common citizenry. Labor shares with all of us the common pride and the common responsibility of American citizenship in our country and its future. All the people are the State. Government with us begets citizens, not subjects. Citizens with us beget government, not monarchs. A great man once wrote that the worth of a nation is the worth of the individuals composing it. The individual, the common man, creates and constitutes government, and in the individual lies the greatness, the safety, and the perpetuity of the State.

Judges, legislators, orators, and leaders may give expression and direction to the laws and policies of the Nation, but, after all, they emanate from the people. As in military life the issue depends finally upon the common soldier, so in civil life it depends upon the common citizen. He is the power that drives the wheels of traffic, that draws from the earth its wealth of product, that constitutes the busy marts of trade. He comprises within himself the enterprise, the courage and the intelligence of the city; he gives the Commonwealth its standard of morality; he forms our national character. He makes our Nation great. We rejoice in the steady progress of labor which constitutes so solid and vital a part of the citizenship, which comprises the United States of America.

PERMANENT CONSTRUCTION AT MILITARY POSTS

Mr. SINNOTT. Mr. Speaker, I ask unanimous consent to take from the Speaker's table Senate Concurrent Resolution 20 and consider the same.

The Clerk read the resolution, as follows:

Resolved by the Senate (the House concurring), That the President of the United States be, and he is hereby, requested to return to the Senate the bill (S. 3752) to amend section 3 of an act entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes," approved March 12, 1926.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The resolution was agreed to.

CONSTRUCTION OF RURAL POST ROADS

Mr. DOWELL. Mr. Speaker, I move to suspend the rules and pass the bill (S. 2327) to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916.

The Clerk read the bill, as follows:

Be it enacted, etc., That for the purposes of carrying out the provisions of the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, and all acts amendatory thereof and supplementary thereto, there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the following additional sums, to be expended according to the provisions of such act as amended:

The sum of $75,000,000 for the fiscal year ending June 30, 1930.

The sum of $75,000,000 for the fiscal year ending June 30, 1931.

SEC. 2. For carrying out the provisions of section 23 of the Federal highway act, approved November 9, 1921, there is hereby authorized to be appropriated for forest roads and trails, out of any money in the Treasury not otherwise appropriated, the following additional sums, to be available until expended in accordance with the provisions of said section 23.

The sum of $7,500,000 for the fiscal year ending June 30, 1930.

The sum of $7,500,000 for the fiscal year ending June 30, 1931.

SEC. 3. All acts or parts of acts in any way inconsistent with the provisions of this act are hereby repealed and this act shall take effect on its passage.

The SPEAKER pro tempore. Is a second demanded?

Mr. ALMON. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Is the gentleman a member of the committee and opposed to the bill?

Mr. ALMON. I am not opposed to the bill.

The SPEAKER pro tempore. Is there any Member opposed to the bill? If not, the Chair will recognize the gentleman from Alabama to demand a second.

Mr. DOWELL. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. DOWELL. Mr. Speaker, this bill is to extend the present authorization to the years 1930 and 1931, and I ask unanimous consent to extend my remarks on the bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. DOWELL. Mr. Speaker, I ask unanimous consent that all Members may have leave to extend their remarks on this legislation.

Mr. CHINDBLOM. For what time?

Mr. DOWELL. For five days.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. DOWELL. Mr. Speaker, the bill before the House authorizes a continuation of the Federal-aid appropriations in the building of roads and also authorizes the continuation of the appropriations for forest roads and trails. The bill before the House in no manner changes the Federal-aid program, but it extends it for the fiscal years of 1930 and 1931.

Mr. CRAMTON. Mr. Speaker, will the gentleman yield?

Mr. DOWELL. Yes.

Mr. CRAMTON. The press this morning carried a story that this bill was likely to meet with a veto at the White House by reason of the striking out of the automobile tax in the revenue bill. Has the gentleman from Iowa any information as to whether the House is doing a vain thing in passing this bill to-day?

Mr. DOWELL. I shall have to answer the question by saying the gentleman from Iowa is not able to give the information and is not responsible for the news items.

Mr. CRAMTON. Would the gentleman, as chairman of the committee, be able to state whether this bill has the approval of the administration through the Budget?

Mr. DOWELL. I have not that information.

Mr. CRAMTON. I hope the newspaper article is not correct. I think it would be highly regrettable that the only aid to good roads would be over here in Virginia.

Mr. HASTINGS. Does the gentleman from Iowa think that every time the Congress wants to exercise its legislative function upon a bill that is pending here it is necessary to go out and consult the executive branch of the Government? [Applause.]

Mr. TREADWAY. Mr. Speaker, will the gentleman yield for a question?

Mr. DOWELL. I yield for a question but not for an argument.

Mr. TREADWAY. Does this bill increase the appropriation of good roads in any respect?

Mr. DOWELL. It does not. It extends the authorization to 1930 and 1931.

Mr. RAMSEYER. Will the gentleman tell the House how many years we have appropriated $75,000,000 a year for good roads?

Mr. DOWELL. I would say that since 1925, $75,000,000 has been authorized each year up to and including 1929.

Mr. RAMSEYER. And this bill continues that policy?

Mr. DOWELL. This bill merely continues this authorization for the fiscal years 1930 and 1931.

Mr. CHINDBLOM. Mr. Speaker, will the gentleman yield?

Mr. DOWELL. Yes.

Mr. CHINDBLOM. The authorization for forest roads and trails amounting to $7,500,000 for the two fiscal years 1930 and 1931 is also a continuation of the present policy?

Mr. DOWELL. It is identical. It is the same amount exactly. There is no change whatever between this bill and the one enacted two years ago.

The Federal-aid system has been of great importance to the people of the United States. Back in the early days roads were

principally of local interest and the people of the neighborhood built and maintained their local roads. The coming of the automobile, however, has so changed the method of travel and the use of the highways that the entire system and method of road building has been changed. The local roads, therefore, have now been connected, and now form a part of a great system of national highways.

It was not until 1912 that Congress took notice of the importance of a great highway system, and since that time there has been a great improvement in the construction and use of the highways. A joint committee was appointed, composed of Members of the Senate and Members of the House of Representatives, to make a thorough investigation of the subject and report to Congress what part, if any, it should take in the construction of roads. This committee made a thorough investigation of the subject and reported its findings to the House of Representatives and the Senate in 1915, and the legislation for Federal aid in the construction of highways has resulted from this investigation and report. The first legislation enacted by Congress on the subject was approved July 11, 1916, and while this legislation was largely experimental, it provided for a five-year program and authorized an appropriation of $75,000,000; $5,000,000 became available the first year, $10,000,000 became available the second year, $15,000,000 became available the third year, $20,000,000 became available the fourth year, and $25,000,000 became available the fifth year. The next legislation on the subject was passed on February 28, 1919. It was an appropriation of $200,000,000 covering a period of three years. Fifty million dollars became available at once, $75,000,000 became available for the fiscal year ending June 30, 1920, and $75,000,000 became available for the fiscal year ending June 30, 1921.

After considering the whole subject carefully, and after a careful investigation of the benefits growing out of the appropriations made by the Federal Government in 1921, Congress took up the subject with the view of providing a definite and comprehensive program in the construction of highways. This legislation provided for a program of road construction throughout the entire Nation, embracing 7 per cent of the roads in each State. The 7 per cent aggregates approximately 200,000 miles of primary and secondary roads. For the first time Congress established a definite governmental program and policy of cooperation with the several States in the construction of a national highway system. Seventy-five million dollars was authorized for this work in the first year.

Following this general policy in 1922, Congress authorized the expenditure of $50,000,000 for the fiscal year ending June 30, 1923, $65,000,000 for the fiscal year ending June 30, 1924, and $75,000,000 for the fiscal year ending June 30, 1925.

In 1925 Congress authorized the expenditure of $75,000,000 for the fiscal year ending June 30, 1926, and $75,000,000 for the fiscal year ending June 30, 1927, and in 1927 $75,000,000 was authorized for the fiscal year ending June 30, 1928, and $75,000,000 for the fiscal year ending June 30, 1929. The present bill provides for an authorization of $75,000,000 for each of the fiscal years ending June 30, 1930, and June 30, 1931. Briefly this is a review of all the money authorized and appropriated by the Government for Federal aid in the construction of roads.

I am inserting a table of authorizations for Federal-aid roads by years:

Federal authorizations for roads

1917	$5,000,000
1918	10,000,000
1919	65,000,000
1920	95,000,000
1921	100,000,000
1922	75,000,000
1923	50,000,000
1924	65,000,000
1925	75,000,000
1926	75,000,000
1927	75,000,000
1928	75,000,000
1929	75,000,000
1930	75,000,000
1931	75,000,000
Total	990,000,000

I am also inserting a table of the appropriations by Congress for roads by years, since the inauguration of the present Federal-aid policy.

Federal appropriations for roads

1917	$5,000,000
1918	10,000,000
1919	65,000,000
1920	95,000,000
1921	100,000,000
1922	75,000,000
1923	25,000,000
1924	29,300,000
1925	13,000,000
1926	98,900,000
1927	75,000,000
1928	71,000,000
1929	71,000,000
Total	733,200,000

When the Government established the Federal-aid system of highways it also made provision for the construction of forest roads and trails, and this policy has been carried out in the present bill, which authorizes the appropriation of $7,500,000 for the fiscal year ending June 30, 1930, and $7,500,000 for the fiscal year ending June 30, 1931.

I am inserting a table showing the Federal authorizations for forest roads and trails since the inauguration of the present Federal-aid policy, and also a table showing the actual appropriations by years.

Federal authorizations for forest roads and trails

1917	$1,000,000
1918	1,000,000
1919	4,000,000
1920	4,000,000
1921	4,000,000
1922	6,000,000
1923	11,000,000
1924	7,500,000
1925	7,500,000
1926	8,500,000
1927	7,500,000
1928	7,500,000
1929	7,500,000
1930	7,500,000
1931	7,500,000
Total	92,000,000

Federal appropriations for forest roads and trails

1917	$1,000,000
1918	1,000,000
1919	4,000,000
1920	4,000,000
1921	4,000,000
1922	6,000,000
1923	11,000,000
1924	7,500,000
1925	7,500,000
1926	8,500,000
1927	7,500,000
1928	1,675,000
1929	7,500,000
Total	71,175,000

Under the present law the Federal Government apportions the funds appropriated to the several States, and these funds are used in the construction of roads approved by the Secretary of Agriculture. Federal participation under the law can not exceed 50 per cent of the cost of construction of the road, nor can it exceed $15,000 per mile, and not more than 60 per cent of the Federal aid allotted to any State shall be expended on the primary or interstate highways.

The law provides the method for the distribution of Federal-aid funds to the States on the basis of one-third according to the ratio which the area of each State bears to the total area of all the States; one-third in the ratio which the population of each State bears to the total population of all the States; and one-third of the ratio which the mileage of the rural delivery and star routes bear to the total rural-route delivery and star routes in all the States. You will observe that this will slightly change the amount annually that each State will receive, by the various changes in population, in mileage, or in rural-route delivery and star routes.

Under the Federal law the highways receiving Federal aid are constructed under the direction of the State highway commissions, but the law empowers the Secretary of Agriculture to withhold Federal aid on any given project if it does not come up to the proper standard in compliance with the regulations of the department, and if it does not in the same respect, comply with the general system or policy of highway construction as provided in the Federal law.

When the highway has been constructed with Federal-aid funds, it then becomes the duty of the State in which it is located to maintain the highway in a proper manner, and if the State fails to so maintain any highway constructed with Federal funds, the Secretary of Agriculture may maintain such highway from Federal-aid funds allotted to that State, or he may withhold any Federal aid to that State until the highway has been placed in a proper condition.

On the 1st of January, 1928, under the Federal-aid highway system, totaling approximately 200,000 miles of roads, 25,381 miles of this system was improved with a high-type surface, consisting of concrete; 1,449 consisting of brick; 3,626 miles consisting of bituminous concrete; 8,487 miles was surfaced with bituminous macadam; and 7,591 miles was surfaced by water-bound macadam; 45,435 miles were surfaced with gravel;

and 7,222 miles were surfaced with sand clay; 28,152 miles have been only graded and drained. Other types, 5,261 miles. This leaves approximately 70,000 miles of the 7 per cent system of the highway program unimproved and undeveloped. Herewith I am inserting a table giving the types and mileage of roads improved under the Federal-aid system.

Federal-aid highway system; mileage of roads improved by types

January 1—	Graded and drained	Sand-clay	Gravel	Water-bound macadam	Bituminous macadam	Bituminous concrete	Concrete	Brick	Other types
1922 [1]	6,986	2,663	11,070	1,203	1,420	821	4,645	393	----------
1923 [1]	8,686	4,224	15,593	1,375	2,450	1,029	7,285	591	----------
1924	23,544	7,427	34,700	7,225	6,200	3,039	16,780	1,775	1,107
1925	27,319	5,668	41,128	6,580	10,225	3,267	20,570	1,356	3,934
1926	28,279	5,793	52,097	5,742	7,100	3,688	22,610	1,243	3,657
1927	28,152	7,222	45,435	7,591	8,487	3,626	25,381	1,449	5,261

[1] With Federal aid only.

NOTE.—Reduction in mileage of a type means that some of this mileage has been changed to another type.

It is interesting to note that a little more than five years ago 43 per cent of the rural-mail carriers were using horse-drawn vehicles upon their routes, while to-day less than 15 per cent are using horses. Also the time involved in the delivery of rural mails has been reduced more than one-half.

Under the present program, with $75,000,000 expended every year, the Government is aiding in the improvement of approximately only 200,000 miles of this more than 1,000,000 miles of rural-mail mileage.

I wish to introduce a table which shows the payments to the several States out of the present appropriations from July 1, 1926, to June 30, 1927. Also the agreements entered into for new contracts between the Federal Government and the several States for the same period.

State	Cash payments July 1, 1926–June 30, 1927	Federal funds put under agreement
Alabama	$1,206,220	$1,928,421
Arizona	721,244	927,076
Arkansas	986,718	988,778
California	2,978,865	2,256,968
Colorado	1,289,507	1,415,321
Connecticut	613,842	914,991
Delaware	450,337	427,755
Florida	1,434,044	697,392
Georgia	2,535,286	1,526,260
Idaho	1,236,845	1,354,224
Illinois	2,427,393	3,747,465
Indiana	2,055,736	2,961,840
Iowa	2,845,968	4,234,277
Kansas	2,730,003	3,139,133
Kentucky	1,420,629	2,690,799
Louisiana	1,124,563	1,290,613
Maine	878,954	507,584
Maryland	650,107	525,102
Massachusetts	799,464	1,129,638
Michigan	2,692,098	3,265,637
Minnesota	2,590,339	3,136,928
Mississippi	1,589,121	1,346,951
Missouri	4,099,339	2,148,860
Montana	894,780	1,690,712
Nebraska	2,370,258	2,136,493
Nevada	1,083,653	1,034,412
New Hampshire	424,769	539,192
New Jersey	732,593	1,377,533
New Mexico	1,110,390	1,709,180
New York	4,367,135	3,865,097
North Carolina	2,441,688	1,418,090
North Dakota	2,530,261	1,699,538
Ohio	2,580,503	2,096,015
Oklahoma	1,339,252	1,762,927
Oregon	1,301,855	712,663
Pennsylvania	3,180,313	2,624,342
Rhode Island	466,586	331,605
South Carolina	1,187,023	743,202
South Dakota	1,074,687	1,058,153
Tennessee	1,793,805	1,284,093
Texas	4,710,228	3,386,173
Utah	830,083	1,089,996
Vermont	625,424	349,202
Virginia	1,868,893	1,357,408
Washington	1,146,672	331,642
West Virginia	648,203	1,138,590
Wisconsin	2,357,069	3,400,581
Wyoming	696,804	512,641
Hawaii	253,061	347,167
Total	81,371,013	80,458,660

The Federal aid system also includes all of the highways, more than 53,000 miles, which after careful survey, the War Department considered as necessary for our national defense.

Recognizing the importance and benefits of highway improvement both of the great political parties at their last national conventions, convened in 1924, gave utterance to their views in the following language:

The Republican platform:

The Federal aid road act, enacted by the Republican Congress in 1921, has been of inestimable value in the development of the highway systems of the several States and of the Nation. We pledge the continuation of the policy of Federal cooperation with the States in highway building.

The Democratic platform:

Improved roads are of vital importance not only to commerce and industry, but also to agriculture and rural life. We call attention to the record of the Democratic Party in this matter, and favor a continuation of Federal aid under existing Federal and State agencies.

Referring to the subject of Federal aid in the construction of roads, President Coolidge, in his message to Congress on December 6, 1927, used the following language:

The importance and benefit of good roads are more and more coming to be appreciated. The National Government has been making liberal contributions to encourage their construction. The results and benefits have been very gratifying. * * * The agricultural regions will especially be benefited by low cost of transportation which the improvement will afford.

Let us hope that when the Republican and Democratic conventions convene this year they may continue to indorse in their platforms the Federal aid road program, which has accomplished so much in the development of a splendid highway system throughout the Nation and which is now so vital to commerce, industry, and agriculture.

The importance of a complete system of Federal highways throughout the Nation can not be estimated in its benefits to the people of the Nation, in convenience, in recreation, in education, and in financial value.

When Congress enacted the Federal aid law back in 1921 it was hoped by this legislation to improve the highways from the farms to the market places throughout the country, and thus aid in facilitating the marketing of farm products. Much has been accomplished along this line, as is shown by the hearings before the Committee on Roads. Highway improvements are not only bringing this about, but the evidence shows that better highway facilities are bringing the producer and consumer closer together, to the great benefit and profit to both.

The development of the automobile industry and of automobile traffic has necessitated greater and more extensive highway improvements.

In 1895, just at the beginning of the automobile industry, there were but 300 automobiles in the United States. In 1900, five years later, only 14,000 automobiles had been manufactured. In 1910, 10 years later, the automobiles registered had grown to a half million. In 1920, 10 years later, it had increased and approximately 9,000,000 cars were being used throughout the United States. In 1925, five years later, the automobile industry had an enormous growth; the automobiles on the streets and highways more than doubled, and we had 19,954,347, almost 20,000,000 automobiles. In 1927, 23,127,315 motor vehicles were registered.

These figures indicate clearly that these increases will continue in the future no one knows where.

It is apparent to everyone who has given the subject even a casual consideration that with more than 23,000,000 motor vehicles in operation throughout the country a nation-wide system of highway construction is necessary in the United States, and this necessarily will grow day by day and year by year as these motor vehicles increase in number, in importance, and in value.

The transportation question has become an important factor in road building throughout the country. The farm-to-market

road must not only be maintained but the bus and truck transportation for short distances has become an important factor in transportation.

The telephone service has been in operation for more than half a century and has become a necessity in almost every household, yet we are told to-day there are more motor vehicles in the United States than there are telephones.

From estimates made by the National Automobile Chamber of Commerce, the Bureau of Public Roads, and the American Association of State Highway Officials the estimated value of motor vehicles in 1925 was approximately $16,500,000,000. (At that time less than 20,000,000 motor vehicles were in operation. This has now been increased to more than 23,000,000.)

With the great increase in highway construction and the great increase in automobile traffic the problem of better traffic regulations has become an important factor in the economic use of highways throughout the country.

A few years ago the American Association of Highway Officials took up the question of markings and signals on the interstate highways and the Secretary of Agriculture appointed a joint board from the Bureau of Public Roads and the American Association of State Highway Officials to recommend a uniform system of markings and signals on the principal highways of the country.

This board made a careful investigation of the subject and submitted its report to the Secretary of Agriculture and to the several States, recommending a uniform system of markings and signals. I quote from the statement of Frank T. Sheets, president of the American Association of State Highway Officials and chief engineer of the State of Illinois, made before the Committee on Roads relative to this subject:

> This work, taken up through the leadership of the American Association of State Highway Officials and the United States Bureau of Public Roads, has now resulted in there being set out nationally a system of roads which the traveling public can find, and the marking, or the provision for marking of these roads with guide signs and route markers, and with danger and caution or directional signs, which are national in standard and uniform in application over all the States. * * * Definite plans have been made, as I understand it, by all but two States of the Union to erect these markings and these signals.

It is also apparent that uniform laws and regulations must be adopted in the various States for the better protection of motorists, pedestrians, and others on the streets and highways. The 23,000,000 motor vehicles now on the streets and highways have brought to our attention in a vivid way the appalling rate of accidents, injuries, and deaths. The committee on statistics of the National Conference on Street and Highway Safety report that in the year 1923, 22,621 deaths occurred as a result of street and highway accidents; in 1924, 23,291 lost their lives as a result of street and highway accidents; in 1925 it is estimated that 24,462 persons lost their lives as a result of these accidents; in 1926, 25,302; in 1927, 26,618.

These estimates further indicate the American people are operating these automobiles on the streets and highways at the enormous cost of more than $11,000,000,000 annually. This huge annual outlay can not be imagined or understood until it is reduced to the individual automobile, but when we take into consideration there are more than 23,000,000 motor vehicles used, it only requires an average outlay of $500 to $600 on each car to aggregate this vast sum.

With this large investment and this enormous annual cost of operation, it is plain to everyone that a great highway system is imperative.

While the Federal aid program is far from complete, great strides have been made in the past few years in the improvement of this system, and more progress is being made to-day in all of the States of the Union than has ever been made before.

The highway departments in the several States are expending vast sums of money to care for the enormous increase in automobile traffic, and highway improvements have been going forward rapidly in the States. It is estimated that more than $1,000,000,000 is being expended annually by the States in these vast highway improvements.

More than 25,000 deaths annually from highway accidents, averaging more than 1,000 deaths to every million motor vehicles in operation in the United States. It is apparent to all that every effort possible must be made to curb this awful destruction of human lives.

The legislation under consideration authorizes the Federal Government to continue the present program of highway construction under the Federal-aid system, and I hope it may receive the approval of the House.

At no time since the Government undertook the present plan of highway construction with the various States has there been such general and uniform support for this program. The hearings before the Committee on Roads discloses a wonderful development, both in character of materials and in construction of highways throughout the country.

Your committee submits this legislation with the firm conviction that it is not only desirable but very essential for the Government to carry on this program of cooperation with the several States in the building up of a great highway system, which has accomplished so much for the people of the United States in the past years.

Mr. O'CONNOR of Louisiana. Mr. Speaker and Members of the House, on May 21, Mr. DOWELL moved to suspend the rules and pass Senate bill 2327, to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes."

Mr. DOWELL is one of the most valuable Members of the House. Modest, unassuming, always courteous, he is generously inclined to those who seek information from him with respect to the many matters of a governmental nature, with which he is thoroughly familiar. His address to the House in behalf of the bill which was under his parliamentary management contains a wealth of information, and the RECORD that carries that address should be in the library of every Congressman. The bill which he called up under a suspension of the rules for consideration by the House is a short one, but it is pregnant with significance and meaning to the country. Much has been compressed into little space. "Multum in parvo" might well be written under it, for it means much to the country. It means that $75,000,000 are authorized for the fiscal year ending June 30, 1930, to be expended by aiding the States in the construction of rural post roads. It means that $75,000,000 for the fiscal year ending June 30, 1931, are authorized for the same purpose. It is needless to point out the great results which will flow from the expenditure plus the amounts expended by the States, counties, and municipalities throughout the United States in road building during those two years. It makes for a tremendous internal improvement. It makes for the national defense. It makes for the general welfare. It promotes prosperity by the employment it will give to a large number of persons whose expenditures in behalf of their families will keep the wheels of commerce revolving. I can not repeat too often the good advice given by the great magazine, Liberty, several months ago, when it pointed out that by proper business management the States and their political subdivisions and the Federal Government could, by a judicious method of making public improvements, play a tremendous part in preventing unemployment and the distress that follows to millions of men and their families when the breadwinner is without work.

The man who has not undergone a trial of this sort does not know how black the night can be. In my judgment no greater problem is present for the statesmen to solve than that of unemployment. In the memorable words of one of America's choice spirits if I could be instrumental in eradicating this curse that visits the toilers of our country in cycles bringing sorrow and grief to hearts that are already tried almost to the breaking point I would not exchange the proud satisfaction that I would enjoy for all the triumphs decreed to the most successful conqueror. But back to my subject, the people of the United States have found the Federal-aid system to good roads of the greatest importance. Back in the early days roads were principally of local interest, and the people of the neighborhood built and maintained them, but suddenly a magician appeared on the scene and by a wave of his wand brought the automobile into existence and that wonderful machine spoke more eloquently to the minds of statesmen than the tongues of all of the orators in the United States. Good roads became a slogan, north, east, south and west. Quagmires, dirt roads that became clay in a wet season and were frightful in their cost to vehicles that were drawn over them gave way to the splendid highways that ribbon the entire country. A new form of wealth that immediately created additional wealth, for good roads added to land values in both country and city and these values made for new houses and that additional form of wealth made for finer furnishings, all of which communicated itself to our factories, foundries, and mines. The wheels of industry were kept rapidly revolving, and the voice of commerce was heard throughout the land. Good roads have in themselves and their ramifications done more for the greater glory of America than any other factor in our national life, though it was not until 1912, that Congress took notice of a great highway system. Since that time, however, the construction and the use of roads have gone forward by leaps and bounds.

Under the present law the Federal Government apportions the funds appropriated to the several States, and these funds are used in the construction of roads approved by the Secretary of Agriculture. Federal participation under the law can not exceed 50 per cent of the cost of construction of the road, nor

can it exceed $15,000 per mile, and not more than 60 per cent of the Federal aid allotted to any State shall be expended on the primary or interstate highways.

The law provides the method for the distribution of Federal-aid funds to the States on the basis of one-third according to the ratio which the area of each State bears to the total area of all the States; one-third in the ratio which the population of each State bears to the total population of all the States; and one-third of the ratio which the mileage of the rural delivery and star routes bear to the total rural-route delivery and star routes in all the States. You will observe that this will slightly change the amount annually that each State will receive, by the various changes in population, in mileage, or in rural-route delivery and star routes.

Under the Federal law, the highways receiving Federal aid are constructed under the direction of the State highway commissions, but the law empowers the Secretary of Agriculture to withhold Federal aid on any given project if it does not come up to the proper standard in compliance with the regulations of the department, and if it does not in the same respect, comply with the general system or policy of highway construction as provided in the Federal law.

When the highway has been constructed with Federal-aid funds, it then becomes the duty of the State in which it is located to maintain the highway in a proper manner, and if the State fails to so maintain any highway constructed with Federal funds, the Secretary of Agriculture may maintain such highway from Federal-aid funds allotted to that State, or he may withhold any Federal aid to that State until the highway has been placed in a proper condition.

On the 1st of January, 1928, under the Federal-aid highway system, totaling approximately 200,000 miles of roads, 25,381 miles of this system were improved with a high-type surface, consisting of concrete; 1,449 consisted of brick; 3,626 miles consisted of bituminous concrete; 8,487 miles were surfaced with bituminous macadam; 7,591 miles were surfaced by water-bound macadam; 45,435 miles were surfaced with gravel; 7,222 miles were surfaced with sand clay; and 28,152 miles have been only graded and drained. Other types, 5,261 miles. This leaves approximately 70,000 miles of the 7 per cent system of the highway program unimproved and undeveloped.

I am glad to say that the same wonderful influence that the automobile has had on American life is seen in almost every other part of the world, particularly in Europe. Minerva sprang from the brain of Jove, armed cap-a-pie and became a dominant influence in the pagan world as a result of an imaginary intellectual power which, of course, always dominates and subordinates everything else through its rule. The automobile sprang from the brain of some human and is exercising a far greater influence upon the affairs of mankind on the western and eastern continents than ever did the brain child of the mighty Jupiter of the skies. All of Europe is bound by a wonderful road system, lowlands and mountain heights, and millions of machines are night and day churring and purring and rolling along the macadam and asphalt roads in Paris and Moscow, in London and in Rome, in Berlin and in Dublin. They carry millions of men yearly on this side of the ocean on business affairs and in pleasure jaunts, in search of dollars and in search of wisdom, in search of health and in quest of pleasure. Many go from the Atlantic to the Pacific. Whole families move across the continent.

Frequently in honor of some great occasion motorcades are organized and public-spirited men move over long distances taking many days to complete the journey in order that they may bring the felicitations and good wishes of a section remote from the end of the trail on which they began. And these motorcades are productive of wonderful results. Jason and his Argonauts who went in search of the Golden Fleece brought back with them something even of greater value, the knowledge and the wisdom that may be acquired only through traveling from one country to another. He that would bring home of the Indes must carry the wealth of the Indes with him. So to in traveling. He that would bring home wisdom must carry wisdom with him. Neither the days of chivalry nor the days of adventure, if they may be differentiated, are at an end. The knight gaily caparisoned, dashing across the drawbridge on his charger, sallying forth in search of adventure which consisted as a rule in rescuing some damsel from the castle of one whom she looked upon with no affectionate eye, belongs to a past that is rapidly vanishing into fable, and is one with the fairy stories that entertained past generations but which no longer has an appeal for the effete of to-day. Even Santa Claus as a clear existence is tolerated in a good-humored way by the youngsters who might one time be regarded as the children of yesteryear. "But where are the children of yesterday?" altering Villon slightly.

Yes; there are many wonderful trips which have the thrill and the kick that make for the pleasure of Americans of this generation. Three years ago I made one of a great motorcade that left historical old New Orleans, and over the Jefferson Highway passed through a great number of wonderful hamlets, villages, towns, and cities, and the great States that intervened before we reached Winnipeg across the Canadian line—a city about as thoroughly English as one could find any place in the world outside of England itself. One can not describe many things in the life of America. No one can describe the Grand Canyon, and I do not think there are many who can ever describe the wonders that apparently rolled by while making such a magnificant trip as I made from palm to pine. It was in the autumn time and the ravishing beauties of every tree, particularly in Minnesota and Wisconsin, will linger in my mind but never be described by me.

To go from a city where the Mississippi River is a mile wide up to Lake Itasca where, at the first bridge across the Mississippi River, the stream is so insignificantly small that I jumped across it is a performance to remember. If you have never made such a trip, make it. And do not forget to make it in the autumn time. Then you will see the leaves upon the magnificent trees turning from green to a bewildering combination of all of the other colors making for a display so gorgeous in its sheer beauty as to gladden one at the thought that his native land is so wondrously fair to even the most jaded eye. And nature seems to have so arranged her plans that they readily fit into the mood of the farmer artist who make them, fascinate those that are fortunate enough to pass through an endless succession of Edens. And that is not the only trip. Last year, as a guest of the Atlanta Journal, one of the great newspapers of the United States, I journeyed—though I would prefer to say that I rolled along—from New Orleans to Quebec. Major Cohen, the publisher of the Journal, was our host. Let me see how I can convey to you a mental picture of this man who loves his State because it is his own and scorns to give aught other reason why! The elements are so mixed in him that one might well stand up and say to all the world, "This is a man." That is substantially correct as a quotation, I hope, but I know that it is an accurate description of one of the best fellows on earth. Well, we will let it go at that. We went over the Appalachian Highway and connected up with the Susquehanna Road, crossed the St. Lawrence River, and after an unforgettable journey along the banks of that historic river made the end of the trail. Impressive old Quebec, with an architecture and an atmosphere that remain with one for many years. I am glad that I lived long enough to witness the wonders of the Appalachian Highway.

Scenic grandeur that can not be surpassed in the Alps or the Andes! A hospitality upon the part of the friends of Major Cohen that made a fellow feel that after all we are not commercial to the exclusion of the finer phases of civilization. Farm lands along the Susquehanna Highway that enchanted the eye and made the tongue constantly mutter: "Wonderful," "beautiful," "magnificent." I rode on Pegasus and flew through Airy Land to the Garden of Hesperides and there pickled apples of gold from pictures of silver. Fair women and gallant men in the full meaning of those words greeted us at every stopping place and they welcomed us with an enthusiasm as sincere as it was boundless. But it was at Trois Rivieres or Three Rivers between Montreal and Quebec that was staged the piece de resistance. A number of singers came from Quebec arrayed in the garb of woodsmen of the Far North and at a magnificent banquet put on a famous St. Lawrence Cajun theatrical stunt, and sang a song of the forest which apparently was then upon every French Canadian tongue. The name of that song, I think, is Alouette. I heard it sung by strolling theatrical folks on the night boat from Quebec to Montreal and I realized with my companions that if it were sung a thousand times it would retain for me its haunting melody, and that I would never tire of the refrain.

My hat is off to you, Major Cohen, and the charming ladies and the fine fellows from Georgia, Virginia, and the Carolinas that made the wonderful trip under your leadership. You threw the doors of fairyland open and told me to look, and I did look.

Mr. BRAND of Ohio. Mr. Speaker, the bill before us appropriates $75,000,000 for 1930 and $75,000,000 for 1931 as Federal aid to the States in building the main highways.

This is the same amount that has been appropriated for the years 1925, 1926, 1927, 1928, and 1929 so that we are neither decreasing nor increasing the activity. Between 1920 and 1925

the Government spent something less per annum on this activity.

The evidence before the committee indicated that the public are well satisfied to have this appropriation made annually for the benefit of good roads. The evidence also has shown that the Bureau of Roads, which administers this fund, has accomplished a great deal in supervising road construction over the United States.

On the subject of drainage, construction of the roadbed, as well as construction of the paving of whatever class or kind, the Bureau of Roads have contributed to the durability and efficiency of the highways. Anyone who will compare the roads of 10 years ago with the roads of to-day will realize that great improvements have come from some source.

The Bureau of Roads are likewise to be congratulated upon the work they have done in showing the best way to construct and maintain types of lesser cost than hard-surface roads. The sand, clay, gravel, and stone roads have all had proper attention from this department and they have made good roads available where hard-surface roads could not be built on account of the expense. In addition, they have led the way in showing that mats of various descriptions can be constructed on top of gravel and stone roads in a manner which provides for extensive traffic at a very low cost, and such roads are proving durable and more comfortable than any of the other types.

The fact of the matter is the Bureau of Roads at Washington have not only been helpful through their own investigation in the construction and maintenance of roads but also act as a clearing house for all improvements and new ideas coming from the highway departments of each of the States and knowledge originating in one State soon becomes general throughout the Union through this clearing house in Washington.

The main road system of the United States to which the Nation contributes amounts to 186,300 miles and covers 7 per cent of the main roads in each of the States. The Government does not contribute to 93 per cent of the roads.

The roads so far improved with the National Government participating are as follows as to type and number of miles:

	Miles
Gravel	22,943
Portland cement concrete	12,883
Sand clay	5,225
Bituminous macadam	3,460
Bituminous concrete	1,660
Water-bound macadam	1,157
Brick	749
Bridge	146
Graded and drained unsurfaced	12,732
Total mileage improved	60,955

As I stated above, the total number of miles to which Federal aid applies is 186,300, and the Nation has contributed to 60,955 miles. At the same time the States have been improving this same 7 per cent system without Federal aid, and about 70,000 miles have been improved by the States in this way, so that we have a total of 130,000 miles of roads that have been improved on the main system, leaving about 56,000 yet to be taken care of.

In addition to this, 93 per cent of all the roads are in the hands of the States, counties, and townships and they are being benefited by the experience gained in improving the main roads. For example: The knowledge gained in building and maintaining gravel and stone roads has been used on these lesser roads in many States where gravel and stone are available, and a great many counties have completed the improvement of every road within the county. In the West dirt roads have been graded and are kept smooth by dragging, and the same may be said of sand-clay roads in the South, so that the public have good roads for most of the year.

The only objection to the national aid for road building comes from some States that pay into the National Treasury very large sums of money annually as compared with many of the other States, and such States find that they do not receive money back for roads in proportion to the money their citizens pay in to the National Treasury. Upon first consideration this does seem to be unfair, but a study of the question will show that the distribution of this money on the basis of the population, the area, and the miles of post roads in each State is just and fair.

For example, North Carolina pays a great deal of money into the National Treasury from her citizens and South Carolina pays rather a small amount, but each of these States receives for road purposes very similar amounts. But where does North Carolina get the money that is paid into the National Treasury? It is largely collected as internal revenue upon tobacco, and that tobacco is made into cigarettes and sold into every State in the Union, so that everybody in the country who uses cigarettes contributes the money to North Carolina, and North Carolina is really a collecting agency that turns the money over to the United States Treasury. The same illustration would apply in Michigan, where so many of the automobiles are made upon which national taxation is imposed, yet everybody over the United States who drives a flivver contributes to Michigan's proportion to national taxation.

New York sends the National Treasury more than any other State, but the incomes upon which she pays the tax are derived from every section of the country, so that all the people all over the United States contribute to the money that New York pays into the National Treasury. So when you analyze the situation you find that there is no unfairness.

In the olden days and, indeed, up to within the last 10 years, the farmers of the country practically built all of the roads, and that was because originally the farmers were the only ones who used the roads to any very great extent. Gradually the automobile and truck have made the roads more necessary to the centers of population than they are to the country people, and taxation for road purposes has gradually been shifted from the shoulders of the farmers to the broader shoulders of the State and Nation. Such roads as have been built by taxing adjacent property have been undoubtedly unfair in the light of the transportation problem which now exists. Many farmers are still paying heavy road taxes assessed during the last 10 years, and this has contributed to the farmers' difficulty and has contributed to the declining value of land over the United States.

It might be interesting to state that the Department of Commerce shows that from 1920 to 1925, the two census periods, farm land in the United States declined in value about $20,000,000,000, or fully one-third of its entire value.

It also might be interesting to compare value of industrial stocks and railways and bonds during this period.

I have asked the Department of Commerce to show me the trend of industrial stocks from 1920 up until the present time. They have picked out 25 representative industrial stocks and they found their values have changed since 1920 as follows:

These stocks averaged per share in—	
January, 1920	$120.51
December, 1920	83.33
December, 1925	177.74
December, 1927	242.50
April, 1928	269.75

Showing a gain since the low time in 1920 of over 300 per cent, while farm land was going down one-third its value.

Below are the names of the industrial stocks used in this calculation:

Air Reduction, Allied Chemical & Dye, American Smelting & Refining, American Telephone & Telegraph Co., American Tobacco, Baldwin Locomotive, Brooklyn Edison, Case Threshing, Commercial Solvents, du Pont de Nemours, Eastman, General Electric, General Motors, International Harvester, LaClede Gas, Montgomery Ward, National Biscuit, Pullman, Texas Gulf Sulfur, United Fruit, United States Cast Iron Pipe, United States Steel, Western Union, Westinghouse Air Brake, Woolworth.

Now take 25 representative railroad stocks:

	Per share
January, 1920	$56.27
December, 1920	53.02
December, 1925	92.45
December, 1927	119.68
April, 1928	127.16

Showing a gain of more than 100 per cent while land values were going down.

Below are the names of the railway stocks used in this calculation:

Atchison; Baltimore & Ohio; Chesapeake & Ohio; Chicago, Rock Island & Pacific; Chicago & North Western; Delaware, Lackawanna & Western; Erie; Great Northern, preferred; Illinois Central; Lehigh Valley; Louisville & Nashville; Missouri, Kansas & Texas; Missouri Pacific; New York Central; New York, New Haven & Hartford; Norfolk & Western; Northern Pacific; Pennsylvania; Pittsburgh & West Virginia; Reading; St. Louis & San Francisco; Southern Pacific; Southern Railway; Texas & Pacific; Union Pacific.

Take 40 representative bonds:

	Per $100 bonds
December, 1920	$57.72
December, 1925	77.56
December, 1927	85.98
May 10, 1928	98.97

Or a gain of almost 100 per cent in the value of bonds, while land has gone down one-third its value.

This shows the importance of the farm legislation which has passed the Senate and the House and is to-day before the President for his approval or disapproval, and it shows the importance of electing a President at the next national election

who is sympathetic with the idea of bringing about equality between agriculture and the other activities of the country.

One of the candidates for the nomination on the Republican ticket is against this bill, and something over three years ago I suggested that this gentleman, Mr. Hoover, be the Secretary of Agriculture, because he had advocated a measure of relief to agriculture.

I want to state at this time just what that relief measure was. When I first came down to Congress I thought I had an idea that would be a benefit to agriculture, and I went to the President with the idea. What I had in mind was that the United States should produce the sugar and wool that we are buying abroad, amounting to some $600,000,000 a year, and if we produced it in this country we would use some of the land used for wheat, cotton, and other products, and probably reduce the surplus over and above our home demands so that the tariff might be effective.

The President sent me to Mr. Hoover and in January, 1925, he (Mr. Hoover) was selected as the one to address an agricultural committee, selected by the President, of influential farm leaders who were appointed to offer a solution of the farm problem.

At that time Mr. Hoover took occasion to adopt this measure of relief which I had advocated and stated that what we needed was to balance production in the United States to our home demand, and that we were buying abroad much that should be produced at home.

Immediately I wrote him that he should accept the position as Secretary of Agriculture, then vacant, and put these ideas into effect. My mail shows that I had a conference with him on this subject later and asked that he give me the acreage in the United States that would raise sugar and also prepare a bill to aid in establishing sugar factories. After that my mail is silent.

MR. HOOVER TALKED WELL BUT DID NOTHING

Three years have passed and not a move has been made in this direction. I learned from high authority that the sugar plantations in Cuba were owned largely in New York and that they were against this proposition.

We have made no successful move in the three years that have passed to bring about relief to agriculture. Bills have been passed by both the Senate and the House but have been vetoed by the President. It is my opinion that land is still going down and it is increasingly evident that stocks of all kind in the industral and railway world continue to go up. There is an unfairness in the situation that can only be relieved by legislation.

We have, by legislation, in most of the States relieved agriculture of an unfair share in the road-building program and generally the States are assuming the building and maintenance cost of all the main roads, and where States have not so done they are leaving on the shoulders of agriculture an unfair burden.

Mr. GARDNER of Indiana. Mr. Speaker, in the consideration of Senate bill 2327, to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as a member of the Committee on Roads, and one who has been interested for a number of years in the construction of good roads, I can not let this opportunity pass without expressing my views on this bill. And I desire, first, to give, in brief, the history, as I understand it, of what the Federal Government has done in the way of Federal aid to the States.

On August 24, 1912, an act was approved creating a joint committee composed of five Members of the Senate, to be designated by the chairman of the Senate Committee on Post Offices and Post Roads, and five Members of the House, to be designated by the chairman of the House Committee on Post Office and Post Roads, to make inquiry into the subject of Federal aid in the construction of post roads and to report at the earliest practicable date. And for this purpose an appropriation of $25,000 was made for the use of this joint committee in such investigation, and an appropriation of $500,000 was made to be expended by the Secretary of Agriculture, cooperating with the Postmaster General, in improving the condition of the roads over which the rural mails were delivered, or were to be delivered.

On July 11, 1916, an act was approved authorizing the Secretary of Agriculture to cooperate with the States through their respective highway departments in the construction of rural post roads in the various States and Territories. And which act provided an appropriation of—

For the fiscal year ending June 30, 1917	$5,000,000
For the fiscal year ending June 30, 1918	10,000,000
For the fiscal year ending June 30, 1919	15,000,000
For the fiscal year ending June 30, 1920	20,000,000
For the fiscal year ending June 30, 1921	25,000,000

That act provided that after the Secretary of Agriculture had made certain deductions authorized by that act, he should then apportion the remainder of the appropriation of each fiscal year among the several States in the following manner:

One-third in the ratio which the area of the State bears to the total area of all the States.

One-third in the ratio which the population of each State bears to the total population of all the States, as shown by the latest available Federal census.

One-third in the ratio which the mileage of rural-delivery routes and star routes in each State bears to the total mileage of rural-delivery routes and star routes in all the States. (The information as to the mileage of rural-delivery routes and star routes is to be furnished by the Postmaster General.)

The same act made appropriation to be apportioned to the States as follows: The sum of $1,000,000 for the fiscal year ending June 30, 1917, and each fiscal year thereafter, up to and including the fiscal year ending June 30, 1926. In all, $10,000,000 to be used for the construction and maintenance of roads and trails within, or partly within, the national forests.

The act of February 28, 1919, amending the act of 1916, made appropriations for Federal aid, as follows:

For the fiscal year ending June 30, 1919, available immediately	$50,000,000
For the fiscal year ending June 30, 1920	75,000,000
For the fiscal year ending June 30, 1921	75,000,000

Said additional sums to be expended in accordance with the provisions of the act of June 11, 1916. This amendatory act also made appropriations, to be expended in our insular possessions, of $3,000,000 for each of the above-mentioned years.

This additional appropriation added to the appropriation of July 11, 1916, made an appropriation of $95,000,000 for the year 1920 and $100,000,000 for the year 1921, the largest appropriations that have been made before or since that time.

The act of July, 1916, was further amended November 9, 1921, and made appropriation of $75,000,000 for the fiscal year ending June 30, 1922, and also made additional appropriation for the construction and maintenance of forest roads and trails in the sum of $5,000,000 for the fiscal year ending June 30, 1922, and $10,000,000 for the fiscal year ending June 30, 1923.

The act of June 19, 1922, further amended and extended the act of 1916 appropriating $50,000,000 for the fiscal year ending June 30, 1923; the sum of $65,000,000 for the fiscal year ending June 30, 1924; the sum of $75,000,000 for the fiscal year ending June 30, 1925, and also making the additional appropriation of $6,500,000 for each of said years of 1924 and 1925, to be expended for the forest roads and trails.

The act approved February 12, 1925, extended these appropriations for the fiscal years as follows:

The sum of $75,000,000 for the fiscal year ending June 30, 1926.

The sum of $75,000,000 for the fiscal year ending June 30, 1927, and the further sum of $7,500,000 for the forest roads and trails for each of said years.

And the act of June 22, 1926, extended these appropriations for the fiscal years as follows:

The sum of $75,000,000 for the fiscal year ending June 30, 1928.

The sum of $75,000,000 for the fiscal year ending June 30, 1929, and the sum of $7,500,000 for the forest roads and trails for each of said years.

And this present bill simply continues this appropriation of $75,000,000 to be apportioned among the States for each of the fiscal years ending June 30, 1930, and June 30, 1931, and the further sum of $7,500,000 for the forest roads and trails for each of said years.

I simply call attention to these appropriations made in the past to show that the Congress is not being asked to do anything different from what it has done for the past several years. And, in my judgment, if there is any criticism to be offered to this bill, it is because the appropriation that it carries is too small, rather than too large, an amount, considering what these appropriations have done and are still doing for the good of the country.

For that reason I signed a minority report with Congressmen ALMON, HUDSPETH, CANNON, and EDWARDS, members of the committee, setting forth that we favored increasing the appropriations to the States from $75,000,000 to $100,000,000 for each of the fiscal years ending June 30, 1930, and June 30, 1931. I believe practically every member of the committee favored this increase, but we were informed that the President would not sign a bill increasing these amounts above the $75,000,000. A majority of the committee favored reporting the $75,000,000, and I am glad to see this appropriation made if we are unable to secure more.

I see no reason why the legislative branch of the Government should not exercise its own judgment as to the best needs

of the country, and if the President sees fit to veto such legislation that is his privilege and his responsibility.

The act approved November 9, 1921, in addition to making appropriations to be expended in cooperation with the States, provided for a definite system of roads to be constructed with funds from both the Federal and the State Treasuries. This system was limited to 7 per cent of the total road mileage of each State. Seven per cent was chosen because it was found that this mileage would connect all of the county seats and main market centers. And this appropriation is being asked for the purpose of further carrying out the construction of this 7 per cent mileage system.

The construction of good roads is not a political question, yet both of the two leading political parties have declared in favor of continuing this Federal aid to the States for the improvement of highways. In the last national platform of the Republican Party the platform pledges its party to a continuation of this program in the following language:

> We pledge a continuation of this policy of Federal cooperation with the States in highway building.

The Democratic platform of the same year pledges its party to a continuation of this program in the following language:

> Improved roads are of vital importance not only to commerce and industry but also to agriculture and rural life. We call attention to the record of the Democratic Party in this matter and favor a continuance of Federal aid under existing Federal and State agencies.

I desire to speak briefly of what Federal aid in road construction has done for my State, Indiana, and what progress has been made in the improvement of roads since the creating of this Federal-aid system, approved July 11, 1916, and amendments thereto. I speak of Federal aid in Indiana because I am more familiar with what Federal aid has done for Indiana than I am with what it has done for other States. Indiana did not have a law creating a State highway commission until 1917, when an act was passed creating such a commission. The constitutionality of this act was challenged before the provisions of the law could be fully put into effect, but in 1919, in case of Wright et al. *v.* House (188 Indiana, 247), it was decided by the court that the act was constitutional. But before much was accomplished by that act the legislature of 1919 enacted a law which, with later amendments, is now the governing act of the State of Indiana as to the State highway commission.

This act of 1919 created a nonpartisan highway commission, composed of four members to be appointed by the governor, and that commission selects a director of the commission. Since the organization of the State highway commission in Indiana, under the provisions of that act, there has been a wonderful improvement in the highway system of the State due to the efforts of the commission. I believe the State Highway Commission of Indiana will compare favorably with any of the State highway commissions, and the present commission is doing a wonderful work in the State of Indiana.

The Federal-aid system of roads for Indiana is 5,004 miles, being 7 per cent of the whole mileage of roads within the State. The highway commission of Indiana has taken out of this number of miles into its State highway system about 4,521 miles.

At the close of the last fiscal year, September 30, 1927, the maintenance department of the State highway commission had under its control the following types and mileage of highways:

	Miles
Cement concrete	1,299.11
Stone	1,063.66
Gravel	1,362.06
Other constructions	645.10
Total	4,369.93

The building program for the year 1928 calls for the construction of 400 additional miles.

The total disbursements for the fiscal year of 1927 by the Indiana State highway commission for the repair and construction of Federal-aid roads was $14,798,310.50.

The following table shows what the State of Indiana has received from the Federal Government and the amount it has expended from such receipts:

Federal-aid statement September 30, 1927

States fiscal year	Amount apportioned to Indiana	Amount received by Indiana
1917	$135,747.62	
1918	271,495.24	
1919	1,756,149.60	
1920	2,564,846.88	$484,999.06
1921	2,687,053.27	1,446,622.73
1922	1,958,855.41	821,912.91
1923	1,305,903.61	1,834,769.09
1924	1,692,437.05	3,704,939.89
1925	1,939,903.32	$3,619,411.98
1926	1,938,693.00	2,499,728.57
Special (unclaimed by Montana)	17,380.00	
1927	1,935,890.00	2,075,554.16
1928	1,926,772.00	
	20,131,127.00	16,487,938.39
Total Federal aid received by Indiana		$16,487,938.39
Federal aid under contract for construction (not collected)	$3,231,724.37	
Federal aid allocated to projects not under contract for construction	175,980.06	
Federal aid not allocated to projects	235,484.18	
		3,643,188.61
Total Federal aid apportioned to Indiana		20,131,127.00

The above figures and tables relating to Indiana were given me by John D. Williams, director of the State Highway Commission of Indiana.

I know of no one thing that has done more in improving conditions in the State of Indiana than has the improvement of its roads. And I think what is true of that State is true of all States. It has brought the farmers closer to the markets. It has opened up many sections of country to development that were practically inaccessible before good roads were built through those sections. Many sections of the country, where but a few years ago farmers had difficulty in marketing their crops and livestock on account of the condition of the highways, to-day are putting their products and livestock in the markets 25, 50, and more miles away by use of trucks going over good roads to these markets. Schools are being consolidated and the school children carried in automobiles to the schools; rural-mail routes are going over these roads carrying daily papers and other mail to the citizens of the rural districts in automobiles in about one-half of the time that it took the mail carrier of a few years ago to deliver mail on these routes with the horse-drawn vehicle. While the construction of good roads has brought about a wonderful improvement in the rural districts, yet this road-building program is still in its infancy. This program of Federal aid to the States in the construction of roads, begun under the act approved July 11, 1916, and continued to this date, is the one good thing, in my judgment, above all others that Congress has done for the upbuilding and improvement of the agricultural and rural districts of this country, and this date stands out as one of the great days in congressional action.

And in addition to contributing to the national wealth, I know of no appropriation that has done so much to improve conditions and bring about enlightenment as has this system of extending Federal aid to the States for road improvement. When this system was first inaugurated there was considerable opposition to the Government extending this Federal aid to the States, and some still contend that such appropriations should not be made. When conditions were different roads were constructed with the township or the county as the unit of taxation and construction. But conditions have so changed that it is necessary that the unit of taxation and construction be made larger, even larger than the State. With the township as the unit, the poorer townships are not financially able to construct roads that will accommodate the traffic of to-day. Many counties are not financially able to construct roads that will accommodate the traffic of to-day. Many States are not financially able to construct roads that will accommodate the traffic of to-day. Yet the public wants to travel through these townships, these counties, and these States that are unable financially to construct these roads, and there is no other alternative but to make the Federal Government the unit for the taxation and the construction of the main market roads. And many of the roads now are used more for the through traffic than they are used by the persons residing along the roads. For that reason it is proper and right that the Federal Government and the taxpayers of the Federal Government should bear a part of the expenditure for the construction of roads in the various States.

In Indiana the State highway commission, aided by the funds from the Federal Government, has constructed, and is constructing, the main market highways of the State. And, under our State laws, the counties and the townships are constructing roads to connect with these main market highways. On the roads built by the State Highway Commission of Indiana, the State's portion of the construction is being paid for as the roads are being constructed, and Indiana has no State bond issue for the construction of State and Federal roads, nor has the State any indebtedness for that purpose.

This same principle of finding a larger unit is recognized in many of our State school systems. In the State of Indiana, for instance, we have a law that any township or municipality, after levying and collecting a certain rate on the taxable property of that municipality, and it is found to be insufficient to maintain the schools for the length of time required by the State law, that municipality may then draw on the State funds for a sufficient amount to continue the schools for the length of time required by the school system. The State recognizes the fact that it can not permit the children of any part of the State to be deprived of the necessary training in school because of the lack of funds in that particular municipality, thus recognizing the fact that a township, or a county, is too small a unit for the school system, and the same is equally true with the road system.

Some of the larger cities, or some of the wealthier States, may contend that under this system of road building that particular city or State is paying more than its just proportion of taxes for road purposes. It may be paying out more money than it is receiving, yet these roads are bringing into that city, or that State, the products and necessaries of life from the States receiving this benefit. The mines, and the agricultural fields of the West, in many instances, are sending their products to such cities and such States. Life-insurance companies, banking institutions, manufacturing establishments, and other institutions receive much of their profits from States other than their own. And many of the stockholders, and others contributing to the profits of these institutions, are residents of other States. And it is just and equitable that these wealthier centers should contribute their pro rata part in the way of taxation to this Federal-aid system of road construction.

It has been contended by some that if this appropriation be continued at $75,000,000 annually the automobile tax should not be eliminated from the revenue bill. The automobile tax was a war-time measure, and should be eliminated. In practically all the States the user of the automobile is already paying his just proportion of the construction and maintenance of roads by paying a gas tax and a license tax. The Federal tax on the automobile is passed on to the purchaser, and makes an additional burden on the automobile user and not on the manufacturer. I am in favor of continuing the appropriation of Federal aid to the States for road construction, and I hope that many more appropriations will be made extending the life of this system for years to come.

The SPEAKER pro tempore. The question is on agreeing to the motion to suspend the rules and pass the bill.

The question was taken; and two-thirds having voted in the affirmative, the rules were suspended and the bill was passed.

ESTABLISHMENT OF NARCOTIC FARMS

Mr. GRAHAM. Mr. Speaker, I move to suspend the rules and pass with an amendment the bill H. R. 13645.

The SPEAKER pro tempore. The gentleman from Pennsylvania moves to suspend the rules and pass H. R. 13645, with amendments. The Clerk will report the bill.

The Clerk read the bill, as follows:

A bill (H. R. 13645) to establish two United States narcotic farms for the confinement and treatment of persons addicted to the use of habit-forming narcotic drugs who have been convicted of offenses against the United States, and for other purposes

Be it enacted, etc., That when used in this act—

(a) The term "habit-forming narcotic drug" or "narcotic" means opium and coca leaves and the innumerable alkaloids derived therefrom, the best known of these alkaloids being morphia, heroin, and codeine, obtained from opium, and cocaine derived from the coca plant; all compounds, salts, preparations, or other derivatives obtained either from the raw material or from the various alkaloids; Indian hemp and its various derivatives, compounds, and preparations, and peyote in its various forms.

(b) The term "addict" means any person who habitually uses any habit-forming narcotic drug as defined in this act so as to endanger the public morals, health, safety, or welfare, or who is or has been so far addicted to the use of such habit-forming narcotic drugs as to have lost the power of self-control with reference to his addiction.

SEC. 2. That the Attorney General, the Secretary of the Treasury, and the Secretary of War be, and are hereby, authorized and directed to select sites for two institutions for the confinement and treatment of persons who have been or shall be convicted of offenses against the United States, including persons convicted by general courts-martial and consular courts, and who are addicted to the use of habit-forming narcotic drugs, and for the confinement and treatment of addicts who voluntarily submit themselves for treatment.

SEC. 3. That upon selection of appropriate sites the Secretary of the Treasury shall submit to Congress estimates of the cost of purchasing same, together with estimates of the expense necessary to construct the proper buildings thereon. The Secretary of the Treasury at the same time, and annually thereafter, shall submit estimates in detail for all expenses of maintaining the said United States narcotic farms, including salaries of all necessary officers and employees.

SEC. 4. That the Secretary of the Treasury is hereby authorized to cause the plans, drawings, designs, specifications, and estimates for the remodeling or construction of the necessary buildings to be prepared in the office of the Supervising Architect, Treasury Department, and the work of remodeling or constructing the said buildings to be supervised by the field force of said office: *Provided*, That the proper appropriations for the support and maintenance of the office of the Supervising Architect be reimbursed for the cost of preparing such plans, drawings, designs, specifications, and estimates for the aforesaid work and the supervision of the remodeling and construction of said buildings.

SEC. 5. That the control and management of the United States narcotic farms shall be vested in the Secretary of the Treasury, who shall have power to appoint competent superintendents, assistant superintendents, physicians, pharmacists, psychologists, nurses, and all other officers and employees necessary for the safe-keeping, care, protection, treatment, and discipline of the inmates. There is hereby created in the office of the Surgeon General of the Bureau of the Public Health Service, in the Department of the Treasury, a division to be known as the narcotics division, which shall be in charge of a physician trained in the treatment and care of narcotic addicts, and which division shall have charge of the management, discipline, and methods of treatment of said United States narcotic farms under the rules and regulations promulgated by the Secretary of the Treasury.

SEC. 6. That the care, discipline, and treatment of the persons admitted to or confined in a United States narcotic farm shall be designed to rehabilitate them, restore them to health, and where necessary train them to be self-supporting and self-reliant. For this purpose the Secretary of the Treasury shall have authority to promulgate all necessary rules and regulations for the government of the officers and inmates of said United States narcotic farms. The Surgeon General of the Bureau of the Public Health Service shall also give the authorized representatives of each State the benefit of his experience in the administration of said United States narcotic farms and the treatment of persons confined therein through the publication and dissemination of information on methods of treatment and research in this field, together with individual and group case histories, to the end that each State may be encouraged to provide similar facilities for the care and treatment of narcotic addicts within their own jurisdiction.

SEC. 7. That the authority vested with the power to designate the place of confinement of a prisoner is hereby authorized and directed to transfer to the United States narcotic farms, as accommodations become available, all addicts, as herein defined, who are now or shall hereafter be sentenced to confinement in or be confined in any penal, correctional, disciplinary, or reformatory institution of the United States, including those addicts convicted of offenses against the United States who are confined in State and Territorial prisons, penitentiaries, and reformatories: *Provided*, That no addict shall be transferred to a United States narcotic farm who, in the opinion of the officer authorized to direct the transfer, is not a proper subject for confinement in such an institution either because of the nature of the crime he has committed, or his apparent incorrigibility. The authority vested with the power to designate the place of confinement of a prisoner is authorized to transfer from a United States narcotic farm to the institution from which he was received, or to such other institution as may be designated by the proper authority, any addict whose presence at a United States narcotic farm is detrimental to the well-being of the institution, or who does not continue to be a narcotic addict under the terms of this act. All transfers to or from a narcotic farm shall be made by the officer in charge of such farm, and the actual and necessary expenses incident to such transfers shall be paid from the appropriation for the maintenance of such farm.

SEC. 8. That it shall be the duty of each prosecuting officer, when sentence is pronounced, to report to the authority vested with the power to designate the place of confinement the name of each convicted person believed by him to be an addict, as herein defined, his reasons for such belief, and all pertinent facts bearing on such addiction, together with the nature of the offense.

SEC. 9. That the inmates of said narcotic farms shall be employed in such manner and under such conditions as the Secretary of the Treasury may direct. The Secretary of the Treasury may, in his discretion, establish industries, plants, factories, or shops for the manufacture of articles, commodities, and supplies for the United States Government; require any Government department or establishment or other institution appropriated for directly or indirectly by the Congress of the United States to purchase at current market prices as determined by the Secretary of the Treasury, or his authorized representative, such articles, commodities, or supplies as meet their specifications; and the Secretary of the Treasury shall provide for the payment to the inmates or their dependents such pecuniary earnings as he may deem proper, and establish a working-capital fund for said industries out of any funds appropriated for said narcotic farms; and said working-capital fund shall be available for the purchase, repair, or replacement of machinery or equipment, for the purchase of raw

materials and supplies, and for the employment of necessary civilian officers and employees: *Provided*, That at the opening of each regular session of Congress the Secretary of the Treasury shall make a detailed report to Congress of the receipts and expenditures made from said working-capital fund.

SEC. 10. That any inmate of said narcotic farms or any narcotic addict confined in any institution convicted of an offense against the United States shall not be eligible for parole under sections 1, 2, 3, 4, 5, 6, 7, and 8 of the act of Congress approved June 25, 1910, being an act to provide for the parole of United States prisoners, and for other purposes, or under the provisions of any act or regulation relating to parole, or receive any commutation allowance for good conduct in accordance with the provisions of the act of Congress approved June 21, 1902, and entitled "An act to regulate commutation for good conduct for United States prisoners," and the acts amendatory thereof and supplemental thereto, unless and until the Surgeon General of the Bureau of the Public Health Service shall have certified that said inmate is no longer a narcotic addict as defined by this act. When such certificate shall have been made, the board of parole of the penal, correctional, disciplinary, or reformatory institution from which such former addict was transferred may authorize his release on parole without transfer back to such institution.

SEC. 11. That not later than one month prior to the expiration of the sentence of any addict confined in a United States narcotic farm, he shall be examined by the Surgeon General of the Bureau of the Public Health Service or his authorized representative. If he believes the person to be discharged is still an addict within the meaning of this act and that he may by further treatment in a United States narcotic farm be cured of his addiction, the addict shall be informed, under such rules and regulations as the Secretary of the Treasury may promulgate, of the advisability of his submitting himself to further treatment. The addict may then apply in writing to the Secretary of the Treasury for further treatment in a United States narcotic farm for a period not exceeding the maximum length of time considered necessary by the Surgeon General of the Bureau of the Public Health Service. Upon approval of the application by the Secretary of the Treasury or his authorized agent, the addict may be given such further treatment as is necessary to cure him of his addiction: *Provided*, That if any addict voluntarily submits himself to treatment he may be confined in a United States narcotic farm for a period not exceeding the maximum amount of time estimated by the Surgeon General of the Bureau of the Public Health Service as necessary to effect a cure or until he ceases to be an addict within the meaning of this act.

SEC. 12. That any person, except an unconvicted alien, addicted to the use of habit-forming narcotic drugs, whether or not he shall have been convicted of an offense against the United States, may apply to the Secretary of the Treasury or his authorized representative for admission to a United States narcotic farm.

Any such addict shall be examined by the Surgeon General of the Bureau of the Public Health Service or his authorized agent, who shall report to the Secretary of the Treasury whether the applicant is an addict within the meaning of this act; whether he believes he may by treatment in a United States narcotic farm be cured of his addiction and the estimated length of time necessary to effect a cure, and any further pertinent information bearing on the addiction, habits, or character of the applicant. The Secretary of the Treasury may, in his discretion, admit the applicant to a United States narcotic farm. No such addict shall be admitted unless he voluntarily submits to treatment for the maximum amount of time estimated by the Surgeon General of the Bureau of the Public Health Service as necessary to effect a cure, and unless suitable accommodations are available after all eligible addicts convicted of offenses against the United States have been admitted. The Secretary of the Treasury may require any such addict voluntarily applying to pay the cost of his subsistence, care, and treatment. All such money shall be covered into the Treasury of the United States to the credit of the appropriation from which the expenditure was made: *Provided*, That if any addict voluntarily submits himself to treatment he may be confined in a United States narcotic farm for a period not exceeding the maximum amount of time estimated by the Surgeon General of the Bureau of the Public Health Service as necessary to effect a cure of the addiction or until he ceases to be an addict within the meaning of this act: *And provided further*, That any person who voluntarily submits himself for treatment at a United States narcotic farm shall not forfeit or abridge thereby any of his rights as a citizen of the United States; nor shall such submission be used against him in any proceeding in any court, and that the record of his voluntary commitment shall be confidential and not divulged.

SEC. 13. Every person convicted of an offense against the United States shall upon discharge, or upon his release on parole, from a United States narcotic farm be furnished with the gratuities and transportation authorized by law to be furnished had his discharge or release been from the penal, correctional, disciplinary, or reformatory institution to which he was sentenced or from which he was transferred.

Any court of the United States having the power to suspend the imposition or execution of sentence, and place defendants on probation under any of the existing laws, may impose as one of the conditions of such probation that the defendant, if an addict, as herein defined, shall be admitted and submit himself for treatment at a United States narcotic farm until discharged therefrom as cured. Upon the discharge of any such probationer from a United States narcotic farm, he shall be furnished with the gratuities and transportation authorized to be furnished by the act of July 3, 1926, entitled "An act to increase the clothing and cash gratuities furnished to persons discharged from prisons." The actual and necessary expense incident to transporting such probationer to such farm and to furnishing such transportation and gratuities, shall be paid from the appropriation for the maintenance of such farm: *Provided*, That where existing law vests a discretion in any officer as to the place to which transportation shall be furnished or as to the amount of clothing and gratuities to be furnished, such discretion shall be exercised by the Secretary of the Treasury with respect to addicts discharged from United States narcotic farms.

SEC. 14. Any person not authorized by law or by the Secretary of the Treasury who introduces or attempts to introduce into a United States narcotic farm or within the grounds adjoining or adjacent thereto any habit-forming narcotic drugs as defined in this act is guilty of a felony, and is punishable by confinement in the penitentiary for a period of not more than 10 years.

SEC. 15. It shall be unlawful for any person properly committed thereto to escape or attempt to escape from a narcotic farm, and any such person upon apprehension and conviction in a United States court shall be punished by imprisonment for not more than five years, such sentence to begin upon the expiration of the sentence for which said person was originally confined.

SEC. 16. It shall be unlawful for any person to procure the escape of any inmate properly committed to a narcotic farm or to advise, connive at, aid, or assist in such escape, or conceal any such inmate after such escape, and upon conviction in a United States court shall be punished by imprisonment in the penitentiary for not more than three years.

SEC. 17. Wherever an alien addict has been transferred to either of the United States narcotic farms provided for in this act, who is entitled to his discharge but is subject to deportation in lieu of being returned to the penal institution from which he came, he shall be deported by the authority vested by law with power over deportations.

The SPEAKER pro tempore. Is a second demanded?

Mr. EDWARDS. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. EDWARDS. No; I am not, but I would like to control the time.

The SPEAKER pro tempore. Is any member of the committee opposed to the bill.

Mr. O'CONNOR of New York. Mr. Speaker, I make a point of order and would like to have a ruling by the Chair. If nobody is opposed to a bill how can time be given to a Member of the House to control time in opposition to it?

Mr. O'CONNELL. We established that by precedents twice to-day.

Mr. O'CONNOR of New York. Because no one objected to it.

The SPEAKER pro tempore. The Chair will state that sometimes, when no one is opposed to a bill, but time is desired for debate, some one demands a second.

Mr. O'CONNOR of New York. I make the point of order that unless a man is opposed to the bill he is not entitled to time in opposition to it.

The SPEAKER pro tempore. The point of order is overruled. Is a second demanded?

A second was not demanded.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Pennsylvania to suspend the rules and pass the bill.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

Mr. COCHRAN of Missouri. Mr. Speaker, I ask unanimous consent to extend my remarks on the bill just passed.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. COCHRAN of Missouri. Mr. Speaker and members of the House, from a humanitarian standpoint no measure considered at this session of Congress compares with the bill (H. R. 13645) to establish two United States narcotic farms for the confinement and treatment of persons addicted to the use of habit-forming narcotic drugs who have been convicted of offenses against the United States.

The bill bears the name of the distinguished gentleman from Pennsylvania, Hon. STEPHEN G. PORTER, chairman of the Committee on Foreign Affairs. Mr. PORTER, a lawyer by profession, studied medicine for two years, and during that period, together with the extended study he has made, both in this country and abroad, obtained a knowledge of habit-forming drugs and their use which enabled him to present an argument to the Judiciary Committee that resulted in a unanimous report.

Early in the session I introduced the first bill along this line, which authorized the construction of a Federal prison hospital. Mr. Porter's bill, which was offered at a later date, embraced the ideas of the superintendent of prisons of the Department of Justice as well as his own, and therefore I immediately offered whatever assistance I might be able to render him to get action on his measure. I, too, appeared before the Judiciary Committee at the hearing.

When one realizes that 2,000 or 3,000 men and women, slaves of habit-forming drugs, will be placed on these farms and be subject to treatment and eventually cured during the period of confinement, you will readily see it is a humanitarian measure.

Notice has been served on the Congress that the great increase in the population at the Federal penitentiaries makes it imperative that either the Porter bill be enacted into law or two additional Federal penitentiaries constructed. Therefore you will see this is a move in the right direction. The capacity of the Federal penitentiaries is less than 4,000 prisoners, but statistics show at the present time we have about 7,600 prisoners, and the number is increasing monthly.

The hearings before the committee contain statements showing how far the addicts go to secure drugs as well as the various methods used. Their care is a source of great trouble to the wardens and greatly interferes with the morale of the other prisoners.

There should be no delay in securing action in the Senate on this bill and every effort should be made to send it to the President before adjournment.

The bill received the indorsement of the wardens of the penitentiaries at Leavenworth and Atlanta as well as hundreds of organizations and individuals who are interested in our social problems.

IMMIGRATION OF CERTAIN RELATIVES OF UNITED STATES CITIZENS

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent that H. R. 12816, relating to the immigration of certain relatives of United States citizens and aliens lawfully admitted to the United States, introduced by Mr. JENKINS, be laid on the table, a similar bill having been passed this afternoon.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

IMMIGRATION INSPECTORS' BILL

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent to address the House for one-half minute.

The SPEAKER. Is there objection?

There was no objection.

Mr. JOHNSON of Washington. I would like to say for the RECORD that inasmuch as the Bacharach bill, relating to pay of customs inspectors, has passed the House, I expect to bring up, either under a rule or suspension of the rules, the bill known as the immigration inspectors' bill, which is a companion bill to the Bacharach bill.

Mr. CELLER. May I ask the gentleman when he expects to bring it up?

Mr. JOHNSON of Washington. At the first opportunity, but I do this in order to serve notice on the Members and prevent the writing of a lot of letters and so gentlemen of the House may know.

RIO GRANDE FEDERAL IRRIGATION PROJECT, NEW MEXICO-TEXAS

Mr. JOHNSON of Texas. Mr. Speaker, I ask unanimous consent to take from the Speaker's table H. R. 11471, extending the time of construction payments on the Rio Grande Federal irrigation project, New Mexico-Texas, and consider it in the House as in Committee of the Whole.

The SPEAKER. Will the gentleman state that this is a matter of emergency?

Mr. JOHNSON of Texas. It is.

The SPEAKER. The gentleman from Texas asks unanimous consent to take from the Speaker's table H. R. 11471 and consider the same in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to enter into amended contracts with the Elephant Butte irrigation district of New Mexico, and El Paso County Water Improvement District No. 1, of Texas, whereby, after the payment of the first four annual installments, as now provided for in existing contracts, upon the construction charge under the Rio Grande Federal irrigation project, New Mexico-Texas, the remaining unpaid construction charge per irrigable acre shall be payable annually in installments of 5 per cent of the average gross annual acre income for the 10 calendar years 1918 to 1927, inclusive, of the area in cultivation under said project.

SEC. 2. These annual payments shall continue until the total construction charge against said districts is paid.

SEC. 3. The existing contracts between the United States and Elephant Butte Irrigation District, of New Mexico, and between the United States and El Paso County Water Improvement District No. 1 shall remain unaltered except as herein otherwise directed.

With the following committee amendment:

Page 2, line 2, after the word "of," strike out the words "5 per cent of the average gross annual acre income for the 10 calendar years 1918 to 1927, inclusive, of the area in cultivation under said project," and insert in lieu thereof the figures "$3.60."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

DISCONTINUANCE OF CERTAIN REPORTS

Mr. MACGREGOR. Mr. Speaker, I ask unanimous consent for the present consideration of a bill which I send to the Clerk's desk, it being an emergency measure.

The SPEAKER. The gentleman states it is a matter of emergency?

Mr. MACGREGOR. It is.

The SPEAKER. The gentleman from New York asks unanimous consent to take from the Speaker's table House bill 12064 and consider the same in the House as in Committee of the Whole. Is there objection?

Mr. GARNER of Texas. May I ask the gentleman if this bill was unanimously reported by the gentleman's committee?

Mr. MACGREGOR. Absolutely.

Mr. LAGUARDIA. What reports are you going to abolish?

Mr. MACGREGOR. About 80 out of 303 reports to be made to Congress which have become obsolete.

Mr. LAGUARDIA. Why do you not abolish 300 of them and leave 3?

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

H. R. 12064, Seventieth Congress, first session

A bill to discontinue certain reports now required by law to be made annually to Congress

Be it enacted, etc., That the following reports and statements now required by law to be made annually to Congress are hereby discontinued, and all acts or parts of acts herein cited as requiring the preparation and submission of such statements and reports are hereby repealed to the extent of such requirement:

REPORTS UNDER EACH EXECUTIVE DEPARTMENT AND INDEPENDENT ESTABLISHMENT

Statement of expenditures from contingent appropriations. (Rev. Stat., sec. 193, p. 30; Stats. L., vol. 18, pt. 3, p. 96; title 5, sec. 104, U. S. C.)

Detailed report of publications received and distributed. (Stat. L., vol. 28, p. 623; title 44, sec. 96, U. S. C.)

Report on aggregate number of publications issued during the preceding fiscal year; cost of paper used for such publications, cost of printing, and cost of preparation of each publication and the number of each distributed. (Stat. L., vol. 41, pt. 1, p. 1037; title 44, sec. 221, U. S. C.)

Report of travel on official business from Washington to points outside of the District of Columbia. (Stat. 5, vol. 35, pt. 1, p. 244; title 5, sec. 105, U. S. C.)

Report relative to exchange of typewriters, adding machines, and other similar labor-saving devices. (Stat. L., vol. 38, pt. 1, p. 1161; title 41, sec. 26, U. S. C.)

A statement of the buildings rented within the District of Columbia for the use of the Government, etc. (Stat. L., vol. 22, p. 552; Stat. L., vol. 27, p. 199; Stat. L., vol. 38, pt. 1, p. 3; Stat. L., vol. 41, pt. 1, p. 691; title 31, sec. 595, U. S. C.)

A statement given for each of the Government-owned buildings in the District of Columbia under the jurisdiction of each department and independent establishment, the location and valuation of each building, the purpose or purposes for which used, and the cost of care, maintenance, upkeep, and operation thereof. (Stat. L., vol. 41, pt. 1, p. 945; title 31, sec. 596, U. S. C.)

Report of money received by sales of supplies, materials, equipment, or other property purchased, acquired, or manufactured in the United States in connection with the prosecution of the war. (Stat. L., vol. 40, pt. 1, p. 548.)

That until otherwise provided by law the regular annual estimates of appropriations for expenses of the Government of the United States shall be prepared and submitted to Congress, by those charged with the duty of such preparation and submission, only in the form and at the time now required by law. (Stat. L., vol. 37, pt. 1, p. 415.)

Statement as to the condition of business in each department and independent establishment, showing whether any part of the same is in arrears, etc. (Stat. L., vol. 28, p. 808; title 31, sec. 593, U. S. C.)

Statement relative to the number of employees in each bureau and office, and the salary of each who are below a fair standard of efficiency. (Stat. L., vol. 26, p. 268; title 31, sec. 592, U. S. C.)

REPORTS UNDER THE STATE DEPARTMENT

A full list of all consular officers. (Rev. Stat., sec. 208, p. 33; title 5, sec. 163, U. S. C.)

Report of any rates or tariffs of fees to be received by diplomatic or consular officers, which may have been prescribed by the President during the preceding year. (Rev. Stat., sec. 208, p. 33; title 5, sec. 163, U. S. C.)

A statement of the names of any consular officers, not citizens of the United States, to whom salaries have been paid during the year preceding, together with the circumstances under which they were appointed. (Rev. Stat., sec. 208, p. 33; title 5, sec. 163, U. S. C.)

Report on the expenditure of the appropriation for relief of American citizens in Europe. (Public Resolutions 41 and 42, 63d Cong., 2d sess., Stat. L., vol. 38, pt. 1, 776.)

Report on the expenditure of the appropriation to provide for representation of foreign governments growing out of hostilities in Europe. (Public Resolution 48, 63d Cong., 2d sess., Stat. L., vol. 38, pt. 1, 778.)

REPORTS UNDER THE TREASURY DEPARTMENT

Statement of proceeds of sale of old material, condemned stores, supplies, and other property. (Stat. L., vol. 36, pt. 1, 773; title 31, sec. 625, U S. C.)

Report relative to rents collected in the District of Columbia from sites acquired for proposed public buildings in Washington. (Stat. L., vol. 32, pt. 1, 1213; Stat. L., vol. 35, pt. 1, 959; title 40, sec. 262, U. S. C.)

Report of rearrangement of customs districts, establishment and discontinuance of ports of entry. (Stat. L., vol. 38, pt. 1, 623; title 19, sec. 2, U. S. C.)

Report of expenses of loans and expenditures from repayments of foreign loans. (Stat. L., vol. 40, pt. 1, 37; Stat. L., vol. 40, pt. 1, 292, as amended; title 31, sec. 759, U. S. C.)

A separate annual report by the Secretary of the Treasury of the action taken under the authority contained in section 6 of the act of March 3, 1919, creating in the Treasury a cumulative sinking fund. (Stat. L., vol. 40, pt. 1, 1311; Stat. L., vol. 42, pt. 1, 1427; title 31, sec. 767, U. S. C.)

Detailed statement showing the number, designation, and annual rate of compensation of the persons employed and the amounts expended for rent and other authorized purposes in the District of Columbia from the appropriation for internal revenue. (Stat. L., vol. 41, pt. 1, 654.)

Report of the estimate of the expense of assessing and the expense of collecting the internal revenue. (Rev. Stat., sec. 3671, 722.)

Detailed report of expenditures under the appropriation "Preventing the spread of epidemic diseases." (Stat. L., vol. 40, pt. 1, 121; Stat. L., vol. 41, pt. 1, 885; title 42, sec. 109, U. S. C.)

Report of the Treasurer of the United States on the sinking fund and funded debt of the District of Columbia. (Sec. 135 of statutes relating to the District of Columbia, 43d Cong., 1873–1875.)

REPORTS UNDER THE WAR DEPARTMENT

Report by the Secretary of War of all bids, with the names of the bidders, received in response to invitations for proposals for any (Engineer Department) works or for any materials or labor for any (Engineer Department) works. (Rev. Stat., sec. 230, 37; Stat. L., vol. 14, 73; title 5, sec. 217, U. S. C.)

Report of the test of metals and other materials made with the United States testing machine at Watertown Arsenal, Mass. (Stat. L., vol. 21, 349.)

Report of the name and place of residence of each civilian engineer employed in the work of improving rivers and harbors, time employed, compensation paid, and place at and work on which employed. (Stat. L., vol. 24, 335; title 33, sec. 552, U. S. C.)

Report of leases of public property under act of July 28, 1892. (Stat. L., vol. 27, 321; title 40, sec. 303, U. S. C.)

Report of all claims exceeding $500 for damage done by United States vessels engaged in river and harbor work, etc. (Stat. L., vol. 41, pt. 1, 1015; title 33, sec. 564, U. S. C.)

Statement of all expenditures under the appropriation made by the Army appropriation act approved June 5, 1920, for the purchase of horses, etc. (Stat. L., vol. 41, pt. 1, 692; Stat. L., vol. 43, pt. 1, 901; title 10, sec. 1318, U. S. C.)

Report of transfers and sales under the provisions of the act authorizing the sale of real property no longer required for military purposes, approved June 4, 1924. (Stat. L., vol. 43, pt. 1, 387.)

Report of transfers and sales made under the provisions of the act approved March 4, 1923, authorizing the sale of real property no longer required for military purposes. (Stat. L., vol. 42, pt. 1, 1450.)

Statement of the financial and other affairs of the United States disciplinary barracks for the preceding year. (Stat. L., vol. 38, pt. 1, 1085; title 10, sec. 1453, U. S. C.)

The Secretary of War is hereby authorized to ascertain whether any of the contracts for work on river and harbor improvements entered into but not completed prior to April 6, 1917, the date of the entrance of the United States into war with Germany, have become inequitable and unjust on account of increased cost of materials, etc. (Stat. L., vol. 40, pt. 1, p. 1280.)

To submit to Congress an itemized statement and cost price thereof of certain surplus machine tools and other equipment belonging to the War Department authorized to be transferred to the Federal Board for Vocational Education without compensation therefor. (Stat. L., vol. 41, pt. 1, p. 504.)

To investigate the feasibility and to ascertain and report the cost of establishing a national military park in and about Kansas City, Jackson County, Mo., etc. (Stat. L., vol. 43, pt. 1, p. 801.)

Report of proceeds received from the operation of a public utility in connection with engineer operations in the field overseas. (Stat. L., vol. 40, pt. 1, p. 893; title 10, sec. 1287, U. S. C.)

A detailed report of all receipts and expenditures of special contingent funds collected from nonmilitary residents and transportation companies at Fort Monroe, Va. (Stat. L., vol. 28, p. 213.)

To submit to Congress a comprehensive plan for necessary permanent construction of military posts, including Camp Lewis, in the State of Washington, etc. (Stat. L., vol. 43, pt. 1, p. 487.)

Report as to the administration of the World War adjusted compensation act. (Stat. L., vol. 43, pt. 1, p. 124; title 38, sec. 617, U. S. C.)

REPORTS UNDER THE DEPARTMENT OF JUSTICE

Report of the names of all persons employed or retained as attorneys or counselors at law to assist any district attorneys in the performance of their duties, stating where and upon what business each was employed and the compensation paid to each. (Rev. Stat., sec. 385, p 64; title 5, sec. 336, U. S. C.)

Statement of all payments of expenditures during any fiscal year out of any appropriation fund subject to requisition by the Attorney General. (Stat. L., vol. 21, p. 44; title 5, sec. 335, U. S. C.)

Statement in detail showing for the preceding fiscal year the number of assistant district attorneys employed, the salaries of each; the number of clerical assistants employed for each district attorney, the salaries of each; the amount expended for necessary subsistence and actual and necessary traveling expenses of each district attorney and his assistants, etc. (Stat. L., vol. 29, p. 185; title 5, sec. 337, U. S. C.)

A report to Congress and the maintenance of a register of the Statutes of the United States and reports of the Supreme Court, showing the quantity of each kind received from the Secretary of the Interior, etc. (Rev Stat., sec. 387, p. 64; title 5, sec. 339, U. S. C.)

The Attorney General shall annually report to Congress, in detail, the items, amounts, and causes of expenditures of the contingent expenses of this department. (Stat. L., vol. 18, p. 109; title 5, sec. 334, U. S. C)

A list of all final judgments rendered under act to provide for adjudication and payment of claims arising from Indian depredations in favor of claimants, and not paid. (Stat. L., vol. 26, p. 854.)

All judgments in Indian-depredation cases in which, in his opinion, there is no evidence that any fraud, wrong, or injustice has been done to the United States. (Stat. L., vol. 28, p. 477.)

A full report of the Secretary of War and the Attorney General as to what action has been taken by them or their predecessors in office, or by any Secretary of the Interior, under the act to increase the water supply of the city of Washington, etc. (Stat. L., vol. 28, p. 402.)

REPORTS UNDER THE POST OFFICE DEPARTMENT

A report to Congress and the preparation and keeping, in proper books, of full and complete inventories and accounts of all the property belonging to the United States in the buildings, rooms, offices, and grounds occupied by the Postmaster General and under his charge, etc. (Rev Stat., sec. 397, p. 67; title 5, sec. 371, U. S. C.)

A report in each particular case of the result of his investigation of claims of postmasters for the loss of money-order funds, postal funds, postage stamps, etc., resulting from burglary, fire, etc. (Stat. L., vol. 25, p. 135, as amended; title 39, sec 49, U. S. C.)

Report of the amounts expended from the appropriation for unusual conditions for the employment of clerks and carriers at high rates, and the places at which such amounts were expended. (Stat. L., vol. 36, pt. 1, p. 1332.)

Statement of the cost of the postal establishment of the matter mailed under frank by each department and independent establishment of the Government, etc. (Stat. L., vol. 41, pt. 1, p. 1037; title 5, sec. 390, U. S. C.)

A report of the finances of the department for the preceding year, showing the amount of balance due the department at the beginning of the year, the amount of postage which accrued within the year, the amount of engagements and liabilities, and the amount actually paid during the year for carrying the mail. (Rev. Stats., sec. 413, p. 68; Stat. L., vol. 29, p. 647; title 5, sec. 387, U. S. C.)

A report of the amount expended in the department for the preceding fiscal year, including detailed statements of expenditures made from the contingent fund. (Rev. Stats., sec. 413, p. 68; Stat. L., vol. 29, p. 648; title 5, sec. 387, U. S. C.)

To report to Congress the probable cost of connecting a telegraph and telephone system with the Postal Service by some feasible plan. (Stat. L., vol. 31, p. 1104.)

REPORTS UNDER THE NAVY DEPARTMENT

Report of leases of naval lands. (Stat. L., vol. 39, pt. 1, p. 559; title 34, sec. 522, U. S. C.)

Report of adjustment of claims for damage to private property growing out of operations of naval aircraft not exceeding $250. (Stat. L., vol. 44, pt. 2, p. 1291.)

Estimates of the claims and demands chargeable upon and payable out of the naval pension fund. (Rev. Stats., sec. 3667, p. 721.)

Report of administration of World War adjusted compensation act. (Stat. L., vol. 43, pt. 1, p. 124; title 38, sec. 617, U. S. C.)

Report of adjustment of claims for damages to and loss of privately owned property occurring subsequent to April 6, 1917, for which damage or loss of men in the naval service or Marine Corps are found to be responsible. (Stat L., vol. 41, pt. 1, p. 132, title 34, sec. 600, U. S. C.)

REPORTS UNDER THE DEPARTMENT OF THE INTERIOR

Report of expenditure under "Indian schools, support," as contemplated by the act of March 2, 1887. (Stat. L., vol. 24, p. 465; title 25, sec. 299, U. S. C.)

Report of expenditures under the appropriation for "Construction, lease, purchase, repairs, and improvements of school and agency buildings." (Stat. L., vol. 36, pt. 1, p. 1060; title 25, sec. 300, U. S. C.)

Report in detail under section 17 of the act to divide Sioux Reservation, etc. (Stat. L., vol. 25, p. 895.)

Report showing cost account of all survey and allotment work on Indian reservations. (Stat. L., vol. 36, pt. 1, p. 270; title 25, sec 338, U S. C.)

Statement of the cost account of expenditures under the appropriation "Industrial work and care of timber." (Stat. L., vol. 36, pt. 1, p. 1061; title 25, sec. 301, U. S. C.)

Report of all moneys appropriated for the purpose of encouraging industry among Indians. (Stat. L., vol. 38, pt. 1, p. 587; title 25, sec. 144, U. S. C.)

Report under the provisions of the act of July 4, 1884, relative to diversion of appropriations for the pay of specific employees, etc. (Stat. L., vol. 23, p. 97.)

Report in regard to the expenditures of moneys carried on the books of this department under the title "Indian moneys, proceeds of labor." (Stat. L., vol. 22, p. 590; Stat. L., vol. 24, p. 463; title 35, sec. 155, U. S. C.)

Report regarding expenditures for cattle, Northern Cheyenne Indians, North Dakota. (Stat. L., vol. 38, pt. 1, p. 594.)

Report regarding expenditures of tribal funds of the Apache, Kiowa, and Comanche Indians, Oklahoma. (Stat. L., vol. 44, pt. 2, p. 941.)

Report regarding expenditures of tribal funds of the Confederated Bands of Utes. (Stat. L., vol. 44, pt. 2, p. 955.)

Statement of expenses incurred and paid from the tribal funds of the Chippewa Indians of Minnesota, acts of May 18, 1916, and June 5, 1924. (Stat. L., vol. 44, pt. 2, p. 954.)

Statement of traveling expenses incurred by clerks detailed from one surveyor general's office to another. (Stat. L., vol. 40, pt. 1, p. 1251.)

Report of information as to the amount disbursed in certain States and Territories for support of colleges for the benefit of agriculture and mechanic arts. (Stat. L., vol. 26, p. 419; title 7, sec. 327, U. S. C.)

Report of the withdrawals by the President of public lands in certain cases. (Stat L, vol 36, pt 1, p 848; title 43, sec. 143, U. S. C.)

Report on expenditures made under act of March 12, 1914, entitled "An act to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes," on account of property for occupany of land and improvements thereon reimbursable from funds derived from sale of lots and tracts in Alaskan town sites. (Stat. L., vol. 40, pt. 1, p. 19.)

Report under the act of March 12, 1914, entitled "An act to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes," of the proceeds of sale of material utilized for temporary work and structures in connection with the operations under said act, as well as the sale of other condemned property which has been purchased or constructed under the provisions thereof, etc. (Stat. L., vol. 41, pt. 1, p. 202.)

Statement relative to salaries and compensation of the surgeon in chief of Freedmen's Hospital, and for all other professional and other services that may be required and expressly approved by the Secretary of the Interior, etc. (Stat. L., vol. 41, pt. 1, p. 1409.)

Statement relative to patients admitted to Freedmen's Hospital for care and treatment on the payment of such reasonable charges therefor as the Secretary of the Interior shall prescribe, etc. (Stat. L., vol. 37, pt. 1, p. 172; title 24, sec. 262, U. S. C.)

Report to Congress on advisability of establishing an institution for the insane within the Territory of Alaska. (Stat. L., vol. 43, pt. 1, p. 1181.)

Detailed report of the use of the appropriation of $15,000 for encouraging industrial work among Indians of the Tongue River Reservation in Montana. (Stat. L., vol. 36, pt. 1, p. 277.)

Report to Congress of any case of hostilities by any tribe with which the United States has treaty stipulations. (Rev. Stat., sec. 2100, p. 366.)

Detailed report regarding moneys expended in the erection of hospitals provided for by the act approved August 1, 1914. (Stat. L., vol. 38, pt. 1, p. 584.)

Report to Congress in regard to claims of certain members of the Sioux Nation of Indians for damage occasioned by the destruction of their horses, etc. (Stat. L., vol. 43, pt. 1, p. 477.)

Report regarding all moneys collected to cover the cost of determining heirs of deceased Indians, etc. (Stat. L., vol. 39, pt. 1, p. 127; Stat. L., vol. 42, pt. 1, p. 1185; title 25, sec. 377, U. S. C.)

Report to Congress at the beginning of each regular session a detailed statement of the rentals received from the buildings and vacant lands condemned for the enlargement of the Capitol Grounds. (Stat. L., vol. 37, pt. 1, p. 605; Stat. L., vol. 41, pt. 1, p. 1291; title 40, sec. 174, U. S. C.)

A detailed statement showing the cost account of all survey and allotment work of reservations in Arizona and New Mexico. (Stat. L., vol. 36, pt. 1, p. 272.)

A report by the Secretary of the Treasury of estimates of the amounts of the receipts to tribal funds and expenditures which the Secretary of the Interior recommends to be made for the benefit of the Indians, from all tribal funds of Indians for the ensuing fiscal year, etc (Stat. L., vol. 39, pt. 1, p. 158; title 25, sec. 142, U. S. C.)

REPORTS UNDER THE DEPARTMENT OF AGRICULTURE

Statement of the expenditure of all appropriations for the Department of Agriculture for the preceding fiscal year. (Stat. L., vol. 39, pt. 1, p 492; title 5, sec 558, U. S. C.)

Statements immediately following estimates of each of the respective offices, bureaus, and divisions of the Department of Agriculture, showing the number of clerks employed under general appropriations in the District of Columbia, etc. (Stat. L., vol. 39, pt. 1, p. 492; title 31, sec. 617, U. S. C.)

Detailed estimates for all executive officers, clerks, and employees below the grade of clerk, indicating the salary or compensation of each, etc. (Stat. L., vol. 36, pt. 1, p. 440; Stat. L., vol. 39, pt. 1, p. 492; title 5, sec. 561, U. S. C.)

A list of the names of all persons employed, expenditures, and full particulars of means adopted and carried into effect for the suppression of contagious, etc., diseases of domestic animals under act of May 29, 1884. (Stat. L., vol. 23, p. 33; title 5, sec. 560, U. S. C.)

A statement in detail showing the number of persons employed in the meat-inspection service, the salary or per diem of each, their contingent expenses, and where employed. (Stat. L., vol. 34, p. 1265.)

A statement showing what proportion of the appropriation for rent of buildings in the District of Columbia for the use of the Department of Agriculture is paid for quarters occupied by the various branches of the department. (Stat. L., vol. 38, pt. 1, p. 1108; Stat. L., vol. 39, pt. 1, p. 469; title 5, sec. 559, U. S. C.)

Report showing the amounts expended during the preceding fiscal year from lump-sum appropriations for the purchase, maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles, etc. (Stat. L., vol. 44, pt. 2, p. 1005.)

Report covering all exchanges of vehicles during the fiscal year last closed. (Stat. L., vol. 44, pt 2, p. 1005; title 5, sec. 547, U. S. C.)

Statement showing investigations and other services conducted by Department of Agriculture which have been completed and which can be discontinued. (Stat. L. vol. 39, pt. 1, p. 492; Stat. L. vol. 41, pt. 1, p 1347; title 5, sec 562, U. S. C.)

Reports of refunds to depositors of moneys to secure the purchase price of timber or the use of land or resources of national forests, etc. (Stat. L., vol. 36, pt. 1, p. 1253; title 16, sec. 499, U. S. C.)

Report of the quantity and market value of earth, stone, and timber furnished from the national forests to the Navy Department, etc. (Stat. L. vol. 38, pt. 1, p. 1101; Stat. L. vol. 43, pt. 1, p. 1197; title 16, sec. 492, U. S. C.)

Report of moneys received as contributions for cooperative work in forest investigations, for the protection and improvement of the national forests. (Stat. L. vol. 38, pt. 1, p. 430; title 16, sec. 498, U S. C.)

Report in detail of any sum used for compensation of or payment of expenses of any officer or other person employed by any State, county, or municipal government. (Stat. L. vol. 35, pt. 1, p. 261; title 21, sec. 19, U. S. C.)

The Secretary of Agriculture shall annually make a general report of his acts to Congress and an account of all moneys received and expended by him. (Rev. Stat. sec. 528, p. 88; title 5, sec. 557, U. S. C.)

The Secretary of Agriculture shall make a report in detail to Congress of all moneys expended by him or under his direction. (Rev. Stat. sec. 529, p. 88; title 5, sec. 557, U. S. C.)

The Secretary of Agriculture shall report the place, quality, and price of seeds purchased, and the date purchased, under the appropriation for the purchase and distribution of valuable seeds. (Stat. L., vol. 41, pt. 1, p. 246.)

REPORTS UNDER THE DEPARTMENT OF COMMERCE

Report by the Coast and Geodetic Survey, showing the number and names of persons employed during the last preceding fiscal year upon the coast survey and business connected therewith. (Rev. Stat., sec. 264, p. 44; Rev. Stat., sec. 4690, p. 911; title 33, sec. 888, U. S. C.)

Report of the Bureau of Foreign and Domestic Commerce on the commercial relations of the United States. (Stat. L., vol. 28, pt 613.)

Statement showing amount required by each object of expenditure mentioned in each estimate of appropriation for the support of the Lighthouse Service, etc. (Stat. L., vol. 36, pt. 1, p. 755; title 31, sec. 618, U. S. C.)

Report of details of field employees of Bureau of Mines for service in the District of Columbia for purposes of preparing results of their field work. (Stat. L., vol. 41, pt. 1, p. 1402.)

To report to Congress on operations of Alaska Seal & Fur Co. (Stat. L., vol. 23, p. 25.)

The Governor of Alaska shall annually report to Congress on his inquiries as to seal-killing operations, and any and all violations of law by such persons, companies, or corporations authorized by the United States to kill seal or other fur-bearing animals in said district. (Stat. L., vol. 32, pt. 1, p. 322.)

REPORTS UNDER THE DEPARTMENT OF LABOR

A report by the Commissioner of Labor Statistics of the effect of the customs laws and the state of the currency in the United States on the agricultural industry, especially as to its effect on mortgage indebtedness of farmers. (Stat. L., vol. 25, p. 183; title 29, sec. 4, U. S. C.)

A report of the investigations of the causes of and the facts relating to all controversies and disputes between employers and employees as they occur, and which may tend to interfere with the welfare of the people of the different States. (Stat. L., vol. 25, p. 183; title 29, sec. 4, U. S. C.)

A detailed report of the expenditures for the appropriation "Miscellaneous expenses, Bureau of Naturalization." (Stat. L., vol. 35, pt. 1, p. 983; title 8, sec. 355, U. S. C.)

UNDER THE INTERSTATE COMMERCE COMMISSION

A statement showing, in detail, expenditures for the fiscal year, including the number of persons employed and the amount of compensation to each. (Stat. L., vol. 25, p. 530; title 49, sec. 56, U. S. C.)

A complete statement showing the employments under all appropriations made for the valuation of carriers, etc. (Stat. L., vol. 38, pt. 1, p. 1140; title 49, sec. 54, U. S. C.)

UNDER THE GENERAL ACCOUNTING OFFICE

A report by the Comptroller General of the United States consisting of an abstract of all money received and expended by every collector, comptroller, and surveyor of customs. (Rev. Stat., sec. 2639; Stat. L., vol. 28, p. 210; title 19, sec. 42, U. S. C.)

UNDER THE WAR FINANCE CORPORATION

Quarterly reports of the War Finance Corporation. (Stat. L., vol. 40, pt. 1, p. 512; title 15, sec 347, U. S. C.)

UNDER THE LIBRARY OF CONGRESS

A report of the number and decription of copyright publications for which entries have been made during the year. (Rev. Stat., sec. 4951, p. 957.)

A detailed report of the officers or employees of the Library of Congress who have traveled on official business from Washington to points outside of the District of Columbia, etc. (Stat. L., vol. 35, pt. 1, p. 244.)

A report giving the aggregate number of the various publications issued by the Library of Congress during the preceding fiscal year, etc. (Stat. L., vol. 41, pt. 1, p. 1037.)

UNDER THE ARCHITECT OF THE CAPITOL

Statement relative to the transfer of apparatus, appliances, equipments, and supplies of any kind, to other branches of the service of the United States or District of Columbia, etc. (Stat. L., vol. 37, pt. 1, p. 184; title 40, sec. 171, U. S. C.)

UNDER THE OFFICERS OF THE SENATE AND HOUSE OF REPRESENTATIVES

Reports by the Secretary of the Senate, the Clerk of the House of Representatives, the Sergeant at Arms, the Postmasters of the Senate and House of Representatives, and the Doorkeeper of the House of Representatives, containing a full and complete account of all property belonging to the United States in their possession, etc. (Rev. Stat., sec. 72, p. 14; title 2, sec. 116, U. S. C.)

Reports by the Clerk and Doorkeeper of the House and the Secretary and Sergeant at Arms of the Senate, of the sales of waste paper and useless documents and condemned furniture, etc. (Stat. L., vol. 22, p. 337; title 2, sec. 11, U. S. C.)

UNDER THE NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS

A report of the doings under section 4833, Revised Statutes, as amended, relative to outdoor relief and use of funds in case of fire. (Stat. L., vol. 28, p. 492; title 24, sec. 133, U. S. C.)

A detailed statement of the expense of the Board of Managers of the National Home for Disabled Volunteer Soldiers. (Stat. L., vol. 27, p. 384; title 24, sec. 123, U. S. C.)

UNDER THE GOVERNMENT OF THE DISTRICT OF COLUMBIA

Report of expenditures from the appropriations for contingent expenses of the government of the District of Columbia for the next preceding fiscal year. (Stat. L., vol. 32, pt. 1, p. 595.)

Statement immediately following the estimates for each of the respective offices or departments, showing in detail the number of persons other than day laborers who were employed on regular and continuous work for 30 days or more during the fiscal year, etc. (Stat. L., vol. 32, pt. 1, p. 594.)

Report of any failure on the part of gas companies in the District of Columbia to make reasonable extensions of their gas mains whenever they shall be necessary for maintaining street lamps for the public safety and comfort. (Stat. L., vol. 27, p. 544.)

MISCELLANEOUS

Acts of the Philippine Legislature. (Stat. L., vol. 32, pt. 1, p. 712; Stat. L., vol. 39, pt. 1, p. 551; title 48, sec. 1054, U. S. C.)

128. Acts and resolutions of the Legislature of Porto Rico. (Stat. L., vol. 31, p. 83; Stat. L., vol. 39, pt. 1, p. 961; title 48, sec. 826, U. S. C.)

SEC. 2. Section 4 of the river and harbor act, approved June 25, 1910, as amended by section 9 of the river and harbor act, approved June 5, 1920, is hereby amended to read as follows:

"SEC. 4. To submit a report for consideration of Congress of all claims exceeding $500 for damages done by United States vessels engaged on river and harbor work, by collision with vessels privately owned, with piers and other legal structures, and for damage done to privately owned property in the prosecution of such work, which may be adjudged and settled under section 9 of the river and harbor act of June 5, 1920."

With the following committee amendments:

Page 1, line 4, after the word "made," strike out the word "annually."

Line 6, after the word "the," strike out the words "preparation and."

Page 8, after line 3, strike out all of lines 4, 5, 6, and 7.

Page 9, line 6, strike out "etc." and insert in lieu thereof "and so forth."

Page 11, line 4, after the word "Congress," strike out the word "and" and insert the word "on."

Page 16, after line 23, strike out lines 24, 25, and 26.

Page 20, line 22, after the figures "1265" insert the words "title 21, section 93, U. S. C.)."

Page 23, line 2, strike out the word "quality" and insert the word "quantity."

Page 23, line 15, after the word "volume," strike out the figures "28" and insert "18," and after the word "page," strike out the figures "613" and insert the figures "352" and insert the words "title 15, section 178, U. S. C.)."

Page 24, line 9, after the word "volume," strike out the figures "32" and insert the figures "31."

Page 27, after line 16, strike out lines 17, 18, 19, and 20.

Page 28, after line 20, strike out lines 21, 22, 23, and 24.

Page 29, strike out lines 1 to 8, inclusive.

Page 29, add the following:

"SEC. 2. Every executive department and independent establishment of the Government shall, upon request of the Committee on Expenditures in the Executive Departments, or of any seven members thereof, furnish any information requested of it relating to any matter within the jurisdiction of said committee.

"SEC. 3. Section 3220, Revised Statutes (title 26, sec. 149, p. 737, U. S. C.), as amended, is amended to read as follows:

"'Refundments; taxes and penalties: The Commissioner of Internal Revenue, subject to regulations prescribed by the Secretary of the Treasury, is authorized to remit, refund, and pay back all taxes erroneously or illegally assessed or collected, all penalties collected without authority, and all taxes that appear to be unjustly assessed or excessive in amount, or in any manner wrongfully collected; also to repay to any collector or deputy collector the full amount of such sums of money as may be recovered against him in any court, for any internal-revenue taxes collected by him, with the cost and expense of suit; also all damages and cost recovered against any assessor, assistant assessor, collector, deputy collector, agent, or inspector, in any suit brought against him by reason of anything done in the due performance of his official duty, and shall make report to Congress, by internal-revenue districts and alphabetically arranged of all refunds in excess of $500, at the beginning of each regular session of Congress of all transactions under this section.'"

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

IMMIGRATION INSPECTION SERVICE

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent to call up the bill (S. 2370) to amend section 24 of the immigration act of 1917, and I will say to the membership that this is the so-called inspectors' pay bill. It is a Senate bill. It has not been amended by the House committee. It makes an adjustment and classification of the Immigration Inspection Service and is a bill that should pass. From time to time, when the House Committee on Immigration has endeavored to secure appropriations directly for the Immigration Inspection Service, members of the Appropriations Committee, including the late chairman, Mr. Madden, the gentleman from Alabama [Mr. OLIVER], and the gentleman from Pennsylvania [Mr. SHREVE] have asked us to report an authorization bill. This is it.

Mr. SNELL. Is this the bill for which we granted a special rule?

Mr. JOHNSON of Washington. Yes; and a much-needed measure.

The SPEAKER. The gentleman from Washington asks unanimous consent for the present consideration of the bill S. 2370, which the Clerk will report.

The Clerk read the title of the bill.

Mr. GARNER of Texas. Mr. Speaker, may I ask whether this is a Senate bill identical with a House bill?

Mr. JOHNSON of Washington. It is a Senate bill that has been reported out by the House committee without change.

Mr. GARNER of Texas. Was it a unanimous report from the gentlemans' committee?

Mr. JOHNSON of Washington. Yes.

Mr. SNELL. And there was a unanimous report from the Rules Committee?

Mr. LAGUARDIA. Reserving the right to object, may I ask the chairman of the Committee on Immigration, now that he has classified the inspectors and graded their salary, what is the intention of the committee as to interpreters, clerks, and guards in the Immigration Service?

Mr. JOHNSON of Washington. Let me say to the gentleman that personally I have every hope that the Welch bill, which takes care of classifications generally, will cover that phase of the situation.

Mr. LAGUARDIA. Is the gentleman studying that bill?

Mr. JOHNSON of Washington. Yes; if the Welch bill does not become a law our committee has a bill ready for the reorganization and pay in the Department of Labor.

Mr. LAGUARDIA. And in the event it does not pass, can we expect the gentleman's committee to take some action?

Mr. JOHNSON of Washington. Yes, without fail; but this is a necessary bill, and especially in view of the passage of the Bacharach bill for customs inspectors and others in the Customs Service.

Mr. MILLER. Reserving the right to object, why were not the clerks and the other employees of the Immigration Service included in this bill?

Mr. JOHNSON of Washington. For the reason that the Bacharach bill, the Welch bill, and this bill would clash if all brought out at the same time. The joint effort was to find a model. So we let the Welch bill take care of the minor places, and in the Senate bill we have undertaken to make more uniform the pay of the Immigration Inspection Service as compared with pay of inspectors in the Customs Service. Immigration inspectors receive no overtime. We have blocked that in the past for reasons which must be apparent.

Mr. MILLER. I can not understand how it would clash any more to include clerks, interpreters, and guards than it would to include inspectors. I am in favor of increasing the inspectors, of course.

Mr. JOHNSON of Washington. If we do not pass the Welch bill the committee has a bill taking care of the interpreters, clerks, and guards. We asked to pass this bill unamended because the Senate has passed it. We will try to take care of clerks, guards, and the like.

Mr. MILLER. I am satisfied with that assurance.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 24 of the immigration act of 1917 is hereby amended by adding the following at the end of the section:

"Immigrant inspectors shall be divided into five grades, as follows: Grade 1, salary, $2,100; grade 2, salary $2,300; grade 3, salary $2,500; grade 4, salary $2,700; grade 5, salary $3,000; and, hereafter, inspectors shall be promoted successively to grades 2 and 3 at the beginning of the next quarter following one year's satisfactory service (determined by a standard of efficiency which is to be defined by the Commissioner General of Immigration with the approval of the Secretary of Labor) in the next lower grade; not to exceed 50 per cent of the force to grades 4 and 5 for meritorious service after no less than one year's service in grades 3 and 4, respectively: *Provided further*, That promotion above grade 3 shall be at the discretion of the Secretary of Labor, upon the recommendation of the Commissioner General of Immigration: *Provided further*, That when inspectors or other employees of the Immigration Service are ordered to perform duty in a foreign country, or transferred from one station to another, in a foreign country, they shall be allowed their traveling expenses in accordance with such regulations as the Secretary of Labor may deem advisable, and they may also be allowed, within the discretion and under written orders of the Secretary of Labor, the expenses incurred for the transfer of their wives and dependent minor children; their household effects, and other personal property, not exceeding in all 5,000 pounds, including the expenses for packing, crating, freight, and drayage thereof: *Provided further*, That the appropriation of such sum as may be necessary for the enforcement of this act is hereby authorized."

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

AIR CORPS OF THE ARMY OF THE UNITED STATES

Mr. MORIN. Mr. Speaker, by direction of the Committee on Military Affairs, I ask unanimous consent to take from the Speaker's table the bill (S. 4235) to amend section 12 of the act entitled "An act to provide more effectively for the national defense by increasing the efficiency of the Air Corps of the Army of the United States, and for other purposes," approved July 2, 1926, with House amendments, insist on the House amendments and agree to the conference asked by the Senate.

Mr. GARNER of Texas. What is the request, Mr. Speaker?

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to insist on the House amendments and agree to the conference asked by the Senate. Is there objection? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. JAMES, WAINWRIGHT, and MCSWAIN.

JAMES K. P. WELCH

Mr. MORIN. Mr. Speaker, by direction of the Committee on Military Affairs I ask unanimous consent to take from the Speaker's table the bill (H. R. 971) for the relief of James K. P. Welch, with Senate amendments, and agree to the Senate amendments.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the Senate amendments.

The Senate amendments were agreed to.

Mr. SNELL. Mr. Speaker, I ask unanimous consent to lay on the table House Resolution 197 and House Resolution 199, both having been passed under suspension of the rules.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

FEDERAL PRISON CAMPS

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent for the present consideration of H. R. 11283, to establish Federal prison camps.

The SPEAKER. Does the gentleman state that it is an emergency?

Mr. CRAMTON. It has been approved by three departments and has a unanimous report from the Judiciary Committee. It will save the Government considerable money and help solve the prison-labor problem if passed at this session.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Attorney General is hereby authorized to establish, equip, maintain, and operate prison camps upon sites selected by the Attorney General, the Secretary of Agriculture, and the Secretary of the Interior. Upon written order of the Attorney General persons convicted under the laws of the United States may be transferred to such prison camps for employment upon road or trail building or any other public improvement for which Congress provides appropriations.

SEC. 2. That the act of Congress approved June 21, 1902, as amended by the act of April 27, 1906, providing for commutation for good conduct for United States prisoners, shall be applicable to prisoners transferred to the camps herein authorized; and in addition thereto each prisoner, without regard to length of sentence, shall be allowed, under the same terms and conditions as provided in the acts of Congress above referred to, a deduction from his sentence of five days for each month of actual employment in said camp.

SEC. 3. That all laws of the United States relating to the imprisonment, transfer, control, discipline, release of, or in any way affecting prisoners, except as modified by this act, shall be applicable to prisoners transferred to the camps herein authorized.

SEC. 4. That as part of the expense of operating such prison camps the Attorney General is hereby authorized and empowered to provide for the payment to the inmates or dependents upon inmates of prison camps herein authorized such pecuniary earnings as he may deem proper, under such rules and regulations as he may prescribe; and the sum of $200 is hereby fixed as a reward for the capture and return of each escaped prisoner, payable to any individual or peace officer, the pro rata cost of such reward to be charged against the earnings of each inmate of the prison camp from which the escape occurred.

SEC. 5. That the expense incident to the establishment, equipment, maintenance, and operation of prison camps shall be payable from the appropriation for support of United States prisoners, and such appropriation shall be reimbursed to the extent agreed upon by the Attorney General and the head of the department to which the appropriation for road building or such other public improvement incident to which the prison camp was established was made.

With the following committee amendments:

Page 2, line 11, after the word "discipline," insert the word "escape."

Page 2, line 20, after the word "prescribe," strike out the balance of the section.

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. CRAMTON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

MEMORIAL HIGHWAY TO MOUNT VERNON

Mr. O'CONNOR of Louisiana. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the memorial highway.

The SPEAKER. Is there objection?

There was no objection.

Mr. O'CONNOR of Louisiana. Mr. Speaker and Members of the House, I will vote for H. R. 4625, which authorizes and directs the survey, construction, and maintenance of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge across the Potomac at Washington. This project practically has the approval of the President, who is chairman of the George Washington Bi-Centenary Commission. It has the approval of the National Capitol Park and Planning Commission, the Fine Arts Commission, and the patriotic organizations of the country, such as the Daughters of the American Revolution, the United States Daughters of 1776–1812, and many splendid women and men throughout the country.

Many of my good friends in New Orleans, ladies for whom I have the highest respect and the greatest esteem and admiration, have requested me to vote for this bill. I will vote, I repeat, for this bill with the same degree of pleasure with which I voted for the Washington-Lincoln Memorial Bridge, as it was then designated. I was not impressed with the charge that was made at the time we were considering that magnificent architectural structure that the sacred names of Washington and Lincoln were being used to advance the materialistic interests of those who would build the bridge and those from whom the necessary supplies would have to be purchased. All human endeavor is based upon something that may be remotely connected and associated with what is denominated by those who are opposed to progress and advancement in art and in culture as grossly utilitarian and selfish. The same epithets, barely disguised, are being sneeringly and cynically cast at the proposed memorial highway from the Capital of the Nation to Mount Vernon. They do not impress me now any more than when hurled at the bridge bill.

I do not think that we can do too much to stimulate an interest in the finer things of life, particularly where the means employed will accomplish and serve a nobly useful purpose. We read a dead nation's history in its ruins. But to a far greater extent may we understand the composite life, the spiritual outlook and the aspirations of a living people by looking upon their monuments, their temples, and the portraits upon the walls within and upon the architecture which should symbolize the past, present, and as far as possible the future in a happy blend and gifted vision. But I hope that the American people will not crowd all of their gifts upon one altar here in Washington. I wish that the day will come when every battle field, sanctified by American blood shed for the sake of liberty and freedom, may become hallowed, consecrated spots made beautiful to the eyes of visitors by the artistic efforts of landscape gardeners endowed with a thoroughly American expression. I hope that the period is not far distant when American sculptors will be given an opportunity to express their genius through statues breathing and radiating the noble purpose that runs through American life. I trust that American architects will be able to devise and symbolize that which will express and record enduringly the romance as it began when Columbus landed on our shores on October 12, 1492, and the enormous work done in four centuries and the dauntless courage shown in building a civilization running from the far north down to the end of Patagonia and of which our own country is the very heart and soul. I can not conclude without a reference to the Plains of Chalmette, where was fought the Battle of New Orleans on January 8, 1815. It is my Carthago delenda est. Strange, is it not, my fellow Members of Congress, that unanimity is behind and in support of the care of every historical spot in America except the one upon which Americans should look with peculiar affection, with pride and with a thrill of glory, each heart murmuring to its ear, "Lest we forget."

MUSCLE SHOALS

Mr. McSWAIN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD in connection with the services of Representative LOWREY, of Mississippi, on the Muscle Shoals question.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. McSWAIN. Mr. Speaker, as a member of the Committee on Military Affairs, that has in charge the problem of trying to make some disposition of Muscle Shoals to the advantage of the Government from the point of view of national defense and from the point of view of promoting agriculture, I desire to make a brief statement respecting the contribution toward the solution of that problem that has been made by the Hon. B. G. LOWREY, of Mississippi.

This distinguished gentleman introduced a bill in the Sixty-ninth Congress looking to the organization of a Government corporation for the purpose of operating the plants at Muscle Shoals in order to fix atmospheric nitrogen and to employ the same as an ingredient in the manufacture of commercial fertilizers. Again on December 16, 1927, Representative LOWREY introduced H. R. 7744 which was very similar to his original bill but materially amplified and improved. Finally, when it appeared that it would be impossible to negotiate for a lease providing for private operation upon satisfactory terms, and after the Senate had passed the Norris bill, and after the Committee on Military Affairs had voted down all the bills before it as well as the Norris bill, it occurred to me that progress should be made, and accordingly I determined to offer to the committee a proposal which might be used as a working basis for the committee itself.

I was familiar with the history of this legislation commencing not only with the national defense act of 1916 but also with the proposal to organize a Government corporation in 1920. Of course, I was thoroughly familiar with the Ford offer and with the joint resolution setting up the joint congressional committee.

Furthermore, I was familiar with the report of the commission appointed by the President in 1925 and with its recommendations with reference to the Government operation through a Government-owned corporation.

However, when I began to cast about over the various bills and proposals that have been made during the last eight years for the solution of the Muscle Shoals problem, I found the greatest help and the most fruitful suggestions in H. R. 7744, introduced by Representative LOWREY on December 16, 1927. Accordingly I used that bill as a guide and form of outline and framework around which I grouped my own independent ideas. If you will consider the confidential committee print containing my original suggestions, you will find a very decided familiarity in the fundamental conception to the Lowrey bill, and, in fact, some of the language itself is taken fom parts of the Lowrey bill. Most especially do I give credit to our distinguished colleague, Mr. LOWREY, for the suggestion to concentrate authority for the administration of the Muscle Shoals corporation in the hands of one principal executive officer. In the Lowrey bill this chief executive was designated as "superintendent" and that word was changed to "general manager," but the conception is the same.

My proposal in the form of a committee print was before the subcommittee of five that was charged with the responsibility of drafting a bill to meet the situation as it confronted us. The committee worked hard for some time, and numerous changes were made from time to time. But a comparison of the Morin bill as it was reported to the House and as it passed the House amended and as it is now before the committee of conference between the House and the Senate, will disclose a very decided similarity to the Lowrey bill. Therefore, Mr. Speaker, I should feel remiss in my duty and unappreciative of the valuable services rendered by the distinguished and able Representative from Mississippi if I should fail to make this official and public acknowledgment of his contribution to what I hope will be a final and satisfactory solution of the long-standing and highly complicated Muscle Shoals question.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills and joint resolutions of the following titles, when the Speaker signed the same:

H. R. 7373. An act providing for the meeting of electors of President and Vice President and for the issuance and transmission of the certificates of their selection and of the result of their determination, and for other purposes;

H. R. 8546. An act authorizing an appropriation of $2,500 for the erection of a tablet or marker at Lititz, Pa., to commemorate the burial place of 110 American soldiers who were wounded in the Battle of Brandywine and died in the military hospital at Lititz;

H. R. 9495. An act to provide for the further development of agricultural extension work between the agricultural colleges in the several States receiving the benefits of the act entitled "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," approved July 2, 1862, and all acts supplementary thereto, and the United States Department of Agriculture;

H. R. 11338. An act authorizing the Kansas City Southern Railway Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Randolph, Mo.;

H. R. 11990. An act to authorize the leasing of public lands for aviation, and for other purposes;

H. J. Res. 39. Joint resolution authorizing the Secretary of War to receive, for instruction at the United States Military Academy at West Point, two Chinese subjects, to be designated hereafter by the Government of China; and

H. J. Res. 40. Joint resolution authorizing the Secretary of War to receive, for instruction at the United States Military Academy at West Point, two Siamese subjects, to be designated hereafter by the Government of Siam.

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 4229. An act to extend the time for completing the construction of a bridge across the Mississippi River near and above the city of New Orleans, La.;

S. 4401. An act authorizing Elmer J. Cook, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across Bear Creek at or near Lovel Point, Baltimore County, Md.; and

S. 4448. An act to amend section 4 of the act entitled "An act to extend the period of restrictions in lands of certain members of the Five Civilized Tribes, and for other purposes," approved May 10, 1928.

BILLS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States for his approval bills of the House of the following titles:

H. R. 457. An act to create a board of local inspectors, Steamboat Inspection Service, at Hoquiam, Wash.;

H. R. 6104. An act to amend sections 57 and 61 of the act entitled "An act to amend and consolidate the acts respecting copyright," approved March 4, 1909;

H. R. 11479. An act to reserve certain lands on the public domain in Valencia County, N. Mex., for the use and benefit of the Acoma-Pueblo Indians;

H. R. 12632. An act to provide for the eradication or control of the European corn borer; and

H. R. 13511. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

ADJOURNMENT

And then, on motion of Mr. TILSON (at 5 o'clock and 54 minutes p. m.), the House adjourned until to-morrow, Tuesday, May 22, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Tuesday, May 22, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON BANKING AND CURRENCY

(10.30 a. m.)

To amend the act approved December 23, 1913, known as the Federal reserve act; to define certain policies toward which the powers of the Federal reserve system shall be directed; to further promote the maintenance of a stable gold standard; to promote the stability of commerce, industry, agriculture, and employment; to assist in realizing a more stable purchasing power of the dollar (H. R. 11806).

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

To regulate the distribution and promotion of commissioned officers of the line of the Navy (H. R. 13683).

COMMITTEE ON COINAGE, WEIGHTS, AND MEASURES

(10 a. m.)

To establish an assay office at Dahlonega, Lumpkin County, Ga. (H. R. 12451).

Authorizing the President to present in the name of Congress a medal of honor to Clarence D. Chamberlin (H. R. 13155 and S. 3944).

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of RULE XXIV, executive communications were taken from the Speaker's table and referred as follows:

535. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Chehalis River, Wash. (H. Doc. No. 315); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

536. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of St. Lawrence River, between Odgensburg, N. Y., and Lake Ontario (H. Doc. No. 316); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

537. A letter from the Secretary of War, transmitting report from the Chief of Engineers, United States Army, on preliminary examination of Umpqua River and entrance, Oreg. (H. Doc. No. 317); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

538. A letter from the Secretary of the Navy, transmitting draft of a proposed bill "To provide for the purchase of a bronze bust of the late Lieut. James Melville Gilliss, United States Navy, to be presented to the Chilean National Observatory; to the Committee on the Library.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. CHRISTOPHERSON: Committee on the Judiciary. S. 3917. An act for the relief of the State of Florida; without amendment (Rept. No. 1787). Referred to the Committee of the Whole House on the state of the Union.

Mr. HOGG: Committee on the Post Office and Post Roads. H. R. 6865. A bill to prescribe more definitely the rates of

compensation payable to steamships of United States registry for transportation of foreign mails; with amendment (Rept. No. 1788). Referred to the Committee of the Whole House on the state of the Union.

Mr. HOGG: Committee on the Post Office and Post Roads. H. R. 6864. A bill to authorize the Postmaster General to require steamship companies to carry the mail when tendered; with amendment (Rept. No. 1789). Referred to the House Calendar.

Mr. McSWAIN: Committee on Military Affairs. H. R. 12988. A bill authorizing and directing the Secretary of War to grant certain land to the city of St. Paul, State of Minnesota; with amendment (Rept. No. 1791). Referred to the Committee of the Whole House on the state of the Union.

Mr. WAINWRIGHT: Committee on Military Affairs. H. R. 13244. A bill to make chiefs and assistant chiefs of branches of the Army eligible for appointment as general officers of the line; without amendment (Rept. No. 1792). Referred to the Committee of the Whole House on the state of the Union.

Mr. FROTHINGHAM: Committee on Military Affairs. H. R. 13825. A bill to authorize appropriations for construction at military posts, and for other purposes; without amendment (Rept. No. 1793). Referred to the Committee of the Whole House on the state of the Union.

Mr. ZIHLMAN: Committee on the District of Columbia. S. 3694. An act regulating juvenile insurance by fraternal beneficial associations in the District of Columbia; without amendment (Rept. No. 1794). Referred to the House Calendar.

Mr. ZIHLMAN: Committee on the District of Columbia. S. 3844. An act amending the fraternal beneficial association law for the District of Columbia as to payment of death benefits; with amendment (Rept. No. 1795). Referred to the House Calendar.

Mr. McSWAIN: Committee on Military Affairs. S. 3991. An act declaring certain designated purposes with respect to certain parts of Santa Rosa Island in Florida to be "public purposes" within the meaning of the proviso in section 7 of the act approved March 12, 1926, entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes"; without amendment (Rept. No. 1796). Referred to the House Calendar.

Mr. LUCE: Committee on the Library. H. J. Res. 304. A joint resolution providing for the observance and commemoration of the one hundred and fiftieth anniversary of the death of Brig. Gen. Casimir Pulaski, and establishing a commission to be known as the United States Pulaski Sesquicentennial Commission; without amendment (Rept. No. 1798). Referred to the House Calendar.

Mr. LUCE: Committee on the Library. H. R. 8109. A bill authorizing the Secretary of the Interior to erect a monument on the site of the battle between Nez Perces Indians under Chief Joseph and the command of Nelson A. Miles; with amendment (Rept. No. 1799). Referred to the Committee of the Whole House on the state of the Union.

Mr. LUCE: Committee on the Library. H. R. 12521. A bill creating the Mount Rushmore national memorial commission and defining its purpose and powers; without amendment (Rept. No. 1800). Referred to the Committee of the Whole House on the state of the Union.

Mr. LUCE: Committee on the Library. H. J. Res. 279. Joint resolution establishing a commission to formulate and submit plans for the observance of the one hundred and fiftieth anniversary of the surrender of Cornwallis at Yorktown, Va.; with amendment (Rept. No. 1801). Referred to the Committee of the Whole House on the state of the Union.

Mr. McSWAIN: Committee on Military Affairs. H. R. 12662. A bill to provide for the paving of the Government road known as the Dry Valley Road, commencing where said road leaves the La Fayette Road in the city of Rossville, Ga., and extending to Chickamauga and Chattanooga National Military Park, constituting an approach road to said park; without amendment (Rept. No. 1802). Referred to the Committee of the Whole House on the state of the Union.

Mr. McSWAIN: Committee on Military Affairs. H. R. 13033. A bill authorizing the Secretary of War to convey certain portions of the military reservation at Monterey, Calif., to the city of Monterey, Calif., for the extension of Alvarado Street; without amendment (Rept. No. 1803). Referred to the Committee of the Whole House on the state of the Union.

Mr. FROTHINGHAM: Committee on Military Affairs. H. R. 6655. A bill to authorize the transfer of surplus materials for construction of buildings at West Point; without amendment (Rept. No. 1804). Referred to the House Calendar.

Mr. McSWAIN: Committee on Military Affairs. H. R. 13174. A bill declaring certain designated purposes with respect to certain parts of Santa Rosa Island in Florida to be "public purposes" within the meaning of the proviso in section 7 of the act approved March 12, 1926, entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes"; without amendment (Rept. No. 1805). Referred to the House Calendar.

Mr. LUCE: Committee on the Library. H. R. 7452. A bill for the erection of a tablet or marker to be placed at some suitable point at Alfords Bridge in the county of Hart, State of Georgia, on the national highway between the States of Georgia and South Carolina, to commemorate the memory of Nancy Hart; with amendment (Rept. No. 1807). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII.

Mr. ARENTZ: Committee on the Public Lands. S. 4022. An act authorizing the Secretary of the Interior to lease land in Stanley County, S. Dak., to Henry A. O'Neil for a buffalo pasture; without amendment (Rept. No. 1790). Referred to the Committee of the Whole House.

Mr. McSWAIN: Committee on Military Affairs. H. R. 13458. A bill authorizing and directing the Secretary of War to sell 3,304.8 square feet of the Fort Brown Military Reservation, Brownsville, Tex., to the Gateway Bridge Co.; without amendment (Rept. No. 1797). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. SINNOTT: A bill (H. R. 13928) to authorize the Secretary of War to purchase certain property and real estate, to protect the interests of the United States, conveyed by the Charleston Industrial Corporation, of Charleston, W. Va., in trust to secure payment of certain indebtedness due to the United States; to the Committee on Military Affairs.

By Mr. ELLIOTT: A bill (H. R. 13929) to provide for the enlarging of the Capitol Grounds; to the Committee on Public Buildings and Grounds.

By Mr. BRITTEN: A bill (H. R. 13930) to authorize an appropriation for the American group of the Interparliamentary Union; to the Committee on Foreign Affairs.

By Mr. JAMES: A bill (H. R. 13931) to authorize an appropriation for the construction of a building for a radio and communication center at Bolling Field, D. C.; to the Committee on Military Affairs.

By Mr. MORIN: A bill (H. R. 13932) to increase the allowances of flying cadets of the Air Corps; to the Committee on Military Affairs.

By Mrs. ROGERS: A bill (H. R. 13933) to establish financial responsibility of persons owning and operating motor vehicles in the District of Columbia; to the Committee on the District of Columbia.

By Mr. ZIHLMAN: A bill (H. R. 13934) to provide, in the interest of public health, comfort, morals, safety, and welfare, for the discontinuance of the use as dwellings of buildings situated in the alleys of the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. BUTLER: A bill (H. R. 13935) to provide for the purchase of a bronze bust of the late Lieut. James Melville Gilliss, United States Navy, to be presented to the Chilean National Observatory; to the Committee on the Library.

By Mr. McFADDEN: A bill (H. R. 13936) to amend the second paragraph of section 4 of the Federal farm loan act, as amended; to the Committee on Banking and Currency.

Also, a bill (H. R. 13937) to amend section 29 of the Federal farm loan act, and for other purposes; to the Committee on Banking and Currency.

By Mr. HAUGEN: Joint resolution (H. J. Res. 315) authorizing appropriations for the establishment and maintenance of an agricultural experiment station in American Samoa; to the Committee on Agriculture.

By Mr. WHITE of Colorado: Resolution (H. Res. 217) for the appointment of a committee to investigate the shooting of and assault upon Jacob D. Hanson and Henry Wiltfang, respectively, and for other purposes; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred, as follows:

By Mr. ARNOLD. A bill (H. R. 13938) granting an increase of pension to Kizziah S. Casey; to the Committee on Invalid Pensions.

By Mr. BUCKBEE: A bill (H. R. 13939) granting a pension to Anna Bailey; to the Committee on Invalid Pensions.

By Mr. CORNING: A bill (H. R. 13940) granting an increase of pension to Hattie E. Lewis; to the Committee on Invalid Pensions.

By Mr. CRISP: A bill (H. R. 13941) granting an increase of pension to Anna Allen; to the Committee on Invalid Pensions.

By Mr. EATON: A bill (H. R. 13942) granting a pension to Leila Newell Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13943) granting a pension to Lydia A. P. Conover; to the Committee on Invalid Pensions.

By Mr. FREEMAN: A bill (H. R. 13944) granting an increase of pension to Hannah F. Dunn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13945) granting an increase of pension to Matilda A. Storms; to the Committee on Invalid Pensions.

By Mr. HOWARD of Nebraska: A bill (H. R. 13946) granting a pension to Mary Livingston; to the Committee on Invalid Pensions.

By Mr. HUDSON: A bill (H. R. 13947) granting an increase of pension to Marie Piatt Wilson; to the Committee on Pensions.

By Mr. JENKINS: A bill (H. R. 13948) granting a pension to Kate Davis; to the Committee on Invalid Pensions.

By Mr. JOHNSON of Oklahoma: A bill (H. R. 13949) for the relief of Grace Leedom; to the Committee on Invalid Pensions.

By Mr. LINTHICUM: A bill (H. R. 13950) for the relief of Moreau M. Casler; to the Committee on Claims.

By Mr. MAJOR of Illinois: A bill (H. R. 13951) granting a pension to Ida Vancil; to the Committee on Invalid Pensions.

By Mr. MILLIGAN: A bill (H. R. 13952) granting a pension to M. Elizabeth (Isibell) Clevenger; to the Committee on Invalid Pensions.

By Mr. WOLVERTON: A bill (H. R. 13953) granting an increase of pension to Mary A. Budd; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13954) granting an increase of pension to Annie Downing; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7733. By Mr. BOYLAN: Resolution adopted by the National Council of the Steuben Society of America, favoring the passage of Senate bill 1481; to the Committee on Immigration and Naturalization.

7734. By Mr. KOPP: Petition of V. H. Ruring and 181 other residents of Danville, Iowa, and vicinity, favoring the enactment of House bill 11410, to amend the national prohibition act; to the Committee on the Judiciary.

7735. By Mr. LINDSAY: Petition of Brooklyn Letter Carriers Association, Clerks of Union Post Office, William F. Kiernan, S. Oranski, Jos. Fogarty, C. A. Miller, Isadore Tinowitsky, Wallace L. Taylor, Louis Hackert, Charles Yost, Patrick Finn, George Young, S. Steenson, Abe Bernstein, and T. Frandon, all of Brooklyn, N. Y., and the New York Federation of Post Office Clerks, New York, N. Y., urging favorable vote to override presidential veto of the Sproul bill; to the Committee on the Post Office and Post Roads.

7736. By Mr. O'CONNELL: Petition of the Chamber of Commerce of the State of New York, opposing the passage of the Senate Joint Resolution 46, Muscle Shoals; to the Committee on Military Affairs.

7737. Also, petition of the Chamber of Commerce of the State of New York, favoring the passage in general of House bill 10802, to amend section 3 and section 484 of the tariff act of 1922 by adding certain language; to the Committee on Ways and Means.

7738. Also, petition of the American Association of Creamery Butter Manufacturers, Washington, D. C., favoring the passage of House bill 10958, amending the oleomargarine law; to the Committee on Agriculture.

7739. By Mr. YATES: Petition of Donald M. Wood, of Chicago, Ill., opposing House bills 13200, 13201, and 13203, which bills prohibit the removal of cases from State to Federal courts because of diversity of citizenship; to the Committee on the Judiciary.

7740. Also, petition from citizens of Chicago, Ill., urging the passage of House bill 11998, being a bill prohibiting experiments on living dogs; to the Committee on the Judiciary.

SENATE

TUESDAY, *May 22, 1928*

(Legislative day of Thursday, May 3, 1928)

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

EVENING SESSION FOR MUSCLE SHOALS CONFERENCE REPORT

Mr. JOHNSON obtained the floor.

Mr. NORRIS. Mr. President, will the Senator yield?

Mr. JOHNSON. For what purpose?

Mr. NORRIS. I want to submit a unanimous-consent agreement. I will say to the Senator, however, that I think under the request I am going to make it will be necessary to have a quorum called.

Mr. JOHNSON. I simply do not want to lose the floor; that is all.

Mr. NORRIS. No; I shall not try to take the floor from the Senator.

I ask unanimous consent that at not later than 5 o'clock this afternoon the Senate take a recess until 7.30 o'clock p. m.; that at the evening session there shall be no business considered except the conference report on the Muscle Shoals resolution (S. J. Res. 46); that at not later than 10.30 o'clock p. m., the Senate will vote on the conference report; and that at the conclusion of business to-night the Senate will take a recess until 11 o'clock a. m. to-morrow.

I think there ought to be a roll call before the request is submitted.

Mr. KING. Mr. President, when the quorum is called I want to make some slight suggestion with reference to the request.

Mr. NORRIS. Very well.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Edwards	McKellar	Sheppard
Barkley	Fess	McLean	Shipstead
Bayard	Fletcher	McMaster	Shortridge
Bingham	George	McNary	Simmons
Black	Gerry	Mayfield	Smith
Blaine	Gillett	Metcalf	Smoot
Blease	Glass	Moses	Steck
Borah	Goff	Neely	Steiwer
Bratton	Greene	Norbeck	Stephens
Brookhart	Hale	Norris	Swanson
Broussard	Harris	Nye	Thomas
Capper	Harrison	Oddie	Tyson
Caraway	Hawes	Overman	Vandenberg
Copeland	Hayden	Phipps	Wagner
Couzens	Heflin	Pine	Walsh, Mass.
Curtis	Johnson	Pittman	Walsh, Mont.
Cutting	Kendrick	Reed, Mo.	Warren
Dale	Keyes	Reed, Pa.	Waterman
Deneen	King	Robinson, Ark.	Wheeler
Dill	La Follette	Sackett	
Edge	Locher	Schall	

Mr. GERRY. I wish to announce that the senior Senator from Maryland [Mr. BRUCE] and the junior Senator from Maryland [Mr. TYDINGS] are necessarily detained from the Senate attending the Maryland Democratic State convention.

The VICE PRESIDENT. Eighty-two Senators having answered to their names, a quorum is present. The Senator from Nebraska [Mr. NORRIS] has proposed a unanimous-consent agreement, which the clerk will read.

The CHIEF CLERK. The Senator from Nebraska asks unanimous consent that at not later than 5 o'clock this afternoon the Senate take a recess until 7.30 o'clock p. m.; that at the evening session there shall be nothing considered except the conference report on the Muscle Shoals resolution (S. J. Res. 46); that at not later than 10.30 o'clock p. m. the Senate vote on the conference report; and that at the conclusion of business to-night the Senate take a recess until 11 o'clock a. m. to-morrow.

Mr. BLEASE. Mr. President, I object to taking the vote at 10.30. That is the only part of the request I have objection to. If that part is not changed I shall object to it all.

Mr. NORRIS. I ask the Senator if he would object if, instead of saying that we vote to-night at not later than 10.30 o'clock, we fix the time at 2 o'clock to-morrow?

Mr. BLEASE. I do not know about that. Such a plan has been tried several times before and under it one Senator would occupy the floor during most or all of the time, and nobody else

would have an opportunity to get anything in the RECORD or say anything. I have some telegrams here, and it is a matter of great importance to the people of my State, that I want to submit on this question. I want to justify my own vote; but I represent the people who sent me here in the matter and I feel that it is my duty to make this objection.

Mr. SACKETT. Mr. President, I would like to suggest instead of fixing the hour at 10.30 o'clock for the vote that we hold the session merely for a discussion of the conference report and see how we get along, and at the end of to-night's session see if we can agree upon a time to vote.

Mr. HEFLIN. And fix a time to vote this evening?

Mr. SACKETT. Yes; try to agree to-night upon a time to vote. The only point is to give everybody who wants it an opportunity to be heard.

Mr. NORRIS. I do not want to curtail anybody, but of course everyone knows that most of the Senators are extremely anxious to get away. If we prolong debate on the conference report it may interfere with their wishes.

Mr. SACKETT. I appreciate that; but in a three hours' session one Senator may use a great deal, if not all, of the time. I have no desire to filibuster on the conference report at all, but I do want to be heard on it.

Mr. NORRIS. I will submit the request, omitting from it the taking of the vote.

Mr. METCALF. I suggest that the Senator modify the request so that we can come back at 8 o'clock to-night instead of 7.30.

Mr. JOHNSON. And let us remain in session this afternoon until 5.30 rather than 5 o'clock.

Mr. NORRIS. I am willing to make that change. I am willing that the Senate shall remain in session until not later than 5.30 o'clock, and that the evening session shall commence at 8 o'clock and run until not later than 10.30.

Mr. KING. I will not ask to make it a sine qua non to the agreement, but some of us have important committees meeting to-morrow morning. As Senators know, we are trying to conclude the calendars in our committees. If we might come here at 12 o'clock to-morrow, I would have no objection to the request.

Mr. JOHNSON. Oh, let it go at 11 o'clock.

Mr. KING. I do not want to object at all, but I would be very glad if the Senator would make it 12 o'clock noon to-morrow.

Mr. NORRIS. I realize that the committees are busy, but we shall have to curtail some things in order to make progress with important measures before the Senate; and we must dispose of the conference reports if we are going to get along with the business of the Senate.

Mr. SMITH. May I join with the Senator from Utah and ask that, if possible, at least for to-morrow morning, we postpone the meeting of the Senate until 12 o'clock noon. There are some very important committees that are to meet to-morrow, and I think it would expedite matters if they were allowed to-morrow until 12 o'clock instead of 11.

Mr. MOSES. Mr. President, it is very apparent that we can not get an agreement by a mass meeting on the floor of the Senate; therefore I object. In the meantime it is possible that an agreement can be worked out.

Mr. NORRIS. Would the Senator from New Hampshire object if we should meet at 12 o'clock to-morrow?

Mr. MOSES. What I am objecting to is attempting in this way, by a mass meeting on the floor of the Senate, to work out a unanimous-consent agreement that can be done otherwise. Let the Senator proceed in the usual way with a unanimous-consent agreement and let us have an opportunity to go on with the measure that is now before the Senate.

Mr. NORRIS. Mr. President, I ask unanimous consent that at not later than 5.30 o'clock this afternoon the Senate take a recess until 8 o'clock p. m.; that at the evening session the conference report on the Muscle Shoals joint resolution (S. J. Res. 46) be taken up and considered; that the evening session shall not extend beyond 10.30 p. m.; and that at the conclusion of the evening session the Senate take a recess until 12 o'clock meridian to-morrow.

The VICE PRESIDENT. Is there objection?

Mr. BINGHAM. I object.

Mr. MOSES. If that is going to leave the Muscle Shoals conference report in the same status when we meet at 12 o'clock to-morrow as when we quit at 10.30 o'clock to-night, of course the Senator from California can not agree to it.

The VICE PRESIDENT. There is objection.

Mr. CURTIS subsequently said: Mr. President, I ask unanimous consent that the order which I send to the desk may be entered.

The PRESIDENT pro tempore. The proposed unanimous-consent agreement will be read.

The legislative clerk read as follows:

It is agreed by unanimous consent that at not later than 5.30 o'clock this afternoon the Senate take a recess until 8 o'clock p. m.; that at the evening session there shall be nothing considered except the conference report on the Muscle Shoals resolution (S. J. Res. 46); and that at not later than 10.30 o'clock p. m. the Senate take a recess until 12 o'clock meridian to-morrow.

The PRESIDENT pro tempore. Is there objection?

Mr. JOHNSON. Does the Senator from Kansas insist that we shall not meet before 12 o'clock to-morrow? I certainly want to be accommodating to everybody.

Mr. CURTIS. Two or three Senators have said they would object if we proposed to meet at 11 o'clock, and four or five others have asked that the hour of meeting be made 12 o'clock.

Mr. HEFLIN. Mr. President, I would like to say to the Senator from California that there are important committee meetings in the morning, probably the last committee meetings we will have.

Mr. JOHNSON. To-morrow?

Mr. CURTIS. Yes.

Mr. JOHNSON. Does the Senator from Alabama ask that the hour be made 12 o'clock instead of 11?

Mr. HEFLIN. I would prefer it.

Mr. JOHNSON. I shall make no objection if that be the universal desire.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the unanimous-consent agreement is entered into.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed without amendment the following bills and joint resolution of the Senate:

S. 1284. An act amending the act approved April 30, 1926, entitled "An act amending the act entitled 'An act providing for a comprehensive development of the park and playground system of the National Capital,' approved June 6, 1924";

S. 1369. An act to authorize and direct the survey, construction, and maintenance of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge across the Potomac River at Washington;

S. 2327. An act to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes;

S. 2370. An act to amend section 24 of the immigration act of 1917;

S. 2542. An act for the construction of a private conduit across Lincoln Road NE., in the District of Columbia;

S. 2823. An act amending the statutes of the United States with respect to reissue of defective patents;

S. 2972. An act for the further protection of fish in the District of Columbia, and for other purposes;

S. 3693. An act authorizing the city of Council Bluffs, Iowa, and the city of Omaha, Nebr., or either of them, to construct, maintain, and operate a free highway bridge across the Missouri River between Council Bluffs, Iowa, and Omaha, Nebr.; and

S. J. Res. 97. Joint resolution authorizing the President to appoint three delegates to the Twenty-third International Congress of Americanists and making an appropriation for the expenses of such congress.

The message also announced that the House had passed the following bills and joint resolution of the Senate, severally with an amendment, in which it requested the concurrence of the Senate:

S. 1145. An act to authorize an appropriation for roads on Indian reservations;

S. 3808. An act to authorize the construction of a temporary railroad bridge across Bogue Chitto River at or near a point in township 5 south, range 13 east, St. Helena meridian, St. Tammany Parish, La.; and

S. J. Res. 5. Joint resolution to grant a preference to the wives and minor children of alien declarants in the issuance of immigration visas.

The message further announced that the House had passed the bill (S. 2535) granting to the State of New Mexico certain lands for reimbursement of the counties of Grant, Luna, Hidalgo, and Santa Fe for interest paid on railroad-aid bonds and for the payment of the principal of railroad-aid bonds issued by the town of Silver City and to reimburse said town for interest paid on said bonds, and for other purposes, with

amendments, in which it requested the concurrence of the Senate.

The message also announced that the House insisted upon its amendments to the bill (S. 4235)to amend section 12 of the act entitled "An act to provide more effectively for the national defense by increasing the efficiency of the Air Corps of the Army of the United States, and for other purposes," approved July 2, 1926, disagreed to by the Senate, agreed to the conference requested by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. JAMES, Mr. WAINWRIGHT, and Mr. MCSWAIN were appointed managers on the part of the House at the conference.

The message further announced that the House had agreed to the amendment of the Senate to the bill (H. R. 971) for the relief of James K. P. Welch.

The message also announced that the House had agreed to the concurrent resolution (S. Con. Res. 20) requesting the President of the United States to return to the Senate the bill (S. 3752) to amend section 3 of an act entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes," approved March 12, 1926.

The message further announced that the House had passed the following bills and joint resolutions, in which it requested the concurrence of the Senate:

H. R. 393. An act to provide for the fifteenth and subsequent decennial censuses;

H. R. 496. An act authorizing an appropriation for development of potash jointly by the Department of Agriculture and the Department of Commerce by improved methods of recovering potash from deposits in the United States;

H. R. 7200. An act to amend section 321 of the Penal Code;

H. R. 7346. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment thereon in claims which the Winnebago Tribe of Indians may have against the United States, and for other purposes;

H. R. 8327. An act for the relief of certain members of the Navy and Marine Corps who were discharged because of misrepresentation of age;

H. R. 9297. An act authorizing the adjustment of the boundaries of the Olympic National Forest, Wash., and for other purposes;

H. R. 9778. An act to amend an act entitled "An act providing for the revision and printing of the index to the Federal Statutes," approved March 3, 1927;

H. R. 10073. An act to change the name of Railroad Avenue between Nichols Avenue and Massachusetts Avenue;

H. R. 10157. An act making an additional grant of lands for the support and maintenance of the Agricultural College and School of Mines of the Territory of Alaska, and for other purposes;

H. R. 10435. An act providing for the extension of the time limitations under which patents were issued in the case of persons who served in the military or naval forces of the United States during the World War;

H. R. 11285. An act to establish Federal prison camps;

H. R. 11468. An act authorizing the Secretary of the Interior to execute an agreement or agreements with drainage district or districts providing for drainage, and reclamation of Kootenai Indian allotments in Idaho within the exterior boundaries of such district or districts that may be benefited by the drainage and reclamation work, and for other purposes;

H. R. 11471. An act extending the time of construction payments on the Rio Grande Federal irrigation project, New Mexico-Texas;

H. R. 12064. An act to discontinue certain reports now required by law to be made annually to Congress;

H. R. 12113. An act providing for the acquirement by the United States of privately owned lands situated within certain townships in the Lincoln National Forest, in the State of New Mexico, by exchanging therefor lands on the public domain, also within such State;

H. R. 12203. An act to authorize the designation and bonding of persons to act for disbursing officers and others charged with the disbursement of public money of the United States;

H. R. 12236. An act to provide an appropriation for the payment of claims of persons who suffered property damage, death, or personal injury due to the explosion at the naval ammunition depot, Lake Denmark, N. J., July 10, 1926;

H. R. 12250. An act to amend section 574, title 28, United States Code;

H. R. 12879. An act to repeal section 1445 of the Revised Statutes of the United States;

H. R. 12894. An act to extend the times for commencing and completing the construction of an overhead viaduct across the Mahoning River at or near Niles, Ohio;

H. R. 12938. An act for the relief of the State of Ohio;

H. R. 13109. An act to protect trade-marks used in commerce, to authorize the registration of such trade-marks, and for other purposes;

H. R. 13141. An act authorizing T. S. Hassell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Tennessee River at or near Clifton, Wayne County, Tenn.;

H. R. 13143. An act to adjust the compensation of certain employees in the Customs Service;

H. R. 13203. An act granting the consent of Congress to the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River at or near Burnside, Pulaski County, Ky.;

H. R. 13380. An act authorizing D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns to construct, maintain, and operate a bridge across the Mississippi River at or near Helena, Ark.;

H. R. 13484. An act authorizing preliminary examination of sundry streams with a view to the control of their floods, and for other purposes;

H. R. 13621. An act to authorize preparation and publication of supplements to the Code of Laws of the United States with perfecting amendments, printing of bills to codify the laws relating to the District of Columbia and of such code and of supplements thereto, and for distribution;

H. R. 13645. An act to establish two United States narcotic farms for the confinement and treatment of persons addicted to the use of habit-forming narcotic drugs who have been convicted of offenses against the United States, and for other purposes;

H. J. Res. 243. Joint resolution to provide for the striking of a medal commemorative of the achievements of Thomas A. Edison in illumining the path of progress through the development and application of inventions that have revolutionized civilization in the last century; and

H. J. Res. 268. Joint resolution requesting the President to negotiate with the nations with which there is no such agreement treaties for the protection of American citizens of foreign birth or parentage from liability to military service in such nations.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills and joint resolutions, and they were signed by the Vice President:

S. 1661. An act to authorize the Secretary of the Interior to transfer the Okanogan project, in the State of Washington, to the Okanogan irrigation district upon payment of charges stated;

S. 4229. An act to extend the time for completing the construction of a bridge across the Mississippi River near and above the city of New Orleans, La.;

S. 4401. An act authorizing Elmer J. Cook, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across Bear Creek at or near Lovel Point, Baltimore County, Md.;

S. 4448. An act to amend section 4 of the act entitled "An act to extend the period of restrictions in lands of certain members of the Five Civilized Tribes, and for other purposes," approved May 10, 1928;

H. R. 7373. An act providing for the meeting of electors of President and Vice President and for the issuance and transmission of the certificates of their selection and of the result of their determination, and for other purposes;

H. R. 8546. An act authorizing an appropriation of $2,500 for the erection of a tablet or marker at Lititz, Pa., to commemorate the burial place of 110 American soldiers who were wounded in the Battle of Brandywine and died in the military hospital at Lititz;

H. R. 9495. An act to provide for the further development of agricultural extension work between the agricultural colleges in the several States receiving the benefits of the act entitled "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," approved July 2, 1862, and all acts supplementary thereto, and the United States Department of Agriculture;

H. R. 11338. An act authorizing the Kansas City Southern Railway Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Randolph, Mo.;

H. R. 11990. An act to authorize the leasing of public lands for use as public aviation fields;

H. J. Res. 39. Joint resolution authorizing the Secretary of War to receive, for instruction at the United States Military Academy, at West Point, two Chinese subjects, to be designated hereafter by the Government of China; and

H. J. Res. 40. Joint resolution authorizing the Secretary of War to receive, for instruction at the United States Military Academy, at West Point, two Siamese subjects, to be designated hereafter by the Government of Siam.

LANDS IN NEW MEXICO

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the bill (S. 2535) granting to the State of New Mexico certain lands for reimbursement of the counties of Grant, Luna, Hidalgo, and Santa Fe for interest paid on railroad-aid bonds, and for the payment of the principal of railroad-aid bonds issued by the town of Silver City and to reimburse said town for interest paid on said bonds, and for other purposes, which were, on page 1, line 4, to strike out the words "four hundred" and insert "two hundred and fifty"; and on page 2, line 9, to strike out the words "four hundred" and insert "two hundred and fifty."

Mr. BRATTON. I move that the Senate concur in the House amendments to the bill.

The motion was agreed to.

BRIDGE ACROSS BOGUE CHITTO RIVER, LA.

The PRESIDENT pro tempore laid before the Senate the amendment of the House to the bill (S. 3808) to authorize the construction of a temporary railroad bridge across Bogue Chitto River at or near a point in township 5 south, range 13 east, St. Helena meridian, St. Tammay Parish, La., which was, on page 2, line 2, after "1926," to insert "*Provided*, That if the bridge authorized by this act shall at any time be abandoned and no longer used for railroad purposes, the same shall be removed from the river by the Lamar Lumber Co. (Inc.), or its assigns, at its or their own expense."

Mr. STEPHENS. I move that the Senate agree to the amendment of the House.

The motion was agreed to.

SITE OF FORT WAYNE, MICH., AS PUBLIC PARK

Mr. VANDENBERG. I wish to present very important petitions with a very brief word of explanation. The city of Detroit in particular and the State of Michigan in general, backed in turn by national patriotic societies, are very deeply interested in the preservation of old Fort Wayne, on the banks of the Detroit River, which is one of the last historic shrines available to commemorate the birth, defense, and development of the Northwest Territory.

There are bills pending in committees providing for the designation of Fort Wayne as a national park and museum by legislative action. If these fail, we shall hope for presidential designation if that be the only alternative. We can not afford to sacrifice this heirloom.

I present resolutions on the subject by the Continental Congress of the Daughters of the American Revolution, resolutions by the board of supervisors of Wayne County, and a brief historical summary of the vivid story of Fort Wayne, which I ask to have printed in the RECORD and referred to the Committee on Public Lands and Surveys.

There being no objection, the matter indicated was ordered to be printed in the RECORD and referred to the Committee on Public Lands and Surveys, as follows:

Resolutions adopted by the Continental Congress of the Daughters of the American Revolution asking the preservation of Fort Wayne, at Detroit, Mich.

Whereas it is important that we preserve to posterity the traditions of patriotism which have inspired Americans to noble deeds of service to God and country since the founding of our Republic; and

Whereas there is no body of men or women to whom the duty of commemorating the great Revolutionary patriots more fittingly belongs than the Daughters of the American Revolution; and

Whereas in 1842 the United States Government established on the banks of the Detroit River, in the county of Wayne, State of Michigan, a military fort named in honor of one of America's most celebrated soldier-patriots, Gen. Anthony Wayne; and

Whereas Fort Wayne has continually since that time stood as a bulwark for the protection of American liberty and as a signal that our Government is ready at all times to take the field in defense of her principles or territorial integrity; and

Whereas Fort Wayne has become associated in the hearts of all true citizens of America as a historic landmark, significant of the spirit of our resolute forefathers, whose heroic deeds made possible an American Nation, dedicated to peace and freedom; and

Whereas the Federal Government now proposes to sell the site of this historic fort, thereby risking the loss of the most outstanding landmark commemorating the early battles for the preservation of the Union; and

Whereas Representative CLARENCE J. MCLEOD, of Michigan, has introduced in the Seventieth Congress a bill, known as H. R. 12001, to provide for the preservation of Fort Wayne by the Federal Government as a national park and museum for historic relics pertaining to the winning of the Northwest Territory: Be it, therefore,

Resolved, That the Thirty-seventh Continental Congress, National Society Daughters of the American Revolution, most heartily urge the Congress of the United States to enact the above-mentioned bill, and respectfully suggest to the President of the United States the wisdom and justice of exercising the powers which now are or may hereafter be vested in him, to maintain Fort Wayne as a public park.

Resolutions petitioning Congress to make a national park and museum at Fort Wayne, adopted by the board of supervisors, county of Wayne, State of Michigan

To the Honorable the Seventieth Congress of the United States, greetings:

Whereas it is the sense of this board of supervisors for the county of Wayne that the traditions that furnish the background for the fine patriotsm of the American people should be cherished and zealously protected from the undermining influences of time in its passage; and

Whereas the site of Fort Wayne, located on the Detroit River and now within the corporate limits of the city of Detroit, has become associated in the hearts of the citizens of Wayne County and the State of Michigan as a historic landmark, significant of the pioneer struggle of our forefathers to maintain the ideals of the Republic which we now proudly proclaim as our own; and

Whereas the site of this fort was first used as a camping ground for troops assembling for the Black Hawk War in 1831 and the patriot war in 1838, and was in 1842 selected as the location for a permanent national fortification; and

Whereas upon its completion in 1851 said fort was named in honor of Maj. Gen. Anthony Wayne, a most distinguished soldier and patriot and the commanding general of the United States Army from 1792 to 1796 and whose name this county bears; and

Whereas since December 15, 1861, Fort Wayne had been continually occupied as a military post of the United States Army until its recent evacuation, as ordered by the War Department; and

Whereas by act of Congress the Secretary of War has been authorized to sell this historic military post, preference in the matter of purchase being given to the State of Michigan, the county of Wayne, or the city of Detroit, in the order named, at its appraised value; and

Whereas it is the sentiment of this board that every effort should be made to preserve Fort Wayne as a historic memorial for future generations and as a monument to the early traditions of our country, erected in a great struggle to create and protect for us our present form of government; and

Whereas Representative CLARENCE J. MCLEOD, of Michigan, has introduced in the Seventieth Congress a bill, known as H. R. 12001, to provide for the preservation of Fort Wayne as a national park and museum: Therefore be it

Resolved, That we, the undersigned, in behalf of the citizens whom we represent, most heartily urge upon your honorable body and the President of the United States the wisdom and justice of enacting H. R. 12001; and be it further

Resolved, That the Members of Congress representing the State of Michigan be, and they hereby are, urged to use every effort to secure from the Federal Government such action, inciuding the enactment of the above-mentioned bill, as will insure the use in perpetuity of the site of old Fort Wayne as a public park; and be it further

Resolved, That the clerk of this body be, and he hereby is, directed to transmit a copy of this resolution to each Member of Congress representing the State of Michigan.

HISTORIC SKETCH OF FORT WAYNE BY CONGRESSMAN CLARENCE J. M'LEOD

Fort Wayne is the last and only remaining representative of the historic forts which have occupied the site of the present city of Detroit. The story of these fortifications would include an important chapter in every struggle in the entire history of the formation and defense of the infant American Republic, which has grown into the powerful United States we claim as our own to-day.

Historians tell us that the desirability of locating a fort at or near Detroit was perceived at an early date.

Fort St. Joseph, or Du Luth, was maintained in this vicinity between the years 1686 to 1689 to secure for the French control of the river, the fur trade of the Northwest, and to keep out the British.

In 1701 Fort Pontchartrain was established here, named in honor of the colonial minister of marine at that time. This fort was partially

burned by the Indians in 1703, rebuilt by Tonty in 1718, and enlarged for the protection of immigrants in 1749.

In 1751 the name of Fort Detroit was adopted instead of Fort Pontchartrain, but the old fort was not destined to descend directly from that point to the city which bears its name to-day. On November 29, 1760, it was surrendered to the British.

In 1778, the fort still in possession of the British, the approach of an American force as far as lower Sandusky caused the building of a new redoubt, and the whole was named Fort Lernoult, in honor of the new builder.

And then came the event which has ever since marked the beginning of the stability of American frontiers and protection to life and property. It was a great joy and relief to the settlers, as well as an important event in the history of our country. On July 11, 1796, Fort Lernoult was evacuated by the British as a result of Gen. Anthony Wayne's victory over the Indians, a short distance to the southwest, and was taken over by the doughty American Colonel Hamtramck and an American force under orders from General Wayne. This victory was received with rejoicing through the entire United States, for it had international significance. It was generally thought that Britain intended to keep her grip on the Northwest Territory, contrary to the terms of the treaty she had signed following the Revolutionary War. The Indians were British allies. Therefore General Wayne's decisive victory over the Indians was regarded as a vigorous and successful effort to bring Great Britain to time and force her to abide by her treaty obligations. It also determined the future of Michigan and Wayne County, the latter being immediately thereafter created and named in honor of the illustrious general, and a few years later the fort was also given his name.

Fort Lernoult was temporarily retaken by the British in 1812, but evacuated again in 1813, occupied by General McArthur, and rechristened Fort Shelby, in honor of the brave Governor of Kentucky.

In 1826 the fort and grounds were given to the city by Congress and have since been lost sight of. From that time on the armed forces of the United States used as the site of their encampment the present site of Fort Wayne, and in 1841 a permanent post was established there.

So Fort Wayne is the only remaining representative of that long series of landmarks which meant so much to the early history of America but which have succumbed to the progress of a modern city, by very much the same process that now threatens Fort Wayne.

These old military posts represent the times in American history when security depended more upon the strength of men than the character of their equipment. They represent a passion for liberty which surmounted all obstacles and clothed self-sacrifice and death with a mantle of immortal glory. They stand for the inauguration of a new era in government. We need only ask ourselves here to-day, "Is the price of American liberty to be compared with a realtor's bid for a piece of property?"

There is something of higher significance in Fort Wayne than its intrinsic value; it is a national heritage. We spend millions to found libraries and build finely carved memorials. We labor hard to print history books which will portray accurately the struggle of our forefathers for American independence in order that our children may have a proper conception of the value of their heritage. We spend millions upon elaborate warships and machinery of defense, professing to realize at the same time that adherence to the spirit of our ancestors in America is still the most important factor in our national defense. Yet here is a bit of the cradle of American democracy in the original wood and finish, designed by our forefathers' very hands, and possessing habilaments rich in American lore. To barter away such an heirloom as Fort Wayne would be sacriligeous on the part of the Federal Government.

Detroit and Wayne County have made known their sentiments to have Fort Wayne preserved and have indicated a willingness to shoulder the burden themselves, if necessary. But they have asked, very reasonably, why they should be required to bear a heavy burden alone, through their patriotism, when the country as a whole will share equally in the fruits of Fort Wayne's preservation.

SHOOTING OF JACOB D. HANSON

Mr. COPELAND. Mr. President, I present a telegram which I have received from Mr. Harry D. Williams, of Buffalo, N. Y., a resolution passed by the Jamestown, N. Y., Lodge of Elks, and also some resolutions passed by the Ancient Order of Hibernians, of Niagara County, N. Y. I ask that the telegram and resolutions be printed in the RECORD and referred to the Committee on Commerce.

There being no objection, the telegram and resolutions were referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

BUFFALO, N. Y., *May 22, 1928.*

Hon. ROYAL S. COPELAND,
Senate Chamber, Washington, D. C.:

It seems to me that the prosecution of the Coast Guard men who recently shot worse than to death a law-abiding citizen of Niagara Falls upon Lewiston Hill while the victim was innocently proceeding to his home, as he had a constitutionally guaranteed right to do, is of small importance relatively. This part of the State which you represent has been most fruitful of desperate hold-ups by a class of men who stop at nothing. The highways are no longer safe at night, and this is often too true in daylight. The scene of the shooting is ideal for a night hold-up, and Hanson acted normally under the circumstances. The victim lies helpless, bereft of sight and reason. Is it not better, fanatics to the contrary notwithstanding, that quantity of alcohol shall be unlawfully smuggled in than that one innocent person should be killed, or, as in Hanson's case, worse? I do not advocate any let-up in the reasonable enforcement of our laws, but I do protest against a system which permits Federal employees to exercise their judgment and determine upon the spur of the instant and under excitement whether to shoot at an innocent man whom they suspect may be transporting contraband liquor. All agencies of prohibition enforcement should be limited to obtaining evidence to support a conviction of violations of the law. The Federal Constitution guarantees the life, liberty, and property of every individual, and this represents the spirit of the American people.

HARRY D. WILLIAMS.

Resolution passed by Jamestown, N. Y., Lodge No. 263, at a regular session held May 17, 1928

Whereas a prominent and respected member of this order and the secretary of Niagara Falls Lodge, No. 346, while peacefully and lawfully using the highways of this State and not engaged in any offense against the laws of the State or of the Nation, was shot by Coast Guard officers of the United States, disguised to conceal their official character, on mere suspicion that he might be a prohibition violator; and

Whereas the officers of the Federal Government are shielding and protecting such Coast Guard officers against the execution of a warrant for their arrest, lawfully sworn out by the proper officials of the State of New York, thereby thwarting the lawfully constituted authority of this State, and encouraging and protecting the lawlessness and violence which has characterized prohibition enforcement: Therefore be it

Resolved, That this lodge does demand that the Federal Government shall cease to shield such officers against the due process of law of the State of New York, and shall cease to lend encouragement and aid to lawlessness and violence within this State, and that the Grand Lodge of the Benevolent and Protective Order of Elks attest its loyalty to the principles it teaches by giving to this incident and to the indignation which it has aroused wide publicity; and by reenforcing our local efforts and demands with its active aid and cooperation; and be it further

Resolved, That copies of these resolutions be forwarded to the secretary and exalted ruler of the grand lodge; the exalted ruler of Niagara Falls Lodge, No. 346; and of all other lodges situated in the western district of New York, and that copies be also forwarded to Congressman REED, Senators WAGNER and COPELAND, United States Attorney Richard Templeton, and the district attorney of Niagara Falls County.

The above resolution was moved, duly seconded, and unanimously carried at a session of Jamestown Lodge, No. 263, B. P. O. Elks, held May 17, 1928.

Attest:
[SEAL.] G. R. BROADBERRY, *Secretary.*

DIVISION 1, NIAGARA COUNTY, NIAGARA FALLS, N. Y.,
ANCIENT ORDER OF HIBERNIANS IN AMERICA.

Preamble and resolutions condemning the shooting of Jacob D. Hanson, adopted by the Ancient Order of Hibernians of Niagara Falls, N. Y., at their meeting of May 17, 1928

Whereas we, the members of the Ancient Order of Hibernians, in common with all decent law-abiding citizens of the community, have been indescribably shocked and horrified at the ruthless and murderous shooting, and possibly fatal wounding, of Jacob D. Hanson, of this city, on the morning of May 6 in the town of Lewiston, N. Y., while about his lawful business by members of the United States Coast Guard, presumably under the unwarranted and illegal orders of their superior officers, probably dominated by some fanatical higher-ups; and

Whereas numerous shootings, assaults, bullying, and unlawful search and seizures seem to be the common practice of prohibition-enforcement officers and agents in this district, which practice is an arrogant disregard for and an abridgement of the rights and liberties of the American people, and a disgrace to the authorities that order or permit such despicably illegal and un-American methods in the enforcement of prohibition or any other law: Therefore be it

Resolved, That we, the members of the Ancient Order of Hibernians, most indignantly protest and emphatically condemn the shooting of the said Jacob D. Hanson and the shamelessly reckless use of firearms; the unlawful, unjust, and despotic interference with law-abiding citizens, either on the highways, in the streets, their homes, or places of business, and the wanton disregard for life, limb, and property which has been repeatedly shown by overzealous, irresponsible prohibition-enforcement agents, both of the Coast Guard and other governmental service; and we emphatically condemn the atrocious practice of officers and higher-ups in the prohibition-enforcement service of giving orders ille-

gally to their servile and irresponsible tools "to shoot," smash, and bully, irrespective of consequences, under the pretense of enforcing the law; and we urgently hereby request that all such illegal, cowardly, and dishonorable practice be immediately stopped, and that the guilty perpetrators of this dastardly shooting outrage and all other violations of the rights and liberties of the people be immediately punished to the full extent of the law, this to include the officers and higher-ups who gave the illegal orders "to shoot" and who by their countenancing and encouragement of such unwarranted methods are trampling on the rights of the people; and to this end we suggest that all possible efforts be made to bring both the shooters and all others responsible under the immediate jurisdiction of the courts of the State of New York, so that full justice may be done and that no condoning or whitewashing the guilty be permitted, as is apparently the practice of the Federal authorities where prohibition-enforcement officers violate the rights of the people; and as a remedy for this intolerable state of affairs we also hereby request that a thorough investigation of the whole prohibition-enforcement methods be made, with a view to amend or rescind the Volstead monstrosity, which is undermining the moral, physical, and mental abilities of a large proportion of the people and making grafters and bullies of another large portion and is a tyrannically useless burden of taxation on the people: It is further

Resolved, That copies of this be sent to the press for publication, to Senators COPELAND and WAGNER and Congressmen DEMPSEY, MEAD, and MACGREGOR for the most vigorous action within their power.

F. T. KITCHIN,
President.

AMBROSE LOMBARD,
Recording Secretary.

WORK OF SENATOR DILL FOR FARM RELIEF

Mr. SHEPPARD. Mr. President, I ask unanimous consent to have printed in the RECORD a letter written by Mr. George N. Peek, chairman of the Agricultural Conference, with offices in Washington, to Mr. A. S. Goss, master of the Washington State Grange, concerning the work and votes of Senator DILL on farm legislation during his term in the Senate.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D. C., *May 18, 1928.*

Mr. A. S. Goss,
Master Washington State Grange,
1007 Weller Street, Seattle, Wash.

MY DEAR MR. GOSS: The farmers of America are now engaged in the most momentous struggle in their history, or at least since the war of 1861–1865.

It is the age-old struggle for economic equality. It is the kind of a struggle that makes or breaks political parties. Therefore the question is bigger than partisan politics. Farmers have followed the practice since 1924 of rewarding their friends in Congress by their support and of defeating their enemies by their opposition, and this regardless of partisan politics.

This is as it should be, so in this connection you must know who are your friends in Congress. Hon. C. C. DILL, United States Senator from your State, has loyally supported the farmers in their fight and should have farmers' support for reelection.

I have written letters similar to this one to farmers in other States on behalf of both Republican and Democratic Members of Congress, so it can not fairly be said that my motives are partisan. If farmers are to secure and retain their proper place in our complicated economic scheme of things, they must place their economic interest above partisanship and stay by their friends.

I am glad to have this opportunity of writing you this letter on behalf of Senator DILL, who has been of great assistance in the fight for farm equality, and I will cheerfully answer any questions you may ask, if I can.

Sincerely yours,

GEORGE N. PEEK.

REPORTS OF COMMITTEES

Mr. SHORTRIDGE, from the Committee on Finance, to which was referred the bill (S. 3258) to amend section 300 of the World War veterans' act, 1924, as amended, reported it without amendment and submitted a report (No. 1256) thereon.

Mr. EDGE, from the Committee on Finance, to which was referred the bill (S. 4075) to adjust the compensation of certain employees in the customs service, reported it without amendment and submitted a report (No. 1257) thereon.

Mr. STEIWER, from the Committee on the Judiciary, to which was referred the joint resolution (H. J. Res. 77) concerning lands and property devised to the Government of the United States of America by Wesley Jordan, deceased, late of the township of Richland, county of Fairfield, and State of Ohio, reported it without amendment and submitted a report (No. 1258) thereon.

Mr. REED of Pennsylvania, from the Committee on Finance, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 2355) to remit the duty on a carillon of bells to be imported for Princeton University, Princeton, N. J. (Rept. No. 1259); and

A bill (S. 2907) to remit the duty on a carillon of bells to be imported for the Swedish Lutheran Church, Providence, R. I. (Rept. No. 1260).

Mr. REED of Pennsylvania also, from the Committee on Finance, to which was referred the bill (S. 793) to remit the duty on a carillon of bells imported for Grace Church, Plainfield, N. J., reported it with amendments and submitted a report (No. 1261) thereon.

Mr. SHEPPARD (for Mr. DALE), from the Committee on Commerce, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 4474) authorizing the South Carolina and the Georgia State Highway Departments to construct, maintain, and operate a toll bridge across the Savannah River at or near Burtons Ferry, near Sylvania, Ga. (Rept. No. 1264); and

A bill (S. 4487) authorizing the Uvalda Booster Club, its successors and assigns, to construct, maintain, and operate a bridge across the Altamaha River at or near Towns Bluff Ferry, connecting Montgomery and Jeff Davis Counties, Ga. (Rept. No. 1265).

Mr. MCNARY, from the Committee on Commerce, to which was referred the bill (S. 3637) to provide Federal cooperation with the States in devising means to protect valuable shore lands from damaging erosions, and for other purposes, reported it without amendment and submitted a report (No. 1267) thereon.

Mr. HOWELL, from the Committee on the Library, to which was referred the bill (H. R. 9194) authorizing the Secretary of the Interior to acquire land and erect a monument on the site of the battle between the Sioux and Pawnee Indian Tribes in Hitchcock County, Nebr., fought in the year 1873, reported it with amendments.

ENROLLED BILLS PRESENTED

Mr. GREENE, from the Committee on Enrolled Bills, reported that this day that committee presented to the President of the United States the following enrolled bills:

S. 4229. An act to extend the time for completing the construction of a bridge across the Mississippi River near and above the city of New Orleans, La.;

S. 4401. An act authorizing Elmer J. Cook, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across Bear Creek at or near Lovel Point, Baltimore County, Md.; and

S. 4448. An act to amend section 4 of the act entitled "An act to extend the period of restrictions in lands of certain members of the Five Civilized Tribes, and for other purposes," approved May 10, 1928.

HOSPITALIZATION OF WORLD WAR VETERANS

Mr. SMOOT. Mr. President——

Mr. JOHNSON. I yield to the Senator from Utah.

Mr. SMOOT. From the Committee on Finance I report back favorably, with an amendment, the bill (H. R. 12821) to authorize an appropriation to provide additional hospital, domiciliary, and out-patient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, 1924, as amended, and for other purposes, and I submit a report (No. 1255) thereon. I ask unanimous consent for the immediate consideration of the bill.

Mr. ROBINSON of Arkansas. I hope that the request will be granted.

Mr. NORRIS. I hope the Senator from New Hampshire will not object if he hears that unanimous consent is requested for its consideration.

Mr. SMOOT. If the bill shall lead to any discussion I will withdraw the request.

Mr. REED of Pennsylvania. Will the Senator from Utah yield to me?

Mr. SMOOT. I yield.

Mr. REED of Pennsylvania. This bill is reported in exactly the form in which it passed the House, with an amendment to correct one description in the State of Georgia, which does not change the sense of the bill in any way. The bill is extremely important and in the interest of the hospitalization of veterans, and it should pass at this session.

Mr. ROBINSON of Arkansas. I do not think the Senate can adjourn sine die until this bill shall have been passed.

Mr. JOHNSON. There is no objection to it.

The VICE PRESIDENT. Is there objection to the consideration of the bill? The Chair hears none.

The Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Finance with an amendment, on page 5, line 4, after the name "Dekalb," to strike out "city of Atlanta," so as to make the bill read:

Be it enacted, etc., That in order to provide sufficient hospital, domiciliary, and out-patient dispensary facilities to care for the increasing load of mentally afflicted World War veterans and to enable the United States Veterans' Bureau to care for its beneficiaries in Veterans' Bureau hospitals rather than in contract temporary facilities and other institutions, the Director of the United States Veterans' Bureau, subject to the approval of the President, is hereby authorized to provide additional hospital, domiciliary, and out-patient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, 1924, as amended, by purchase, replacement, and remodeling, or extension of existing plants, and by construction on sites now owned by the Government or on sites to be acquired by purchase, condemnation, gift, or otherwise, of such hospitals, domiciliary, and out-patient dispensary facilities, to include the necessary buildings and auxiliary structures, mechanical equipment, approach work, roads, and trackage facilities leading thereto; vehicles, livestock, furniture, equipment, and accessories; and also to provide accommodations for officers, nurses, and attending personnel; and also to provide proper and suitable recreational centers; and the Director of the United States Veterans' Bureau is authorized to accept gifts or donations for any of the purposes named herein. Such hospital and domiciliary plants to be constructed shall be of fireproof construction, and existing plants purchased shall be remodeled to be fireproof, and the location and nature thereof, whether for domiciliary care or the treatment of tuberculosis, neuropsychiatric, or general medical and surgical cases, shall be in the discretion of the Director of the United States Veterans' Bureau, subject to the approval of the President.

SEC. 2. The construction of new hospitals, domiciliary facilities, or dispensaries, or the replacement, extension, alteration, remodeling, or repair of all hospitals, domiciliary facilities, or dispensaries heretofore or hereafter constructed shall be done in such a manner as the President may determine, and he is authorized to require the architectural, engineering, constructing, or other forces of any of the departments of the Government to do or assist in such work, and to employ individuals and agencies not now connected with the Government, if in his opinion desirable, at such compensation as he may consider reasonable.

SEC. 3. For carrying into effect the preceding sections relating to additional hospitals and domiciliary and out-patient dispensary facilities there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $15,000,000, to be immediately available and to remain available until expended. That not to exceed 3 per cent of this sum shall be available for the employment in the District of Columbia and in the field of necessary technical and clerical assistants at the customary rates of compensation, exclusively to aid in the preparation of the plans and specifications for the projects authorized herein and for the supervision of the execution thereof, and for traveling expenses, field-office equipment, and supplies in connection therewith.

SEC. 4. The President is further authorized to accept from any State or other political subdivision, or from any corporation, association, individual, or individuals, any building, structure, equipment, or grounds suitable for the care of the disabled, with due regard to fire or other hazards, state of repair, and all other pertinent considerations, and to designate what department, bureau, board, commission, or other governmental agency shall have the control and management thereof.

SEC. 5. The director is hereby authorized to construct and maintain on hospital reservations of the bureau garages for the accommodation of privately owned automobiles of employees at such hospitals. Employees using such garages shall make such reimbursement therefor as the director may deem reasonable. Money received from the use of such garages shall be covered into the Treasury of the United States as miscellaneous receipts.

SEC. 6. The Director of the United States Veterans' Bureau is hereby authorized to sell at private sale not more than 50 acres of the hospital reservation of the United States Veterans' Hospital No. 93, Legion, Tex., the size, price, and location thereof to be determined by the director.

SEC. 7. The Director of the United States Veterans' Bureau is hereby authorized to have appraised and, after advertisement, to sell to the highest bidder or bidders, as a whole or in parcels in his discretion and on such terms as he may deem proper, the United States Veterans' Bureau hospital reservation in the county of Dekalb, State of Georgia, acquired by the United States by deed dated April 15, 1920, and to make, execute, and deliver all needful conveyances. The director shall have the right to reject any and all bids. The net proceeds of such sale or sales shall be covered into the Treasury of the United States as miscellaneous receipts.

SEC. 8. Section 4 of the act entitled "An act to authorize an appropriation to provide additional hospital and out-patient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, 1924," approved March 3, 1925 (U. S. C., title 38, sec. 438), is hereby repealed.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

ANNUAL REUNION OF UNITED CONFEDERATE VETERANS, ETC.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator from California yield to me?

Mr. JOHNSON. I yield to the Senator.

Mr. ROBINSON of Arkansas. Mr. President, recently the annual reunion of United Confederate Veterans, and an organization akin to it, the Sons of Confederate Veterans, assembled in the city of Little Rock, Ark. Congress by special act authorized the presence there and participation in concerts of the Marine Band. A resolution was adopted by that reunion expressing to the President and to the Congress the thanks of the organization for the courtesy extended and the pleasure realized from the concerts by the Marine Band. I ask leave to have that resolution printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Resolution

Whereas Calvin Coolidge, President of the United States of America, in expressing his regrets at being unable fo accept an invitation extended him by the United Confederate Veterans and the Sons of Confederate Veterans to attend the sessions of the thirty-eighth annual reunion, held in Little Rock, Ark., May 8–11, 1928, portrayed a most wonderful and magnanimous attitude toward the South, and especially toward the fast-fading lines of those who wore the gray; and

Whereas the attitude of the United States Congress in making an appropriation to defray the expenses in sending the United States Marine Band officially to us on this occasion without a single dissenting vote and without objection so beautifully reflects the altruistic spirit that dominates the Nation's thoughts and demonstrates to the world that we as a nation stand one and inseparable under the Star-Spangled Bannner for a united democracy of the people, by the people, and for the people that shall not perish from the earth: Therefore be it

Resolved, That the Sons of Confederate Veterans in convention assembled in the War Memorial Building in the city of Little Rock, Ark., express our unanimous and heartiest appreciation:

First. To President Coolidge for his most gracious letter in reply to invitations both from the veterans and the sons to be the guest of the United Confederate Veterans and allied organizations now in convention assembled;

Second. To Congress for its action in sending to us the United States Marine Band to further cheer, comfort, and make happy the scattered remnants of the southern armies;

Third. To Senator JOSEPH T. ROBINSON, Senator T. H. CARAWAY, Congressman RAGON, and to each Congressman from Arkansas, singly and collectively, for their splendid work in securing the passage of this bill through Congress; and be it further

Resolved, That a copy of these resolutions be transmitted to President Coolidge, a copy to the Congress of the United States, a copy to the Arkansas delegation through Senator ROBINSON, and a copy sent immediately to the United Confederate Veterans now assembled at Camp Foster, Little Rock, Ark.

Respectfully submitted.

JOHN L. CARTER,
Commander Arkansas Division, S. C. V.

Unanimously adopted by a standing vote this the 10th day of May. 1928.

WALTER L. HOPKINS,
Adjutant in Chief, S. C. V.

OHIO RIVER BRIDGE NEAR CUMBERLAND, W. VA.

Mr. NEELY. Mr. President, will the Senator from California yield to me?

Mr. JOHNSON. I yield to the Senator from West Virginia.

Mr. NEELY. I ask unanimous consent for the present consideration of the bill (H. R. 5475) authorizing the New Cumberland Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near New Cumberland, W. Va. It will lead to no discussion, and if it should not pass it will prevent the prosecution of a very important public work.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DISTRICT COURT, NORTHERN DISTRICT OF TEXAS

Mr. KING. From the Committee on the Judiciary I report favorably with amendments the bill (S. 3864) to create a new division of the district court of the United States for the northern district of Texas.

Mr. MAYFIELD subsequently said: Mr. President——

Mr. JOHNSON. I yield to the Senator from Texas.

Mr. MAYFIELD. I ask unanimous consent to consider the bill which was reported a few minutes ago from the Judiciary Committee by the Senator from Utah [Mr. KING]. It is a matter local to the State of Texas and will not lead to any debate at all.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on the Judiciary with amendments, on page 1, line 6, before the word "embraced," to insert "now," and in the same line, after the word "embraced," to strike out "on the 1st day of July, 1928," so as to make the bill read:

Be it enacted, etc., That there is hereby created, in addition to those now provided by law, a new division of the District Court of the United States for the Northern District of Texas, which shall include the territory now embraced in the counties of Bailey, Borden, Lamb, Floyd, Kent, Motley, Hale, Dickens, Crosby, Lubbock, Scurry, Hockley, Cochran, Yoakum, Terry, Lynn, Garza, Dawson, and Gaines, which shall constitute the Lubbock division of said district. Terms of the district court for the Lubbock division shall be held at Lubbock on the third Monday in May and the second Monday in December: *Provided*, That suitable accommodations for holding court at Lubbock shall be provided by the county or municipal authorities without expense to the United States.

The clerk of the court for the northern district shall maintain an office in charge of himself or a deputy, in addition to the places now provided, at Lubbock, which shall be kept open at all times for the transaction of the business of the court.

SEC. 2. All laws and parts of laws in conflict herewith are hereby repealed.

The amendments were agreed to.

Mr. REED of Pennsylvania. Mr. President, may we have an explanation of the bill?

Mr. KING. I reported the bill from the committee. In a word, it provides for a division of the northern judicial district in the State of Texas so as to segregate a number of counties from an existing division and permits the holding of court in those counties which have been detached.

Mr. REED of Pennsylvania. The reasons for doing so are not political, but are necessary in the administration of the courts?

Mr. KING. They are not at all political. The bill is recommended by the Department of Justice.

Mr. REED of Pennsylvania. Very well.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FUNERAL EXPENSES OF WORLD WAR VETERANS

Mr. REED of Pennsylvania. Mr. President——

Mr. JOHNSON. I yield to the Senator from Pennsylvania.

Mr. REED of Pennsylvania. Mr. President, I hope the request I am about to make will not be too much of a tax on the patience of the Senator from California, whose patience has already been taxed to the limit, I know.

From the Committee on Finance I report back favorably, without amendment, the bill (S. 2372) to amend section 201, subdivision (1), of the World War veterans' act, 1924, as amended, and I submit a report (No. 1254) thereon.

The bill provides that the Director of the Veterans' Bureau shall not be required to deduct from the $100 funeral allowance given to veterans the amount which States and municipalities themselves may contribute to such funeral expense. By a ruling of the Comptroller General the Federal allowance has been required to be reduced by the amount which States or cities may contribute to a veteran's funeral. I know the Congress never meant that to be done.

The bill also corrects a ruling of the Comptroller General to the effect that the cheapest money bid offered by an undertaker must be accepted regardless of the facilities which a higher bidder may offer in the way of ministers' services, music, and other accompaniments that go to make a dignified funeral. As the amount of the funeral allowance can not in any case exceed $100, the Senate will readily see that no extravagance is contemplated. The bill has the unanimous approval of the Finance Committee and also of the Veterans' Bureau. I ask unanimous consent for its immediate consideration.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That section 201, subdivision (1), of the World War veterans' act, 1924, as amended, is hereby amended to read as follows:

"(1) If death occur or shall have occurred subsequent to April 6, 1917, and before discharge or resignation from the service, the United States Veterans' Bureau shall pay for burial and funeral expenses and the return of body to his home a sum not to exceed $100, as may be fixed by regulation. Where a veteran of any war, including those women who served as Army nurses under contracts between April 21, 1898, and February 2, 1901, who was not dishonorably discharged, dies after discharge or resignation from the service and does not leave assets which, in the judgment of the director, should be applied to meet the expenses of burial and funeral and the transportation of the body (the decision of the director to be binding for all purposes), the United States Veterans' Bureau shall pay the following sums: For a flag to drape the casket, and after burial to be given to the next of kin of the deceased, a sum not exceeding $7; also, for burial and funeral expenses and transportation of the body (including preparation of the body) to the place of burial, a sum not exceeding $100 to cover such items and to be paid to such person or persons as may be fixed by regulations: *Provided*, That when such person dies while receiving from the bureau compensation or vocational training, the above benefits shall be payable in all cases: *Provided further*, That where such person, while receiving from the bureau medical, surgical, or hospital treatment, or vocational training, dies away from home and at the place to which he was ordered by the bureau, or while traveling under orders of the bureau, the above benefits shall be payable in all cases and in addition thereto the actual and necessary cost of the transportation of the body of the person (including preparation of the body) to the place of burial, within the continental limits of the United States, its Territories, or possessions, and including also, in the discretion of the director, the actual and necessary cost of transportation of an attendant: *Provided further*, That no accrued pension, compensation, or insurance due at the time of death shall be deducted from the sum allowed: *And provided further*, That the director may, in his discretion, make contracts for burial and funeral services within the limits of the amounts allowed herein without regard to the laws prescribing advertisement for proposals for supplies and services for the United States Veterans' Bureau: *And provided further*, That the provisions of section 3709, Revised Statutes, shall not be applied to contracts for burial and funeral expenses heretofore entered into by the director so as to deny payment for services rendered thereunder: *And provided further*, That no deduction shall be made from the sum allowed because of any contribution toward the burial which shall be made by any State, county, or municipality, but the aggregate of the sum allowed plus such contribution or contributions shall not exceed the actual cost of the burial."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DISTRICT JUDGE, NORTHERN DISTRICT OF MISSISSIPPI

Mr. STEPHENS. Mr. President, I ask the Senator from California to yield to me for a moment.

Mr. JOHNSON. I yield to the Senator from Mississippi.

Mr. STEPHENS. I ask unanimous consent for the immediate consideration of the bill (S. 1965) to authorize the appointment of a district judge for the northern district of Mississippi.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the President is hereby authorized to appoint, by and with the advice and consent of the Senate, a judge of the District Court of the United States for the Northern District of Mississippi, who shall reside in such district and whose compensation, duties, and powers shall be the same as now provided by law for other district judges.

SEC. 2. Upon the appointment of such judge, the present judge of the District Courts of the United States for the Northern and Southern Districts of Mississippi shall be the judge of the District Court of the United States for the Southern District of Mississippi. Such judge for the southern district of Mississippi shall reside in such district.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MOSES:

A bill (S. 4530) granting an increase of pension to Abbie A. Abbott (with accompanying papers); to the Committee on Pensions.

By Mr. SWANSON:

A bill (S. 4531) to improve the birthplace of George Washington at Wakefield, Westmoreland County, Va.; to the Committee on Military Affairs.

By Mr. KENDRICK:

A bill (S. 4532) to provide for the erection of a monument on the site of the Grattan massacre; to the Committee on Military Affairs.

By Mr. CUTTING:

A bill (S. 4533) to increase the minimum salary of deputy United States marshals to $2,000 per annum; to the Committee on the Judiciary.

By Mr. NORBECK:

A bill (S. 4534) to amend the Federal farm loan act, and for other purposes; to the Committee on Banking and Currency.

By Mr. McNARY:

A bill (S. 4535) authorizing the Secretary of the Interior to grant a patent to certain lands to C. Beecher Scott; to the Committee on Public Lands and Surveys.

A joint resolution (S. J. Res. 160) authorizing appropriations for the establishment and maintenance of an agricultural experiment station in American Samoa; to the Committee on Agriculture and Forestry.

By Mr. MOSES:

A joint resolution (S. J. Res. 161) authorizing the President to invite representatives of foreign governments to attend an international aeronautical conference on civil aeronautics in Washington on December 12, 13, and 14, 1928; to the Committee on Foreign Relations.

By Mr. McMASTER:

A joint resolution (S. J. Res. 162) for the appointment of O. W. Coursey, of South Dakota, as a member of the Board of Managers of the National Home for Disabled Volunteer Soldiers; to the Committee on Military Affairs.

BILL RECOMMITTED

On motion of Mr. HOWELL, the bill (H. R. 9194) authorizing the Secretary of the Interior to acquire land and erect a monument on the site of the battle between the Sioux and Pawnee Indian Tribes in Hitchcock County, Nebr., fought in the year 1873, was ordered recommitted to the Committee on the Library.

AMENDMENTS TO BOULDER DAM BILL

Mr. NEELY submitted an amendment and Mr. HAYDEN submitted sundry amendments intended to be proposed by them to the bill (S. 728) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, which were ordered to lie on the table and to be printed.

ASSISTANCE FOR INVESTIGATION OF STREET-RAILWAY MERGER IN THE DISTRICT

Mr. CAPPER submitted the following resolution (S. Res. 244), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on the District of Columbia, or any subcommittee thereof, hereby is authorized to employ during the sessions and recesses of the Seventieth Congress such expert assistance as may be deemed advisable to aid said committee, or subcommittee, in a detailed investigation of the plan of street railway merger and the unification agreement therein mentioned as embodied in Senate Joint Resolution 133.

For such purpose there is hereby authorized to be expended a sum not to exceed $10,000, to be paid from the contingent fund of the Senate upon vouchers properly approved.

PROCEEDINGS AGAINST FILM BOARDS OF TRADE

Mr. WALSH of Montana submitted the following resolution (S. Res. 245), which was referred to the Committee on the Judiciary:

Resolved, That the Senate direct the Committee on the Judiciary to inquire what proceedings are now pending before the courts upon the initiation of the Department of Justice or otherwise, or before the Federal Trade Commission, involving the acts or practices of the Film Boards of Trade; what investigations have been prosecuted leading to such proceedings and the amount expended in the same; what complaints have been made, concerning such acts or practices, with what diligence and fidelity such complaints have been investigated and proceedings to restrain or punish any unlawful or apparently unlawful acts or practices of the said Film Boards of Trade and the Famous Players-Lasky Corporation or the Famous Players-Lasky-Paramount Corporation, or of the officers, agents, or servants thereof, have been instituted or prosecuted.

INDUSTRIAL PENSIONS FOR OLD AGE AND DISABILITY

Mr. DILL. I ask unanimous consent to have printed as a Senate document some articles from magazines regarding industrial pensions for old age and disability. I may say that I have consulted with the chairman of the Committee on Printing about the matter.

The PRESIDENT pro tempore. Without objection, it is so ordered.

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that on May 21, 1928, the President approved and signed the following acts and joint resolution:

S. 766. An act to fix the compensation of registers of local land offices, and for other purposes;

S. 1341. An act to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes;

S. 1828. An act to amend the second paragraph of section 5 of the national defense act, as amended by the act of September 22, 1922, by adding thereto a provision that will authorize the names of certain graduates of the general service schools and of the Army War College, not at present eligible for selection to the General Staff Corps eligible list, to be added to that list;

S. 2084. An act for the purchase of land in the vicinity of Winnemucca, Nev., for an Indian colony, and for other purposes;

S. 2148. An act to fix standards for hampers, round-stave baskets, and splint baskets for fruits and vegetables, and for other purposes;

S. 3026. An act authorizing the construction of a fence along the east boundary of the Papago Indian Reservation, Ariz.;

S. 3365. An act to authorize allotments to unallotted Indians on the Shoshone or Wind River Reservation, Wyo.;

S. 4405. An act authorizing the Detroit River Canadian Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Detroit River at or near Stony Island, Wayne County, State of Michigan; and

S. J. Res. 129. Joint resolution to provide for eradication of pink bollworm and authorizing an appropriation therefor.

REPORT OF THE FEDERAL FARM LOAN BOARD

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to Senate Resolution 215, agreed to May 1, 1928, the eleventh annual report of the Federal Farm Loan Board for the year ended December 31, 1927, which was referred to the Committee on Banking and Currency.

ANNUAL REPORT OF THE BOY SCOUTS OF AMERICA

The PRESIDENT pro tempore laid before the Senate a communication from James E. West, chief scout executive of the Boy Scouts of America, transmitting, pursuant to law, the eighteenth annual report of the Boy Scouts of America, which was referred to the Committee on Education and Labor.

CORRUPT PRACTICES ACTS

Mr. BORAH. Mr. President, a few days ago the Senator from New Mexico [Mr. CUTTING] offered a series of bills dealing with corrupt practices in elections. I have in my hand an article appearing in the St. Louis Post-Dispatch containing a very intelligent discussion of the entire subject covered by the bills introduced by the Senator from New Mexico. I ask that the article may be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MEASURES TO CURB FRAUD AND BUYING OF ELECTIONS FRAMED BY SENATOR CUTTING—NEW MEXICO MAN PROPOSES CONSTITUTIONAL AMENDMENTS TO MAKE LEGISLATION POSSIBLE AND TO PREVENT RECURRENCE OF VARE AND SMITH SCANDALS

By Paul Y. Anderson, a Washington correspondent of the St. Louis Post-Dispatch

WASHINGTON, May 19.—An extraordinary program of legislation, designed to end corruption in the election of Presidents and Members of Congress, has been introduced by Senator BRONSON CUTTING, of New Mexico, one of the youngest Senators in the Chamber. It proposes two amendments to the Federal Constitution and three corrupt practices acts.

The acts would limit definitely the amount of money which could be spent lawfully in campaigns, name the purposes for which it would be spent, and establish a fact-finding body to determine whether those restrictions had been obeyed. The first constitutional amendment would give Congress undoubted power to regulate primaries and conventions as well as elections. The second would make ineligible for membership in Congress all candidates who had violated any law governing his nomination or election.

This far-reaching program is a direct outgrowth of the Smith and Vare cases. The proposition of seating Senator elect Frank Smith, of Illinois, was one of the first that came before the Senate after CUTTING became a Member of that body. He was surprised to discover in the course of the debate that, while Smith's election obviously had been attended by corruption on a shocking scale, apparently he had violated no law.

STARTS WORK ON BILLS

CUTTING voted to seat Smith, for the stated reason that the Senate could not logically exclude him so long as it failed to enact legislation which covered such cases. When the debate was over and Smith had been excluded, CUTTING called in several legislative experts and set at work to devise a comprehensive program of legislation which would cover the whole field of corruption in Federal elections.

Like Senator WHEELER, of Montana, CUTTING is a westerner who speaks with a pronounced Harvard accent, and like WHEELER he is bellicosely independent. He is young, wealthy, and owns an influential newspaper in Santa Fe. Prior to coming to the Senate he had used his wealth and his newspaper in supporting various causes and candidates and managed not only to have a rousing good time for himself, but to establish a unique influence throughout the State.

AUTHORITY IS LACKING

Attempts by Congress in the past to enact proper election safeguards have been partially unsuccessful because of doubts as to its constitutional authority. That situation arises from the fact that the makers of the Constitution did not foresee the kind of a political system which has grown up. National conventions, primary elections, national committees, and much of the vast and complicated machinery of politics which exists to-day have come into existence gradually. As CUTTING said to the writer:

"From the beginning all this political machinery has been more private than public. It sets up and dominates the Government, and yet it is largely outside and independent of the Government. This unofficial machinery of politics is largely at the bottom of the disrepute into which representative government has fallen. Most of the evils which menace and discredit it are found in the purely political phases of the system. It is high time this private machinery is brought under the law by proper regulation."

WOULD SETTLE DOUBTS

To accomplish that he proposes, first, an amendment to the Constitution which will remove all uncertainty as to the power of Congress to legislate with respect to primaries and conventions in which Federal officials are nominated and elected. Many Senators, including CUTTING, believe such power exists now, but undoubtedly much uncertainty surrounds it, and the Supreme Court held unconstitutional certain sections of the corrupt practices act under which Senator elect Truman Newberry, of Michigan, was convicted. CUTTING'S amendment would settle the doubt.

Next, he proposes a second amendment which would impose the penalty of ineligibility on any candidate for Senator or Representative who was found to have violated the law regulating his election. That provision would avoid all such debates as those which occurred over Smith and Vare. A candidate who was found to have violated the corrupt practices acts simply would be ineligible to take office.

"I should not think there could be any opposition to such a measure," said CUTTING. "Surely every legislator's seat should be above the taint of illegality. Nothing could be more abhorrent than the spectacle of a lawbreaker making laws."

NEW BODY IS NEEDED

But how to ascertain whether the laws have been violated? At present there exists nobody with the positive duty to inquire and report concerning nominations and elections.

For the most part, the existing machinery is negative.

Candidates and parties are required to report campaign accounts to the Clerk of the House of Representatives, but there is no audit and no inquiry into the accuracy of the reports unless sensational news reports, such as those of the Vare and Smith campaigns, result in a congressional investigation. This is a highly uncertain and indirect method.

Therefore, the third of CUTTING'S measures is a bill to create a Federal election commission, to consist of five members, to be elected at joint sessions of the two Houses of Congress.

The Civil Service Commission would nominate 25 citizens who possess certain required qualifications, and are "known to be without partisan prejudices or connections." From those 25, the Senate and House, meeting together, would elect five to constitute the commission. This is to get around the presidential appointive power, which has been used to "pack" so many Federal boards and commissions.

DUTIES OF COMMISSION

The duties of the Federal Elections Commission would be as follows:

1. To receive, audit, and have custody of all campaign reports, and to investigate and report on the legality of all nominations and elections to Federal offices.

2. To receive the credentials of all Senators elect and Representatives elect, and report to the respective Houses concerning their legality.

3. To investigate and report to the House and Senate on each election contest.

The commission would have no power to pronounce judgments or impose penalties. It would be solely a fact-finding body. On the basis of the facts reported, Congress and the courts would pass judgment—Congress as to the eligibility of the candidates and the courts as to their guilt or innocence of violations.

In addition, the commission would have the continuing task of surveying election methods and machinery, especially with a view to recommending improvements to Congress.

CUTTING'S fourth bill is one to regulate the nomination and election of the President. It provides that no candidate for the nomination for President can expend more than $10,000 in each State, or a total of more than $480,000 in the 48 States in the campaign preceding the convention.

LIMIT ON CAMPAIGN FUND

No candidate, after being nominated, could spend more than $30,000 in any State, or a total of more than $1,440,000. Moreover, the bill would make illegal any deficit, which, when added to the total expenditures, would bring the sum to more than the amount fixed above. That abolishes an existing evil recently brought into bold relief by the forced confessions of Will H. Hays. It was disclosed in the Teapot Dome investigation that a deficit of more than $1,000,000 remained after the Republican campaigns of 1920 and 1922, principally in the form of loans. Of course, none of that money had been accounted for in the reports of campaign contributions made prior to and immediately after the elections.

Similarly, the bill limits to $1,000 all contributions made after the elections. This would make illegal such gifts as the $160,000 donation of Harry F. Sinclair and the $50,000 gifts of Secretary of the Treasury Mellon and the late John T. Pratt, which also were disclosed in the oil inquiry. It would prevent governmental favors or offices from being bartered away for large contributions following elections.

It provides that all gifts must be made in the names of the actual givers, thus outlawing "dummy" contributors, such as those who allowed the use of their names in masking the donation which Sinclair made to the Republican deficit in 1923.

CORRUPT PRACTICES ACT

The fifth and final measure in CUTTING'S program is a corrupt practices act governing the nomination and election of Senators and Representatives.

Existing laws place no limits on the sums which may be spent for such items as printing, postage, traveling expenses, and the like, with the result that the limitations which are imposed mean virtually nothing. Expenditures of almost any kind can be covered up under those headings, and frequently are.

CUTTING has proceeded in a radically different direction, by expressly stating the purposes for which money may be spent lawfully, and fixing limits on the amounts which may be expended for those purposes.

Thus his bill states: "In a campaign for nomination or election to the office of Senator or Representative in the Congress of the United States it shall be unlawful to expend money except for the purpose of presenting information, arguments, and advice to the electors as to the issues of the campaign and the qualifications of candidates.

"A candidate or his duly authorized agent or committee may lawfully present information, arguments, or advice to the electors by the use of: (a) the mails; (b) the telephone; (c) the telegraph; (d) advertisements in newspapers or by posters or on billboards; (e) the radio; (f) personal solicitation; and (g) public meetings.

"The cost of maintaining headquarters, of hiring halls, and speakers, and of employees to conduct the campaign may be lawfully paid out of the campaign fund by the candidate or his duly authorized agent or committee."

PROVISIONS FOR FUNDS

The provisions governing the amount of campaign expenditures are as follows: "Unless the law of this State prescribe a less amount as the limitation of campaign expenditures, a candidate may make or authorize campaign expenditures up to—

"(a) The sum of $10,000 if a candidate for Senator, or $5,000 if a candidate for Representative; or

"(b) An amount equal to the amount obtained by multiplying 3 cents by the total number of votes cast at the last general election for all the candidates for the office which the candidate seeks, but in no event exceeding $25,000 if a candidate for Senator or $10,000 if a

candidate for Representative; provided that in States where Representatives are elected at large, each such candidate for Representative may make or authorize campaign expenditures of the same amount permitted a candidate for Senator in the same State."

The only exception is that: "The money expended by a candidate to meet and discharge any assessment, fee, or charge made or levied upon candidates by the laws of the State in which he resides, or expended for his necessary personal traveling and subsistence expenses shall not be included in determining whether his campaign expenditures have exceeded the sum fixed by this section as the limit of campaign expenses of a candidate."

A candidate may make expenditures up to the prescribed amount in either a campaign for the nomination "by whatever method" or in an election contest.

BILL FIXES RESPONSIBILITY

Like the bill relating to presidential elections, this measure fixes the responsibility upon the candidate or his duly authorized agents, safeguards against deficits, and requires adequately frequent reports to the Federal Commission on Elections.

If this bill were enacted, with the election commission making the facts of illegalities fully known, and with Congress under constitutional compulsion to deny a seat to every unlawfully elected member, corrupt campaign practices on a large scale would be almost impossible.

There is no likelihood that any of the CUTTING proposals will be voted on, or even reported from committee during the present session of Congress. Nor does their author wish them to be. He realizes they will be subject to prolonged discussion when they are brought up.

In the meantime CUTTING is hopeful that Congress and the public will study them. Sooner or later legislation is inevitable to meet the steadily rising tide of corruption in politics.

The young man from New Mexico certainly has offered a substantial morsel for reflection.

SUBMARINE SAFETY DEVICES

Mr. WAGNER. Mr. President, I ask unanimous consent to have printed in the RECORD an article appearing in the New York Evening World of May 21, 1928, relative to submarine safety devices.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UNITED STATES SUBMARINE MEN HAVE TO FACE PERILS OTHER NATIONS AVOID—REPRESENTATIVE GRIFFIN, OF BRONX, PROVES THIS BY FACTS FROM GERMANY, ENGLAND, AND FRANCE IN REPLY TO QUERIES—SAFETY DEVICES THAT WE LACK ARE USED TO GIVE MEN SUCH AS "S–4" CREW SOME CHANCES OF ESCAPE

By Robert Barry, staff correspondent Evening World

(Copyright Press Publishing Co. (New York World), 1928)

WASHINGTON, May 21.—ANTHONY J. GRIFFIN, Member of Congress from the Bronx, rises to state some ghastly facts and to ask a question.

Five months ago the U. S. submarine *S–4* sank off Provincetown with all on board, and the country was stirred as it had been by no naval disaster since the blowing up of the battleship *Maine*.

Everyone deplored; some explained; officials said such a stark tragedy should not occur again.

Mr. GRIFFIN asserted that the *S–4* lacked the safety and salvage devices which the submarines of other great maritime powers provided for subsurface naval duty. His statements were challenged; his suggestions derided; his charges ridiculed.

After some months of patient effort Representative GRIFFIN has proved his case, but instead of exulting over his evidence he is using it merely in justification of his plea that Congress should do something to alter "the pitiable picture we present to the world."

AMERICA'S PLAIN DUTY

"Even though the world should forget," the Bronx Member says, "I submit it is a plain violation of our duty to ignore such an event; to repudiate our pledges that such a thing could never happen again; to fail in our promises that we should profit by the lessons of that disaster."

Due to a stubborn refusal by administration leaders in both Senate and House to agree that a joint congressional committee investigate the causes of the disaster while a commission of experts, to be named by the President, studied submarine safety devices, nothing has been done.

Nothing is likely to be done.

Mr. GRIFFIN'S plea is that there be some reconciliation of those differences, one way or another, in memory of "those unhappy youths tapping out their own requiem in the chambers of the doomed submarine—tap, tap, tap—waiting for relief; waiting with torturing anxiety amidst the fumes which rose from the batteries of the vessel, fumes which slowly choked them to death."

Representative GRIFFIN charged at the outset that the submarines of the United States Navy were not equipped with proper emergency and safety and rescue devices. His assertions that America had lagged in that respect were denied in the highest official quarters.

Mr. GRIFFIN set about to prove his case through the cooperation of the Department of State and the naval attachés at the American embassies in Berlin, London, Paris, and Rome.

HIS CONTENTION BORNE OUT

The replies from the American Embassies abroad bear out the technical accuracy of the demands by Representative GRIFFIN that the men detailed to submarine duty in the Navy of the United States be afforded as fair a chance for life as those in other great navies.

The German Navy, for instance, equips its submarines with grappling rings, marker buoys, air inlets, and diving chambers, and has built two salvage vessels with lifting capacities of 1,200 tons. If America had such a vessel, the *S–4* could have been lifted bodily, as her dead weight was 1,000 tons. She was raised by six pontoons having a lifting capacity of 480 tons.

In the British Navy it is shown that British submarines are equipped with a separate salvage air inlet to each compartment.

The French submarines are equipped with telephone buoys and a separate air inlet for each compartment. In addition to that they have folding life boats and automatic diving apparatus. The French Navy also has three lifting or salvage docks with a lifting capacity of from 500 to 1,000 tons.

In the Italian Navy all submarines of new construction will have two telephone signal buoys, one at the bow and the other at the stern. Each compartment is provided with separate air inlets and two exit locks for the escape of the crew, one at the bow and the other at the stern. Even the turret is so constructed as to serve as an exit lock.

NINE QUESTIONS ASKED

Through the proper diplomatic channels, Representative GRIFFIN addressed nine specific questions to the admiralties of Europe.

The German reply was most specific and informative. Because of German war-time preeminence in use of the submarine, the response forwarded by Capt. George M. Baum, United States Navy, American naval attaché at Berlin, is given in full. Mr. GRIFFIN has put it in the record.

Mr. GRIFFIN'S questions and the German replies to each are given below numerically.

Q. (1) Whether grappling rings, eyelets, or shackles are attached to the hulls of submarines to facilitate their prompt raising.—A. (1) In peace times grappling rings, eyelets, or shackles were attached to the hulls of most of the submarines. During the war they were removed from many on account of the additional weight.

Q. (2) Whether or not a form of telephone signal buoy is in use which may be released in case of accident, and by which communication may be had with the crew.—A. (2) Such buoys were employed on the submarines in peace times and were part of the normal installation. During the war they were firmly secured, so as to prevent their becoming loose and thus disclosing the position of the submarine to an enemy ship.

Q. (3) Whether or not salvage air inlets are provided for each compartment of the submarine, or whether there is one salvage inlet communicating to the receptive compartments (as seems to have been the condition on the *S–4* type of vessel).—A. (3) Air inlets could not be installed for each compartment of the submarine, but on the later submarines there was an air inlet in the forward compartment, the midship compartment, and the after compartment, all well separated. These air inlets had cocks which could be operated both from the interior and the exterior of the hull.

Q. (4) Whether or not diving chambers by which the crew can escape are provided.—A. (4) An air chamber was provided in the larger submarines, but they were not used in any salvaging operations. The loss of space entailed by the installation of such a diving chamber restricted their number to one for the larger submarines.

Q. (5) Whether or not submarines are provided with releasable rafts, boats, or chambers by which the crew can escape.—A. (5) No.

Q. (6) Whether or not a diving helmet, or diving apparatus, known as the Graeger diving rescuer, or any similar device is adopted.—A. (6) Yes; one for each member of the crew, distributed proportionately in the compartments to the number of men normally in that compartment.

Q. (7) Whether or not there is at the present time, or in contemplation, salvage vessels of the catamaran type by means of which a submarine can be lifted from the bottom.—A. (7) Before the war the *Vulkan* was built and was used during the war. The *Cyclops* was not completed until 1918. After the war the *Vulkan* was sunk and the *Cyclops* was turned over to England. These vessels were built for submarine-salvaging work.

Q. (8) If such vessels are in commission, please state their tonnage, their length, and their lifting capacity.—A. (8) A description of these vessels can be obtained from Jane's Fighting Ships, 1914 or 1915. The *Vulkan* was approximately 2,000 tons displacement and lifting capacity of about 500 tons. The *Cyclops* was 2,800 tons displacement, with lifting capacity of 1,200 tons.

Q. (9) It will be appreciated if you will mention any instance when and the circumstances under which such vessels were put to use and whether they proved effective, giving the tonnage and the net lift or weight of the vessels involved.—A. (9) During the war the *Vulkan* salvaged six sunken submarines from varied depths from 11 to 30

meters. In none of the operations was any of the crew saved through the operation of the *Vulkan*. Most of the installations for attaching salvaging devices had been removed from the submarines in order to save weight, and it was therefore necessary for the divers from the *Vulkan* to pass slings around the hull.

After the submarine was located and operations made possible by divers it was possible to lift the submarine in nine hours and less. The success of operations from the *Vulcan* depended upon the ability of the divers to locate the wreck and to commence salvaging operations. The time lost in locating the wreck and passing the slings was always too long to enable the submarine to be raised in time to save any of the personnel. On December 7, 1917, submarine *B–8* was sunk in the Baltic Sea in 30 meters of water under conditions almost identical with those obtaining when the *S–4* was sunk. The sea was heavy and wind was force 9. It was impossible for the divers to operate, and no salvaging operations were possible until the weather moderated. By this time all the personnel of the submarine had perished.

The *S–4* was lost in peace time.

SOME OTHER REPLIES

The French replied that they have collapsible lifeboats which are stored on the bridge under the Berton method.

Ray Atherton, Counselor of the American Embassy in London, reported the British response to GRIFFIN query No. 3:

"A salvage air inlet (or, as it is termed, divers' connection) is fitted to each main compartment of the submarine. Each inlet is independent of the rest and supplies air only into the compartment in which it is fitted."

Representative GRIFFIN has received letters and suggestions from 2,000 persons, many from Europe, some from Australia. He offers something for Senator HALE, of Maine, chairman of the Naval Affairs Committee, to explain and administration leaders in the House to justify, if they can.

FORMER SENATOR OWEN'S VIEWS ON POLITICAL SITUATION

Mr. SIMMONS. Mr. President, I ask unanimous consent to insert in the RECORD, without reading, a letter written by former Senator Robert L. Owen, of Oklahoma, on the political situation, published in the Tulsa Tribune, Tulsa, Okla., May 13, 1928.

There being no objection, the letter was ordered to be published in the RECORD, as follows:

FORMER SENATOR OWEN FLAYS SMITH AS POSSIBLE CHOICE—METHODS USED BY POWER DESCRIBED FULLY IN LETTER

Tammany is the candidate and Al Smith the name, in the opinion of former United States Senator Robert L. Owen, of Oklahoma, who has stated his views regarding the present dilemma of the Democratic Party in a letter to Richard Lloyd Jones, publisher of the Tulsa Tribune. The letter, written in Washington, follows:

MAY 8, 1928.

MY DEAR MR. JONES: Answering your favor of May 1, I submit my views on "Tammany and the Presidency." The aggressive arrogance of Tammany is in marked contrast to the somewhat excessive modesty and preoccupation of Democratic leaders outside of Manhattan. Tammany's foreign-born constituents, hating autocracy, are natural Democrats. Tammany organized them by actual service, by genuine charity, by real kindness, by Christmas baskets, by summer picnics, etc., by employment, by rewards, and has thus obtained the support of the little people, who do not understand big politics.

Tammany, with control of thousands of employees, has been rewarded abundantly with votes, with governing power, with graft. The little tigers got little graft from little people; the big tigers got big graft from big business. In the course of time I am convinced the grafting system laid its tribute in an organized fashion on the gamblers and "policy" shops, on the "disorderly houses" of unhappy women, on the "white-slavers," on the bootleggers and the wholesome-liquor men, on crooks, on little thieves and big thieves, on subway and sewer contractors, on paving and highways, on public buildings, on people selling supplies to the city or in the city.

Tammany is human—very human—with its virtues and its vices, operating side by side without visible conflict. The system is a two-faced Doctor Jekyll and Mr. Hyde affair. It wears the badge of decency and dignity by day, and freely consorts with crooks by night. It probably gives the city of New York as good a government as it really deserves, and no better, but very expensive. The annual budget has already reached $500,000,000. No man knows where it will end.

WELL SUPPORTED

Tammany has thousands of supporters of the most respectable gentlemen, and it has the support of innumerable criminals who dodge about under the patronage or protection of Tammany supporters. Doctor Jekyll denounces and prosecutes the criminals and Mr. Hyde levies tribute on them at night and frequently thwarts the worthy efforts of Doctor Jekyll. Doctor Jekyll sternly applies the law to the gamblers, the crooks, the thieves, the underworld, but Mr. Hyde gives them protection and takes tribute from their stolen goods. Doctor Jekyll rebukes the rascals; Mr. Hyde plucks the thief.

The police captain must pay for his job and may get the cost back discreetly from the smaller fry. Judges of low and high degree have paid for their nominations (said to be about $50,000 for a supreme-court justice's nomination). The wonderful corrupt record of Tammany and its supporters has been set forth very fully by many public exposures, such as those made by Dr. Charles H. Parkhurst, the Mazet investigation, the Citizens' Union of New York, etc. There is not much secret about it, and I suppose there is no sincere denial. The big graft, however, is in city privileges, where huge competitive commerce is absolutely compelled to have space and opportunity.

The Tammany leaders are too intelligent to permit an appearance of evil. Contracts are not let to the highest bidder, for this would excite public outcry as obvious corruption, but the specifications which require high bids need not be enforced by Tammany inspectors, and modifications and extra work can be found necessary under such contracts for favored contractors, and untold millions may be thus abstracted from the taxpayers of the city.

It is notorious that the Tammany leaders like Tweed and Croker and Murphy became millionaires.

GRAFT IS CONTROL

The stealings under Tweed were estimated to be from $30,000,000 to $200,000,000. Tammany graft provides a means for controlling the New York City elections. Tammany has men in charge of voting precincts who know every voter, his age, nationality, business, religion, etc., and knows whether he is a repeater or a fraudulent voter, and how to register him in many places and vote him efficiently in many booths on election day. Tammany can pad the vote of New York with thousands and thousands of fraudulent votes whenever the necessity arises. Tammany has become so skilled in managing the precinct vote and raising big money for political purposes and cooperating with the standpat Republicans, that it has at last concluded to attempt to put Mr. Smith in the White House by their methods.

Al Smith was born of modest parentage, and as a youth was trained and showed great talent as an actor. He is intelligent, social, industrious, and has been in the service of Tammany for 33 years. He spent his life in and around the Bowery as a Tammany employee until Tammany sent him to the assembly and made him governor. He deserves well of Tammany. He has been faithful to its interests. He was under Croker and Murphy and Foley. He is a product of Tammany, a disciple, and is now its leading power.

The Republican machine of New York State is, like Tammany, a two-faced Jekyll and Hyde combination. The Republican Hyde and the Tammany Hyde get together in a bipartisan corrupt alliance and trade votes. In 1924, in pursuance of this customary practice, Coolidge got nearly 300,000 votes more than his Republican associate, Roosevelt, for governor, and Smith got 300,000 more votes for governor than the liberal electoral votes, apparently by the expediency of exchanging votes, 150,000 votes being taken from the Democratic candidate for President, Davis, and given to Coolidge, and about 150,000 votes taken from Roosevelt and given to Tammany's candidate, Smith. Theodore Roosevelt, jr., and Davis were equally betrayed by the standpat Republicans and by Tammany in the interests of Cal Coolidge and Al Smith in the famous "Cal and Al" campaign of 1924. It must be observed also that the registration lists of New York City were suddenly increased, from 1920 to 1924, by about 220,000 votes, and that Al Smith got about this number more than he got in 1920. The Republicans did not seem to profit by this increase of registration. (See the New York World Almanac.)

OBJECT—WHITE HOUSE

These glorious victories of the "invincible" Smith determined the Tiger to advance on the White House. In anticipation of 1924 a couple of hundred thousand books were printed, glorifying Al Smith as a paragon of virtue—another Jefferson to lead the Democracy. Who paid for this campaign work has not yet been disclosed, but it can be safely assumed that Governor Smith, under the dignified patronage of Doctor Jekyll, who can do no wrong, can personally disclaim all expenditures and that Mr. Hyde is busy with a corps of literary mercenaries, with proper financial agents receiving the willing contributions of large contractors and other people seeking special privilege, whose appreciation of past and future favors can be relied on. I am convinced that Mr. Hyde can get all the money he wants and can expend it so skillfully that the American people will never fully discover it.

Mr. Hyde's friends control the press, so a joyful hallelujah of praise fills the newspapers, the magazines, the movies, and the radio about the new Jefferson who has emerged from the Bowery and from the patronage of Croker, Murphy, and Foley. At all events, I think there can be no doubt that a wonderful campaign of education and propaganda has been put on by Tammany and its plutocratic allies to sell Tammany's candidate to the people of the United States, and to nominate him for the Presidency. This campaign proceeds on the very practical theory that "all the people know is what they see in the papers," and that exposed and unattended precincts can be captured by organized work. The plan arranged to control the precinct caucuses and the Houston

convention is set forth in the CONGRESSIONAL RECORD of April 24, 1928, in Senator OVERMAN'S remarks, quoting from the Winston-Salem Journal. Here is the plan sent by Tammany to North Carolina, and apparently it is the same plan which was employed in Oklahoma and other States:

THE TAMMANY PLAN

1. A cautious, sagacious man, well informed in State politics, and who must be the right man for the place, must be selected to organize the State.

2. He must secretly and with caution and sagacity select two gentlemen for each congressional district who are also cautious, sagacious, well informed, and must be the right men for the place.

3. The State organizer must, with secrecy, meet with the two district organizers in each congressional district, and as a committee of three carefully canvass and pick three cautious, sagacious, well-informed men who must be the right men for the place for each county.

4. The county committee must secretly pick a cautious, sagacious, well-informed man who must be the right man for each precinct who is willing to give the time to the job and who will be responsible for getting enough Smith men to be present at the precinct caucus to organize the caucus and select delegates, composed of Smith men, to the county convention.

5. The State organizer and the district managers will select in advance the delegates at large through the State. They will arrange the proceedings of the State convention and be assured that Smith men are selected who can be relied on to go to Houston. The expenses of this performance is not set forth in the plan, but it can be assumed that Mr. Hyde and his financial disbursing officers will see to it that all this labor of love is not lost. In a State of a thousand precincts it means more than a thousand secret agents. By this system one active Smith agent is equal to a hundred sleepy, inattentive opponents. One active man can man the precinct and control it, for as a rule very, very few attend a precinct caucus.

GREAT IS TAMMANY

By this secret, cautious, sagacious plan, adequately financed, Tammany has successfully captured hundreds of delegates and demonstrated to the thoughtless public the enormous popularity of Tammany's candidate while the inattentive Democracy and unfinanced potential candidates all look on in stupefied amazement.

Great is Tammany, admirable in its simple, direct efficiency. It has its return for work done and money expended. It knows how to steal the governing power of the people, and with their stolen goods is demanding indorsement by acclamation at Houston.

Let all the unintelligencia jump in the band wagon quickly, but let honest, intelligent Democrats stand firm and remember that the patriotic men and women of our beloved country and the dry and progressive forces of America are yet to be heard from.

The moral and ethical law is as certain as the law of gravity, and will be vindicated in due time by a power of which the Tammany leaders know little.

Tammany is not a man—it is a combination of all sorts of men. It is a corrupt political system and an auxiliary of the standpat Republicans in all times of need.

It fought with the Republicans against Samuel J. Tilden.
It fought with the Republicans against Grover Cleveland.
It fought with the Republicans against William J. Bryan.
It fought with the Republicans against Woodrow Wilson.
It fought with the Republicans to defeat James M. Cox.
It fought with the Republicans to defeat John W. Davis.

Its Congressmen supported Joe Cannon, the mouthpiece of plutocracy in the House of Representatives.

Tammany is controlled by a constituency which is of foreign origin and of foreign ideals, favoring wide-open immigration, opposing the national prohibition policy, favoring and practicing nullification of the eighteenth amendment and the Volstead Act. It has deliberately pursued a policy to split and disorganize the National Democracy over the wet and dry question, and over a religious controversy to the enormous advantage of the standpat Republicans. Tammany is equally the secret enemy of the progressive Republicans and of the progressive Democrats.

Governor Smith is not to be regarded as a mere man. He is an institution built up by the Tammany-controlling forces. He is subject to their influences and will assuredly represent their views, for he owes everything to their support.

Tammany is truly unfit to lead the progressive democracy of America, and those who have loved Woodrow Wilson and William J. Bryan and Grover Cleveland and Samuel J. Tilden will find it impossible to follow the Tammany leadership. Millions of Democrats will revolt. No Democrat can possibly win who is too timid or too feeble to protest against the dominance of Tammany Hall.

Tammany should be kicked out of the Democratic Party. It belongs of right to the standpat Republicans.

There is no time for false compliments.

Plain, honest speech is needed.

"SPEAK NOW, OR—"

Speak up, you political leaders, now, or forever hold your peace.

The popularity of Governor Smith, except where the Tammany machine corruptly controls New York City, is absurdly false. New York State has 62 counties, 57 of them outside of New York City. Outside of New York City in 1926 Al Smith lost 53 out of 57 counties in the great State of New York, only carrying Albany and Troy Counties, where the machine controlled; Clinton County, the bootlegger county on the Canadian border; and Utica, by a narrow margin. In 1924 Al Smith lost every one of the 62 counties in New York State except New York City and Albany, and the fraudulent exchange of votes in this campaign is well known. It is a suspicious circumstance that 227,000 votes were registered in 1924 in excess of 1920, and Al Smith's vote increased by about this amount. This is a badge of fraud, for Roosevelt ran far better than Miller in 1920, when Miller beat Smith. In 1920 Smith lost every county in the State of New York outside of New York City. His vote-getting power outside of the city of New York is disproved by the county records of New York. (See the New York World Almanac for figures.) The Republicans know this, and they are helping him to push his candidacy. His Republican allies for the governorship must abandon him for the election to the Presidency.

In the recent California primaries he got less than 17 per cent of the total vote cast, and Hoover's friends, unopposed, nevertheless cast more than four times as many votes as were obtained by the very active campaign for Al Smith. California is obviously anti-Smith. More than half the Democrats refused to come to the polls. In the recent Massachusetts primaries for 1928 Al Smith got less than 8 per cent of the votes cast in the last presidential election. The great majority of Democrats declined to vote for Smith. In the Texas latest primaries, where the liquor men were active, he got only 1 delegate in 10 of the delegates selected for the county conventions, and this fairly shows his lack of popular strength in Oklahoma and Arkansas, where political conditions are nearly identical. And you know, as I know, that Oklahoma is profoundly displeased with the successful secret intrigue of Smith's friends there, and that their success was only due to the inattention of the people.

It is some consolation to believe that the country will not put Tammany in the White House, but my prayer is that the good Lord will defend the party of Jefferson at Houston from the assaults of its enemies.

With very kind regards, sincerely and faithfully,

ROBERT L. OWEN.

CHANGE OF CONFEREE ON TAX REDUCTION BILL

Mr. SIMMONS. Mr. President, I desire to ask unanimous consent of the Senate that I be excused from serving upon the conference committee on the so-called tax reduction bill (H. R. 1), and that the name of the senior Senator from Mississippi [Mr. HARRISON] be substituted for mine.

The PRESIDENT pro tempore. Is there objection to the request preferred by the Senator from North Carolina? The Chair hears none, the request is granted, and the senior Senator from Mississippi [Mr. HARRISON] is appointed to serve in his stead on the committee of conference on the part of the Senate.

BOULDER DAM

The Senate, as in Committee of the Whole, resumed consideration of the bill (S. 728) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

Mr. JOHNSON. Mr. President, I am very loath to take any time upon this measure in further discussion in behalf of its proponents. I should infinitely prefer to sit here and permit the opponents of the proposed legislation to develop whatever they desire to develop in opposition to it. I have been asked, however, sir, by two or three Senators upon this side and a similar number upon the other side very briefly to respond to some of the things that have been said in the debate that has preceded and particularly the things that were related by the Senator from Utah [Mr. SMOOT] in his very lengthy and very complete address. Because of that request, and because I feel that our position is impregnable, I am constrained to occupy a brief period this morning in an endeavor to answer some things that may have been said by the senior Senator from Utah in his two-day address.

Mr. President, the able senior Senator from Utah recently engaged the attention of the Senate for two full days in the delivery of a singular and quite remarkable speech in opposition to S. 728. Replete with scientific, engineering, and technical details, its preparation must have occupied many weeks, if not months, of effort on the part of the busy Senator. We all know of the multitudinous and exacting character of his regular duties in relation to finance, revenue, taxation, and related mat-

ters, and we wonder that a place could possibly be found on his already overburdened shoulders for the additional task of compiling an elaborate address on the Boulder Canyon project.

However, a large amount of the material presented in the interesting address of the able Senator was not new or unfamiliar to those who have been following this legislation. Some of that material had an entirely respectable and legitimate source, but some of it had its source close to the busy quarters of the great power interests, which recent revelations have shown have been enthusiastically engaged in endeavoring to encompass the defeat of this legislation.

A very considerable part of the able Senator's speech was devoted to the proposition which, if not specifically stated, yet plainly was implied, that the plan for the Boulder Canyon project was entirely infeasible, or so beset with construction and other difficulties as to render the undertaking unwise and inexpedient. The Senator painted a gloomy picture, indeed, but in so doing he did not assume an unfamiliar or unprecedented rôle. The path of human progress since time began has been marked at every turn by the doleful cry, "It can not be done." Reforms and achievement ever have been met sometimes by an honest but mistaken pessimism, and often by a Pecksniffian antagonism because of material interest in a wrongful existing order.

The penny post, which has grown into the great post service of the world and has become an indispensable feature of our civilization, was bitterly resisted as a vain and destructive innovation, which could never be successfully consummated.

After steam had been successfully applied to river navigation, the skeptical declared that no steamship would ever cross the Atlantic Ocean. It could not be done, they said, because, even if an engine could be contrived, no ship could ever be constructed large enough to carry sufficient coal for the voyage.

Charles Newbold, a citizen of New Jersey, made a cast-iron plow in 1797 to replace the wooden plow then in use. The farmers would not adopt the new device because, as they said, it would poison the soil and stimulate the growth of weeds. It could never, they said, be utilized for its designed purpose.

Howe worked for many years before he perfected the sewing machine, while his family complained, and his friends called him a poor lunatic, and those who heard him and saw his work said it never could be done.

When the Baltimore & Ohio Railroad was opened with horse and rail cars 100 years ago Daniel Webster expressed grave doubt as to the ultimate success of the railroad, saying, among other things, that frost on the rails would prevent a train from moving, or, if it did move, from being stopped. The Senators from Utah of that day said it never could be done.

Samuel Pierpont Langley, Secretary of the Smithsonian Institution, had long studied the possibilities of flying. Finally he built a steam-driven model, which was the first heavier-than-air machine that flew in America. Even after he had flown this model many times the world still believed that a man who invented a flying machine was nothing less than a lunatic. A famous scientist in this very city of Washington, Simon Newcomb, one of the greatest mathematicians and astronomers of his time, proved on paper that it was foolish to make any attempt at flying, and high in horror were held the hands of the fearful as they muttered, "It can not be done!"

Samuel F. B. Morse's efforts to perfect his invention of the telegraph were ridiculed by his acquaintances and friends. It was finally tested in 1838. He applied to Congress for aid.

The House passed the bill by a narrow margin of 8 votes, and it went to the Senate. On the last night of the session Morse, sitting in the gallery, anxiously awaited the result. One of the Senators declared to him: "There is no use of your staying here. The Senate is not in sympathy with your project. I advise you to go home and think no more about it." Morse, his last hope gone, left the Capitol; but the next morning he received the joyful and unexpected news that the bill had passed the Senate. With the appropriation thus made available wires were strung between Baltimore and Washington; and on May 24, 1844, the day chosen for the public exhibition, Morse, sitting at the transmitter in the old Supreme Court room in the basement of the Capitol, received the historic message, "What hath God wrought." But the timid and the doubtful shook their heads and said, "It can not be done."

The opposition to the construction of the Suez Canal was extremely bitter and formidable. Among other things, it was claimed that the canal would prove a failure because the blowing sands of the desert would soon fill the channel. "It can not be done," said the fearful, and the cry was echoed by many of the wise. George Stephenson, the great English engineer, pronounced it an impracticable engineering scheme. Lord Palmerston informed De Lesseps that in the opinion of the British Government the proposed canal was a physical impossibility. Palmerston declared:

> All the engineers of Europe might say what they pleased, he knew more than they did, and his opinion would never change one iota, and he would oppose the work to the end.

I can see the distinguished Senator from Utah echoing Palmerston's words. He knows more than all the engineers who have examined this project; and he, with his technical skill, with his ability as an engineer, with his knowledge of earth strata, with his infinite variety in dealing with dams, with his constructve genius—he says, the Senator from Utah, that this can not be done; and, therefore, his ipse dixit having been uttered, it must not be done.

Yet, notwithstanding Palmerston's ipse dixit, too, the Suez Canal, in spite of great opposition and imaginary difficulties, was built, and has been in successful operation for nearly 60 years. A few years after its completion the British Government, as if in condemnation of the ill-advised judgment of its great engineer and the stupidity of its Premier, purchased and acquired the controlling interest in the canal.

The history of our own great isthmian canal affords a striking parallel to the story of the Boulder Dam. It was the same century-old tale of opposition to human achievement.

The Gatun Dam is very properly regarded as the key or central feature of the Panama Canal. It impounds the waters of the Chagres River, thereby creating a great lake, and thus makes practicable the operation of the canal as a lock or lake-level waterway.

A bitter controversy of unprecedented violence raged for many years over the question whether Gatun Dam could be built, or, if built, would stand. The opposition urged that the formation at the site would not afford a safe and stable foundation, and that the superstructure would soon disintegrate and be swept away by the pressure of the impounded waters. It was further claimed that the Canal Zone was subject to earthquakes—how we heard that here, too!—which would be particularly destructive to earthen structures such as the proposed dam; and the great disaster at San Francisco in April, 1906, was eagerly, although illogically, seized upon to support this objection. It was also contended that the machinery of the locks would be subject to disarrangement and destruction through carelessness, mischief-making, or enemy attacks; and that there would be grave risk to both the vessels and the canal through destruction of the gates, due to negligent management of vessels in entering or leaving the locks.

This controversy reached such intensity that President Roosevelt appointed an international board of consulting engineers to consider and report on the question whether the Panama Canal should be a sea-level or a lock type canal. That board was composed of five foreign and eight American engineers, all among the foremost men in their profession. The board in its report to the President divided on the question, 8—the 5 foreigners and 3 Americans—being in favor of the sea-level type; 5, all Americans, favoring the lock type of canal.

A majority of the Senate Committee on Interoceanic Canals, having under consideration a bill to provide for the construction of a sea-level canal connecting the waters of the Atlantic and Pacific Oceans, objected to the proposed dam at Gatun. In its report to the Senate it was declared:

> Earth dams founded on the drift and silt of ages, through which water habitually percolates, to be increased by the pressure of the 85-foot lock when made, has been referred to by many of our technical advisers as another element of danger. The vast masses of earth piled on this alluvial base to the height of 135 feet will certainly settle, and as the drift material of this base or foundation has varying depth, to 250 feet or more, the settlement of the new mass, as well as its base, will be unequal, and it is predicted that cracks and fissures in the dam will be formed, which will be reached and used by the water under the pressure above mentioned and will cause the destruction of the dam and the draining off of the great lake upon which the integrity of the entire canal rests.

One of the Senators who supported the lock type of canal, having referred to the difficulties and objections encountered in the building of the Suez Canal, declared in this Chamber—history but repeats itself, sir; those of us who are familiar with the past wholly understand that—he said, sir:

> These are facts of history, and they are not disputed. Shall history repeat itself? Shall we delay or miscarry in our efforts to complete a canal across the Isthmus of Panama upon similar pretensions of assumed dangers and possibilities of disaster, all more or less the result of engineering guesswork? Shall we take fright at the talk about the mischief maker with his stick of dynamite, bent upon the destruction of the locks and vital parts of the machinery, when history has its

parallel during the Suez Canal agitation in "The Arab shepherd, who, flushed with the opportunity for mischief and with a few strokes of a pickax, could empty the canal in a few minutes"? Shall we be swayed by foolish fears and apprehensions of earthquakes or tidal waves, and waste millions of money and years of time upon a pure conjecture, a pure theory deduced from fragmentary facts? Again the facts of canal history furnish the parallel of Stephenson and other engineers, who successfully frightened English investors out of the Suez enterprise by the statement that the canal would soon fill up with the moving sands of the desert; that one of the lakes through which the canal would pass would soon fill up with salt; that the navigation of the Red Sea would be too dangerous and difficult; that one of the lakes through which the canal would pass would soon fill up with salt; that the navigation of the Red Sea would be too dangerous and difficult; that ships would fear to approach Port Said because of dangerous seas; and finally that in any event it would be impossible to keep the passage open to the Mediterranean.

It was this kind of guesswork and conjecture which was advanced as an argument by engineers of eminence, and sustained by one of the foremost statesmen of the century. How absurd it all seems now in the sunlight of history. * * *

Of objections for or against either plan there is no end, and there will be no end as long as the subject remains open for discussion. To answer such objections in detail, to search the records for proof in support of one theory and another, is a mere waste of time which can lead to no possible useful result.

I commend these words of a distinguished Senator, uttered many, many years ago, to the Members of this body to-day.

I need not dwell further on this point. The story of the building of the canal is familiar to us all. A wise and courageous President, although at first favoring the sea-level type, finally, on the score of great saving in expense and time, followed the judgment of the five American engineers of the consulting board who supported the lock type of canal. Congress took the same view, and a lock type was authorized. The opposition said, "It can not be done." The response was, "Let the dirt fly!" Gatun Dam was built. In every particular it more than fulfilled the predictions of the engineers who favored it. And so I say to the Senator from Utah, and others, who, from one motive or another, follow him, and to those he follows: Fear not; this dam can be built, and, under the providence of God, will be built. It will be another milestone in progress and achievement, another tribute to American ability, skill, and courage.

Now, Mr. President, I turn aside for a brief period to consider something of the investigations that have been made in respect to the project that is embodied in the bill now before the Senate. Let me preface what I have to say in this regard by the remark that this bill comes here, not really with a divided committee; it comes here, not with a day's study by one of the great committees of this body. It comes here, sir, with the approval, not alone in this session but in the prior session, too, the overwhelming approval, of one of the best committees in this body—the Committee on Irrigation and Reclamation.

A year and a half ago the bill was reported by that committee by a vote of 12 to 3. This year this bill was reported by that committee by a vote of 13 to 1. It is not a question of a divided committee or a diversity of opinion among those who have heard the testimony; and this committee, sir, let me say to these gentlemen who may have any doubt upon the engineering features of the project, heard every man, practically, who desired to be heard in the one session or the other; and after mature deliberation, and after hearing all of the evidence, it rendered its decision in regard to the feasibility of the project.

A few years ago the Secretary of the Interior, writing concerning the Colorado River and the investigation of its problems, said this—

> The Colorado River Basin has been under observation, survey, and study and the subject of reports to Congress since the close of the Civil War. More than $350,000 have been expended by the Bureau of Reclamation since the Kinkaid Act of May 18, 1920. More than $2,000,000 have been expended by other agencies of the Government.

I may interpolate there that by the communities affected hundreds of thousands of dollars have been expended as well in studies. In concluding his recommendation at that time the Secretary of the Interior said:

> The time has arrived when the Government should decide whether it will proceed to convert this natural menace into a national resource.

That time, sir, is here now, to-day, and it is for the Congress to determine whether that which has been a national menace in the years gone by finally shall be transmuted by the act of Congress, the courageous act of Congress, in the teeth of an opposition never before witnessed to any other measure, whether this body will have the courage and whether it will have the wisdom to transmute this which has been a national peril into a national asset.

It was May 18, 1920, when the Kinkaid Act was passed by the Congress of the United States, directing the Secretary of the Interior to make a study of the problems of the Colorado River and report to Congress. All that has been done is not the result of private endeavor. The work that has been attempted upon the Colorado River in the past 10 years has been official in character, conducted by the United States of America by engineers of undoubted repute; indeed, by engineers in some instances not only of local and national reputation, but engineers as well of international renown.

The Congress itself, recognizing the necessity for curbing this turbulent stream, began passing its acts for investigation and study years and years ago, and after the first appropriation and the passage of the Kinkaid Act a preliminary report in 1921 was finally made, and then subsequently, in 1922, the studies and reports that are embodied in Senate Document 142 were finally filed. They represented the investigations of engineers who can not be assailed upon this floor nor any place in America, and the studies and reports thus submitted reached certain definite conclusions. Certain recommendations were made in 1922 by the report of the engineers, who then, in pursuance of the mandate of the Government, investigated the Colorado River to determine what best could be done in its development and in rendering it the servant of man, rather than leaving it to be the master in its mad moments.

The recommendations that then were made, which appear in Senate Document 142, by the report then filed, were as follows:

> 1. It is recommended that through suitable legislation the United States undertake the construction with Government funds of a high-line canal from Laguna Dam to the Imperial Valley, to be reimbursed by the lands benefited.
>
> 2. It is recommended that the public lands that can be reclaimed by such works be reserved for settlement by ex-service men under conditions securing actual settlement and cultivation.
>
> 3. It is recommended that through suitable legislation the United States undertake the construction with Government funds of a reservoir at or near Boulder Canyon on the lower Colorado River, to be reimbursed by the revenues from leasing the power privileges incident thereto.

That, sir, was six years ago, in the final report then rendered, six years ago.

> 4. It is recommended that any State interested in this development shall have the right at its election to contribute an equitable part of the cost of the construction of the reservoir and receive for its contribution a proportionate share of power at cost to be determined by the Secretary of the Interior.
>
> 5. It is recommended that the Secretary of the Interior be empowered, after full hearing of all concerned, to allot the various applicants their due proportion of the power privileges and to allocate the cost and benefit of a high-line canal.
>
> 6. It is recommended that every development hereafter authorized to be undertaken on the Colorado River by Federal Government or otherwise be required in both construction and operation to give priority of right and use:
>
> First. To river regulation and flood control.
>
> Second. To use of storage water for irrigation.
>
> Third. To development of power.

Thereupon, after that report was rendered, bills were introduced in the two Houses of Congress, bills that have remained in substantially the like form of the bill that is before the Senate to-day. Bills have been introduced in the succeeding Congresses and have been investigated most minutely in every session of Congress since that time. The investigations have continued since that original report was filed.

Thereafter the Chief of the Reclamation Service was directed to make his investigations, investigations in respect to everything concerning the Colorado River. I have brought here to-day, simply that it might be viewed by those who care for the facts upon this bill, the so-called Weymouth report. There it is before me—many volumes—and that report, if any man cares to examine it, will be seen to be the most careful, complete, and stupendous report upon river improvement that has ever been rendered at any time by any set of engineers.

I recall the time a few years ago when I stood upon this floor and the Senator from Arizona stood with me then and asked that that report be printed as a public document. I remember the man who stood behind and, because of his idea of economy, denied the right for the publication of the Weymouth report as a public document. The same man now comes upon this floor and berates the report because it is in the shape in which you see it here. The Senator from Utah objected then

upon the ground of economy and expense, and it does not lie with him to-day to criticize at all the fact that we have had to take photostatic copies and to photograph various pages in order that this very report might be preserved for the Government and for those who are interested in the Colorado River development.

There is the report, complete in every detail, profiles, maps, illustrations, engineering data, studies, accurate in every respect. Never, sir, until the other day, when the Senator from Utah stood upon this floor, has it been questioned before the Congress or in any other place or by any other person.

Upon the work that was done in the report more than $500,000 were expended, $331,000 in Boulder Canyon alone. Diamond drillings and borings were had at various sites—173 separate holes. The work was done in three seasons, covering three years—1921, 1922, and 1923. The materials found at Black and Boulder Canyons then were submitted to the geologists of the Geological Survey.

Tests of strength were made by the Bureau of Standards. Types of dam were considered, not only by one engineer, as I will show later, but by some 30 or 40 or 50 engineers, types of dam were considered and all reported on. Every conceivable fact was carefully weighed, every single detail, no matter how large or how small, was gone into. Everything, I do not care what it was, that related to construction or to cost, is found here in this report, and all that was done by engineers of repute and standing and great actual accomplishments, and under the supervision of the United States Government. That is the engineering data, and when a man takes that which has been furnished by the great power interests of this country and stands here and states that this is a scheme that is half-baked, that it is "fantastic," and that it ought not to be adopted, he does an injustice to his own people and to a project the feasibility of which is demonstrated.

I hold in my hand one of the brochures issued by the agency of Power Trust called the Joint Committee on National Utility Associations of the United States. I ask any man to compare it with the speech that was made the other day by the Senator from Utah, compare it merely that he may see, not that the Senator from Utah, of course, either saw or knew of this pamphlet, but that he may see how great minds run in the same channel, and how great critics have pursued substantially the same course; and how to each the same witnesses and the same words appeal alike.

The work of Weymouth was not individual work, not at all, sir. When the endeavor is made to convey that impression to those who know little or nothing of this matter it is entirely erroneous. It is the work of a corps of experts, a corps of experts such as never before has been assembled for such work. Then, after the corps of experts had done their work, it was checked, and carefully checked, by consulting engineers. Consulting engineers checked it in every conceivable fashion. Weymouth was chief of the Bureau of Reclamation in charge, but Weymouth was not alone in doing the job. Every department of the Government contributed to it. The Geological Survey, the Bureau of Standards, the experts from every department that could deal at all expertly and scientifically with any part of the scheme were called in, and all were a part of it. That Senators may understand a little of that which was done and the care that was taken, I intend to refer to a word or two of Weymouth's testimony and to some of those who were a part of the three years' hard and successful task.

Tests for strength of material were made by the Bureau of Standards, various types of dams were considered and reported upon, and the advantages and disadvantages were carefully weighed, one against the other. Costs of materials, railroads, highways, camps, even including commissary and sanitation, were gone into in great detail; even the lines for railroads and highways were run and the costs thereof carefully ascertained.

This, as I said, was not the individual work of a single engineer, but the collective work of a corps of experts, and their final work carefully checked by consulting engineers whose experience in large-dam construction is perhaps unequaled anywhere in the world. The work was directly in charge of Mr. F. E. Weymouth, then chief engineer of the Bureau of Reclamation.

On March 19, 1924, Mr. Weymouth testified before the House Committee on Irrigation and Reclamation concerning this report, and said:

Mr. SWING. I want to take first the inside of your regular force. What force of engineers has contributed to this report which you are now submitting?

Mr. WEYMOUTH. Mr. Walker Young, who is present to-day, has had charge of the investigations in Boulder Canyon for about three and a half years. * * * Mr. Young had more to do than anybody else in the actual working out of the detailed designs and estimates, but he at all times had the advice of chief designing engineer, Mr. J. L. Savage, whose headquarters are in Denver, and also of the whole designing force of that office.

Mr. SWING. How many engineers are in Mr. Savage's office?

Mr. WEYMOUTH. Mr. Savage has under his charge about 25 or 30 engineers of all kinds.

Mr. SWING. Who else?

Mr. WEYMOUTH. In addition to that, we have had the assistance of Mr. Gaylord, who was until very recently our chief electrical engineer, and his assistants and Mr. Dibble and his assistants. Mr. Dibble succeeded Mr. Gaylord in the last few months. And in the study of the water supply, the irrigable areas, and the control of the river for flood or for power purposes Mr. Debbler, who is here to-day, has made most of those studies.

Mr. SWING. Now, in addition to that, what other nonofficials have collaborated in the investigation of the sites outside of your immediate bureau?

Mr. WEYMOUTH. We had Mr. Ransome, a geologist of the Geological Survey, make a very exhaustive geologic examination and report on the Boulder Canyon reservoir and dam site, and Mr. Jenison, of the Geological Survey, also assisted him. The Bureau of Standards has done a lot of work for the service in testing materials for construction. There is another man that I forgot to mention, a very valuable engineer and geologist, Mr. Homer Hamlin. The most work that has been done perhaps was done by Mr. Arthur P. Davis while he was a director of the service.

Mr. SWING. Do the findings and the reports of the geologists, Ransome, Jenison, Homer Hamlin, corroborate and fit into your report?

Mr. WEYMOUTH. Yes, sir.

Mr. SWING. Now, what about this consulting board? You mentioned Mr. A. J. Wiley and Mr. Louis Hill. Was there anyone else consulted?

Mr. WEYMOUTH. Well, we have utilized our regular force a great deal; Mr. James Munn, who was formerly a contractor and is, perhaps, one of the best construction men in the country. We have had his advice, especially in reference to unit costs that we have used in the estimates.

Mr. SWING. Now, has this advisory board considered your general scheme—your general plan?

Mr. WEYMOUTH. Yes, sir.

Mr. SWING. Have they given it their approval—the general method of developing the river?

Mr. WEYMOUTH. We have considered with them each step that we have taken as it came up and it has had their approval.

Mr. SWING. It has had their approval?

Mr. WEYMOUTH. Yes, sir.

Mr. LEATHERWOOD. Which board is that?

Mr. SWING. That is the Wiley, Hill, and Munn board.

Mr. WEYMOUTH. And Mr. Savage, our chief designing engineer.

Mr. SWING. And Mr. Gaylord?

Mr. WEYMOUTH. And Mr. Gaylord and Mr. Dibble.

Mr. SWING. If you were spending the money of a private corporation which was seeking to locate the best place to solve the river problem, would you recommend to the board of directors of the private corporation the expenditure of more money to gather more data than what you have now, or would you advise them to act upon the data which is now collected?

Mr. WEYMOUTH. I would advise them to act on the data that we have.

Again, Mr. Weymouth, testifying before the Senate committee on Senate Resolution 320, page 816, said:

Senator ODDIE. What can you tell us as to the reliability of the men who did that drilling, the care they used, and the accuracy of their work?

Mr. WEYMOUTH. Well, I think that the gentleman in charge of the drilling crew, the diamond-drilling man, Mr. George Hammond, is perhaps the most experienced diamond-drill man in this country; he has been doing that work for years; he drilled the Hudson River crossing for the New York water supply; he has been at that work all his life. The engineer locally in charge, Mr. Walker Young, I regard him as one of the brightest young men I have ever met. I might say his work was continually supervised not only by myself but by consulting engineers, such as Mr. Wiley. Mr. Wiley has probably built more dams than any other man in America.

I merely give this glimpse of the engineering background of Boulder Dam to indicate that there is not a great deal left in doubt. It must be remembered that the studies referred to were made pursuant to an act of Congress. They were official. The best organization in the Government was used. No other governmental organization has a corps of engineers trained in the art of hydraulics in general and of dam building in particular. The Reclamation Service has successfully constructed approximately 100 dams of various sizes, including some of the largest constructed in the world. Again it must be remembered that these dams have all been successful. Not one has failed.

Likewise it is interesting to note that the cost of these great dams have proven to be remarkably near the estimates. For instance, the American Falls Dam in Idaho was estimated to cost $8,500,000; the actual cost was $7,300,000. Arrow Rock, also in Idaho, was estimated to cost $6,250,000; the actual cost was $4,496,731. The Belle Fourche Dam in South Dakota was estimated to cost $1,040,416; the actual cost was $1,259,515. On this dam contractors failed and the work was delayed two years, which accounts for the actual cost being slightly above the estimate.

The Elephant Butte on the Rio Grande in New Mexico was estimated to cost $5,600,000; the actual cost was $5,004,216. The Roosevelt Dam in the Salt River of Arizona was estimated to cost $3,750,000; the actual cost was $3,806,277. On the Roosevelt Dam the estimate was for a dam 190 feet high, but was actually constructed 220 feet high. Tieton Dam in Washington was estimated to cost $4,020,000; the actual cost was $3,756,256. I mention just a few of the larger dams to indicate not only that this corps of expert construction engineers has successfully constructed a very large number of dams, but also that the cost estimates were conservative and on the average the dams actually cost less than the estimate.

Not only was the study of the Boulder Canyon official and authorized by act of Congress and done by experts who have proven their ability, but it was not the work of only one man. In addition to Mr. Weymouth, nine engineers of outstanding reputation actively participated in the work; in addition to the regular force, 25 or 30 engineers in the office of Mr. Savage at Denver aided; and the consulting board, consisting of A. J. Wiley, Louis Hill, and James Munn, not only assisted but carefully checked every result. In other words, all together something like 43 engineers of the regular force and of the consulting board, in addition to the Geological Survey and the Bureau of Standards, collaborated in the studies which have been presented. In addition to these 43 engineers in the Bureau of Reclamation and their various consulting boards, we find many other engineers giving their approval, among whom are: Hon. Herbert Hoover, the present Secretary of Commerce; Dr. Elwood Mead, who at that time was not connected in anywise with the Reclamation Service; and the late Gen. George Goethals. These three men are engineers of international reputation.

It has been charged that General Goethals did not actually give his approval to the construction of this dam. The testimony, however, quite disproves this assertion. Before the House committee on H. R. 2903, page 747, we find this testimony in response to questions by Mr. HAYDEN, then a member of the House and now the junior Senator from Arizona:

Mr. HAYDEN. And any type of dam, if properly constructed, would be a safe dam at Boulder Dam?

General GOETHALS. I think so.

Mr. HAYDEN. Have you given consideration to the advisability of utilizing any other dam sites on the Colorado River, other than at Boulder Canyon proper?

General GOETHALS. No. I have read up on the subject, and Boulder Canyon site seems to give a solution to the problems that must be met on the Colorado River; that is, flood control, silt control, irrigation, and power.

Again, on page 753, he said:

Mr. RAKER. In other words, can you build a rock-filled dam with the same strength of resistance as you have the other side of the gorge?

General GOETHALS. Of course you can; you can build anything you please, if you make due allowance for it; if you have got the courage and the confidence in yourself to do it, you can do it.

Mr. RAKER. That is the point, exactly.

General GOETHALS. But the vast majority of people become timid as soon as you go beyond anything that has already been tried; you have got to have a leader, and leaders are few. That is the crux of the whole situation.

Mr. RAKER. And there would be just as much fear of the side breaking out?

General GOETHALS. Absolutely.

Mr. RAKER (continuing). As there would be of the rock-filled dam?

General GOETHALS. Absolutely. Gatun Lock, they said, was going to break through, if we ever built that dam; and the water was going to leak under that dam, if we ever attempted to build it without going to rock. You have exactly the same conditions. You will find lots of people, as soon as you say a rock-filled dam, they will say, "Boo."

As to interfering with other development, General Goethals testified at page 756:

Mr. RAKER. And did you gather this further fact from those reports, that if the Boulder Canyon Dam was put in first, it would not interfere with subsequent development?

General GOETHALS. That is right.

Mr. RAKER. With subsequent developments below?

General GOETHALS. No; above.

Mr. RAKER. There would be a complete development, as well as permitting the utilization of the stream above?

General GOETHALS. That is the keystone of the arch; get that in and the rest follows on.

So we have General Goethals, the builder of the Panama Canal, an engineer of ability, foresight, and courage, telling us that any type of dam, if properly constructed, would be safe at Boulder Canyon.

The Secretary of the Interior, that he might leave nothing undone in regard to investigation and study, appointed a year ago what he designated as a fact-finding commission. This fact-finding commission, consisting of Professor Durand, an engineer well known, ex-Governor Scrugham, of Nevada, an engineer as well, and Governor Emerson, of Wyoming, also an engineer, and Hon. James A. Garfield, former Secretary of the Interior, reported in writing to the Secretary of the Interior. Their testimony is before us. It is set forth in the report. Each one of those gentlemen constituting the fact-finding commission held that the appropriate site for a dam in the Colorado River is Boulder Canyon or Black Canyon, and that a dam could be legitimately, feasibly, and well erected there. Unless it be required that I read it, I will ask here, as it is set forth in the report, that the testimony of these three gentlemen on that point be included in the RECORD without reading.

The PRESIDENT pro tempore. Without objection it is so ordered.

The testimony referred to is as follows:

Mr. GARFIELD. The jurisdiction of a single State is not broad enough to deal with all the problems that necessarily arise in the construction and development of such a project as that under consideration. The United States alone has the power properly to safeguard the interest and rights of all those who may be affected by such a major development, and is, furthermore, the only political agency that can deal with and settle the international questions arising with Mexico.

The United States Government is not only the political sovereign whose jurisdiction is broad enough to deal with all the phases of the problem but it is likewise the largest landowner along the bed of the Colorado. Hence, whatever theory of the use of water is adopted in any particular State, the use of the public domain in that State can only be obtained under congressional act, and Congress may impose in such act whatever conditions it deems wise.

Governor EMERSON. The construction and operation of the described project is a logical and in some phases even a necessary undertaking of the Federal Government, for the following reasons:

(a) The international situation applying to the river.

(b) Flood control as a national problem.

(c) Reclamation of land as an accepted Government activity.

(d) Magnitude of project and of various interests involved.

Governor SCRUGHAM. With all of the above factors in mind, it appears entirely proper and practicable for the Federal Government to undertake the first step in river development, which is the construction of an adequate dam and reservoir for flood and silt control, reimbursing itself for the costs from sales of stored water and the large quantities of power which can be incidentally generated. Future developments of the river by private or municipal enterprise will suffer no interference therefrom.

Mr. JOHNSON. Much was made by the Senator from Utah [Mr. SMOOT] of the statements of Messrs. Kelly and La Rue. We may dismiss the former. I do not care to indulge in any animadversions upon an engineer who represents the United States Government and at the same time represents a power company. But while I do not desire to indulge in any animadversions upon such a gentleman I decline to accept his testimony in reference to any public work that shall be undertaken by our people.

I pass, therefore, Mr. Kelly, although much might be said concerning his attitude and the testimony that is reputed to have been given by him recently before the House committee.

Mr. La Rue was heard at extraordinary length by the Committee on Irrigation and Reclamation. We listened to him, I think, for a full day, listened to him with very great attention, and after listening to him the Committee on Irrigation and Reclamation reached, I think, the conclusion that he was, as he said, a hydrographer, and that the particular matter that we were dealing with was one upon which he was not in reality able to aid the committee in reaching a determination. We decided the report that had been submitted and the conclusions of the Government engineers were infinitely preferable to Mr. La Rue's views.

But, beyond that, sir, neither Kelly nor La Rue—and I call particularly this to your attention—has at any time assailed the engineering feasibility of the dam we propose to erect at Boulder Canyon. They may disagree in detail, one as to the cost, the

other as to the erection of more than one dam, or as to the mode of the development of the Colorado River in the best fashion, but as to the engineering feasibility of the structure that we seek neither interpose objection.

I call your attention, too, to the fact that the joint report that was signed by Mr. Kelly and the other engineers who were presumed to have looked through the Weymouth plan concluded with the statement:

It is believed that the most advantageous combination of the projects for the logical development of the Colorado River will include a dam at or near the site chosen by the Bureau of Reclamation for the Boulder Reservoir that will raise the water level to an elevation somewhere between 1,020 and 1,250 feet.

So that we see that the two witnesses, who, it was asserted by the Senator from Utah, had filed a sort of minority report, in reality do not disagree upon the main feature of the construction nor its feasibility.

I recall the testimony of the Secretary of Commerce, on page 601, in the Senate hearings. He said:

There are theoretical engineering reasons why flood control and storage works should be erected farther up the river and why storage works should be erected farther down the river; and I have not any doubt that, given another century of development on the river, all these things will be done. The problem that we have to consider, however, is what will serve the next generation in the most economical manner, and we must take capital expenditure and power markets into consideration in determining this. I can conceive the development of probably 15 different dams on the Colorado River, the securing of 6,000,000 or 7,000,000 horsepower; but the only place where there is an economic market for power to-day—at least, of any consequence—is in southern California, the economical distance for the most of such dams being too remote for that market. No doubt markets will grow in time so as to warrant the construction of dams all up and down the river. We have to consider here the problem of financing; that in the erection of a dam—or of any works, for that matter—we must make such recovery as we can on the cost, and therefore we must find an immediate market for power. For that reason it seems to be that logic drives us as near to the power market as possible and that it therefore takes us down into the lower canyon.

The dam there is recommended by the reclamation engineers, and I believe their latest view is 540 feet in height. This would, I believe, serve the triple purpose of flood control, storage, and power, so far as we can see ahead, for the development of irrigation, domestic water supply, and need of power for a good many years to come.

I do not believe that construction at that point is going to interfere with the systematic development of the Colorado River for storage and power above and below.

Dealing with the question of loss by evaporation, Mr. Hoover testified, on page 617:

The CHAIRMAN. Another objection urged by capable engineers is that construction of a dam and impounding of water at the Boulder Canyon would result in excessive evaporation * * *.

Secretary HOOVER. Oh, assuming that would happen, it would not do any harm in the next generation and a half or two generations. We are not going to be using all of the water of the Colorado River for another 50 or 75 years. When the time comes that evaporated water is a large item there you will find a number of other dams already built on the river and you can reduce the level and thus the evaporation at the Boulder Dam. You can add to this in the next 75 years, to any number of contingencies.

Again, Mr. President, the objection is made by the Senator from Utah to the Government undertaking this work at all, but I assume he is familiar with the fact that private enterprise has in days gone by, and only recently too, signified its intention, if it had the opportunity and could obtain the permit, to do exactly the thing that the Government is going to undertake through Government engineers. When Mr. Miller and Mr. Ballard testified before the House committee and told of their desire to erect a dam at Boulder or at Black Canyon, just as we seek to do, there was no Senator from Utah to rise in his majesty and in his might and talk about the capability of the dam to withstand the waters of the Colorado River at that place or in any other place that Mr. Ballard or Mr. Miller, of the Southern California Edison Co., desired to erect their works.

There is a rule, sir, in this body which is invoked by some men, a rule for the Government of the United States of one sort, and another rule for an electric power trust or an electric company of an entirely different sort. That we may preserve the suggestions that were made by those who represented the Southern California Edison Co. I ask that I may print in the RECORD here as a part of my remarks the testimony given by John B. Miller, president of the Southern California Edison Co., before the House Committee on Irrigation and Reclamation and the testimony of R. H. Ballard, vice president and general manager of that company, showing their desire to take this particular territory and this particular site and others and expend upon it, as Mr. Miller said, thirty million or forty million dollars per year.

The PRESIDING OFFICER (Mr. THOMAS in the chair). In the absence of objection, permission will be granted to insert the testimony referred to by the Senator from California.

The matter referred to is as follows:

HEARINGS BEFORE THE COMMITTEE ON IRRIGATION AND RECLAMATION

(H. R. 2903, 68th Cong., 1st sess.)

JOHN B. MILLER, PRESIDENT SOUTHERN CALIFORNIA EDISON CO.

This company, if given authority by the States whose water rights are affected, and if granted a license therefor under the Federal water power act, is prepared to undertake and itself finance dam construction on the Colorado River which will not only serve the purpose of hydro-electric-power production but will also provide the same full measure of flood control and supply of water for irrigation of arid lands as is contemplated under the pending bill. Its applications for license to carry on power development on the Colorado River are already on file with the Federal Power Commission and can be referred to for particulars (p. 434).

Immediately upon securing the necessary Federal and States' authority we are prepared to undertake and finance construction work at the rate of $30,000,000 to $40,000,000 per year.

R. H. BALLARD, VICE PRESIDENT AND GENERAL MANAGER SOUTHERN CALIFORNIA EDISON CO.

Mr. RAKER. How long would it be before you would be able to have any construction if your company was given a license?

Mr. BALLARD. I should say that after the granting of a license we would begin construction in a week.

Mr. RAKER. And how long would it be before there would be any dam in there whereby the flood waters would be to the same extent controlled as well as, perhaps, the electrical development taken care of?

Mr. BALLARD. Within two years.

Mr. RAKER. That would be a construction at what point?

Mr. BALLARD. That would be one of the lower constructions.

Mr. RAKER. Needles, Topock, near the Black Canyon?

Mr. BALLARD. Well, I do not think that the company itself would construct the Topock Dam. That is strictly a flood-control proposition, as I understand it.

Mr. RAKER. That will be practically eliminated, so far as the electric company is concerned?

Mr. BALLARD. Yes, sir; that is purely and simply a flood-control proposition. Mr. Barre and other engineers tell me it should be considered in the interest of flood control, entirely separate from power.

Mr. RAKER. And any money invested in the Needles or Topock Dam and Reservoir would not add anything to the electrical development.

Mr. BALLARD. Excepting this, that with the developments up above the lower dam would act as a reregulating reservoir, which would be of very considerable value to power operation.

Mr. RAKER. But they could generate some electric energy from the lower dam.

Mr. BALLARD. They could later; but in the meantime, before they generate any electricity, the fact that there would be a reservoir down below would facilitate the power operations above and would be of value to those operations, removing the necessity of considering flood control every minute of the time in connection with the withdrawals of water or the operation of the power plant (pp. 492–493).

Mr. RAKER. Now, these applications that you have filed, I have understood from you this morning that they are filed with the intention, with the purpose, of carrying them forward to completion.

Mr. BALLARD. Yes; there is not the slightest doubt of that. There is every reason why they should go forward. The Colorado River development interconnected with our own development will be very, very beneficial and should be undertaken at once. There should be no delay. It is the intention of our company, if the petitions are granted, to immediately begin construction, without the slightest delay, to carry the construction forward (p. 494).

Mr. RAKER. What authority were you given when you came here to appear before the committee and make the presentation as to the attitude and what the Edison Co. would do if it was given permission and this was granted?

Mr. BALLARD. I was instructed by the president to come and make those statements (p. 495).

Mr. BALLARD. If we did not have the Colorado River development, then in the course of time, and before many years—12 or 15 years—the available sources of water-power development in our section of California would be exhausted. Then, the alternative is to go to the production of electricity by steam, installing more steam turbines and burning oil and natural gas, and with the exhaustion of those, burning coal, but we think the development of the Colorado River would be far better than a resort to steam-plant operation for the main supply,

although it is necessary in connection with our own development, and will be necessary in connection with the Colorado River development, to also have steam-power generating plants (p. 502).

Mr. JOHNSON. Is it not a strange thing, is it not a remarkable thing, that all the objections arise when we are going to do a humane thing for our people and when we are going to erect by the Government a dam that ought to challenge the admiration and fire the imagination of every man who has anything to do with it—is it not a remarkable thing that then fanciful objections are interposed and the plan is called fantastic, but when the Southern California Edison Co. or another power company files upon this site, as it has done, sir, and upon every other site that there is for the development of power on the Colorado River—is it not a remarkable thing the acquiescence with which their filings are viewed by some people and the enthusiasm with which the work of these power companies is viewed? To erect this dam for the people is fantastic and absurd; to give private power companies the right to do exactly the same thing is a marvelous and wonderful undertaking. In one instance it is unsafe and threatens life; in the other it is safe and without danger to our people.

Do not think, even though the engineering data is here replete and full that the Secretary of the Interior would proceed without due caution. There is a law upon the statute books to-day, a law which I believe was passed at the instance of the junior Senator from Arizona, so that it might be applicable to certain dams built in his State, by which the Secretary of the Interior may employ, as he desires, experts to examine and oversee any technical constructions. The law is so brief that I read it, as follows:

Joint resolution authorizing the Secretary of the Interior to employ engineers for consultation in connection with the construction of dams for irrigation purposes (act June 28, 1926, ch. 704, 44 Stat. 776)

SECTION 1. Engineers for consultation on plans for dams; retired Army officers eligible: That the Secretary of the Interior be authorized, in his judgment and discretion, to employ for consultation on the plans and specifications for any dam proposed to be constructed by the Department of the Interior the services of not more than three experienced engineers, determined by him to have the necessary qualifications, without regard to civil-service requirements and at rates of compensation to be fixed by him for each, respectively, but not to exceed $50 per day and necessary traveling expenses, including a per diem of not to exceed $6 in lieu of subsistence for each engineer, respectively, not exceeding in the aggregate more than $3,500 for any engineer so employed for the time employed and actually engaged upon such work: *Provided*, That retired officers of the Army may be employed by the Secretary of the Interior as consulting engineers in accordance with the provisions of this act (44 Stat. 776).

I would be perfectly willing to meet the fears that may be expressed by any Member of Congress or by any other person by putting into this bill an amendment providing that the Secretary of the Interior may employ such experts as he may desire, and that he may have such sum as may be deemed appropriate to pay such experts and have them do anything that reason or wisdom might suggest.

There is no question of the safety of this dam. There on the wall [indicating] are photographs of the territory. It does not need the eye of an engineer to see that God has built the walls there already; that nature has furnished the very foundation upon which a dam may be constructed; and, with the walls there fashioned by nature in order that we may construct a dam of the character that we desire, it only remains for man to have the courage to go ahead and do the work; to do as Roosevelt did when the Panama Canal was at stake and at issue—to "make the dirt fly" and to decide to do the work and let others do the talking.

Mr. President, it has been rather a sad thing that the prophecy I made in opening this case should have been justified in the remarks made by the senior Senator from Utah. I said then that certain individuals would seize upon the St. Francis Dam disaster in the San Francisquito Canyon in California in order to read a horrible lesson into dam construction in this country. He seized upon it with an avidity and an enthusiasm that was worthy of Josiah Newcomb, of the Power Trust, and seizing it with that avidity and that enthusiasm, he dwelt upon the possibilities if the dam that should be erected at Boulder Canyon should thereafter be destroyed.

When the St. Francis Dam disaster occurred Congressman SWING telegraphed those who were familiar with the proposed construction of the Boulder Dam and the site there, and also with the St. Francis Dam and its site, asking whether or not in their judgment the catastrophe at the St. Francis Dam in any way affected the proposal to build a high dam in Boulder Canyon. He received replies as follows:

Former governor and former State Engineer J. G. Scrugham, of Reno, Nev., special advisor to the Secretary of the Interior, states:

St. Francis Dam disaster has no bearing on Boulder Canyon construction, as physical conditions are entirely different. Boulder Dam founded on monolithic rock braced between almost vertical canyon walls.

Dr. W. F. Durand, one of Secretary Work's special advisors on Boulder Dam, an engineer of the highest repute and standing, states:

Do not consider St. Francis Dam disaster cause for any modification my report to Secretary Work. Geological and physical conditions entirely different in the two cases. Dam site and foundation condition Boulder Canyon carefully and thoroughly examined by deep rock borings and extended study by geological experts. Safety high dam Boulder Canyon based upon these two lines evident.

Governor and former State engineer, Frank C. Emerson, of Wyoming, also a member of Secretary Work's advisory board, states:

I do not consider that the failure of the St. Francis Dam would require modification of my report as a special advisor to Secretary Work upon the Colorado River project. The said report states, under the discussion of conclusion 5, that at either Boulder Canyon or Black Canyon is found available an "excellent dam site both as to foundation conditions and side-wall materials." Either the granites of Boulder Canyon or the breccia of Black Canyon are of such strength as to safely carry the heavy loads that would be entailed by the weight of the dam itself and the pressures that would result from the impounding of water.

Mr. A. J. Wiley, member of the American Society of Civil Engineers and member of the American Institute of Consulting Engineers of Boise, Idaho, who studied the Boulder Dam project for the Secretary of the Interior, and who also acted as chairman of the governor's board for the examination of the St. Francis failure, states:

The St. Francis Dam did not fail because of any defect in the accepted theory of solid concrete gravity dam design. It failed simply and solely because the material upon which it was built was not strong enough to resist the pressure transmitted to it by the dam. * * *

As compared with the strength of 523 pounds per square inch when dry to practically zero when wet as shown for the red conglomerate foundation under the west wing of the St. Francis Dam, the granite bedrock at the Boulder Canyon site of the Boulder Canyon Dam has a compressive strength of 22,200 pounds per square inch when dry and 19,000 pounds per square inch when wet. The breccia foundation of the Black Canyon, which will probably be the adopted site for the Boulder Canyon Dam, has a compressive strength of 13,900 pounds per square inch when dry and 11,100 when wet. The maximum compressive stress on the foundation will be about 550 pounds.

Prof. F. L. Ransome, professor of economic geology of the California Institute of Technology, formerly of the United States Geological Survey, who spent more than a month carefully studying the Boulder Canyon site on the ground, and made a favorable report thereon to the Interior Department, states:

The disaster of the St. Francis Dam was clearly due to the placing of the dam on an improper foundation. Nothing in the failure indicates that the design and construction of the dam itself was at fault. The gravity type concrete dam is still regarded by engineers as one of the safest and most permanent of man-made structures. I still regard the Boulder Canyon and Black Canyon sites as excellent for a high dam. There is no possibility at either of these sites for such a failure of foundation rock as occurred at the St. Francis Dam. During my careful examination of the Boulder and Black Canyon sites I saw no earthquake cracks and no evidence of the geological recent movement of the rocks. Had such cracks, as are mentioned by Mr. Douglas, been present they could not have escaped my notice.

Much was made by the Senator from Utah of the testimony of Mr. Walter Gordon Clark, and there was a slight bit of repartee between him and the junior Senator from Nevada [Mr. ODDIE] concerning the earthquakes that had occurred in that vicinity. The evident purpose of the Senator from Utah was to demonstrate that earthquakes were common in Black Canyon or in Boulder Canyon, and that these earthquakes rendered unsafe any construction such as is contemplated. His case was made entirely upon the testimony, as he asserted, of Mr. Walter Gordon Clark, a very excellent engineer.

After the speech of the Senator from Utah I received, without any solicitation whatsoever, and without any knowledge of where the gentleman was, a telegram from Mr. Clark reading as follows:

To-day's newspapers carry a reference to me in connection with Boulder Canyon bill. If report as printed is correct, then I have been incorrectly quoted. I, with engineering party, was camped in canyon at time earthquake occurred. Movement on north side of canyon was apparently greater than movement on south side, and, due to more precipitous side walls, brought down greater quantity of rock. Later investigation showed that quake, while not heavy, had left evidence from southern end of Black Canyon to the mouth of the Virgin River. This, however, in nowise discredits Boulder Canyon Dam site.

Do you not remember how the changes were rung by the Senator from Utah upon the testimony of Mr. Clark, and how he drew the awful picture of an earthquake occurring that would shake this dam, destroy it, and then that the great amount of water stored would flow down, as the water from the St. Francis Dam had flowed down the San Francisquito Canyon, and would overwhelm the peoples of Arizona and of California? But Mr. Clark wires me:

This, however, in no wise discredits Boulder Canyon Dam site. It is probable that most of the canyon follows line of fault. See General Goethals's testimony before House committee, H. R. 2903, part 4, page 747. After three years' careful study by General Goethals and myself we concluded that Boulder Canyon was the best, safest, and most desirable dam site on the river, and that fault line would not affect desirability of location but would only influence type of dam.

Mr. President, we found the Senator from Utah asserting General Goethals had never expressed an opinion favorable to the Boulder Dam site. We found him using Mr. Clark, the eminent engineer, as a witness in his behalf concerning the Boulder Dam site. Here we have from Mr. Clark, under date of May 5, 1928, the distinct and definite refutation of the Senator's words:

After three years' careful study by General Goethals and myself we concluded that Boulder Canyon was the best, safest, and most desirable dam site on the river, and that fault line would not affect desirability of location but would only influence type of dam.

The telegram then proceeds:

See my testimony before House committee, H. R. 2903, part 4, pages 773 and 775. General Goethals and I recommended rock fill dam as being more flexible and possessing higher factor of safety in the event of movement than would be the case with either concrete or masonry. I have always indorsed the Boulder Canyon Dam site without reservation as the safest and most desirable dam site between the foot of the Grand Canyon and the Mojave Valley. Please pass this information on to Senators SMOOT and ODDIE.

WALTER GORDON CLARK.

I pass it on to the senior Senator from Utah and to my friend, the junior Senator from Nevada. It would be of no value to pass on the opinion of General Goethals, of course, to the senior Senator from Utah; but I pass it on, nevertheless, in the hope that he may put it in some other address upon this subject, one not so lengthy but more accurate, and that General Goethals testified before the House committee and when interrogated by the Senator from Arizona [Mr. HAYDEN] spoke thus:

General GOETHALS. I have seen the fault which Mr. Clark pointed out that he had noticed there.

Mr. HAYDEN. Are you convinced that the danger from earthquakes is so serious that a rigid masonry type of dam should not be adopted at that site?

General GOETHALS. No. As between the masonry dam and the concrete or the rock-filled dam going to that height I would rather put in a rock-filled dam; that is all.

Mr. HAYDEN. Any type of dam, if properly constructed, would be a safe dam at Boulder Canyon?

General GOETHALS. I think so.

Mr. C. E. Grunsky was one of the engineers on the Panama Canal, an engineer of international reputation. Very recently he made a statement in regard to this site and its situation. He said:

If the high dam in Boulder or Black Canyon is authorized by Congress, such dam in no event will be erected until after fullest investigations have been made not only as to sufficiency of the structure but also of the sufficiency of the geologic structure at the dam site and the adaptability of the type of dam to the dam site and its geologic structure. Failing in getting favorable report, no department of the Government would venture to proceed. The measure pending carries its own safeguards.

This investigation which I have outlined can not be made before authorization for the structure. It must follow authorization but precede construction. I am confident that Arthur P. Davis, F. E. Weymouth, and the engineers working under them in the Bureau of Reclamation have investigated sufficiently and that the engineering data which they have collected is a safe basis for action by Congress. They have built the outstanding dams of the world.

The Arrowrock Dam, built by the Bureau of Reclamation when Davis was at its head, is 325 feet high. Davis is building one now for Oakland and the other east bay cities in California equally high. A higher dam presents no new problems and can be safely built with utmost confidence if the foundation bedrock and sidewalls are all right. There is no reason apparent at the present to create doubt as to the safety of a high dam in Boulder or Black Canyon.

The silt problem—

And of this I shall have more to say in just a moment in the very brief remarks with which I conclude:

The silt problem in the Colorado River is a reason for building a high dam with large storage capacity. We know the river carries a large amount of silt. The amount carried in suspension in the water varies from three-tenths of 1 per cent to as much as 3 or 4 per cent by weight.

The aggregate amount of silt carried in suspension in the lower reaches of the river is about 100,000 acre-feet per year. To this there is to be added the silt which is entrained by the waters of the river along its bed, the so-called bed load. The amount of this is not definitely known.

In view of the large quantity of silt which it is known will have to be cared for a reservoir of great capacity has a large advantage over several small reservoirs. It will take many more years for the reduction of its capacity by silt deposit than would be the case with reservoirs of small capacity. A reservoir of great capacity should be expected to give undiminished service on the Colorado much longer than a number of equivalent small reservoirs, because the amount of silt trapped in a number of reservoirs will be larger than would be trapped in a single reservoir and because the loss of effectiveness of a serial of small reservoirs will begin earlier than in the case of a reservoir which will fulfill its purpose adequately even after its capacity has been materially reduced by the deposit of silt. A high Boulder Dam would create a reservoir that could receive the silt and would continue to function properly for a very long time.

I received a wire as well from Anson H. Smith, a well-known citizen of Kingham, Ariz., in regard to the statements made concerning earthquakes. He says:

Statements that Boulder site is in earthquake zone absolutely false. Boulder Canyon in massive granite and most ideal site geologically. Oldest inhabitant never felt quake and adobe houses built there in early sixties show no evidence of temblors. Old stone foundation laid up with stone and mud in canyon is still intact, built in 1864. Mohave Canyon is in volcanic and conglomerate, Glenn Canyon is sedimentary, and whole territory north of Flagstaff shows daily earth movement.

There is one other question to which I want to advert very hastily. I want to demonstrate, if I am able to do so, the utter hollowness of the pretense that there should be a flood-control dam built in the Colorado River or a flood-control appropriation made. I desire, first, that the Senate may understand that one of the great problems of the Colorado River is silt. As much silt comes down the Colorado River in a year as will equal the entire excavations of the Panama Canal. This silt coming down the Colorado River is one of its gravest and greatest problems, and it has been in the past one of the reasons that have caused the floods of that river.

A dam that is built in the Colorado River must either impound that silt or permit it to pass. If it permits it to pass, then it is of doubtful value to the territory below, because it is the constant filling up of the Colorado River from the silt filling up, filling up, filling up, that causes the grave danger of flood in that territory. If the design is to impound the silt, it is obvious that a low dam will not do the job as a high dam will; and with the immense quantity coming down a low dam will serve its purpose for a very brief period indeed.

Beyond that, sir, when it comes to the question of a mere flood-control dam, we find in united opposition to any such dam the Governor of the State of Utah, the Governor of the State of Wyoming, the Representatives of the State of New Mexico, and the Representatives of the State of Colorado. I read from the testimony taken before the House Committee on Irrigation and Reclamation so that there may be something of an adequate understanding of the suggestion of a flood-control dam. I read first from the testimony of H. S. McCluskey, member of the Colorado River Commission of Arizona:

Mr. MCCLUSKEY. Well, I will go further; I assert that if the upper basin States will not object to the building of a flood-control dam and an agricultural development in California, the State of Arizona will not object.

Mr. SWING. Now, is that because you think they ought not to object, or do you make that offer because you think you are perfectly safe in making it?

Mr. MCCLUSKEY. I know they will object (pp. 146, 147).

George H. Dern, Governor of the State of Utah, used this language and said these things:

I have visited the Imperial Valley and have some first-hand knowledge of the flood menace. I agree that there is a flood menace, which is a constant dread and source of expense to the people of the valley, and I hope they may be given relief as speedily as possible (p. 195).

Utah, however, is in hearty sympathy with Imperial Valley's need for flood protection, and we are for it on any terms that will not infringe the rights of the upper States. I repeat that we are flatly opposed to the proposition that Congress shall authorize the construction of a mere flood-control dam at Government expense without first completing the Colorado River compact (p. 196).

* * * * * * *

Mr. DOUGLAS. Now, a word about flood control; are you opposed to flood control or flood relief?

Governor DERN. No; I tried to show yesterday that I am very sympathetic with flood relief. I am not opposed to it if we can get it for the Imperial Valley on the right terms.

Mr. DOUGLAS. You are perfectly willing to give adequate flood control to the Imperial Valley on the right terms? What, in your opinion, might be those terms?

Governor DERN. On such terms as will make it impossible for undue priorities to be set up and militate against us. We want our share of the water of the river definitely reserved for our future use and development, by exemption from the law of prior appropriation. When that is done we shall be very glad indeed to do everything within our power to give the Imperial Valley adequate flood protection. That priority applies to Mexico, remember, as well as to the lower basin States (pp. 258–259).

Mr. DOUGLAS. Do you object to storage of water in advance of a compact?

Governor DERN. Yes, sir; I do.

Mr. DOUGLAS. Governor, would you mind stating your reason for that?

Governor DERN. On account of the fact that any storage works would result in a regulated flow of the stream, which the lower States might put to beneficial use, and thereby acquire priorities which they would maintain were good. By that means they might acquire rights to practically the entire river before we got ready to use our share, and when we got ready to use our water we would be met by the claim of the lower States that they used the water first and had acquired a right to it. In other words, we would in a very literal sense be left high and dry and our future development would be limited or ended. It is essential to our future development that we shall have protection in advance of storage.

Mr. DOUGLAS. When I used the word "compact" in that question I was referring to a seven-State compact. In other words, your objections to storage in advance of a compact are applicable if you define that word "compact" as a seven-State compact. Is it your position that without a seven-State compact the upper basin States are not protected?

Governor DERN. They are not fully protected. We would have some protection under a six-State compact, but we would not have full protection. This is a matter in which we feel that we are entitled to full protection (p. 260).

The Governor of the State of Utah, the chief witness who is used by my Arizona friends, says that he speaks officially when he says that his State opposes the construction of a flood-control dam on the Colorado River at all. I have the testimony here given before the committees of both the Senate and the House upon that subject and it is so plain and unequivocal that there can be no question respecting it.

Mr. Francis B. Wilson, interstate river commissioner for New Mexico, wrote a letter to leader TILSON, which explains his views with a clarity and with an ability that I would not attempt to emulate. He, as well, says that flood control will not do the job, and he is opposed to it. He said:

Mr. SINNOTT. I understood you to say a moment ago that you were going to take up the matter of flood control.

Mr. WILSON. Upon that point I want to say that I am heartily in accord with the statements made by Governor Dern, except that I would go further. I embodied my ideas in that connection in a letter to Congressman TILSON, and I do not know that it is necessary for me to repeat them.

Mr. MORROW. You can put that into the record—that letter.

Mr. WILSON. I could do that. I think that does exactly state my position and states the position of New Mexico in connection with that particular thing. We are unalterably opposed to a mere flood-control dam, without a seven-State compact, because we do not believe that such a dam will satisfy any of the necessary conditions surrounding the situation. It certainly would not furnish flood control except as a temporary expedient. It could not take care of the silt from the river, and therefore, in our view, would not operate ultimately as a sufficient factor in that respect. I will not read the letter unless it is desired (p. 296).

The Boulder Dam project has for one of its principal purposes flood control; and while it may be argued by the advocates of a flood-control dam that this purpose will be satisfied by the construction of such a dam, yet it could not be anything more than a temporary expedient. I am not an engineer, but I view the desilting of the stream as important an element in flood control as that of actual control of the water during flood seasons. Any dam which is constructed must be adequate from both standpoints, and I am unable to believe that a mere flood-control dam will function efficiently as a desilting proposition. If it is a fact, and I have never heard it controverted, that the Colorado River discharges annually a volume of silt equal to the total amount of dirt removed for the excavation of the Panama Canal, it would appear that a flood-control dam could not remedy one of the most difficult factors in any program involving protection of the Imperial Valley. If I am correct in this conclusion, then a flood-control dam will fail essentially to accomplish the purpose of those who advocate it. No project except the Boulder Dam could fulfill adequately both purposes (p. 297).

The flood-control dam proposals seem to us to represent an effort on the part of those who do not want to see the project constructed to add to the controversial matter now before Congress by pitchforking into the arena ideas of alleged economy which have no place in any fair consideration of the subject, for the reason that the taxpayers' money is safeguarded by the power end of the project at Boulder Canyon (p. 298).

Frank C. Emerson, Governor of the State of Wyoming, says in so many words:

We would object to a flood-control dam or any reservoir proposed for large storage of water if a compact to protect the interests of the upper States were lacking.

Mr. L. Ward Bannister, special counsel for the city of Denver, said:

And so, too, in respect to mere flood control bills; I could not state the case any better than it was stated by Governor Dern. It is evident that the Government has no way of controlling the acquisition of priorities below a mere flood-control dam, and, threfore, no way of protecting the upper States. Again, if a dam were a mere flood-control dam, there would be no storage in it and, therefore, no way of satisfying existing priorities during the low flow of the river. There would be no imposing of the limitations of the Colorado River compact upon the basin in order to exercise as far as possible the statutory powers of Congress. So there is nothing in a dam for mere flood control (pp. 328–9).

Thus we have every State in the upper basin saying that it will not permit under any circumstances a flood-control dam. We have more than that. We have the indubitable fact that a mere flood-control dam would be utterly useless unless it impounded the silt that came down the Colorado River, and no mere flood-control dam would be built of sufficient height to do that thing. Some dams are built with a hole in them in order that the silt may pass through. You could not do that with the silt of the Colorado without injuring the land below and without inviting floods below. If you let it fill up in the few years that it would take to fill up, you have done an utterly futile and an utterly useless thing.

Here is a unified scheme and a unified plan. Here is the crystallization of the sentiment of the last 10 years in relation to the Colorado River. Here, finally, is the way by which flood control can be accorded, by which there may be irrigation and reclamation, by which we may give potable-water relief to the territory that requires it, by which we may solve an intolerable international situation. The only thing that stands in the way of all these beneficent purposes is that some men who are already rich beyond the dreams of avarice say, "You shall not have a dam where any power is generated."

Oh, we must be weak, we must be feeble, we must be worse than that, if the command or the mandate of those who sit in the city of Washington to-day as the masters of legislation is sufficient to restrain us from doing the things that this high dam would do and passing legislation so needed and beneficent.

It is said that a flood-control dam can be constructed 120 miles closer to the property to be protected at Boulder Canyon at a cost of $15,000,000. This refers to the Mohave site, commonly referred to as Topock. That was a new discovery of the Senator from Utah! It is not a new discovery. It is the scheme proposed by the power companies of southern California and the owners of land in Mexico on the other side of the line. It was their proposal from the beginning of this controversy, and from the very time that the first bill was introduced the men who own 850,000 acres of land over the border of Imperial

County, in Mexico, and the power companies of southern California, said, "We will let you build a low dam at Topock, build a low dam there that generates no power, we will permit the Congress of the United States and the Government of the United States and the Senate of the United States to enact legislation that thus we say you may enact, but if you enact anything different, we will exercise our veto power and forbid it." This suggestion of a low dam for flood control was originally proposed by the power companies, not that they expect it to be adopted, but because the strategy of private interests is always to suggest something other than that which will benefit the people, and thus transmute the contest.

The site of Topock was investigated by the Bureau of Reclamation in a preliminary way and is reported upon in volume 7 of the so-called Weymouth supplementary report, beginning at page 88 and continuing for the balance of the volume. The foundation was not drilled for the reason, as indicated, that the expense of drilling was not justified. Estimates were made, and it was found that for a 6,000,000 acre-feet flood-control reservoir the cost would be $15,391,238, and for a 10,000,000 acre-feet flood-control reservoir the cost would be $17,241,575. These estimates are without taking into account the cost of removing the railroad and other property including the town of Needles, which was estimated to cost nearly $9,000,000. In other words, the cost of a 10,000,000 acre-feet flood-control reservoir was estimated at $26,000,000 and of a 6,000,000 acre-feet reservoir at $24,000,000. Further estimates was made on a 4,000,000 acre-feet flood-control reservoir and the estimated cost was $22,500,000. Even these estimates do not take into account the total destruction of some 35,000 acres of irrigable land within the reservoir site. A reservoir constructed at this point would produce no power and there would be no means of repaying the Government the outlay of money required for its construction, and after all is said and done, it is not known that a reservoir can be constructed at that point at all.

Mr. A. P. Davis, former Director of the Reclamation Service, testified before the House Committee on Irrigation and Reclamation, H. R. 2903, page 1385, in a way which is very pertinent to the present discussion as follows:

> It has been said that flood control can be obtained more quickly by a dam in Mohave Canyon than by one in Boulder Canyon. This is not a reasonable assumption. The investigations of Boulder Canyon have occupied nearly three years and the same critics say they are not sufficient. No investigations of Mohave Canyon have been made and after these are completed it would be necessary to take up negotiations with the railroad and hotel companies and hundreds of property owners for the removal of the railroad and the city of Needles. * * * The development of Mohave Canyon for flood control only will cost about the same as the Boulder Canyon and will destroy 34,000 acres of irrigable land directly in the river bottom, mostly in Arizona. * * *
>
> It has been stated here that a flood-control dam can be provided at Mohave Canyon for $10,000,000—that, I believe, is in the testimony—whereas the facts are that this amount will be expended upon damages exclusive of the dam. * * *

After reciting numerous objections to the Mohave site, Mr. Davis continues:

> with all these facts staring us in the face to build a dam in Mohave Canyon would be inexcusable. This is the reason this site has not been drilled or otherwise investigated. Like hundreds of other sites on the river, a general knowledge of its conditions show so plainly that it is inadvisable that money spent on investigation would be wasted. Its one "virtue" is that it produces no power or so little that none of the power companies have applied for it, although anxious to possess all of the desirable sites.

The only recommendations for a dam at Mohave Canyon that have come to my attention are those of Mr. Stabler, Mr. LaRue, and Colonel Kelly. Mr. Stabler, at page 1548 of the hearings on H. R. 2903, states that the facts are not known and the estimates of cost are not much more than a guess. Mr. La Rue, on page 968 of hearings on H. R. 2903, states—

> since only meager data are available regarding the Glen Canyon and Mohave Canyon storage sites, it is not possible to prepare a reliable estimate of the cost of these projects.

Colonel Kelly gives the same indication in his testimony on H. R. 2903, at page 1274. While it may be, and doubtless is, a fact that a dam could be built at Topock in Mohave Canyon, it certainly is not a fact that it could be completed for $15,000,000. It is a fact that it would cost a great deal more and it is furthermore a fact that money spent at that site, while it might accomplish to a limited extent flood control, would accomplish none of the other purposes of this bill, namely, silt control, augmented water supply, control of the river as between the United States and Mexico, the approval of the Colorado River compact between the States, domestic water supply and power as a means of repaying the major part of the cost of the whole development.

We are told that the Mohave dam can be built and flood relief accomplished quickly, whereas it will take 10 years to accomplish flood relief at Boulder Canyon. The converse is true. As Mr. Davis testified, the Mohave site has not been drilled, and since the working season of 3 years was spent on the drilling of the site at Boulder Canyon, it may be assumed that it would take a like period at Mohave Canyon, and after the site is drilled and it is found a dam can be built at that point, then the Santa Fe Railroad and other properties must be purchased through private negotiations or condemnation proceedings, and after that it would take some years to build a dam, while all of these preliminary steps have already been taken at Boulder Canyon. The estimate for building the dam at Boulder Canyon is placed at about 7 years, but flood control will be accomplished within half of that time. In fact, it is estimated that the first units of the power plants to be constructed at that point will be placed in operation 3 years before the final completion. Certainly before power houses can be operated the river will be sufficiently controlled to accomplish a large measure, if not complete, flood protection. In other words, if the Boulder Dam is authorized now flood protection will be accomplished within 3 or 4 years, whereas at Mohave Canyon that time will be consumed in getting ready to commence construction.

At the time the matter was pending before the committee, and when the Senator from Arizona had asked the committee to approve an amendment for flood control alone, I took the matter up with the Department of the Interior. The department was opposed to it, as it ought to have been. The other day, however, I wrote again to the department and asked the views of the department upon the construction of a flood-control dam at Topock in the Mohave Canyon. I have here the letter, signed by the Secretary of the Interior, upon that subject. It is as follows:

THE SECRETARY OF THE INTERIOR,
Washington, May 19, 1928.

Hon. HIRAM W. JOHNSON,
United States Senate.

MY DEAR SENATOR JOHNSON: Receipt is acknowledged of your letter of May 16, 1928, requesting my views as to the construction of a low flood-control dam at Topock or elsewhere on the lower Colorado.

The Topock or Mohave Valley reservoir site is about 2½ miles below the Topock crossing of the Santa Fe Railroad. It is calculated that a dam built to raise the water surface 160 feet will have a capacity of about 10,000,000 acre-feet. A preliminary estimate prepared in February, 1924, shows the cost of this reservoir to be—

Capacity in acre-feet:	Estimated cost
4,000,000	$22,500,000
6,000,000	24,000,000
10,000,000	26,000,000

The disadvantages of this site are:

(1) It would inundate a large irrigable area and a valuable portion of an Indian reservation.

(2) It would submerge the town of Needles, a railroad division point.

(3) It would necessitate reconstruction of 18 to 20 miles of mainline, double-track railroad (Santa Fe).

(4) It would necessitate reconstruction of portion of a transcontinental highway.

(5) It is not a good power site.

(6) It is not large enough to provide storage for silt.

(7) The site is not adapted to raising the dam to provide for ultimate storage requirements.

(8) The proposed high dam at Boulder Canyon will furnish more than twice the storage at a little more than 50 per cent increase in cost.

Prof. W. F. Durand, who recently at my request made a special study of the Colorado River project, finds that this storage is entirely inadequate for the needful silt, flood, and general regulation and which can be secured at Boulder Canyon; also that a reservoir at Topock would be relatively shallow in depth and large in area, thus augmenting the loss of water by evaporation. The same considerations operate to render consideration of other possible sites below Boulder Canyon inadvisable.

As an alternative to Topock, it has been suggested that a dam be built at Boulder Canyon of such lower height as to provide only for flood control. The objection to this is that the foundations and regulating works are the most difficult and costly part of this construction. Such a dam would cost from $30,000,000 to $38,000,000 and would be open to the objection that its value would be rapidly impaired by silt deposits, and there would be no possibility of the large revenues from power which are anticipated from the higher structure.

To meet the needs of the lower basin the dam must be high enough and the reservoir large enough to satisfy all requirements for at least 50 years. Water users in the lower basin in Arizona and California

have already appropriated ten times the low-water flow of the river. This demand must be met, in addition to whatever rights Mexico may have acquired through actual use. Unless such provision is made there will be no satisfactory security for future development in either Arizona or California, and this uncertainty and menace will extend to subsequent rights to be established on the upper stream.

The feasibility of the all-American canal from a repayment standpoint depends upon the irrigation of the large area of fertile, irrigable land lying above the present Imperial irrigation district. To do this requires a greater additional water supply than the small reservoir above referred to would provide.

Failure to provide the water supply essential to the solvency of the all-American canal leaves the California irrigators in the Imperial Valley in the existing unsatisfactory state of dependence upon a Mexican concession, while the continued operation of that concession would mean inevitably a large increase in the irrigated area in Mexico.

Very truly yours,

HUBERT WORK.

These are some of the reasons, and some of the reasons only, why there should not be a low dam constructed at Topock. No appropriation for mere flood control could ever be obtained. Each department would object, and every upper basin State is emphatically against it.

I apologize to the Senate for the time that has been taken in this matter, but there was nothing else to do under the circumstances, when a gentleman stands here and reads a speech, a speech lasting two days, containing some 40,000 words, and assails for the first time in his connection with the history of this entire controversy the feasibility of the project that is before the Senate to-day. He has been familiar with it from the time that this bill was introduced, and when every other bill has been before the Congress of the United States. Never before did he assail it technically until he appeared upon the floor of the Senate with 40,000 words—I will not say written for him, but written by him, we will say—but then did he, for the first time, voice his opposition from an engineering standpoint to the construction of the dam at Boulder Canyon. Who better can judge—he or the engineers of the United States Government; he or 13 out of 14 members of the Committee on Irrigation and Reclamation who voted upon the bill? For two years we have sat in judgment upon this matter not only in Washington hearing words from the lips of witnesses but the committee, pursuing its duty, two years ago and a year and a half ago went down to that very territory and on a boat went through that very canyon. Not only that but it took testimony upon the very ground. It went to the cities of Arizona—Yuma, Prescott, and Phoenix—and took the testimony there offered. It went to Las Vegas and took testimony there.

The committee has pursued its investigations for a period of three years. Now, after it has pursued its investigations and declared in favor of the bill, now when every engineer of repute and standing that is not employed by a power company says it is a feasible proposition, now when we know the benefits that will come from a project of this sort, now shall we be halted, sir, in doing our duty because there is a power that is greater than government and that says we may not proceed in a constitutional way to perform our duty unto our people? This is the test, sir, of legislation. This is the test, sir, of the United States Senate. This is the test, sir, of whether or not in this country there yet exist enough men in official position to defy the power that comes from nine billions of dollars represented by a great trust, and whether or not we dare fulfill the mission that is ours and do our duty unto those who sent us here.

Mr. HAYDEN obtained the floor.

Mr. EDWARDS. Mr. President——

The PRESIDING OFFICER (Mr. THOMAS in the chair). Does the Senator from Arizona yield to the Senator from New Jersey?

Mr. HAYDEN. I yield.

Mr. EDWARDS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Curtis	Harrison	Mayfield
Barkley	Cutting	Hawes	Metcalf
Bayard	Dale	Hayden	Moses
Bingham	Dill	Heflin	Neely
Black	Edge	Howell	Norbeck
Blaine	Edwards	Johnson	Norris
Blease	Fess	Kendrick	Nye
Borah	George	Keyes	Oddie
Bratton	Gerry	King	Overman
Brookhart	Gillett	La Follette	Phipps
Broussard	Glass	Locher	Pine
Capper	Goff	McKellar	Pittman
Caraway	Greene	McLean	Reed, Pa.
Copeland	Hale	McMaster	Robinson, Ark.
Couzens	Harris	McNary	Sackett
Schall	Smith	Tydings	Walsh, Mont.
Sheppard	Steiwer	Tyson	Warren
Shipstead	Stephens	Vandenberg	Waterman
Shortridge	Swanson	Wagner	Wheeler
Simmons	Thomas	Walsh, Mass.	

Mr. McNARY. I desire to announce the necessary absence of the Senator from Illinois [Mr. DENEEN] and the Senator from Florida [Mr. FLETCHER] on business of the Senate.

The PRESIDING OFFICER. Seventy-nine Senators having answered to their names, a quorum is present.

Mr. NEELY. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. NEELY. I propose the following amendment to the pending bill (S. 728), which I ask to have reported from the desk.

The PRESIDING OFFICER. The clerk will read the proposed amendment.

The CHIEF CLERK. On page 2, line 24, strike out the period and insert a colon, and insert the following proviso:

Provided, That the laws of any State in which any part of the construction work herein authorized is performed, with respect to the employment of laborers and mechanics on State, county, or municipal public works, shall apply to the employment of laborers and mechanics upon any part of the construction work herein authorized.

Mr. NEELY. Mr. President, the laws of California and Arizona provide that in employing laborers and mechanics on public work American citizens—native and naturalized—shall be preferred to aliens. The law of Nevada goes further and provides a preference for the veterans of our various wars.

The object of the proposed amendment is to cause the Federal Government, in constructing Boulder Dam and in doing any other work immediately pertaining to the project, to preserve to our veterans and our citizens the rights and preferences conferred upon them by the laws of the States in which construction work on Boulder Dam may be done.

The PRESIDING OFFICER. The amendment will lie on the table and be printed.

ELIMINATION AND REDUCTION OF TAXES ON AUTOMOBILES AND THEATER TICKETS

Mr. NEELY. Mr. President, the revenue bill which the Senate passed last night relieves the people of the tax of 3 per cent on the selling price of automobiles, including Fords and all other cheap cars; it also relieves the patrons of theaters and other places of innocent amusement of all taxes on their tickets of admission which do not cost more than $3 each.

In view of the manifestly indefensible long continuation of these most intolerable nuisance taxes, I invite attention to the fact that on the 24th day of February, 1926, when the conference report on the existing revenue law was before the Senate I made the following motion:

First, to insist upon Senate amendment No. 108 repealing existing taxes and dues on tickets of admission to theaters and other places of amusement; and

Second, to insist upon Senate amendment No. 109 repealing the tax of 3 per cent on the selling price of automobiles.

I pleaded in vain with the Senate to adopt the motion which I have just read. The distinguished Senator from Pennsylvania [Mr. REED], in opposing the motion, said, among other things, as shown on page 4486 of the CONGRESSIONAL RECORD for February 24, 1926:

Mr. President, if the motion of the Senator from West Virginia should carry, this bill would go back to conference with instructions to stand on the repeal of the admissions tax, which means $23,000,000 to $24,000,000 a year off the revenue of the United States, and it would mean the striking out also of $69,000,000 now received from the tax on the purchase price of automobiles, 3 per cent on the manufacture's price of the automobile, a tax of about $7.50 on the average Ford touring car. It would mean a deficit in the Budget of the Nation of from $92,000,000 to $93,000,000 a year.

In spite of the pessimistic prediction that the adoption of my motion would create a deficit in the Budget of the Nation, we now know that there was at the end of the fiscal year 1926 a Treasury surplus of $377,767,817, and that there was at the end of the fiscal year 1927 a Treasury surplus of $635,809,922. The foregoing conclusively proves that the Federal Government has compelled the people to pay automobile taxes and taxes on tickets to theaters and other places of amusement during the last two years without a semblance of necessity or a shadow of justification. If my motion had prevailed two years ago, figures now available show that American automobile buyers would have been saved $66,000,000 a year, or a total of $132,000,000, and that American theater goers would have been saved $17,000,000 a year, or a total of $34,000,000.

Let me congratulate the country upon the fact that the Senate has after long and inexcusable neglect done what I implored it to do two years ago. Although no part of the vast sum unjustly collected from the theater goers and automobile purchasers during the last two years will ever be returned to them, they nevertheless have occasion to rejoice because of the fact that they will in the future escape the burdens of the indefensible nuisance taxes which they have so long and so unnecessarily been compelled to pay.

SENATOR HEFLIN'S TELEGRAM TO GOVERNOR MOODY

Mr. HEFLIN. Mr. President, I have here a copy of a telegram which I have just sent to Governor Moody, of Texas. The Texas convention meets to-day. I would like to have it read at the desk so that it will appear in the RECORD.

The PRESIDING OFFICER. Without objection, the clerk will read, as requested.

The Chief Clerk read the telegram, as follows:

WASHINGTON, D. C., *May 22, 1928.*

Gov. DAN MOODY,

Care Chairman Democratic Convention, Beaumont, Tex.:

The charge that Governor Smith is an ardent advocate of social equality; that the Manufacturers Record, of Baltimore, charges that there are dance halls in New York City where negro men and women dance with white men and women every night; and the charge that when the antilynching bill passed the House Tammany Democrats turned their backs on the South and did not give us a single vote have not been and can not be denied by Governor Smith.

J. THOS. HEFLIN.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed without amendment the bill (S. 2965) authorizing the State of Indiana, acting by and through the State highway commission, to construct, maintain, and operate a toll bridge across the Wabash River at or near Vincennes, Ind.

The message also announced that the House had agreed to the amendment of the Senate to the bill (H. R. 2808) for the relief of Ella G. Richter, daughter of Henry W. Richter.

The message further announced that the House had agreed to the amendments of the Senate to each of the following bills:

H. R. 6569. An act for the relief of Frank Hartman; and

H. R. 8926. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across Red River at or near Garland City, Ark.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5898) to authorize certain officers of the United States Navy and Marine Corps to accept such decorations, orders, and medals as have been tendered them by foreign governments in appreciation of services rendered.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the joint resolution (S. J. Res. 23) providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West and of the accession of the old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes; agreed to the conference requested by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. HAWLEY, Mr. TREADWAY, Mr. BACHARACH, Mr. GARNER of Texas, and Mr. COLLIER were appointed managers on the part of the House at the conference.

The message further announced that the House had passed a bill (H. R. 9343) to provide for dispensing with oath or affirmation as a method of verifying certain written instruments, in which it requested the concurrence of the Senate.

The message also requested the Senate to return to the House of Representatives the bill (S. 2972) for the further protection of fish in the District of Columbia, and for other purposes.

The message further announced that the President of the United States having returned to the House of Representatives the bill (H. R. 5681) to provide a differential in pay for night work in the Postal Service, with his objections thereto, the House proceeded, in pursuance of the Constitution, to reconsider the same, and the bill was passed, two-thirds of the House of Representatives agreeing to pass the same.

The message also announced that the President of the United States having returned to the House of Representatives the bill (H. R. 7900) granting allowances for rent, fuel, light, and equipment to postmasters of the fourth class, and for other purposes, with his objections thereto, the House proceeded, in pursuance of the Constitution, to reconsider the same, and the bill was passed, two-thirds of the House of Representatives agreeing to pass the same.

HOUSE BILLS AND JOINT RESOLUTIONS REFERRED

The following bills and joint resolutions were severally read twice by their titles and referred as indicated below:

H. R. 496. An act authorizing an appropriation for development of potash jointly by the Department of Agriculture and the Department of Commerce by improved methods of recovering potash from deposits in the United States; to the Committee on Mines and Mining.

H. R. 10073. An act to change the name of Railroad Avenue between Nichols Avenue and Massachusetts Avenue; to the Committee on the District of Columbia.

H. R. 12064. An act to discontinue certain reports now required by law to be made annually to Congress; to the Committee on Expenditures in the Executive Departments.

H. R. 12236. An act to provide an appropriation for the payment of claims of persons who suffered property damage, death, or personal injury due to the explosion at the naval ammunition depot, Lake Denmark, N. J., July 10, 1926; to the Committee on Claims.

H. R. 12938. An act for the relief of the State of Ohio; to the Committee on Military Affairs.

H. R. 7346. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment thereon in claims which the Winnebago Tribe of Indians may have against the United States, and for other purposes; and

H. R. 11468. An act authorizing the Secretary of the Interior to execute an agreement or agreements with drainage district or districts providing for drainage and reclamation of Kootenai Indian allotments in Idaho within the exterior boundaries of such district or districts that may be benefited by the drainage and reclamation work, and for other purposes; to the Committee on Indian Affairs.

H. R. 8327. An act for the relief of certain members of the Navy and Marine Corps who were discharged because of misrepresentation of age; and

H. R. 12879. An act to repeal section 1445 of the Revised Statutes of the United States; to the Committee on Naval Affairs.

H. R. 10435. An act providing for the extension of the time limitations under which patents were issued in the case of persons who served in the military or naval forces of the United States during the World War; and

H. R. 13109. An act to protect trade-marks used in commerce, to authorize the registration of such trade-marks, and for other purposes; to the Committee on Patents.

H. R. 11471. An act extending the time of construction payments on the Rio Grande Federal irrigation project, New Mexico-Texas; and

H. R. 13143. An act to adjust the compensation of certain employees in the customs service; ordered to be placed on the calendar.

H. R. 9297. An act authorizing the adjustment of the boundaries of the Olympic National Forest, Wash., and for other purposes;

H. R. 10157. An act making an additional grant of lands for the support and maintenance of the Agricultural College and School of Mines of the Territory of Alaska, and for other purposes; and

H. R. 12113. An act providing for the acquirement by the United States of privately owned lands situated within certain townships in the Lincoln National Forest, in the State of New Mexico, by exchanging therefor lands on the public domain also within such State; to the Committee on Public Lands and Surveys.

H. R. 393. An act to provide for the fifteenth and subsequent decennial censuses;

H. R. 12894. An act to extend the times for commencing and completing the construction of an overhead viaduct across the Mahoning River at or near Niles, Ohio;

H. R. 13141. An act authorizing T. S. Hassell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Tennessee River at or near Clifton, Wayne County, Tenn.;

H. R. 13203. An act granting the consent of Congress to the State Highway Commission, Commonwealth of Kentucky, to

construct, maintain, and operate a toll bridge across the Cumberland River at or near Burnside, Pulaski County, Ky.;

H. R. 13380. An act authorizing D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Helena, Ark.; and

H. R. 13484. An act authorizing preliminary examinations of sundry streams with a view to the control of their floods, and for other purposes; to the Committee on Commerce.

H. R. 7200. An act to amend section 321 of the Penal Code;

H. R. 9343. An act to provide for dispensing with oath or affirmation as a method of verifying certain written instruments;

H. R. 9778. An act to amend an act entitled "An act providing for the revision and printing of the index to the Federal Statutes," approved March 3, 1927;

H. R. 11285. An act to establish Federal prison camps;

H. R. 12203. An act to authorize the designation and bonding of persons to act for disbursing officers and others charged with the disbursement of public money of the United States;

H. R. 12250. An act to amend section 574, title 28, United States Code;

H. R. 13621. An act to authorize preparation and publication of supplements to the Code of Laws of the United States with perfecting amendments, printing of bills to codify the laws relating to the District of Columbia and of such code and supplements thereto, and for distribution; and

H. R. 13645. An act to establish two United States narcotic farms for the confinement and treatment of persons addicted to the use of habit-forming narcotic drugs who have been convicted of offenses against the United States, and for other purposes; to the Committee on the Judiciary.

H. J. Res. 243. Joint resolution to provide for the striking of a medal commemorative of the achievements of Thomas A. Edison in illumining the path of progress through the development and application of inventions that have revolutionized civilization in the last century; to the Committee on Banking and Currency.

H. J. Res. 268. Joint resolution requesting the President to negotiate with the nations with which there is no such agreement treaties for the protection of American citizens of foreign birth or parentage from liability to military service in such nations; to the Committee on Foreign Relations.

GRANT OF LAND TO ST. PAUL, MINN.

Mr. BINGHAM rose.

Mr. HAYDEN. I yield to the Senator from Connecticut.

Mr. BINGHAM. Out of order, from the Committee on Military Affairs I report favorably, with an amendment, the bill (S. 4148) authorizing and directing the Secretary of War to grant certain land to the city of St. Paul, State of Minnesota, and I submit a report (No. 1263) thereon. The amendment has been suggested by the War Department.

Mr. SHIPSTEAD. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Arizona yield to the Senator from Minnesota?

Mr. HAYDEN. I yield.

Mr. SHIPSTEAD. I ask unanimous consent for the immediate consideration of the bill just reported by the Senator from Connecticut [Mr. BINGHAM].

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The amendment was, in section 1, on page 2, line 8, after the numerals "$34,750" and before the period, to insert the following provisos: "*Provided*, Said sum is paid to the United States within one year from the date of the approval of this act, or sooner if funds are made available: *Provided further*, That the conveyance of said tract of land to the said city of St. Paul shall be upon the condition and limitation that said property shall be limited to the retention and use for public purposes, and upon cessation of such retention and use shall revert to the United States without notice, demand, or action brought," so as to make the bill read:

Be it enacted, etc., That the Secretary of War is authorized and directed to grant to the city of St. Paul, Minn., the lot of land described as follows: Lot No. 3 in block No. 31, St. Paul proper, according to the recorded plat thereof on file in the office of the register of deeds in said county of Ramsey and all that part of lot 4, in said block 31 aforesaid, according to the recorded plat thereof, described as follows: Commencing at the southwest corner of lot No. 4, block No. 31, St. Paul proper, thence running northerly along the west line of said lot aforesaid 107.31 feet to an alley, thence at right angles easterly along the southerly line of said alley to the easterly line of said lot 4, thence southerly along said east line of lot 4 to the southeast corner of said lot 4, thence easterly along the northerly line of Second Street to the place of beginning; for the sum of $34,750: *Provided*, Said sum is paid to the United States within one year from the date of the approval of this act, or sooner if funds are made available: *Provided further*, That the conveyance of said tract of land to the said city of St. Paul shall be upon the condition and limitation that said property shall be limited to the retention and use for public purposes, and upon cessation of such retention and use shall revert to the United States without notice, demand, or action brought.

SEC. 2. The net proceeds derived from the grant of such land shall be covered into the Treasury to the credit of the military post construction fund.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

COLUMBIA ARSENAL PROPERTY IN TENNESSEE

Mr. TYSON and Mr. BINGHAM addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Arizona yield further; and if so, to whom?

Mr. HAYDEN. I yield first to the Senator from Tennessee.

Mr. TYSON. I ask unanimous consent for the immediate consideration of Order of Business 1285, being the bill (H. R. 12479) authorizing the sale of all of the interest and rights of the United States of America in the Columbia Arsenal property, situated in the ninth civil district of Maury County, Tenn., and providing that the net fund be deposited in the military post construction fund.

Mr. CURTIS. Is that a departmental bill or a bill which is favored by the department?

Mr. TYSON. It is a bill which has been referred to the Committee on Military Affairs and has been approved both by the Secretary of War and the Military Affairs Committee.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized to sell upon such terms and conditions as he considers advisable and to make proper deed of conveyance to the Columbia Military Academy, a corporation organized under the laws of the State of Tennessee, all of the title, interest, limitations, conditions, restrictions, reservations, and rights owned and held by the United States of America as defined in Public Act No. 152 of the second session of the Fifty-eighth Congress and in the deed of the United States of America to the lands conveyed therein to the Columbia Military Academy of record in book 105, volume 4, page 495, in the register's office of Maury County, Tenn. Said limitations, conditions, restrictions, reservations, and rights are defined in said public act and deed as follows:

That the Secretary of War shall be a visitor to said school, and have and exercise full rights of visitation, and he shall have the right and authority in his discretion, as the public interest requires, to prescribe the military curriculum of said school, and to enforce compliance therewith, and upon refusal or failure of the authorities of said school to comply with the rules and regulations so prescribed by the Secretary of War, or the terms of the act, he is authorized to declare that the estate of the grantee has terminated and the property shall revert to the United States, and the Secretary of War is authorized thereupon to take possession of said property in behalf of the United States, and shall further reserve to the United States the right to use such lands for military purposes at any time upon demand of the President of the United States.

Said lands to which said limitations, conditions, restrictions, reservations, and rights attach are described as situated in the ninth civil district of Maury County, Tenn., and were formerly used as an arsenal and known as the Columbia Arsenal property, the same comprising about 67 acres more or less, and generally bounded by the Hampshire Pike, the Louisville & Nashville Railroad, the Mount Pleasant Pike, and a public road connecting the two pikes above named.

All of said limitations, conditions, restrictions, reservations, and rights of the United States of America, whether legal or equitable, vested or contingent, in and to said lands as specified and defined in said public law and deed and belonging to the United States of America will pass to the purchaser under the sale herein authorized.

SEC. 2. The Secretary of War shall have said tract of land appraised, the appraisal being of the land alone, and without regard to the buildings thereon. And the Secretary of War shall not sell the rights and interests of the Government herein above defined in said Columbia Arsenal property for a less consideration than the appraised value herein provided for.

SEC. 3. That the proceeds of said sale shall be deposited in the Treasury to the fund known as the military post construction fund, after

first paying the expenses of and incident to the sale including appraisal fees, but no appraiser shall be paid in excess of $100 for such services as he may render under the terms of this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DEFICIENCY APPROPRIATIONS

Mr. WARREN. Mr. President——

Mr. HAYDEN. I yield to the Senator from Wyoming.

Mr. WARREN. From the Committee on Appropriations, I report back with amendments the bill (H. R. 13873) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes, and I submit a report (No. 1266) thereon.

I wish to state that I hope to call the bill up for consideration to-morrow and have it put on its passage.

The PRESIDENT pro tempore. Meanwhile the bill will be placed on the calendar.

PER CAPITA PAYMENT TO PINE RIDGE SIOUX INDIANS, SOUTH DAKOTA

Mr. McMASTER. Mr. President——

Mr. HAYDEN. I yield to the Senator from South Dakota.

Mr. McMASTER. Mr. President, on May 12 House bill 13342, to authorize a per capita payment to the Pine Ridge Sioux Indians of South Dakota, passed the House of Representatives. It came to the Senate and was referred to the Committee on Indian Affairs. A Senate bill in identically the same words passed the Senate on May 16. I therefore move that the Committee on Indian Affairs be discharged from the further consideration of House bill 13342, with a view to asking that it be considered at this time and put on its passage.

Mr. CURTIS. Are the two bills identical?

Mr. McMASTER. The House and Senate bills are identical.

Mr. CURTIS. And the House bill merely provides for a per capita payment?

Mr. McMASTER. The bill provides for a per capita payment of $10 from funds to the credit of the Indians in the Treasury of the United States.

The PRESIDENT pro tempore. The question is on the motion of the Senator from South Dakota that the Committee on Indian Affairs be discharged from the further consideration of House bill 13342.

The motion was agreed to.

Mr. McMASTER. I ask unanimous consent for the immediate consideration of the House bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 13342) to authorize a per capita payment to the Pine Ridge Sioux Indians of South Dakota, which was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized to withdraw from funds on deposit in the Treasury of the United States to the credit of the Pine Ridge Sioux Indians of South Dakota a sum sufficient to make a $10 per capita payment to said Indians, under such rules and regulations as he may prescribe.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FORT GRISWOLD, CONN.

Mr. HAYDEN. I yield to the Senator from Connecticut.

Mr. BINGHAM. From the Committee on Military Affairs, I report back favorably without amendment the bill (S. 4503) authorizing the Secretary of War to convey the Fort Griswold tract to the State of Connecticut, and I submit a report (No. 1262) thereon. The bill has been unanimously reported by the committee, and I ask unanimous consent for its immediate consideration.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the Secretary of War is authorized and directed to convey by quitclaim deed to the State of Connecticut the tract of land owned by the United States, known as the Fort Griswold tract, situated on the east shore of New London Harbor in the State of Connecticut, and bounded northerly by the Fort Griswold monument reservation and by the land of various private parties, easterly and southerly by the land of various private parties, and westerly by New London Harbor and by the land of various private parties.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FEDERAL RESERVE BANK BUILDING, LOS ANGELES, CALIF.

Mr. SHORTRIDGE. Mr. President——

Mr. HAYDEN. I yield to the Senator from California.

Mr. SHORTRIDGE. I ask unanimous consent for the immediate consideration of the joint resolution (S. J. Res. 142) authorizing the erection of a Federal reserve bank building in the city of Los Angeles, Calif.

The PRESIDENT pro tempore. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, and it was read, as follows:

Resolved, etc., That the Federal Reserve Bank of San Francisco be, and it is hereby, authorized to contract for and erect a building in the city of Los Angeles for its Los Angeles branch on the site now owned, provided the total amount expended in the erection of said building, exclusive of the cost of vaults, permanent equipment, furnishings, and fixtures shall not exceed the sum of $800,000: *Provided, however*, That the character and type of building to be erected, the amount actually to be expended in the construction of said building, and the amount actually to be expended for the vaults, permanent equipment, furnishings, and fixtures for said building shall be subject to the approval of the Federal Reserve Board.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BILL RECOMMITTED

Mr. HOWELL. I ask unanimous consent that the bill (H. R. 9194) authorizing the Secretary of the Interior to acquire land and erect a monument on the site of the battle between the Sioux and Pawnee Indian Tribes in Hitchcock County, Nebr., fought in the year 1873, be recommitted to the Committee on the Library.

The PRESIDING OFFICER (Mr. SHORTRIDGE in the chair). Without objection, the bill will be recommitted to the Committee on the Library, as requested.

A. F. GALLAGHER

Mr. LA FOLLETTE. I ask unanimous consent for the immediate consideration of the bill (H. R. 10014) for the relief of A. F. Gallagher. This is a small private claim bill which unanimously passed the House. It is unanimously reported by the Senate committee and is recommended by the Secretary of the Treasury. The amount involved is only $190.40, which was to be paid a stenographer engaged by a bureau in the Treasury Department, but subsequently it was discovered that, through an opinion of the Comptroller General, there was no fund available for payment for this work. The Secretary of the Treasury feels that injustice was done to Mr. Gallagher and recommends the passage of the bill.

There being no objection, the bill was considered as in Committee of the Whole and it was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay to A. F. Gallagher, out of any money in the Treasury not otherwise appropriated, the sum of $190.40, in full satisfaction of all claims against the United States on account of stenographic services rendered in reporting certain hearings held in the Bureau of Internal Revenue on November 23, 1925, and January 15, 1926.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CONSTRUCTION AT MILITARY POSTS

Mr. REED of Pennsylvania. Will the Senator from Arizona yield to me for a moment?

Mr. HAYDEN. I yield to the Senator from Pennsylvania.

Mr. REED of Pennsylvania. I present a conference report on the Army housing bill, and I ask unanimous consent for its immediate consideration.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the report will be received and read for the information of the Senate.

The report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11134) to authorize appropriations for construction at military posts, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 2, 3, 4, 5, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: Strike out the figures "$12,989,284" and insert in lieu thereof "$13,268,284"; and the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment, insert the following:

"That there is hereby authorized to be appropriated not to exceed $6,499,500, to be expended for the construction and installation at military posts of such technical buildings and utilities and appurtenances thereto as may be necessary, as follows:

"Albrook Field, Canal Zone: Hangars, $200,000; Air Corps shops and warehouse, $126,000; headquarters and operations building, $40,000; radio, parachute, and armament building, $25,000; gasoline and oil storage, $75,000; paint, oil, and dope warehouse, $5,000; improvement of landing field, $600,000.

"France Field, Canal Zone: Hangars, $80,000; operations building, $30,000; photo, radio, parachute, and armament buildings, $61,000; air depot shops, $160,000; air depot warehouse, $200,000; improvement of landing field, $103,000.

"Hawaiian Department, Wheeler Field: Hangars, $240,000; Air Corps field warehouse, $45,000; Air Corps field shops, $81,000; headquarters and operations building, $40,000; photo, radio, parachute, and armament buildings, $61,000; gasoline and oil storage, $15,000; paint, oil, and dope warehouse, $5,000; improvement landing field, $110,000.

"Bolling Field, District of Columbia: Hangars, $160,000; gasoline and oil storage, $12,000; paint, oil, and dope warehouse, $5,000; improvement landing field, $100,000.

"Chanute Field, Ill.: Hangars, $120,000; Air Corps shops and warehouse, $126,000; headquarters and operations building, $40,000; photo, radio, parachute, and armament buildings, $61,000; school building, $80,000; gasoline and oil storage, $10,000; paint, oil, and dope warehouse, $5,000.

"Crissy Field, Calif.: Hangar, $40,000; photo building, $36,000; gasoline and oil storage, $5,000; paint, oil, and dope warehouse, $5,000.

"Duncan Field, Tex.: Hangars, $80,000; air depot shops, $243,000.

"Fairfield air depot, Ohio: Air depot shops, $243,000.

"Fort Sam Houston, Tex.: Hangar, $40,000; Air Corps field shops and warehouse, $60,000; headquarters building, $20,000; photo, radio, parachute, and armament buildings, $61,000; gasoline and oil storage, $5,000; improvement landing field, $20,000.

"Marshall Field, Kans.: Hangar, $40,000; Air Corps field shops and warehouse, $60,000; headquarters building, $20,000; photo, radio, parachute, and armament buildings, $61,000; gasoline and oil storage, $5,000; paint, oil, and dope warehouse, $5,000; improvement of landing field, $15,000.

"Maxwell Field, Ala.: Gasoline and oil storage, $5,000; paint, oil, and dope warehouse, $5,000; improvement of landing field, $13,000.

"Mitchel Field, N. Y.: Hangars, $80,000; photo building, $36,000; gasoline and oil storage, $10,000; paint, oil, and dope warehouse, $5,000.

"Post Field, Okla.: Hangar, $40,000; Air Corps field shops and warehouse, $60,000; headquarters building, $20,000; radio, parachute, and armament buildings, $25,000; gasoline and oil storage, $5,000; paint, oil, and dope warehouse, $5,000.

"Rockwell Field, Calif.: Hangars, $160,000; Air Corps warehouse, $45,000; headquarters and operations building, $40,000; radio, parachute, and armament buildings, $25,000; gasoline and oil storage, $10,000; paint, oil, and dope warehouse, $5,000.

"Rockwell air depot, Rockwell Field, Calif.: Air depot shops, $243,000; air depot warehouses, $500,000.

"San Antonio Primary Training School, San Antonio, Tex.: Hangars, $440,000; Air Corps shops and warehouse, $126,000; headquarters and operations building, $40,000; wing headquarters building, $60,000; photo, radio, parachute, and armament buildings, $61,000; school building, $40,000; gasoline and oil storage, $9,500; paint, oil, and dope warehouse, $5,000; improvement of landing field, $150,000.

"Selfridge Field, Mich.: Air Corps warehouse, $45,000; photo building, $36,000; gasoline and oil storage, $10,000; paint, oil, and dope warehouse, $5,000; improvement of landing field, $50,000."

And the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows: In lieu of the matter proposed to be inserted by said amendment insert the following:

"That the Secretary of War is hereby authorized to cause condemnation proceedings to be instituted for the purpose of acquiring certain tracts of land in the vicinity of Fort Kamehameha Reservation, Territory of Hawaii, hereinafter described, for use as a flying field, and that a sum not exceeding $1,145,000 is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, for the acquisition of the fee simple title to said land either by purchase or condemnation, to wit: That portion of the Queen Emma and Damon estates lying directly north of and adjoining Fort Kamehameha Reservation, east of the Fort Kamehameha-Puuloa Junction Road, south of the plantation road just north of Loco-Lelepaua and extending to the Rodgers Airport and Keehii Lagoon on the east consisting approximately of 1,434 acres, at a cost not exceeding $420,000, and also a portion of the Halawa district consisting of about 862 acres and immediately adjoining the Queen Emma and Damon estates at a cost not exceeding $725,000."

And the Senate agree to the same.

DAVID A. REED,
FRANK L. GREENE,
DUNCAN U. FLETCHER,
Managers on the part of the Senate.

JOHN M. MORIN,
W. FRANK JAMES,
JOHN J. MCSWAIN,
Managers on the part of the House.

The PRESIDENT pro tempore. Is there objection to the present consideration of the report? The Chair hears none, and the question is on agreeing to the conference report.

The report was agreed to.

ACCEPTANCE OF DECORATIONS OF FOREIGN GOVERNMENTS

Mr. HALE submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5898) to authorize certain officers of the United States Navy and Marine Corps to accept such decorations, orders, and medals as have been tendered them by foreign governments in appreciation of services rendered having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, and 11, and from its disagreement to the amendment to the title of the bill, and agree to the same.

FREDERICK HALE,
DAVID A. REED,
CLAUDE A. SWANSON,
Managers on the part of the Senate.

FRED A. BRITTEN,
CLARK BURDICK,
CARL VINSON,
Managers on the part of the House.

The report was agreed to.

CONSIDERATION OF BILLS FOR BRIDGES IN ARKANSAS

Mr. SHEPPARD. For the Senator from Vermont [Mr. DALE] I report several bridge bills from the Committee on Commerce, and I direct the attention of the Senator from Arkansas [Mr. CARAWAY] to these bills.

Mr. CURTIS. The bills are in the usual form?

Mr. SHEPPARD. They are.

First, I report back without amendment the bill (H. R. 12677) to amend section 2 of an act approved March 12, 1928, granting consent of Congress for the construction of a bridge across the Ouachita River at or near Calion, Ark.

Mr. CARAWAY. I ask unanimous consent for the immediate consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. SHEPPARD. I also report from the Committee on Commerce without amendment for the Senator from Vermont [Mr. DALE] the bill (H. R. 12676) to amend section 2 of an act approved February 14, 1926, granting consent of Congress for the construction of a bridge across Red River at or near Fulton, Ark.

Mr. CARAWAY. I ask for the present consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. SHEPPARD. Also, for the Senator from Vermont [Mr. DALE], I report from the Committee on Commerce with

amendments, the bill (S. 4465) granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across White River at or near Clarendon, Ark., and I submit a report (No. 1268) thereon.

Mr. CARAWAY. I ask unanimous consent for the present consideration of the bill.

There being no objection, the bill was considered as in Committee of the Whole.

The amendments were, on page 1, line 7, after the name "Arkansas," to strike out "within 5 miles of the ferry on the highway between Clarendon and Stuttgart, in the county of Monroe, in the State of Arkansas"; and on page 3, after line 4, to insert the following additional section:

SEC. 4. That the right to alter, amend, or repeal this act is hereby expressly reserved.

So as to make the bill read:

Be it enacted, etc., That the consent of Congress is hereby granted to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge and approaches thereto across the White River at a point suitable to the interests of navigation, at or near Clarendon, Ark., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. If tolls are charged for the use of such bridge, the rates of toll shall be so adjusted as to provide a fund sufficient (1) to pay the reasonable cost of maintaining, repairing, and operating the bridge and its approaches; (2) the interest on borrowed money necessarily required, and financing charges necessarily incurred in connection with the construction of the bridge and its approaches; and (3) to provide a sinking fund sufficient to retire the bonds issued and sold in connection with such original construction. All revenue received from the bridge shall be applied to the foregoing purposes, and no bonds issued in connection with the construction of the bridge and its approaches shall be made to mature later than 25 years after the date of issue thereof.

SEC. 3. After a fund sufficient to retire such bonds in accordance with their provisions shall have been so provided, the bridge shall thereafter be maintained and operated as a free highway bridge, upon which no tolls shall be charged. An accurate and itemized record of the original cost of the bridge and its approaches, the expenditures for maintaining, repairing, and operating the same, the interest charges paid, and the tolls charged and the daily revenues received from the bridge shall be kept by the State Highway Commission of Arkansas, and shall be available at all reasonable times for the information of all persons interested.

SEC. 4. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across White River at or near Clarendon, Ark."

ROADS ON INDIAN RESERVATIONS

The PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 1145) entitled "An act to authorize an appropriation for roads on Indian reservations," which was, on page 1, to strike out lines 3 to 5, inclusive, and insert:

That appropriations are hereby authorized out of any money in the Treasury not otherwise appropriated for material, equipment, supervision and engineering, and the employment of Indian labor in the survey, improvement.

Mr. CURTIS. What reservation does the bill refer to?

Mr. ASHURST. Mr. President, this is a general bill which I introduced some time ago, appropriating $250,000 to be used for constructing roads on all Indian reservations—no particular reservation. We gave the Secretary of the Interior a sum of money which he could use on any reservation. The House has made a very material amendment.

Mr. CURTIS. This is a House amendment to the Senate bill?

Mr. ASHURST. Yes, sir.

If it is understood by all I move that the House concur in the Senate amendment.

The PRESIDENT pro tempore. The question is on the motion of the Senator from Arizona.

The motion was agreed to.

GEORGE ROGERS CLARK MEMORIAL

Mr. FESS. Mr. President, I present the conference report on the George Rogers Clark memorial, and ask unanimous consent for its present consideration.

The PRESIDENT pro tempore. The conference report will be received and printed in the RECORD. It can not be acted upon until it has been printed in the RECORD in one House or the other.

Mr. FESS. It has been acted upon in the House.

The PRESIDENT pro tempore. Is there objection?

Mr. CURTIS. What is the request, Mr. President?

The PRESIDENT pro tempore. The Chair understood the request to be for the presentation and present consideration of a conference report on the George Rogers Clark memorial. The Chair is assured by the Senator from Ohio that it has been printed in the RECORD and acted upon by the House.

Mr. FESS. The House acted upon it to-day.

Mr. CURTIS. Have we no message from the House on the subject?

Mr. LA FOLLETTE. Mr. President, as I understood the Senator from Ohio, it was acted on in the House to-day.

The PRESIDENT pro tempore. The report will be read.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the resolution (S. J. Res. 23) entitled "Joint resolution for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House, and agree to the same with an amendment as follows: Strike out section 1 of the House amendment and insert in lieu thereof the following:

"That there is hereby established a commission to be known as the George Rogers Clark Sesquicentennial Commission (hereinafter referred to as the commission) and to be composed of 15 commissioners, as follows: Three persons to be appointed by the President of the United States; 3 Senators by the President of the Senate; 3 Members of the House of Representatives by the Speaker of the House of Representatives; and 6 members of the George Rogers Clark Memorial Commission of Indiana to be selected by such commission."

And the House agree to the same.

SIMEON D. FESS,
R. B. HOWELL,
KENNETH MCKELLAR,
Managers on the part of the Senate.

ROBERT LUCE,
RALPH GILBERT,
JOHN C. ALLEN,
F. M. DAVENPORT,
Managers on the part of the House.

The PRESIDENT pro tempore. The question is on agreeing to the conference report.

Mr. SACKETT. Mr. President, what is the amount carried by the bill?

Mr. FESS. The Senate bill carried $1,750,000. The House struck out $750,000, leaving it $1,000,000.

Mr. SACKETT. It carries $1,000,000 now?

Mr. FESS. It does.

The PRESIDENT pro tempore. The question is on agreeing to the conference report.

The report was agreed to.

PENSIONS AND INCREASE OF PENSIONS

Mr. NORBECK. I have here a conference report on a pension bill, H. R. 12381, which I should like to hand in and ask for its immediate consideration. It is a unanimous report.

The PRESIDENT pro tempore. Is there objection? The Chair hears none. The report will be received and read for the information of the Senate.

The Chief Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12381) granting pensions and increase of pensions to certain

soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 8, 9, and 12.

That the House recede from its disagreement to the amendments of the Senate numbered 3, 4, 5, 6, 7, 10, 11, 13, 14, 17, 18, 19, 20, and 21, and agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: In lieu of the figures proposed to be inserted by said amendment insert "$20"; and the Senate agree to the same.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16, agree to the same with an amendment as follows: In lieu of the figures proposed to be inserted by said amendment insert "$100"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with amendments as follows:

"Page 2 of the Senate engrossed amendments, in the case of David J. Menard, strike out the figure '30' and insert in lieu thereof the figure '20.'

"Page 2, in the case of Lawrence Waterhouse, strike out the following language: 'said increase to date from February 17, 1927.'

"Page 3, in the case of John Rose, strike out the figure '25' and insert in lieu thereof the figure '17.'

"Page 4, in the case of Tillie M. Foley, strike out the figure '30' and insert in lieu thereof the figure '20.'

"Page 5, in the case of Henry Buck, strike out the following language: 'the name of Henry Buck, civilian employee, Quartermaster Department, Nez Perce Indian War, and pay him a pension at the rate of $12 per month.'

"Page 6, in the case of George W. Cleveland, strike out the figure '30' and insert in lieu thereof the figure '20.'

"Page 6, in the case of Leon P. Chesley, strike out the following language: 'the name of Leon P. Chesley, late of the One hundred and twenty-first Company, United States Coast Artillery, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.'"

And the Senate agree to the same.

PETER NORBECK,
HENRIK SHIPSTEAD,
DANIEL F. STECK,
Managers on the part of the Senate.

HAROLD KNUTSON,
J. M. ROBSION,
JNO. W. MOORE.
Managers on the part of the House.

The PRESIDENT pro tempore. The question is on agreeing to the conference report.

The report was agreed to.

Mr. NORBECK. I ask that there be printed in the RECORD a statement which goes into detail as to just what the report covers.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter referred to is as follows:

STATEMENT

The managers on part of the Senate and House on H. R. 12381 show by way of explanation that 159 bills were included in said omnibus bill.

The committee of conference carefully examined the merits of each individual case over which any difference of opinion existed and mutually agreed to restore all bills of meritorious character.

The House bill contained 132 beneficiaries and the conferees struck out some items entirely and in others merely changed the rates.

The items which were entirely stricken out are as follows:

The name of John F. Kilbride.
The name of George F. Wiggins.
The name of Mary A. Clarke.
The name of John H. Doremus.
The name of Annie McNamara.
The name of James C. Hicks.
The name of Herman Green.
The name of James Shaw.
The name of Clark Brown.
The name of Thomas A. McEntire.

In some items the rates were changed and in which case a change of rate was made that are listed as follows:

In the case of Carl Johan Anderson the rate was reduced from $20 to $12 per month.

In the case of William H. Clarke the rate was reduced from $30 to $20 per month.

In the case of John Garvey the rate was reduced from $40 to $20 per month.

In the case of Harry F. Palmer the rate was increased from $12 to $20 per month.

In the case of William D. Warren the rate was reduced from $30 to $20 per month.

The Senate report contained 27 items and several items were stricken from the report, while in other items the rates were changed.

The items stricken from the report were as follows:

The name of Henry Buck.
The name of Leon P. Chesley.

The other items which were changed were as follows:

In the case of David J. Menard the rate was reduced from $30 to $20 per month.

In the case of Lawrence Waterhouse the item called for $40 per month to date from February 17, 1927. This item remained at $40 per month. However, the language "said increase to date from February 17, 1927," was stricken out.

In the case of John Rose the rate was reduced from $25 to $17 per month.

In the case of Tillie M. Foley the rate was reduced from $30 to $20 per month.

In the case of George W. Cleveland the rate was reduced from $30 to $20 per month.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the Speaker had affixed his signature to the following enrolled bills and joint resolution, and they were signed by the Vice President:

S. 1284. An act amending the act approved April 30, 1926, entitled "An act amending the act entitled 'An act providing for a comprehensive development of the park and playground system of the National Capital,' approved June 6, 1924";

S. 1369. An act to authorize and direct the survey, construction, and maintenance of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge across the Potomac River at Washington;

S. 2327. An act to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes;

S. 2370. An act to amend section 24 of the immigration act of 1917;

S. 2542. An act for the construction of a private conduit across Lincoln Road NE., in the District of Columbia;

S. 2823. An act amending the Statutes of the United States with respect to reissue of defective patents;

S. 3693. An act authorizing the city of Council Bluffs, Iowa, and the city of Omaha, Nebr., or either of them, to construct, maintain, and operate a free highway bridge across the Missouri River between Council Bluffs, Iowa, and Omaha, Nebr.;

S. 3867. An act to provide for the extension of the time of certain mining leases of the coal and asphalt deposits in the segregated mineral land of the Choctaw and Chickasaw Nations, and to permit an extension of time to the purchasers of the coal and asphalt deposits within the segregated mineral lands of the said nations to complete payments of the purchase price, and for other purposes;

H. R. 971. An act for the relief of James K. P. Welch; and

S. J. Res. 97. Joint resolution authorizing the President to appoint three delegates to the Twenty-third International Congress of Americanists and making an appropriation for the expenses of such congress.

BOULDER DAM

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 728) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

Mr. HAYDEN. Mr. President, the senior Senator from California [Mr. JOHNSON] has repeatedly asserted that a filibuster is being conducted in the Senate against his Boulder Dam bill, although no one up to this time has been able to discover that his assertion is correct. I had anticipated the privilege of addressing the Senate beginning at noon to-day and continuing throughout the afternoon with a serious discussion of this bill. It is now a quarter past 2 o'clock, and if a filibuster does exist I greatly appreciate the use of more than

two hours' time by the Senator from California, although I hope that no one will be unkind enough to suggest that he would filibuster against his own bill.

When I addressed the Senate on the 2d day of this month I pointed out that the State of Arizona has three fundamental objections to the Swing-Johnson Boulder Canyon Dam bill.

First. The attempt to coerce a sovereign State;

Second. The contemplated unjust division of the waters of the Colorado River in the lower basin; and

Third. The failure to adequately compensate the States of Arizona and Nevada for the proposed use of their natural resources by the Federal Government, primarily for the benefit of the State of California.

I then discussed and offered some amendments to the bill which are of real importance though not relating to these larger questions. I ventured to express the hope that the Senators from California would accept these amendments which are intended to perfect the bill. One was to remedy a grave injustice to the water users of the United States reclamation project at Yuma.

For the further information of the Senators from California, neither one of whom, I am sure, would willingly do an injustice to the landowners of the Yuma project, a part of which is in their own State, I ask to have printed in the CONGRESSIONAL RECORD at this point an extract from the report of the All-American Canal Board, and a copy of a letter from Mr. John L. Gust, an attorney of Phoenix, Ariz., addressed to the Secretary of the Yuma County Water Users' Association. These documents speak for themselves.

The PRESIDENT pro tempore. Without objection, the extract and the letter referred to will be printed in the RECORD.

The matter referred to is as follows:

[Report of the All-American Canal Board, Dr. Elwood Mead, W. W. Schlecht, C. E. Grunsky, June 17, 1919, page 56]

THE CONTROL AND OPERATION OF WORKS IN WHICH THE YUMA PROJECT AND IMPERIAL VALLEY ARE JOINTLY INTERESTED

The diversion of water from Colorado River at the Laguna Dam will be for the joint benefit of irrigable areas on both sides of Colorado River. It does not appear desirable that the entire canal system on both sides of the river should be under one management nor does any such arrangement appear possible. Separate organizations for the management of the Yuma project and for the management of the Imperial irrigation district will probably always be maintained. Other interests, too, will undoubtedly at some later time be supplied with water through headworks at the Laguna Dam and through a common main canal. Conflict of authority in the operation of all works for mutual benefit must be avoided. The maintenance and operation of the dam and diverting works and of the canal down to the siphon drop and of the power stations which are to be operated for the benefit of several interests should be permanently under the control of the United States.

The Secretary of the Interior, who directs the work of the United States Reclamation Service, should retain authority, or, if necessary, be given any additional authority, by agreement or otherwise, to operate and maintain the water diversion, to divide the waters between the Yuma project and the Imperial Valley interests, and to manage and control the power development and power sales from any plant in which both have an interest.

It would then fall to the Secretary of the Interior to apply the principles this board is recommending, relating to such questions as the distribution of construction costs to power and to irrigation, the apportionment of the canal and power construction costs to the Yuma project and Imperial Valley, the determination of interest and depreciation charges, the apportionment of irrigation operating expenses, and the division of profits from power sales and the like.

KIBBEY, BENNETT, GUST, SMITH & LYMAN,
Phoenix, Ariz., November 3, 1927.

Mr. J. C. POWER,
Secretary Yuma County Water Users' Association,
Yuma, Ariz.

DEAR SIR: Mr. Barry Dibble, an engineer for your association, has left with us the contract of October 23, 1918, between the United States and the Imperial irrigation district, referring to Laguna Dam and the main canal of the Yuma project, together with certain other data, and has advised us that you desire our opinion upon the following questions:

1. Has Yuma project such equity in power rights at Laguna Dam that the Secretary of the Interior can not contract these rights away?

2. Does the contract of October 23, 1918, give the Imperial irrigation district an equity in Laguna Dam of such character as to include an equity in power rights there?

3. If the Secretary of the Interior leases the power at Laguna Dam to Yuma County Water Users' Association, what, if any, interests will Imperial irrigation district have in revenue from lease?

4. If the Secretary of the Interior holds that the Imperial irrigation district has an equity in Laguna Dam and is entitled to rights in the power site, has the Yuma County Water Users' Association any recourse in the courts?

The answer to these questions involve a consideration of the relation of the Yuma project to the United States and the effect of the contract of October 23, 1918, between the United States and the Imperial irrigation district.

The Yuma project was undertaken by the Secretary of the Interior under the provisions of the reclamation act. On the 31st day of May, 1906, the Secretary of the Interior and the Yuma County Water Users' Association entered into a contract under authority of the reclamation act, in section 2 of which it is provided:

"That only those who are or may become members of said association under the provisions of its articles of incorporation shall be accepted as entrymen or applicants for rights to the use of water impounded, developed, or the supply of which is or may be regulated or controlled by said proposed irrigation works.

"The cost per acre shall be equal throughout the entire district now proposed to be irrigated thereby, which said district is hereby defined as comprising the lands described and bounded in section 3 of Article IV of the articles of incorporation of said association, and bounded in Article LV of amendments of said articles of incorporation of said association."

On April 6, 1917, the public notices of the lands to be irrigated was issued. This notice constitutes a determination of the lands that shall be included in the project. (See Yuma County Water Users' Association *v.* Schlecht, 262 U. S. 910.) Certain acts of Congress provide that such public notices may be withdrawn and new public notices issued, but we are not advised that this has been done on the Yuma project, or that such new notices, if any have been issued, have any relation to the contract between the Secretary of the Interior and the Imperial irrigation district above mentioned. We think that in view of the above facts the contract of October 23, 1918, can not be held to make the Imperial irrigation district a part of the Yuma project within the meaning of the acts of Congress providing that receipts from power shall be credited to the project.

The contract between the Secretary of the Interior and the Imperial irrigation district, dated October 23, 1918, undoubtedly was entered into in pursuance of section 2 of the act of February 21, 1911, which reads in part as follows:

"That in carrying out the provisions of said irrigation act and all acts amendatory thereof, or supplemental thereto, the Secretary of the Interior is authorized upon such terms as may be agreed upon, to cooperate with irrigation districts, water users' associations, corporations, entrymen, or water users for impounding, delivering, and carrying reservoirs, canals, or ditches as may be advantageously used by the Government and irrigation districts, water users' associations, corporations, entrymen, or water users for impounding, delivering, and carrying water for irrigation purposes: *Provided*, That the title to and management of the works so constructed shall be subject to the provisions of section 6 of said act."

Section 3 of said act provides that the money received in pursuance of such contracts shall be covered into the reclamation fund and be available for use under the terms of the reclamation act. But by special act of June 28, 1926, the Secretary of the Interior is directed to credit the individual water right applicants in the Yuma irrigation project, and the purchasers of water rights in the Yuma Mesa auxillary reclamation project on the construction charges due with their proportionate part of all payments heretofore made or hereafter to be made by the Imperial irrigation district under the contract of October 23, 1918.

We think it is plain that under the section of the statute we have above quoted, the purpose of the contract of October 18, 1918, was to give the Imperial irrigation district a contract right in the Laguna Dam, and the main canal rather than to make the Imperial irrigation district a part of the Yuma project. It is to be noted that the Attorney General in an opinion as to the application of the money to be paid by the Imperial irrigation district under said contract refers to the right given the Imperial irrigation district by said contract as a privilege of connecting with and using Laguna Dam and the main canal of the Yuma irrigation project for the irrigation of lands in the Imperial Valley. (32 Op. Atty. Gen. 41.)

The contract of October 23, 1918, itself provides with considerable detail as to power rights in power developed in the main canal. It is silent as to rights in power developed at the dam with water flowing through the main canal. Section 9 of the contract contains the following provisions:

"For the right to use the Laguna Dam, the main canal and appurtenant structures, and divert water, as herein provided, the district agrees to pay to the United States the sum of $1,600,000 in 20 installments."

We think the right to use the dam referred to in this provision plainly means the right to use the dam for the purpose of diverting water as provided in the contract and does not include the right to use the dam for general purposes. It is provided by section 5 of the act of April 16, 1926:

"That whenever a development of power is necessary for the irrigation of lands under any project undertaken under said reclamation act, or an opportunity is afforded for the development of power under any such project, the Secretary of the Interior is authorized to lease for a period not exceeding 10 years, giving preference to municipal purposes, any surplus power or power privileges, and the moneys derived from such leases shall be covered into the reclamation fund and be placed to the credit of the projectc from which such power is derived."

It is provided by subsection 1 of the fact finders act (act of December 5, 1924):

"That whenever the water users take over the care, operation, and maintenance of a project, or a division of a project, the total accumulated net profits, as determined by the Secretary, derived from the operation of the project power plants, leasing of project grazing and farm lands, and the sale or use of town sites shall be credited to the construction charge of the project, or a division thereof, and thereafter the net profits from such sources may be used by the water users to be credited annually, first, on account of project construction charge; second, on account of project operation and maintenance charge; and, third, as the water users may direct."

In the light of the above statutory and contract provisions our answers to your questions are as follows:

1. Undoubtedly the terms of section 2 of the act of February 21, 1911, are broad enough to authorize the Secretary of the Interior, for a proper consideration, to contract away the rights of the Yuma project in power developed at the Laguna Dam. We see no reason why the Secretary could not have contracted those rights away just the same as he did an interest in a part of the rights in the main canal, but we are of the opinion that in the contract of October 23, 1918, he has not so contracted them away."

2. The contract of October 23, 1918, does not give the Imperial irrigation district an interest in the power rights at Laguna Dam, for the reason that under the laws of Congress the Yuma project is entitled to the receipts from the power produced at the dam. The Imperial district is not a part of that project, and the contract right that it has received in the works of that project for which it is making paymen does not give it the right to any portion of said power receipts.

3. The Yuma project will be entitled to all of the revenues from the lease. The Imperial district will have no interest therein. Under section 522 of the codification act (act of June 30, 1926) such revenues will be covered into the reclamation fund and be placed to the credit of the Yuma project. This means that Yuma project will receive the benefit of the rentals only upon the final payments, but no reduction will be made on the annual installments of construction charges. If the Yuma Water Users' Association should take over the care, operation, and maintenance of the project, then under section 501 of the codification act all rentals accruing on the lease after the date of such taking over would be applied on the annual construction charged, such excess would be applied upon the annual maintenance charges.

4. The Secretary of the Interior is charged with the duty of operating the Yuma project in pursuance of the laws of Congress. He has no power to take away from the Yuma project any rights or privileges to which that project is entitled under the law. If he should execute a lease of any power privileges at the Laguna Dam, the Yuma project would have a right in the courts to see that the rentals from such lease were applied as the law provides.

However your association has no legal right to construct any power plant at Laguna Dam. The question of whether or not such power plant should be constructed rests with the Secretary of the Interior, who is charged with the duty of looking after the works of the project. If he determines in his discretion that no power plant shall be constructed, that discretion is obviously not subject to review in the courts.

The net result of our conclusion is that since the Secretary of the Interior is vested with the duty of operating the Yuma project it will be ill advised for the Yuma Water Users' Association to attempt anything in connection with the management and operation of said project with respect to power or otherwise that is not in accordance with his views. It should be possible to convince the Secretary of the Interior of the rights of the association. If, however, that proves impossible, we believe that the only course for the association to pursue is to submit until such time as the Secretary can be persuaded. If, however, the Secretary should attempt to take away from the Yuma project any of the revenues to which the Yuma project is entitled from the lease or power or power privileges, and confer these upon the Imperial project, the Yuma project would undoubtedly have a remedy in the courts to prevent this from being done. It is, of course, not at all likely that the Secretary will attempt to do anything of this kind.

Very truly yours,

KIBBEY, BENNETT, GUST, SMITH & LYMAN.
By J. L. GUST.

Mr. HAYDEN. Mr. President, another amendment was to aid new settlers who may seek homes under the all-American canal by limiting the area to be furnished with water in any one ownership to 160 acres and requiring all excess lands to be sold at an appraised price, thus curtailing speculation. Still another was to provide that no lands having a present perfected right to water should be deprived of water in the enforcement of any treaty with Mexico, and that if any American lands are to be thus deprived of water that it shall be in the inverse order of their priorities to the use of water.

When the Senate adjourned on May 2, I was discussing the proposal now contained in the bill that the all-American canal be constructed in accordance with the reclamation law and expressed doubt as to whether the committee amendments actually accomplished that purpose. In order intelligently to present the facts it was necessary for me to comment on the financial features of the bill. I placed in the record the following statement by Dr. Hubert Work, the Secretary of the Interior, which shows that the loudly praised financial features of this bill were predicated on a Federal bond issue:

To finance the enterprise in this way (by funds obtained from the sale of Government bonds) would remove a serious objection from taxpayers in other parts of the country who can see little reason for advancing funds out of the National Treasury as a temporary expedient, to be replaced by them in the form of taxes, when it may be possible to make the project a self-sustaining one without disturbance in the fiscal operations of the Government.

I also read the following quotation from a letter written by Hon. Andrew W. Mellon, the Secretary of the Treasury, which completely demolished the impractical, if not fantastical, financial ideas of the Secretary of the Interior:

Proceeds from the sale of our bonds are not governmental revenues. The payment for the project by the sale of bonds has exactly the same effect on our governmental accounts as the payment of the same expenditure out of any governmental revenue, and the fact that it is a dam and might have earnings in the future does not differentiate it from an expenditure for a battleship, a public building, or to pay employees.

I pointed out that there has been omitted from the Boulder Dam bill as reintroduced in this Congress, the former provisions relating to the issue of Government bonds and conclusively demonstrated by reading from the testimony of Mr. Garrard B. Winston, the Undersecretary of the Treasury, that all that remains in the bill is a mere bookkeeping arrangement which does not differ from the ordinary and usual method of keeping accounts in the Treasury Department. In other words, the bond-issue bird has escaped, and all that the proponents of this bill now have in their hands are a few of its tail feathers.

The proposal to pay for public works with the proceeds of a special issue of Government bonds is not new, and Secretary Mellon's condemnation of it is not unique. His predecessor as Secretary of the Treasury, Hon. CARTER GLASS, now a Senator from Virginia, firmly rejected a similar scheme which was advanced in 1919. Let me read from a report which Mr. GLASS made on a bill providing for the issuance of $250,000,000 of United States bonds to promote the reclamation of waste lands:

THE SECRETARY OF THE TREASURY,
Washington, January 26, 1920.

MY DEAR CONGRESSMAN: I have the honor to acknowledge receipt of your letter of January 23, 1920, inclosing a copy of H. R. 11961, introduced by Mr. Kinkaid, entitled "A bill to authorize advances to the reclamation fund, and for the issue and disposal of bonds in reimbursement therefor, and for other purposes." I notice that this bill is substantially the same in terms as H. R. 8375, also introduced by Mr. Kinkaid, as to which I wrote you under date of August 14, 1919, and I regret to have to advise the committee that the Treasury also emphatically disapproves of the financial and bonding features of H. R. 11961.

The fundamental objection to the bill from the point of view of the Treasury is that it imposes upon the Treasury of the United States the burden of financing the reclamation projects, but attempts to give the appearance of avoiding a direct appropriation by authorizing the Secretary of the Treasury to sell United States bonds to provide the funds required for the purposes of the bill. I urge your committee very strongly, if it should determine that the plan embodied in the bill is meritorious and recommend an appropriation, to handle the matter by making a direct appropriation of a specific amount for the purpose, leaving the Secretary of the Treasury, acting under the general authority already conferred on him by the Congress, free to finance the requirements of the plan from time to time as might be found to be expedient. To authorize a special issue of United States bonds to reimburse the Treasury for the advances to the reclamation fund provided for by the bill, with maturities and other terms fixed without regard to the judgment of the Secretary of the Treasury as to the financial requirements of the United States as a whole, and without reference to whether the United States could secure funds on better terms, tends, in my opinion, to lead to confusion of thought in

the consideration of the bill, and in the end would be certain to prove embarrassing to the credit and financial operations of the United States.

I notice that section 2 of the bill provides that the bonds authorized shall be exempt from taxes or duties of the United States, although under the second Liberty bond act and subsequent legislation it has been the practice of the Treasury to issue the Liberty bonds subject, except to a very limited extent, to Federal surtaxes and profits taxes. The policy of the Treasury is definitely against granting unlimited exemptions from Federal surtaxes and profits taxes, and I do not feel that it would be fair to the patriotic subscribers for Liberty bonds to confer upon the proposed special issue of bonds exemptions from taxation which have, in the main, been denied to the Liberty bonds.

Even if the bill were amended so as to make a direct appropriation of a special amount without reference to reimbursement from a special issue of United States bonds, I feel that the proposal to authorize an expenditure of $250,000,000 for purposes of reclamation would demand the most careful consideration from the point of view of economy in Government expenditures. In this connection I am inclosing a copy of a public statement which I issued under date of January 12, 1920, as to the financial position of the Government.

Very truly yours,

CARTER GLASS.

Hon. JOSEPH W. FORDNEY,
Chairman Committee on Ways and Means,
House of Representatives, Washington, D. C.

As a good business man and sound financier, Secretary GLASS knew that the fact that it may be easy to borrow money is no justification for any investment. A loan must be paid, regardless of the way in which the borrowed cash is expended.

A PAID PARLIAMENTARY SOLICITOR

Notwithstanding the fact that the Treasury Department has utterly repudiated this bond-issue scheme, the propagandists who are urging the passage of this bill continue to iterate and reiterate that no sum is asked of the United States Government in this plan. I have here a recent issue of Politics, a weekly newspaper published in Washington, containing the photograph and a write up of an individual who is styled the "premier of all parliamentary solicitors." We are told in this article that this "premier of all paliamentary solicitors" is now—

putting forth all his efforts in behalf of what he considers the most important undertaking before the American people, namely, the Boulder Dam enterprise, which he ranks as second only in the magnitude of the resultant good to the Panama Canal. He says it can be built without the cost of a dollar to the United States Government, and he believes firmly that this will be the outcome in spite of the combined influence of all the politicians in Arizona, including his warm personal friend, Senator ASHURST.

I doubt very much whether the editor of Politics, who, I understand, is a veteran newspaper man, would have published this piece of propaganda if he had known that this "premier of all parliamentary solicitors" was a paid lobbyist who has been kept here in Washington for many months on the pay roll of an organization actively interested in the passage of the Swing-Johnson bill. His statement that the Boulder Dam enterprise "can be built without the cost of a dollar to the United States Government" and all similar statements are pluperfect and perfervid piffle which deceives no one who seeks the truth.

NEWSPAPER PROPAGANDA

That the Californians still fondly entertain this bond-issue delusion is exemplified by a purported interview with Hon. JOHN Q. TILSON of Connecticut, majority leader in the House of Representatives, which appeared in the Washington Herald of May 12, 1928. In this newspaper article Congressman TILSON is made to say:

It is my understanding that provision will be made in the bill in the House for issuance of bonds by the Secretary of the Treasury to meet the capital investment in Boulder Dam, including interest during construction. Payment of those bonds and their interest will be guaranteed by the contracts secured by the Secretary of the Interior for sale of power and water.

I have known JOHN TILSON for over 15 years, and I know him well enough to say that he never made any such statement. Mr. TILSON possesses many excellent qualities which well qualify him for his position of leadership in the great legislative body at the other end of the Capitol, and chief among them is common sense. He does not indulge himself in dreams or visions, but is always sane and sensible, and particularly so with respect to all matters relating to governmental expenditures. I repeat that I know the Congressman well enough to be certain that he never expressed the ideas attributed to him in this so-called interview.

The "by line" at the head of the column in the newspaper which printed this "interview" with Mr. TILSON shows that it was written by a man whom I have also known for a long time, and I know him well enough to say that he deliberately placed these words in Mr. TILSON's mouth, although he knew that the Congressman had never uttered them or even expressed a similar thought.

This writer is employed by the Hearst newspapers, and devotes most of his time to promoting the passage of the Swing-Johnson bill. He is not expected to write legitimate news. His duty is to prepare and promulgate propaganda. Every happening that can be colored, every expression that can be twisted, every fact that can be warped, must all appear in print as favorable to Boulder Dam. I make no attack upon his sincereity, because I am convinced that he honestly believes that the passage of this legislation is of such paramount importance to the State of California, of which he is a resident, that the end justifies the means.

In fairness to him, I must say that his methods are usually much less unscrupulous than some of the other special writers who prepare alleged news relating to the Swing-Johnson bill for the Hearst newspapers. He never has gone to such lengths in departing from the truth as do the editorial writers of the Los Angeles Examiner, whose misrepresentations are repeated verbatim on the back pages of the other Hearst newspapers throughout the country.

MISTAKEN POLICY OF HEARST NEWSPAPERS

It has always been a mystery to me, a puzzle that I can not solve, as to why the Hearst newspapers follow this mistaken policy. I know that the Los Angeles Examiner believes in giving its readers what they want and has no scruples about whether or not it is good for them. I know that time after time there have appeared in its columns predictions of the millions of people and the billions of wealth which Boulder Dam would bring to southern California. I know that all such prognostications of future prosperity are like manna from heaven to the real-estate speculators who infest that fair land where nature does her very best and man, sometimes, his worst. But that same kind of newspaper puffing and blowing has been going on for six long years, and the Swing-Johnson bill is not yet a law. The people of southern California grow weary of waiting; so why not tell them the truth for a change?

Tell them that the United States Senate will never pass the Swing-Johnson bill in its present form. Tell them that the great majority of Senators have no desire to perpetrate so great an injustice as this bill does to the State of Arizona. Tell the people of southern California that the benefit to come from the development and utilization of the Colorado River is so great that instead of trying to appropriate the whole of it for themselves they can well afford to be liberal with the adjoining States of Arizona and Nevada. Tell them that the Senate will never consent to any legislation that is not fair and equitable. Tell them the truth.

I hope that I have not wasted my breath in making this appeal to the Hearst newspapers, although I probably have. Nevertheless time, which flies swiftly, will demonstrate that I am right. Truth and justice will in the end prevail.

TWISTING THE TRUTH

To again demonstrate the way in which the Hearst newspapers insist upon bending and twisting the truth to serve the purposes of propaganda, I shall refer to another alleged news story which appeared in the Washington Herald of last Sunday. The mendacious and irresponsible writer whose name appears in the "by line" refers to "Dwight B. Heard, former Governor of Arizona," when the truth is that Mr. Heard was never governor of that State.

We are told that Mr. Heard was one of two past governors in the seven States conference at Denver last summer, and that he represented the State of Arizona at that conference. The exact truth is that Mr. Heard was not one of the eight members of the Arizona Colorado River Commission which attended the Denver conference. He had no vote in the conference, but was merely in attendance in an advisory capacity.

Neither was Mr. Heard in Denver in the employ of any private power company. The Arizona Colorado River Commission invited about a half dozen citizens of my State who are well informed on the Colorado River situation to accompany them to Denver. The expenses of these citizens were paid by the State of Arizona. I do not know how much Mr. Heard was paid, or whether he received any reimbursement from the State of Arizona, but I do know that he received not a single cent from any other source.

The whole tenor and purpose of this newspaper story was by cowardly innuendo to convey the impression that Mr. Heard went to Denver as a secret tool of the private power interests

for the purpose of inciting strife and discord among the States of the Colorado River Basin. The truth is that no man in all the seven States has worked harder to promote harmony or has striven longer or more intelligently to bring about a solution of the Colorado River controversy which will be fair and just to all concerned.

To any one who knows Dwight Heard, this insinuation by the Hearst newspapers that he would act as a servant for the so-called Power Trust is positively idiotic. No man anywhere in America could be more free from such an unworthy suspicion. Mr. Heard was one of the original Progressive Republicans, a warm personal friend of Theodore Roosevelt who supported that great leader to the last ditch. Throughout the quarter of a century that I have known Mr. Heard he has always been an aggressive fighter on the side of the public and against every form of special privilege.

Dwight B. Heard is opposed to the Swing-Johnson bill in its present form because that measure seeks to bestow special privileges and advantages upon the State of California to which that State is not equitably entitled. He is opposed to the Federal Government going into the power business at Boulder Dam, but he is an open and avowed advocate of public ownership of utilities such as electric power. He has learned by actual experience in the Salt River Valley that there is a vast practical difference between a public utility controlled and operated by the people who are to be locally served and the same utility when owned and operated by the United States. Public ownership does not mean Federal ownership to him, because he knows that local rather than national management will give better service to the consumers of power produced at Boulder Dam.

Mr. Heard has made a report upon the Denver conference, which has been published, so that everyone may know what happened there. I have here an article which he wrote for the American Review of Reviews, which was printed last December. The most careful critic may examine his words with a microscope and find no trace of Power Trust propaganda.

Mr. Heard was so outraged at this alleged news story which appeared in the Hearst newspapers last Sunday that he has sent the following telegraphic statement with relation thereto, which I shall now read to the Senate:

PHOENIX, ARIZ., *May 21, 1928.*

My attention is called to an article by John T. Lambert in last Sunday's Washington Herald imputing improper motives to my opposition Swing-Johnson bill and intimating that as a director of United States Chamber of Commerce and a member of its committee to report on Swing-Johnson bill I made improper use of my position. These insinuations are both unjustified and untrue.

My attitude as a citizen of Arizona for many years has been one of consistent opposition to Swing-Johnson bill but of support of any constructive measure for development of Colorado River which would safeguard Arizona's rights, bring about approval of seven-State Colorado River compact through the cooperation of the Federal and State Governments.

I presume, as one of directors of United States Chamber of Commerce, I was appointed on the committee to consider Boulder Dam project because of my familiarity with subject. My opposition to Swing-Johnson bill was well known.

On the same committee there served Ward L. Bannister, of Colorado, whose support of Swing-Johnson bill was equally well known. We both united in the unanimous report of the committee to the board of directors, the essence of which follows:

"Examination of the Boulder Dam project discloses its great importance and the purposes of national character which it will serve. These purposes involve questions of preparation for adjustment of international relations with Mexico, flood control and apportionment of water resources among States, the utilization of such resources, and compensation, if any, to States in respect thereto.

"One of the features of the project is of such a nature, however, that we believe and recommend that the board should take action with reference to a policy which has already been declared and which has been considered by the membership to be so important that it has been reiterated. This is the position that the Government should scrupulously refrain from entering any phase of business which can be successfully undertaken and conducted by private enterprise.

"This action on the part of the board should be taken with reference to provisions in any proposed legislation as to the utilization of the water power which will be made available by the project and the distribution of the electricity which is generated. We believe that any legislation which is enacted with respect to the Boulder Dam project should expressly and affirmatively provide that all proper effort shall be made to have private enterprise receive such opportunity to generate and distribute power at Boulder Dam as is provided under the Federal water power act, as to the utilization of water powers at Government dams elsewhere in the country, and will be consistent with the other purposes for which this dam will be constructed.

"The Federal power act not only provides for opportunity to private enterprise but for opportunity to States and their municipalities, as well as to the Federal Government."

Such attacks as have been made in the Herald are convincing illustration of the depths to which the lobby for the Swing-Johnson bill will descend in its efforts to attack and besmirch decent citizens. My attitude on this question has been publicly expressed on many occasions and finds definite expression in an article in the American Review of Reviews of last December.

For many years my position as to the use of Colorado River power has been consistent and definite. I have clearly stated that in the use of this power municipal corporations and private companies should have equal opportunity but not special privilege. That when Arizona's natural resources were used in producing power, as in the case of the proposed Boulder Dam, Arizona should receive a revenue equivalent at least to that which she would receive from taxation were the development made by private capital.

This position I feel is fundamentally sound and in the interest of the public welfare, and I personally resent and deny the imputations made in the article in the Herald.

In public addresses and articles published I have insisted that the enormous power resources of the Colorado River largely within Arizona should be developed for the benefits of all people and not for the private profits of a few. Any suggestion that my course is dictated by any power company, directly or indirectly, is unqualifiedly false. The insinuations in the article are as far from the truth as the statement which is made within it that I am an ex-Governor of Arizona.

My opposition to the Swing-Johnson bill is based on the following reasons:

First. That the bill is thoroughly unsound economically.

Second. That it is a violation of the State rights of Arizona.

Third. That it utilizes national funds for the sole benefit of California.

Fourth. That it endeavors to use the natural resources of Arizona for California's benefit without compensation to Arizona; and

Fifth. That it includes the possibility of the Federal Government entering the business of the sale and distribution of power which in my judgment should be conducted by private or municipal interests.

DWIGHT B. HEARD.

As I stated, I have here a copy of an article written by Mr. Heard and published in the American Review of Reviews for December, 1927. When I have read what he said, no Senator can justly say that Dwight B. Heard was trying to do anything else than bring the interested States together, so that the now wasted resources of the Colorado River might be developed and utilized in the public interest. I shall now read the article for the information of the Senate:

THE COLORADO RIVER CONTROVERSY

By Dwight B. Heard, an adviser to Arizona's Colorado River Commission

Twenty years ago Theodore Roosevelt said that one of our greatest national duties was changing the waste of the Colorado River into controlled use. Ever since then far-seeing men, in increasing numbers, have been trying to put the vision of Roosevelt into action.

The sessions of the Colorado River conference, held in Denver in August and September this year, lasting over a month, illustrate the new movement in the seven Colorado River Basin States to unite on a plan of action for promptly harnessing the Colorado. Such a plan should be based on just cooperation among all the basin States and the Federal Government, and should remove the Colorado River or Boulder Dam controversy from the twilight zone between State and Federal rights. To succeed the plan necessarily must admit the sovereign rights of the States to the use of their lands and water and the right of the Federal Government to control interstate navigation on the stream.

While public attention has been focused on the very important feature of flood control, the underlying reason for the fierce controversy that has waged around Boulder Canyon has been over the millions of horsepower, or "white coal," involved in the canyons of the Colorado, mostly in Arizona. At seven carefully studied power sites in Arizona, and at one partly in Arizona and partly in Nevada, practically 4,000,000 firm horsepower can be developed, equal to 80 per cent of the hydroelectric power used in the United States last year. These figures are obtained from recent publications of the Geological Survey. These same reports show that in the last four years the use of power in the United States has increased 40 per cent, and that 35 per cent of the power used was hydroelectric, which is holding its own despite the tremendous increase in the efficiency of steam-generated power.

The Colorado River conference is composed of the Governors of the seven Colorado River Basin States, the official Colorado River Commissioners, and other advisers of these States, and a group of Senators and Congressmen from that region.

To put a constructive development plan into effect it is essential not only that the seven States and the Federal Government agree on the plan, but that all the basin States approve the Colorado River compact, adopted at Santa Fe, N. Mex., on November 22, 1922. This compact was well described by Herbert Hoover, who presided at the meeting, as a "40-year vacation from litigation."

FIVE YEARS OF DISAGREEMENT

The compact was never officially approved by Arizona, only conditionally approved by California, and Utah has refused to accept the compact unless all the basin States approve it. One of its fundamental principles was protection of the upper Colorado River Basin States, which supply most of the water, from the establishment of priority rights to the use of water by the more rapidly developing lower basin States. It is this same principle that Arizona has stood for in her efforts to obtain a tri-State treaty with California and Nevada—the other lower basin States—to protect Arizona's future development against the acquirement of adverse prior rights by California or the Republic of Mexico.

This controversy over Colorado River development and the approval of the compact has raged for five years. Last March it resulted in the defeat in Congress of the Swing-Johnson bill, now generally regarded as an invasion of State sovereignty, and a bill which included at least the possibility of the Federal Government entering the power business.

Realizing that it was nothing short of an economic crime for one of the Nation's greatest resources, the Colorado River, to remain longer undeveloped, Gov. George H. Dern, of Utah, after a careful personal study last summer of conditions in Arizona and California underlying the dispute between these States, instituted a movement which resulted in Govs. William A. Adams, of Colorado, Frank C. Emerson, of Wyoming, and H. C. Dillon, of New Mexico, joining with him in the call for the Colorado River conference.

A NEW CONFERENCE OF SEVEN STATES

Governor Dern, unanimously elected chairman, in opening the conference at Denver on August 22 last, well outlined its vital purposes when he said:

"Unless we are here with determination to do justice as well as to seek justice our deliberations are foredoomed to failure. Statesmanship and enlightened self-interest alike dictate that we compose our differences and go before the country as a compact unit. God has made us neighbors; let justice make us friends."

Among the accomplishments of the Colorado River conference was the unanimous adoption of the Mexican resolution, signed by the seven governors and presented to President Coolidge and Secretary of State Kellogg. This resolution urged that to prevent friction and misunderstanding with Mexico over the use of the Colorado River—whose normal flow is already overappropriated—a note be sent to Mexico warning against increased use within her borders of the waters of the Colorado.

The resolution further requested, in the interest of improved relations with Mexico and the promotion of the economic welfare of the States concerned, that a treaty regarding the use of Colorado River water be negotiated with Mexico, and that the Federal commission having this international question under consideration be enlarged to include two representatives of the Colorado River Basin States.

It became manifest in the discussions of the Denver conference that to bring about Colorado River development free from litigation and controversy it was necessary not only to secure cooperation between the basin States and the Federal Government and the approval of the Colorado River compact by all the basin States, but it was equally essential to obtain an agreement under the provisions of the Colorado River compact among Arizona, California, and Nevada. As the conference progressed it became evident that such supplementary compact should cover not only a division of the average amount of 7,500,000 acre-feet of water turned down by the upper-basin States for the use of the lower-basin States, but should also provide for a distribution of power benefits to Arizona and Nevada for their contribution of natural resources in the production of power, largely to be used in the development of southern California.

ARIZONA'S PROPOSALS

Arizona presented her position to the conference in the following brief statement:

"Item 1. That Arizona will accept the Colorado River compact as agreed upon at Santa Fe, N. Mex., if and when the same is supplemented by a subsidiary compact which will make definite and certain the protection of Arizona's interests.

"Item 2. That before regulation of the Colorado River is undertaken Mexico be formally notified that this country reserves for use in the United States water made available by storage within the United States.

"Item 3. That any compact dividing the waters of the Colorado River and its tributaries shall not impair the rights of the States, under their respective water laws, to control the appropriation of water within their boundaries.

"Item 4. That the waters of the tributary streams of the Colorado River system entering the river below Lee Ferry, and which are inadequate to develop their own valleys, be reserved to the States in which they are located.

"Item 5. That the water in the main Colorado River which is physically available in the lower basin (but without prejudice to the rights of the upper-basin States) shall be legally available to and divided between Arizona, California, and Nevada, as follows: A. To Nevada, 300,000 acre-feet. B. The remainder, after such deductions as may be made to care for Mexican lands, which may be allotted by treaty, shall be divided equally between Arizona and California.

"Item 6. That the right of the States to secure revenue from and to control the development of hydroelectric power within or upon their boundaries be recognized.

"Item 7. That encouragement will be given, subject to the above conditions, to either public or private development of the Colorado River at any site or sites harmonizing with a comprehensive plan for the maximum development of the river's irrigational and power resources.

"Item 8. That Arizona is prepared to enter into a compact at this time to settle all of the questions enumerated herein, or Arizona will agree to forego a settlement of items 6 and 7 and make a compact dividing the waters alone, provided it is specified in such compact that no power plants shall be installed in the lower-basin portion of the main Colorado River until the power question is settled by a compact between the States."

THE LOWER STATES DIFFER

California first suggested deferring adjustment and submitting the matter to arbitration, but when pressed by the governors of the upper-basin region for a definite statement presented the following suggestion for division of the water allocated under the Santa Fe compact without reference to distribution of power benefits:

"1. To Arizona and Nevada, their tributary waters, subject, however, to the condition that any tributary waters not used and reaching the main stream shall be deemed part of the main-stream flow for the purposes of the agreement.

"2. To Nevada, 300,000 acre-feet per annum from the main stream.

"3. To Arizona her present perfected rights to 233,800 acre-feet per annum, and to California her present perfected rights to 2,159,000 acre-feet per annum from the main stream; the balance of the water of the main stream below Lee Ferry, subject to the terms of the Colorado River compact, to be divided equally between Arizona and California, subject, however, to the provisions that any part of the allocation of either State not put to beneficial use in said State within 20 years shall thereafter be subject to appropriation and use in either State, pursuant to its laws."

Arizona bases its position on definite principles and rights involved in State sovereignty; the same principles upon which New York insists in controlling the use of the waters of the St. Lawrence River for the benefit of its people. These rights on which Arizona insists are:

A. The constitutional right to the use and disposal of the waters of the Colorado River as it flows through Arizona's borders.

B. The ownership of the stream bed of the Colorado River within Arizona.

C. The right to a revenue in lieu of taxation for the use of the fall of the huge flow of the Colorado, which fall within Arizona amounts to 2,369 feet.

D. The right that no dam or dams wholly or partly in Arizona shall be constructed without the consent of the State.

Without unfairness to California, it may be here observed that the official records of stream measurements show that Arizona contributes over 17 per cent of the total Colorado River water supply and California contributes no water except an insignificant amount at infrequent periods.

Arizona contains 45 per cent of the drainage area of the Colorado; California less than 2 per cent. Of Arizona's total area, 97 per cent is in the drainage basin of the Colorado, which stream, with its opportunities for development, Arizona regards as her greatest natural resource.

THE UPPER STATES SUGGEST A COMPROMISE

After reviewing the testimony offered by the lower-basin States, the upper-basin governors united in presenting a proposal to them for settling their differences, which may be summarized as follows:

Of the average annual delivery of water to be supplied to the lower basin by the upper basin 300,000 acre-feet to Nevada, 3,000,000 acre-feet to Arizona, and 4,200,000 acre-feet to California.

Arizona to have the exclusive, beneficial consumptive use of her tributaries before the same empty into the main stream.

Arizona and California each may divert and use one-half of the unappropriated waters of the main Colorado River flowing below Lee Ferry on the condition that the use of said waters between the States of the lower basin shall be without prejudice to the rights of the States of the upper basin to further apportionment of water as provided by the Colorado River compact.

At the second session of the conference, Arizona accepted the upper governors' proposal on water allocation. This acceptance was based on a complete agreement being reached during the conference, protecting Arizona in her right to receive power benefits, safeguarding the water

of Arizona's tributary streams flowing into the Colorado, and protecting her from having her tributary water drafted for use in Mexico. That Arizona paid a great price for this cooperation is seen when we consider that she has an equal right with California to one-half of the stored flood water and that the Arizona lands to be reclaimed are as productive and feasible of reclamation as those of California.

California declined to accept the proposal of the upper-basin governors, insisting that to supply her essential water needs, including some 1,000,000 acre-feet to be pumped over a 1,600-foot mountain range to add to the supply of Los Angeles and the coastal-plain districts, she must have a minimum of 4,600,000 acre-feet or 61.3 per cent of the allocated lower basin.

PRINCIPLES OF STATE RIGHTS

Probably the outstanding feature of the conference to date has been the adoption of what is known as the Pittman report, which clearly outlines the principle of State sovereignty and that coordination of State and Federal rights on which this Republic is built. Senator PITTMAN, of Nevada, introduced his resolution at the first session of the conference, protecting the States in their sovereign rights to the use of the water of interstate streams, subject only to the right of Congress to control navigation in the interest of interstate commerce. This important resolution, early in the second session, was referred to a committee of the conference composed of representative members from all the seven States. This committee, on September 23, 1927, made the following report:

"The States have a legal right to demand and receive compensation for the use of their lands and waters except from the United States for the use of such lands and waters to regulate interstate and foreign commerce.

"The State or States upon whose lands a dam and reservoir is built by the United States Government, or whose waters are used in connection with a dam built by the United States Government to generate hydroelectric energy, are entitled to the preferred right to acquire the hydroelectric energy so generated or to acquire the use of such dam and reservoir for the generation of hydroelectric energy upon undertaking to pay to the United States Government the charges that may be made for such hydroelectric energy or for the use of such dam and reservoir to amortize the Government investment, together with interest thereon, or in lieu thereof agree upon any other method of compensation for the use of their waters."

While this report was not signed by California's representatives nor voted upon by her representatives in the conference, it was otherwise unanimously adopted.

WHEN CONGRESS MEETS

The sessions of the conference, to be continued late in November, have paved the way for united support of a new plan for Colorado River development for presentation to the approaching session of Congress, which includes the following features:

The advance of Federal funds for the cost of construction when the Government is assured of sufficient income from power and water revenues to amortize the total cost in 50 years and pay all interest and operating charges during such period.

Recognition of the principle of State sovereignty over the use of land and water by a provision for payment of an annual revenue in lieu of taxation to the States contributing of their natural resources toward power production; this revenue to equal at least that which the State would receive in taxation if the development were made by private capital.

Removal of all possibility of the Federal Government entering the power business but with opportunity given, as provided in the Federal water power act, for public and private agencies to present offers for the power privileges.

The steadiness, determination, and good sense of the governors of the upper-basin States, who have acted as a neighborly board of mediation, have been admirable. They have held the negotiations to the consideration of vital principles, working to a constructive end, and are entitled to great credit for the fine spirit of justice shown.

On October 18 the directors of the Chamber of Commerce of the United States, to whom this important matter was presented, decided that such excellent headway was being made by the Colorado River conference that no action should be taken by the chamber in this vital matter until the Colorado River conference had exhausted every effort to adjust the situation.

On October 22, Gov. George H. Dern, of Utah, in a conference with President Coolidge, obtained from the President his expression of good will for the success of the work under way.

Unusual headway has already been made. The practicality of the plan of cooperation suggested is increasingly evident.

That concludes the article written by Mr. Dwight B. Heard and published in the American Review of Reviews for last December. As Mr. Heard predicted in this article, serious efforts were made to arrive at an understanding between Arizona and California which would be fair to both States. The senior Senator from Nevada [Mr. PITTMAN] will, I am sure, agree that it was through no fault of mine that a complete agreement has not been attained with respect to a division of the waters allocated to the lower basin by the Colorado River compact.

In order that the Senate may know what the Senator from Nevada and I have tried to accomplish, I shall read a copy of a letter which I addressed to the Governor of Utah last March:

WASHINGTON, D. C., *March 31, 1928.*

Hon. GEORGE H. DERN,
Chairman Colorado River Conference,
Salt Lake City, Utah.

MY DEAR GOVERNOR DERN: In a talk one day with Senator PITTMAN I remarked that if the Gila River had not been included in the Colorado River system Arizona would have promptly ratified the compact in 1923. Afterwards the Senator said that he could see no reason why Arizona, California, and Nevada should not agree among themselves that the Gila and its tributaries be assigned wholly to Arizona and divide between them the 8,500,000 acre-feet of water granted to the lower basin. A careful reading of the compact convinced him that the three States have a perfect legal right to make such an agreement.

In order to see what could be accomplished in that direction, I drafted an amendment to the Johnson bill (S. 728), which I gave to Mr. Malone, who passed it on to the Californians. The amendment was predicated upon further amendments to the bill which would bring the three States into complete accord. When asked what these further requirements were I stated:

First. That the bill be based upon a seven-State ratification of the Colorado River compact.

Second. That every element of coercion of the State of Arizona be stricken from the bill, such as the reference to the constitution of Arizona, so that the people of my State could fairly and freely pass upon the merits of the proposal.

Third. That the California Senators agree to accept Senator PITTMAN'S power amendments and recognize the principle that the States are entitled to compensation for the use of their lands and waters.

Fourth. That there be stricken from the bill the provisions which seek to change the contract of October 23, 1918, between the United States and the Imperial irrigation district, in which the water users of the Yuma project have a vital interest.

At meetings in Senator PITTMAN'S office with Messrs. Pound, Rose, and Yager these four propositions were discussed and we made much progress toward arriving at a complete understanding. In presenting the water proposal I pointed out that about four-fifths of the people of Arizona live in the area drained by the Gila and that their interests must be fully protected. That it is impossible to deliver to Mexico any water from the Roosevelt Dam or any other existing reservoir during a period of drought because the water would have to flow for over 200 miles in a dry river bed and not a drop of it would appear at the mouth of the Gila. That the conservation and use of all of the waters of the Gila in Arizona could injure none of the six other States because that river empties into the Colorado below the Laguna Dam, which is the last point of diversion in the United States, since the Hanlon heading must be abandoned.

I said that Arizona was willing to divide all the water which is divisible. That the apportionment of water between the upper and lower basins as provided in the compact was satisfactory to my State. That it was physically impossible to supply any water to Mexico, except from the main stream of the Colorado River. That even though the governors of the upper-basin States had awarded 1,200,000 acre-feet more water to California than to Arizona, my State would equally divide with California the burden of supplying water to Mexico. That Nevada had been awarded so small a quantity of water that we would not ask that State to furnish any water to Mexico.

I concluded by saying that since Senator PITTMAN was of the opinion that it would be no violation of either the letter or the spirit of the Colorado River compact for the States of Arizona, California, and Nevada to at this time divide the 8,500,000 acre-feet of water apportioned by it to the lower basin I was willing to give California a good title to 4,700,000 acre-feet of water, which is 100,000 acre-feet more than her commissioners asked at Denver. That Arizona would include in her 3,500,000 acre-feet all tributaries of the Colorado River above the Laguna Dam, so that the users of water on the Little Colorado, for example, would be in exactly the same position as a water user on any tributary of the Colorado in the upper basin which contributes water to the total supply that is actually capable of division.

Mr. Rose stated the only objection which was then made to my plan of water division. He insisted that if the farmers of the Salt River Valley were to be assured that they would never be called upon to supply water to Mexico, then those now farming in the Imperial Valley should have the same protection. I directed his attention to the fact that the plan contemplated that California should have 1,200,000 acre-feet of water free from any Mexican burden, but that did not satisfy him. I later drafted a further provision, laying down a rule which would be applicable to all seven States, that no land now having a perfected right to water should be required to furnish any water to Mexico, but that each State's quota of the Mexican demand

be furnished in the inverse order of priority as established by State law.

I was quite hopeful that my water proposal would be accepted, but last Thursday Mr. Rose and Mr. Childers called at my office and said that California could not agree to it and that the best their State could do was expressed in a memorandum of which I had a copy. In view of the repeated and reiterated statement that Arizona must seek the same protection which has been freely conceded to the States of the upper basin, these gentlemen must have known that my State could not leave her rights to water from the Colorado River to be determined some time within 10 years by a majority of any commission. The only conclusion that I could draw from this action is that California still hopes to secure all that she seeks through an act of Congress and has no real or sincere desire to come to any agreement with Arizona.

I am inclosing a copy of the written proposal relating to water which I submitted to the Californians and a copy of the memorandum in reply thereto. I shall be obliged if you will bring these papers to the attention of the governors and commissioners of the States of the upper basin that, based upon this record, they may judge for themselves as to which of the two States was sincere in trying to reach an agreement.

I am just in receipt of your telegram and regret to learn that no meeting of the governors of the States of the upper basin has as yet been arranged. This letter was written with the thought that there would be such a meeting, and I am, therefore, sending copies of it to your colleagues of the Colorado River conference.

Yours very sincerely,

CARL HAYDEN,
United States Senate.

Mr. President, I shall now read the proposal which I made to the Californians and to which reference is made in this letter. The final draft of that proposal was as follows:

PROPOSED DIVISION OF LOWER BASIN WATER TO ARIZONA, CALIFORNIA, AND NEVADA

Of the 7,500,000 acre-feet annually apportioned to the lower basin by paragraph (a) of article 3 of the Colorado River compact, and of the 1,000,000 acre-feet in addition which the lower basin has the right to use annually by paragraph (b) of said article; to the State of Arizona 3,500,000 acre-feet; to the State of California 4,700,000 acre-feet; and to the State of Nevada 300,000 acre-feet, the said apportionment in each case to be for exclusive beneficial consumptive use in perpetuity:

Provided, That if, as provided in paragraph (c) of article 3 of the Colorado River compact, it shall become necessary to supply water to the United States of Mexico from waters apportioned by said compact, then the burden of supplying the one-half of any deficiency which must be supplied by the lower basin shall be equally borne by the States of Arizona and California;

Provided further, That the State of Arizona shall have the exclusive beneficial consumptive use of the Gila River and its tributaries within the boundaries of said State, and the waters of said river and its tributaries shall never be subject to any diminution whatever by any allowance of water which may be made by treaty or otherwise to the United States of Mexico.

The several foregoing apportionments shall include all water necessary for the satisfaction of any rights which may now exist, including water for Indian lands in each of said States, and in the enforcement of any treaty which may require the delivery of apportioned water to the United States of Mexico neither the United States of America nor any State shall require any land having a perfected right to water at the date of the approval of this act to be deprived of water, but lands having the latest order of priority to the use of water, as determined by State law, shall be the first to be deprived of water to supply the quota of water which such State may be required to supply to the United States of Mexico.

The States of Arizona and California each may divert and use one-half of the waters of the Colorado River system, unapportioned by the Colorado River compact, flowing in the main stream of the Colorado River below Lees Ferry, subject to future equitable apportionment among the States of the Colorado River Basin after the year 1963.

That, Mr. President, was my proposal, and I now direct the attention of the Senate to the written answer to that proposal submitted by gentlemen from California who are here speaking for that State with respect to the Colorado River. Their proposal in reply was as follows:

PROPOSAL MADE BY MESSRS. POUND, ROSE, AND CHILDERS TO SENATOR HAYDEN, MARCH 28, 1928

1. The States of Arizona, California, and Nevada shall support S. 728, as reported by the Senate Committee on Irrigation and Reclamation, in substantially its present form, including the power revenue provision, and to include a provision whereby dam construction shall start immediately so as to obtain flood relief at the earliest possible time.

2. Direct in the bill a full study, in cooperation with State officials of the three States, of the irrigation possibilities from the Colorado River system, exclusive of the Gila and its tributaries, in the States of Arizona, California, and Nevada, and authorize an appropriation of $250,000 for that purpose.

3. Upon the passage and approval of said bill, the three States to approve the Colorado River compact unconditionally, and at the same time, as a part of the same act or concurrently with it, approve a three-State compact for a division of the use of the waters of the Colorado River system in the lower basin among the States of Arizona, California, and Nevada. The said three-State compact shall provide for a commission of five, one member thereof to be appointed by each of the States of Arizona, California, and Nevada, and two by the President of the United States, which commission shall make its study and report its findings to the President at as early a date as may be convenient, but in any event within 10 years, and upon the reporting of its findings to the President, with the concurrence of at least a majority of said commissioners, its findings shall be final and conclusive, and each of the States shall thereupon automatically be bound thereby.

I digress, Mr. President, to ask whether anyone would be so foolish as to think that a sovereign State of this Union could possibly leave its entire agricultural future in the hands of a majority of a commission which was to report some time within 10 years as to what part of the water might be allocated to that State? I doubt if the State of California itself, or any Senator or Representative from that State, would consent to the passage of any such provision in any act of Congress. Yet that is the only answer that I obtained, the only practical suggestion which was made, with respect to a division of the waters of the Colorado River in the lower basin.

As a part of its findings, the said commission shall allocate to Arizona in perpetuity the use of the Gila River and its tributaries within said State and, subject to the Colorado River compact, the use of the balance of the water of the Colorado River system in the lower basin shall be divided, for agricultural and domestic purposes, between Arizona, California, and Nevada on a just and equitable basis, and the commission shall find the basis upon which water, if any, shall be supplied to the Republic of Mexico. In making its findings the commission shall take into consideration the sovereignty of the contracting parties and the physical and economical conditions relating to the use of the water in the three States for irrigation and domestic purposes, to the end that the greatest beneficial use may be made of the waters of the Colorado River in the United States.

That, Mr. President, is the only concrete proposition in writing that I have received from anyone in any way authorized to speak for the State of California with respect to an apportionment of the waters of the Colorado River in the lower basin. I submit that the plan submitted is so unfair and so unjust that no one can blame me as one who has some right to speak for the State of Arizona for promptly rejecting it.

Mr. President, having disposed of the bond-issue proposal and the newspaper misrepresentations in connection therewith, and having likewise disposed of the attack made upon that eminent citizen of my State, Mr. Dwight B. Heard, I now return to the question of whether this bill by its express terms does place the construction and reimbursement of the cost of the all-American canal under the reclamation act.

THE ALL-AMERICAN CANAL SUBSIDY

In section 1 of the bill, on page 2, lines 10 to 15, the Secretary of the Interior is authorized to construct—

a main canal and appurtenant structures located entirely within the United States connecting the Laguna Dam with the Imperial and Coachella Valleys in California, the expenditures for said main canal and appurtenant structures to be reimbursable, as provided in the reclamation law.

It may be argued that such language is clear and plain and can not be misconstrued, but everyone knows that there is a special fund in the Treasury known as the reclamation fund and that all expenditures of money made under the reclamation law come out of that fund. The Swing-Johnson bill now before us for consideration, in section 2 provides for another special fund to be known as the "Colorado River Dam fund." This newly described fund can serve no useful purpose except to facilitate bookkeeping in the Treasury Department. The very name of the fund shows that it is to be created for the purpose of keeping account of the expenditures made upon a dam and a great hydroelectric power plant if the latter is built by the Federal Government. Interest on the money advanced will be charged from time to time at the rate of 4 per cent per annum. Credit will also be given when the periodical payments for power are made by the purchasers thereof.

The creation of a "Colorado River Dam fund" may be entirely justified to accomplish these purposes; but what is the

necessity of placing in it money for a reclamation project? The terms of payment for power will be upon one basis, and the terms of payment for the all-American canal will be upon another. This bill provides that the contracts for the sale of power or power privileges shall be such as to amortize the total investment in the dam, or the dam and power plant, as the case may be, in 50 years, with interest at 4 per cent.

The reclamation law provides that the Federal Government shall be reimbursed for its expenditures in 40 years. Is it not obvious that these two different systems of repayment, if the money is to come out of the same fund, are bound to lead to such confusion that the Treasury Department would have no other recourse than to establish a separate account for the all-American canal expenditures and receipts? Is there not also grave danger that the Comptroller General, or some administrative officer, or even the courts, may construe these conflicting provisions of the bill in such a manner as to violate the true intent of Congress?

It seems to me that it would be much safer and much simpler to limit the use of the "Colorado River Dam fund" to the Boulder Canyon Dam and the power plant. I have therefore, prepared an amendment to accomplish that purpose. I have not provided in the amendment that any particular sum of money should be appropriated and deposited in the reclamation fund for the construction of the all-American canal.

ALL-AMERICAN CANAL COST

How much would it cost to construct the all-American canal? The bill provides for the construction of a canal to connect the Laguna Dam with the Imperial and Coachella Valleys.

I find that the total estimated cost of the all-American canal from the Laguna Dam to the West Main Canal of the Imperial irrigation district is $30,773,000. That sum is found on page 86 of the Fall-Davis report on the "Problems of Imperial Valley and vicinity." The all-American canal board in its report of July 22, 1919, did not contemplate anything more than a main canal from the Laguna Dam to Imperial Valley. No estimate was then made of the cost of conveying water on to Coachella Valley. That was an afterthought, which is found in the estimates for the so-called "A-line" canal which appears on page 82 of the Fall-Davis report of February 4, 1922.

The proposed "A-line" canal will branch off from the all-American canal shortly after it emerges from the sand dunes, and continue in a northwesterly direction for about 140 miles to and around the Coachella Valley. The estimated cost of this branch canal to Coachella Valley is $10,941,000. Therefore, the total estimated cost of providing a means of conveying water from the Colorado River at Laguna Dam to the Imperial and Coachella Valleys, as stated in the Swing-Johnson bill, is $41,714,000. For convenience I shall use $42,000,000 as the proper figure.

I am sure that it will not be denied that the true intent and purpose of the Committee on Irrigation and Reclamation in inserting the words on page 2, lines 13 to 15 of the bill—

the expenditures for said main canal and appurtenant structures to be reimbursable, as provided in the reclamation law—

was to change the bill so as to make it certain that no part of the cost of the all-American canal from Laguna Dam to Imperial and Coachella Valleys would be paid from the receipts from the sale of hydroelectric power generated at Boulder Dam.

The bill as introduced by Senator JOHNSON undoubtedly contemplated that the Federal Government was to be reimbursed for the moneys expended on the all-American canal by means of the sale of Boulder Canyon power. The landowners of the Imperial and Coachella Valleys were to secure this main canal from the Laguna Dam as a free gift. In other words, the consumers of electric power in the municipalities of southern California were to reimburse the Federal Government for the cost of the all-American canal by paying a higher rate for the power purchased at Boulder Canyon. The committee very properly decided that this irrigation canal should not be subsidized by power, but that the landowners of the Imperial and Coachella Valleys should pay for their own canal just as other water users do on United States reclamation projects.

KILOWATT-HOUR COST OF ALL-AMERICAN CANAL SUBSIDY

The question has been raised as to just how much this all-American canal subsidy amounted to when translated into a charge per kilowatt-hour. Mr. George W. Malone, State engineer of Nevada, has made some very careful calculations, which have not been controverted or denied, and which show that this subsidy amounts to seventy-one one hundredths of a mill per kilowatt-hour. That is the extra charge that the consumers of power in Los Angeles and the other cities and towns of southern California would have to pay if the all-American canal were given to the landowners of Imperial and Coachella Valleys as a gratuity.

I shall read from Mr. Malone's testimony before the Senate Committee on Irrigation and Reclamation. On January 20, 1928, he was interrogated by the senior Senator from California, as follows:

Senator JOHNSON. Don't you think that the Government, considering what it has done and is doing in other reclamation projects, relieving settlers from interest, and so on, could fairly and reasonably relieve the all-American canal from interest charges?

Mr. MALONE. Under a bill I believe introduced by yourself last year the all-American canal was under the reclamation act, where there are no interest charges, and provided that contracts be made prior to the construction of the all-American canal, providing for the payments, etc.

Senator JOHNSON. Well, I am asking you if you do not think that is a perfectly just thing under the circumstances?

Mr. MALONE. You could eliminate the interest and still make just charges. I do not say in this report that you shall pay any certain amount, but pay for the service rendered. Pay the just charges, whatever they are. And we consider that the Secretary should have some assistance from men who are on the ground, or are familiar with conditions, to determine what those just charges are.

* * * * * * *

Senator PITTMAN. Do you happen to know what amount per annum the interest would amount to on the all-American canal project?

Mr. MALONE. On what they call the straight-line basis, about $890,000; $896,000, I believe.

Senator PITTMAN. $896,000?

Mr. MALONE. Per year.

Senator PITTMAN. Now, let me ask you what the State of Nevada would think about it if $896,000 added to the cost of the power was such an amount that there would be no profit for distribution for Nevada? Would Nevada favor paying that interest?

Mr. MALONE. We would like to be treated fairly in the matter, and I would leave that to the judgment of the committee. I would not say that it all should be given to one State. The point I have tried to make in my reports is that there will be profits in this enterprise. Whether your committee recognizes that fact or not is beside the question. If you do not recognize it, they will all go toward the particular thing that is being financed in the set-up. If you do recognize it, then in case the profits are sufficient the two States who own the site may benefit.

* * * * * * *

Senator HAYDEN. As I understood you to answer Senator JOHNSON, you would have no objection to the construction of the all-American canal as an ordinary reclamation project, without interest, for the benefit of the lands in that section of the country, and it would be a positive advantage to the scheme to have it done in that way. In other words, this seven-tenths of a mill that is charged to power by having the all-American canal constructed as an ordinary reclamation project would be removed?

Mr. MALONE. Interest on the all-American canal amounts to, as I say, about $896,000 a year on a straight-line basis, meaning the average over the period, which, in turn, amounts to almost exactly a quarter of a mill in this set-up. That could be eliminated if the Senator's bill was drawn as it was last year at one time, so that the all-American canal would be constructed under the Reclamation Service, contracts being made with the lands prior to starting construction, the same as you have it on the dam in regard to power, and then there would be no interest, and the lands would pay the cost. Does that answer your question?

Senator HAYDEN. Yes. I can see that. Now, the set-up in the bill as I remember last year provided for $31,000,000 for the construction of the all-American canal. The bill itself provides for the construction of the canal from the Laguna Dam into the Coachella Valley. My understanding of that $31,000,000 figure is that it would only carry the canal through the sand dunes and into what now comprises the Imperial irrigation district. That there would be some eighty-odd miles for the additional canal, and the figures for that, I think, are some $11,000,000, if I remember right, to carry out the purpose of the bill. Have you in your set-up counted on $31,000,000 or a total of $42,000,000 for that purpose?

Mr. MALONE. We have counted on $31,000,000—it is either $31,000,000 or $31,500,000. I have it in my report, and in addition the interest during the construction of the canal, which would only be a part of the 10 years as outlined for the dam, making a total of $35,000,000, including interest during construction and the original cost of the canal. Now, I am not exactly clear where the end of the canal would be, Senator, and I would not answer it without referring to the Weymouth report. You can get it from the report if you desire.

Senator HAYDEN. My recollection of the Weymouth report is that the cost of the all-American canal proper, carrying it only through the sand dunes, would be $31,000,000, and that there would be an additional cost of $11,000,000 to carry it from that point to the Coachella Valley.

Now, the bill provides for delivery of water into the Coachella Valley. So it seems to me that if the plan of the bill was carried out you would have to make your figure $42,000,000 instead of $31,000,000, and base your calculations on that assumption.

Mr. MALONE. I would be very glad to clear that point up for the committee. I am satisfied that Thomas Maddock or myself could do it. I could tell you, though, definitely in a day or so.

Senator HAYDEN. That is all.

I desire to have printed in the RECORD a table prepared by Mr. Malone showing the cost of annual operation of the Boulder Dam and power plant during an amortization period of 35 years, in which he demonstrates that power can be delivered from Boulder Dam to Los Angeles, if this all-American canal subsidy is removed, for 3.04 mills per kilowatt-hour; but that if the cost of the all-American canal is to be paid out of the power, then seven hundred and eleven one-thousandths, or seven-tenths of a mill, must be added to the price of power, making the total cost of power from Boulder Dam in Los Angeles 3.751 mills per kilowatt-hour.

The PRESIDING OFFICER (Mr. SHORTRIDGE in the chair). Without objection, the table will be printed in the RECORD.

The table is as follows:

Cost annual operation during amortization period of 35 years

	Per cent	Cost	Mills
Interest	5	$2,500,000	0.695
Annual payments	1.107	553,500	.1538
Depreciation	1.25	625,000	.1933
Operation and maintenance	1	500,000	.1388
Total	8.35	4,178,000	1.1609

Three billion six hundred million kilowatt-hours, corresponding to 550,000 firm horsepower annual charges of $4,178,000, is equal to 1.16 mills at the switchboard.

	Cost at switchboard	Cost at power market assumed 12 per cent line losses
Dam and power plant	1.511	1.72
Transmission line	1.160	1.32
Total	2.671	3.04

The power delivered into the power markets, without any reference to the all-American canal, is 3.04 mills.

All-American canal—41 years' amortization exclusive of 9-year absorption period

	Amount	Mills per kilowatt-hour at switchboard	Mills per kilowatt-hour in power market
Average annual interest	$896,000	0.249	0.283
Average annual payment	854,000	.237	.270
Operation and maintenance	500,000	.139	.158
Total	2,250,000	.625	.711

Cost of Boulder Dam power in power market, including all costs of all-American canal, 3.751 mills per kilowatt-hour.

Mr. HAYDEN. It will be observed that Mr. Malone based all of his figures upon an estimate that the cost of the all-American canal would be not more than $31,000,000, as stated in a report made by the Secretary of the Interior on the Swing-Johnson bill as introduced in the Sixty-ninth Congress. I am at a loss to understand why Secretary Work failed to include in his estimate the $10,941,000 which it will cost to convey water to Coachella Valley. The text of the bill clearly and explicitly states that such a canal is to be built, and the engineers of the Interior Department had previously submitted reports that this extra amount was needed.

Unfortunately, Mr. Malone accepted the report of the Secretary of the Interior at its face value. He should have used $42,000,000 as the basis for his calculations, and in that event it is obvious that he would have found that the all-American canal subsidy in the original Swing-Johnson bill is almost 1 mill per kilowatt-hour instead of a little over seven-tenths of a mill. The practical effect of the committee amendment, therefore, is to make it possible for the Federal Government to sell Boulder Canyon power at a mill a kilowatt-hour cheaper than would have been possible under the bill as introduced by the senior Senator from California on December 8, 1927.

It was undoubtedly the intention of the Committee on Irrigation and Reclamation to eliminate this subsidy. The Senators who compose that committee clearly understood that the landowners of the Imperial and Coachella Valleys should pay for their own canal upon the same terms and conditions as are imposed on other farmers under Federal reclamation projects. But has the committee fully accomplished its purpose? Has it eliminated the subsidy and removed this burden upon power generated at Boulder Canyon?

The senior Senator from Arizona [Mr. ASHURST] and I both doubt it. For that reason we prepared amendments to the bill to remove all uncertainty. Our doubts have been confirmed by a letter recently received from Mr. John L. Gust, of Phoenix, Ariz., attorney for the Salt River Valley Water Users' Association, than whom there is no more able water lawyer in the whole United States. Mr. Gust says:

The bill makes the entire project a single unit. As long as this is true the proposed irrigation development in southern California will be carried by the power development in Arizona and Nevada. The door is wide open under the reclamation law to allow the payments from the lands to become delinquent and use up the power receipts to make up the payments. I am satisfied that under this bill as it now stands it will be possible for the Secretary of the Interior to use up the total power receipts in the payment of the construction charges, and call upon the owners of the lands in the Imperial Valley for very little of the construction charges, and because of the unfavorable financial situation in which the Imperial project is likely to be, pressure will be brought upon the Secretary of the Interior to secure reimbursement to the United States out of the power receipts, rather than from the Imperial Valley lands. In my opinion there is no way of obviating this situation unless the appropriations for the power dam and for the all-American canal are distinctly separated in the bill or there is inserted an express provision that the all-American canal should pay its own way.

Mr. President, in order to accomplish what I think would be the best method of amending the bill, I suggest that there be stricken from it all of these so-called bookkeeping provisions and that on page 4, line 25, there be substituted in lieu thereof the following language:

Provided, That all sums expended on said Boulder or Black Canyon Dam shall be repaid to the United States with interest until paid at 4 per cent per annum from the year in which the expenditures are made, the total amount of principal and interest due on the 1st day of December of the second year after the announcement by the Secretary of the Interior that said dam has been completed shall be reimbursed to the United States in annual amortized payments of principal and interest during the succeeding 41 years.

The idea I have sought to express by this amendment is taken directly from an act of Congress approved June 7, 1924, wherein $5,500,000 was authorized for the construction near San Carlos, Ariz., of what is now known as the Coolidge Dam. The money appropriated by Congress for the construction of that dam bears interest at 4 per cent per annum, just as it is provided in this bill that moneys advanced for the construction of the Boulder Canyon Dam shall bear interest at that rate. I shall read the provision of the act of June 7, 1924, which provides for the payment of interest:

SEC. 3. The Secretary of the Interior shall by public notice announce the date when water is available for lands in private ownership under the project, and the amount of the construction charge per irrigable acre against the same, which charge shall be payable in annual installments, the first installment to be 5 per cent of the total charge and be due and payable on the 1st day of December of the third year following the date of said public notice, the remainder of the construction charge, with interest on deferred amounts from date of said public notice at 4 per cent per annum, to be amortized by payment on each December 1 thereafter of 5 per cent of said remainder until the obligation is paid in full.

In other words, the interest payment is 4 per cent, the amortization payment is 1 per cent, and that 1 per cent will pay the debt in 41 years, as any amortization table will show. That is the method pursued in the cases of many loans under the Federal farm loan act.

If, however, it should be determined that these bookkeeping provisions are to be retained in the bill—although I am frank to say that I can see no further use for them—the measure must be amended in another way to make it certain that the all-American canal subsidy has been eliminated. I demonstrated, when I addressed the Senate on the 2d day of May, the Treasury Department has no difficulty in keeping accounts with respect to the San Carlos project. Neither would there be any difficulty with respect to the Boulder Dam project, and to specify just how an account should be kept, or naming it, is really a vain and useless thing. If the proponents of this bill insist that such an account must be specified in the bill, then I suggest that the

bill be amended so as to provide that this "Colorado River Dam fund" shall apply only to the Boulder or Black Canyon Dam and to the power plant, if constructed. I therefore offer the following amendments, which I ask to have read by the clerk.

The PRESIDING OFFICER. The clerk will read.

The Chief Clerk read the amendments, as follows:

Amendment intended to be proposed by Mr. HAYDEN to the bill (S. 728) to provide for the construction of works for the protection and development of the lower Colorado River basin, for the approval of the Colorado River compact, and for other purposes, viz: On page 22, line 3, insert the following:

"SEC. 15. This act shall be without prejudice to the negotiation of a treaty with Mexico affecting the waters of the Colorado River, which treaty may provide for the payment of compensation to the United States of Mexico for the lease to the United States of America of an area or zone of land sufficient for the construction, operation, and maintenance of a canal to convey water diverted from the Colorado River at Laguna Dam for the irrigation of lands in the State of California, upon terms and conditions similar to the lease of certain lands for canal purposes, as provided in the treaty of November 18, 1903, between the United States of America and the Republic of Panama. Said treaty may also provide for an agreement between the two nations respecting the construction and maintenance of levees."

Amendment intended to be proposed by Mr. HAYDEN to the bill (S. 728) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, viz: On page 2, line 17, insert the following:

"*Provided further*, That said canal connecting the Laguna Dam with the Imperial and Coachella Valleys in California shall not be constructed through the sand dunes between Pilot Knob and the Imperial Valley in the event that an existing contract or concession made by the Republic of Mexico to a corporation to build and operate a canal through Mexican territory to irrigate land in California can, within a reasonable time, be modified to protect the interests of the United States."

Amendment intended to be proposed by Mr. HAYDEN to the bill (S. 728) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, viz: On page 3, line 5, after the word "act," insert the words "relating to said Boulder or Black Canyon Dam and power plant."

On page 3, lines 5 and 6, strike out the words "carrying out the provisions of this act" and insert in lieu thereof the words "connection with said dam and power plant."

Amendment intended to be proposed by Mr. HAYDEN to the bill (S. 728) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, viz: On page 5, line 19, strike out all of paragraph (b), down to and including the word "act," on page 6, and insert in lieu thereof the following:

"(b) Before any money is appropriated for the dam at Black Canyon or Boulder Canyon, and/or for the hydroelectric plant at or near said dam authorized by this act, or any construction work thereon done or contracted for, the Secretary of the Interior shall make provision by contract, in accordance with the provisions of this act, for the right to the use of water and appurtenant works and privileges necessary for the generation and distribution of hydroelectric energy, and/or for the sale of a sufficient amount of the electrical energy to be developed at the plant aforesaid, and for the storage of water for irrigation and domestic purposes, adequate in his judgment to insure payment of all expenses of operation and maintenance of said dam and power plant and incidental works incurred by the United States and the repayment within 50 years from the date of the completion of such works of all amounts advanced for such purposes to the fund under subdivision (b) of section 2, together with interest thereon made reimbursable under this act."

Amendment intended to be proposed by Mr. HAYDEN to the bill (S. 728) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, viz:

On page 7, line 1, after the word "the" strike out the word "payments" and insert the following: "repayments."

On page 7, line 2, after the words "section 4," insert the following:

"*Provided*, That all such contracts to insure the repayment of all amounts advanced for the construction of the canals and appurtenant structures authorized by this act, and to insure the payment of all expenses of operation and maintenance of said canals and appurtenant structures incurred by the United States, shall conform to the requirements of the reclamation law and shall attach and relate solely to the lands coming under and benefited by such canals and appurtenant structures, and no obligation or burden for the repayment of the amounts advanced for the construction of such canals or appurtenant structures or for the payment of expenses of the operation and maintenance thereof shall be imposed upon the revenues derived from the use of water and appurtenant works and privileges necessary for the generation and distribution of hydroelectric energy and/or the sale of hydroelectric power and/or the storage of water as provided for in this act."

Amendment intended to be proposed by Mr. HAYDEN to the bill (S. 728) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, viz:

On pages 3 and 4, strike out all of section 2.

On page 4, line 25, insert the following:

"*Provided*, That all sums expended on said Boulder or Black Canyon Dam shall be repaid to the United States with interest until paid at 4 per cent per annum from the year in which the expenditures are mare; the total amount of principal and interest due on the 1st day of December of the second year after the announcement by the Secretary of the Interior that said dam has been completed shall be reimbursed to the United States in annual amortized payments of principal and interest during the succeeding 41 years."

The PRESIDING OFFICER. The amendments will lie on the table and be printed.

Mr. HAYDEN. Mr. President, these amendments are not offered in any spirit of controversy. They are presented for the careful consideration of the Senators from California. I have no pride of opinion with respect to these proposals. If the Senators from California can find a better way to make it certain that the same object will be accomplished, I hope that they will not hesitate to suggest the necessary changes in the pending bill.

ALL-AMERICAN CANAL MUST BE CONSTRUCTED

The all-American canal must be constructed if the waters which are to be impounded in the Boulder Canyon reservoir are to be used in the United States rather than in Mexico. The sooner it is built the better, particularly that part of it from Laguna Dam to Pilot Knob, near the Mexican boundary line. The weir which is now maintained to divert water into the Imperial Canal through the Rockwood gates at Hanlon's heading, is a constant menace to the Yuma reclamation project, so that the point of diversion must be changed upstream to Laguna Dam.

However, in fairness to the Senate, I should frankly state that I do not believe that the proposed all-American canal will ever be built through the sand dunes along the international border. The estimated cost of that section of the canal is about $10,000,000, and a number of competent engineers have asserted that it can not be constructed for that amount. These engineers also say that the wind-blown sand will so fill the canal, if it is built, that it will become useless as a means of conveying irrigation water. Every Senator has seen moving pictures of turbaned Hollywood sheiks who are supposed to be in the wilds of Arabia or the Sahara Desert. The shifting sand dunes where these movies are photographed are the very sand dunes through which this proposed all-American canal must pass.

I desire to read from the proceedings of the American Society of Civil Engineers for November, 1924. I shall read extracts from a paper presented by a member of that society, Mr. J. C. Allison, who was, I believe, for a number of years employed as an engineer by the Imperial irrigation district, and who now, I understand, is similarly employed by those who are using water from the Colorado River for the irrigation of lands in old Mexico. Mr. Allison states with respect to the all-American canal:

> The engineering profession is making a grave mistake in sanctioning, without protest, the building of a nationally known work on the location adopted for this so-called all-American canal, especially without a more complete understanding of the necessities making such an enterprise even worthy of consideration. Although the engineers engaged in the design of this work have protested its limitation within the United States their protest has not been so strong as to prevent the politicians and selfish interests from passing quickly over it and proclaiming the location of the canal as one freely chosen and sanctioned by the engineering profession. Thus, they have gained the confidence of the public, and through this confidence have nearly succeeded in securing Government financing through what is known as the Swing-Johnson bill. Just as surely as the promotion of the project has been tied to the engineers of the country, just that surely will its construction failures be fastened to the engineers unless they examine forthwith in detail all phases of the project and proclaim their findings in no uncertain terms. Then, if such a work is ever financed and built, it may be known as a political necessity and not as a sound engineering structure.
>
> The so-called all-American canal, designed to replace the main canal of Imperial Valley now running through Mexico, should not be built

on any of the hypotheses set forth by its sponsors for the following reasons:

1. It does not add 1 acre of land to irrigation that can not otherwise be added at much less expense per acre and in greater acreage.

2. It does not add one drop of water to the available supply, but, on the other hand, represents an extravagant waste through seepage and evaporation losses.

3. It does not add one unit of power, but develops less electrical energy for the uses of the American lands than can be developed by the other means suggested herein.

4. If at all a necessity, it must be a political necessity, and this political necessity is set up by its advocates as the principal reason for its construction. The fact of the present canal being in Mexico is the main reason advocated for the building of a duplicate canal on American territory. The principle, however, is unsound because, as will be shown, Mexico as a water customer is of strict financial value to the American users of water, and, as an ally and neighbor in the use of water, is of great political value in the project. As a matter of fact, the new project does not in any sense relieve the owners of the present Mexican canal from maintaining their flood and irrigation works.

5. Above all, the construction and the maintenance difficulties and the prohibitive expense of the all-American enterprise warrants a most careful examination before it shall receive the indorsement of the society in any form.

After describing the all-American canal from the Laguna Dam to a point near the Mexican boundary line, Mr. Allison said:

It is proposed, from Pilot Knob westerly, to construct the all-American canal in a cut ranging from 40 to 160 feet in depth, through 20 miles of high mesa land and 12 miles of the most extensive drifting sand hills in America along the approximate route of the spectacular California State Highway between Yuma and Imperial Valley. Along this same approximate route is constructed the power line of the Southern Sierras Power Co.; its experience alone in maintaining 12 miles of line should be enough to weaken the determination of the most enthusiastic supporters of an all-American canal. One day 30-foot power poles are covered to the wires with sand and the next day undermined by a 24-hour sand storm.

To build a canal through this section is in itself a most infeasible exploit, not only because of the difficulties of excavation and original construction, but also on account of the hazards and maintenance expense afterwards. * * *

Continuing to read further from the statement made by Mr. Allison, I direct the particular attention of the Senate to the following representations which he makes:

Assuming the all-American canal to be built, the next consideration concerns its future maintenance. The very fact that the stream is in a cut 50 feet below the floor of the mesa itself, with crowning sand hills of heights ranging to 100 feet above the floor, makes it absolutely certain that the cut itself will receive and hold the entire volume of sand drifted to it by each storm. Where the sand drift passes across the country without interruption, ofttimes a pass through the sand hills, such as the Government pass, in which part of the canal is located, can remain fairly open; but where the passage is deliberately interrupted by a cut having a flowing stream at its bottom, then all the sands must necessarily enter and remain in this excavation. * * *

The borings taken along the route of the proposed canal indicate porous strata in the canal prism. Especially with the Boulder Canyon Dam built and with some relief from the silt thrown into the canals as at present, this prism can not possibly seal itself. The water losses from seepage, as estimated from the losses occurring in the present East High Line Canal through similar sections of material, will amount to 27 per cent unless the canal is lined with concrete. This loss is prohibitive not only because of the interference in regulating the supply to the land about 150 miles distant, but more particularly because the very water lost to the all-American canal will mean the ruination from saturation of all the low-lying lands along the section of the country through which it passes.

As an alternative, lining the canal with concrete or tunneling the sand hills is impractical, principally because the section must be constructed for the maximum irrigation requirement immediately, as it will be difficult to enlarge. As it may be 20 years before the entire capacity will be demanded for irrigation, the additional investment at present is prohibitive.

However, the main objection to the location of such a canal is the uncontrollable elements injected into the problem in deliberately cutting and maintaining a waterway through the very heart of a desert mesa region, capped with drifting sand dunes. By means of studies herein discussed, these mammoth sand dunes are easily recognized as similar in size and construction and in the phenomena governing their movement, to the most extensive types the world over. As the welfare of thousands of souls in the oasis of the great Sahara Desert, where prosperous settlements have been overwhelmed and blotted out of existence, is intimately connected with the rate of movement and the mode of accumulation of wind-borne sands, so is the fate of one of the greatest irrigation regions of the world coupled inseparably with a similar movement of great sand hills on the route of the all-American canal. The lessons taught by engineers and geologists of England, France, and the United States, in their years of study and observation of the sand dune regions of the world, must be applied in this case to avoid disaster in attempting to build the all-American canal.

I am aware that in the minority report reference is made to a statement by Prof. W. F. Durand, in which he denies that there is such a menace as has been set forth by Mr. Allison with respect to filling the canal by drifting sands. I can only say that Professor Durand is not an impartial engineer. I am informed that he has been employed for many years by the city of Los Angeles as consulting engineer and is, therefore, a partisan supporter of the Swing-Johnson bill. His testimony should not be accepted by the Senate as final and conclusive in any matter relating to that measure.

It seems to me that the only safe way to determine the facts is to follow a suggestion made by the board of direction of the American Society of Civil Engineers, the organization which publishes the bulletin from which I have read. This resolution was adopted on April 24, 1928, and is as follows:

Whereas the Federal Government, acting through various bureaus and departments, is building important structures, some of unprecedented dimensions, on the stability of which depend the security to life and property; and

Whereas such structures are being built under a wide variety of conditions with respect to geology of foundations, rainfall, temperature, floods, etc., necessarily involving exercise of a high degree of judgment as to design, construction, and operation: Be it therefore

Resolved, That the board of direction of the American Society of Civil Engineers recommends that in each case the Federal Government follow the best and established practice of private and corporate work by providing for review of the data, plans, designs, processes, and procedure by a group of engineers that is independent of the governmental organization that has charge of the project.

Resolution adopted by board of direction American Society of Civil Engineers, April 24, 1928, to be incorporated in the code of practice by this society.

Unless I misunderstood the senior Senator from California [Mr. JOHNSON], he now expresses himself as being willing that there should be a review of the previous engineering investigations which have been made with respect to the Boulder Canyon dam. I hope that he will also consent to have a reinvestigation of the all-American canal, particularly that part of it which passes through the sand dunes. My judgment is that he has made a great mistake in not adopting that view long ago. If he had done so, I am quite sure that material progress would have been made with respect to the passage of the pending bill.

In the course of his remarks he has referred to engineering commissions that were appointed to review the work done at Panama by the French before the United States took charge of that canal. President Roosevelt and the Congress at that time did not even dream of undertaking such an important work without a thorough engineering understanding of all the facts. An investigation and review of all the accumulated data relating to the Boulder Canyon project ought to be made, as the board of direction of the American Society of Engineers has suggested, by engineers not connected with the department of the Government which is actively advocating and promoting that project. That is the only way in which the criticisms of Boulder Dam and the all-American canal can be answered.

The senior Senator from Colorado [Mr. PHIPPS] has offered an amendment to the bill to cover that particular point, which I now wish to read:

SEC. —. In order to be assured of the financial, economic, and engineering feasibility of the projects herein authorized or planned the President is hereby authorized to appoint a board of five competent engineers, of outstanding reputation, at least one of whom shall be an engineer officer of the Army, which board shall examine into and review the plans and estimates heretofore made by engineers of the Department of the Interior for the control and utilization of the waters of the Colorado River and report thereon within six months after the approval of this act. The compensation and expenses of said engineers shall be paid out of any money authorized to be appropriated under the authority of this act. No contracts shall be made and no construction work shall be done or contracted for until said board shall have submitted its report to Congress.

The senior Senator from Utah [Mr. SMOOT] has likewise offered an amendment to cover the same subject, which reads as follows:

That the President of the United States is hereby authorized to appoint a board composed of five members, four of whom shall be engineers of high standing and national reputation in their profession, two from

the Corps of Engineers, United States Army, and two from civil practice, and the chairman of said board shall be a business executive. None of the members of said board shall be a resident of either of the States of Wyoming, Colorado, Utah, New Mexico, Nevada, Arizona, or California. The said board shall examine into and investigate the Colorado River for the purpose of making recommendations to the President as to the most feasible method and the cost of obtaining flood control of the waters thereof and as to a comprehensive plan of development and utilization of the water resources of said river.

SEC. 2. That the Secretary of War is hereby authorized to construct on the Colorado River flood-control structures recommended by and located at a site or sites to be selected by the above-mentioned board.

SEC. 3. That for the purpose of erecting such flood-control structures on the Colorado River and of defraying salaries and expenses of said board as fixed by the President there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $20,000,000, or as much thereof as required, to carry out the provisions of this act.

SEC. 4. That in case the recommendations for flood control include the construction of any dam or dams, the construction of said dam or dams shall not be commenced until the Colorado River compact signed at Santa Fe, N. Mex., November 24, 1922, shall have been ratified by the States of Wyoming, Colorado, Utah, New Mexico, Nevada, Arizona, and California and have been approved by the Congress of the United States, or until all of said States shall have agreed by compact approved by the Congress of the United States that no title to waters which may be stored by such flood-control dam or dams shall be acquired in excess of present perfected rights.

The amendment offered by the Senator from Colorado [Mr. PHIPPS] would evidently permit a further investigation of the desirability of constructing the all-American canal through the California sand dunes.

In that connection, I desire to read from a report submitted by the original board of engineers which recommended, as a last resort, the construction of a canal of that character. The board consisted of Dr. Elwood Mead, Mr. W. W. Schlecht, and Mr. C. E. Grunsky, and its report is dated June 17, 1919. The board says:

Due to the unfortunate location of the boundary line the United States has no jurisdiction over the territory in which the flood menace to Imperial Valley lies. Mexico seems impotent to cope with the situation, or at any rate appears to take no note of the urgency and seriousness of the situation as we are endeavoring to sketch it. In such circumstances the Imperial Valley, or more particularly the Imperial Irrigation district, representing the largest organized interests in the valley, has been constrained to construct and maintain at large cost extensive protective works on foreign territory.

These facts are recited because the usefulness of an all-American or any other canal for the irrigation of lands in the Imperial Valley would soon be in large measure destroyed if adequate protection is not had against the danger from the south which threatens the area already under irrigation. This danger, morevoer, will continue to grow so long as the Colorado River is allowed to run wild in the Volcano Lake region. It is evident that the problem of irrigation in the Imperial Valley is interwoven with the other problem of protection against the river at its high stages.

"If the United States and Mexico were cooperating on lower Colorado River problems this board would not now find itself embarrassed by being denied the opportunity to survey and propose other possible high-line canal routes than such as are wholly on United States territory. To the westward of Pilot Knob the mesa slopes to the southward and southwestward. It breaks off in a comparatively steep slope a few miles to the southward of the international boundary. It is known that a canal without material sacrifice in water surface elevation could be placed on lower ground than north of boundary by swinging the canal line across the boundary. It is not known definitely what the material advantage of such a location would be, though old surveys and a partial reconnaissance indicate that a reduction in excavation to the extent of about 10,000,000 cubic yards might be expected.

The board concludes its report with this recommendation:

RECOMMENDATION

Negotiations should at once be entered into, through appropriate channels, to bring about an understanding with Mexico in reference to the control of the Colorado River at its high stages on Mexican territory and in reference to the use of the river's water for irrigation in Mexico, and also to permit the United States to construct canals for the irrigation of lands in California across Mexican territory, if found desirable to so locate them.

I do not know what the expense would be to move 10,000,000 cubic yards of earth, but it undoubtedly would cost a considerable sum. As the very board that recommended the construction of the all-American canal said, if it were possible to slightly extend the Imperial and Coachella Valley canal into Mexico, around the end of the sand dunes, and save that much of the excavation, a material saving would result. So far as I am concerned, for the use of that Mexican territory I would be willing to compensate Mexico to at least the extent of one-half of the saving. I have personally visited the area of land that would be used in Mexico by carrying a canal around in the manner suggested. It is now a bare, open desert, which is utterly worthless, and yet it has a strategic value for which the United States could well afford to pay if it would save the excavation of 10,000,000 cubic yards of earth.

Such a matter, of course, can only be arranged by a treaty between the two Governments, and commissioners have been appointed to negotiate a treaty affecting the boundary waters between the two Republics.

INTERNATIONAL RIVERS TREATY WITH MEXICO

By authority of the act of May 13, 1924 (43 Stat. 118), the President appointed Maj. Gen. Lansing H. Beach, United States Army, retired; Mr. W. E. Anderson, of Texas, a civil engineer; and Dr. Elwood Mead, of California, Director of the United States Reclamation Service, as commissioners to negotiate a treaty or convention with the United States of Mexico for an equitable apportionment of the water of the Rio Grande River. The jurisdiction of this commission was extended by the last Congress to include the Colorado River, so that a division of the waters of both streams between the two nations might be accomplished in the same treaty. The Mexican Government last September appointed Gustavo P. Serrano, Federico Ramos, and Javier Sanchez Mejorada commissioners to meet with those appointed by our Government, and negotiations are in progress.

I am not personally acquainted with any of the Mexican commissioners, but friends of mine who know them tell me that they are all gentlemen of culture who are fully qualified by wide experience adequately to speak for the Republic which they have the honor to represent in these important international negotiations.

Negotiations for a treaty or convention with Mexico were under way in 1910, just at the close of the Diaz régime in that country. The negotiations were interrupted by the Madero revolution.

Mr. Louis C. Hill, then a division engineer of the United States Reclamation Service, was appointed to act on behalf of the American Government. Mr. Fernando Beltran y Puga was the Mexican commissioner.

I have here a letter written to the Secretary of State by Mr. Hill, in which he describes the progress that had been made in these negotiations up to the time when they were interrupted by the revolution in Mexico. The letter is dated Los Angeles, Calif., March 26, 1923, and is addressed to Hon. Charles E. Hughes, Secretary of State, Washington, D. C. I read the letter as follows:

LOS ANGELES, CALIF., *March 26, 1923.*

Hon. CHARLES E. HUGHES,

Secretary of State, Washington, D. C.

MY DEAR MR. SECRETARY: Having read in a recent CONGRESSIONAL RECORD Secretary Fall's and your letters on the Colorado River compact, it may be of interest to your department to know what was informally agreed upon as fair to both countries by the Mexican Commissioner for the Division of the Waters of the Colorado and myself, then American commissioner.

The revolution in Mexico prevented any formal recommendation by the commissioners to their respective Governments. The tentative agreement was about as follows:

(1) Mexico and the United States to abrogate such parts of the treaty of Guadaloupe Hidalgo as conflicted.

(2) The two Nations to divide the low-water flow of the Colorado equally between them. (Mexico's share of this would be less than 1,500 second-feet and hence less than will irrigate the lands in Mexico now irrigated by Colorado River.)

(3) The United States to build reservoirs if it so desires to impound all the remaining water of Colorado River for the purposes, among others, of irrigating all the land which can be irrigated by Colorado River waters either by gravity or by pumping.

(4) That Mexico be permitted by paying her pro rata part of the cost of the reservoirs and their operation to have the use of such remaining water as can not be utilized in the United States.

This was considered by the Mexican representative as a most fair and friendly proposal.

It gave to Mexico nothing the United States could use but at the same time shared with Mexico the storage facilities on the upper river, facilities which do not exist in Mexico.

Very respectfully,

L. C. HILL.

Mr. President, the arrangement reported by Mr. Hill, the American commissioner, in his letter to Secretary Hughes should be entirely satisfactory to both nations. It equitably divides,

in fact, equally divides, the normal or low flow of the Colorado River between the two countries. The United States Government would be authorized, under such a proposed treaty, to store all the flood waters of the Colorado River in the United States for use within our own country, but if it were demonstrated that more water had been impounded than could be used in the United States, then Mexico might have her fair share of the waters by paying the proportionate cost of storage. If a treaty of that kind could be negotiated it would completely settle all of the so-called controversies between the United States and Mexico with respect to the Colorado River. I sincerely trust that the commissioners who are now trying to work out a settlement may arrive at one which will be as fair and equitable to the two nations as the one that was proposed in 1910, which would undoubtedly have been consummated but for the revolution in Mexico.

In his report on the Swing-Johnson bill, dated January 18, 1926, *Hon.* Hubert Work, Secretary of the Interior, said with reference to the all-American canal:

> The necessity for the all-American canal and the size and cost of this canal depend largely on whether the existing concession under which water is now diverted from the Colorado River at Hanlons Heading and carried through Mexico to irrigators in the Imperial Valley can not be modified. If it can not be, then the all-American canal becomes an indispensable part of this development. * * *
>
> If, however, the Government of Mexico would consent to a modification of this concession and definitely limit the volume of water to which Mexican irrigators would be entitled, then the future use of the present canal would be economical and desirable, a smaller high line could be built and utilized mainly for the irrigation of the higher lands of the Imperial and Coachella Valleys. Thus far, no negotiations for the modification of this concession have been made. It is not known what the attitude of the Mexican Government would be, and plans for this development should, therefore, include provision for an all-American canal as an essential part of the scheme.

In a letter dated February 10, 1926, addressed to the chairman of the House Committee on Irrigation and Reclamation, the Secretary of the Interior recommended the following amendment which could be inserted on page 2, line 3, of the present bill:

> After the word "California" insert: "*Provided,* An existing contract or concession made by the Republic of Mexico to a corporation to build and operate a canal through Mexican territory to irrigate land in California can not, within a reasonable time, be modified to protect the interests of the United States."

Instead of adopting this sane and sensible recommendation, the bill as reported, gives the Secretary no discretion, and no means of reaching an agreement with Mexico on this important matter is even suggested.

The recommendation made by Secretary Work was proper and should have been adopted. Through it, perhaps by contributing a part of the savings to Mexico, it might be possible to negotiate a treaty with that country whereby the present main canal which supplies the Imperial irrigation district may continue in use with no expense for new construction. Either that could be done, or, as I have heretofore suggested, the all-American canal could be extended into Mexico for a few miles from Pilot Knob, just a sufficient distance to go around the southern end of the sand dunes. The situation could be met by a treaty similar to that made with the Republic of Panama on November 18, 1903, whereby the United States secured all the control necessary or essential over a zone 10 miles wide, through which was afterwards constructed the Panama Canal, but the technical sovereignty over the soil remains in the Isthmian Republic.

I have been told, Mr. President, that there is in the constitution of the United States of Mexico a provision which prohibits the President or the authorities of that Republic from in any manner entering into any treaty disposing of any of the territory of the Republic. Whether that is true or not, I do not know; but if it is true, there need be no violation of the Mexican constitution if the precedent which was adopted at Panama be followed.

I have here extracts from the treaty between the United States and the Republic of Panama, proclaimed February 26, 1904, wherein the United States obtained the right to construct the Panama Canal. Article II reads:

ARTICLE II

> The Republic of Panama grants to the United States in perpetuity the use, occupation, and control of a zone of land and land under water for the construction, maintenance, operation, sanitation, and protection of said canal of the width of 10 miles, extending to the distance of 5 miles on each side of the center line of the route of the canal to be constructed; the said zone beginning in the Caribbean Sea 3 marine miles from mean low-water mark and extending to and across the Isthmus of Panama into the Pacific Ocean to a distance of 3 marine miles from mean low-water mark, with the proviso that the cities of Panama and Colon and the harbors adjacent to said cities, which are included within the boundaries of the zone above described, shall not be included within this grant. The Republic of Panama further grants to the United States in perpetuity the use, occupation, and control of any other lands and waters outside of the zone above described which may be necessary and convenient for the construction, maintenance, operation, sanitation, and protection of the said canal or of any auxiliary canals or other works necessary and convenient for the construction, maintenace, operation, sanitation, and protection of said enterprise.
>
> The Republic of Panama further grants in like manner to the United States in perpetuity all islands within the limits of the zone above described and in addition thereto the group of small islands in the Bay of Panama, named Perico, Naos, Culebra, and Flamenco.

ARTICLE III

> The Republic of Panama grants to the United States all the rights, power, and authority within the zone mentioned and described in Article II of this agreement and within the limits of all auxiliary lands and waters mentioned and described in said Article II which the United States would possess and exercise if it were the sovereign of the territory within which said lands and waters are located to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power, or authority.

It will be noted that this treaty does not provide for a cession of territory to the United States. The technical sovereignty of the soil remains in Panama, but the United States has such rights as it would have if it were sovereign. If the Panama Canal were ever abandoned by the United States it would automatically revert to the Republic of Panama.

For the purpose of constructing a canal to avoid the California sand dunes a similar treaty might be negotiated with Mexico. The United States of America might well afford to pay to the United States of Mexico compensation for the use of such lands in Baja California, to the extent at least of a part of the saving that would be made by keeping the all-American canal out of sand dunes.

In order that the recommendation made by the Secretary of the Interior, Doctor Work, with respect to a change in this bill may be carried out, I now offer the amendment which I send to the desk and ask to have read.

The PRESIDENT pro tempore. The amendment will be received, read, printed, and lie upon the table.

The CHIEF CLERK. On page 2, line 17, it is proposed to insert:

> *Provided further,* That said canal connecting the Laguna Dam with the Imperial and Coachella Valleys in California shall not be constructed through the sand dunes between Pilot Knob and the Imperial Valley in the event that an existing contract or concession made by the Republic of Mexico to a corporation to build and operate a canal through Mexican territory to irrigate land in California can, within a reasonable time, be modified to protect the interests of the United States.

Mr. HAYDEN. Mr. President, in order to carry out the further suggestion that I have made with respect to the negotiation of a treaty with the United States and Mexico for the privilege of constructing and operating a canal in that Republic, I offer the amendment which I send to the desk and ask to have read.

The PRESIDENT pro tempore. The amendment will be received, read, printed, and lie upon the table.

The CHIEF CLERK. The Senator from Arizona offers the following amendment: On page 22, line 3, insert the following:

> SEC. 15. This act shall be without prejudice to the negotiation of a treaty with Mexico affecting the waters of the Colorado River, which treaty may provide for the payment of compensation to the United States of Mexico for the lease to the United States of America of an area or zone of land sufficient for the construction, operation, and maintenance of a canal to convey water diverted from the Colorado River at Laguna Dam for the irrigation of lands in the State of California, upon terms and conditions similar to the lease of certain lands for canal purposes, as provided in the treaty of November 18, 1903, between the United States of America and the Republic of Panama. Said treaty may also provide for an agreement between the two nations respecting the construction and maintenance of levees.

Mr. HAYDEN. In order to complete the record, I desire to read a copy of a memorial adopted by the governors of the seven States of the Colorado River Basin at the Denver conference, addressed to the President of the United States and to the honorable the Secretary of State. It is as follows:

Memorial concerning international relations respecting the Colorado River, adopted at seven States conference on the Colorado River in Denver

To the Hon. CALVIN COOLIDGE,
President of the United States of America, and
The Hon. FRANK B. KELLOGG,
Secretary of State.

Whereas the prosperity and growth of the Colorado River States, namely, Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming, are dependent upon present and increasing use of the waters of the Colorado River for domestic, agricultural, industrial, and other beneficial purposes, and the need of many regions of these States for additional water from that source already is extremely acute and will become increasingly so; and

Whereas said river is an international stream between the United States of America and the United States of Mexico with all of the water supplying the same coming from the United States of America, and the United States of Mexico is rapidly extending the irrigated area supplied from said river within her own boundaries, and great storage projects within the United States of America are in existence and in contemplation; and

Whereas said United States of Mexico, although having no strictly legal right to a continuance of the river flow for beneficial purposes, nevertheless may hereafter make some claim thereto; and

Whereas under acts of Congress of May 13, 1924, and March 3, 1927, a commission of three has been appointed by the President to cooperate with representatives of the United States of Mexico in a study regarding the equitable use of the waters of the Colorado River and other international waters for the purpose of securing information on which to base a treaty relative to international uses:

Now, therefore, and to the end that no unfortunate misunderstanding may arise between the United States of America and the United States of Mexico, and that no false encouragement may be given to present or future developments along the Colorado River in the United States of Mexico, we, the governors of all seven of the Colorado River States, with our interstate river commissioners and advisors in conference assembled in the city of Denver on this 26th day of August, 1927, do hereby in great earnestness and concern make common petition that a note be dispatched to the Government of the of the United States of Mexico calling attention of that Government to the fact that neither it nor its citizens or alien investors have any legal right as against the United States of America or its citizens to a continuance of the flow of the Colorado River for beneficial purposes and that the United States of Mexico can expect no such continuance except to the extent that, as a matter of comity, the two Governments may declare hereafter by treaty and that especially under no circumstances can the United States of Mexico hope to use water made available through storage works constructed or to be constructed within the United States of America, or hope to found any right upon any use thereof. We believe, too, so great are the water necessities of our States, that any adjustment made with the United States of Mexico concerning the Colorado River should be based upon that river alone. We further earnestly suggest that a special commission be created by act of Congress for the Colorado River alone, a majority of the commission to be appointed from citizens of the Colorado River States, or that by act of Congress the present commission already referred to be enlarged to contain two additional members to come from the Colorado River States.

It is only by such precautionary measures, promptly taken, that our seven States with their millions of people can be given a basis of economic certainty, adequate protection, and a feeling of security pending the negotiation of an early treaty between the two Governments.

And your memorialists will forever pray.

GEO. W. P. HUNT,
Governor of Arizona.
C. C. YOUNG,
Governor of California.
WM. H. ADAMS,
Governor of Colorado.
F. D. BALZAR,
Governor of Nevada.
R. C. DILLON,
Governor of New Mexico.
GEO. H. DERN,
Governor of Utah.
FRANK C. EMERSON,
Governor of Wyoming.

I am happy to say that one of the amendments recommended by the Senate Committee on Irrigation and Reclamation in a large measure cares for the principal purpose of this resolution.

Inasmuch as the senior Senator from California has taken occasion to discuss the origin of flying machines and other inventions in connection with the Boulder Canyon Dam, I hope that no one will take offense if I digress for a short time from the direct course of my argument in order to bring into the record some historical facts which may help Senators to have a better understanding of the background of the controversy which has so long plagued us.

First, there is the question of how long it has been since the Colorado River flowed into the Salton Sea. Geologists tell us that many thousands of years ago the Colorado River cut off the upper end of the Gulf of California with a dam of silt and thus created the Salton Sink, of which the Imperial and Coachella Valleys are a part. The earliest record that I have found is in the following statement from the History of the North Mexican States, by Hubert H. Bancroft, Volume I, pages 541 to 543:

Capt. Fernando Sanchez Salvador, acting in an official capacity, the exact nature of which does not appear, but who had evidently traveled and observed much in the north, addressed four consultas, or representaciones to the king on the condition and needs of Sinaloa and Sonora, the last bearing the date of March 2, 1751. * * *

The fourth and last of these interesting and ably prepared papers is devoted to the far north, to the region of the Colorado and of California—of the former as a most desirable field for settlement, and especially as the only medium for colonizing the latter. His views on the subject are for the most part similar to those of others of the time and need not be repeated here; but one somewhat astonishing peculiarity should be noticed. He advances the theory that the Colorado before reaching the Gulf throws off a branch to the westward, which flows into the Pacific between Monterey and Point Conception, and is doubtless identical with the Rio Carmelo of Cabrera Bueno! It will furnish an easy means of communication with the coast.

His theory was perhaps founded on a report of the natives, who in 1748 told Padre Sedelmair, when on the Colorado above the Gila, that if he crossed the river and went northwest, he would in two days come to the same river where it flowed from east to west.

I am convinced that the Yuma Indians told the truth to this early Spanish explorer, and that the Colorado River was at that time flowing into the Salton Sea, as it had done many times before, and as it has done since; but this apparently is the earliest historical record of that fact. I understand that an extensive investigation is to be made in the Archives of the Indies in Seville, Spain, for early historical material relating to the Southwest, and I hope this fact as stated by the historian Bancroft may be verified.

ADMITTING THE GULF OF CALIFORNIA TO SALTON SINK

Another proposal that has been made is that it would have been better, before the settlement of the Imperial Valley, if the Gulf of California might have been permitted to return to its ancient bed in the Salton Sink, and that to do so would have a very beneficent effect upon the climate. The first record I can find in print of that suggestion is in the report of John C. Frémont, Governor of Arizona, to Hon. Carl Schurz, Secretary of the Interior, made on November 20, 1879. Mr. Fremont said:

[Report of J. C. Frémont, Governor of Arizona, to Hon. Carl Schurz, Secretary of the Interior, November 20, 1879]

While recently in Washington I suggested for your consideration the expediency of an examination around the head of the Gulf of California, with the object of bringing back the gulf waters to an ancient basin from which they have receded for a time unknown. That the withdrawal of the gulf waters from this basin essentially affected the climate and vegetation of the neighboring region is not a matter of doubt. There are many indications which fairly lead to the impression of a gradual decrease of water and moisture over all the region which was formerly exposed to the influence of the gulf winds from that quarter. This, too, is made probable by the fact of the abundant rainfall and green and habitable country which, I believe, exists wherever the gulf influence reaches. Over the basin the rainfall must be slight. At Prescott, though among mountains, but where the prevailing winds are from this southwest quarter, it is less than 9 inches, while at Tucson, more exposed to the gulf winds, it is 24.

So far as I am informed, Dr. J. P. Widney, of Los Angeles, first made the refilling of the basin a subject of practical inquiry. After several years careful study he published in the "Overland" for 1873, an interesting paper on the flooding of the basin by turning into it the waters of the Colorado River. Doctor Widney examined into the topographic and geologic features of the desert; investigated the climatic peculiarities of the surrounding region and traced the connection between the drying up of the basin and the arid country now found. In this connection he says in the article referred to:

"The yearly evaporation in the Bay of Bengal, as shown by the published proceedings of the Bombay Geographical Society, is more than 16 feet. This portion of the Gulf which is surrounded by high mountains reflecting the sun from their bare sides, shut off from the cool winds of the ocean, its waters shallow and easily heated, must have

been a steaming caldron, keeping the air currents above constantly saturated with moisture. This evaporation, however, estimated at the rate before given, would be enough, if all recondensed and precipitated, to supply 12 inches of rain to 86,400 square miles—more than double the area of the State of Ohio."

I am informed that in the summer of 1873, shortly after the publication of Dr. Widney's paper, Mr. William S. Chapman, of San Francisco, sent out a party at his own expense to examine into the feasibility of the project. I have not learned the result of this reconnaissance except that the engineer in charge, Mr. James, confirmed the reasonableness of the conclusions in the "Overland" article, and further reported an important fact which would appear to greatly lessen the difficulty of turning in the water from the gulf rather than from the river. He reports that he found a lake reaching nearly across the barrier separating the gulf, and that it would only be necessary to cut through the barriers between the lake and the desert on one side and the lake and the gulf on the other. In the winter of 1873–74 numerously signed petitions were forwarded to California Congressmen from Los Angeles, San Diego, and San Bernardino, asking action from the Government on the subject, but it does not appear that it was ever acted on.

In the spring of 1849, returning from an expedition into Arizona and Sonora, I crossed the basin for the first time. In that and the following years the gold of California made this hitherto unknown and uninhabited country a familiar passage into that State. It became, consequently, for years past a subject of much discussion. My attention had been again drawn to it in 1869–70 by surveys looking to San Diego as the terminus of the Southern Transcontinental Railway line, then under my direction, and occupation with Arizona lately revived my interest in the subject. Mr. Charles Crocker, president of the Southern Pacific Railway, has kindly furnished me, through Chief Engineer Col. Geo. G. Gray, with a profile and sketch along that part of the line which passes over the northern end of the basin. From these I have drawn interesting information concerning its extent and depth. As the territory embracing it lies partly in Mexico I submitted the project for its improvement to the Mexican minister at Washington, Mr. Zamacona, with whose earnest efforts to increase trading intercourse between the two countries I had the good fortune to be personally acquainted. He transmitted to his Government a note which I prepared, and, while waiting its decision upon it I am assured of a friendly and comprehending interest from himself in the subject.

With the change of climate that would follow the restoration of the waters there would undoubtedly be a change of vegetation over all this region. Date trees and other varieties of palm might be made to flourish here in a congenial climate, and many trees and plants of commercial value would replace the cactus desert growth. Southward large tracts of land, lying along the lower Colorado and the head of the gulf, are reported to be of strong fertility, peculiarly well suited to hemp, sugar, cotton, and kindred productions. These lands would all be made available. Formerly the Indians of this country grew and manufactured cotton, and lately a variety from Chinese seed, resembling in its staple the sea-island cotton of the Gulf States, has been successfully grown on the San Pedro River. Sugar is already a production in the Salt River Valley, which is 1,800 feet higher and farther north.

The work of redeeming the basin region and turning it to the advantage of the surrounding country would be full of interest if found practicable, and I have dwelt on it in the desire to bring it favorably to your attention. It may be considered a mere speculative idea, but in any event it would require but a small expenditure of money and time to know the facts and dispose of the subject.

This statement by Governor Frémont is but another evidence of the wide variety of subjects which claimed the attention of a man who was not only a great explorer but was also the first candidate for President of the United States to be nominated by the Republican Party.

PROPOSED ANNEXATION OF MOUTH OF THE COLORADO RIVER

On August 3, 1863, Gen. Edward Fitzgerald Beale wrote a letter to Salmon P. Chase, then Secretary of War, excerpts from which are as follows:

I desire most particularly to call your attention to the fact that we have in our power at this time by purchase of Lower California, and a very small portion of the opposite coast, to possess the mouth of the Colorado, destined to be as important to us on the Pacific as is the Mississippi to the Eastern States. If the line of the Gadsden Purchase was straightened instead of being deflected at 111 degrees of longitude, and touched the gulf at the coast, and we should possess ourselves of Lower California, we should then control entirely the navigation of the Colorado, which the future will prove of the utmost importance to the welfare of the Pacific States. * * * You may be sure that those who live after us on this coast will not hold the memory of that administration in high respect which will have allowed a foreign power to collect toll at the mouth of the Mississippi of the Pacific after having lost the opportunity of this acquisition for our own people.

Secretary Chase made the following reply:

TREASURY DEPARTMENT, *September 5, 1863.*

MY DEAR SIR: Yours of the 5th of August has just reached me. I appreciate as you do the importance of the acquisition you suggest. I fear that the Juarez government is now too entirely broken to warrant negotiations with it, but I will confer with the President and Secretary of State on that subject.

What a pity it is that we neglected our opportunities when the States of Central America were so ready to identify their fortunes with those of the American Union! What a pity it is also that when General Scott took Mexico he did not remain there and establish a protectorate! The timid counsels of the Whig leaders and the fears of the slaveholding oligarchy suppressed a policy which would have prevented all our present troubles so far as French domination in Mexico is concerned.

Yours very truly,

S. P. CHASE.

To E. F. BEALE, Esq.

I am glad to say that, thanks to the efforts and ability of Ambassador Morrow, the relations between the United States of America and the United States of Mexico are now established upon a firm basis of friendship. When Secretary Chase wrote that letter to General Beale, Benito Juarez, the heroic President of Mexico, was engaged in a desperate struggle with the Emperor Maximilian, supported by the French. When the all-American canal board made its report in 1919 Mexico was still suffering from the effects of the Madero revolution which began in 1910.

At this moment no such obstacles exist to a complete accord with the Government of that Republic with respect to the waters of the Colorado River. The present attitude of American people toward Mexico can not be better expressed than in these words by Hon. Charles Evans Hughes in an address delivered at Princeton University on May 12, 1928:

There is not the slightest reason why there should be antagonism between the peoples of the Governments of the United States and Mexico.

It should be understood that there is no desire on the part of our Government to interfere with the domestic policies of Mexico, and that her independence and sovereignty will invariably be respected.

Her interest in the protection of valid rights honestly acquired under her laws is no less than our own. Our interest in her friendship is no less than her interest in ours.

Mr. CURTIS. Mr. President——

The PRESIDING OFFICER (Mr. LA FOLLETTE in the chair). Does the Senator from Arizona yield to the Senator from Kansas?

Mr. HAYDEN. For what purpose?

Mr. CURTIS. I desire to move an executive session.

Mr. HAYDEN. I yield for that purpose.

The PRESIDING OFFICER. Before entertaining the motion the Chair will lay before the Senate sundry executive communications.

Mr. CURTIS. Very well.

ESTIMATES OF APPROPRIATIONS, EXECUTIVE DEPARTMENTS
(S. DOC. 124)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States transmitting estimates of appropriations submitted by the several executive departments to pay claims for damages to privately owned property, in the amount of $933.57, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

JUDGMENTS BY DISTRICT COURT, NORTHERN DISTRICT OF CALIFORNIA
(S. DOC. NO. 125)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States transmitting, pursuant to law, records of judgments rendered against the Government by the United States District Court for the Northern District of California, amounting to $602,308.25, as submitted by the Attorney General through the Secretary of the Treasury, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

JUDGMENTS BY DISTRICT COURT, EASTERN DISTRICT OF PENNSYLVANIA
(S. DOC. NO. 126)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States transmitting, pursuant to law, a record of judgments rendered against the Government by the United States District Court for the Eastern District of Pennsylvania, under the public vessels act, as submitted by the Attorney General through the Secretary of the Treasury, amounting to $4,452.31, which, with the accom-

panying papers, was referred to the Committee on Appropriations and ordered to be printed.

JUDGMENTS BY THE COURT OF CLAIMS (S. DOC. NO. 127)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, a list of judgments rendered by the Court of Claims, which have been submitted by the Attorney General through the Secretary of the Treasury and requiring an appropriation for their payment, amounting to $1,944,459.73, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

CLAIMS ALLOWED BY THE GENERAL ACCOUNTING OFFICE (S. DOC. NO. 128)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States transmitting, pursuant to law, schedules of claims amounting to $108,982.02, allowed by the various divisions of the General Accounting Office, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

EXPENSES, BUREAU OF ANIMAL INDUSTRY (S. DOC. NO. 129)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation for the Department of Agriculture, amounting to $30,000, for the fiscal year 1929, for animal husbandry investigations, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

EXPENSES UNDER THE NAVY DEPARTMENT (S. DOC. NO. 130)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States transmitting a draft of proposed legislation making available not to exceed $20,000 for expenses in connection with research and investigation of safety devices and appliances for submarines during the fiscal year 1929, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

RELIEF OF OFFICERS OF THE FOREIGN SERVICE (S. DOC. NO. 131)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation for the Department of State, amounting to $9,819.93, for the relief of Joseph C. Grew and other members of the Foreign Service, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

INTERNATIONAL STREET, NOGALES, ARIZ. (S. DOC. NO. 132)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation for the Treasury Department, fiscal year 1928, amounting to $40,000, for grading and paving International Street, adjacent to Nogales, Ariz., which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATES, INDIAN OFFICE (S. DOC. NO. 133)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States transmitting supplemental estimates of appropriations for the Department of the Interior, Bureau of Indian Affairs, fiscal year 1928, amounting to $114,200, and proposed authorizations of expenditures of $51,000 of Indian tribal funds, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

INCREASE OF THE NAVY (S. DOC. NO. 134)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation, fiscal year 1929, amounting to $200,000, for the increase of the Navy, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

PAVING OF LAFAYETTE EXTENSION ROAD, GA. (S. DOC. NO. 135)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation for the War Department, fiscal year 1928, for the paving of the Government road known as the Lafayette Extension Road, in the State of Georgia, amounting to $193,500, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

UNITED STATES EMPLOYEES COMPENSATION COMMISSION (S. DOC. NO. 136)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation for the United States Employees Compensation Commission, fiscal year 1929, amounting to $80,010, for salaries, expenses, printing, and binding, which (with the accompanying papers) was referred to the Committee on Appropriations and ordered to be printed.

PAVING OF HOOKER ROAD, TENNESSEE AND GEORGIA (S. DOC. NO. 137)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation for the War Department, fiscal year 1928, for paving the Government road known as the Hooker Road, Tennessee and Georgia, which (with the accompanying papers) was referred to the Committee on Appropriations and ordered to be printed.

SALARIES, OFFICE OF CHIEF OF ENGINEERS (S. DOC. NO. 138)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States transmitting a proposed draft of legislation affecting an existing appropriation for the War Department for the fiscal year ending June 30, 1929, for salaries, Office of the Chief of Engineers, which (with the accompanying papers) was referred to the Committee on Appropriations and ordered to be printed.

STANDARDS FOR HAMPERS AND OTHER BASKETS (S. DOC. NO. 139)

The PRESIDING OFFICER laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation for the Department of Agriculture, amounting to $7,500, for the enforcement of the act fixing standards for hampers, round stave baskets, and splint baskets for fruits and vegetables, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

RESERVE CORPS OF THE ARMY

Mr. BROOKHART. Mr. President, I ask unanimous consent to have printed in the RECORD the declaration of the National Guard Association of the United States in reference to the proposed organization of a unit in the General Staff with reference to the reserves.

There being no objection, the statement was referred to the Committee on Military Affairs and ordered to be printed in the RECORD, as follows:

Statement of the National Guard Association of the United States, through its executive council, meeting at Washington, D. C., Thursday, May 17, 1928, as to the attitude of the National Guard toward Senate bill No. 3458 and House bill No. 11683, now pending before Congress.

1. The National Guard has always accepted, deemed adequate, and advocated consistent adherence to the system of military organization for defense set up under the Federal Constitution.

2. In pursuance of this policy, it opposed in 1915 and 1916 the plan of former Secretary of War Garrison for establishing a civilian military force, wholly under Federal control, which plan contemplated the conversion of the National Guard as then organized and officered into a Federal reserve force. This opposition was based upon the ground that the formation of such a force disregarded the safeguards provided under the Constitution for keeping in balance, by limited State control, the military power of the Nation in time of peace, and because the plan for permanently maintaining a large Federally controlled military force was inconsistent with our basic theories of government.

3. For the same reason it opposed the adoption of section 56 of the national defense act of 1916, as originally introduced in the Senate; that section having contained authorization for the formation of a Federal reserve force, to be "organized under such regulations as the Secretary of War might prescribe." In both instances the position of this association was sustained by the action of Congress.

4. The system of military organization prescribed under the national defense act of 1916 was consistent with the militia system of the Constitution. It was put to the severest possible test immediately after its enactment by the mobilization on the Mexican border and a few months later in the World War.

5. One of the lessons of the World War was the importance of trained leadership. In order to retain a nominal connection with officers who had had the experience of World War service, and to provide means by which young men might voluntarily receive training to fit them for duty as commissioned officers, provision was made in the national defense act of 1920 for an Officers' Reserve Corps and for the reserve officers' training camps and the citizens' military training camps. With this program and the development of these agencies the National Guard has been and is in entire sympathy and accord. The National Guard has always cordially supported the essential

features of the national defense act, but it has never believed that any provision of the act would result in reserve units with enlisted strength beyond provision for noncommissioned officers and important specialists. The National Guard has never believed and does not now believe that the reserve officers' training camps and citizens' military training camps were agencies designed to serve the Organized Reserves exclusively, or even primarily. It, therefore, finds difficulty in conceding that these agencies should be administered in a reserve bureau.

6. Since the Officers' Reserve Corps is a component of the Army and since the Army has its established agencies of administration in the War Department, the necessity for the pending bill is not clear in so far as the administration of Officers' Reserve Corps affairs is concerned. If a special bureau or separate agency is required, it would appear that it is within the power of the Secretary of War to provide such an agency without congressional action.

7. The National Guard would not oppose any action for improving the administration and training of the personnel of the Officers' Reserve Corps, nor would it oppose the pending bill were it limited to that purpose. A casual reading of the bill, however, is sufficient to indicate that it has a broader scope, and will have a more far-reaching effect.

8. The pending bill provides for a "reserve division" in the War Department. The purpose of the pending bill, as in the minds of its proponents, is indicated by the fact that new machinery, in addition to that now administering the affairs of the Army, is thought to be necessary and, also, by the statement of one of those who were heard before the Senate Committee on Military Affairs and who spoke of the necessity for enlisting approximately 150,000 men. It may be logically assumed that the step which will follow the enactment of the pending bill will be an effort to organize reserve units with full enlisted complement.

9. In addition to the abandonment of certain principles of military organization heretofore regarded as fundamental to our ideals of government, the contemplated enlistment of so large an additional force must necessarily suggest certain economic problems. For example—the strength of the National Guard was by act of Congress contemplated to ultimately approximate 435,000, but only 190,000 have ever actually been provided for. Appropriations for the support of the guard at this reduced strength are now fixed at the minimum, and it is operating upon a skeletonized and incomplete basis as a measure of economy. These matters are but briefly touched upon here, but further analysis and an estimate of probable results were the pending bill enacted are not difficult.

10. The National Guard Association of the United States believes that the pending bill is entirely too far-reaching in its effect to be hurried through Congress, and that it should not be enacted until opportunity has been given for full study and hearings, and the people of the country have opportunity to be informed and appreciate it will bring about a complete departure from the military policy of the Constitution.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

RECESS

Mr. CURTIS. I move that the Senate take a recess until 8 o'clock this evening.

The motion was agreed to; and the Senate (at 5 o'clock and 15 minutes p. m.), under the order previously entered, took a recess until 8 o'clock p. m.

EVENING SESSION

The Senate reassembled at 8 o'clock p. m., on the expiration of the recess.

The VICE PRESIDENT. Pursuant to the order of to-day for this evening the Chair lays before the Senate the conference report on Senate Joint Resolution 46.

MUSCLE SHOALS—CONFERENCE REPORT

The Senate proceeded to consider the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer and for other purposes.

The VICE PRESIDENT. The question is on agreeing to the conference report.

Mr. KING. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Dill	Locher	Sackett
Barkley	Edwards	McKellar	Sheppard
Black	Fess	McMaster	Shipstead
Blaine	George	McNary	Smith
Blease	Gillett	Mayfield	Steck
Bratton	Glass	Metcalf	Steiwer
Brookhart	Hale	Neely	Stephens
Broussard	Harris	Norbeck	Swanson
Bruce	Harrison	Norris	Thomas
Capper	Hawes	Nye	Tydings
Caraway	Hayden	Oddie	Tyson
Copeland	Heflin	Phipps	Vandenberg
Curtis	Johnson	Pine	Wagner
Cutting	Keyes	Reed, Mo.	Warren
Dale	King	Reed, Pa.	Wheeler
Deneen	La Follette	Robinson, Ark.	

The VICE PRESIDENT. Sixty-three Senators having answered to their names, a quorum is present. The question is on agreeing to the conference report.

Mr. KING rose.

Mr. NORRIS. Mr. President, does the Senator from Utah desire to address the Senate?

Mr. KING. No; I did not see the Senator from Nebraska rise, and I did not want the vote to go by default.

Mr. NORRIS. I am perfectly willing to give Senators opposed to the conference report the time if they want it. The Senator from Kentucky [Mr. SACKETT] desires to make some remarks in opposition to the conference report. I shall be glad to yield to him and let him proceed.

Mr. SACKETT. Mr. President, does not the Senator want to lay the conference report before us and explain it?

Mr. NORRIS. It is before the Senate now.

Mr. SACKETT. Does not the Senator wish to explain the conference report?

Mr. ROBINSON of Arkansas. Mr. President, I think the Senator from Nebraska should make a brief explanation of the provisions of the conference report.

Mr. NORRIS. Mr. President, I do not think a suggestion of that kind is out of order at all; it is perfectly proper; but it occurred to me that some of those who are opposed to the conference report are desirous of being heard, and I am perfectly willing to yield if they want to proceed at this time.

Mr. President, the Senate joint resolution as we passed it provided for the management of the power facilities at Muscle Shoals by the Secretary of War and the management and control and operation of the fertilizer facilities by the Secretary of Agriculture. The House provided for a governmental corporation that should have charge both of the power and the fertilizer operations provided for in the joint resolution as it passed the House. There was also added to the joint resolution a provision for the building of Cove Creek Dam, about 300 miles farther up the river than Dam No. 2. The provisions in regard to fertilizer are, in the main, the provisions which the Senate adopted.

The method of operation, either through such a corporation as is set up in the House amendment or through the two Secretaries of War and of Agriculture, is, in my judgment, immaterial. There may be differences of opinion as to which is the better method. The provisions, however, as to the management, and so forth, are practically the same, with the exception that it is necessary, of course, under the conference bill to provide for the machinery of the corporation, its appointment, and so forth. In a general way the corporation is controlled by a board of directors, consisting of three members selected by the President and confirmed by the Senate. They are directed to employ a manager and two assistant managers. One of the assistant managers is to be an expert in fertilizer operations and the other is to be a hydroelectric expert.

Mr. COPELAND. Mr. President, will the Senator from Nebraska yield to me?

Mr. NORRIS. Yes.

Mr. COPELAND. The Senator has stated that in the main the conference report, as regards the production of fertilizer, is practically the same as the provision adopted by the Senate. Will the Senator at some time in the course of his remarks tell us what the difference is?

Mr. NORRIS. I will. In my opinion, where there is enough work to do, it is more satisfactory that an operation of this kind should be conducted by a governmental corporation than directly by officials of the Government. A corporation is more like an individual; it can sue and be sued. One of the reasons why in the joint resolution as passed by the Senate a corporation was not provided for was because I thought when I prepared it that the business that would have to be done could be more economicallly done without having so much overhead.

In the first two or three bills that I introduced at the beginning of the Muscle Shoals fight I myself provided for a governmental corporation for the management of the property. Now

the House of Representatives has added, and the conferees have agreed to it, a provision for the building of the Cove Creek Dam. It seems to me very appropriate that the management of the whole business should be left in the hands of a governmental corporation, giving to it all the power that any private corporation owning and managing the various properties would have.

I presume, since it is new, that I ought to explain to the Senate the provision in regard to Cove Creek Dam. Cove Creek Dam is a dam across Clinch River a little over 300 miles above Muscle Shoals. It affords, I think, the largest natural reservoir of any of the tributaries on the east side of the Mississippi River. I know it is the largest of any natural reservoir anywhere in the South, and I know of none in the North that is anywhere near it in size. There is only one that compares with it, and that is a natural reservoir near the central part of Alabama, on the Alabama River, near the city of Montgomery, and that is only a little more than one-half the size of the reservoir that will be created by the construction of Cove Creek Dam. The dam will be 225 feet high and it will hold back 3,500,000 acre-feet of flood water, making a lake of a little over 85 square miles, with a depth at one end of 225 feet.

The justification for building this dam by the Government can not, in my judgment, be successfully challenged. First of all, it is a navigation proposition and a flood-control proposition, and the power that will be generated there, although quite large in quantity, is an incident to it. The joint resolution provides that there shall be installed at that dam machinery that will develop 200,000 horsepower.

I think I ought to digress for a moment to call the attention of the Senate to what a flood-control and a navigation dam of this kind means. It is the greatest step to bring about the navigability of the Tennessee River that has ever been undertaken. It will do more than any other one thing or any other dam or half dozen dams to make the Tennessee River navigable for hundreds of miles. Every man who believes in the control of the flood waters of the Mississippi River ought to be, it seems to me, in favor of the construction of Cove Creek Dam. I doubt if in the United States—there may be others, but I do not know of them—there is a natural reservoir equal to it in capacity. So the construction of the dam will have a material effect upon the floods of the Mississippi River, for I believe—and I think the country is coming to the belief—that in order successfully to cope with the dangerous floods in the lower Mississippi River we must do it by the construction of dams where nature has provided large storage capacity. Cove Creek is one of the largest, if not the largest. It should be a governmental undertaking, because if a private party should build Cove Creek Dam for the purpose of generating power he would, of course, want to secure as much primary power as possible; he would want to obtain the most valuable kind of power; he would want to get the most money out of Cove Creek Dam that he possibly could get. Those are all legitimate purposes, and I am not complaining of any of them; but in order to do that he would let the lake fill up to the height of the dam and then he would let the stream flow over the top of it the year around.

There would not be any such a thing as holding back the flood waters from the Tennessee River or from the Mississippi Valley. He would thereby get a constant flow of primary power during the entire year. If, on the other hand, it is managed as a flood control or as a navigation proposition, then every year the reservoir would be emptied and, as the waters receded, the power that could be generated would grow less and less and when the reservoir became empty, of course, there could be no power generated. So it ought to be operated as a navigation proposition and as a flood-control proposition. It is valuable for both purposes.

Mr. REED of Missouri. Mr. President——

Mr. NORRIS. I yield to the Senator.

Mr. REED of Missouri. I do not want to interrupt the thread of the Senator's discussion but I should like to get a little information at this point. Looking at the conference report I find this language:

> That the Senate recede from its disagreement to the amendment of the House to the text of the joint resolution and agree to the same with an amendment as follows.

Then follow some eight pages printed in italics. Is that all new matter?

Mr. NORRIS. It was all either in the Senate joint resolution or in the House amendment. The Senator will remember that the House struck out all after the enacting clause of the Senate joint resolution and inserted an entire substitute; so there was only one amendment, except the amendment to the title.

Mr. REED of Missouri. Is there new matter contained in the conference report that was contained either in the joint resolution as it passed the Senate or as it passed the House?

Mr. NORRIS. No.

Mr. REED of Missouri. Is the dam which the Senator is discussing a part of the measure as it came to us from the House?

Mr. NORRIS. It is in the House amendment.

Mr. REED of Missouri. So that all the conferees have done here is to incorporate the provisions either of the Senate joint resolution or the amendment adopted by the House?

Mr. NORRIS. Yes, sir.

Mr. REED of Missouri. There is nothing new in it?

Mr. NORRIS. There is nothing new in it.

Mr. REED of Missouri. The statement is very misleading as it is printed.

Mr. NORRIS. That is what always happens.

Mr. HARRISON. Mr. President, may I ask the Senator what, if anything, was done with Dam No. 3?

Mr. NORRIS. Nothing was done with it; it was not in the joint resolution as it passed either body.

Mr. GLASS. Mr. President——

Mr. NORRIS. I yield to the Senator from Virginia.

Mr. GLASS. I have but recently come into the Chamber and may I suggest that the Senator, if he has not already done so, discuss briefly, if he will, the objection to the joint resolution, to the effect that it brings the Government into competition with private manufacturers of fertilizers on a basis which would inevitably be destructive of private enterprise in that industry.

Mr. NORRIS. I expect to take that question up before I conclude. I was, however, right in the midst of discussing the Cove Creek Dam.

Mr. BRUCE. Mr. President——

Mr. NORRIS. I yield to the Senator from Maryland.

Mr. BRUCE. I am glad the Senator from Virginia has opened up the line of inquiry that he did, because naturally enough it is a line of inquiry that is very interesting to me.

Mr. NORRIS. I can not discuss two provisions at the same time. I had just as lief discuss that question first; but, since Cove Creek Dam is an entirely new proposition, I thought I should take it up first.

Mr. GLASS. I beg the Senator's pardon; I came into the Chamber late.

Mr. NORRIS. I am not finding fault at all, but I will say to the Senator from Virginia that I would rather finish the subject I was discussing before taking up another branch of the discussion.

Mr. BRUCE. Mr. President, I simply wish to say that the point brought up by the Senator from Virginia is of very great consequence to me, as I happen to represent one of the great cities of the Union—Baltimore—where $25,000,000 is invested in the business of producing fertilizer.

Mr. NORRIS. I was discussing Cove Creek Dam. I have forgotten just where I was, but, as I recall, I was near the top of it.

Mr. ROBINSON of Arkansas. The Senator was discussing the reason why he thought it was better for the Government to build and operate the dam at Cove Creek.

Mr. NORRIS. I think I had finished that phase of Cove Creek.

It seems to me quite plain that if we are going to utilize Cove Creek Dam to assist in making the Tennessee River navigable, or to assist in flood control of the Mississippi River, it must be done by the Government of the United States. Both of those are governmental undertakings, and can not be done by anybody else; because, as I said, private parties would build the dam, if they should built it, for the purpose of getting as much power as possible, and the valuable power would be obtained by not letting out the water.

When the Tennessee River is low, the water in the reservoir of course will be let out in large quantities. When it is being let out, as it passes over the dam there will be power developed, of course; and if it is necessary for the Government to construct the dam in order to make the Tennessee River navigable and in order to assist in flood control, and by doing so some power is incidentally developed, of course it would be the height of folly not to make use of that very beneficial element.

Mr. HARRISON. Mr. President, may I ask the Senator what is the estimated cost?

Mr. NORRIS. The estimated cost is $37,000,000; and that includes a transmission line to Dam No. 2.

Mr. NEELY. Mr. President, will the Senator permit me to ask him just one question before he leaves that phase of the case?

Mr. NORRIS. Yes.

Mr. NEELY. I understand the Senator's plan contemplates the supplying of a certain amount of power by the Government at certain times of the year. My question is this: As the Senator has indicated that power could be made under his plan only a portion of the year, by what method would the power be supplied during that portion of the year in which no power was made?

Mr. NORRIS. I am coming to that.

It is quite evident, Mr. President, that if the Government was not the owner of Dam No. 2, and did not have the steam plant at Muscle Shoals, it could not utilize this power to any advantage.

When the Tennessee River is low, however, and the power at Dam No. 2 at Muscle Shoals is at the minimum, a little less than 100,000 horsepower, then we will be letting out the water at Cove Creek Dam and making power there. It would not reach the maximum down at Dam No. 2, but it would be adding to the power that we develop at Dam No. 2 because of the increased flow of the stream; and when we were filling up the reservoir at Cove Creek it would be in time of flood, when the river was high and when the dam at No. 2 would be making power to its maximum, so that one would dovetail right into the other.

In addition to that we have the stand-by steam plant at Muscle Shoals. This bill provides that we shall complete that plant as contemplated by the original plans and specifications by the erection of another unit, and when that is done the steam plant will have a capacity of 120,000 horsepower.

Just think for a moment what the Cove Creek Dam is going to mean to Dam No. 2, down at Muscle Shoals, when run in connection with the steam plant.

The weakness of the governmental proposition at Dam No. 2 is the great variation between the low water and the high water 97 per cent of the time—that is practically 100 per cent, so in round numbers we have always used that, but, to be accurate, 97 per cent of the time—at Dam No. 2, which we now own and operate, there is 100,000 horsepower; 83⅓ per cent of the time, or about 10 months, there is 141,000 horsepower; 66⅔ per cent of the time, or about 8 months, there is 205,000 horsepower at Dam No. 2; and 50 per cent of the time, or 6 months, there is 306,500 horsepower. That is an enormous horsepower one-half of the time.

If, by the utilization of the dam at Cove Creek and the steam plant, we can supply that deficiency 50 per cent of the time, we will have multiplied the value of Dam No. 2 by three. Instead of producing 100,000 horsepower, we will produce over 300,000 horsepower from that dam alone.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. NORRIS. Yes.

Mr. COPELAND. The figures the Senator first gave were the figures before the building of the dam up the river?

Mr. NORRIS. Oh, yes. All these figures are without that dam. All the figures that I have given are based on taking the Tennessee River without any storage water whatever—just taking it one year with another, as nature runs the water down the stream.

Mr. STEPHENS. Mr. President, will the Senator yield for a moment?

Mr. NORRIS. Yes.

Mr. STEPHENS. The Senator has been discussing the amount of horsepower that may be developed at Muscle Shoals. I notice that the bill provides that fertilizer is to be manufactured there, and there is to be a distribution of the surplus power, to be carried over the States and put to certain purposes. I should like to ask the Senator for an approximate estimate of the amount of power that will be used in the production of fertilizer and the amount of power which will be distributed over the country.

Mr. NORRIS. Mr. President, I can only give the Senator a guess on that.

Mr. STEPHENS. I understand.

Mr. NORRIS. I can not tell how much power will be used for fertilizer.

Mr. STEPHENS. What is the Senator's idea as to the percentage?

Mr. NORRIS. I will state to the Senator that it will be very small.

Mr. STEPHENS. A very small percentage will be used for electricity?

Mr. NORRIS. Yes. Again I should like to suggest to the Senator that he let me finish this particular branch. If he will call my attention to it, I shall be glad to go into that point later.

Mr. STEPHENS. I beg the Senator's pardon. I will do that.

Mr. NORRIS. Mr. President, it becomes evident that if the Government owns Dam No. 2, as it does, and the steam plant at Muscle Shoals, and builds Cove Creek Dam as a regulator of stream flow, it can, by combining the use of those three properties, make money out of each one of them, besides furnishing for that great country what it has always been trying to get, and that is the cheapest transportation in the world. The Tennessee River for four or five hundred miles will then be a navigable stream, perhaps with the construction of one or two small dams.

Mr. TYDINGS. Mr. President——

Mr. NORRIS. I yield to the Senator from Maryland.

Mr. TYDINGS. Conceding that the Government would make money by the operation of the power plant, if it was the result of this measure that the private concerns which are now making fertilizer were put out of business, and those individuals who had invested their capital in power companies were put out of business because they were forced to compete with a Government-operated concern, untaxed, uncontrolled, and with an unlimited Treasury back of it, does the Senator think that would be a fair way for the Government to make money?

Mr. NORRIS. No; I do not. I do not claim that. Again the Senator is getting into the fertilizer business. I am afraid I shall have to give up this without finishing it, and take up the fertilizer proposition; but just let me briefly refer to navigation, and I will do that.

It is conceded that the making of any stream navigable is a governmental function. Here is the best way to make the Tennessee River navigable. Here is the best way, as far as the eastern side of the Mississippi River is concerned, for the least amount of money, to hold back the flood waters of the Mississippi River; and are we going to refuse to do it because in holding back the flood waters, in making the river navigable, we happen to generate some electricity? Are we going to throw it away? Shall we generate this electricity and not use it? Shall we develop this power as an incident to navigation and flood control from the waters that belong to all the people, and then refuse to use the electricity because it might interfere with some private monopoly selling electricity to the people?

Mr. TYDINGS. Mr. President, will the Senator yield again?

Mr. NORRIS. Yes.

Mr. TYDINGS. I suppose the Senator would be equally in favor of the proposition he is advocating if it applied to any other river in the United States, provided the circumstances were the same?

Mr. NORRIS. Yes, sir.

Mr. TYDINGS. If this policy were carried out all over the United States, it seems to me it would be inevitable that the Government would be competing with people who had put their money into power enterprises, and that the Government, being uncontrolled, untaxed, and unregulated, with an unlimited Treasury back of it, would ultimately put out of business every one of those private power concerns.

Mr. NORRIS. Mr. President, the Senator has been reading the propaganda that is brought out before the Federal Trade Commission. He is making the same argument that the fellows representing the Power Trust have been making, and which that investigation is bringing to light.

Mr. TYDINGS. Mr. President, will the Senator yield again?

Mr. NORRIS. Yes.

Mr. TYDINGS. Will the Senator deny that the propaganda he says I have been reading—although I have not read a page of it—or the statement I have just made is absolutely true; and, if false, will the Senator point out wherein it is false?

Mr. NORRIS. I am not going to be led into a quarrel with the Senator as to putting somebody out of business. It has been developed, and the country now knows it, that this greatest monopoly in existence is sneaking into the back doors of the schoolhouses and is trying to contaminate the minds of our children and is poisoning them with its arguments in favor of the Power Trust; and I hate to have the argument made now that we are in danger of injuring that kind of a monopoly.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. NORRIS. Yes.

Mr. TYDINGS. I have not yet gotten an answer to the question I asked the Senator. He has condemned the Power Trust. I do not blame him for that if he wishes to do it; but I ask him specifically if the Government pursued the policy that he has outlined in this measure and went all over the United States and built dams on rivers situated similarly to this river and sold the electricity, uncontrolled, untaxed, and unregulated, would not the inevitable result be that the private concerns would have to go out of business?

Mr. NORRIS. Mr. President, if the private concerns are going to operate as they have been operating——

Mr. TYDINGS. But the Senator does not answer my question.

Mr. NORRIS. I hope the Senator will let me make my answer. He will have his time all taken up if he will read the rest of the disclosures that are made before the Federal Trade Commission about this great monopoly of which he seems to be so tender and which he does not want to have injured.

Mr. GLASS. With respect to that, it seems to me the ready answer is that the Government is not going all over the country building dams on all the rivers.

Mr. NORRIS. Mr. President, the Government is at Muscle Shoals because we provided that plant as a war proposition. I did not favor going into it on any other ground myself. We are there because we provided for it in the national defense act, and since we are there and own the property and have spent the money of the people in developing it I think it would be the height of unwisdom if we threw it away now just because a set of millionaires who have a monopoly in this country and are getting a greater monopoly in the development of power object to our interfering with their business.

Mr. TYDINGS. Mr. President, I am not quarreling with the Senator or his views; I am trying to get them straight in my own mind. I understood the Senator to say a while ago that he was in favor of the principle incorporated in his measure as applying to any other river similarly situated.

Mr. NORRIS. I am. If we had any other river like this, and had such a property as we have at Muscle Shoals, I would want to do the same thing.

Mr. TYDINGS. Then I ask the Senator again, if we pursue the principle laid down in his joint resolution, and the Government goes into these propositions on the various rivers of the country and builds plants and sells power——

Mr. NORRIS. Does the Senator know of another place where we have such a plant?

Mr. TYDINGS. Of course.

Mr. NORRIS. Is there any place in the United States where the Government has built a dam like that it has at Dam No. 2?

Mr. TYDINGS. But the Senator is leaving his original proposition.

Mr. NORRIS. No; I am not. If the same conditions existed I would want to do the same thing. There is no use of the Senator quibbling over that.

Mr. TYDINGS. They exist all the way up and down this country.

Mr. NORRIS. No; they do not. There is not another place in the United States where the Government owns property like that it owns at Muscle Shoals, or anything similar to that.

Mr. TYDINGS. My first question directed to the Senator was, if there were other rivers similarly situated as the Tennessee River, would he be in favor——

Mr. NORRIS. Now, the Senator must admit, I think, that his question is, in a nutshell, if we had the same conditions anywhere else, on any other river, would the Senator be in favor of doing what he is doing now, and my answer is, yes.

Mr. TYDINGS. Then I ask the Senator if he will give me an answer to my second question, which I have propounded three times, and to which I have not yet gotten an answer.

Mr. NORRIS. Yes; but the Senator's second question has not any more to do with the first one than the flowers that bloom in the springtime. He can not tell me now—I challenge him to tell me—a place in the United States where there is a similar condition.

Mr. TYDINGS. The Senator is answering my question by asking me one. What I would like to have the Senator do first is to answer my question, and then I will answer his inquiry.

Mr. NORRIS. I have answered the Senator's question. I have said that if we had the same conditions anywhere else I would be in favor of the same kind of a proposition.

Mr. TYDINGS. Then, under the provisions of this joint resolution, will not the Government, untaxed, uncontrolled, unregulated, competing with concerns that are taxed, are controlled, and are regulated, put the other concerns out of business?

Mr. NORRIS. No; not if they do an honest business.

Mr. TYDINGS. Why not?

Mr. NORRIS. They will profit by this measure, as I will show the Senator when I get to it. He is so anxious that he will not even let me discuss another feature of this proposition, but insists that I discuss that first. Bless your soul, there is nothing in this measure that will put any honest fertilizer man, or any honest water-power man, out of business anywhere.

Mr. TYDINGS. Why so?

Mr. NORRIS. Because it will not.

Mr. TYDINGS. What difference does it make whether a man is honest or dishonest if, with a big overhead of taxation, controlled by the States, and with a limited capital, he is to compete with this Government plant?

Mr. NORRIS. The Senator forgot; he did not this time say "untaxed and uncontrolled."

Mr. TYDINGS. Yes; I did.

Mr. NORRIS. Did the Senator?

Mr. TYDINGS. Yes; I did.

Mr. NORRIS. The Senator has repeated that so often that I have reached the conclusion that he has not only read the propaganda of the Power Trust being exposed before the Federal Trade Commission, but he has committed it to memory.

Mr. TYDINGS. The Senator is very witty; but I am trying to talk sense to him, and not indulge in frivolity on a very serious question.

Mr. NORRIS. I hope the Senator will talk sense.

Mr. TYDINGS. I would like to say to the Senator that his measure provides for the Government to go into the power business. It will compete in communities that already have private concerns in the power business. Those private concerns are subject to taxation, they are subject to the control of the State public-utilities commissions. The Government is not subject to taxation; it is not subject to the control of the State utilities commissions; it has an unlimited Treasury back of it to make up any deficit; and I ask the Senator how any concern may stay in business in the face of that competition?

Mr. NORRIS. One way they can stay in business is to stop spending millions of dollars for propaganda purposes.

Mr. TYDINGS. Oh!

Mr. NORRIS. Another way they can stay in business is to stop spending money in senatorial elections. Another way they can stay in business is to stop making contributions to carry presidential elections.

Mr. TYDINGS. The Senator can not show, to save his soul, where a million dollars has been spent for propaganda purposes. That is a wild statement, made out of the whole cloth.

Mr. NORRIS. Then there has not been any. Does the Senator remember the $125,000 contribution of Samuel Insull? Who paid that, if it was not the poor men who are reading by electric light?

Mr. TYDINGS. Add up your million.

Mr. NORRIS. I could go on and give more.

Mr. TYDINGS. Do it.

Mr. NORRIS. I will not do it.

Mr. TYDINGS. The Senator can not do it.

Mr. NORRIS. I can do it. The Senator must not think that he can outline a course for me to take.

Mr. TYDINGS. The Senator can not do it.

Mr. NORRIS. Of course, I can do it.

Mr. TYDINGS. Do it, then.

Mr. NORRIS. I am not going to please the Senator that way.

Mr. TYDINGS. Of course, the Senator is not, because he can not.

Mr. NORRIS. If the Senator will follow the Federal Trade Commission he will find it out.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. NORRIS. I yield.

Mr. COPELAND. Is there not another answer besides the answer given by the Senator about this particular problem; that we have already invested millions of dollars of the United States in this plant, it is our property, we have it on our hands, and it must be utilized to the best possible advantage? It is not a question of our going out and taking a new property or finding another river and building other dams and other reservoirs, but we have this, it is ours, and it was bought with a specific promise to the American people. That is the way I look upon this particular matter. We are under obligation to do something with it to serve the people in time of peace as we thought to do with this property in time of war.

Mr. NORRIS. I think so. Suppose we were starting on the proposition to make the Tennessee River navigable, a perfectly legitimate governmental activity, as everybody will concede, and we were going to spend $37,000,000 to do it. I defy any man to show a place or places on the Tennessee River where navigation could be improved by the expenditure of the same amount of money as it would be improved through the building of Cove Creek Dam. As a matter of fact, the $37,000,000 includes the building of a transmission line all the way to Dam No. 2. So that it would be worth our while if we were going to act on that one thing alone, to make the Tennessee River navigable, and we are going to make it navigable some time. Nobody doubts that. The great South has a right to demand that it be made navigable. It is one of the longest streams in the United States which can be made navigable, and we ought to give to that great section as cheap transportation as we can give them and that will afford it. You can not spend

an equal amount of money on anything else that will go as far toward the making of that stream navigable as will the building of this one dam. That is perfectly apparent to anyone who will study the subject. So we are justified, I think, in building Cove Creek Dam.

It will not help my people any, but I hope that Senators will be broadminded enough, no matter from what sections of the country they come, to realize that flood control is a national problem, and that this is one step toward flood control; and eventually, on the ground of flood control alone, we will build that dam, if we do not do it now.

Now I want to discuss briefly the fertilizer matter. There are two considerations here—water power and fertilizer production. For more than seven years I have listened to Senators condemning me and the course I wanted to take at Muscle Shoals on the ground that I was in favor of the development of a power proposition at Muscle Shoals, and was not giving sufficient consideration to fertilizer. Fertilizer has been the cry. It was always said, in all the arguments, that this plant had been dedicated to fertilizer; in one of the bills it was stated in so many words that Congress dedicated this plant to fertilizer. We have said we wanted to improve agriculture, that we wanted to give the farmer a chance, and while I always believed that I was providing for the production of fertilizer, I was condemned, and the bills I introduced were condemned, because it was said I did not have in them enough provision for the production of fertilizer.

Now, we have reached the point where this measure is being condemned because it provides for the production of fertilizer. Where are the champions of the farmer who for seven years have been crying aloud that this was dedicated to fertilizer in time of peace and saying those of us who wanted even to think of water power were enemies of the farmer? Look over the resolutions which during the last eight years have been passed by farm organizations, National, State, county, district—any kind. Whenever they pass a resolution about Muscle Shoals you will find somewhere in it a demand that this plant be utilized for the production of fertilizer in time of peace.

Now the cry goes up that we must take all provision for the production of fertilizer out of the joint resolution. With the Water Power Trust in disrepute before the people, ashamed to raise its head because of the exposés that have taken place before the Federal Trade Commission, they are carrying on now their propaganda through the Fertilizer Trust, and we are swamped with telegrams and letters by the thousands to the effect that we must take all provision for the production of fertilizer out of this measure.

The Fertilizer Trust is boasting now that in the House they took fertilizer out of it, and they want to take it out in the Senate, although I may say there is no provision in the conference report which, in my judgment, is a particle stronger than was in the joint resolution as it originally passed the Senate on fertilizer. In my judgment, if this joint resolution is passed, it will result in a greater demonstration, in an experimental stage, on a broad principle, than any that has ever been undertaken anywhere in the history of civilization. It will be the greatest boon to fertilizer that has ever been undertaken.

The production of fertilizer is to a great extent a chemical activity. Everybody knows that there are unknown worlds to be developed yet in the production of fertilizer; that the manufacture of fertilizer as practiced to-day upon the farms of America is an incomplete and perhaps almost an unknown science, and developments have been taking place for the last hundred years that have gradually cheapened fertilizer.

Fertilizer is composed of nitrogen, phosphorus, and potash. There is in the air an abundance of nitrogen, and the proposition is to get that ingredient of fertilizer out of the air. We have made broad provision in this measure because we do not know now what to-morrow's scientific world may bring forth. We do know that since the war things have changed very greatly. The cost of extracting nitrogen from the atmosphere has been cut in half since the World War. Scientists all over the known world are trying to develop improved methods, and this is a proposition for the Government of the United States to do it on a large scale. Everybody knows, especially in the chemical world, that in the laboratory may be found a product which apparently is perfect, doing just what you expect it to do, but when you come to apply it in the world of agriculture it does not work; it fails. When we go out in the world and apply it to practical results in a business way we find that the laboratory test does not work. As to the fertilizer people, God knows I have not anything against any of them; I do not believe I have ever been guilty of even making a charge that was disreputable against any of them, but I have heard it here from day to day during several years.

I believe it to be true that no fertilizer company can afford to spend the money in some of these experiments. Some of them will cost hundreds and hundreds of thousands of dollars. They may fail, and then the private individual who is making the experiment loses the money that he has in it. The Government alone can afford to make the experiment. It has never done it in the past except in the laboratory. The proposition is to utilize Muscle Shoals for the purpose of making fertilizer, the ingredients of fertilizer, studying fertilizer practically upon the farms on a broader scale than it has ever been undertaken. I do not know what the results are going to be. It is fair to assume, I think, that there will be many failures. There will be lots of money spent where they will not get the proper kind of results. But I know of no other way to cheapen fertilizer than to continue to experiment and manufacture it on a large enough scale so that we may know whether it is of practical benefit or not.

The joint resolution as passed by the Senate provided that the Secretary of Agriculture might manufacture fertilizer, experiment in fertilizer, and build any kind of plant that he wants to. We thought best not to limit the corporation, because we do not know what the best plan will be to-morrow. It is quite evident since the war that the plant we built down there, No. 2, is believed by all scientific men to-day to be obsolete and out of date. For one-third of the money and one-fifth of the power we can make as many nitrates by more modern methods as we can produce from nitrate plant No. 2. That has all developed since the war. Nitrate is one of the ingredients, and the most expensive ingredient, in fertilizer.

It is the idea of the conference committee, it is the theory of the conference report, that we should give to the corporation very broad latitude, otherwise we do not know what they will run up against and how soon they will be unable to proceed further on account of statutory provisions.

It is provided, for instance, that if the corporation develops a new fertilizer in the laboratory and it is thought that it will work, instead of sending it out to the farmers and telling them to apply it, as we have had to do in the past, at their own risk and sometimes causing them to lose their crop because they wanted the best, they shall say to the farmer, "Apply this in a certain way, follow this practice, use this combination that we will supply to you, and we will agree that if it fails, if it injures or destroys your crop, we will pay the damages." We have got to do something of that kind. I expect that will often occur. In the years to come, if the joint resolution is passed, it will happen perhaps more frequently that way than otherwise.

But we are in hopes that we will succeed sometime, that we will make an advance, and when the Government corporation makes it, it is free to the world. There is no patent. If a private concern did it, they would patent it, and I mention that without criticism. They have a right to do it. But if this Government corporation, with money they obtain from the sale of power, discovered something new, every fertilizer corporation in the world could use it the next day. It would be free and open to everybody.

I remember some time ago when a fertilizer man came to my office to talk to me about it. He had read the Senate bill. He said:

> I think that is the finest piece of legislation that has ever been attempted for any fertilizer man who wants to improve his business.

He said:

> We know that our business is very imperfect. We know that the farmers are paying much more than they ought to pay, if we could get some improved method of making fertilizer. We know that the human race are interested in cheap fertilizer, whether they are on the farms or in the cities.

He said further:

> I would rather, as a fertilizer man, have the Government discover something new and let me use it, which I would be glad to do if it is improved, if they will go to the expense of making the experiment. I can not afford to do it because I might fail. In doing that, if they make it on a large enough scale—

he said—

> which they ought to do, then they would have to sell it, of course; if they had it on hand it would have to be utilized. If they had a little competition that would affect me, I would not object because it would be as nothing compared to the benefits I would get out of any improved method which might be discovered.

Mr. COPELAND. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from New York?

Mr. NORRIS. I yield.

Mr. COPELAND. The thing that disturbs me about the conference report is emphasized by what the Senator is saying. I have followed him and voted with him on the bill from the beginning. But heretofore, and the RECORD shows it, the Senator has said distinctly that "When we talk about fertilizer it is a mockery, it is a myth, it does not mean anything. It is to deceive the farmers of the United States into believing that they are going to get fertilizer," and so forth. He said, "It is a power plan altogether."

Mr. NORRIS. I am glad to have the Senator call my attention to that.

Mr. COPELAND. I am disturbed by that statement.

Mr. NORRIS. Let me see if I can explain it to the Senator. This is a power proposition. I have always believed it to be a power proposition. If the Senator will go through the RECORD he will find that I always claimed to be—and I believe I was honest in it—as anxious to cheapen the production of fertilizer as any man on earth. While I did not come from a section of the country that uses it very much, yet when I went into the question and studied fertilizer and began to realize how important it is to the human race, I became a convert to the spending of almost unlimited sums in the improvement of fertilizer and fertilizer practices.

But this has always been a water-power proposition. In other words, here is what was being claimed by my opponents in the debate. They said, "Use nitrate plant No. 2, the cyanamide process, and make fertilizer with it." While I admitted that could be done, I tried to make plain that it was an obsolete method of doing it; that, while we had a plant down there which would make 40,000 tons of nitrate a year, we could make the same amount of nitrate for much less money without utilizing one-fifth the amount of power that we would use there, and I think that has been demonstrated now. But I wanted to use the money that we would sell the power for and then go into the fertilizer business on a modern basis. That is what I was advocating.

Mr. COPELAND. If the Senator will bear with me, it is very confusing to me because the things the Senator has said in years past soaked into my soul and memory, and I was sure that I was not wrong in my recollection. Just listen to a sentence from the Senator's own mouth. This was on April 30, 1926. He said:

> I went into the question without knowing what it cost to make fertilizer. I went into the question without knowing what I believe I have learned, that as the production of fertilizer has advanced and becomes better understood, cheapened by new invention, the tendency has been for years to use less and less power in getting together the ingredients necessary to make fertilizer, particularly in the extraction of nitrogen from the atmosphere, until now, although I am not an expert, yet I have no hesitation in saying that the evidence demonstrates that as we improve and cheapen the method of making fertilizer we are eliminating the consideration of the power question.

He repeated it last year, and now we have before us something entirely different.

Mr. NORRIS. No; I have not contradicted that, let me say to the Senator. I stand by that to-day. According to my theory that is as true as gospel now.

Mr. COPELAND. If I understand the Senator, he wants to go up Clinch River or Cove Creek and build another dam to develop more power.

Mr. NORRIS. No; to regulate the flow of the Tennessee River and make it navigable.

Mr. COPELAND. That is new. It has not been in any previous bill.

Mr. NORRIS. I know it has not. It was never in the bill before. This survey has just recently been completed by the Government.

Mr. COPELAND. The conference report is entirely different, and it is new and novel.

Mr. NORRIS. The Cove Creek Dam is new. I said that to begin with.

Mr. COPELAND. To be frank about it, I do not even recognize, in what he is saying to-night, the bill that the Senator was talking to us about last year and the year before. It seems to me it is an entirely new proposition.

Mr. HARRISON. Mr. President——

The PRESIDING OFFICER (Mr. DENEEN in the chair). Does the Senator from Nebraska yield to the Senator from Mississippi?

Mr. HARRISON. I want to get clear in my own mind, if I can, just how the Senator has changed this proposition.

Mr. NORRIS. I want first to answer the Senator from New York before I have another question to answer. I still hold the same opinion.

Mr. COPELAND. Then why does the Senator want more power?

Mr. NORRIS. Let me tell the Senator. I would not build the Cove Creek Dam for the power there would be in it. I would not think of it for the Government. I would not build the Cove Creek Dam for any purpose if we did not have Dam No. 2, excepting as a navigation proposition and as a flood-control proposition.

Mr. SACKETT. Mr. President——

Mr. NORRIS. Let me answer one at a time. Here we have Dam No. 2. We can double its value. We ought to do it. Here we have the Tennessee River unnavigable. We can make it navigable. Should we do it?

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. NORRIS. Here we have a reservoir, perhaps the biggest in the United States, that will help control the flood waters of the Mississippi River. Should we build it?

Mr. COPELAND. Why not go up the river and build another dam?

Mr. NORRIS. We will. We will build 100 dams before we get through with the Mississippi River. Just see if we do not!

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. NORRIS. I promised to yield first to the Senator from Kentucky.

Mr. SACKETT. It was in evidence before the committee as to what the Cove Creek Dam would do in the way of aiding navigation on the Tennessee River. Is there any doubt of there being water enough in the Tennessee River in ordinary times, below the mouth of Cove Creek Dam, to require such an extraordinarily big investment as that to carry on navigation on the Tennessee River?

Mr. NORRIS. It is not a big investment for the navigation of the stream.

Mr. SACKETT. It is $37,000,000.

Mr. NORRIS. That is the cheapest way we can make it. The Tennessee River must have improvements or it will not be navigable. It is not navigable up there now.

Mr. SACKETT. That is only one small tributary of the Tennessee River that the Senator is proposing to dam for $37,000,000.

Mr. NORRIS. Yes.

Mr. SACKETT. There is plenty of water in the Tennessee River, in all of its tributaries and the main river.

Mr. NORRIS. There is not plenty of water. The Tennessee River gets very low at times and very high at other times.

Mr. SACKETT. So do many other rivers.

Mr. NORRIS. That is a simple proposition.

Mr. SACKETT. Is there any evidence before the committee that flood control is necessary on the Clinch River? There is no evidence before the committee that flood control is a matter of great moment on the Clinch River.

Mr. NORRIS. We do not care for flood control now on the Clinch River, but the water that is held back there, which will do some good in the way of making the river navigable and developing power, will do damage if we let it run and go down the Mississippi Valley.

Mr. SACKETT. No; not out of the Clinch River.

Mr. NORRIS. Yes; it does. Every gallon of it goes into the Mississippi River.

Mr. SACKETT. Yes; and it would not raise the level of the Mississippi River at New Orleans the sixteenth of an inch.

Mr. NORRIS. Mr. President, if the water that is held back by that dam was spread over the District of Columbia and if the District of Columbia was level, the tallest building in the District would be away under water. Ships could float over the top of the city without scraping their bottoms.

Mr. SACKETT. It would probably take about two years to build that dam.

Mr. NORRIS. Perhaps it will. I do not know how long it will take, but it will hold back that much flood water, and when we let it out it will increase the flow of the stream and make the Tennessee River navigable.

Mr. TYDINGS. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Maryland?

Mr. NORRIS. I yield.

Mr. TYDINGS. I do not want to go back to a point that we had up a moment ago facetiously, but I would like to say to the Senator that I understood him to say just a moment ago that we would build hundreds of these dams before we are through?

Mr. NORRIS. I think we will.

Mr. TYDINGS. Does the Senator advocate that we should use the power and sell it like we are selling it at Muscle Shoals?

Mr. NORRIS. The Senator and I would agree, I suppose, if we were going to control the flood waters of the Mississippi River that way, that we could build the dams; but we could not build the dams without generating a lot of power. I would sell the power. The Senator would throw it away. That is the difference between us.

Mr. TYDINGS. Then may I ask the Senator this question: Will not his policy be the means eventually of bringing about the confiscation of all the privately owned power plants in the United States?

Mr. NORRIS. No; it will not.

Mr. TYDINGS. Why not, may I ask?

Mr. NORRIS. Because there will not be any occasion for the privately owned plants to quit if they do an honest business. They will not be able to do what they are doing now. Instead of charging from 10 to 12 cents a kilowatt-hour to the men and the women in the little homes and using the big profit to control legislation, to buy Senators, to elect Senators, and control presidential elections, they will go out of that business and will sell the same power for 4 cents a kilowatt-hour and make money doing so.

Mr. TYDINGS. Then, the Senator thinks if we should duplicate every power plant in the United States, building two plants where there is now one, that the ones that are now in existence, although they could not compete with the Government, could still operate and make money? Is that what he thinks?

Mr. NORRIS. No; the Senator is making an assumption there that it ought to be beneath him to make. Who has suggested that we duplicate every power plant?

Mr. TYDINGS. We would do it under the Senator's plan.

Mr. NORRIS. We would not do it. There would not be anything to duplicate.

Mr. TYDINGS. The Senator has said so.

Mr. NORRIS. Here is a power dam on a stream; it is going to be duplicated, another one is going to be built. There is not any stream over there, there is not any stream over here; where is it going to be built?

Mr. TYDINGS. Suppose there is no power plant on the stream, but there is a steam plant alongside of the stream, then what does the Senator say?

Mr. NORRIS. If there is good water power there, either a private party or the municipality ought to build a dam and get power from the water, and save the coal.

Mr. TYDINGS. But suppose the water power has not been utilized, but private enterprise has built a steam plant and has its money in it and the Government comes along and builds a plant alongside of it?

Mr. NORRIS. I do not care whether by the Government or a private party, the dam ought to be built. The Senator would not object if some private corporation built the dam. He would say, "That is all right." But a dam is never built in any locality without competing with some one engaged in producing the same thing.

Mr. TYDINGS. Then, the Senator admits that there is competition?

Mr. NORRIS. Of course, there is competition.

Mr. TYDINGS. That is it exactly.

Mr. NORRIS. Every time a dam is built; and that is what we ought to have in order that the people may get justice.

Mr. TYDINGS. Then the Senator advocates the use of public money, contributed in part by those with whom the Government is competing, to build dams and to compete with those who have invested private capital. At last we have the answer.

Mr. NORRIS. The Senator is answering his own question, but with all his wisdom and his greatness he has not yet been able to answer for me. I prefer to answer for myself.

Mr. TYDINGS. But the Senator admitted that there would be competition.

Mr. NORRIS. The Senator said that.

Mr. TYDINGS. Did not the Senator admit it?

Mr. NORRIS. If the Senator will keep still and remember that I am not on the witness stand being questioned by him——

Mr. TYDINGS. Neither am I.

Mr. NORRIS. Then sit down.

Mr. TYDINGS. I will. [Laughter in the galleries.]

The PRESIDING OFFICER rapped with his gavel.

Mr. TYDINGS. Of course, the Senator can be discourteous, but he yielded to me to ask him a question, and I was entitled to a polite answer. However, I do not expect any polite answer from the Senator.

Mr. NORRIS. The Senator would not appreciate a polite answer if he got it. [Laughter in the galleries.]

Mr. TYDINGS. No; not from the Senator from Nebraska, because I have never gotten one.

Mr. NORRIS. The Senator would not know a polite answer if he met it in the middle of the street.

Mr. TYDINGS. If I did it would not be from the Senator from Nebraska, if his conduct to-night is any criterion.

Mr. NORRIS. Now, Mr. President——

Mr. GLASS. Mr. President——

Mr. NORRIS. I yield to the Senator from Virginia.

Mr. GLASS. The Senator knows very well that I voted for his Muscle Shoals measure in the Senate, and I am not asking questions now in an antagonistic spirit. I do not care what becomes of the power monopoly. I am in a very punitive sort of spirit when we discuss the power monopoly. I think if it were to lose money for the next 50 years to come it would not requite the victims upon whom it has profiteered for that length of time. So, I am not bothered about that aspect of this case; but the Senator has not answered quite to my satisfaction the objection to the conference report, to the effect that, if it be adopted, it will eventually destroy all private initiative and destroy the great amount of capital invested in the manufacture of fertilizers by setting the Government up in active competition with legitimate, honestly conducted fertilizer plants.

I judge from the conference report that the Government will be authorized to engage in the commercial business of selling fertilizers. If that is so, what I should like to know is whether it is proposed that it shall do so on the basis altogether to the advantage of the Government and to the disadvantage of those who have invested their money in the fertilizer business? I should like the Senator a little more clearly to state what, in his view, may happen in that respect.

Mr. NORRIS. Mr. President, I think the Senator from Virginia has asked me a very fair question. I will say that I do not want to put anybody out of business so long as——

Mr. GLASS. I am not assuming that the Senator does.

Mr. NORRIS. I do not think the Senator from Virginia assumes that.

Mr. GLASS. But what I want to develop is whether this program, if it be adopted, will put anybody out of business?

Mr. NORRIS. I understand the Senator's question. One may take such a view of the joint resolution as it passed the Senate—and the same thing is true of the conference report—as to give him some concern along the lines of the Senator's question. I do not believe it can be avoided. If we are going to operate to afford agriculture the right kind of experiment and the right kind of demonstration as to the production of cheap fertilizer, we must do it, I think, on a large scale. All kinds of experiments will be conducted on a large scale in order to ascertain after the experiment shall have been made whether it is a practical one. The Government will manufacture fertilizer on a large scale to see if the formulas and the laboratory tests will work out; the Government will keep on hand considerable fertilizer. I do not doubt that when the Government produces fertilizer it will dispose of it, that it will sell it.

If, however, the Government shall produce fertilizer, if the experiments shall prove a success, it will cheapen the product, and every fertilizer manufacturer in the country will get the benefit of the experiments, as the results will be available to the public.

I concede that if the board which is to take charge of this undertaking should not want to do anything else than to make fertilizer, in a technical sense it might do that; but it would not be the right thing to do. I do not expect it to do anything of that kind. I think that if one will consider the whole measure together, he will realize what it is intended to accomplish, and will realize also that if we should undertake to say that there should be nothing but experimentation we would perhaps at once destroy the usefulness of the project. The question would arise, What is an experiment? Are we going to experiment on a square yard of earth or on an acre of earth or on 160 acres, or are we going to manufacture something in a laboratory? Right there we would get into difficulty, and the question would arise at once whether the board was exceeding its authority.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator from Nebraska yield?

Mr. NORRIS. I yield to the Senator from Arkansas.

Mr. ROBINSON of Arkansas. Will the Senator from Nebraska state what are the provisions of the conference report with respect to fertilizer; and does the joint resolution contemplate primarily experiments or primarily the manufacture of fertilizer for commercial purposes?

Mr. NORRIS. I do not think it is the intention of the joint resolution to provide for the manufacture of fertilizer for commercial purposes, although, as I said to the Senator from Virginia, one might put that construction on the language if he

ignored everything else in the joint resolution. For instance, the Senator's colleague, the junior Senator from Arkansas [Mr. CARAWAY], when we had the joint resolution in the Senate, offered an amendment, which was agreed to, which required the Goverment to operate plant No. 2; and that provision is still in the joint resolution in a modified form. Personally, I do not have any faith in that, I will say frankly, but there are a great many people who do. From my study of it, I do not believe that will be a success. It will be necessary to try it, however.

Mr. ROBINSON of Arkansas. Does the Senator mean that it will not be a success because it is proposed to operate it under the cyanamide process?

Mr. NORRIS. Yes. Did the Senator from Arkansas want me to read from the joint resolution? Am I to infer that from his question?

Mr. ROBINSON of Arkansas. I do not care to ask the Senator to read from the joint resolution. What I should like to have him do is to state what are the provisions with respect to fertilizer, or to summarize them, so that the Senate may judge for itself whether the joint resolution contemplates undue competition with private enterprise.

Mr. NORRIS. Let me read some of the language:

SEC. 5. The board is hereby authorized and directed—

(a) To operate existing plants, to construct, maintain, and operate experimental or production plants at or near Muscle Shoals for the manufacture, distribution, and sale of fertilizer or any of the ingredients comprising fertilizer, or any of the by-products of the same.

Mr. HARRISON. Mr. President, may I ask the Senator how does that differ from the original language of the Senate joint resolution?

Mr. NORRIS. Let me finish reading.

Mr. HARRISON. I want to know how that language differs. That is the conference report from which the Senator is reading?

Mr. NORRIS. Yes.

Mr. HARRISON. How does that differ from the joint resolution as it was passed by the Senate?

Mr. NORRIS. I do not think it does differ from it.

Mr. HARRISON. I think it does, in several particulars.

Mr. SMITH. May I state that it is in the exact words——

Mr. NORRIS. Mr. President, I hope Senators will let me finish reading what I started to read.

Mr. HARRISON. I wanted to ascertain if there is a difference. I want to know what has been done.

Mr. NORRIS. If the Senator will give me time, I will come to that.

Mr. HARRISON. I should like the Senator to state exactly what the difference is.

Mr. NORRIS. I was only half through the reading in answer to the question of the Senator from Arkansas [Mr. ROBINSON]. I will continue:

(b) To contract with commercial producers for the production of such fertilizers or fertilizer materials as may be needed in the Government's program of development and introduction in excess of that produced by Government plants. Such contracts may provide either for outright purchase by the Government or only for the payment of carrying charges on special materials manufactured at the Government's request for its program.

We have broadened it so that the board can even deal directly with the fertilizer manufacturers.

(c) To arrange with farmers and farm organizations for large-scale practical use of the new forms of fertilizers under conditions permitting an accurate measure of the economic return they produce;

(d) To cooperate with national, State, district, or county experimental stations or demonstration farms, for the use of new forms of fertilizer or fertilizer practices during the initial or experimental period of their introduction.

And so on. Now let me read——

Mr. COPELAND. Will not the Senator go on, because when we reach (f), on page 4, we find entirely new material.

Mr. NORRIS. Very well. I continue.

(e) Whenever the board determines that it is commercially feasible to produce any such fertilizer, it shall be produced, and shall be disposed of at the lowest prices practicable.

I presume that if one cared to give a technical construction to that language he might say that the object of this measure is to go into the production of fertilizer and to go into its production on a large scale and sell it; but I think when all the language is read it must be realized that what is meant is that the board, when it determines that it is practical to produce a certain form of fertilizer, shall produce it and go on far enough so that there may be no doubt that the experiment is a success.

Mr. KING. The Senator ought to read the concluding part of that sentence.

Mr. NORRIS. I have not finished it. I will read it all:

It shall be produced, and shall be disposed of at the lowest prices practicable, to meet the agricultural demands therefor, and to effectuate the purposes of this act.

I take it that the price of fertilizer would have something to do with the agricultural demands.

Mr. HARRISON. Mr. President, may I suggest to the Senator that the language there is restricted from the language in the joint resolution as passed in the Senate, because the joint resolution as passed in the Senate says:

It shall be produced in the largest quantities practicable.

The Senator would eliminate "in the largest quantities practicable," and just say "It shall be produced"?

Mr. NORRIS. Yes.

Mr. HARRISON. So I think the language is really restricted from the Senate joint resolution in that respect.

Mr. NORRIS. When the Senate joint resolution was framed in the committee, we had an idea—it may have been wrong—when we put in that language. We wanted them to produce it on a large scale, because, especially in something of this kind, unless that is done there would be danger that we would get no benefit from the experiment.

Mr. ROBINSON of Arkansas. Mr. President, is it possible to anticipate the amount that may be produced if the conference report is agreed to and the machinery is put in operation that it contemplates?

Mr. NORRIS. No; I will say to the Senator; at least, I have no idea of the amount. I think it would depend entirely on conditions. I do not know.

Mr. GLASS. Mr. President——

Mr. NORRIS. I yield to the Senator from Virginia.

Mr. GLASS. Pursuing my line of inquiry, which is propounded in no antagonistic spirit at all, I want to clear the way, if I can, to support the conference report; but it seems to me, from reading the conference report and from hearing the explanation given by the Senator, that under the terms of this act the Government would be expected and perhaps required to go into the business not only of manufacturing but of commercially disposing of fertilizer. That is what I want made clear.

Mr. NORRIS. Of course to some extent I think that is true. If we make the fertilizer, of course we would have to sell it, and it would be made sometimes on a large scale. I think that would be necessary.

Mr. GLASS. They would sell it directly to the farmers, would they?

Mr. NORRIS. There is not any provision here about where they would sell it, excepting where there is specific reference made to organizations that they shall cooperate with and experiment with, and so forth. They could sell it to fertilizer dealers, for that matter, and they could even buy it from fertilizer dealers.

Now let me read the rest of this.

Mr. COPELAND. Yes, Mr. President, if the Senator will yield, because the difference between these two measures—the one that we passed and the conference report—lies in the part that the Senator is about to read and paragraph (a) of section 5.

Mr. NORRIS. Now, I am commencing at (f). I had read down to (f).

Mr. COPELAND. That is new.

Mr. NORRIS (reading):

(f) The board shall commence the manufacture of fixed nitrogen at Muscle Shoals by the employment of existing facilities (by modernizing existing plants), or by any other process or processes that in its judgment shall appear wise and profitable for the fixation of atmospheric nitrogen. The fixed nitrogen for fertilizer provided for in this act shall be in such form and in combination with such other ingredients as shall make such nitrogen immediately available and practical for use by farmers in application to soil and crops. The board is authorized and directed to utilize nitrate plant numbered 2 for experiments in the production of fixed nitrogen, to determine whether it is or is not commercially feasible to produce fixed nitrogen by such plant.

The Senator will find in section 9 of the Senate joint resolution—I think it is section 9—what is known as the Caraway amendment. That goes considerably further than that as it passed the Senate. That was modified.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. NORRIS. Yes.

Mr. COPELAND. But, as I see it, when you read (f), the new part of this measure, in connection with (a), you have brought into it an entirely new proposition:

The board shall commence the manufacture of fixed nitrogen at Muscle Shoals by the employment of existing facilities (by modernizing existing plants), or by any other process or processes that in its judgment shall appear wise and profitable for the fixation of atmospheric nitrogen. The fixed nitrogen for fertilizer provided for in this act shall be in such form and in combination with such other ingredients as shall make such nitrogen immediately available and practical for use by farmers in application to soil and crops.

That is all new, not in the Senate bill.

Mr. NORRIS. Does the Senator object to any of that language? There is nothing wrong about that, is there?

Mr. COPELAND. It opens up the very question which the junior Senator from Maryland [Mr. TYDINGS] raised in not very temperate terms.

Mr. NORRIS. If he is going to do anything with those plants, he certainly is going to do the very things the Senator has read. That was in the House joint resolution.

Mr. COPELAND. That was in the House joint resolution. It was not in the Senate joint resolution.

Mr. NORRIS. No; not all of it. Part of it is in the Senate joint resolution.

Mr. COPELAND. Also, when you go back to paragraph (a), you have new matter not in the Senate joint resolution there, where you are to produce by-products.

Mr. NORRIS. Now, let the Senator go to section 4—I said it was section 9—go to the Senate joint resolution and read section 4, and he will find that we went much further than that in section 4; and that was one of the things that were insisted on by many Senators on the other side of the Chamber before they would support the measure.

Mr. COPELAND. Does the Senator mean section 4 as found in the joint resolution that I have before me?

Mr. NORRIS. No; that is section 2.

Mr. COPELAND. The Senator means section 9?

Mr. NORRIS. Yes.

Mr. SMITH. It is section 4 of the Senate joint resolution.

Mr. NORRIS. The Senator from New York has a different print there.

Mr. COPELAND. But it is section 9 as found in my copy of the joint resolution?

Mr. NORRIS. Yes.

Mr. BRUCE. Mr. President, may I interrupt the Senator?

Mr. NORRIS. Will not the Senator let me finish reading this which I have just started to read?

Mr. BRUCE. Yes.

Mr. NORRIS (reading):

(g) Under the authority of this act the board may donate not exceeding 1 per cent of the total product of the plant or plants operated by it to be fairly and equitably distributed through the agency of county demonstration agents, agricultural colleges, or otherwise as the board may direct for experimentation, education, and introduction of the use of such products in cooperation with practical farmers so as to obtain information as to the value, effect, and best methods of use of same.

(h) The board is authorized to make alterations, modifications, or improvements in existing plants and facilities and to construct and operate new plants and facilities in order to effectuate properly the provisions of this act.

(i) To establish, maintain, and operate laboratories and experimental plants, and to undertake experiments for the purpose of enabling the corporation to furnish nitrogen products for military and agricultural purposes in the most economical manner and at the highest standard of efficiency.

(j) The board shall have power to request the assistance and advice of any officer, agent, or employee of any executive department or of any independent office of the United States, to enable the corporation the better to carry out its powers successfully, and the President shall, if in his opinion the public interest, service, and economy so require, direct that such assistance, advice, and service be rendered to the corporation, and any individual that may be by the President directed to render such assistance, advice, and service shall be thereafter subject to the orders, rules, and regulations of the board and of the general manager.

(k) Upon the requisition of the Secretary of War or the Secretary of the Navy to manufacture for and sell at cost to the United States explosives or their nitrogenous content.

(l) Upon the requisition of the Secretary of War the corporation shall allot and deliver without charge to the War Department so much power as shall be necessary in the judgment of said department for use in operation of all locks, lifts, or other facilities in aid of navigation.

Now I yield to the Senator from Maryland.

Mr. BRUCE. Mr. President, it would seem that the Senator from New York [Mr. COPELAND] voted for the Norris joint resolution when it provided merely that the Government should go into the electric light and power business; and it would seem that the Senator from Virginia [Mr. GLASS] did the same thing, as I understood him a few moments ago. If there is no reason why the Government should not go into the electric light and power business, is there any reason why it should not go into the fertilizer business?

The Senator from Virginia, with an indignant wave of his hand, doomed the entire private electric light and power business of this country to destruction, and yet at the same time he rises up in revolt at the thought that the fertilizer business of this country should be destroyed by Government competition.

Mr. GLASS. Mr. President, the Senators from Maryland are addicted to a great deal of exaggeration here this evening. I did not doom any of them at all; but there are some with which I have had transactions that I would not mind dooming.

Mr. BRUCE. But the Senator surely would not base such a broad generalization as the expediency of destroying the entire electric-light and power industry of the country simply upon the fact that some particular little electric-light and power company, perhaps down in Lynchburg, Va., had overcharged him for electricity?

Mr. GLASS. No; and I have not suggested any such thing; and, as I say, the Senator from Maryland, in controversy with me, invariably misrepresents my position and invariably exaggerates.

Mr. BRUCE. I expected that, Mr. President.

Mr. GLASS. Of course. The Senator invited it.

Mr. BRUCE. That is part of the penalty I always pay——

Mr. GLASS. It is the penalty the Senator always pays when he misrepresents his colleagues here, and he ought to pay it.

Mr. BRUCE. It is part of the penalty I invariably pay, no matter how moderate or self-restrained I may be.

Mr. GLASS. The Senator is never moderate, and is never self-restrained. I have never yet affronted him in this body, but he has frequently affronted me.

Mr. BRUCE. How can any human being——

The PRESIDING OFFICER. To whom does the Senator from Nebraska yield?

Mr. NORRIS. I do not yield to the Senator.

Mr. HEFLIN. Mr. President, I rise to a point of order.

Mr. BRUCE. I asked a perfectly respectful question——

The PRESIDING OFFICER. The Senator from Nebraska has the floor.

Mr. BRUCE. What I meant to say, if the Senator will allow me——

The PRESIDING OFFICER. The Senator from Nebraska has the floor. Does he yield; and if so, to whom?

Mr. ROBINSON of Arkansas. The Senator has refused to yield.

Mr. BRUCE. I did not understand that he had refused to yield to me.

Mr. NORRIS. I do not refuse to yield if the Senator from Maryland wants to ask me a question; but I do not care to yield for some outside discussion.

Mr. BRUCE. I think the Senator is perfectly right, especially when it takes the direction that the observations of the Senator from Virginia took.

Mr. GLASS. Well, of course——

Mr. BRUCE. I decline to be interrupted by the Senator from Virginia, if I have any standing on the floor.

Mr. NORRIS. Mr. President, I decline to yield to the Senator from Maryland when he is continually talking to the Senator from Virginia.

The PRESIDING OFFICER. The Senator from Nebraska has the floor.

Mr. BRUCE. I promise the Senator from Nebraska that I shall have nothing more to say to the Senator from Virginia.

Mr. NORRIS. Now does the Senator want to ask me a question?

Mr. BRUCE. All I want to say is this: I can not see just why the Senator from Nebraska thought that it was necessary for him to defend his thesis that the Government has a perfect right to go into the fertilizer business, when the Senator from Virginia and the Senator from New York voted for the Norris joint resolution when it provided only for Government competition with electric light and power.

Mr. NORRIS. I decline to yield further to the Senator. I want to read a provision of this measure as it passed the Senate to these Senators who, I think, will realize that they are mis-

representing the conditions themselves—of course, unintentionally.

Here is what was in the joint resolution as it passed the Senate:

> The Secretary of Agriculture is authorized and directed to utilize nitrate plant No. 2 for experiments in the production of fertilizers by the use of the cyanamide process, to determine whether it is or is not commercially feasible to produce fertilizers by such process.

That far, in substance, we have included it in the conference measure. The rest of it is stricken out; and this is what I am going to read, for the benefit of the Senator from Maryland, that was in the measure as we passed it:

> If the Secretary of Agriculture determines that it is commercially feasible to produce fertilizers by the cyanamide process, then such plant shall be used for the production of fertilizers by such process in the largest quantities practicable, and the fertilizers so produced shall be disposed of at the lowest prices practicable, to meet the agricultural demands therefor and effectuate the purposes of this resolution. In the utilization of nitrate plant No. 2 the Secretary of Agriculture shall avail himself of power in the same manner as provided in section 8.

So that we have cut it down somewhat in the conference measure, as I understand it, just a little. The Secretary is not required to carry that on whether it is a good process or a bad process, but he is required to make the experiment to ascertain whether it is right or not, whether it is a feasible proposition commercially. To do that he will have to produce a good many nitrates; I do not know how many. I do not think the man who is going to make the experiment would know, and that is the reason why we can not put it in black and white.

Here is a great, big plant, capable of producing 40,000 tons of nitrates in a year. It costs a whole lot of money to operate it. If it were turned over to me and I were to experiment with it, I do not know whether I would want to operate it to its full capacity to perform that experiment or not. I should have to look into it to see; and I would not know, if I were doing it in good faith, that I was sure about settling the question until I had operated it sufficiently so that there would be no doubt whatever as to whether or not it was a feasible process. In doing that I would have produced probably a good many thousand—probably several thousand, at least—tons of nitrates. I would have to do that in order to find out whether by that process we could extract nitrogen from the air economically and commercially.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. NORRIS. Yes; I yield. I should be glad to yield the floor. I have taken up a great deal more time than I had intended to take.

Mr. COPELAND. Do not yield yet. The Senator has pointed out to us in set terms, first, that we are going to build a new dam 300 miles up the river. That was never in the first bill. We never talked about that dam.

Mr. NORRIS. The Senator talks as if I were deceiving somebody about that dam. I never said that was in the first bill. I distinctly said it was not.

Mr. COPELAND. The Senator must not get irritated at me.

Mr. NORRIS. I am not irritated. Do not think that because I am earnest that I am irritated.

Mr. COPELAND. The Senator did not point that out.

Mr. NORRIS. It was not necessary for me to point it out. That was not a part of the joint resolution as it passed the Senate, but it was put in the joint resolution by the House.

Mr. COPELAND. Anyhow, the measure we have before us now has in it that very important addition, a thing which was not in the resolution which we considered and which we passed.

The Senator from Maryland has found fault with me because I voted for a measure providing for a lot of power. I want to call his attention to the fact that I did not vote for this power proposition. I have had the thought about our plant at Muscle Shoals that there was a great plant where we had invested millions of the people's money and made a definite pledge to the American people that we would have an establishment there where we would manufacture certain products which were useful in making ammunition, and that in time of peace it should be operated to make fertilizer. The Senator from Nebraska argued at length in the Sixty-eighth Congress, in the Sixty-ninth Congress, and in this Congress, saying that power is not an essential in the making of fertilizer.

Mr. NORRIS. Let me interrupt the Senator. I have tried to tell him about that before. That is true. Does the Senator deny it?

Mr. COPELAND. I admit that; but I want the Senator, so far as he can, to show how much further this measure goes. It goes tremendously beyond any point I have ever reached out to before.

Mr. NORRIS. The question of getting nitrogen from the air was originally, as the Senator knows, a matter of the use of what is known as the arc process. That required a great deal of power. That process is used in some places yet, but it is where there is an abundance of cheap power and no sale for it.

Then there was the cyanamide process for getting nitrogen from the air, a process that was not nearly so expensive, that did not take nearly so much power; and that was about the condition of the art when the Great War broke out. We did not have in this country a single plant operated under what is known as the synthetic or Haber process. During the war, when we were about to build this plant down at Muscle Shoals to get nitrogen from the air as a war measure, we knew that Germany was getting nitrogen from the air by what is known as the Haber process, and we built nitrate plant No. 2 down there with the idea of getting nitrogen by the use of the Haber process.

But our scientific men did not know anything about how to work it, and nitrate plant No. 2 was a complete failure, as far as getting any nitrogen from the air was concerned. We established it in good faith, and we spent several million dollars on that plant, but it failed, and the machinery there is nothing but junk, and not a single pound of nitrogen has been extracted from the air through nitrate plant No. 1. Everybody was doing the best he knew how, and the experience there just shows what sometimes happens in the case of experiments made by the Government. The war ended, and our scientists went to Germany and examined her plants and discovered that they were getting nitrogen from the air by the Haber process. The whole scientific world was aroused by it. We commenced over here. I think it was the du Pont people who went up to Syracuse, N. Y., after the war, after our people learned what the people over in Germany were doing, and built a plant to produce nitrogen by the cyanamide process. There was also the Casella process, an Italian process, and there was a modified process of that. Improvements were constantly being made. Every plant was a little better than the one before, until down in Virginia they are building one of the largest plants in the world to produce nitrogen by the synthetic process, which is a modification of the Haber process. Every improvement that has been made, from the time the art was first discovered, when the arc process was used, has resulted in the use of less and less power, just as I said.

That was not true when we built cyanamide plant No. 2. We thought a great deal of power was required. We knew what the cyanamide process was, and we built that plant, and it was up to date. At the time it was built it was as fine a plant of the kind as there was in the world, but it took a great deal of power, although a great deal less than was required in the use of the arc process.

The synthetic process has been improved upon and improved upon. Speaking from memory, now, I think we will be able with about one-third of the expenditure that we put into nitrate plant No. 2—at any rate, it is a great deal less—to build a synthetic-process plant that will have the capacity of cyanamide plant No. 2, and can be operated with one-fifth of the power. In other words, power ceases to be an important consideration in that process. Coal is the important thing, not because it is used for power, but because it is really the raw product. They convert the coal into coke, and with the coke get ammonia; and the only thing they use power for is to operate the machinery. With the cyanamide process the power itself, the electricity we develop there, goes into the system. But under the most modern process, the synthetic process, power is used to operate the machinery, and we use coal to get our nitrogen from the air, while we do not use any coal in the synthetic process. So we are using less and less power.

I want to say to my friend from New York that if we were locating a plant to-day for the purpose of getting nitrogen from the air we would not, in the first place, build a plant like nitrate plant No. 2, and we would not locate it at Muscle Shoals. There is no coke there. We would go where there is cheap coke and use whatever power might be available, as the du Pont people do down at Charleston. Their factory is up at Wilmington, but they go clear to a little suburb within 5 or 6 miles of Charleston, W. Va. They built a plant using the synthetic process for the production of ammonia. They take the ammonia from the air and haul it by freight in tank cars to the plant at Wilmington, and they get their nitrogen for about half what it costs us to get nitrogen from the air at cyanamide plant No. 2.

Mr. COPELAND. Mr. President, the Senator is talking exactly the same scientific language that won me to the support

of his bill last year and the year before, and he made it clear to us that this Muscle Shoals project as developed, and as it might be readily completed, was purely a power project, and the question was how we could best dispose of the power. He talked only about the use of the plant as an experimental plant, where we might work out the problems as to the development of nitrogen and the development of fertilizer. But to-night the Senator from Nebraska comes here and presents to the Senate a project to do what? In the first place, to spend millions—$37,000,000, I think—of the people's money to build another dam 300 miles up the river, to develop more power, and then the joint resolution he presents to us proposes not alone to do those experimental things in the production of fertilizer that were talked about before, but actually to go into the business of manufacturing and selling fertilizer.

I think the junior Senator from Maryland [Mr. TYDINGS] was a little intemperate in the way he placed the thing before the Senator from Nebraska, but any one of us must ask the question, Is the Government of the United States going deliberately into the manufacture of fertilizer? I am willing to go with the Senator to any length in the way of experimentation, to develop a system of fixing nitrogen, a process of making fertilizer, but this measure, as I read it, is a proposal that the Government of the United States shall go into the fertilizer business, actually to manufacture it and sell it in large quantities to the people of this country.

Furthermore, the Senator is proposing an addition to the joint resolution which makes necessary the sale of more power, because, as he has just represented, the power is not needed for the making of fertilizer. So I contend that we have before us an entirely different measure from the one that went out from the Senate to the House. It is not one to dispose of a white elephant, which is what we have regarded Muscle Shoals. It is not a measure proposing to get rid of that in the most decent way, so as to do the most good for the people by distributing cheap power where it can be used, and providing for experimental work in the production of fertilizer, but we have a proposal now to put the Government into the business of developing more power, and to put the Government into the business of manufacturing fertilizer.

I do not care anything about the propaganda that is put out; I am not interested in it; but if I can read anything in this measure, I can read those two things added to it which were not in it when it went to the House from the Senate. There has been brought back to us by our conferees a joint resolution so utterly different from the one we passed in the Senate that, so far as I am concerned, I am quite in a muddle of mind to know what to do, while last year and the year before I did not hesitate a moment about voting for the bill presented by the Senator from Nebraska.

Mr. SMITH. Mr. President, it seems to me there is quite a bit of confusion about what this measure really intends and what the entire legislation intended. Let me state right at the beginning that there is not a fertilizer-manufacturing plant in America but that would welcome an additional source of nitrogen. There is not a plant in America that produces one-twentieth the amount of nitrogen that is demanded. We import from Chile, and support the Chilean Government by that importation, in order to supply not only the farmers of the country with the nitrogen essential to producing our crops but with the nitrogen essential to the manufacture of explosives for the defense of this country.

We have not a natural source of supply of nitrogen in America. The little adventitious sources from which we get it are the by-products of the coke ovens. It is obtained from certain forms of vegetable matter. But outside of those sources there is no source in all of this great country from which we could get the nitrogen for the defense of the country or with which to make crops, and we must go to Chile for it.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. TYDINGS. That may be the intention of the bill, but I would like to read this paragraph——

Mr. SMITH. I understand the bill. Just wait a moment.

Mr. TYDINGS. Let me read one paragraph.

Mr. SMITH. No; I am not going to yield now for the reason that I want to call the attention of the Senate to the intent and purpose of this bill and show that it would not be practicable, would not come within the realm of common sense, for the board that we set up here to go into the manufacture of either of the two ingredients that enter into what is known as a balanced fertilizer. It must be remembered that phosphoric acid is produced from the phosphate rocks that are found in unlimited quantities in Tennessee, in Florida, and in South Carolina.

It is a simple process of grinding the phosphate rock to a powder in mill rocks, treating it with sulphuric acid, and then we have phosphoric acid. They make it in such abundance and so cheaply that it is shipped with the freight added and sold at $8 and $9 a ton. It is complete. It is ready for use. Wherever phosphoric acid is indicated for a crop or for the use of agriculture it is ready for use at a price that is practically negligible. Potash is imported in unlimited quantities from Germany, and so cheap is the commercial or fertilizer form of it that it is brought over in ballast and sold in this country at $8 or $9 a ton. So we are not concerned about potash or phosphoric acid. We have it in unlimited quantities and abundance.

But the element of nitrogen is a different matter.

In order that Senators may appreciate the necessity for it and the relative cost of it, let me say that kainit, the form in which we get potash, is 16 per cent pure potash. The balance is a salt which has no fertilizing properties, but is not deleterious to the soil. "Phosphoric acid" is as high as 19 per cent pure phosphoric acid. That also is in a carrier that does not add anything to the fertility of the soil, but it is not deleterious to the plant. Remember, they are from 15 to 19 per cent pure, and the cost, on an average, is about $9 a ton.

Chilean nitrate averages about 14.5 per cent nitrogen and costs $60 a ton, or at the rate of $100 to $125 per ton of fertilizer.

Mr. BRUCE. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. BRUCE. May I remind the Senator that he signed the conference report which commits the Government to the business of manufacturing whole fertilizer?

Mr. SMITH. Just let me come to that in my own way. When I introduced the original bill upon all of which this legislation has been founded, it was for the purpose of utilizing the discoveries of science in extracting nitrogen from the air and to make this country independent of importation from a foreign country. The House struck out of the bill one portion of it that referred to a mixed fertilizer. It would not be profitable in any sense of the word for the Government to proceed to make a mixed fertilizer at Muscle Shoals, unless as the Senator from Nebraska [Mr. NORRIS] has indicated, except as an experimental thing in producing a carrier for the nitrogen. They could not improve upon the process now. It is so simple, so direct, so cheap, that it would not be necessary to set up any machinery at all. The fact of the business is that kainit is nothing in the world but evaporated salts pumped from the mines in Germany. There is no processing it at all and there is scarcely any in the production of phosphoric acid.

The proposition here is, and the one that controlled the conference was, that as cyanamide had been tried by the farmers it would scorch the plant; it would affect the hand so that it could not be used directly from the plant to the farmer. Necessarily it had to be taken, as nitric acid would be taken, in its raw form and combined with other ingredients at a factory or a mixing plant in order to make it available for the farmer to use. We incorporated in the bill a provision that was practically the same as in the House bill, that the nitrogen produced at Muscle Shoals should be put in some form, like nitrate of soda or sulphate of nitrogen or phosphate of nitrogen, that would be easily and readily available for the farmer to use without injuring the crop and without injuring the individual who put it out on the crop or on the land.

I want to impress on every Senator present that there is nothing in the bill that could in any way jeopardize an existing fertilizer-manufacturing plant for that reason.

Mr. BRUCE. Mr. President——

Mr. SMITH. The main object of the bill is for the production of nitrogen——

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. SMITH. I would be perfectly willing——

Mr. BRUCE. Mr. President, will the Senator yield?

Mr. SMITH. Just a moment, until I finish my sentence. I would be perfectly willing, and I think it would answer every purpose of the farmers of the country, to provide for the production of nitrogen in such form as to be readily available and directly possible of application on the soil, without ever naming fertilizer.

Mr. TYDINGS and Mr. BRUCE addressed the Chair.

The VICE PRESIDENT. Does the Senator from South Carolina yield; and if so, to whom?

Mr. SMITH. I yield first to the senior Senator from Maryland.

Mr. BRUCE. Now the Senator, if I may say so, is getting back to the bill as it should be, but not to the bill as it is. In reading the conference report I find, among other things:

SEC. 5. The board is hereby authorized and directed (a) to operate existing plants, to construct, maintain, and operate experiment or production plants at or near Muscle Shoals for the manufacture, distribu-

tion, and sale of fertilizer or any of the ingredients comprising fertilizer.

There is the full power, to use the commercial expression, to manufacture the full fertilizer—that is to say, fertilizer with the ingredients of phosphoric acid and nitrogen and potash—or any of the ingredients comprising fertilizer; that is to say, potash or phosphoric acid or nitrogen separately considered.

Mr. SMITH. I will state to the Senator that that was in the original bill which was passed by the Senate, word for word. That is the identical language of the bill as it was passed by the Senate before.

Mr. BRUCE. But now the conferees have retained it.

Mr. SMITH. They have retained it. The argument made when the bill was on its passage in the Senate was that experimentation had been made by the Government in order to utilize certain phosphate rock that had a very high percentage of iron, which lay within the regions that needed phosphoric acid, and that the Government, at its experimental stations, had found a process by which phosphate rock that was high in iron percentage could be converted into phosphoric acid by a new process which otherwise rendered the phosphate rock useless, because it was known by actual experimentation that the phosphate rock which was high in iron percentage would neutralize the sulphuric acid, and we would get no phosphoric acid, and the large beds that were conveniently located were abandoned. But the Government found a process by which, in a superheated oven, they could put the phosphate rock and by also putting into that superheated oven just common road sand they would get a form of phosphoric acid.

Mr. BRUCE. Mr. President, may I interrupt the Senator a moment further?

Mr. SMITH. I yield.

Mr. BRUCE. Let me call the Senator's attention to the fact that the conference measure goes much further than that. It not only authorizes the Government to engage in the manufacture, distribution, and sale of complete fertilizer but, indeed, if the Government plants do not produce a sufficient supply of complete fertilizer to satisfy the agricultural needs, even to contract with commercial producers for the production of such fertilizers as may be needed in excess of that produced in Government plants. I think the Senator must have been half asleep when he attached his signature to the conference report, although he is very wide awake now, I must admit, and is indicating far more familiarity with the processes of making fertilizer than any of the rest of the Senators who have spoken.

Mr. SMITH. If the Senator had been dependent for his livelihood on the application of artificial fertilizer to the soil and, when he had made his crop, would have to give about all his crop brought him to pay for the fertilizer and just had the privilege of retaining enough to keep alive, he would have been pretty familiar with the processes, too.

I am not alone in that; there are millions in my condition. I will say that 50 per cent of the average producers of staple crops on the Atlantic seaboard make a bare living out of the land which they own and on which they pay taxes; the remainder of their income goes to the fertilizer account. I will challenge any man from Georgia, North Carolina, South Carolina, or Florida to gainsay that statement. When it is realized that under the present price of nitrogen it costs from $10 to $15 to fertilize an acre of land the burden that is upon the farmers of the Atlantic seaboard can be appreciated. We get Chilean nitrate at practically a reasonable price as to cost shipside in Chile, but when it reaches the farmer its price is almost prohibitive. It was for that reason that the original bill in regard to the use of Muscle Shoals was introduced.

Now coming back to the suggestion of the Senator from Maryland, we are trying to find a process by which we can save, as I recall, something like $50,000,000 or $60,000,000 a year, which we pay in freight on what is called filler. When it is realized that only 16 per cent of a ton of acid is acid phosphate, that in a ton of nitrate of soda only 16 per cent, or 16 pounds to the hundred, is actual fertilizer, and that the same proportion holds as to potash, it can be understood that when we are paying $2.50 freight we are paying it for about 300 pounds of actual plant food and for 1,700 pounds of dirt.

Who is going to pay the overhead work and the other expenses in order to develop a process by which the pure salt of acid phosphate, the pure salt of potash, and the pure salt of the nitrogen can be so combined and prepared that, as the Government in its experiment station has actually demonstrated, there can be obtained 1,900 pounds out of a short ton of pure actual plant food, thus saving the freight on 1,700 pounds of dirt?

We tried to make the Muscle Shoals joint resolution as broad and as liberal as possible, looking toward the solution of the problem which, unsolved, is resulting in the impoverishment of every farmer. I state here and now that if the farmers could obtain the same price for their market crops that they now get and their fertilizer bill could be cut in two, it would spell prosperity to the entire South. Take the fertilizer bills and see what a large percentage of the proceeds of the crop of the farmers on the Atlantic seaboard goes into the coffers of the Fertilizer Trust and of the railroads.

Does the Senator from Maryland and do my colleagues not think it is worth the while of the Government to experiment in its laboratories with blowpipe, test tube, and retort so as to help solve the problem that is bearing down on American agriculture in connection with the fertilization of the soil? As the Senator from Nebraska said, when we shall have discovered a process that will solve the problem, then it will be open to every fertilizer plant to take advantage of what the Government has ascertained, to produce fertilizer in concentrated form, and to eliminate the tremendous expense involved in hauling the filler or the dirt.

Mr. GLASS. Mr. President——

The PRESIDING OFFICER (Mr. GEORGE in the chair). Does the Senator from South Carolina yield to the Senator from Virginia?

Mr. SMITH. I yield.

Mr. GLASS. I do not understand that anybody is especially objecting, or objecting at all, to experimentation. That is what I understood I was voting for when I voted for the Senate joint resolution. I may have been misinformed, or, rather, I may not have completely informed myself; but I distinctly understood that what I was voting for was, primarily, a power measure and incidentally a measure to provide for scientific experimentation by the Government in producing nitrogen in a sufficient quantity to relieve the distress of farmers who are compelled to use fertilizer. I did not dream that I was voting for a measure to put the Government into the business of commercially producing and commercially buying and commercially selling complete fertilizer.

Mr. SMITH. That is exactly what the Senator voted for; we have not changed a word. I say that is exactly what the Senator voted for; I mean the language that he is interpreting to mean that is still in the joint resolution. I frankly admit that the language seems to indicate what the Senator suggests, if portions of the measure be considered alone; but if he will read the entire joint resolution and correctly appraise the expressions contained in the different paragraphs, I think the Senator will agree with me and agree with the Senator from Nebraska that the joint resolution provides for such experimentation as he has in mind. It sanctions experimentation and it also mentions production and sale; but those are necessary incidents if any amount of the product is to be accumulated under any system of experimentation. However, the joint resolution goes still further and says that whenever a process shall have been developed the ingredient shall be sold, which means, as it did in my original bill and as I think it does in the pending measure, that whenever they have developed a process by which a nitrogenous substance can be produced to meet the needs of the farmers, that it shall be sold in the quantities in which it is produced.

Now, let me call the attention of the Senator from Virginia to the fact that if we were to provide sufficient nitrogen to furnish every farmer in America with it we would not come in competition with a single commercial plant.

Mr. GLASS. May I ask the Senator why we did not confine this experimental process to the production of nitrogen? I should have attempted to do that in the Senate had I been as alert about this matter as I am attempting to be this evening; but is it not a fact that the House did do that—that the House did strike out this language which now may be interpreted into a movement to put the Government commercially into the fertilizer business?

Mr. SMITH. We thought so until the joint resolution came over, and there was in the House joint resolution language that you will find here that is almost a duplicate of the Senate language about the manufacture of fertilizer.

May I say to the Senator from Virginia—now, this is a fact, and "honest confession is good for the soul"—that a good many of those who framed this bill did not differentiate between nitrogen and fertilizer. They thought they were synonymous terms. A good many of them did understand the difference; and those that did not and those that did had no common meeting ground, and they have used the terms interchangeably throughout this bill—"fixed nitrogen," "fertilizer," "fixed nitrogen."

Individually, I should be perfectly willing to take this conference report, rather than see it fail, and wherever the word "fertilizer" appears, strike it out and insert "nitrogen," and

then state that that nitrogen should be put in such form that it would be easily available and practical for use on soils and do violence to nobody, because, as I say, the aim and object of this entire joint resolution and of the original joint resolution, of which I had the honor to be the author, was to furnish an abundance of nitrogen because it is the sine qua non of fertilization.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. SMITH. Yes.

Mr. TYDINGS. The Senator would also be in favor, would he not, of striking out, in connection with what he has just said, this paragraph:

To contract with commercial producers for the production of such fertilizers or fertilizer materials as may be needed in the Government's program of development and introduction in excess of that produced by Government plants.

Mr. SMITH. Let me state right here and now that, rather than jeopardize what I know is necessary for agriculture, I should be perfectly willing, rather than lose this opportunity to help solve their problems, in a half dozen lines—I took my pen to-night——

Mr. TYDINGS. I was going to say that I would offer an amendment to that effect if I felt the Senator and his conferees——

Mr. SMITH. We can not amend a conference report.

Mr. TYDINGS. No; we can instruct, however.

Mr. SMITH. The only thing we could do would be to instruct the conferees along this line; and there are only seven places that we would have to touch.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. COPELAND. This is what the Senator has in mind, is it not—that, instead of providing for the manufacture of fertilizer, he would make use of this magnificent plant for the fixation of nitrogen?

Mr. SMITH. Yes.

Mr. COPELAND. Because we have to import our nitrogen.

Mr. SMITH. Yes.

Mr. COPELAND. We have no place to get it.

Mr. SMITH. No.

Mr. COPELAND. Then if the Government should go into the business of making nitrogen, every fertilizer concern in the country would rejoice because it would have a source of supply.

Mr. SMITH. Why, of course.

Mr. COPELAND. Why did not the conferees do that?

Mr. SMITH. Mark this, Mr. President: We have not put a word in this conference report that was not in either the Senate joint resolution or the House joint resolution.

Mr. COPELAND. Yes.

Mr. GLASS. But did not the House take out some words, and those words to which some of us are now objecting?

Mr. SMITH. It did not.

Mr. GLASS. I understood that the House confined the operation of the plant, aside from the power that it would afford, and its distribution, to the process of producing nitrogen.

Mr. SMITH. That must have been their intent; but they struck it out in one line and, as the Senator from Nebraska will bear me out, they left the word "fertilizer" and the use of it in the entire House joint resolution.

Mr. GLASS. Then why did not you gentlemen in conference strike it cut, and avoid the very controversy which you are encountering now?

Mr. SMITH. For the simple reason that there did not appear to be a fixed determination on the part of the House. They did not have a roll call, and we were not in a position to know just exactly what was their attitude; but I will say to the Senator from Virginia, as I said to the conferees, that if you will so frame this measure, if that is the wish of the House—it was my intent and purpose from the beginning—if you will so word this measure as to devote Muscle Shoals, and, if necessary, every ounce of horsepower, to the production of nitrogen, and that nitrogen in such form that it can be immediately available and usable for the farmer, individually, I would welcome such a thing.

Mr. GLASS. But that would be a chemical impossibility. It would be a physical impossibility to produce nitrogen at Muscle Shoals that would be readily available for the farmer to put immediately on his land without mixture with phosphate.

Mr. SMITH. Mr. President, I use it right now, and if the Senator from Virginia is a farmer he uses it, without any mixture whatever with anything else, if he gets it in the form of a salt. Now, mark you, the nitrate of soda that we import from Chile has a soda matrix that has no fertilizer property, but does put the nitrogen in such form that it can be handled. They have a process by which they can combine it with a material that is a good carrier, and makes it readily available.

What I was driving at is this: I do not want them, under the joint resolution, to go down there and produce nitrogen in the form of a liquid that is extremely inflammable and dangerous to handle. They could meet every requirement of the joint resolution by producing so many tons of nitrogen in a form that would be practically useless to a farmer; but if they will combine it with certain forms of earth in a reasonable amount they can crystallize it so that you have nothing but nitrogen, but in a form that is practical and available for use on the farm.

Mr. GLASS. But, I ask the Senator, to do that is it necessary to put the Government commercially in the fertilizer business?

Mr. SMITH. No.

Mr. GLASS. That is what I am afraid this joint resolution does as reported from the conference committee.

Mr. SMITH. I think the Government ought to go into the nitrogen business commercially. Chile is in it, and we have no plant. When we have gone through the experimental stages and have developed a process by which nitrogen can be produced in abundance to meet the needs of American agriculture, when the cost and a reasonable profit shall have been ascertained, I shall not object to the Government leasing the plant for promulgating the process in every State in the Union; but I do not think we ought to spend $200,000,000 in trying to solve a problem for the benefit of agriculture and now scrap it, and either leave it as a power plant or turn it over to individuals who may or may not develop the process.

Mr. GLASS. Neither do I.

Mr. SMITH. Very well. I am glad the Senator agrees with me.

Mr. GLASS. What I am concerned about now is my own consistency here in the Senate.

I voted for the Senate joint resolution with the understanding that it was primarily a power project, and, incidentally, a project in connection with which the Government would be charged to produce nitrogen in sufficient quantities to relieve the agricultural condition in the country with respect to fertilizer; but I never dreamed of voting for a joint resolution that would actually put the Government into the commercial business of buying, mixing, and selling fertilizer.

Mr. SMITH. Let me ask the Senator a question. The Senator would be perfectly willing to vote for a measure that would put the Government into the manufacture of nitrogen from the air at Muscle Shoals to the fullest possible extent, experimenting as it produced it in order to develop a process by which it would be practical and commercial?

Mr. GLASS. Well, yes; but I would not be frank with the Senator should I not state that I have never had one particle of faith in the suggestion that that could be effectively done or would be effectively done at Muscle Shoals, although I am perfectly willing, as an incident to the operation of the Government property there, to experiment with that.

RECESS

The PRESIDING OFFICER. The hour of 10.30 o'clock having arrived, the Senate, under its order of to-day, will stand in recess until 12 o'clock noon to-morrow.

Thereupon (at 10.30 o'clock p. m.) the Senate, under the order previously entered, took a recess until to-morrow, Wednesday, May 23, 1928, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate May 22 (legislative day of May 3), 1928

POSTMASTERS

ARIZONA

June S. Haymond to be postmaster at Claypool, Ariz., in place of J. S. Haymond. Incumbent's commission expires June 6, 1928.

Robert B. Anderson to be postmaster at Clifton, Ariz., in place of R. B. Anderson. Incumbent's commission expires May 24, 1928.

COLORADO

Sherman Bohnet to be postmaster at Somerset, Colo., in place of Sherman Bohnet. Incumbent's commission expired February 11, 1928.

Arch J. Miller to be postmaster at Wray, Colo., in place of J. W. Hultquist, removed.

HAWAII

Antone Silva to be postmaster at Hawi, Hawaii, in place of Antone Silva. Incumbent's commission expires June 5, 1928.

William K. Kelii to be postmaster at Wahiawa, Hawaii, in place of W. K. Kelii. Incumbent's commission expires June 5, 1928.

ILLINOIS

William Georger to be postmaster at New Baden, Ill., in place of William Georger. Incumbent's commission expires June 6, 1928.

Harry B. Potter to be postmaster at Marshall, Ill., in place of J. W. Lewis. Incumbent's commission expired January 7, 1928.

Hiram B. Rutherford to be postmaster at Newman, Ill., in place of H. B. Rutherford. Incumbent's commission expires June 6, 1928.

Kate M. Weis to be postmaster at Teutopolis, Ill., in place of K. M. Weis. Incumbent's commission expires May 23, 1928.

Leon M. Shugart to be postmaster at Pontiac, Ill., in place of C. W. Ong. Incumbent's commission expired January 7, 1928.

INDIANA

T. M. Long to be postmaster at Butler, Ind., in place of R. C. Campbell. Incumbent's commission expired February 29, 1928.

Cora Lucas to be postmaster at New Haven, Ind., in place of Willard Lucas, deceased.

KENTUCKY

Howard C. Pentecost to be postmaster at Corydon, Ky., in place of H. C. Pentecost. Incumbent's commission expired February 29, 1928.

Clyde S. England to be postmaster at Russell, Ky., in place of C. S. England. Incumbent's commission expired May 12, 1928.

MAINE

Linwood B. Jones to be postmaster at Winthrop, Me., in place of L. B. Jones. Incumbent's commission expires June 6, 1928.

MARYLAND

George S. Stevens to be postmaster at Millington, Md., in place of G. S. Stevens. Incumbent's commission expired January 7, 1928.

Elmore H. Owens to be postmaster at Perryville, Md., in place of E. H. Owens. Incumbent's commission expired January 7, 1928.

Clare N. Payne to be postmaster at Preston, Md., in place of C. N. Payne. Incumbent's commission expires June 4, 1928.

MASSACHUSETTS

James J. Murtaugh to be postmaster at Hopkinton, Mass., in place of J. J. Murtaugh. Incumbent's commission expires June 5, 1928.

Fred W. Trasher to be postmaster at Marblehead, Mass., in place of F. W. Trasher. Incumbent's commission expires May 22, 1928.

MINNESOTA

Ralph G. Hosfield to be postmaster at Medford, Minn., in place of R. G. Hosfield. Incumbent's commission expired March 3, 1927.

MISSISSIPPI

Blanche J. Whittington to be postmaster at Tutwiler, Miss., in place of J. L. Donald. Incumbent's commission expired February 14, 1927.

MISSOURI

Fred Robinette to be postmaster at Bolckow, Mo., in place of O. P. Pettigrew. Incumbent's commission expired March 14, 1928.

John L. Wilkinson to be postmaster at Piedmont, Mo., in place of S. S. Freeman. Incumbent's commission expired January 14, 1928.

Lester C. Boyles to be postmaster at Urich, Mo., in place of L. C. Boyles. Incumbent's commission expires June 5, 1928.

Louis N. Walker to be postmaster at Holmes Park, Mo. Office became presidential January 1, 1928.

NEBRASKA

Carl P. Smiley to be postmaster at Beaver Crossing, Nebr., in place of C. P. Smiley. Incumbent's commission expires June 6, 1928.

J. Ned Allison to be postmaster at Gering, Nebr., in place of J. N. Allison. Incumbent's commission expires June 6, 1928.

Lewis L. Swindell to be postmaster at Mascot, Nebr., in place of C. B. Grace, resigned.

Given G. Reber to be postmaster at Naper, Nebr., in place of C. E. Putnam, removed.

NEW YORK

Clarence E. Snyder to be postmaster at Glenfield, N. Y., in place of C. E. Snyder. Incumbent's commission expired May 5, 1928.

William L. Froehley to be postmaster at Hamburg, N. Y., in place of W. L. Froehley. Incumbent's commission expired January 8, 1928.

Manford J. Pfister to be postmaster at Great Bend, N. Y. Office became presidential July 1, 1926.

NORTH CAROLINA

George A. Woods to be postmaster at Nazareth, N. C., in place of G. A. Woods. Incumbent's commission expired December 4, 1926.

OHIO

Jerome H. C. Goodhart to be postmaster at Brewster, Ohio, in place of J. H. C. Goodhart. Incumbent's commission expires May 24, 1928.

William A. Ray to be postmaster at Mount Sterling, Ohio, in place of W. A. Ray. Incumbent's commission expires June 5, 1928.

Rufus A. Borland to be postmaster at West Jefferson, Ohio, in place of R. A. Borland. Incumbent's commission expired March 1, 1928.

OKLAHOMA

Louis G. Scott to be postmaster at Stroud, Okla., in place of L. G. Scott. Incumbent's commission expired January 14, 1928.

Jeane H. Sisson to be postmaster at Mounds, Okla., in place of J. W. Evans, removed.

PENNSYLVANIA

Mary K. Schambach to be postmaster at Beaver Springs, Pa., in place of M. K. Schambach. Incumbent's commission expired March 22, 1928.

Mertie T. Hallett to be postmaster at Devon, Pa., in place of M. T. Hallett. Incumbent's commission expires June 6, 1928.

John P. Rodger to be postmaster at Hooversville, Pa., in place of J. P. Rodger. Incumbent's commission expired April 3, 1928.

Wellesley H. Greathead to be postmaster at McConnellsburg, Pa., in place of W. H. Greathead. Incumbent's commission expired January 8, 1928.

James I. Steel to be postmaster at Shamokin, Pa., in place of J. I. Steel. Incumbent's commission expired May 3, 1928.

William H. Deppen to be postmaster at Sunbury, Pa., in place of W. H. Deppen. Incumbent's commission expires June 6, 1928.

George N. Turner to be postmaster at Toughkenamon, Pa., in place of G. N. Turner. Incumbent's commission expired January 8, 1928.

SOUTH CAROLINA

Benjamin D. Bedell to be postmaster at Ridgeland, S. C., in place of S. C. Taylor, resigned.

SOUTH DAKOTA

Benjamin D. Kidman to be postmaster at Big Stone City, S. Dak., in place of B. D. Kidman. Incumbent's commission expired December 18, 1927.

Hattie L. Meyer to be postmaster at Florence, S. Dak., in place of H. L. Meyer. Incumbent's commission expired December 18, 1927.

Alton E. Lewis to be postmaster at Henry, S. Dak., in place of A. E. Lewis. Incumbent's commission expired December 18, 1927.

Albert Koehne to be postmaster at Oldham, S. Dak., in place of Albert Koehne. Incumbent's commission expired December 18, 1927.

Albert A. Abel to be postmaster at Selby, S. Dak., in place of Robert Abel. Incumbent's commission expired February 8, 1928.

TENNESSEE

Jesse B. McCasland to be postmaster at Goodlettsville, Tenn., in place of C. S. Waters. Incumbent's commission expired July 31, 1926.

Thomas W. Williams to be postmaster at Lucy, Tenn., in place of T. W. Williams. Incumbent's commission expired March 1, 1928.

Joseph W. Callis to be postmaster at Germantown, Tenn. Office became presidential July 1, 1927.

TEXAS

Emil E. Fahrenkamp to be postmaster at Big Spring, Tex., in place of J. W. Ward, deceased.

WISCONSIN

Castor H. Kuehl to be postmaster at Brillion, Wis., in place of C. H. Kuehl. Incumbent's commission expired January 17, 1928.

Conrad Baetz to be postmaster at Two Rivers, Wis., in place of Conrad Baetz. Incumbent's commission expired January 17, 1928.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 22 (legislative day of May 3), 1928

MEMBER OF FEDERAL RESERVE BOARD

Edmund Platt.

ATTORNEY GENERAL FOR PORTO RICO

James R. Beverley.

UNITED STATES COAST GUARD

To be lieutenants (junior grade)

Clifford D. Feak.
Eugene S. Endom.
Philip E. Shaw.
George N. Bernier.
Leonard M. Melka.
Earle G. Brooks.

To be lieutenants (temporary)

Chester McP. Anderson.
Arthur J. Craig.
Harold B. Adams.
William J. Austermann.
William H. Jacobson.
Edward S. Moale.
Edward W. Holtz.

To be lieutenants (junior grade) (temporary)

Ernest A. Ninness.
Hugh V. Hopkins.
Edward E. Hahn, jr.
William Bowman.
Archibald J. Maclean.
Chester A. A. Anderson.
Ellis P. Skolfield.
Dorian E. Todd.

To be ensigns

Frank K. Johnson.
Chester W. Thompson.
Frederick G. Eastman.
Leslie D. Edwards.
Edwin C. Whitfield.
DeEarle M. Logsdon.
Watson A. Burton.
Walter C. Capron.
Dale T. Carroll.
Samuel F. Gray.
Wilbur C. Hogan.
Kenneth P. Maley.
Leon H. Morine.
Carl B. Olsen.
Earl K. Rhodes.
Thomas M. Rommel.

UNITED STATES MARSHAL

Henry C. W. Laubenheimer to be United States marshal, northern district of Illinois.

APPOINTMENTS, BY PROMOTION, IN THE ARMY

To be major generals

Paul Bernard Malone.
Charles Dudley Rhodes.

To be brigadier generals

Lytle Brown, Corps of Engineers.
Charles Evans Kilbourne, Coast Artillery Corps.
Hamilton Smith Hawkins, Cavalry.

To be colonels

Lorenzo Dow Gasser.
Jennings Benjamin Wilson.
William Oury Smith.

To be lieutenant colonels

Robert Melville Danford.
James Kerr Crain.
Carr Wilson Waller.
Richard James Herman.
Matthew Arthur Cross.

To be majors

James Donald MacMullen.
Ralph Townsend Heard.
Charles Wright Bundy.
Charles Douglas Yelverton Ostrom.
Turner Mason Chambliss.
Donald Malpas Cole.

To be captains

Bernard Clark Dailey.
Eduardo Andino.
Robert Elwyn DeMerritt.
James Franklin Powell.
William Dalton Hohenthal.
James Ralph Lowder.
John Thomas Schneider.

To be first lieutenants

Joseph Ingham Greene.
Abner Judson McGehee.
Valentine Roy Smith.
George William Hartnell.
Joseph Anthony Cella.
James Boyce Carroll.
John Ellsworth Adkins, jr.

POSTMASTERS

ALABAMA

Hugh H. Dale, Camden.
Louie W. Vaughan, Cuba.
Howard F. Little, Linden.
Roy A. Lifsey, Montgomery.
William L. Jones, Parrish.
Alden M. Wallace, Tuskegee.

CALIFORNIA

Belle Hicks, Armona.
Roland L. Curran, Bakersfield.
W. Wallace Watson, Beaumont.
Lola P. Neff, Biggs.
Lula M. Dunn, Capitola.
John H. B. Speer, Delano.
Lola F. Thornton, Durham.
John H. Dodson, El Cajon.
Charles H. Coffey, jr., Gonzales.
M. Earle Adams, Healdsburg.
Lewis E. Leavell, Novato.
William C. Werry, Palo Alto.
Edward A. Baker, Point Loma.
Myrtle H. Turner, Reseda.
Louis P. Miller, Rio Vista.
John H. Strauch, jr., San Gabriel.
Ernest R. Rhymes, Sanitarium.
Earle R. Hawley, Stockton.
Alfred Gourdier, Torrance.
Alexander R. Thomas, Ukiah.
William Braucht, Whittier.
Harry E. Meyers, Yuba City.

COLORADO

John E. Harron, Alamosa.
William V. Kerr, Eads.

ILLINOIS

Secondo V. Donna, Braidwood.
Harold H. Myers, Leaf River.
Edwin B. Gardner, Mazon.
Walter J. Walsh, McHenry.
Daisy F. Lynk, Mokena.
Walter H. Sass, Monee.
Minnie E. Prange, New Douglas.
Wallace G. Harsh, Peotone.
Wallace Leach, Wayne City.

MINNESOTA

Carl H. Schuster, Biwabik.
Harold R. Portmann, Currie.
Nettie A. Perrell, Elysian.
Anthony L. LaFreniere, Grand Rapids.
George E. Van Buren, Le Roy.
Herbert M. Hauck, Mankato.
Sidney D. Wilcox, Park Rapids.
Lillian A. Peterson, Villard.

MONTANA

Wedsel J. Hartman, Broadview.
Oswald M. Johnson, Chinook.
Ray R. Porter, Neihart.
Arnold D. Ferris, Sidney.
Maurice D. Holmes, White Sulphur Springs.

NEBRASKA

Harry E. Welch, Edgar.
Frederick A. Mellberg, Newman Grove.

NEW YORK

Elsie V. Webb, Union Springs.

OKLAHOMA

Helen M. Lutes, Bennington.
Samuel H. Bundy, Bethany.
Hubbard Ross, Fort Gibson.
Chester P. Keil, Fort Towson.
Leslie C. Mendenhall, Seiling.

PENNSYLVANIA

Howard S. Kiess, Blossburg.
George A. Frantz, Confluence.
Lionel W. Stevens, Knoxville.
William M. Overholt, Mount Pleasant.
William Percy, Scottdale.
Ray J. Crowthers, West Elizabeth.
Lewis E. Knapp, Westfield.
Harry A. Garner, Wyomissing.

SOUTH DAKOTA

William R. Amoo, Morristown.
Goodwin L. Hansen, Wasta.

UTAH

John McPhee, Salt Lake City.

HOUSE OF REPRESENTATIVES

TUESDAY, *May 22, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Lord God of Hosts, while the days of our pilgrimage are hurrying by, we thank Thee that Thy merciful providence is attending us. We have beating human hearts that laugh and weep and help us to give daily gladness as we pass by. Bless us with wit to work and with faith to keep us brave and true. Lift all of us above the corroding vices of weakness and fear, for at times they crush our hopes until they bleed. Give us hearts that pass on the praise of Him to those who feel the arrows of distress. Enable us to bear the yoke of service without complaint and to perform our duty in the spirit of a high privilege. When we falter or fail hold us with Thy gentle hand. When sorrow shades the skies of blue let in the azure, that it may gleam once more above the heads on this journey road. Through Christ our Savior. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed with amendments the bill (H. R. 1) entitled "An act to reduce and equalize taxation, provide revenue, and for other purposes," insists upon its amendments, asks a conference with the House of Representatives on the said bill and amendments thereto, and appoints Mr. SMOOT, Mr. MCLEAN, Mr. REED of Pennsylvania, Mr. SIMMONS, and Mr. GERRY to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 3864. An act to create a new division of the District Court of the United States for the Northern District of Texas.

NIGHT WORK IN THE POSTAL SERVICE

The SPEAKER. The first order of business is the consideration of the two veto messages, the consideration of which was postponed until to-day. The first is that of H. R. 5681, to provide a differential in pay for night work in the Postal Service. The question is, Will the House on reconsideration agree to pass the bill, the objections of the President to the contrary notwithstanding?

Mr. GRIEST. Mr. Speaker, on that I move the previous question.

The previous question was ordered.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will bring in absent Members, and the Clerk will call the roll. Those in favor of the passage of the bill, the objections of the President to the contrary notwithstanding, will, when their names are called, answer "yea" and those opposed "nay."

The question was taken; and there were—yeas 320, nays 42, not voting 68, as follows:

[Roll No. 84]

Cole, Md.	Gasque	Perkins	Wurzbach
Connally, Tex.	Goldsborough	Purnell	Yon

So, two-thirds having voted in favor thereof, the bill was passed, the objections of the President to the contrary notwithstanding.

The Clerk announced the following pairs:

On the vote:

Mr. Reid of Illinois and Mr. Oldfield (for) with Mr. Brigham (against).

Until further notice:

Mr. Wood with Mr. Garrett of Tennessee.
Mr. Connolly of Pennsylvania with Mr. Hudspeth.
Mr. Davenport with Mr. Spearing.
Mr. Anthony with Mr. Cole of Maryland.
Mr. Vestal with Mr. Gambrill.
Mr. Graham with Mr. Linthicum.
Mr. Kurtz with Mr. Deal.
Mr. Purnell with Mr. Drane.
Mr. Wurzbach with Mr. Goldsborough.
Mr. Beedy with Mr. Doyle.
Mr. Clancy with Mr. Connery.
Mr. Eaton with Mr. Gasque.
Mr. Hughes with Mr. Fisher.
Mr. Perkins with Mr. Hare.
Mr. Williamson with Mr. Johnson of Oklahoma.
Mr. Bachman with Mr. Whitehead.
Mr. Butler with Mr. Yon.

Mr. Leech with Mr. Sears of Florida.
Mr. Thatcher with Mr. Blanton.
Mr. White of Kansas with Mr. Palmisano.
Mr. Boise with Mr. Bulwinkle.
Mr. Campbell with Mr. Wilson of Mississippi.
Mr. Fish with Mr. Davey.
Mr. Curry with Mr. Moore of New Jersey.
Mr. Bowles with Mr. Connolly of Texas.
Mr. Crail with Mrs. Norton.
Mr. Palmer with Mr. Rayburn.
Mr. Hall of North Dakota with Mr. Underwood.
Mr. Beck of Wisconsin with Mr. Casey.
Mr. Peavey with Mr. Bloom.
Mr. Strother with Mr. Sabath.

Mr. O'CONNELL. Mr. Speaker, I wish to announce the absence of the lady from New Jersey, Mrs. NORTON, on account of illness. If she were here she would vote "aye." Also that my colleague from New York, Mr. BLOOM, who is absent on account of official business, would, if he were present, vote "aye."

Mr. KUNZ. Mr. Speaker, I wish to announce that my colleague, Mr. SABATH, is unable to be present on account of sickness at home. He requested me to announce that he would vote "aye" if he were present.

Mr. JOHNSON of Texas. Mr. Speaker, my colleague, Mr. HUDSPETH, is ill in a hospital. If he were present, he would vote "aye."

Mr. DOUGLASS of Massachusetts. Mr. Speaker, my colleague, Mr. CONNERY, is absent on account of illness in his family. If he were present, he would vote "aye."

Mr. McSWEENEY. Mr. Speaker, I desire to announce that Mr. DOYLE, of Illinois, is unavoidably absent. If he were present, he would vote "aye."

The result of the vote was announced as above recorded.

ALLOWANCES FOR RENT, ETC., FOURTH-CLASS POSTMASTERS

The SPEAKER. The question now arises on House bill 7900, a bill granting allowances for rent, fuel, light, and equipment to postmasters of the fourth class, and for other purposes. The question is, Shall the House on reconsideration agree to pass the bill, the objections of the President to the contrary notwithstanding?

Mr. GRIEST. Mr. Speaker, this bill provides allowances for rent, light, fuel, and equipment for fourth-class postmasters. It was considered very thoroughly by the Committee on the Post Office and Post Roads in the last Congress. It passed the House committee unanimously. It passed the House itself unanimously. It passed the Senate unanimously. It provides for an expenditure of between $2,000,000 and $3,000,000. I move the previous question.

The SPEAKER. The gentleman from Pennsylvania moves the previous question.

The previous question was ordered.

The SPEAKER. Those in favor of the passage of the bill, the objections of the President to the contrary notwithstanding, will, as their names are called, answer "yea"; those opposed will answer "nay."

The question was taken; and there were—yeas 318, nays 46, not voting 66, as follows:

[Roll No. 85]

Mr. Crail with Mrs. Norton of New Jersey.
Mr. Palmer with Mr. Rayburn.
Mr. Beck of Wisconsin with Mr. Casey.
Mr. Peavey with Mr. Bloom.
Mr. Strother with Mr. Sabath.
Mr. Evans of California with Mr. Blanton.
Mr. W. E. Hull with Mr. Gambrill.
Mr. Korell with Mr. Hudspeth.
Mr. Schneider with Mr. Doyle.
Mr. Yates with Mr. Underwood.

Mr. DOUGLASS of Massachusetts. Mr. Speaker, my colleague, Mr. CONNERY of Massachustts, is absent on account of illness in his family. If he were present, he would vote "yea."

Mr. O'CONNELL. Mr. Speaker, I want to make the same announcement for the gentlewoman from New Jersey, Mrs. NORTON, who is absent on account of illness. If she were here, she would vote "yea." My colleague the gentleman from New York, Mr. BLOOM, is absent on official business. If he were present, he would vote "yea."

Mr. IGOE. Mr. Speaker, I want to make the same announcement for my colleague from Illinois, Mr. DOYLE. If he were present, he would vote "yea."

Mr. JOHNSON of Texas. Mr. Speaker, my colleague, Mr. HUDSPETH, is absent on account of illness. If he were present, he would vote "yea."

Mr. ENGLEBRIGHT. Mr. Speaker, if my colleague, Mr. CURRY, of California, had been present, he would have voted "yea" in favor of overriding the presidential veto of both of these measures.

Mr. ZIHLMAN. Mr. Speaker, the gentleman from Michigan, Mr. CLANCY, was called home by the sudden death of his mother. Had he been able to be present, he would have voted "yea" on both of these veto messages.

Mr. SCHNEIDER. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman present and listening when his name was called?

Mr. SCHNEIDER. I was present a part of the time, but did not hear my name called.

The SPEAKER. To qualify, the gentleman must have been present and listening when his name was called.

Mr. SCHNEIDER. I was not present all of the time.

The SPEAKER. The gentleman does not qualify.

Mr. SCHNEIDER. If I had been here, I would have voted "yea."

The result of the vote was announced as above recorded.

Mr. TILSON. Mr. Speaker, I ask unanimous consent that the two messages of the President, just acted upon, be printed as House documents. A number of requests have been made for them, and therefore I ask unanimous consent that the usual number be printed. I understand that the other recent veto messages have not been printed, and I therefore ask unanimous consent to include those also.

The SPEAKER. The gentleman from Connecticut asks unanimous consent that all of the veto messages of the President be printed as public documents. Is there objection?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, is it not rather embarrassing to print the two messages on these two bills?

Mr. TILSON. I have asked that all of them be printed.

Mr. BANKHEAD. Does not the gentleman think we should wait a few days, because, as I understand, some more are coming?

Mr. TILSON. If it is desired to print them as public documents, we can make the request at the time.

The SPEAKER. Is there objection?

There was no objection.

ORDER OF BUSINESS

Mr. TILSON. Mr. Speaker, while there is a goodly attendance of the House present, I wish to ask unanimous consent that Calendar Wednesday business to-morrow be dispensed with.

The SPEAKER. The gentleman from Connecticut asks unanimous consent that Calendar Wednesday business, in order to-morrow, be dispensed with. Is there objection?

There was no objection.

THE REVENUE BILL

Mr. HAWLEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table H. R. No. 1, an act to reduce and equalize taxation, provide revenue, and for other purposes, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. The gentleman from Oregon asks unanimous consent to take from the Speaker's table House bill No. 1, disagree to the Senate amendments, and agree to the conference asked by the Senate. Is there objection?

There was no objection.

The SPEAKER appointed the following conferees: Messrs. HAWLEY, TREADWAY, BACHARACH, GARNER of Texas, and COLLIER.

POSTAL RATES

Mr. GRIEST. Mr. Speaker, I present a conference report on H. R. 12030, to amend Title II of an act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes, for printing under the rule.

PROTECTION OF FISH IN THE DISTRICT OF COLUMBIA

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent for the present consideration of a resolution, which I send to the Clerk's desk.

The SPEAKER. The gentleman from Maryland asks unanimous consent for the present consideration of a resolution, which the Clerk will report.

The Clerk read as follows:

House Resolution 218

Resolved, That the Senate be requested to return to the House of Representatives the bill (S. 2972) entitled "An act for the further protection of fish in the District of Columbia, and for other purposes."

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

FORT PECK INDIAN RESERVATION, MONT.

Mr. LEAVITT. Mr. Speaker, by direction of the House Committee on Indian Affairs I call up the bill (S. 3593) to authorize the leasing or sale of lands reserved for agency, schools, and other purposes on the Fort Peck Indian Reservation, Mont., which is on the House Calendar.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized to lease or sell any of the tribal lands on the Fort Peck Indian Reservation, Mont., the lands that were reserved and title thereto reinvested in the Indians by the act of March 3, 1927 (44 Stat. L. 1402), and now reserved for agency, schools, and other purposes, upon such terms and conditions as he may prescribe with the consent and approval of the Indians through the general council of the Fort Peck Indians in the State of Montana at general council meeting when duly called and assembled: *Provided*, That no part of said tribal lands shall be sold until the Secretary of the Interior shall determine that said lands are no longer required for such purposes with the consent and approval of the said general council, and in case of the sale of said tribal lands the mineral rights, including oil, gas, and other minerals, shall be reserved to the Fort Peck Indians: *Provided, however*, That this act shall not be construed to make any such tribal lands available for allotment purposes: *Provided further*, That the proceeds derived from the sale or lease of said tribal lands shall be deposited in the Treasury of the United States to the credit of the Fort Peck Indians under the title of "Fort Peck 4 per cent fund," and shall be subject to disposition under the act of May 30, 1908 (35 Stat. L. 558).

With the following committee amendment:

On page 2, line 9, strike out "*Provided, however*, That this act shall not be construed to make any such tribal lands available for allotment purposes."

The committee amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

ELLA G. RICHTER

Mr. MORIN. Mr. Speaker, by direction of the Committee on Military Affairs, I ask unanimous consent to take from the Speaker's table the bill (H. R. 2808) for the relief of Ella G. Richter, daughter of Henry W. Richter, with Senate amendments, and agree to the Senate amendments.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the Senate amendments.

The Senate amendments were agreed to.

CONQUEST OF THE NORTHWEST TERRITORY

Mr. LUCE. Mr. Speaker, I call up the conference report on the joint resolution (S. J. Res. 23) providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779,

and ask unanimous consent that the statement may be read in lieu of the report.

Mr. CELLER. Mr. Speaker, reserving the right to object, I would like to ask the chairman a question.

Mr. GARNER of Texas. Mr. Speaker, what is the request?

The SPEAKER. That the statement may be read in lieu of the report.

Mr. GARNER of Texas. It is a privileged matter and may be called up at this time?

The SPEAKER. Yes.

Mr. GARNER of Texas. The gentleman merely asks that the statement may be read in lieu of the report.

Mr. RANKIN. Reserving the right to object, Mr. Speaker, what bill is this?

The SPEAKER. The Clerk will report the resolution.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection?

Mr. CELLER. Mr. Speaker, reserving the right to object, may I be permitted to ask the chairman a question? I understand we have passed a number of bills providing for memorials, not necessarily like the one in the instant case, but we passed one in 1927 providing a monument to Albert Gallatin, but nothing has as yet been done toward the erection of that statue, which was to be erected near one of the entrances to the Treasury Building as a companion piece to the Alexander Hamilton monument. I would like to know whether the chairman or his committee knows anything with reference to what has been done with respect to carrying out the provisions of that statute?

Mr. LUCE. I do not know.

Mr. CELLER. Would it interest the gentleman to know that practically nothing has been done and the whole matter lies dormant; yet we have been on record as stating that we want the monument erected. It was to be raised by popular subscription, but as yet no money has been raised and nothing has been done with reference to the appointment of a sculptor to do the work and no contracts have been let for the foundations for the pedestal or for the erection of the pedestal itself.

Mr. LUCE. I regret I can not inform the gentleman about the matter.

Mr. CELLER. I think it would be well for the committee at least to go into the question because we have done something which has been utterly aborted, and a man whose greatness is as great as that of Albert Gallatin, to whom we were to erect this monument, now has his fame in a sense besmirched by the fact that we have taken no action whatsoever.

Mr. LAGUARDIA. That is not a legislative matter. We can not go out and build the monument.

Mr. CELLER. It shows the futility of passing bills of that nature.

Mr. LAGUARDIA. We can not do any more than pass the law.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the resolution (S. J. Res. 23) entitled "Joint resolution providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House, and agree to the same with an amendment as follows:

Strike out section 1 of the House amendment and insert in lieu thereof the following:

"That there is hereby established a commission to be known as the George Rogers Clark Sesquicentennial Commission (hereinafter referred to as the commission) and to be composed of 15 commissioners, as follows: Three persons to be appointed by the President of the United States; three Senators by the President of the Senate; three Members of the House of Representatives by the Speaker of the House of Representatives; and six members of the George Rogers Clark Memorial Commission of Indiana to be selected by such commission."

And the House agree to the same.

ROBERT LUCE,
RALPH GILBERT,
JOHN C. ALLEN,
F. M. DAVENPORT,
Managers on the part of the House.

SIMEON D. FESS,
R. B. HOWELL,
KENNETH MCKELLAR,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the House to the resolution (S. J. Res. 23) providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the old Northwest to the United States, on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779, submit the following written statement explaining the effect of the action agreed on by the conference committee and submitted in the accompanying conference report.

The resolution as adopted by the House has been agreed on with a revision of section 1, making the number of commissioners 15, reducing to 3 the number of Senators to be appointed by the President of the Senate and Members of the House of Representatives to be appointed by the Speaker of the House of Representatives, and providing for representation on the commission by the George Rogers Clark Memorial Commission of Indiana, which is to select 6 members from among its own membership.

The effect of this amendment will be to give to the Federal commission the benefit of the study given the project by the Indiana commission and to insure the local interest and support necessary in order to carry out the plans most efficiently and promptly.

ROBERT LUCE,
JOHN C. ALLEN,
FREDERICK M. DAVENPORT,
RALPH GILBERT,
Managers on the part of the House.

Mr. LUCE. Mr. Speaker, the statement tells the whole story.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

DEATH OF DR. HIDEYO NOGUCHI

Mr. CELLER. Mr. Speaker, I ask unanimous consent to address the House for two minutes.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CELLER. Mr. Speaker, I desire to call the attention of the Members of the House to the fact that there died yesterday at Accra, in the Gold Coast Colony, in Africa, Dr. Hideyo Noguchi, a great Japanese bacteriologist, who came to this country in 1900 and pursued his labors and bacteriological studies at the Carnegie Institute, University of Pennsylvania, and the Government Institute for Infectious Diseases. At the time of his death Doctor Noguchi was associated with the Rockefeller Institute.

I call attention to his death because he died a peace-time hero, a martyr to the virulence of the germ of yellow fever, to the study of which and to the isolation of which he devoted his life. In pursuing his studies and researches he contracted the disease of which he died. With great Spartan courage and stoicism, he experimented upon himself. He ranks with men like Metchnikoff and with Pasteur.

He was the discoverer of many serums by which he revolutionized the treatment of rabies, rattlesnake bite, and infantile paralysis. One of his noteworthy achievements was the isolation of the germ that causes trachoma. Last Saturday the American Medical Association awarded him a silver medal for his discovery of the germ causing the dreadful trachoma.

He has been the recipient of many decorations from governments the world over—Denmark, Japan, Sweden, Spain—for his

medical discoveries and serums that did so much to alleviate human suffering and pain.

He was a credit to the great nation, Japan, that gave him birth. He added luster to the American institutions with which he had been associated.

Let me read a brief paragraph from an ironic letter he wrote recently from Africa when he was hovering near death from the horrible yellow-fever germ: "Suppose I discovered the cause of this dread disease? The irony of it all is that I probably have it."

You will agree with me that peace has her victories no less renowned than war. Here is a glowing example of a great peace-time hero. It is meet for us to pause in our labors and pay homage to this good man, whose life was one of continuous service to us all. Although a great Japanese doctor, he was no stranger, indeed, within our gates. For 28 years he lived with us. The United States shares with Japan the glory of his work and achievements.

Benefactor of mankind, he laid down his life in line of duty to the great profession of medicine, which he enobled. His sacrifice and his voluntary going through the valley of the shadow is as inspiring and sublime as the heroism of any soldier on the field of battle.

He has left, indeed, "footprints on the sands of time." The world has immeasurably benefited by his having lived among us.

Mr. SIROVICH. Mr. Speaker, I ask unanimous consent to speak for five minutes on the same subject.

The SPEAKER. The gentleman from New York asks unanimous consent to address the House for five minutes. Is there objection?

Mr. SNELL. Reserving the right to object, I am sorry, but we have an important matter to take up, the Boulder Dam bill with eight hours' general debate, and I wish the gentleman would withhold until some other day.

Mr. SIROVICH. Mr. Speaker, I withdraw my request.

FRANK HARTMAN

Mr. HILL of Washington. Mr. Speaker, by direction of the Committee on the Public Lands I ask unanimous consent to take from the Speaker's table the bill (H. R. 6569) for the relief of Frank Hartman with a Senate amendment and agree to the Senate amendment.

The SPEAKER. The gentleman from Washington asks unanimous consent to take from the Speaker's table the bill (H. R. 6569) with a Senate amendment and agree to the Senate amendment.

The Senate amendment was read.

The Senate amendment was agreed to.

BRIDGE ACROSS RED RIVER AT GARLAND, ARK.

Mr. DENISON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 8926) granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across Red River at or near Garland City, Ark., with Senate amendments and agree to the Senate amendments.

The SPEAKER. Is the gentleman authorized by his committee?

Mr. DENISON. I am.

The Senate amendments were read and agreed to.

Mr. DENISON. Mr. Speaker, by direction of the Committee on Interstate and Foreign Commerce, I call up the bill (S. 2965) authorizing the State of Indiana, acting by and through the State highway commission, to construct, maintain, and operate a toll bridge across the Wabash River, at or near Vincennes, Ind.

The Clerk read the bill, as follows:

Be it enacted, etc., That in order to promote interstate commerce, improve the Postal Service, and provide for military and other purposes, the State of Indiana, acting by and through the State highway commission, be, and is hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Wabash River, at a point suitable to the interests of navigation, at or near Vincennes, Ind., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon the State of Indiana, acting by and through the State highway commission, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, maintenance, and operation of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The said State of Indiana, acting by and through the State highway commission, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. In fixing the rates of toll to be charged for the use of such bridge the same shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize an amount not to exceed the cost of such bridge and its approaches as soon as possible under reasonable charges, but within a period of not to exceed 10 years from the completion thereof. After a sinking fund sufficient to pay an amount not to exceed the cost of constructing the bridge and its approaches shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls. An accurate record of the cost of the bridge and its approaches, the expenditures for maintaining, repairing, and operating the same, and of daily tolls collected shall be kept and shall be available for the information of all persons interested.

SEC. 5. The act of Congress approved February 13, 1925, authorizing the States of Indiana and Illinois to construct a bridge over the Wabash River at Vincennes, Ind., is hereby repealed.

SEC. 6. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

TO AUTHORIZE OFFICERS OF THE UNITED STATES NAVY AND MARINE CORPS TO ACCEPT DECORATIONS

Mr. BRITTEN. Mr. Speaker, I call up the conference report on the bill (H. R. 5898) to authorize certain officers of the United States Navy and Marine Corps to accept such decorations, orders, and medals as have been tendered them by foreign governments in appreciation of services rendered, and I ask unanimous consent that the statement be read instead of the report.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5898) to authorize certain officers of the United States Navy and Marine Corps to accept such decorations, orders, and medals as have been tendered them by foreign governments in appreciation of services rendered having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, and 11, and from its disagreement to the amendment to the title of the bill, and agree to the same.

FRED A. BRITTEN,
CLARK BURDICK,
CARL VINSON,
Managers on the part of the House.

FREDERICK HALE,
DAVID A. REED,
CLAUDE A. SWANSON,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 5808) authorizing certain officers of the United States Navy and Marine Corps to accept such decorations, orders, and medals as have been tendered them by foreign governments in appreciation of services rendered, submit the following written statement explaining the effect of the action agreed on by the conference committee and submitted in the accompanying conference report as to each of the following amendments, namely:

On No. 1: By the insertion of the word "Army" the Senate amendment merely includes officers of the Army in the following lists of those who are authorized to accept foreign decorations.

On Nos. 2 to 11, inclusive: Designates by name and rank various officers of the Army, Navy, and Marine Corps who are

authorized to accept foreign decorations, and the final paragraph of amendment No. 11 provides further "that all recommendations for decoration by the United States of America now pending before the War Department, Navy Department, or Marine Corps for services rendered during the World War be considered by the proper boards or authorities, and awards made in such cases as the conduct of those recommended shows them to be entitled and deserving of the same."

As all of the Senate amendments are in accord with the original desire of the bill (H. R. 5898), the managers on the part of the House recommend that the House recede from its disagreement to the amendments of the Senate.

FRED A. BRITTEN,
CLARK BURDICK,
CARL VINSON,
Managers on the part of the House.

The conference report was agreed to.

BOULDER DAM

Mr. BURTON. Mr. Speaker, I present a privileged resolution (H. Res. 208) from the Committee on Rules.

The Clerk read as follows:

House Resolution 208

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of H. R. 5773, a bill to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes. That after general debate, which shall be confined to the bill and shall continue not to exceed eight hours, to be equally divided and controlled by those favoring and opposing the bill, the bill shall be read for amendment under the five-minute rule. At the conclusion of the reading of the bill for amendment the committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and the amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. BURTON. Mr. Speaker, I suggest that we have one hour debate on the rule, the time to be equally divided between the gentleman from Alabama [Mr. BANKHEAD] and myself.

The SPEAKER. The gentleman from Ohio asks unanimous consent that one hour be devoted to the discussion of the rule to be equally divided between the gentleman from Alabama [Mr. BANKHEAD] and himself. Is there objection?

Mr. CHINDBLOM. And the previous question be ordered at the end of the hour?

Mr. BURTON. I will add the further request that the previous question be considered as ordered.

The SPEAKER. And that the previous question be considered as ordered at the end of the hour. Is there objection?

There was no objection.

Mr. BURTON. Mr. Speaker, this bill (H. R. 5773) is to provide for the construction of work for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes. The bill includes three major projects. The first is the construction of a dam 550 feet in height at Boulder or Black Canyon on the boundary line between Arizona and Nevada. It is expected that this dam will impound 26,000,000 acre-feet of water, though the bill provides for not less than 20,000,000 acre-feet. The estimated cost of this dam is $41,500,000, but when you compute the interest which would accrue during the time of construction the total cost is figured at $45,000,000.

The second project contemplated is the construction of a power plant at the location of this dam at Boulder or Black Canyon utilizing the water power created at the dam. The construction of the plant is left optional with the Secretary of the Interior, who may instead lease the water power. Five hundred and fifty thousand firm or constant horsepower will be available or 1,000,000 horsepower on a 55 per cent load factor. The estimated cost of installing plants of 1,000,000 horsepower capacity is $31,500,000, which, if you count the interest accruing during time of construction amounts to $35,000,000.

The third project is an all-American canal from the river to the Imperial Valley and Coachella Valley. The estimated cost of the canal is $31,000,000, and the interest during construction would increase the total cost to $35,000,000. That makes the cost of the three projects $45,000,000 for the dam, $35,000,000 for the power plants, and $35,000,000 for the all-American canal, or in all an estimated cost of $125,000,000. The objects sought to be accomplished are these: First, the removal of the flood menace on the lower valley of the Colorado River, which threatens the destruction of large and important communities lying below the level of this channel. The reservoir which is contemplated will hold the flood waters until they can be released at a rate which the river channel can accommodate with safety. The water so stored will guarantee the lower-basin communities against danger, especially the Imperial Valley, which has been in the past very seriously threatened and is now very seriously threatened in case of flood conditions, will furnish a dependable water supply and, by making use of the flood waters in the lower basin, the upper reaches of the river will furnish abundant water for use in the upper basin without encroaching upon prior appropriations below.

I have already stated that it will end a very dangerous situation which now exists in the Imperial Valley. The valley now secures its only water supply by a canal which runs for some 60 miles through the Republic of Mexico. The all-American canal will furnish a substitute for this and at the same time carry the water at an elevation sufficient to make possible the irrigation of additional lands, mostly public. The third object to be secured is to have the flood waters conserved at the dam and reservoir and, besides providing for irrigation needs below, will provide for a much-needed domestic water supply for cities on the Pacific coast located in southern California, of which Los Angeles is the principal community. The dam and reservoir will incidentally create a large amount of hydroelectric power, from the disposal of which the project will be in large part financed. It is still further alleged that the dam will improve navigation for some 200 miles below the dam, and in the reservoir created above for some 50 miles additional. Under the operation of the project the flow of the water below the dam will be regulated and even, and the construction of the dam and such regulation will safeguard interstate commerce and protect the Government property. Several railroads cross the river below the location of the proposed dam, and these railroads are threatened in case of excessive floods. It is further said on behalf of the project that with the flow of the river unregulated the river can not be successfully used as a highway for commerce. In its regulated form it will be susceptible to use by power boats and other small craft. The great reservoir, of course, will be susceptible of navigation. It is further alleged that certain international complications now arising will be largely solved through the construction of the project.

I have given many hours to the consideration of this project. As a member of the Committee on Rules I have listened to arguments pro and con. This proposed Boulder Dam has awakened a very bitter controversy. It has been the subject of long consideration. Notwithstanding the time that I have given to it, I do not feel that I am completely master of the details. I favor the bill. It is a great project. It is beyond the capacity of any private enterprise. It is a matter of the greatest interest to a number of States, to the Government of the United States itself in the protection of its property, and we may say that it is in line with the flood bill for the Mississippi River in that it saves a very large and fertile area from being destroyed by flood, and also makes possible the irrigation of a very large quantity of land at present completely desert.

To show the sharpness of the controversy, I may say that I hope we shall see the light during the discussion on certain questions like this. It is maintained on behalf of the proponents of the bill that a domestic water supply will soon be urgently needed in southern California.

The opponents maintain that not for 50 years will any such need appear. It is maintained on behalf of the advocates of the bill that a very large amount of water power aggregating 1,000,000 horsepower can be disposed of so as to meet the expense. It is maintained in opposition that the demand for additional water power would be a mere bagatelle in comparison with the large quantity that would be created by the construction of the dam. It should be borne in mind that it is an essential part of this plan that the expense of $125,000,000 shall be met by the sale of the power and by the disposition of water created by the dam, so that ultimately there will be no expense to the United States Government which will not be reimbursed. The time of reimbursement has been variously estimated at from 25 years to 50 years. Very careful estimates have been made in this regard. As a feature of the bill which disarms much of the opposition there are two very vital conditions carried in the measure which, in order that they may be thoroughly understood, I shall read. After authorizing the appropriation of $125,000,000, section 4 contains these two very important conditions:

SEC. 4. (a) No work shall be begun and no moneys expended on or in connection with the works or structures provided for in this act, and no water rights shall be claimed or initiated hereunder, and no steps shall be taken by the United States or by others to initiate or

perfect any claims to the use of water pertinent to such works or structures until the States of California, Colorado, Nevada, New Mexico, Utah, and Wyoming shall have approved the Colorado River compact mentioned in section 12 hereof and shall have consented to a waiver of the provisions of the first paragraph of Article XI of said compact, which makes the same binding and obligatory only when approved by each of the seven States mentioned in said section 12, and shall have approved said compact without condition save that of such six-State approval, and until the President by public proclamation shall have so declared.

The States contained in the Colorado River Basin and interested in this project are Wyoming, Colorado, Utah, New Mexico, Nevada, California, and Arizona. A compact has been made which has been at least conditionally approved by six of the States, but the State of Arizona has thus far refused to agree upon it. It is the contention of those favoring the bill that an improvement of such vast importance, the postponement of which will probably result in serious damage or loss, should not be postponed because of the failure of one State to join.

But it is made, however, a condition that six States shall agree upon the conditions set forth in the bill. That is one condition. I may say frankly that perhaps that provision will prevent the coming into effect of this bill.

Then there is a second condition which I shall read, subdivision (b) of section 4:

(b) Before any money is appropriated or any construction work done or contracted for, the Secretary of the Interior shall make provision for revenues, by contract or otherwise, in accordance with the provisions of this act, adequate, in his judgment to insure payment of all expenses of operation and maintenance of said works incurred by the United States and the repayment, within 50 years from the date of the completion of the project, of all amounts advanced to the fund under subdivision (b) of section 2, together with interest thereon.

That includes the $125,000,000 that I have mentioned. So you see, there are two conditions before action is taken; the concurrence of six of the seven States affected; second, the making of a contract by the Secretary of the Interior which shall insure the expense of construction operation and in not more than 50 years the amortization of all expenses incurred in this project.

Mr. Speaker, I reserve the balance of my time.

Mr. DENISON. Mr. Speaker, will the gentleman yield for one question?

Mr. BURTON. Yes.

Mr. DENISON. Can the gentleman advise us briefly as to the contents of the compact?

Mr. BURTON. That will take considerable time. They are set forth in the report of the majority. I think that more appropriately belongs to the general discussion. The compact is set forth on page 32 of the majority report, and inasmuch as it covers three pages of fine print I do not feel like taking the time for it in the discussion of the rule.

Mr. DOUGLAS of Arizona. Can the gentleman state for the information of the House how many States are parties to the compact?

Mr. BURTON. Six, I believe.

Mr. DOUGLAS of Arizona. I think the gentleman is mistaken about that. The entire basin comprises seven States. The basin is divided into the upper and the lower. Four States are in the upper basin and three in the lower. All the States by name are woven into the fabric of the compact, so that it is not accurate to say six States.

Mr. BURTON. I was in error perhaps in this, that the agreement is signed, as I understand it, merely by representatives of the States instead of being ratified by formal approval by the respective States.

Mr. DOUGLAS of Arizona. Then there are seven States made parties to the contract by the terms of the contract.

Mr. THATCHER. Mr. Speaker, will the gentleman yield for a question?

Mr. BURTON. Yes.

Mr. THATCHER. Does the gentleman believe that $125,000,000 will cover the ultimate cost involved?

Mr. BURTON. In regard to the cost of $125,000,000, I can give no opinion upon that. That is the estimate of the engineers of the Reclamation Service and others who have been called in. I would not put my judgment against theirs, or state whether that amount will be sufficient or not.

Mr. THATCHER. That is the estimate?

Mr. BURTON. Yes. It is maintained on the one hand that the estimates of the Reclamation Service have usually fallen below the actual cost. That is an argument to the effect that it will cost more than the $125,000,000. It is maintained on the other hand that by reason of constant improvements in machinery and appliances for doing this class of work the cost of it will be much less than when the estimates were made. The gentleman can weigh the two. The House can weigh the two.

Mr. BRITTEN. Mr. Speaker, will the gentleman yield for a question?

Mr. BURTON. Certainly.

Mr. BRITTEN. Does not the gentleman think that the contract contained in the bill providing for repayment to the Government provides a very substantial protection to the Government?

Mr. BURTON. Certainly.

Mr. CHINDBLOM. Mr. Speaker, will the gentleman yield for another question?

Mr. BURTON. Certainly.

Mr. CHINDBLOM. Does the present proposal contemplate any development of irrigation areas outside of the Imperial Valley?

Mr. BURTON. Oh, yes. There is a very considerable quantity of land below. Much of it, if not most of it, is still owned by the Government.

Mr. CHINDBLOM. When I said "Imperial Valley" I meant the territory below. Does it contemplate any reclamation of land above the reservoir?

Mr. BURTON. I do not think so, at least as far as the immediate result of this improvement is concerned. But there is so much detail in this that I do not feel competent to answer that question.

Mr. SWING. This bill does not contain any authorization of any money for the reclamation of any land. By the storage of the water it makes possible in future time, if Congress sees fit, to reclaim some of this land when there is need for it. But the bill does not undertake to do that at this time.

Mr. CHINDBLOM. I understand that is the intent of the bill; but I want to understand whether those who have promoted this project believe there may be in the future a reclamation by irrigation of land in the upper courses of the river above the dam?

Mr. SWING. That is the reason for the compact. The upper four States, looking forward 50 or 100 years from now, demand that they be given quitclaim deed, so that when they do develop the area above the dam 100 years from now they may have an unquestioned right, no matter what may be done in the meantime, to their share.

Mr. CHINDBLOM. Then future development is contemplated in the upper reaches of the river?

Mr. SWING. I hope it will take place. That is the hope of every patriotic citizen.

Mr. HASTINGS. Mr. Speaker, will the gentleman yield?

Mr. BURTON. Yes.

Mr. HASTINGS. The interest is to be how much?

Mr. BURTON. Four per cent.

I now yield to the gentleman from Alabama [Mr. BANKHEAD], and reserve the balance of my time. How much time have I left, Mr. Speaker?

The SPEAKER pro tempore. The gentleman from Ohio has 7 minutes remaining. The gentleman from Alabama [Mr. BANKHEAD] has 30 minutes.

Mr. BANKHEAD. Mr. Speaker, I yield myself 10 minutes.

The SPEAKER pro tempore. The gentleman from Alabama is recognized for 10 minutes.

Mr. BANKHEAD. Mr. Speaker and gentlemen of the House, like the distinguished speaker who has preceded me, this is a problem to which, for the last five or six years, I have given a considerable amount of attention and study. For a number of years when I first came to Congress I had the honor of serving upon the Committee on Irrigation of Arid Lands, and while I was serving on that committee this great problem of the Boulder Canyon Dam was first initiated and discussed. In addition to that—and this always gives one better information about a proposition of this sort—I had the opportunity several years ago of visiting the location of this improvement and of the area surrounding it, and of seeing at first-hand all of the physical situation involved in this controversy.

I am for this rule and I am heartily in favor of the passage of this committee bill. [Applause.] In the few minutes I have allotted myself I want to state as succinctly as possible the reasons which have led me to support this legislation and to answer at least one of the objections that have been urged against it which, for a while at least, aroused the opposition of some of those gentlemen from my section of the country, the cotton-raising section of the South.

As has been pointed out to you by Senator BURTON and as shown in a report made by former Secretary of the Interior James R. Garfield on this question:

The right of Congress to construct the proposed dam is derived from the commerce clause of the Constitution, its control over the public domain, its control over navigable streams, its obligation to deal with international relations and interests, its powers under the reclamation law, and its rights as a landowner.

So that the Government under the Constitution has a perfect right to deal with this great subject from five different standpoints of jurisdiction, and I want to say to you that all of those propositions are involved in this pending legislation.

I do not know of any bill that has come before the Congress of the United States since I have been here that was not entirely national in its significance which more profoundly relates to important details of the economic, social, and business life of a great section of the country than this does. It involves the interests of the population of seven of our great Western and Southwestern States, not only for the immediate future but for the generations that are to come, particularly with reference to the settlement of the very vexing question of the appropriation of water by the citizens of those different States. When the population grows and the demand for water grows, this will constantly become more and more a very important question to those people.

This legislation is initiated primarily as a flood-control and reclamation proposition. It comes from the Committee on Reclamation, which had jurisdiction of it, and this whole Boulder Canyon Dam bill is predicated upon the jurisdiction of that committee to reclaim and protect the arid lands of that immediate section of the country. But it so happens that incidental to that jurisdiction other related matters are involved and are presented by this bill.

Now, gentlemen, if any of you ever had occasion, as I have, to go out there and see that great Imperial Valley, one of the most amazing agricultural developments that has ever taken place in the history of the civilized world, and see those 65,000 or 70,000 prosperous, happy, and contented people every day of their lives, every week, and every month threatened with destruction by the great Colorado River, which sometimes gets out of its banks and floods and overflows, you can appreciate the great interest that those gentlemen have in the passage of some bill that will insure protection from that menace. It is not an imaginary thing but it is an actual thing.

I heard an old temperance man say once to a lot of young men, in speaking of whisky in the old days before prohibition, "Young men, always remember that whisky may be a good servant, but it is always a poor master."

Now, this Colorado River is a good servant to those people out there, but it is a poor master when it goes on a rampage.

With that primary purpose in mind, from the standpoint of flood protection and for reclamation, they are proposing in this bill something else. The opponents of this bill say that the flood-control situation can be handled by a low dam somewhere down below the Boulder Canyon Dam and at much less expense to the Treasury of the United States, but the main thing which induces me to support this bill, recognizing the necessity of the protection which I have suggested, is that fortunately, by virtue of the physical situation there and the possibilities of the development of power, of irrigation, and of the sale of water rights, we have here an opportunity to build a great structure that will meet all of those necessities in one building program and that ultimately will not cost the taxpayers of America one single cent. One of the preliminary safeguards attached to that construction, as was pointed out to you by Senator Burton, is that as a prerequisite to the expenditure of a single dollar of this fund the Secretary of the Interior must have in hand signed and approved legal contracts for water and the sale of power that will guarantee the amortization of this entire cost, including interest at 4 per cent, within a period of less than 50 years. I say it is a very fortunate situation, gentlemen, and an unusual situation that makes it possible for us to achieve for these people this magnificent enterprise without its having to cost the Treasury in the long run one dollar of expenditure out of the public funds.

There is one phase of this thing that has bothered a good many of my friends from the Southern States. A year or so ago there was some propaganda gotten out by the power companies of this country, as has been developed in the recent hearings before the Federal Trade Commission, showing that a deliberate and wicked effort was made to deceive the cotton growers of the South into opposition to this bill upon a false statement of facts.

They asserted and published all over the country, and it made a profound impression upon our country, the statement that if you build this Boulder Canyon Dam out there it would inevitably or probably bring into cultivation additional lands upon which there would be raised perhaps a million bales of cotton a year in addition to what we are raising, and that it would be raised by cheap labor, most of it in Mexico, and thereby come into direct competition with the cotton producers of the other sections of the South.

The press association of my own State of Alabama was alarmed about this situation, and in their annual convention they passed resolutions memorializing the Members of Congress to oppose, with all their power, the construction of this dam for the reason that they had been misled and deceived into the belief it meant ruinous and destructive competition to our southern cotton producers. They were led into this, gentlemen, as I have said, by a false statement of the real situation; but last fall the president of the Alabama Press Association took it upon himself to visit that section of the country, to make a calm, dispassionate, impartial investigation of the facts with reference to it, and he came back and reported to his associates that they had been misled and deceived, that there was no justice in their former declarations upon the question, and that as a matter of fact it did not afford any real threat of any sort of competition to the cotton producers of the rest of the South, and they rescinded their resolution of protest. I have a copy of it here and I shall ask leave to insert the statement in the RECORD as a part of my remarks. This is the real situation with reference to that proposition, and this conclusion was reasonably based upon the facts. What is the situation now, gentlemen?

You must remember that the Colorado River that supplies the great Imperial Valley with its present water, runs for many miles into the Republic of Mexico, into that cotton land down there in Mexico that they are talking about developing and bringing into competition, and under an international agreement existing between Mexico and the United States they are entitled to as much water as goes through that canal as is used by the people in the Imperial Valley. All of that water goes through Mexico before it gets back into California. Remember that.

Mr. DOUGLAS of Arizona. Will the gentleman yield?

Mr. BANKHEAD. I can not yield now. The gentleman can answer this argument when it comes his time. I have only a limited amount of time and the gentleman has many hours. I want to present this question as clearly as I can from my understanding of the facts.

It runs down there now and there is nothing to control it and there is nothing to prevent those Mexicans, if they want to, from putting in as much cotton as they can successfully plant, and it will go on in this way forever if we do not build this dam and control the flow of that water into the Republic of Mexico. Instead of helping the cotton producers down in that section, as I see it, this proposition is the only way of controlling it to the advantage of the cotton producers of the United States, because when you build this great dam there you can hold back the water, if it can be done under international agreement. At the time it is needed down there in Mexico for the production of cotton it can be withheld from those producers, and therefore their production would be reduced.

Another thing: Do you know how many bales of cotton were raised in the whole Imperial Valley in the year 1927? Do you know how much cotton was ginned in this vast area they were talking about coming in competition with us—only about 8,000 bales. Why, there is hardly a county in Alabama that does not raise more cotton than that every year. It is a mere drop in the bucket.

There is nothing to substantiate this claim and I do not want any colleague of mine, from the Southern States particularly, who is interested in this question, to be deceived by the propaganda and the false statements that have been sent out by interested parties.

Now, gentlemen, I have consumed more time than I expected to take. I am for this bill for a great many reasons. I am for it because I think it is a sensible way to build this dam. Men talk about the Government in business. Here is a physical situation where it seems to me it would be foolish if the Government did not utilize the opportunity to develop and sell this power there for the benefit of the consumers out in that country and thereby pay the total cost of this proposition. It is not the main purpose, although from the standpoint of financial return it is a large increment; but as a matter of analysis and of logic, under the jurisdiction and purpose of this bill, the generation of power and its sale is only an incident to the other great purposes of the bill, and I trust, gentlemen, that the bill will be passed by the House and Senate and approved by the President. [Applause.]

Mr. R. B. Vail, president of the Alabama Press Association, visited the Imperial Valley in November, 1927, for the express purpose of obtaining first-hand information on this subject, and the Los Angeles Examiner of November 26, 1927, contained this

news story following an interview with Mr. Vail, wherein we take it Mr. Vail is correctly quoted:

"Reports circulated through the cotton States of the South in the last year to the effect that realization of the Boulder Dam project would mean southwestern cotton competition have no basis in fact," R. B. Vail, president of the Alabama Press Association, declared here yesterday after his arrival at the Rosslyn Hotel.

Vail, in company with his associate, W. M. Hodgson, has just completed a thorough survey of the Imperial Valley and other lands that would be watered from the Boulder Dam.

MENACE IN REPORTS

"I do not know the source of the reports in the South," said Vail, "but certainly they might act to the detriment of Boulder Dam legislation at Washington if they were allowed to go uninvestigated.

"I have made a careful survey of the situation in the Southwest and shall inform the South of its conclusions. These are, in general, as follows:

"I see no likelihood of any bulk production of cotton in the Southwest that might damage the cotton interests of the South. This is because I am convinced irrigation and the cost of southwestern labor and high land values would make diversified farming or specialty-crop production too expensive to permit any extensive cotton growing.

FEARS GROUNDLESS

"The southern cotton lands are watered by nature, and our labor is about half as costly as the Mexican and oriental labor of the Southwest. These facts and opinions very frankly expressed to me by your southwestern growers lead me to conclude that the misgivings we have had in the South about cotton competition connected with Boulder Dam are groundless."

Following Mr. Vail's visit to California, he reported his findings to the association of which he was president, and in January, 1928, the Alabama Press Association, by resolution again spoke upon this subject, wherein they said in part:

We realize that our position as opposing this on account of cotton production is apparently not just, and we hereby rescind our former resolution in this regard.

In an article by Mr. Nelson M. Shipp, published in the Macon Telegraph, Sunday, January 1, 1928, he said:

As regards the land on the American side of the border in the extreme western part of our country, sometimes referred to as Imperial Valley, the writer's conclusion, after a month's first-hand investigation, is that this region is not now and never will become a cotton competitor of the South. Georgia produces some wheat, but Georgia will never become a wheat competitor of the West. The case is analogous. Cotton is simply not the crop of the coast region, and the largest possible extension of irrigation would not make it such. The fundamental agricultural fact in the premises is that where farming is so expensive, crops that bring far higher prices than cotton must for the most part be grown.

Perhaps the clearest indication of the farm trend of the region is contained in the Government's census figures of the cotton ginnings of Imperial County, Calif., which county extends over much of Imperial Valley. The number of equivalent 500-pound bales ginned in the county in the year 1924 was 26,733. In the year 1925, the following 12 months, the ginnings fell to 22,614 such bales, and in 1926 the number decreased to 13,662.

In this territory, which incidentally is the principal section to be irrigated by the proposed Boulder Dam on the Colorado River, the basic crops are citrus fruits, winter vegetables, and similar agriculture.

Cotton is planted only as a side crop, or to wash the alkali out of the soil through irrigation. Alkali is a seaweed product, and was deposited in the land when it was at the bottom of the Gulf of California, before silt from the Colorado formed a delta across the mouth of the gulf and cut off the inland waters, which evaporated through the years.

I now yield 10 minutes to the gentleman from New York [Mr. O'CONNOR] a member of the Rules Committee.

Mr. O'CONNOR of New York. Mr. Speaker and ladies and gentlemen of the House, this problem of Boulder Dam has been before four Congresses. The Rules Committee has listened to arguments for and against a special rule for its consideration on several occasions occupying many hours of debate on the subject. It occurred to me here to-day, listening to the discussion under the rule, that this first session of the Seventieth Congress is going to be memorable because of the extraordinary list of important legislation which has been brought before it for consideration, and that will be true whether such measures are ultimately enacted into law, or whether they meet the disapproval of the President, as seems to be the order of the day. It will, in fact, take some effort to recall a session of Congress within at least the last decade in which so many important pieces of legislation have been presented. Eliminating myself and the minority, I want to take this opportunity to pay my respects to the majority members of the Rules Committee for bringing before the House the many great measures which have been presented to the first session of the Seventieth Congress.

Among the many measures this House has considered are three bearing great similarity, in that they have commanded the interest of the entire Nation because they deal with the valuable resources of our country. They have all three dealt with the harnessing of our great rivers, the Mississippi, the Tennessee, and now the Colorado River. Of all our natural resources are any more valuable than our rivers? This Congress will be remembered, I am sure, for the affirmative action it has taken in reference to the great Mississippi flood control bill, the Muscle Shoals bill, and now the great Boulder Dam bill. Any one of these measures would have been a great accomplishment in any one Congress. In this session we have all three.

Now, gentlemen, this Boulder Dam problem is not any local issue. In the first instance, at least seven States are directly involved, and this country is not so small but that when seven or even a less number of States are involved the whole country is interested. We are a closely united Nation, each part dependent on every other part—none sufficient to itself—surely none are indifferent to every other section.

We in the great industrial East are interested in the welfare of the people of these seven States. Commercially we take their products for our consumption and we send them our products for their use, but over and beyond that patriotically and sentimentally their problems all appeal to us. When they suffer our hearts go out to them as theirs beat for us in our difficulties. In every catastrophe in that western section of the country the East has responded nobly in money, in sympathy, in every way that the members of a family feel for the interests of their relatives. After all, this Nation is one great family. We from the East are now asked to meet by congressional action the problems of our brothers of the West, and I for one am happy to do all I can toward that end.

Mr. DOUGLAS of Arizona. Will the gentleman yield?

Mr. O'CONNOR of New York. Reluctantly.

Mr. DOUGLAS of Arizona. The gentleman says seven States are involved in this project; why?

Mr. O'CONNOR of New York. Now, I want to respectfully state to the distinguished gentleman from Arizona that I am not going to engage with him in any debate concerning the details of this bill, because of all of the Members of this House the gentleman from Arizona knows as much, if not more, about this bill than any other man here. [Applause.] I do not agree with him in his opposition to the bill, but I can assure him I do not want to become involved in any controversy with him over its details.

Not only is Boulder Dam a national problem, but it is an international one. A serious question involved in this proposed legislation is whether the Republic of Mexico shall continue to obtain certain benefits by use of the Colorado River at the expense of the United States or whether our country shall conserve all of its natural resources to the utmost consonant with international comity.

Now, what does the bill propose to do? It would control the flow of the great Colorado River, which rises in the stately mountains of Colorado and Wyoming and wends its way southward to the Gulf of California through the States of Utah, Arizona, Nevada, and California. For 50 miles it flows through Mexico and makes fertile great stretches of that Republic. At certain seasons of the year the river is a threadlike stream with a flow of only a few thousand cubic feet per second. At other seasons it is a raging monster, rushing down at the rate of hundreds of thousands of cubic feet per second. With its mad rush to the gulf it carries with it vast quantities of silt, at times more than 161,000,000 cubic yards a season, an amount equal to the total excavations for the Panama Canal. Because of this silt filling in the river bed, several times has the river changed its course.

Just west of this raging monster a mere 40 miles lies the great Imperial Valley in southeast California. What is now this fertile valley was once part of the Gulf of California, but this silt built a delta separating the gulf and leaving a huge lake. The water evaporated and left this saucer a few hundred feet below the Colorado River.

To the 65,000 people living in this valley below sea level, this river is a constant menace, not only to their lives but to the 400,000 acres of their highly cultivated fields and their property values of over $100,000,000. Why, gentlemen, this situation is enough in itself to command the attention of our entire Nation and assure the passage of this bill. Picture, if you dare, this river rushing down into this valley! A small commonwealth destroyed. So imminent is this danger that Federal farm-loan banks refuse to make loans in the valley.

To meet this possible calamity it is proposed to dam the Colorado River at Boulder or Black Canyon. It is a monumental undertaking, but this Nation is used to such. The dam will tower 550 feet high and hold back in reserve 26,000,000 acre-feet of water. Naturally, the storage of such a huge quantity of water will make possible the development of enormous hydroelectrical energy. To utilize this water power it is proposed that the Government construct power plants at the dam which will ultimately develop 1,000,000 horsepower. Stupendous, but so is the age in which we live! Why, it is estimated that this dam will hold back the silt for 300 years.

In addition, it is proposed to divert the river into an all-American canal.

Now, what are the estimated costs of these three projects? To build the dam will cost $41,500,000. The power plants will cost $31,500,000. The canal entails a cost of $31,500,000. These three items, with interest of $21,000,000 during the five years of construction total $125,000,000, the total cost of the project.

But the Government does not intend to stand this cost or any part of it. It is estimated that the whole amount involved will be returned to the Government from the sale of water and power in from 25 to 50 years. Those States involved and the cities adjacent, especially those in California, are eager customers for water and power from this undertaking. And, gentlemen, the most noteworthy provision of the bill is that clause which provides that not 1 cent shall be spent on the project until the Secretary of the Interior shall have in his hands contracts for the sale of water and power sufficient to maintain the enterprise and reimburse the Government within the time stated. This is no gift to California or any other State. It is a business proposition. No private company could undertake it. The Government is the one most concerned. A river of the Nation is involved, and the United States owns most of the land along its banks, which, incidentally, will be reclaimed and made valuable.

As far as I can see, the rights of all the States involved are protected. The upper-basin States of Colorado, Utah, New Mexico, and Wyoming are assured of their water rights for all time. Six States have signed the compact. This bill, it is felt, will go a long way toward influencing the State of Arizona to come into the compact.

Gentlemen, when you get through hearing the arguments of the opponents of the measure you will realize, I am sure, that you are again confronted with that perennial question of Government ownership, "Government in business." That is all there was to the opposition to Muscle Shoals—the fear of any legislation which makes the Government a competitor with private business. That bugaboo is always with us, hanging over us, phantomlike—an "evil spirit"—"Government in business"! Do you not tremble at the thought? Could anything be more disastrous? The old guard quakes at the suggestion. Oh, gentlemen, we are living in the year 1928; and if we are forward looking, if we could look ahead, say, two decades, we would see this "horrible thing" coming—yes, inevitably. Nothing can stop it. You might as well make up your minds to it now. Our Government has for the last time placed in private hands any of the great resources of the country. Of all our resources no great natural power development in this country will ever again go into private hands. [Applause.]

I am not one of those people who are rabid about this question of Government ownership. I am not known as an ardent advocate of it. But I am always willing to face the inevitable. Why, 20 years from now we will look back and wonder that we ever made the futile attempt to stop it. At this date it would be idle and reckless for the Government to turn over this great power project to the private companies. Experience has shown that whenever you do, you can never get it back without paying an extraordinary and extortionate sum.

We own this natural resource now. We own Muscle Shoals now. We have the rich power rights on the St. Lawrence River now, and we have other natural resources now. Let us keep them. It would be perfectly idle, it would be just going in the face of a certain future, to say that we shall turn over any of our great natural and indispensable resources to private operation.

There is the real opposition to the bill—the old school still fighting against Government ownership. Everybody wants flood control out there. Nobody wants to jeopardize the interests of those 65,000 people living down in that saucer, just a few hundred feet below the bed of that raging river. Once the river ever broke into that basin it would not drain out as the Mississippi did. It would stay there until God's sun had evaporated it. History records that. That in itself is appeal enough for all the people of this country to come to the rescue of that locality, and while we are about it, we run into this great natural resource, this great power possibility. Why not utilize it? The real opposition is that it would be unfair to private business—the private power companies.

The present Chief Executive of our country has previously been in favor of this legislation. He has said this problem should be solved, that flood control should be accomplished, and that the power should be utilized. It may be that he has changed his mind. He may have regretted that he said the Government should operate the power plants. But, what shall we do with them? Shall we build them at Government expense and then turn them over to private interests? The chief consumers of the power, the chief users of the water to be made available by reason of this great dam, are bodies politic, municipalities, counties, townships, and so forth. Is it proposed here at this late day to make them also subservient to the private power interests? Let us not now take a step backward in this conflict between private and public interest.

Mr. LAGUARDIA. Mr. Speaker, will the gentleman yield?

Mr. O'CONNOR of New York. Yes.

Mr. LAGUARDIA. We have had a little experience right at home, where the municipality built the subways and turned them over to private operation.

Mr. O'CONNOR of New York. Yes. Whenever a governmental body turns over to a private interest a function which is naturally governmental, it deludes itself by the use of certain experiences, such as "the right of recapture," and so forth. Well, anyone who has gone through the experience of New York City knows how idle such protective measures are. Once you let the property get into the hands of the private interests the effort to get it back will involve more trouble and expense than if the Government had stepped in in the first instance and performed its proper and natural function. Who here will say that the Mississippi River or the Tennessee River or the Colorado River is not a natural resource, dedicated to the people of the United States, to every person everywhere in the United States for all time to come? The opponents of this bill would turn that river, with all its millions of potential horsepower, over to private interests.

Of course, you are going to be confronted with the argument usually advanced in the Rules Committee that this proposed law is unconstitutional and that it is going to be upset by the Supreme Court. I have been for six years on the Rules Committee, and I am waiting for that happy day to come when some bill will be presented to our committee or will be debated on the floor of this House that is constitutional.

Mr. DOUGLAS of Arizona. Mr. Speaker, will the gentleman yield for a statement?

Mr. O'CONNOR of New York. Yes; but not for a question.

Mr. DOUGLAS of Arizona. If the opponents of the bill were gifted with the eloquence of the gentleman from New York [Mr. O'CONNOR], I am convinced that the House would not fail to defeat the bill.

Mr. O'CONNOR of New York. The gentleman by his compliment has evened things up now. He does not owe me anything. I hope the rule will be adopted, and I hope for the benefit of the entire country that the bill will be passed. [Applause.]

Mr. BURTON. Mr. Speaker, I have no further requests for time.

Mr. BANKHEAD. I have no further requests for time.

The SPEAKER. Under the unanimous-consent agreement the previous question is ordered. The question is on agreeing to the resolution.

The resolution was agreed to.

Mr. SMITH. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes. Pending that, I ask unanimous consent that the time for general debate be controlled one-half by myself and one-half by the gentleman from Arizona [Mr. DOUGLAS].

The SPEAKER. The gentleman from Idaho moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 5773. Pending that, he asks unanimous consent that the time for general debate be equally divided and controlled, one-half by the gentleman from Arizona [Mr. DOUGLAS] and one-half by himself. Is there objection?

There was no objection.

The SPEAKER. The question is on the motion of the gentleman from Idaho that the House resolve itself into the Committee of the Whole House on the state of the Union.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 5773, with Mr. LEHLBACH in the chair.

The Clerk reported the title of the bill.

Mr. SMITH. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SMITH. Mr. Chairman, I am sure that everyone here must be gratified that the time has arrived when we can take up for consideration the bill to improve the Colorado River. This is a measure which has been pending before the Committee on Irrigation and Reclamation for over eight years. Extensive hearings have been held on the bill and we have brought before the committee engineers, business men, and economists of wide reputation, with the hope of securing all of the information possible before bringing the matter to the attention of the House. At the close of the last session of Congress the bill was favorably reported, but it came to the House too late for consideration prior to adjournment.

The President in his message to the Congress of December 6, 1927, stated:

> Legislation is desirable for the construction of a dam at Boulder Canyon on the Colorado River, primarily as a method of flood control and irrigation. A secondary result would be a considerable power development and a source of domestic water supply for southern California.

In his message to the Congress of December 22, 1926, he declared:

> In previous messages I have referred to the national importance of the proper development of our water resources. The great project of extension of the Mississippi system, the protection and development of the lower Colorado River, are before Congress, and I have previously commented upon them. I favor the necessary legislation to expedite these projects.

On March 17, 1924, the present Secretary of the Interior, Dr. Hubert Work, in reporting to this committee on legislation similar to the pending bill, said:

> The Colorado River has been under observation, survey, and study, and the subject of reports to Congress since the close of the Civil War. More than $350,000 have been expended by the Bureau of Reclamation since the Kinkaid Act of May 18, 1920. More than $2,000,000 have been expended by other agencies of the Government. The time has arrived when the Government should decide whether it will proceed to convert this natural menace into a national resource. (Hearings on H. R. 2903, 68th Cong., 1st sess., p. 818.)

Immediately on the assembling of the present Congress a new bill was introduced, and extensive hearings were held, to which the governors of the watershed States were invited to attend. On the 3d day of February the committee recommended that a favorable report be made on the bill. At the request of the governors the committee filing of the report was delayed for six weeks in order to afford a further opportunity to those in disagreement as to the division of the water arriving at an agreement, but nothing was accomplished in that direction. We now come before you with a special rule from the Committee on Rules for the consideration of the pending legislation.

As has been stated by those who preceded me, supporting the rule, this is primarily a flood problem, but it is different from the flood legislation which we have been considering heretofore with reference to the flood menace of the Mississippi River, the Sacramento River, and other rivers, in this respect, that we do not expect the Federal Government to bear the expense of preventing this flood menace, but we present legislation providing for a plan which, if thoroughly worked out, will reimburse the Government for all the expense that may be involved in building the dam and storing the water which will be necessary in order to prevent the floods in the lower Colorado River Basin.

In order that you may get a comprehensive idea of this flood situation we have had brought in this map [indicating] which will give you an idea of the location of the section of country that is subject to floods. The Imperial Valley is situated in this part of the country [indicating] and, as has been said, it is from 100 to 200 feet below the sea level. In the centuries that have gone it is supposed that the Gulf of California extended into this great valley. The accumulation of silt turned the river to the south, and by evaporation of the water for centuries this great country known as the Imperial Valley was made available for cultivation. In order to get the water into that valley for irrigation purposes, it is necessary to bring it from the Colorado River through the upper part of Lower California in Mexico.

The flood menace affecting this section is alarming at times, to such an extent that property values have been depreciated very much, and has resulted in the Federal Farm Loan Board withdrawing from the field. In 1905 the river broke entirely away and flowed into the Imperial Valley for over 18 months, and finally, at an expense of over $2,000,000, it was restored to its original location, and property of the Imperial Valley thus saved. In 1909, and again in 1914, and again in 1918, the river was kept out of the Imperial Valley at great expense in constructing levees, dikes, and diversions. The people living in the Imperial Valley who are cultivating the land, building up these towns and cities, organized a district under which they are operating, by which they pledge themselves to pay the expense of building these levees to keep the river from again entering Imperial Valley.

On account of the softness of the earth, which is largely silt which comes down from the mountains, the least break in the levee results, as in the lower Mississippi Valley, in great destruction. The farmers in this section have expended over $3,000,000 of their own money building these levees to protect themselves against the flood menace. The Federal Government has expended over $300,000 in cooperation with them. We feel that this menace is such that the Federal Government should step in and try, if possible, to avert the loss of property and the possible loss of life.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield?

Mr. SMITH. Certainly.

Mr. MOORE of Virginia. What is the main line of the river, if I may ask you?

Mr. SMITH. The main line of the river is on the eastern side of Lower California. At one time it ran toward the southwest, down in this section [indicating on map], and these yellow lines represent the levees which have been constructed and which are constantly being raised in consequence of the fact that the silt coming down through this channel fills up the bottom of the river so that it is diverted and is constantly making a new bed.

Mr. MOORE of Virginia. Where is the Mexican boundary line?

Mr. SMITH. The Mexican boundary line is east and west, as indicated on the map. This green line [indicating] represents the canal which now carries the water into the Imperial Valley.

Mr. MOORE of Virginia. What is the red line above the boundary line?

Mr. SMITH. That indicates a proposed canal entirely within the United States which is to be constructed as part of this great project.

Mr. WELLER. For irrigation?

Mr. SMITH. Yes; to carry the water within the boundaries of the United States instead of through Mexico, as at the present time.

Mr. ABERNETHY. Mr. Chairman, will the gentleman yield there?

Mr. SMITH. Certainly.

Mr. ABERNETHY. Would the gentleman be kind enough to explain to the House this controversy between the States and what it is all about?

Mr. SMITH. Yes. I intend to go into that.

I wish now to call attention to the flood menace, which is the primary object to be accomplished by the enactment of this legislation.

Mr. JOHNSON of Texas. Mr. Chairman, will the gentleman yield?

Mr. SMITH. Yes.

Mr. JOHNSON of Texas. For the purpose of identifying and locating the points on the map, is the city of San Diego indicated there?

Mr. SMITH. No. It lies to the west about 120 miles. These towns and cities indicated on the map are in the Imperial Valley. This [indicating] is the Southern Pacific Railroad, which runs northwest of the Imperial Valley.

Mr. ALLEN. Will the gentleman make perfectly clear where the river now runs?

Mr. SMITH. The gentleman from Illinois has requested me to indicate on the map the location of the Colorado River as it is now. It comes down on the eastern side of California, as indicated on the map, through the mountain country, and when it reaches the boundary line it enters a low delta, and from a point indicated here on the international boundary line, on through to the South. This [indicating] is a great delta composed of silt which has come down through the ages and which results in the bed of the river constantly rising because

of the sediment deposited and pushes the river out of its channel. The channel is sometimes 10 or even 100 feet higher than the surrounding country. In case of a flood the river bed shifts from one side of the peninsula to the other.

Mr. COX. The gentleman made one statement distinguishing this case from the Mississippi River problem which I do not quite understand.

Mr. SMITH. I say it is different from the problem in the Mississippi Valley because the Federal Government is bearing the expense of the improvements in the Mississippi Valley.

Mr. COX. What expense will the people in the valley and elsewhere have to meet in this case? What will the people affected pay for flood control?

Mr. SMITH. The people who will be benefited by legislation of this character, so far as flood control is concerned, will pay the money back to the Government with 4 per cent interest from the time it is first expended.

Mr. COX. There is no charge levied against any of the affected territory.

Mr. SMITH. No charge except as to benefits they will receive.

Mr. COX. The gentleman will understand I am with him in this matter but I wanted to have that point made clear.

Mr. HOCH. Will the gentleman indicate where the overflow is from the river?

Mr. SMITH. The overflow has been in this section here in Mexico [indicating on map]. This is near the international boundary line, the real danger line [indicating], because as the water comes down this old river bed it strikes this point here [indicating] and passes into the Imperial Valley.

Mr. HOCH. Where is the beginning of the overflow from the river?

Mr. SMITH. The overflow from the river would be down in this section [indicating on map]. This is a canal [indicating] which frequently is damaged by overflows and the banks must be constantly raised.

Mr. WELLER. Where is the Boulder Canyon Dam?

Mr. SMITH. The Boulder Canyon Dam is about 300 miles up the river from the international boundary line.

Mr. WELLER. Is the danger spot the gentleman speaks of in the United States?

Mr. SMITH. The danger spot is in northern Mexico near the international boundary line.

Mr. WELLER. Below the line?

Mr. SMITH. Yes.

Mr. FLETCHER. How does that overflow affect El Centro, Brawley, Imperial, and Niland?

Mr. SMITH. The overflow would go into the lowest portion of the valley and raise the Salton Sea, and if it is not stopped it will drive the people back farther and farther. The flood situation is different there than any other flood situation, because after a few days of flood in any other section of the country the water recedes, but here it would be constantly rising, because there is no other way for it to get out than by evaporation, which, of course, would take hundreds of years.

Mr. FLETCHER. And that would affect all of those cities?

Mr. SMITH. Yes. This situation, as I remarked at the outset, has been given the greatest consideration. President Harding recommended legislation, and twice since President Coolidge has become the Chief Executive he has urged legislation for the relief of these people. Two Cabinet officers, Secretary Work and Secretary Hoover, have urged legislation of this character, the Secretary of the Interior through letters written to the chairman of the committee and Secretary Hoover by appearing before our committee and giving testimony regarding the importance of the enactment of this legislation.

Mr. OLIVER of Alabama. Will the gentleman point out the Government-owned land lying to the north of the Mexican line and to the east of the Imperial Valley?

Mr. SMITH. There is a quantity of public land lying around the Imperial Valley, above the high-line canals which now supply water.

Now, I wish to refer briefly——

Mr. MONTAGUE. Before the gentleman leaves the map, the bulk of the canal that comes from the river is in Mexico, is it not?

Mr. SMITH. Yes.

Mr. MONTAGUE. And then it runs north into the Imperial Valley?

Mr. SMITH. Yes. It leaves the river at the eastern part of California, and runs through here and then comes into this point [indicating on map], where it enters the United States.

Mr. MONTAGUE. Apparently, then, nine-tenths is in Mexico?

Mr. SMITH. Oh, yes; even a larger portion than that is in Mexico. The water is taken out here in Mexico [indicating] and put into laterals leading into the Imperial Valley.

Mr. MONTAGUE. Have we a treaty with Mexico with respect to the use of the water by the two nations?

Mr. SMITH. There is an agreement between the Imperial Valley irrigation district and the people of Lower California in Mexico under which the people in the Imperial Valley gave a concession to Mexico for half of the water that would come through this canal.

Mr. MONTAGUE. If the dam you speak of is constructed, there will be no further water passing through that canal, will there?

Mr. SMITH. No; if we get the all-American canal, we will not need to bring water through Mexico.

Mr. MONTAGUE. It will be entirely within the United States?

Mr. SMITH. Yes.

Mr. MONTAGUE. Has Mexico been consulted or is it necessary to make any arrangement by which you can divert this water that flows naturally through her territory as much as through our own territory?

Mr. SMITH. There has been a commission authorized by Congress and it has been sitting during the last two or three years with regard to the division of water. As a matter of comity our Government would undoubtedly permit Mexico to continue to use the quantity of water she is now using.

Mr. MONTAGUE. But that has not been finally determined upon?

Mr. SMITH. No; that is still pending, and the commission has not yet made its report.

Mr. LAGUARDIA. But it would have no right to a greater amount of water than the quantity of water it now enjoys?

Mr. SMITH. I should say not.

Mr. LAGUARDIA. Therefore if we can send down as much water as they are now deriving from their flowage rights, they would have no complaint at all.

Mr. SMITH. That is very true, although they may insist on having a larger proportion, but I do not think they would be able to assert that right successfully.

Mr. WAINWRIGHT. Will the gentleman yield for a question?

Mr. SMITH. Certainly.

Mr. WAINWRIGHT. Would not Mexico be entitled to the entire flow of the river unimpeded?

Mr. SMITH. No.

Mr. WAINWRIGHT. I can not understand why not.

Mr. SMITH. Because the water rises in the United States and the people in the United States, by reason of that fact, have the first right to the water. The fact that Mexico has been using the water would undoubtedly influence our Government to accede to their request that they be permitted to continue to use that quantity of water, but it is a question whether they could enforce such a right under the law of nations.

Mr. LAGUARDIA. And they surely would not have any claim, in response to the inquiry of the gentleman from New York, to any increased amount of flowage as the result of our own work in our own territory.

Mr. WAINWRIGHT. No; but it seems to me they would be entitled to the unimpeded flow of the entire river.

Mr. LAGUARDIA. To the normal flow of the river.

Mr. CRISP. Will the gentleman permit a question?

Mr. SMITH. Certainly.

Mr. CRISP. What would be the length in miles of the all-American canal, if it were constructed?

Mr. SMITH. It is about 35 miles across to the Imperial Valley from the river.

Mr. COLTON. Will the gentleman yield?

Mr. SMITH. Yes.

Mr. COLTON. The gentleman from New York raised a question that is a very highly disputed point in connection with this case, and would not that depend upon whether or not the water below was put to a beneficial use before it was applied above?

Mr. SMITH. That, of course, would be a factor, but I assume this international commission, which is sitting, would determine those questions amicably.

Mr. SWING. Will the gentleman yield there?

Mr. SMITH. Yes.

Mr. SWING. May I say on that point that a very famous decision was rendered by Judson Harmon, one of the great Attorneys General of the United States, published in the Opinions of the Attorney General, with reference to the Rio Grande in New Mexico, Texas, and Mexico, which holds there is no such thing as an international water right, and that the lower country, no matter how long they put the water to a beneficial use, can not compel a sovereign upper nation to refrain from using its own water in its own country under its own laws; but as a matter of comity between nations we have permitted them to do it, and on this bill and on this very project every Secre-

tary of State to whom the question has been referred has held in accordance with the Judson Harmon opinion, that there is no law; it is a mere moral, equitable claim.

Mr. WAINWRIGHT. Of course, the gentleman will appreciate that that right might be asserted by the United States but might not be agreed to by the Republic of Mexico.

Mr. SMITH. If the gentleman will permit, I would prefer to proceed with my statement and then I will endeavor to answer any questions that may be propounded; otherwise, I will not have time to cover the points I wish to take up.

Among the things that would be accomplished by this project, in addition to flood control, is the bringing of water to our own land within our own borders and not being subjected to the whims of the Mexican people by bringing water through their country, which we do now simply by permission. You can readily understand it would be very much better for our own people to have these works within our own boundaries than to have them in a foreign country.

In addition to supplying water for irrigation purposes to the people living in Imperial Valley, it is proposed to make available to the cities of Los Angeles, Pasadena, Riverside, San Diego, and all of the growing cities in southern California, an increased water supply for domestic and irrigation purposes. This bill proposes that the Secretary of the Interior before expending any money whatever on this great undertaking shall have contracted with these cities for this additional water supply.

Mr. EVANS of California. Right there, will the gentleman yield?

Mr. SMITH. Yes.

Mr. EVANS of California. As to that supply, no part of it, however, comes through the proposed all-American canal?

Mr. SMITH. Oh, no. That water would be taken out at a point higher up on the river and brought across to the southern California cities.

Mr. EVANS of California. So if those cities get any water by the building of this dam they will not benefit at all by the building of the all-American canal?

Mr. SMITH. Oh, no; that is entirely independent. The all-American canal is being built for the benefit of the farmers and the people living in the Imperial Valley, and the water for Los Angeles and the other cities will be brought from an entirely different portion of the river much farther to the north.

In addition to making water available to these cities, which is very greatly needed, as will be pointed out by others who will follow me, it is proposed to construct at the dam to be built in the Colorado River power plants under Government supervision and the power sold to municipalities and corporations that are willing to contract for it. These contracts must be made in advance by the Secretary of the Interior, under the provisions of the bill, before any money can be expended in building this great project.

Mr. GARBER. Will the gentleman yield there?

Mr. SMITH. Yes.

Mr. GARBER. What is the estimated proximity of the consumption of the power to the source where it is produced?

Mr. SMITH. It will be about 150 miles.

Mr. GARBER. That would include what cities?

Mr. SMITH. That would include Los Angeles, Riverside, and some of the other cities in that section.

Mr. WELLER. The gentleman made a reference to the Government advancing some money for the purpose of constructing power houses, as I understand.

Mr. SMITH. Yes.

Mr. WELLER. Is it intended that the Government shall actually construct the power house or that some private corporation will?

Mr. SMITH. It is proposed that the Government shall not only build the dam, but that the Government shall build the power plant and distribute the power at the top of the dam. That is made necessary by reason of the fact that this dam is to be constructed in a great canyon, with the walls almost perpendicular, and it would be impossible for more than one agency to operate in that section in the construction of a power house.

Mr. WELLER. The Government is to act as the operator?

Mr. SMITH. No; it would only act as the producer and would sell the power to be distributed by different companies at the top of the dam.

Mr. WELLER. Would the Government or an agency actually maintain the operation of the plant for the production of power?

Mr. SMITH. The Government officials would undoubtedly have control and management of the power house..

Mr. WELLER. Would they let or rent to an operating company?

Mr. SMITH. No; the Government would retain control.

Mr. GARBER. Will the gentleman yield?

Mr. SMITH. Yes.

Mr. GARBER. Has the gentleman a map showing the location of the dam and the lands to be irrigated?

Mr. SMITH. I have shown you the location of the land. The dam is to be located about 300 miles north of the international boundary line. The land to be irrigated lies around the Imperial Valley above the land already irrigated.

Mr. ARNOLD. Can the gentleman tell us the number of acres that is to be supplied with irrigation?

Mr. SMITH. It is estimated that 400,000 additional acres will be subject to irrigation, but the placing of water on these lands will not need to be considered for 8 or 10 years as the water will not be available until the all-American canal is constructed.

Mr. ARNOLD. That is, 400,000 acres in addition to the acreage now irrigated?

Mr. SMITH. Yes.

Mr. ARNOLD. How many acres are now irrigated?

Mr. SMITH. Four hundred and fifty thousand acres are now irrigated.

Mr. JOHNSON of Texas. Is there a provision in the bill for the construction of the all-American canal?

Mr. SMITH. Yes; that is carried in the bill and is a part of the scheme.

Reference has been made to a compact among the watershed States to which I wish to refer at this time.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. SMITH. Yes.

Mr. SUMMERS of Washington. Is it not a fact that there would be no land irrigated except in the Imperial Valley which is now irrigated except by an additional act of Congress?

Mr. SMITH. That is true.

Mr. MOORE of Virginia. If it will not interrupt the gentleman, will he restate the cost of the dam?

Mr. SMITH. I will reach that soon.

Mr. MOORE of Virginia. And when you do that, will the gentleman give us some idea as to how the estimates were made up and from what source they came?

Mr. SMITH. Yes. Now, with reference to the controversy over the water. The watershed of the Colorado River enters into seven States, and under our water laws prior appropriations of water assures a continuation of the title to the use of that water. When it was contemplated that this improvement might be made it was thought wise for Congress to pass a law authorizing the seven States in the watershed to get together and apportion the water among themselves so as to avoid litigation in the future and insure each State a fair proportion of the water regardless of the time when the application for its use might be made. So Congress passed a law and provided that the Federal Government should be represented on the commission.

The State legislatures passed laws authorizing a commissioner from each State and that commission assembled in Santa Fe, N. Mex., in 1922. Mr. Hoover, Secretary of Commerce, was delegated by the President to represent the Federal Government and he sat with these commissioners over a period of about two months.

This commission came to an agreement as to how these waters should be divided, and each commissioner signed the agreement, and this compact was submitted to the several States for ratification. All the States excepting Arizona ratified the compact, and I am advised that in Arizona there was but one majority against ratification. Otherwise if Arizona had ratified the compact this great improvement would doubtless have been half completed by this time.

The Arizona Legislature rejected the compact by one vote, and consequently the seven-States compact has never become an entity. Every effort has been afforded to the representatives of the watershed States to agree among themselves as to the disposition of this water, but they have never been able to get together, for the reason that the delegation from Arizona and the governor of that State have been unable to see their way clear to complete the agreement.

Mr. GARBER. Mr. Chairman, will the gentleman yield?

Mr. SMITH. Yes.

Mr. GARBER. Without an agreement between the several States regarding a division of the waters, upon what ground would the gentleman justify appropriations by the Federal Government?

Mr. SMITH. Simply this: The Federal Government owns the land over which the Colorado River runs in the locality where it is proposed to construct this dam, and it seems hardly reasonable that the Federal Government should avoid making a great improvement such as this for the development of the

natural resources of the country because it could not get the consent of one or two States in that watershed. If that were so, any sovereign State would have superior authority over the Federal Government in a matter affecting the Government's own land.

Mr. LEATHERWOOD. Mr. Chairman, will the gentleman yield?

Mr. SMITH. Yes.

Mr. LEATHERWOOD. I am very much interested in the statement the gentleman just made that the Government owns and controls the bed of the stream. As I understand it, this bill is intended to improve the navigation of the stream.

Mr. SMITH. Yes.

Mr. LEATHERWOOD. If it is a navigable stream, who owns the bed of the stream?

Mr. SMITH. That is another reason why we feel this bill is constitutional.

Mr. LEATHERWOOD. I am not discussing the constitutionality of the bill, but who owns the bed of the stream if it is a navigable river?

Mr. SMITH. In some States it may belong to the State, but in this instance, where it is a boundary between the States, we contend that the Federal Government controls not only the land over which the river runs but also the river itself for the benefit of the people.

Mr. LEATHERWOOD. I thought the Federal courts had decided very plainly that if it is a navigable stream the States own the bed of the river?

Mr. SMITH. There may be decisions of that kind, and that contention of the gentleman from Utah will doubtless be raised when he takes the floor. Answering the gentleman from Oklahoma [Mr. GARBER], it is unreasonable to assume that if one State objects that we would not be able to proceed with a great improvement on Government-owned land. It seems to me that that is a ridiculous position to take, and yet that is the contention that is argued by the people from Arizona.

Mr. COLTON. Mr. Chairman, will the gentleman yield?

Mr. SMITH. Yes.

Mr. COLTON. Is the gentleman's contention the same with reference to the water as it is with respect to the land—that the Government owns the water in those streams?

Mr. SMITH. No; if it is water entirely within the State—no.

Mr. COLTON. I mean as between two States.

Mr. SMITH. The Federal Government has absolute control of water running over its own land. That is my contention. I mean where it is a boundary stream. I want that distinction made. If this water were strictly and entirely within the State, then the gentleman's contention might apply; but this is a different proposition, as the river constitutes a boundary between two sovereign States and is on Government-owned land. For one of those two States to say that the Federal Government shall not assert its right to the control of the water on its own land seems to me to be an absurd position to take.

Mr. COLTON. I just wanted it to be clear that the gentleman understood that the Government owns and controls the water that forms the boundary line between the two States.

Mr. SMITH. Yes.

Mr. COLTON. Of course, my understanding is entirely different.

Mr. TILSON. Mr. Chairman, will the gentleman yield?

Mr. SMITH. Yes.

Mr. TILSON. Has the gentleman addressed himself to the possible international question as to our right to turn the water from the Colorado River into the all-American canal, and thus prevent it flowing down through Mexico?

Mr. SMITH. That question was raised earlier in the discussion, and I stated then, and I think my position is absolutely tenable, that we are under no obligations whatever to the people of another country to furnish it water that arises wholly within our own boundaries; but, as a matter of comity, we doubtless would do so where they had been using it; but if they had not been using it, it is my contention that we could, as far as international law and decisions are concerned, take the water and use it all within our own boundaries.

Mr. TILSON. Then the gentleman thinks that except for comity we might use it all, and that comity would only require that we should let flow into Mexico an amount of water equal to that which has been previously appropriated in that country.

Mr. SMITH. Yes.

Mr. MONTAGUE. If the gentleman will permit, I asked the gentleman what arrangement had been made in connection with the suggestion of the gentleman from Connecticut, and the gentleman from Idaho said that there was in contemplation a treaty, and that Attorney General Harmon had rendered an opinion in which he held that Mexico had no legal right to the water above our own boundary line.

Mr. SMITH. Yes; and that commission is now sitting, and doubtless will report within a few months.

Mr. MONTAGUE. That is based on the principle that no State has the lawful right to go into another State and interfere with it, yet history shows that questions of that kind have been frequently settled by treaty and even by war.

Mr. WAINWRIGHT. Mr. Chairman, if the gentleman will permit, the question raised by the gentleman from Connecticut [Mr. TILSON] is a fundamental and interesting question. It occurs to me that there are some other rivers in the world beside this river that flow over boundary lines in other countries. Take the River Rhine. It flows through Germany and then through Holland. The same may be said with respect to the Danube in other countries. Would the gentleman contend that Germany could impound all of the waters of the River Rhine so that none of them should ever flow out to the sea through Holland?

Mr. SMITH. I am confining my observations to my own country, and do not want to be involved in questions of the character suggested by the gentleman from New York.

Mr. GARBER. Mr. Chairman, will the gentleman yield for a question?

Mr. SMITH. Yes.

Mr. GARBER. I assume that an attempt to enter into a compact by the several States was a recognition of the rights of each State in the waters of the river. Now, if that is true, on what ground would you justify a Federal appropriation in the absence of any agreement? As I recall, that question was asked Secretary Hoover in testifying before the committee, and he advised against appropriations being made until Arizona had ratified the compact.

Mr. SMITH. He may have so stated earlier in the hearings, and I do reach a conclusion.

Mr. GARBER. Perhaps conditions have arisen since that time to change that?

Mr. SMITH. That is the case. Arizona is not being injured in any way in her rights to use the water, and even under the six-State compact they will be amply protected.

Mr. CRISP. Mr. Chairman, will the gentleman permit one question?

Mr. SMITH. Yes.

Mr. CRISP. Does the United States Government own the land that will be overflowed as a lake when this dam is constructed?

Mr. SMITH. Yes. It is all on the public domain.

Mr. CRISP. What is the area that will be covered by the lake?

Mr. SMITH. I do not know the exact area. It backs the water up about 80 or 90 miles.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield?

Mr. SMITH. Certainly.

Mr. MOORE of Virginia. Going back to the question which the gentleman from Connecticut [Mr. TILSON] referred to, this bill would not violate any treaty that we have with Mexico?

Mr. SMITH. No. We have none now.

Mr. MOORE of Virginia. Have we ascertained in any way, even tentatively, the attitude of Mexico?

Mr. SMITH. Oh, yes. Three years ago we authorized a commission to negotiate with Mexico. That commission sat as recently as six weeks ago.

Mr. MOORE of Virginia. Have they arrived at a conclusion?

Mr. SMITH. It is expected that an agreement will be arrived at by reason of the deliberation of that commission. We do not anticipate any trouble in adjusting the matter.

Mr. TILSON. As to the land being Government land, the gentleman might state that it is public land, and it will probably remain so for all time. It is of no value for public use. It is perhaps the only case of that kind I know of, where we own land that is of no use.

Mr. MONTAGUE. Mr. Chairman, will the gentleman yield?

Mr. SMITH. Certainly.

Mr. MONTAGUE. How much land does the Government own on each side?

Mr. SMITH. For probably a hundred miles, it is all public land, except that a few mining claims which may have been initiated.

Mr. MONTAGUE. As to the title of that land, where is it?

Mr. SMITH. It is in the Government.

Mr. MONTAGUE. How far on each side does the Government title run?

Mr. SMITH. About 100 or more miles on each side.

Mr. JOHNSON of Texas. Mr. Chairman, will the gentleman yield?

Mr. SMITH. Yes.

Mr. JOHNSON of Texas. Will the gentleman please name the States involved?

Mr. SMITH. California, Arizona, Colorado, Nevada, New Mexico, Wyoming, and Utah.

Now, I want to revert to my previous statement, that the Federal Government will be reimbursed for the cost of this improvement. The cost of the dam is estimated at $41,000,000. The horsepower equipment will cost $31,000,000. The all-American canal will cost $31,000,000, and added to that sum of $104,000,000 is the interest at 4 per cent for five years, $20,000,000, which aggregates $125,000,000.

It is proposed to reimburse the Government this money by the sale of water to the southern California cities, and by the sale of power to municipalities and corporations who wish to purchase and distribute it. The farmers who will be benefited by the placing of water on their lands, which are to be reclaimed when Congress authorizes such reclamation, will repay their share.

The safeguards in the bill are such that the Secretary of the Interior can not proceed until after a six-State compact has been ratified. Nor can he proceed in the expenditure of any money until after he has contracted with the various municipalities to purchase water and hydroelectric power in sufficient quantities to make the profits accruing from the sale of water and power sufficient to repay the Government over a period of not exceeding 50 years. It has been estimated that the Government will be reimbursed in 25 years or 30 years. The bill provides 50 years so as to make it absolutely certain that the Government will be reimbursed.

Mr. WELLER. Will I disturb the gentleman's argument if I ask him if he will anticipate the statement of the gentleman from Arizona [Mr. DOUGLAS] and give us some of the reasons why the State of Arizona is opposed to it?

Mr. SMITH. There are several reasons. We can not ascertain definitely what they are. But the gentleman from Arizona is a very astute and learned man, and he will be able probably to enlighten the House as to what his objections are. We have not been able definitely to ascertain, but one of the reasons, we think, that impels Arizona to oppose this legislation is the fact that their delegation contends that inasmuch as one end of this dam must rest on Arizona soil, the Federal Government must give Arizona a share of the profits. Nevada last year took the same position. There is a provision in the bill that when the amortization plan is worked out, if there is any excess profit in any particular year, provided there are no payments overdue in previous years, those two States shall have a proportionate share of the profits from the sale of this power. While I have acquiesced in this amendment, I would prefer that the Federal Government should be reimbursed for the money expended, including interest, and then the Congress shall determine how this great project shall be managed, and what proportion of profits from operating the plant in the way of sale of water and power shall go to the States.

Mr. COX. You have provided for that in the provisions of the bill? You have recognized that part of the claim of Arizona by making provision in the bill for reimbursement?

Mr. SMITH. Yes. There is an amendment of that kind. We did it with the hope and expectation that Arizona would come into the compact when we inserted that provision, yet the Arizona delegation is opposing the bill just as strongly as they had before.

Another reason why we surmise Arizona is opposed to this improvement is because of the fact that there are scores of applications for power sites on the river in Arizona which, if granted, will mean revenue to the State of Arizona in the way of taxes. These applications may be granted when the embargo is released, which expires on the 4th of March, 1929. If these proposed power plants are developed, then the State of Arizona would receive from these plants a property tax which they would not receive from a Government-owned dam and power plant.

Mr. COX. Can the gentleman advise us when these applications were filed? Have they been filed since this question of Boulder Dam first arose and were they made with the view of complicating the situation?

Mr. SMITH. I would say that they have been filed within the last five years, and they have been held up by an act of Congress, anticipating that some agreement would be reached among these seven States which would enable this legislation to be passed without opposition.

Mr. ARENTZ. Will the gentleman yield?

Mr. SMITH. Yes.

Mr. ARENTZ. Is it not true that if any one of the States of Arizona, California or Nevada, or any of the other Colorado River Basin States, wishes to acquire a right to the water in the Colorado watershed, it first makes an application to the State authority, whether that be the power commission or State engineer, and if it wishes to acquire the right to develop power it secondly makes application to the Federal Power Commission? I think there is an erroneous understanding here in regard to the water. Surely the gentleman from Idaho does not contend that the water of the Colorado River, whether that water is in the bed of the Colorado River when it forms a boundary line between two States or whether it is in the bed of the Grande or White, which are not interstate boundary lines, or in the Green River in Wyoming, which is far from any boundary line, belongs to the Federal Government.

Mr. SMITH. No; I do not.

Mr. ARENTZ. Several gentlemen have stated to me that they understood the gentleman to say that the water of the Colorado River belonged to the Federal Government.

Mr. SMITH. The Federal Government has control of the water in the Colorado River where it divides the States of Arizona and Nevada.

Mr. ARENTZ. The control of the water is a different proposition than the water itself.

Mr. SMITH. The Federal Government controls the water in the Colorado River for one reason because it is a navigable stream and for another reason, my contention is, because it is on public land and is a boundary stream.

Mr. ARENTZ. I think the gentleman is stating a misconception. The water itself is an entirely different proposition from authority to direct that water. For instance, the Federal Power Commission directs any licensees as to how they must develop their power, but it certainly does not step into any State authority and tell that State authority that anyone in the State must come to the Federal Government for permission to use the water. That is what I am getting at.

Mr. SMITH. No; the Federal Government does not need to secure any permit for the use of water in its own streams, nor in this instance does it need to go to Arizona or Nevada to get a permit.

Mr. ARENTZ. That is exactly what I am saying. The use of the water is an entirely different proposition.

Mr. SMITH. Certainly.

Mr. ARENTZ. It belongs, as any other natural resource, to the State?

Mr. SMITH. Yes.

Mr. ARENTZ. I wanted that clearly understood, and I did not want any misunderstanding about it.

Mr. SMITH. I am not disputing that.

Mr. ARENTZ. We are all western men here, and we know that in order to get the right to use water you have got to put it to a beneficial use.

Mr. SMITH. I am not disputing that, but I do contend that the Federal Government is supreme, and it can control the water in the Colorado River without getting a permit from Nevada or Arizona.

Mr. ARENTZ. For the reason that it is an international stream?

Mr. SMITH. Yes.

Mr. ARENTZ. It flows over public land from the head of the Wind River Mountains in Wyoming, the Continental Divide in Codorado, clear down to Mexico, and it also flows through seven States, and if these seven States can not get together, then somebody else has got to step in and tell them what to do.

Mr. SMITH. And in this instance it is the Federal Government.

Mr. MOORE of Virginia. Let me ask the gentleman if he will turn to the other map and show us the location of the several States he has referred to with reference to the Boulder Dam proposition and the river, and also say whether there is any opposition indicated except by Arizona. I have gotten the impression from something that has occurred in the other body that there is strenuous opposition by Utah.

Mr. SMITH. Utah was in the compact, and for reasons best known to the Members from Utah, which they will explain, they withdrew. They claim, and probably will so state, it is because of some controversy over the water, but I do not see how they can substantiate such a contention when the compact gives the upper States one-half of the water in the river.

Mr. COLTON. In the interest of accuracy, the State of Utah has not withdrawn from the seven States compact.

Mr. SMITH. No; the State of Utah has not formally withdrawn, but it took some action in its legislature which had practically the same effect as withdrawing.

Mr. COLTON. In the interest of accuracy, that was with regard to the six-State compact. We have always maintained our adherence to the seven-State compact and we have no condition, for instance, like California. We have an unconditional ratification of the seven-State compact.

Mr. SMITH. Yes.

Mr. COLTON. And we stand on that.

Mr. SMITH. These are the States composing the watershed of the Colorado River Basin: A small portion of Wyoming is in this watershed, the eastern part of Utah and Nevada, the western part of Colorado, the western part of New Mexico, practically all of Arizona, and a small portion of the eastern side of the lower part of California.

It is proposed to build Boulder Dam at this point, where the river turns southward [indicating].

Now, I wish to refer briefly—because I have only a few minutes remaining—to the assertion that has been made that the engineering estimates are too low. I wish to insert in the RECORD data concerning some of the great engineers who have built reclamation projects in the United States, all of which are standing firm, and probably will be so for centuries to come.

It is true that the estimates on some of the earlier constructions were lower than the actual expenditures, because of the fact that during the war and following the war the price of material *doubled* and the cost of wages almost doubled. Everyone who did any construction work in 1914 or 1915 on estimates made prior to those years discovered to his dismay that the construction work cost nearly twice as much as the estimate, but since the war it will be shown by the records that the construction of these great projects has been much less than the estimate. A dam was recently completed at American Falls, Idaho, in my own district, that cost $4,000,000, on which there was a saving of nearly $800,000. So we feel absolutely sure that these works will cost even less than the amount estimated.

If I may have consent, Mr. Chairman, I wish to extend my remarks in the RECORD by putting in some data with reference to these various constructions in the Reclamation Service and also a biographical sketch of some of the engineers who constructed these works, especially Mr. Arthur Powell Davis and Mr. Frank E. Weymouth, who constructed up until 1923 several of the largest dams in the country.

The CHAIRMAN. The gentleman from Idaho asks unanimous consent to extend his remarks in the RECORD in the manner indicate. Is there objection?

There was no objection.

Mr. SMITH. At Boise, Idaho, we have the Arrowrock Dam, which is the highest dam in the world, and it was built under the direction of these two engineers. Since they left the service five years ago other engineers have been carrying on this work, and we feel that they are as competent as any engineers in the country, not excepting those in the Army and those engaged with the big construction companies of the United States.

Mr. DOUGLAS of Arizona. Will the gentleman yield?

Mr. SMITH. Yes.

Mr. DOUGLAS of Arizona. Did Mr. Arthur P. Davis ever approve the engineering design and the estimates of cost of this project?

Mr. SMITH. I think the records will show that he did approve them.

Mr. DOUGLAS of Arizona. Will the gentleman answer another question? At the time he approved such estimates and designs of the project was he not being retained by the Los Angeles Bureau of Power and Light?

Mr. SMITH. Well, I will let the gentleman make his own statement in regard to that. I do not know.

Mr. DOUGLAS of Arizona. He was.

Dams constructed by United States Reclamation Service

Name	Location	Type of dam	Height	Crest length	Reservoir capacity
			Feet	*Feet*	*Acre-feet*
American Falls	American Falls, Idaho	Concrete gravity and earth fill	78	4,971	1,700,000
Arrowrock	Elmore County, Idaho	Rubble concrete arch, gravity	349	1,100	280,000
Avalon	Eddy County, N. Mex	Earth and rock fill, concrete core	50	1,380	7,000
Belle Fourche	Butte County, S. Dak	Earth fill	122	6,200	203,000
Do	do	Concrete weir, overflow	23	400	
Black Canyon	7 miles above Emmett, Idaho	Concrete masonry	183	1,040	
Boise River	Ada County, Idaho	Rubble concrete weir	45	246	
Bumping Lake	Rainier National Forest, Wash	Earth fill, water deposited core	45	3,425	
Carson River	Churchill County, Nev	23 concrete sluiceways	20	240	
Clear Creek (storage)	Yakima County, Wash	Single concrete arch, gravity abutments	84	404	
Clear Lake (storage)	Modoc County, Calif	Rock fill	33	790	402,000
Cle Elum (storage)	Washington	Rock fill and timber crib	11	193	
Cold Springs	Umatilla County, Oreg	Earth and rock fill	98	3,800	
Corbett (diversion)	Park County, Wyo	Reinforced concrete weir	18	400	
Conconully	Okanogan County, Wash	Hydraulic earth fill	67	1,000	14,400
Deaver (storage)	Wyoming	Earth fill	14	1,300	680
Deer Flat Forest	Canyon County, Idaho	do	16	950	
Dodson (diversion)	Phillips County, Mont	Timber crib, rock filled, removable crest	25	319	
East Canal	Colorado, Montrose County, T. 50 N., 10 W., sec. 15.	Movable flashboard weir (2)	(1)	144	
Easton	Washington, Easton	Concrete gravity (diversion)	65	250	
East Park (storage)	California, Colusa County, T. 17, 18 N., 6 W., sec. 34-3.	Concrete arch, gravity	139	250	
East Park Feed Canal (diversion)	California, Colusa County, T. 18 N., 7 W., sec. 35.	Concrete arch	44	154	
Echo (diversion)	Oregon, Umatilla County, T. 3 N., 29 E., sec. 22.	Concrete weir on timber crib	2½	400	
Echo (storage)	Utah, near Echo	Earth fill	130	1,900	
Elephant Butte (storage)	New Mexico, Sierra County, 120 miles north of El Paso.	Rubble concrete, gravity	306	1,155 1,675	2,638,000
Elephant Butte Dike (storage)	do	Rock and earth fill embankment	42	2,000	
Garnet (diversion)	Colorado, Montrose County, T. 51 N., 10 W., sec. 20.	Rock baskets faced and surfaced with concrete.	6.5	75	
Gerber	35 miles east of Klamath Falls, Oreg	Variable radius arch	85	478	94,000
Gibson (storage)	23 miles northwest of Augusta, Mont	Concrete gravity arch	179	900	140,000
Grand Valley (diversion)	Mesa County, Colo	Masonry ogee weir with roller crest	24	546	
Granite Reef (diversion)	Maricopa County, Ariz	Rubble concrete wier, gravity overflow	38	1,000	
Guernsey	Guernsey, Wyo	Gravel and rock fill	100	560	
Gunnison (diversion)	Montrose County, Colo	Crib on rock fill and movable flood boards	15¾	237	
Horse Creek	Wyoming	Concrete and earth	6	118	
Indian Creek Dike	Wasatch County, Utah	Earth fill, reinforced concrete core wall	38	1,311	
Ironstone	Montrose County, Colo	Pile foundation with timber deck and needle flood boards.	8½	58½	
Jackson Lake	Lincoln County, Wyo	Massive concrete gate section and earth fill	67	4,450	847,000
Joint Head	Maricopa County, Ariz	Concrete weir	10	600	
Laguna (diversion)	Yuma, Imperial County, Ariz.-Calif	Indian weir, concrete and rock fill	40	4,780	
Lahontan (storage)	Churchill County, Nev	Earth and gravel fill, concrete spillways	124	1,400	273,600
Lake Kachess (storage)	Kittitas County, Wash	Earth and gravel fill, rolled	63	1,400	
Lake Keechelus (storage)	do	do	70	6,500	152,000
Lake Tahoe (storage)	California-Nevada	Concrete sluiceways regulator	14	109	
Lost River (diversion)	Klamath County, Oreg	Hollow reinforced concrete	40	290	
Loutseenhizer (diversion)	Montrose County, Colo	Pile and timber weir	8	100	
Lower Deer Flat (storage)	Canyon County, Idaho	Earth fill	40	7,200	
Lower Lost River (diversion)	Klamath County, Oreg	Reinforced concrete	15	204	
Lower Yellowstone (diversion)	Dawson County, Mont	Rock-filled timber weir	12	700	
Leasburg (diversion)	Dona Ana County, N. Mex	Rubble concrete weir	10.8	600	
Malone (diversion)	45 miles southeast of Klamath Falls, Oreg	Earth embankment with spillway and reinforced concrete canal head gate structure.	32	400	
Maxwell Canal (diversion)	Umatilla County, Oreg	Concrete weir on timber crib	2.3	175	
McKay (storage)	7 miles south of Pendleton, Oreg	Gravel fill	160	2,600	
McMillan (storage)	Eddy County, N. Mex	Earth and rock fill	55	2,070	45,000
Mesilla (diversion)	Dona Ana County, N. Mex	Rubble concrete weir	16.7	303	
Mexican (diversion)	Near El Paso, Tex.-Mex	Rubble masonry	4.7	320	

[1] 6 feet and 6 feet 10 inches.

Dams constructed by United States Reclamation Service—Continued

Name	Location	Type of dam	Height	Crest length	Reservoir capacity
			Feet	*Feet*	*Acre-feet*
Minatare (storage)	Scotts Bluff County, Nebr	Earth fill	63	3,760	60,760
Minidoka	Blaine County, Idaho	Rock fill, concrete core combination, hydraulic and rock fill.	86	937	
Montrose and Delta	Montrose County, Colo	Timber weir with concrete apron spillway and cut-off wall.	6.8	68.5	
Nelson Reservoir	Phillips County, Mont	Earth fill	28	9,900	68,500
Northside	California	Concrete weir with removable crest	8	360	
Pathfinder (storage)	Natrona County, Wyo	Broken range masonry arch	218	432	1,070,000
Pathfinder Dike	do	Earth fill	38	1,650	
Percha	Sierra County, N. Mex	Rubble concrete	17	350	
Pilot Butte No. 1	4 miles southwest of Pavillion, Wyo	Earth embankment	40	1,350	
Pilot Butte No. 2	do	do	24	1,150	
Pilot Butte No. 3	do	do	12	3,400	
Point of Rocks	Logan County, Colo	Earth	86		
Power Canal	Maricopa County, Ariz	Rubble concrete weir	12¾	400	
Ralston (storage)	Park County, Wyo	Earth fill	50	2,200	2,100
Roosevelt (storage)	70 miles northeast of Phoenix, Ariz	Rubble masonry arch gravity	280	1,080	1,637,300
Salmon Creek (diversion)	Okanogan County, Wash	Concrete weir	4½	50	
Salmon Lake (storage)	do	Earth embankment	40	1,260	10,500
Selig (diversion)	Montrose County, Colo	Pile and timber weir with concrete sump	6	95½	
Shoshone (storage)	Park County, Wyo	Rubble concrete arch	328	200	456,600
Stony Gorge (storage)	8 miles west of Fruto, Calif	Hollow reinforced concrete	120	828	
Strawberry (diversion)	Utah	Earth	6	100	
Strawberry (storage)	do	Earth fill, reinforced concrete core wall	72	488	255,000
Sunnyside (diversion)	Washington, Yakima County	Concrete ogee weir, earth dike	8½	500	
Sun River (diversion)	Montana, Lewis and Clark, Teton Counties.	Concrete masonry arch	132	212	
Swift Current (diversion)	Montana	Earth and timber crib, rock fill	13	2,800	
Spanish Fork (diversion)	Utah, Utah County	Concrete weir, ogee gravity section	17	70	
St. Mary (diversion)	Montana	Concrete	6½	198	
Three Mile Falls (diversion)	3 miles north of Hermiston, Oreg	Concrete multiple arch	24	800	
Tieton (diversion)	Rainier National Forest, Yakima County, Wash.	Concrete and rock filled crib	3	110	
Tieton (storage)	30 miles west of Yakima, Rimrock, Wash	Earth fill and rock fill concrete core wall	222	905	202,500
Truckee River	Washoe, Nev	16 concrete sluiceways	22	171	
Upper Deer Flat	Canyon County, Idaho	Earth fill	70	4,000	
Vandalia	Valley County, Mont	Reinforced concrete, hollow movable crest	34	1,500	
Whalen (diversion)	Wyoming, Goshen County, T. 26 N., R. 65 W., secs. 2, 11.	Concrete weir and earth	35	300	
Willow Creek (storage)	Montana, Lewis and Clark County, T. 21 N., R. 6 W., sec. 30.	Earth fill	72.5	525	86,000
Willwood (diversion)	Wyoming, 4 miles southwest of Ralston	Concrete gravity ogee weir section	70	320	
Wind River	Wyoming, sec. 23, T. 3 N., R. 2 W	Concrete weir, earth embankment	26–26	1,656	

ENGINEERS FORMERLY IN UNITED STATES RECLAMATION SERVICE

Arthur Powell Davis, civil engineer: Born Decatur, Ill., February 9, 1861; graduate of State normal school, Emporia, Kans.; B. S. Columbian (now George Washington) University, 1888 (Sc. D., 1917); topographer United States Geological Survey 1884–1894, conducting surveys and explorations in Arizona, New Mexico, and California; hydrographer in charge of all Government stream measurements, 1895–1897; hydrographer in charge of hydrographic examination of Nicaragua and Panama canal routes, 1898–1901; chief engineer United States Reclamation Service, 1906–1914; director of same from 1914 to 1923; consulting engineer, Panama Canal, 1909. Member American Society of Civil Engineers (president, 1920), Washington Academy of Sciences (vice president, 1908), Washington Society of Engineers (president, 1907), etc. Author: Elevation and Stadia Tables, 1893; Progress of Stream Measurements, 1897; Irrigation near Phoenix, Ariz., 1897; Irrigation Investigation in Arizona, 1898; Hydrography of Nicaragua, 1899; Hydrography of the American Isthmus, 1902; Water Storage on Salt River, Ariz., 1903; Irrigation Works Constructed by the United States Government, 1917; treatise on irrigation engineering; also articles in magazines on irrigation, the isthmian canals, and other hydrographic subjects.

Frank Elwin Weymouth, civil engineer: Born Medford, Me., June 2, 1874; civil engineer, University of Maine, 1896. Sewer and waterworks construction, Boston and Malden, Mass., 1896–1899; assistant city engineer, Winnipeg, Manitoba, January–August, 1899; with Isthmian Canal Commission at Nicaragua and Washington, 1899–1901; resident engineer Guyaquil & Ecuador & Quito Railway Co., 1901–1902; with United States Reclamation Service since 1902, on surveys and investigations in Montana and North Dakota, 1902–1908; project engineer in charge of lower Yellowstone project in eastern Montana, 1908–1915; supervising engineer in charge of Idaho district, including Snake River drainage in Wyoming, Idaho, and eastern Oregon, covering irrigation of more than 400,000 acres of land, and storage dams at Jackson Lake, Wyo., and on upper branches of Snake and Boise Rivers; completed building the Arrowrock Dam; chief of construction, United States Reclamation Service, in charge of all work (except legal) in the West, 1916–1920; chief engineer United States Reclamation Service, April 1920–1923. Member American Society of Civil Engineers, Alpha Tau Omega. Republican.

ENGINEERS NOW IN THE UNITED STATES RECLAMATION SERVICE

The present Commissioner of Reclamation, Dr. Elwood Mead, enjoys not only a national but an international reputation for his skill as a great engineer and economist.

Elwood Mead, engineer, Commissioner Bureau of Reclamation; born Patriot, Ind., January 16, 1858; B. S., Purdue University, 1882, M. S. 1884; D. engineering, Purdue, 1904; LL. D., University of Michigan, 1925; assistant engineer, United States Engineers 1882–83; professor in Colorado Agricultural College, 1883–84 and 1886–1888; Territorial and State engineer of Wyoming, 1888–1899; chief irrigation and drainage investigation, United States Department of Agriculture, 1897–1907; professor institutions and practice of irrigation, University of California, 1898–1907; chairman State rivers and water-supply commission, Victoria, Australia, 1907–1915; professor rural institutions, University of California, 1915, and chairman land settlement board; Commissioner of Reclamation by appointment of President Coolidge April, 1924. Consulting engineer for various irrigation and waterworks companies. Member American Society of Civil Engineers, British Institute of Civil Engineers. Has written articles, reports, etc., on irrigation, engineering, and other subjects. Author: Irrigation Institutions; Helping Men Own Farms. Address: Bureau of Reclamation, Washington, D. C.

Raymond F. Walter, chief engineer Bureau of Reclamation, 441 Welton Street, Denver, Colo.: Civil and irrigation engineer; born Chicago, Ill., October 31, 1874; education, public and high schools, Fort Collins, Colo. Degree of B. S., Colorado Agricultural College, in irrigation engineering in 1893. Irrigation Engineering Co., surveyor, Weld County, Colo., 1898–1902; city engineer, Greeley, Colo., 1901–1903; project manager United States Reclamation Service, Belle Fourche project, 1903–1908; supervising engineer Rocky Mountain division, 1908–1915; senior engineer southern district, 1915–16; assistant chief of construction, 1916–1920; assistant chief engineer, 1920–1924; acting chief engineer, 1924–25. Appointed chief engineer Bureau of Reclamation May, 1925. Engineer on construction of many canals, reservoirs, and irrigation systems in northern Colorado and Greeley district; engineer in charge of construction of Belle Fourche Dam and project system for irrigation of about 100,000 acres in South Dakota. Supervising engineer on the construction of the Grand Valley irrigation project of about 50,000 acres and the completion of the construction of the Gunnison tunnel and the Uncompahgre project; also Pathfinder Dam, and North Platte project; chief engineer on the construction and operation and maintenance of 25 large irrigation projects in the Western States. Member American Society of Civil Engineers.

Andrew J. Wiley, consulting engineer Bureau of Reclamation, Boise, Idaho. Engineer, born in New Castle, Del., July 15, 1862; educated at Delaware College, Newark, Del., Ph. B. 1882; engaged in survey and construction, Philadelphia and Baltimore branch Baltimore & Ohio Railroad in Delaware and Maryland in 1883; rodman and assistant engineer Idaho Mining & Irrigation Co., Boise, Idaho, 1883–1886; assistant engineer of construction Union Pacific Railroad, Butte, Mont., 1886–1888; chief assistant engineer Idaho Mining & Irrigation Co. on construction large irrigation system, 1882–1892; chief engineer and

manager Owyhee Land & Irrigation Co., Grandview, Idaho, constructing large irrigation system, 1892–1898; chief engineer Swan Falls power plant, Boise, Idaho, 1900–1902; chief engineer Boise-Payette River Electric Power Co. and city of Cheyenne, Wyo., on construction of Granite Springs Reservoir, 1902–1904; chief engineer Barber Lumber Co., Boise, Idaho, for construction of large dam and power plant on Boise River, 1904–1905; consulting engineer Twin Falls North Side Land & Water Co., Twin Falls, Oakley Land & Water Co., Twin Falls Salmon River Land & Water Co., 1906–1914; chief engineer Trade Dollar Consolidated Mining Cos., Swan Falls power plant extension, 1909–1911; Great Shoshone & Twin Falls Water Power Co., 1907–1914; Southern Idaho Water Power Cos., American Falls power plant, 1911–1914; consulting and designing engineer Don Pedro Dam and power plant, for Turlock and Modesto irrigation districts, California, 1918–1923; consulting engineer, storage and power development of San Joaquin River water-storage district, and of Kern River water-storage district, California, 1924–1925; consulting engineer on Melones Dam, of San Joaquin and Oakdale irrigation district, California, on construction of Exchequer Dam and power plant, 1924–1925; consulting engineer reconstruction of irrigation system, Bitter Root Valley irrigation district, Montana, and West Okanogan Valley irrigation district, Washington, 1923–1924; consulting engineer construction of Loga City power plant, Utah, 1924–1925; consulting engineer Bureau of Reclamation 1905 to the present time; member American Society of Civil Engineers and Institute of Consulting Engineers.

Louis C. Hill, consulting engineer, Bureau of Reclamation, Los Angeles, Calif.; consulting engineer, born Ann Arbor, Mich., February 22, 1865; degree of B. S. in civil engineering, 1886; B. S. electrical engineering, 1890; master of engineering (honorary), 1911, University of Michigan; division engineer, Duluth, Redwing & Southern Railway, 1887; assistant engineer, United States Army, 1888; professor of hydraulic and electrical engineering, Colorado School of Mines, 1890–1903; supervising engineer in charge of Salt River project, 1903–4; in charge of Arizona project, 1905–6; in charge of the southern district, 1906–1914 (district comprising Utah, Texas, Arizona, New Mexico, southern California, and parts of Colorado and Wyoming); charge of Roosevelt Dam, Elephant Butte Dam, Laguna Dam, and other works, including 6 miles of tunnels for Bureau of Reclamation; consulting engineer and member of firm of Quinton, Code & Hill, consulting engineers, since 1914; consulting engineer on many projects—Gibraltar high-arch dam; Pine Flat Dam near Fresno, Madera Dam near Madera, Calif., Boulder Canyon Dam, 700 feet high, across the Colorado River; member of board of engineers, Columbia Basin district, 1,800,000 acres; member of board of engineers of water supply of the city of Los Angeles; consulting engineer, United States Army, construction of Camp Kearney during war; member United States-Mexican Commission to divide the waters of the Colorado and Rio Grande; member of American Society of Civil Engineers, Geographic Society, and Forestry Association.

David C. Henny, consulting engineer, Bureau of Reclamation, Portland, Oreg. Born Arnhem, the Netherlands, November 15, 1860. Degree of civil engineer from the Government Polytechnic University, Delft, the Netherlands, 1881. On railroad location, Holland, 1881–1884; railroad waterworks and irrigation construction, Eastern, Middle Western, and Mountain States, 1884–1891. General manager, Excelsior Wooden Pipe Co., San Francisco, Calif., 1892–1902; general manager, Redwood Manufacturing Co., San Francisco, Calif., 1902–1905. Supervising engineer, Pacific coast district, 1905–1909. Consulting engineer since 1909. Private practice as consulting engineer, Portland, Oreg., since 1910. Director, Lumbermans Trust Co., Portland, Oreg. Introduced wooden-stave pipe on the Pacific coast. Built large number of pioneer lines, first direct-motor drive for heavy woodworking machinery, new features in earth dam designs, connected with construction of important dams of the Bureau of Reclamation. Designed Henny-Venturi Weir. Contributor to the American Society of Civil Engineers. Transactions on "earth dams" and numerous discussions. Contributed to 1915 International Engineering Congress, San Francisco, Calif., jointly with A. P. Davis, on "dams." Member American Society of Civil Engineers (past director); Oregon Technical Council (past president); Royal Institute of Holland.

Osmar Lysander Waller, consulting engineer, Bureau of Reclamation: Civil engineer, educator; born Lyken, Ohio, November 30, 1857; P. H. B., 1883, P. H. M., 1887, Hillsdale College; student law department, University of Michigan, 1883–84 and 1886 to 1887. Student in mathematics, University of Chicago. Superintendent of schools, Dexter, Mich., 1884–1886, 1887–1890; admitted to Michigan bar, 1886; superintendent of schools, Colfax, 1890–1893; professor of mathematics and civil engineering since 1893 and vice president since 1909, State College of Washington; expert in irrigation, United States Department of Agriculture, 1900–1904; in charge of field work in summer; consulting engineer, State Board Land Commission of Idaho, on construction work of South Side Twin Falls Land & Water Co., 1907–1908; on Marysville project, 1908; delegate to conference of governors, Washington, D. C., 1908; chairman of commission to recommend to Washington legislature changes in water laws, 1910; expert for Twin Falls Land & Water Co., Twin Falls, Idaho, 1912. Consulting engineer with Bureau of Reclamation. Vice president first national bank, member of board of education, Pullman, Wash., 1897–1903; secretary of the Columbia Basin Survey Commission. Contributed bulletins on irrigation and irrigation laws. Member of American Society of Civil Engineers.

Leslie Newman McClellan, Wilda Building; residence, 1065 Logan Street, Denver, Colo. Chief electrical engineer, Bureau of Reclamation; bachelor of science in electrical engineering, University of Southern California; since 1911 with the United States Reclamation Service; assistant engineer in charge of power system on Salt River project, 1911–1917; 1919 to 1924, electrical engineer in office of chief engineer of the United States Reclamation Service; 1924, engineer transmission department of Southern California Edison Co.; 1925, chief electrical engineer, Bureau of Reclamation, Denver, Colo.; entered actitve duty as first lieutenant, Engineer Reserve Corps, United States Army, 1917; served overseas, 1918; went through British tank school; served with British on the western front and also attached to the French tank corps for instruction; returned to United States June 18, 1918; served as instructor in tank school until discharged, December 20, 1918; now captain, Officers' Reserve Corps; associate member American Institute Electrical Engineers.

John L. Savage, chief designing engineer, Bureau of Reclamation, Denver, Colo.; with Bureau of Reclamation as engineer aide, 1903–4; assistant engineer, 1904–5; engineer, 1905–1908; resigned, 1908; in private practice with A. J. Wiley, 1908–1914; designing engineer, Bureau of Reclamation, 1914–1926; chief designing engineer, 1926 to date. Has had responsible charge of all civil engineering designing work for the entire Bureau of Reclamation since 1914. Recent work has included the preparation of designs, specifications, and advertisements for a number of important dams, the construction of which has been authorized by Congress, among them being the Stony Gorge Dam, Orland project; Owyhee Dam, Owyhee project; Gibson Dam, Sun River project; Echo Dam, Salt Lake Basin project. The estimated cost of these new structures range from $1,250,000 to $6,000,000.

Walter Rollo Young, construction engineer, Bureau of Reclamation, Ellensburg, Wash.: Born, Butler, Ind., 1908; B. S. in mining engineering, University of Idaho. June–September, 1902, chainman, Cook County, Minn. June to September of years 1903 and 1904, rodman, Great Northern Railway. Summers 1905–1908 and June, 1908, to June, 1909, mining and assaying in Idaho, Canada, and Arizona. July to December, 1909, mine surveyor, surface and underground work, Wallace, Idaho. January to February, 1910, topographer, Inland Empire Railroad, near Colfax, Wash. March to May, 1910, draftsman, Sweetwater Irrigation Co., Lewiston, Idaho, design and layout of pressure irrigation system. June, 1910, to July, 1911, inspector on plans and computations in State engineer's office, Boise, Idaho, in connection with Carey Act work. August, 1911, to date with United States Reclamation Service as follows: August, 1911, to October, 1916, assistant engineer acting as designer on construction of Arrowrock Dam, Idaho, including design of construction camp, construction plant, diversion works, dam, spillway, logway, etc.; some instrument work and concrete inspection; November, 1916, to December, 1920, assistant engineer and engineer in charge of mechanical division, designing department, chief engineer's office, Denver, Colo., design and standardization of gates and mechanical devices for irrigation structures and in charge of design and estimates for storage works, including dams, spillways, outlet works, etc.; January, 1921, to April, 1924, engineer in charge of investigations in connection with development of Colorado River, including field investigations at four dam sites in the vicinity of Boulder Canyon, and designs and estimates for dams and appurtenant structures at Glen Canyon, Diamond Creek, Bridge Canyon, Boulder Canyon, Black Canyon, Bulls Head, Mohave Canyon, and Parker; May, 1924–Apr., 1926, engineer in charge of investigations of proposed barrier below the mouth of Sacramento and San Joaquin Rivers, to prevent incursions of salt water, and of the proposed Iron Canyon project to irrigate some 225,000 acres in Sacramento Valley. Since April, 1926, construction engineer in charge, Kittitas division, Yakima project, Ellensburg, Wash.

Harold Dearborn Comstock, Riverton, Wyo. Civil engineer; born Chelsea, Vt., June 13, 1882. B. S., Dartmouth College, 1903; C. E., Thayer School of Civil Engineering, 1904. With United States Reclamation Service since 1904 (except November, 1908, to March, 1909, with Denver Reservoir Irrigation Co., of Denver, Colo.); stream gaging work, 1904–5; chief of party on surveys and construction, 1905–1908; resident engineer in charge construction, all above on Belle Fourche project, March–November, 1909; chief of party on construction, Pathfinder Dike and Tunnels, 1909–10; in charge of above, including operation, 1910–1913; in charge of drainage, 1913–1918; also office engineer and principal assistant to project manager, all latter on North Platte project, 1915–1918; project manager Riverton project, since 1918. Superintendent, Riverton project, Bureau of Reclamation, Riverton, Wyo. Member American Society Chemical Engineers, A. A. A. S., Thayer Society of Engineers, National Geographic Society.

Edward B. Darlington. Superintendent, Minidoka project, Bureau of Reclamation, Burley, Idaho. Civil engineer, born West Chester, Pa., March 9, 1874. Special course in science and mathematics, West Chester State Normal School. Engaged in mining and surveying with

gold dredging company in Boise Basin, Idaho, 1898–1903; with State engineer of Idaho and Intermountain Road Commission in charge of irrigation surveys and mountain-road construction, 1903–1906; locating engineer, Big Lost River Irrigation Co., 1906–7. Private practice, Boise, Idaho, 1907–8; locating engineer, United States Reclamation Service, 1908–9; locating engineer, assistant chief engineer, and chief engineer, Twin Falls-Salmon River Land & Water Co., 1909–1917; chief engineer, Twin Falls North Side Land & Water Co., 1917–1921; project manager, Minidoka project, United States Reclamation Bureau, Burley, Idaho.

Homer Johnston Gault, construction engineer, United States Bureau of Reclamation, Denver, Colo.; residence, Painesville, Ohio: Civil engineer; born Mahoning County, Ohio, 1869; educated in public schools and Canfield College, Ohio. Engaged on location and construction of Great Northern Railway, 1889–1893; assistant engineer with the Cleveland Frog & Crossing Co., and the Osborn Engineering Co., 1894–1902; locating engineer on West Virginia & Kentucky Railroad and other work, 1903–1905; engineer on Key West extension of Florida East Coast Railway, 1906; engineer in the United States Reclamation Service since 1906. He has made investigations and surveys on Elephant Butte Dam; construction engineer Mesilla and Percha Dams, Garfield Flume, Hatch Siphon, and important canals on the Rio Grande project; in charge of important secondary investigation; construction engineer Salmon Lake Dam, Okanogan project; and preliminary work in 1924 on the Kittitas division of the Yakima project. He is at present supervising the construction of the Stony Gorge Dam, Orland project. This dam is the buttressed type with a reinforced-concrete slab approximately 800 feet long and 120 feet in height above the stream bed. The estimated cost, exclusive of the right of way, is $815,000. The Ambursen Dam Co. of New York City has the contract for this job. Member American Society of Civil Engineers.

Sinclair Ollason Harper, general superintendent of construction, Bureau of Reclamation, Denver, Colo.; civil and irrigation engineer; B. S. in C. E., University of California, 1907; rodman and instrumentman, Western Pacific Railway Co., California, 1905–6; transit man, Pacific Improvement Co., Monterey, Calif., two months; engineer in charge designs and estimates for sewerage system, Montrose, Colo., three months; junior engineer United States Reclamation Service, Uncompahgre project, Colorado, 3 months, 1907; assistant engineer, Grand Valley project, Colorado; in charge topographic and location surveys, preparation of plans and estimates, and construction of important features of project, 1908–1917; project manager Grand Valley project, Colorado, in charge construction and operation of entire project, 1917–1925; general superintendent of construction, June 11, 1925, to date, and during the absence of chief engineer is in charge of Denver office as acting chief engineer, Bureau of Reclamation, Denver, Colo. Has written various articles for engineering periodicals. Member American Society of Civil Engineers.

Frank Arthur Banks, superintendent Owyhee project, Bureau of Reclamation, Nyssa, Oreg.; civil engineer; graduate University of Maine, 1906. Since 1906 continuously engaged with United States Reclamation Service; assistant engineer, first as field engineer, later as district designing engineer, 1906–1913; engineer Jackson Lake Dam, 1913–1916; 1916–1923 engineer United States Reclamation Service on preliminary surveys and investigations; also in charge operation and maintenance of Jackson Lake Reservoir (fourth largest in United States and fifth in world) and the delivery of stored water therefrom; made preliminary plans for Arrowrock Dam, as well as complete plans and construction for Jackson Lake Dam; construction engineer American Falls Dam 1923–1927. Since June 1, 1927, superintendent Owyhee project, Oregon. Associate member American Society Civil Engineers, American Association of Engineers, National Geographic Society.

Mr. SPROUL of Kansas. Will the gentleman yield for a question?

Mr. SMITH. Certainly.

Mr. SPROUL of Kansas. Does your bill provide for the issuing of bonds for repayment of the cost of the project?

Mr. SMITH. That provision was in the bill of the last Congress but it is not in this bill because it is assumed that the general fund will be ample to meet the annual appropriations. The construction of this project would extend over a period of about eight years, so that it would not draw up on the appropriations at the rate of probably more than $12,000,000 or $15,000,000 a year. The Secretary of the Treasury has authority under general law to issue bonds in case of an emergency, but that is not specially provided for in the bill.

Mr. SPROUL of Kansas. What rate of interest would the Government get for its money?

Mr. SMITH. It would get 4 per cent.

Mr. SPROUL of Kansas. And in addition to that it would receive back the principal cost of the project within 25 to 40 years?

Mr. SMITH. Yes; and the Secretary can not spend any money until he has contracts which will insure the return of the money within 50 years at 4 per cent.

Mr. VINSON of Kentucky. Will the gentleman yield there?

Mr. SMITH. Yes.

Mr. VINSON of Kentucky. What are the estimated receipts?

Mr. SMITH. They have not been figured out year by year.

Mr. VINSON of Kentucky. If they have not been figured out how can the gentleman say that the cost of the improvement will be paid in 25 years or 40 years or 50 years?

Mr. SMITH. They are tentatively estimated and the Secretary, as provided by this bill, will have to secure all these data before he can spend any of the appropriation.

Mr. VINSON of Kentucky. But if you have not had the figures submitted in the hearings how can you say that the cost of the improvement will be paid in 25 years?

Mr. SMITH. I said within 50 years and possibly within 25 years.

Mr. VINSON of Kentucky. I have been told that has been figured out. I would like to have that information, because I think it would have a direct bearing upon the matter.

Mr. SWING. May I say to the gentleman that I will be pleased to insert that information in the RECORD.

Mr. SMITH. I think that information has not been collected by the Government but by the various cities. They have indicated the amount of water they will need and the amount of power they will need and have submitted their proposition.

Mr. MOORE of Virginia. What I understand is this. The gentleman says the execution of the project is conditioned upon the Secretary in advance making contracts which will insure repayment to the Government within a maximum period of 50 years.

Mr. SMITH. Yes.

Mr. MICHENER. How long will it take to complete the project?

Mr. SMITH. It is assumed that it will take from five to eight years.

Mr. MICHENER. If we pass the bill now the flood-control feature may not be operative to protect the Imperial Valley for a period of five or eight years.

Mr. SMITH. The flood-control feature will be completed prior to that time.

Mr. MICHENER. When will it be completed to such an extent that it will afford flood protection?

Mr. SMITH. I should say in four or five years.

Mr. MICHENER. Assuming there is no litigation involved, what is the gentleman's judgment as to whether there will be litigation provided Arizona does not comply with the compact?

Mr. SMITH. I assume that Arizona will appeal to the court, but I think it is safe to say that the courts would expedite the consideration of the action.

Mr. MICHENER. Is it not the gentleman's theory that if legislation is enacted Arizona will come in?

Mr. SMITH. We expect her to come in.

Mr. MICHENER. If Arizona does not come in, it will undoubtedly be years before any work can be done?

Mr. SMITH. I do not think the determination of the matter in controversy will be long delayed.

Mr. DOUGLAS of Arizona. Will the gentleman yield?

Mr. SMITH. Yes.

Mr. DOUGLAS of Arizona. The gentleman admits the probability of litigation, and I can assure the gentleman that the minute this bill becomes a law Arizona will bring suit to enjoin the Government. The gentleman will recollect the time it took to decide the Colorado-Wyoming case?

Mr. SMITH. There was not the emergency there that there is in this case and no such occasion for expediting the adjustment of the matter. [Applause.]

Mr. DOUGLAS of Arizona. Mr. Chairman, I make the point that no quorum is present.

The CHAIRMAN (Mr. ACKERMAN). The gentleman from Arizona makes the point of no quorum. The Chair will count. [After counting.] One hundred and two Members present, a quorum.

Mr. DOUGLAS of Arizona. Mr. Chairman, I yield one hour to the gentleman from Utah [Mr. LEATHERWOOD].

Mr. LEATHERWOOD. Mr. Chairman, for more than six years I have studied the problem connected with this legislation. I have attended all the hearings of the committee in the House with the exception of those held during the winter when I was ill. It would afford me great pleasure if I had the time to discuss the interesting questions connected with this bill but time forbids. The gentleman from Arizona [Mr. DOUGLAS] will discuss the economic and the engineering features connected with the bill in a way I could not hope to do, and my colleague from Utah [Mr. COLTON] will discuss the effect of this legislation on our State.

I have opposed this bill for years on its merits. I have endeavored to bring out the truth concerning it in the com-

mittee meetings. I have submitted two minority reports against it in which I have presented and analyzed the facts which seem to me to prove it to be a wholly unnecessary, unsound, and dangerous measure. I have opposed it because it is dishonest in its pretentions, being an attempt to thrust the Federal Government into the greatest hydroelectric power project in the world under the guise of a humanitarian measure for flood control. I have opposed it because it is entirely unsound in its economic aspects and will mean the loss to the Federal taxpayer of every dollar expended upon it. I have opposed it because it means the surrender to a Federal bureaucracy of control over the most vital economic resource of the States in the Colorado River Basin. I have opposed it because it is based upon an engineering scheme so absurd, so dangerous, so badly conceived that it can only be called preposterous. I have opposed it because it is wholly unnecessary to take these risks, to change the policy of the Federal Government, to surrender the rights of the States, to make this foolish and unwarranted expenditure in order to accomplish the benefits which it is claimed are sought hereunder.

In short, I have endeavored to confine my discussion and opposition to this measure to the facts, to stay away from personal attacks, and to have proponents meet me on the same grounds. Other opponents have made the same endeavor. The minority reports of Congressmen HAYDEN and WHITTINGTON in the last session of Congress and of Congressman DOUGLAS in the present session have been confined to a discussion of facts. The same has been true of the opponents in the Senate of the United States.

The proponents of the measure have, however, not chosen to meet the issue on its merits. Whether from necessity or otherwise, proponents have failed to seriously discuss the objections to their bill. Perhaps this is because they are aware that they are beaten on the facts; that they can not show the necessity for their measure or the truth of the statements which they make in support of it. However that may be, and whatever the reason, the fact remains that this bill is not supported by facts but by the most astounding misstatements of fact—misstatements challenged time and again, never substantiated by proof, but nevertheless constantly repeated.

Instead of meeting opponents with argument on the merits, with facts in proof of their contentions, the constantly increasing tendency of proponents has been to attack the character of opponents and by innuendo, by vituperation, by insults to make it appear that opponents are actuated by unworthy motives, by ulterior influences which cast reflection upon their integrity and honor. This kind of attack has not been confined to Members of Congress who oppose this bill. It has gone on for years before the committees considering the bill. Reputable business men, engineers of the highest standing who have dared to offer testimony against the feasibility and soundness of this measure have been subjected to vicious cross-examination which delved into their motives and questioned their honesty.

Now, the case for this measure has not been presented before the committees of Congress nor on the floor of either House. Proponents have had as their chief forum of discussion of their side of the case a string of newspapers owned by William Randolph Heart, published and circulated from one end of the country to the other. It is in this section of the press that the kind of attack of which I have spoken has been chiefly carried on. The Hearst press, in other words, has been constituted an extralegislative body on behalf of this measure.

In view of this situation and in view of the dominant part which this press has taken in the promotion of this scheme, in view of the obvious selection by proponents of those organs of publicity as their leaders in this fight, and in view of the challenge which these papers are to-day making to the Congress of the United States with reference to this legislation, I find it impossible to longer ignore the issue which is thus presented.

I had hoped to avoid the necessity of discussing this issue, but the Hearst press would not have it so. Within the last few days I have been made the subject of one of their vicious, cowardly attacks masquerading as a news item. In January and February of this year two gentlemen who have interested themselves in this legislation, one representing the State of New Mexico and the other the city of Denver, Colo., Mr. Francis C. Wilson and Mr. L. Ward Bannister, were circulating amongst the Members of Congress a new draft of a bill for this project which they had drawn. They discussed their draft with me and gave me a copy of it. Although I was opposed to their draft because it still authorized this project, I did take the trouble to draw certain amendments to it which, to my mind, made it less objectionable. I understand they were also discussing their draft with Mr. Stephen B. Davis, who, I understand, is director of an organization of some of the public-utility companies of the country. Whether they presented my amendments to this gentleman or some one else presented them to him I do not know. I only know that I did not see Mr. Davis, talk to him, or present him with those amendments. However, it was perfectly proper for him to have them. There was no secret about them.

Now, in the Federal Trade Commission investigation of the power industry which is now in progress, a letter was presented in evidence written by Mr. Davis to another member of his organization with which he apparently sent a copy of the so-called Bannister-Wilson draft of a substitute for this measure and with that draft a copy of my suggested amendments, referring to them in his letter as amendments "representing Mr. LEATHERWOOD'S ideas." That is the entire story so far as I know it.

Now, what does the Hearst press do with this story? They printed the letter, which was perfectly proper, but in addition to that they ran in their so-called news story which accompanied it the suggestion by the plainest innuendo that I had been conniving with the power companies in drawing a substitute bill and amendments to this measure. Not content with that, they also printed an interview with the author of this bill, in which the gentleman expressed astonishment that the Power Trust was so well acquainted with my ideas. Further than that, as a part of the same story, they direct attention to the fact that I have in the past offered amendments which they falsely state are designed to turn this power development over to private power companies.

This is only one instance of the kind of attack to which Members who dare oppose this measure are subjected. Other Members of the House have been subjected to the same thing. And for what purpose? Why, simply and solely for the reason that Mr. William Randolph Hearst chooses to use his kind of weapon to force this bill through Congress. In those tactics there is no discussion of merit, no attempt to present facts, but, on the contrary, an attempt to bring under suspicion the character, honesty, and integrity of opponents, and thus through prejudice, and prejudice alone, to arouse support for this bill which can be put over in no other way.

Mr. Hearst has issued the challenge. He has begun the attack. He has made the issue. And since Hearst and the Hearst press are the unofficial but most powerful representatives of proponents, I am forced to accept the issue as made. By this unwarranted, untruthful, and vicious attack on me Mr. Hearst has invited and challenged me to tell the truth and the whole truth concerning this measure and the forces which are behind it.

I could, in fact, no longer withhold the truth concerning this measure without connivance at the fraud and conspiracy in which it is enshrouded. I propose to show that it is one of the most shameful pieces of political trickery ever seriously considered by the Congress; that there is no sound argument for the bill; and that it would have no chance for passage but for the fear of Members of Congress of the most unscrupulous, dangerous, and destructive influence in American life to-day—the Hearst press.

Gentlemen of the House, the yellow press, the most disgraceful press in any country in the world to-day, owned and published by a man who stops at nothing to carry his point, is the only substantial support which this bill has in the United States to-day. Through that press have been spread the misinformation and threats concerning this measure which have aroused such support as it has, and it is upon that kind of support and upon those tactics rather than on the merits that it is hoped to force this bill through Congress.

The issue on the facts has been evaded. I accept the issue tendered, and I define that issue for anyone who may have pledged his vote and conscience for this bill: The first, the main, the primary issue on this bill is whether William Randolph Hearst and his string of yellow newspapers, which sling their filth and debauch the mind of our people across the entire country, shall control the Congress of the United States and by intimidation and threats, by false statements, and propaganda disguised as news make possible this infamous raid upon the taxpayers of the United States called the Boulder Dam bill. Your vote on this measure, my fellow Members, will therefore, first and foremost, answer this question: Do you belong to Hearst and the things he stands for, or do you belong in the ranks of those who arrived at an independent judgment on the merits of legislation?

You know, each and all of you know, that the things I have said of Hearst and his press are true; that they are admitted everywhere in private conversation to be true. And you know and I know that the reason he is tolerated, the reason for his malignant influence, is fear, fear of his political power, fear that he is dangerous to a man's success, fear that he will ruin the character and reputation of any man he sets out to "get."

Yet, fear him as you will, the man is not all powerful. The leading Democratic candidate for President demonstrated that when he accepted the challenge of Mr. Hearst in New York State some years ago and "licked him to a frazzle." I commend the courage, the audacity, of Al Smith to some of the members of his own party in the Congress of the United States who, either through fear or through a desire to curry the favor of Mr. Hearst, are supporting this measure and issuing statements in Mr. Hearst's papers in support of it.

The story of the interest of Mr. Hearst in Boulder Dam is so interlocked with the whole sorry, sordid story of the scandal connected with the project that the whole must be told in order to present the picture in its proper perspective.

Some of Hearst's biggest newspapers are in California—two of them are published in Los Angeles. For the last 18 years there has existed in Los Angeles a bureau of power and light. As is the rule with all publicly owned bureaus of this character, it soon became a political factor, and it was managed by politicians for their political benefit. The bureau got its lease of life with the building of the Los Angeles aqueduct, and after years of political bickering and maneuvering this bureau became firmly intrenched in the manufacture and distribution of electric power and light in the year 1922. At that time and since the only electrical energy this bureau has had to distribute was that generated on the line of the water aqueduct. The bureau has been buying most of its power from private companies and then distributing it. But with the great growth of Los Angeles during its big boom years the political power of this bureau, with its hundreds of employees, became the greatest single factor in Los Angeles local politics and a very considerable factor in state-wide politics. Naturally, those managing the bureau wanted more electric power as well as more political power, because the more business under their control the more employees—the bigger the plaything the more powerful the group which controlled it.

Now, Hearst and his newspapers tied in with this political group in Los Angeles as they had in San Francisco. The Hearst papers have, in effect, been the house organ of the political bureaus engaged in municipal-ownership enterprises in these two large cities of California. The Hearst papers were their mouthpiece, and the more the political power of the group gained the better it was for the Hearst papers in their fight for a place in that kind of sun which shines on such despicable organs of misinformation.

Hearst likes to win in political contests. True, he often waits until he finds out who the winner is going to be before he commits himself, but he likes to be allied with local groups having large political power. This gives him more power; it increases the circulation of his papers, and with success in this line comes still greater influence on public affairs.

In the year 1922 with the purchase by the bureau of power and light of the principal distributing system in Los Angeles, the problem of acquiring more power to distribute became acute. At this time the Reclamation Service was about to investigate Boulder Dam. It was a power dam pure and simple. There was no other excuse for the proposal to build it.

Now we come to the indisputable, the inescapable evidence, and I challenge anyone to dispute it, to disprove it.

On February 16, 1922, the Board of Public Service Commissioners of the City of Los Angeles hired the Bureau of Reclamation of the United States to formulate and produce a power project on the Colorado River. They appropriated out of their power revenue fund $75,000 as an initial investment in the project and paid this sum out to the Reclamation Service. Under date of February 16, 1922, a resolution appears in the minutes of this board of public-service commissioners which recites that—

Whereas the city of Los Angeles has made application for permit to develop the Boulder Canyon reservoir on the Colorado River with a view of obtaining from that source sufficient power for the future needs of Los Angeles; and

Whereas the application for the permit requires that the city provide or cause to be provided data as to physical condition in, along, and in the vicinity of Boulder Canyon, in order to determine the feasibility of the project and where the dam should be located, the type, construction, and height thereof; and

Whereas it is practicable to obtain such information through the United States Reclamation Service, which, if provided with the necessary funds, proposes to complete investigations disclosing the facts required, and the Reclamation Service estimates that the amount required from the city for said purpose will be $75,000, to be paid in installments as work progresses; "and it appearing to be to the best interests of the city and this board, in fulfilling the public duty to provide an ample power supply for the inhabitants of Los Angeles, that this board should undertake to advance said amount for said purposes": Therefore be it

Resolved, That this board, out of power revenue, undertake to advance and pay to the United States Reclamation Service the sum of $75,000 to carry on the work of said Reclamation service in investigating the site of the proposed dam at Boulder Canyon on the Colorado River for the purposes aforesaid.

What does this resolution mean? What does it say? It says that whereas the power bureau of Los Angeles wants a greater power supply and wants to obtain it from the Colorado River, and whereas the Reclamation Service can be hired to make the preliminary plans for this power project, we hereby appropriate out of the power revenue fund $75,000 with which to pay the Reclamation Service for producing a power project for the city of Los Angeles.

Note that not one word is said about water or about a water supply, or about the need of a supply of power to pump water; not one word is said about flood control or irrigation. The Board of Public Service Commissioners of Los Angeles were interested only in a power supply—a supply of power to be sold and distributed in the city of Los Angeles, and not a power supply to be used for pumping water from the Colorado River.

It is obvious also that the board of public service commissioners were fully aware that the Reclamation Service would be a most helpful agency in the matter of this power project. A power project planned and initiated by the Reclamation Service held forth promise of Federal aid in its development. The Reclamation Service might hold the key to the United States Treasury. The Reclamation Service was paid eventually $140,000 by Los Angeles and affiliated agencies for the investigation of this Boulder Dam power project, and the Reclamation Service made good on its contract. They were hired to do just what they did: To produce not a flood control, not an irrigation dam but a power dam, and they produced the plans for that dam which is the one proposed to be authorized in the Boulder Dam bill.

Keeping in mind, then, that the Reclamation Service was hired in 1922 by the power bureau of Los Angeles to produce a power project at Boulder Canyon, note that two years later, February, 1924, the Weymouth report for the Boulder Dam power project was submitted to Congress.

The proposal for Boulder Dam was, of course, submitted as a plan of the Reclamation Service. But it was in reality a plan of the bureau of power and light of Los Angeles because it had been produced at their behest and with their money.

This resolution and these payments of $140,000 to the Bureau of Reclamation explain many things: They explain why a power project was advocated by the Reclamation Service instead of a flood-control project. Here also is the explanation of the fact that this plan for Boulder Dam is a plan approved only by the engineers of the Reclamation Service. The Federal Power Commission and Geological Survey engineers would not approve it; on the contrary they disapproved it. The Secretary of the Interior did not approve it; on the contrary he warned Congress that it should be careful to investigate this proposal in all its details and to compare the needs involved with the plan proposed.

Finally, on March 24, 1924, Secretaries Weeks, Work, and Wallace, as members of the Federal Power Commission, wrote a letter with reference to this Boulder Dam proposal to Chairman SMITH of the House Irrigation Committee. In that letter these three Cabinet officers condemned and rejected the Boulder Dam proposal. They pointed out that it was not an irrigation or flood-control project but a power project, which would involve an expenditure of $200,000,000; that the project could be justified on no other ground than as a power project to be undertaken and developed by the Federal Government; that it was wholly unnecessary for the Federal Government to enter on such an undertaking in order to achieve the objects in which it was interested; that even as to power development this dam was uneconomic and unwise and would militate against the future development of the Colorado River in the best way; that the adoption by the Congress of any such proposal would be an entire departure from former national policy with respect to business enterprise and power development, involving the gravest consequences to the established principles of the Federal Government in dealing with such problems. Finally they pointed out that the proposal should not be considered before there was a compact between the seven States of the Colorado River Basin and a treaty with Mexico. With reference to the Mexican situation they pointed out that the construction of any such huge storage reservoir and its use for power purposes would mean the creation of adverse rights in Mexican landowners contrary to the interests of citizens of the United States and dangerous to the future development of the Southwest. In short, these three Cabinet officers in their letter of March 24, 1924, written one month after the Weymouth report was sub-

mitted to Congress, raised the objections to its fundamental soundness which can not be answered, have never been answered, and will not be answered.

That letter should have ended the matter. Its facts were unanswerable. It was apparent that the project was hopelessly unsound and dangerous from every standpoint. But again Mr. Hearst enters the picture, and we have the same old proposal with us to-day—just the same dangerous, unsound, dishonest, fraudulent scheme, but in the four years since it was exposed by the three Cabinet officers in 1924 Mr. Hearst has been at work, and with the tools of propaganda, misinformation, deliberate misstatements of facts, trickery, deceit, intimidation, and the like which he employs under the guise of publishing newspapers, Mr. Hearst has succeeded in getting the unsoundness of this bill so covered up with false issues that it is rumored many Members of Congress are to-day pledged to vote for it.

With the exposure of their project by these officials it was of course apparent to the Los Angeles politicians controlling the bureau of power and light and their ally, Mr. Hearst, that if the Congress of the United States was to be induced to expend the funds of the national taxpayer in producing a power supply for Los Angeles the scheme would have to be put over by trickery and misrepresentation. It was hopeless to proceed by a direct appeal for a local power project to be financed by the United States.

A new plan of attack was then laid. The plan was that all talk of Boulder Dam as a power development should be quieted. Power must be made to appear as a by-product. A by-product of what? Why, a by-product, of course, of an expenditure for a solution of a national problem of flood control. The thing that had to be played up if the Congress was to be interested was flood control for Imperial Valley. The Hearst papers were to begin a campaign to stamp the Boulder Dam project in the public mind throughout the United States as a great flood-control and irrigation project. That campaign was begun immediately, and it has run with increasing intensity during the past four years.

Something else was also necessary. The entire population of southern California had to be aroused to a fervor of enthusiasm for the Boulder Dam project. California is a political power. If the populace in southern California could be aroused, then through the agency of entertaining and persuading Members of Congress and their other hundreds of thousand visitors annually of the great merits of the Boulder Dam project an air of authority for the misstatements with reference to the project could be given which could not be supplied by the Hearst press.

The populace of southern California could not be aroused by a plea for a huge power supply for the Los Angeles Bureau of Power and Light. But the populace could be aroused over another thing—and that was a water supply. The thing to do, obviously, therefore, was to connect Boulder Dam with a water supply.

The next thing we find, therefore, is that a shortage of water is discovered in southern California. By whom was the discovery made? Why, by the Board of Public Service Commissioners of Los Angeles and by the Hearst papers in Los Angeles. The cry went out, "We are in danger of a water shortage. Los Angeles and southern California must soon stop their growth unless we get more water. We can only get it from the Colorado River. We can only get it from the Colorado River by the construction by the Federal Government of a high dam in Boulder Canyon." The campaign to mislead the people of southern California was then well under way on a basis which would appeal.

At this point I want to refer to another resolution of the department of public service of the city of Los Angeles passed on May 14, 1923. By that resolution the board of public service commissioners urged and recommended to the city council of Los Angeles the submission to the voters of the city a bond issue of $35,000,000—

for the acquisition, construction, and completion by the city of Los Angeles * * * of works for supplying—

The city—

with electric energy, * * * including works for the development of electric energy from the water of the Colorado River at or in the vicinity of Boulder Canyon.

Coincidently with the passage of this resolution the board of public service commissioners wrote to the city council of Los Angeles a letter dated May 14, 1923, with reference to this bond issue, and in this letter the board said:

Through its aqueduct system the city is provided with a water supply sufficient for 2,500,000 people. The city's available power supply should be equal to its water supply. This would call for the ultimate development of 1,000,000 horsepower of electric energy.

If Los Angeles is to continue to develop as a great industrial center, it is vitally necessary that the city be enabled, through provision of a power supply sufficient for its future needs, to maintain its present low electric rates, which have in a large measure made possible the city's amazing industrial growth.

The bond issue failed of approval. Los Angeles voters could not be deluded to the extent required simply on the plea for more power. Congress had to be appealed to. But the outstanding fact here is that on May 14, 1923, the city of Los Angeles was not interested in an additional water supply. They had a sufficient supply for 2,500,000 people. They have to-day, in 1928, not to exceed one-half that population. But what the political gang in control wanted was a power supply for their municipal bureau, and they wanted it from Boulder Canyon Dam on the Colorado River, because the United States would then finance it.

Could any proof be more convincing, more positive than this declaration of the very crowd who are to-day behind this bill, that the interest which they have in it is as a power project, and that the talk about a water scarcity in Los Angeles is a fraudulent representation to induce the people of southern California to assist in their scheme?

Take this statement they made in 1923 with reference to their plentiful water supply and compare it with the facts and we find they were telling the truth, at least as to their water supply. In 1924 the consumption of water in Los Angeles was 287 second-feet. The last year, 1927, the consumption was 295 second-feet. They have an available supply already developed totaling 539 second-feet, or, on the basis of their present rate of increased consumption, a supply that will last at least another 50 years, allowing even then for unexpected droughts and unexpected growth in population.

So the representation as to a water shortage or as to the necessity of going to the Colorado River for water is shown to be simply another absolute and positive misrepresentation of fact, put over on the people of southern California in order to carry out a power scheme. It is part and parcel of the same plan of misrepresentation which includes the story that Boulder Dam is a flood-control dam for the protection of Imperial Valley.

How are we going to characterize this sort of misrepresentation? It can not be excused on the ground of lack of knowledge. Those public officials, lobbyists, editors, who are chiefly responsible for misleading the public and the Congress, know the facts. They know full well exactly what they are after. They know full well the true purpose of this legislation. They know it is not to provide for flood control in the Imperial Valley; they know it is not to provide for additional irrigation in an area where there is already so much irrigation that the agricultural population are in distress; they know that it is not needed for domestic water for any city in California; they know that they will not take water from the Colorado River within 50 years. All of these facts they know because they are so plain, so indisputable, that they can not be refuted. They have not even seriously attempted to refute them.

Let us pause for a moment in order that we may hear from the people of Imperial Valley. Under date of February 5, 1927, the vegetable growers of Imperial Valley wrote me, in part, as follows:

The only people who would benefit from this legislation are the real-estate speculators. There is no sense in bringing more land into cultivation when 90 per cent of the farmers in the Imperial Valley can not now make a reasonable earning on their investment. Any new land brought into bearing can only be used for producing such products as we now produce on the land under cultivation and on which we are unable to make any money.

And there is still another of their basic representations which they must know is not true, and that is that this project can be paid for through the sale of electric power. They must know that this project can not be built for $125,000,000 and probably not for twice that. They know that the Federal Government will lose every cent of capital it puts into this project and that the electric power will be sold, if sold at all, at a price which means a constantly increasing deficit. In other words, they know that if the Los Angeles bureau of power and light gets any of this power it will get it at the expense of Federal taxpayers.

In view of those facts and of that knowledge, I am forced to call this proposal exactly what it is—an attempt at a deliberate steal from the Treasury of the United States for the benefit of a political group in southern California, for the benefit of the real-estate speculator in southern California, for the benefit of those newspapers owned by William Randolph Hearst, who thus extend their influence and grip on the communities which they mislead and misinform and thus control.

I come now to the final chapter in this campaign of misrepresentation, in this sordid scheme to "put one over" on the Congress of the United States. This final chapter may be designated as the Power Trust chapter.

Mr. Hearst has long known and practiced that method of influencing the public mind by which a proposal or a candidate which he sponsors is made the victim of some plot or scheme by an unpopular individual or organization of individuals.

Having been partially successful in creating the false notion that Boulder Dam was needed for flood control of the Imperial Valley, for irrigation, and domestic water, the next thing to do was to find some insidious and powerful opposition to this project. Then by playing up the bad and dangerous character of the opposition, favor could be curried for the project by attacking the character of the opposition. Incidentally the mouths of legislators and others who knew the facts could be closed through fear that by telling the facts they would be linked with the evil opponents.

For this rôle in his plot Mr. Hearst chose a fictitious character called a power trust. The electric industry throughout the United States was known to be opposed to the project because it threatened the invasion of their field of industry by the Government with the largest hydroelectric power project in history. This was made to order for Mr. Hearst. Nothing could have better served his purpose than to have the power industry object to the proposal.

Early in this session of Congress the United States Senate passed a resolution which had as its original object the investigation of holding companies and methods of financing holding companies in the electric industry. Before it was passed there was tacked onto it a resolution which had been before the Senate on previous occasions for the investigation of the activities of the power industry in opposition to public ownership in their field and activities endeavoring to influence legislation.

This latter part of the investigating resolution was meat for Mr. Hearst. The investigation was sent to the Federal Trade Commission. Curiously enough, the investigation of these activities of the various power companies coincided with the discussion of the Boulder Dam bill in this Congress. Mr. Hearst detailed some of his highest-paid men to cover the investigation and its reporting. These men, with their stenographers, set up their office in the offices of the Federal Trade Commission. They are assisted by some of the lobbyists for Boulder Dam. As fast as they obtain letters, documents of any kind when they are introduced in evidence, they are examined by the Hearst men, turned over to their stenographers for copying, to their photographers for photographing, and, regardless of their content, when they appear in the Hearst press throughout the country they are by innuendo, by false statements, by absolute misinterpretations, made to appear to be sinister and wicked.

And how is the evidence treated? Why, it is treated as evidence of a power-trust opposition to Boulder Dam. The Power Trust, says Mr. Hearst and his employees, are endeavoring to drown 65,000 people in the Imperial Valley. The Power Trust is corrupting public officials, fomenting strife between the States, corrupting the school children and the colleges. I quote statements appearing in an editorial in the Washington Times May 18:

> This lobby, it has been shown, was endowed with a slush fund of $400,000. Beyond that was a dough bag with no bottom. It has corrupted public educators. It has sought to despoil the public-school system. It has flaunted the authority of the National Government. It has kept tabs upon you as though you were a handful of mannikins. * * *
>
> It has poisoned the information which the public receives through supposedly impartial newspapers.

That last touch, incidentally, is particularly good. Imagine it! William Randolph Hearst charges that some one else is poisoning the information which the public receives through the newspapers. William Randolph Hearst, who tried to foment a war between this country and Mexico within the last year by willfully publishing forged documents, the authenticity of which he did not even care to investigate. William Randolph Hearst, who has almost a monopoly in the United States on the job of poisoning the public mind, says that the Power Trust is encroaching on his personal territory.

Now, what have Mr. Hearst and the Federal Trade Commission discovered—what is the sum total of the marvelous revelations which are filling the columns of the Hearst papers to-day in an endeavor to help the cause of Boulder Dam? Why, they have discovered that the electric industry is opposed to the Government's entrance into the electric business. They have discovered that through various organizations within the electric industry, through channels of publicity, through public speakers, through such contacts as the various electric companies can establish, they have opposed Government ownership. And in this connection they have opposed Boulder Dam. What is there here that is news? Is it news to the Congress of the United States that private industry generally, whether it be in the manufacturing business, the farming business, the automobile business, the moving-picture business, or any other business, including newspaper publishing, are opposed to Government ownership and use such means as are available to them to combat it?

Mark you, Mr. Hearst does not even attempt to show that the statements made by the representatives of the power industry are not true. That is not the point. The high crime they have committed, according to Mr. Hearst, is that they have dared to tell the truth about public ownership. They have dared to oppose it. They have dared to endeavor to protect their industry against the unfair competition of the Federal and State Governments. And by so doing they have opposed a thing Mr. Hearst wants. Poisoning the public mind, according to Mr. Hearst, therefore, is to attempt to combat the propaganda of Mr. Hearst—to attempt to meet misrepresentation and misinformation by letting the truth be known.

The existence of a power trust, of a combination which even resembles a trust in the electric industry, has not been shown, and thus far no attempt has been made to prove its existence. The report of the Federal Trade Commission made a year ago, after a lengthy investigation into the question of the existence of a power trust, in fact definitely found that there was no such thing in existence. But that is a small matter to Mr. Hearst. Facts do not bother Mr. Hearst when he needs a name.

To carry out his fight in behalf of the steal called Boulder Dam he must have a power trust, a terrible, sinister figure stalking throughout the land, trying to drown the people in Imperial Valley, poisoning the public mind, despoiling the public-school system, and so in his own inimitable way he creates one. Facts, I say, do not bother Mr. Hearst. Where they do not exist he creates a satisfactory substitute.

Now, if Mr. Hearst were really interested in getting news out of the Federal Trade Commission instead of using that investigation as a machine for creating his own myths, he might have found something of interest to the public in those hearings. Mr. DOUGLAS of Arizona appeared before the commission and gave written and indisputable evidence of the lobbying activities of the political groups behind Boulder Dam. He submitted the evidence showing tens of thousands of dollars spent in entertaining Congressmen, a hundred and forty thousand dollars given to the Reclamation Service to create this Boulder Dam project. He gave evidence which showed the existence of a real lobby, a direct-action lobby which expends its money upon Congressmen and does it avowedly for the purpose of influencing Congressmen to help the Los Angeles Power and Light Bureau get a power supply. Mr. DOUGLAS presented the resolutions of the board of public service commissioners appropriating thousands of dollars annually avowedly for the purpose of lobbying—and appropriating it from their power-revenue fund. Mr. DOUGLAS, I say, presented some evidence which did not need interpretation, crooked interpretation, to make it news. And what does Mr. Hearst and his newspapers say about that? Not one word; not a syllable; not a mention. That was not part of Mr. Hearst's program. That would not have assisted in foisting this crooked scheme called Boulder Dam upon the Congress of the United States.

I said in the beginning of this address that this bill is rotten to the core; that it is not supported by facts, but by astounding misstatements of fact. The facts have been presented time and again. I have presented them in two minority reports; Senator HAYDEN, Congressmen WHITTINGTON and DOUGLAS have presented them; Senator SMOOT has recently presented them in most able fashion in a two-day speech in the Senate of the United States. There has been no refutation; indeed, no attempt at refutation, of the facts.

The facts which have thus been brought out repeatedly and for which the indisputable evidence is available to all Members of Congress in printed minority reports and speeches are: That this is not a flood-control project but a project which delays and may prevent flood control; that it has not a chance of repaying to the Government its investment; that it is not needed for irrigation; that it is not needed for domestic water; that there is no economic demand for it from a power standpoint; that it is based on unsound engineering of the most questionable character; that it is opposed by the country's ablest engineers; that it threatens years of litigation and threatens the despoiling of the Colorado River. Those are some of the facts which are established. Proponents have been challenged to disprove them, to refute them, and they have evaded the issue.

If those are the facts—and anyone who has studied the proposition in even a hasty way, if it is approached with an impartial mind, will instantly recognize that they are the facts—why is this thing before us? It is before us for the reasons that I have herein pointed out. Arguments on facts have been met by vituperation and slander of opponents. To every factual statement, to every indisputable proposition, proponents have but one answer. And what is the answer? Simply and solely the answer furnished by Mr. Hearst: "Power Trust." Tell them this is not a flood-control proposition. They do not attempt to show it is. They simply answer "Power Trust."

Tell them it is unsound and will cost $250,000,000 out of the Federal Treasury. They do not answer the argument or attempt to demonstrate how it can be built or paid for. They simply answer "Power Trust." Tell them that Los Angeles has a sufficient power supply at one of the cheapest rates in the United States, that it could not use the Colorado River water, and would not go after it if they could get it, and they answer "Power Trust."

What is there about this situation which prevents us from being frank? I have endeavored to present it, in a somewhat hasty fashion, it is true, but, nevertheless, to present in its broader outlines the true story of one of the most scandalous schemes with which the Congress of the United States has ever been confronted in its history. A small political group, small but powerful and with widespread influence, has concocted a scheme to raid the Treasury of the United States with a plan which is so bold, so audacious, so absurd that in its very weakness there is strength because it is difficult to believe that anything so lacking in merit would be seriously presented.

But the Hearst press has espoused the cause, and the Hearst press has given it such chance as it has of passage through this body. I have little fear that this bill will become a law at this session of Congress. I have no fear that Boulder Dam will ever be built if this law is passed. It is simply so much of an engineering fraud and physical impossibility that it is inconceivable it would ever be attempted. If attempted, it would not be built within 20 years, or at a cost to the taxpayers of less than $250,000,000.

But I am most reluctant to see the House of Representatives of the United States misled. I am most reluctant to see this body stamped with the Hearst insignia.

Fifteen years ago William Randolph Hearst forced another scheme through Congress. At that time he passed, through the same methods he is now attempting, the Hetch Hetchy bill. He passed it under the plea that San Francisco needed water and would have to have it immediately to avoid famine and disaster. There were men in Congress then, as now, who knew the facts.

But Hearst put that one over. Fifteen years have passed, and every criticism of the Hetch Hetchy project made at the time has been proven to be true. The same misrepresentations were made as to the San Francisco need for water that are now told as to the need of Los Angeles. The facts developed during the 15 years have shown that they were untruths. San Francisco has not yet used Hetch Hetchy water and yet has no need for it. The cost of $45,000,000 then estimated has been expanded to three times that estimate.

Within the last year William Randolph Hearst perpetrated another gross fraud upon the American people and the Congress of the United States by publishing in his newspapers the plainest and most malicious kind of forged documents in an attempt to embroil this country in a war with Mexico. He libeled Senators of the United States with his forgeries. He admitted that he had published these gross forgeries without any attempt at their authentication. He flaunted his boldness with an air of defiance before the Senate committee, which should have forever discredited him. At what point have we arrived when a man of the caliber of William Randolph Hearst can deliberately drag a man's name in the mire of his press on one day and the next day find the same man patting him on the back and fawning upon him for his support?

I said at the outset that I extended my sympathy to those Members of Congress, if any there are, who have pledged their vote to this bill without knowing the facts. I am sincere in that statement, because those who may be in that position are now confronted with the choice of repudiating their pledge or becoming the victims of a bunko game of the rankest sort. They are confronted with the choice of attempting to defend their vote for this raid upon the Treasury with the facts fully available to them. They are confronted with the necessity of voting against this bill on the ground that it is an impossible and dishonest scheme, as everyone will know who can read, or of voting for it and defending their vote on the ground that Mr. Hearst said the Power Trust was against it, and they were therefore afraid of being branded as voting with this monster created out of the imagination of Mr. Hearst and his hirelings.

What other defense can be made if we do not live in California or Nevada? Of course, if you live in either of these two States you can say that at least we induced Congress to spend hundreds of millions of dollars in our territory. But we who represent other States have no excuse. We may say we wanted to protect the Imperial Valley from floods, and we will be met with the fact that we have afforded Imperial Valley no protection—we voted for an impossible engineering structure which can not be built in 15 years, can only be started after years of litigation between the States and the United States, and then in fact will never be built. We turned down an opportunity to afford prompt flood protection to Imperial Valley at a cost of from $7,000,000 to $15,000,000 and voted instead for an enormous power structure which, if ever attempted, will be a failure after the expenditure of many times $15,000,000.

We may say we wanted to provide domestic water for Los Angeles and we will be met with the fact that Los Angeles does not need and will not take domestic water from the Colorado River, and if it ever does take it within 50 years, its taking is in no manner dependent on the construction of Boulder Dam.

We may say we wanted to get started on the development of the Colorado River and to get rid of the problem; and we will be met with the fact that the plan of development voted for mars the Colorado River forever, and forever prevents its wise, orderly, and economic development.

We may say we wanted to prevent further extension of irrigation in Mexico, but we will be met with the fact that the dam voted for will result in the extension of Mexican irrigation at the expense of the American taxpayer through the use of American water as could be done under no other plan. We will have provided for a dam which, if it is to be operated at all, will result in the loss of 5,000,000 acre-feet of water to Mexico at the expense of the States in the Colorado River Basin.

We may say that we wanted to provide for a plan of development which would be self-supporting and would not cost the taxpayers one cent, and we will be met with the fact that if we believe such a statement we have been deluded, because the facts now available, the undisputed facts, show that by no stretch of the imagination can one cent of the hundreds of millions to be expended be returned to the United States Treasury.

And finally, Members of the Congress, we will be reduced to the one argument now advanced in behalf of this bill. That we voted for it because we were told by Mr. Hearst that it was opposed by a Power Trust.

We can not escape the issue. The issue is whether William Randolph Hearst and his string of newspapers runs the Congress of the United States. Are we to determine our votes on legislation without regard to the facts, merely because Mr. Hearst threatens us with libelous defamation, with contemptible falsehoods about our alliance with a fictitious organization? Are we going to admit to the people of the United States that whenever Mr. Hearst wants to put over a raid upon the Treasury of the United States, we will be obliged to vote for it if he threatens us hard enough, without regard to the cost to the people we are here to represent?

The issue, gentlemen, I repeat, is whether a political gang in southern California in alliance with William Randolph Hearst can lobby, propagandize, and bluff a rotten measure through this Congress because we have not the courage, the patriotism, the loyalty to our oaths to stand up and be counted against them.

I would rather vote to present to southern California $125,000,000 outright, build for them some power plants in an economic manner, pay for flood control on the Colorado River and save this great resource from despoliation, than I would to establish the principle that Hearst and the Hearst press run this country. The question is before us, and we can not escape it, because eventually the truth about this infamous scheme will be known and accepted. The truth here is too plain, too easy to ascertain, to be covered up even by the propaganda of the Hearst press. [Applause.]

With reference to the question of lobbying, I again repeat my views upon that question as found in my minority report:

> A favorite means of currying favor for this bill has been the time-honored if not honorable one of representing that it is opposed and hindered by a sinister and wicked lobby, which lobby lures and corrupts unsuspecting, weak, and helpless Congressmen. Lobbying charges have, indeed, been such a common means of meeting opposition to the bill that this argument, if it can be called such, occupies

a foremost place in the proponents' list of reasons why the bill should pass. It seems desirable, therefore, to bring the subject of lobbying into the open, to analyze and frankly examine it, in order to determine what bearing improper and misleading influence has had or may have on the proper understanding of this measure.

The lobby in behalf of this bill is and for years has been one of the largest and most active lobbies in Washington. I doubt if there is a Congressman who has not been buttonholed either in the Halls of Congress or at some social gathering by a Boulder Dam lobbyist. All kinds of lobbying have been used—social lobbying, direct personal-contact lobbying, propaganda lobbying, etc. Special favors, in the nature of trips to California and gifts of grapefruit and other California fruits to Congressmen and their friends, have been judiciously and inoffensively distributed. An association known as the Boulder Dam Association has for years raised and spent large sums of money for lobbying activities and propaganda for their bill. A score of lobbyists who represent and are paid by the Boulder Dam Association, the Los Angeles Bureau of Power and Light, the Imperial Valley Irrigation District, the Los Angeles City Council, the State of California, the State of Nevada, the city of Las Vegas, Nev., other municipalities of southern California, etc., are so constantly with us when Congress is in session that they seem almost to be an institution. They have been with us year after year for six years or more, sometimes appearing before committees and at other times earning their money and spending their time in interviewing Congressmen, interviewing newspaper men, taking polls of the House and Senate, manufacturing and circulating propaganda, devising ways and means by which this or that Congressman can be controlled or influenced by the folks at home, setting up "back fires" on these Congressmen with the folks at home, and exercising the other well-known devices of the skilled lobbyist. Thousands of dollars annually have been spent by these organizations of California and from donations of the public corporations, such as the Imperial Valley Irrigation District and the Los Angeles Bureau of Power and Light, the chambers of commerce, etc. From one source alone, namely, from the county treasuries of southern California, a fund of $50,000 is being or has been raised for lobbying in this single session of Congress. It is said that the county of Los Angeles alone is contributing $25,000 to this fund. In addition to this fund large sums have been appropriated by the city council of Los Angeles and other cities and by the other organizations above named. It seems conservative, therefore, to estimate that the total sum spent for lobbying activities during this single session of Congress will be $100,000 and that upward of half a million dollars have been spent for lobbying activities during the past several years.

The headquarters for this lobby have been in the public offices of its representatives in Congress. Last year a former officer of the American Farm Bureau Federation, who was the director of the activities of the lobbyists, set up his office in one of the rooms of the Senate Office Building, and there the California delegation in the House and their assistants, these lobbyists, were required to make their daily and weekly reports as to their progress in their attempts to win the support of individual Congressmen to this bill.

Nor has the work of this giant lobby been confined to Californians. The mayor of Chicago, with a special trainload of "Boulder Dam boosters," came to Washington last year at the height of the Boulder Dam debate in the United States Senate, in order that he might exert his powerful influence and intelligent leadership in behalf of this legislation. The publisher of a great string of newspapers personally came to Washington and called in some 20 of his employees and assistants from various sections of the country where his papers are published, in order that they might add their influence over Senators of the United States to the herculean efforts in behalf of this legislation. In the matter of propaganda, two great sections of the press have for years freely devoted their news and editorial columns to the dissemination of argument, fiction, and fact for the bill, and to slander and vituperation of its opponents.

During the past several years a large percentage of the Members of both the House and the Senate has been most hospitably entertained in California by the enterprising promoters of this project. This entertainment has not been confined to members of the committee considering the legislation, but has extended to members of other committees and to any other Members who were available for a trip to California. Any Government official, whether on official business or merely on a pleasure trip, is always assured not only of an enthusiastic reception in southern California, but incidentally of an opportunity to make his position with reference to the Boulder Dam publicly known, either at a public dinner in his honor or in the columns of the newspapers. Automobile trips to points of interest on the Colorado River and in the Imperial Valley are freely provided—always, of course, accompanied by one or more individuals able to point out the merits of the Boulder Dam project.

In view of the foregoing, which is only a brief summary of the lobbying activities in behalf of the bill, I have been awe-struck by the audacity of proponents who represent that the bill is being opposed by a lobby. It has seemed to me that on this subject their silence would indeed be golden—that the discussion of "lobbying" should be extremely distasteful to them.

And what of this other powerful, sinister, and flamboyant lobby which is said to be engaged here in seducing us, in forcing weak-willed and susceptible Congressmen to vote against this measure contrary to their better judgment? The treacherous, lecherous, treasonable malefactor lurking behind every tree on the highway trod by this fair maiden called the Boulder Dam bill is said to be a "power-trust" lobby. One gathers from the press reports and speeches of proponents of this bill that these monsters are practically preventing the enactment of the Nation's business; that no Congressman is safe from their plots and malign influence either inside or outside of his office. We are told that the real reason for the failure of the experiment in Government ownership at Muscle Shoals is this lobby, and that if it is not watched the people will be deprived of this great gift of Boulder Dam. I doubt if there has ever been so much written and spoken and so little seen or heard of any being as of these "power-trust" lobbyists, unless it be of the hobgoblins and "spooks" used by bad nurses to frighten refractory children.

This bad lobby must indeed be a secret organization which works in mysterious ways its wonders to perform. Although many searches and inquiries have been made for it, it has not yet been exposed to our view. The committee considering this bill made a search for it, and all we could find were these other lobbyists working for the bill. The only evidence I have seen of this "power trust" lobby were some rather stupid telegrams sent to Members last year from managers and officials of power companies advising us that they were opposed to the Government-ownership features of the bill. If that puerile effort represents the best this "power trust" can do, and so far as I know it was their magnus opus, they are getting magnificent credit which is not their due. If Congressmen are overwhelmed by a telegram, what has happened to them as a result of the work of this other crowd of really skilled workers?

Is it not about time that some one possessed of more courage than political sense should rise and say frankly and clearly that most of this talk about the malign influence of lobbies is "guff," and very cheap "guff"? It is an insult to the intelligence of anyone who has the slightest knowledge of conditions in and around the halls of Congress. It is buncombe and claptrap resorted to by those who do not dare to rest their case on its merits and by those seeking alibis for failure to secure legislation promised to their constituents. When a bill is weak on its merits, when it is advisable to protect it from close scrutiny, when it is necessary to attempt intimidation of opponents rather than to meet their arguments fairly, then the charge of opposition by a powerful lobby representing the "interests" may always be expected.

Members of Congress know and the public knows that the promoters of this bill, and of every other bill, are constantly lobbying in behalf of their proposal. They are entitled to do so and they are expected to do so. Legislators are only representatives of the people, whose duty it is to receive and listen to the facts and arguments presented by the people and to pass upon the merits of legislation after having heard these facts and arguments. Whether wisely or not, no provision has been made to protect legislators against the presentation of these arguments or to hedge them about with the restrictions of the judge on the bench or the jury in the box. We receive some information and much misinformation through written communications, through the press, through printed propaganda, both direct and indirect, through personal interviews and through the ex parte statements of both proponents and opponents of legislation. The evidence which we consider is not confined to that presented upon the floor of Congress or in the committee rooms. If it were there would, fortunately or unfortunately, be much less legislation.

I opine that there is no one who is so poorly informed as not to know that organizations such as the United States Chamber of Commerce, the American Farm Bureau Federation, the Federated Council of Churches, the American Federation of Labor, the Anti-Saloon League, the Association Opposed to Prohibition, the American Railway Association, the American Manufacturers' Association, trade associations representing almost every large industry, and a thousand other organizations maintain offices and salaried employees here in Washington. For the most part these organizations work openly and frankly for the special interests they represent, and they often are able to and do furnish much useful and expert information which is helpful to the Congress. They maintain their offices in Washington to deal not only with the Government bureaus, but with the legislative branch of the Government. They circulate literature which they deem helpful to their interests and they endeavor to create and to circulate propaganda which will assist them in presenting their viewpoint. None of these organizations or their lobbyists represents the public as a whole, but they endeavor to advance or protect the interests of that section of the public whom they are paid to represent, and in doing so they use such legitimate methods as they deem effective. This condition is but a reflection of the fact that in a complex society such as exists in this country groups will organize because of mutual interest, and having created organizations for the purpose of promoting their interests,

maintain representatives at the seat of the National Government who endeavor to promote and protect the interests of these groups.

There is another kind of lobby and another sort of lobbyist which endeavors to influence legislation by intimidation and threats. Organizations are maintained in Washington whose principal function it is to produce and circulate scurrilous and defamatory articles concerning legislators who oppose those measures which the employees of these organizations are paid to promote. The editorial and news columns of many newspapers and other publications favoring or opposing particular measures are freely used to praise, to ridicule, to threaten, and to defame those legislators whose views either agree or disagree, as the case may be, with the legislation which the owners of these particular publications deem it to their interest to oppose or to promote. These organizations maintain spies and writers who endeavor to devise ways and means of directly and indirectly threatening and intimidating legislators. Those who make most promiscuous use of these vicious and corrupting methods of influencing legislation rarely ever do it openly and frankly in the name of the special interest they in fact are endeavoring to promote, but usually in the name of the public, of the "peepul"; in short, in the name of the very person from whom they are endeavoring to extract favor or plunder—the taxpayer. This class of lobbyist does not rely upon fair argument nor choose to allow the legislator to arrive at his own conclusion, but endeavors to bludgeon him into accepting the ready-made program of the interest they represent.

If we are to investigate and consider the general question of lobbying, while we are endeavoring to determine the proper method of developing the Colorado River, I recommend that we give due consideration to this latter group of lobbyists. I also suggest that we consider this bill on its merits and separate from the representations of lobbyists for or against it, and that when we come to consider lobbying, we likewise endeavor to separate it from the spouting of the Boulder Dam orators.

Mr. COX. Will the gentleman yield?

Mr. LEATHERWOOD. I prefer not to yield. I have appeared here at considerable inconvenience on account of my health. If I was feeling as I usually do I would be glad to take on in debate all comers and answer all questions. [Applause.]

Mr. SMITH. Mr. Chairman, I yield 15 minutes to the gentleman from New Mexico [Mr. MORROW].

Mr. MORROW. Mr. Chairman, ladies and gentlemen of the Congress, after listening to the gentleman from Utah who has just spoken it would appear, my fellow Members, that this is a controversy entirely between the United States Government and the city of Los Angeles, Calif. I want to say to you that in the Colorado River we have a great national asset that belongs to no portion of the United States but is a Government proposition. That river was not made for the gentleman's State of Utah; it was not made for the State of California; it was not made for any portion of the United States; but was a creation by the great Maker of the universe who planted there in the Rocky Mountains the watershed to provide water which would take care of that arid region when the needs of the Nation required it to be utilized.

I want to say to you that there are seven great arid States in that western country that have an interest in the waters of that river.

It is a wonderful asset if harnessed and utilized for the benefit of the people of the western part of the United States. This country was not created entirely by individual effort, or for an individual to utilize and monopolize for selfish purposes. It is said that we are trespassing upon the rights of individual States. The great bulk of that land out there is still public land. That river, with a watershed of 244,000 square miles, rises in the peaks of the Rocky Mountain regions, where the snows and rainfall are gathered into the waters of the Colorado River. That water is a common heritage for those seven arid States, to be utilized by them. It is said that there is no need of this at this time. With the population of the country increasing yearly, the time is coming when every acre of that arid land which can be utilized to raise a food crop for the people of the United States will be needed and will be utilized for that purpose.

What does this river do? As I say, it rises in the high peaks of the Rocky Mountains and flows a distance of 1,750 miles to the Gulf of California. Hydrographic engineering shows that the water flow per year is something like 17,000,000 acre-feet. Is it being utilized to-day? It is being utilized in southern California, in the Imperial Valley, where 400,000 acres of land are under cultivation, and in Mexico, where 230,000 acres have been put under cultivation practically since this controversy about water started, thus diverting from the seven States their future water supply in order that those lands in Mexico may be reclaimed by speculators. This is being done by speculators living in the State of California. Mexico is now claiming, by the use made by the American speculator, a certain amount of water, so that they can utilize Mexican labor to grow the same crops in competition with the people of the United States. Why do we want these waters impounded? Why do we want these waters in a compact for the benefit of these seven arid States? The State of Arizona lies at the mouth of that stream. It is the only State that practically now holds out from the seven-State compact.

That State says that the water comes down by gravity and that they are bound to get a supply of water and that if they do not get everything they want by the terms of legislation, they will not join in the compact whereby the water can be apportioned equitably among all of the seven States. We want a compact in order that the seven arid States may have their equitable division of the water, to be used for the settlement and development of the various States. In my own State of New Mexico we have more than a million acres of land that can be reclaimed, in a climate where the conditions are favorable for the production of crops much better than in some other parts of the United States. We have a small population, it is true, but the future indications are that in this arid section of the United States we will have, by the protection of our water, in the course of time a large population. We have every mineral for utility that is to be found in any part of the United States. New Mexico has a greater coal area than nearly all of the eastern portion of the United States, including Pennsylvania and West Virginia, and to that area you could add three or four other States; all this fuel to be used in time. One-fourth of the entire coal deposits in the United States are included within three or four States in the West. We have iron ore in abundance.

We have power propositions that will mean immense power when developed. They tell you that this is a power proposition. No doubt it is one of the greatest power propositions in the United States, but it does not belong to any individual set of people, nor should it be controlled by any corporation unless protection is provided to the people who are going to use the power supplied in that region. The power should be used beneficially and a higher rate should not be charged than that which will make a fair return on the investment. Provision should be made in this bill so that the people of California and the other States will be protected. It may appear to you that this is a controversy between two States, the State of Arizona and the State of California. There are seven States out there that need the compact. They met in Santa Fe, N. Mex., in 1922 to form a compact whereby they divided the waters of that great stream, apportioning 8,500,000 acre-feet to the lower basin, composed of Arizona, California, and Nevada, and 7,500,000 acre-feet to the upper basin, Colorado, Wyoming, New Mexico, and Utah. That division was equitable, and if that compact had been stood by up to the present time we could have gone ahead with the Boulder Dam.

Only two factors can enter into the argument of this question. Is it a sound, economic proposition, can it be constructed there and be a permanent proposition from the geological formation, and will the Government of the United States get a return of the investment it puts into it? The present Government officials who have charge of the matter say that they have made an investigation through engineers who are competent and reliable, whose reputation is above reproach, and whose engineering ability has been utilized in other propositions. In order to impound the waters and protect the people of the Imperial Valley and preserve by compact the waters for the seven States, it is proposed that the Government shall spend $125,000,000 by the enactment of this legislation and construct a great dam at Boulder Canyon or at Black Canyon at an expense of $41,000,000, and there impound 26,000,000 acre-feet of water. All of this money is to be repaid to the Government of the United States within a period of 50 years at 4 per cent. If the proposition is sound economically, why should not the Government construct the dam?

The Government does not say that the power companies can not purchase from the Government electric power. It provides that the Secretary of the Interior shall sell the power at the switchboard. It does not direct that companies shall buy nor prohibit the companies from buying that power, but permits others as well to buy the power. The fact of the matter is that at the switchboard the Government should hold a protecting hand, or through a commission, which will for all time protect the citizens of the Pacific coast and the people of the States concerned which may utilize that power.

Mr. MOORE of Virginia. May I ask the gentleman a question?

Mr. MORROW. Yes.

Mr. MOORE of Virginia. Do I understand the gentleman to argue that the main reason and justification for the project is

found in the necessity for protecting life and property? Is that the fundamental ground for the project?

Mr. MORROW. That is one of the grounds. There are several grounds showing the necessity of it. One is a compact to protect that water. That water is going into Mexico, and is being accumulated and utilized in Mexico beyond the bounds of the United States, until to-day they have something like 250,000 acres of land under irrigation.

They are taking the water that my State needs. They are taking the water that the State of California needs. They are taking the water that the State of Wyoming needs, and that the State of Utah needs. That water is going beyond the United States.

That is one reason. Another reason is stated in the gentleman's question: The people in the Imperial Valley are at the mercy of that great river. It is true there may not be loss of life to any great extent should the Colorado River break its bounds and flow back into the Imperial Valley as it did in the year 1905, but it can destroy the property of those people and the destruction of property means frequently the destruction of life; it means the devastation of that which they have accumulated for 50 years. They have invested $150,000,000. There are 65,000 people living there, and the water may break over in the future, as it has done in the past. The Colorado River, it is said, carries down more silt each year than was excavated in the entire construction of the Panama Canal. That silt has filled up the Gulf of California 144 miles from where it was at one time. The Imperial Valley that exists to-day from 50 to 250 feet below the river, has been cut off and dried up; it was once part of the Gulf of California.

It has been established by the opinion and testimony of reliable engineers who have examined the Colorado River that should storage dams not be built that the river will in a few years destroy the very communities that it is now watering.

The two important sites to be considered are the Boulder Canyon and Black Canyon sites. The building of a dam to the height of 550 feet at either site, where bedrock can be reached and foundations are known to be entirely suitable for a dam constructed to this height, will afford complete flood protection and secure river regulation, with sufficient capacity to take care of silt deposits, it is said, for a period of 300 years.

The building of a low dam would mean that in a short time the same would be filled up by silt deposits and would fail entirely as a storage reservoir from which a steady supply of storage water for needs of reclamation could be had. There would be no method with a low dam whereby the repayment of the cost of the building of the dam could be guaranteed, because there would be nothing to return payment for the investment; this return can be provided by the building of a high dam for the development of hydroelectric power to the extent of 600,000 to 800,000 of continuous horsepower of electricity. All of the horsepower, under the terms of section 4 of the pending bill, shall be disposed of before work shall be begun or any moneys expended upon or in connection with the works or structures provided for in the act. This would guarantee the return of the Government investment before anything could be done under the terms of the bill.

It is further provided, under "b," of section 4, that—

> before any money is appropriated or any construction work done or contracted for, the Secretary of the Interior shall make provision for revenues, by contract or otherwise, in accordance with the provisions of this act, adequate, in his judgment, to insure payment of all expenses of operation and maintenance of said works incurred by the United States and the repayment, within 50 years from the date of the completion of the project, of all amounts advanced to the fund under subdivision (b) of section 2, together with interest thereon.

Apparently from the provisions inserted in the bill proper action and supervision will be taken. This is the opinion of Dr. Elwood Mead, Commissioner of Reclamation, who states:

> In conformity with the safeguards in the bill, no Government department would dare to undertake such a work, involving a dam of considerably greater height than heretofore constructed, without investigation and approval by competent authority. If the high dam at Boulder or Black Canyon is authorized by Congress such dam will not be erected until after the fullest investigations have been made as to the sufficiency of the structure and also of the sufficiency of the geologic structure at the dam site.

Mr. Mead adds—

> I am confident that Arthur P. Davis, F. E. Weymouth, and the engineers working under them in the Bureau of Reclamation have investigated fully and that the engineering data which they have collected is a safe basis for action by Congress. They have built the outstanding dams of the world.

The silt problem of the Colorado is a reason for building the high dam with large storage capacity. We know the river carries a large amount of silt. The aggregate amount of silt carried in suspension in the lower reaches of the river is about 100,000 acre-feet per year. To this there is to be added the silt which is entrained by the waters of the river along its bed.

In connection with the building of the high dam there should be built also a power dam whereby power could be developed and disposed of at the switchboard, and return made to the Government for moneys expended by the Government together with interest thereon at 4 per cent, within a period as provided in the bill of not more than 50 years.

The all-American canal should be constructed within the United States to protect the people of the Imperial Valley in their water supply for irrigation and domestic use, and to free them from the vassalage of another nation, Mexico, through which country the route of the waters of the Colorado River, that are required for irrigation and domestic supply in the Imperial Valley at the present time, is taken. This canal traverses 60 miles in Mexico before entering the United States.

By the terms of the concession permitting this water to be taken through Mexican territory into the United States the Mexican lands are pledged one-half of all water flowing through this canal. Applications are pending for the irrigation of 200,000 additional Mexican acres at this time. Each Mexican acre supplied with water means an acre taken from the development of the seven arid States.

The building of a high storage dam would store the water of the entire river for a period of one year and a half; after this is accomplished it would be easy to compel Mexico to make the proper treaty concerning the distribution of the water to which Mexico is entitled.

Secretary Hoover says that the building of the dam at Boulder Canyon would in his opinion store water and create power for practical utility equal in value to that of the average State. That this project is so vast and the cost so great that it becomes a national affair. It being an interstate matter it must necessarily be carried forward through legislation enacted by Congress and placed under control of the proper department of the Government.

Four Presidents have referred to the necessity for flood protection on the Colorado River. Theodore Roosevelt was the first President to address a message to Congress requesting the necessity for remedial legislation, in 1907. He referred to the flood of 1905 and showed the danger then of overflow into the valley and requested that something be done to permanently maintain a natural bed, stating that unless this was done that in time all land along the Colorado River would be deprived of the necessary supply of water for gravity canals. James A. Garfield was appointed by President Roosevelt as commissioner and was sent by the Secretary of the Interior to the Colorado Basin with three other commissioners, as a fact-finding commission. Their report was that the Colorado River should be dealt with as a national problem; that the entire watershed is a unit and the use of any particular place in the course of the river for development, irrigation, or power, should be constructed in connection with the entire river. That the development physically could not be limited by State or international lines. That the United States alone had the power to safeguard the interest and the right of all those who would be affected by such development. That the only political agency that could deal with and settle the international question arising with Mexico would be the United States Government.

In 1912 President Taft recommended to Congress an appropriation for flood protection on the Colorado River.

President Harding at the time of his death had prepared an address which he planned to deliver at San Diego, in which he referred to the impounding of the waters of the Colorado River as follows:

> I should indeed be proud if during my administration I could participate in the inauguration of this great project (a dam and reservoir at Boulder Canyon) by affixing my signature to the proper legislation by Congress through which it might be launched.

On October 7, 1924, President Coolidge stated in a message to parties interested:

> Flood control and the provision of an immense water storage seem to me to dominate all others and point logically to the Federal Government as the agency to undertake the construction of a great dam at Boulder Canyon or some other suitable locality. I should indeed look with great pride on the consummation of this, one of our great national improvements, during my administration.

In his message to Congress on December 7, 1926, President Coolidge asserted:

In previous messages I have referred to the national importance of the proper development of our water sources. The great project of extension on the Mississippi system, the protection and development of the lower Colorado River, are before Congress and I have previously commented upon them. I favor the necessary legislation to expedite these projects.

A report on the investigation by the engineers was submitted to Congress by the Secretary of the Interior in February, 1922. In this report the department explained the necessity for control of floods and the development of the Colorado River as a national problem and referred to the stream and its tributaries as being interstate and the stream as being a navigable river. That waters impounded could be utilized to irrigate public lands now desert in character; that the problem was one of such magnitude as to require national solution.

I desire to quote herein Owen D. Young in the matter of Government operation of water power propositions:

*There is a class of water powers which * * * must be separately considered. * * * Where vast rivers either on international boundaries or within the United States require development for several purposes, such as navigation, irrigation, and flood control, as well as for power, there arises a new kind of question which is wholly unrelated to the old controversy of Government versus private ownership. The discussion of this question has been clouded by the old animosities. The private-ownership people feel that if the Government has anything to do with the development of power in these composite situations, it will be merely the starting point from which the advocates of public ownership will advance their operations. On the other hand, the public-ownership people feel that the privately owned companies which seek to throw dams in these great rivers, and incidentally perforce take over the effective navigation, irrigation, and flood control, are so intrenching themselves in purely public operations as not only to make all thought of public ownership impossible, but to create instruments of oppression rather than of service.*

The great opposition to the carrying forward of this proposition comes not from the people who will be served with the water and with the power generated, but from the existence of the opposition of the Power Trust, which does not want this great project developed under Government supervision; if developed, that it be under their supervision and dictation. This is very apparent from the documents and evidence that have been brought out in the hearing exposed by the Federal Trade Commission investigation. It is clear that men occupying positions in some of the States to be benefited by this development are in the pay and control of the Power Trust. Sufficient evidence has certainly been presented to the American public and to Congress to show the opposition to the construction of the dam and the carrying forward of the Swing-Johnson bill. It is not my purpose to be personal or to mention any particular names of former State officials who are now directly in the employ of the Power Trust to prevent the passage of this legislation; they are now acting as lobbyists under the guise of State authority.

The State of Arizona feels that it alone can remain without the seven-State compact and protect her water rights for the future; if she feels she is in a better position to do so, because of her location; if she believes in a selfish way that by this means she will gain more in the years that go by, she should be left out of the compact, and the remaining States should seek a compact of the water rights for the future protection of the citizens of their respective Commonwealths.

Much of the opposition to the legislation is that it can not be accomplished economically. If this be true, then the Government in its reports, and through the information of those seeking and compiling data, must be grossly in error. Admitting that the Government is correct in its position, the only State that can and will absorb the power from the Government power proposition, and which will guarantee to repay the Government, is the State of California. Must we not then admit that the State of California makes a definite and binding agreement to take the power not otherwise disposed of at the switchboard, and agrees upon a fair and equitable division of the 8,500,000 acre-feet of water, with Arizona and Nevada receiving their share according to their needs and economic development. The bill should pass. The question of power should be under the control of the Government and disposed of at the switchboard at a figure that will insure within a definite period the repayment of the money advanced by the Government. [Applause.]

The CHAIRMAN. The time of the gentleman from New Mexico has expired.

Mr. SWING. Mr. Chairman, I yield 15 minutes to the gentleman from Nevada [Mr. ARENTZ].

The CHAIRMAN. The gentleman from Nevada is recognized for 15 minutes.

Mr. ARENTZ. Mr. Chairman, it is with some reluctance that I speak at all on this bill. I have fairly lived with it for eight years. It was back in 1919 that as a delegate to the League of the Southwest I was appointed by the Governor of Nevada to join with others in the consideration of the development of the Colorado River.

In the discussion of this matter by our friend, the gentleman from Utah [Mr. LEATHERWOOD], we heard about the Hearst papers, about the Los Angeles lobby, about everything else in the world but about the construction of this great work itself. And I want to say in the beginning that I have absolutely nothing to do with such things as Los Angeles may have in its mind in the way of the development of the Colorado River. I know nothing about what its ambition may be relative to the development of a city of 2,500,000 or 5,000,000. I know nothing about the difficulties on the river. I know nothing about the lobby they have or about the money they may have advanced to the Federal Government for investigations on the Colorado River. But I do know something about the contents of this bill. I do know something about what is contemplated in this bill. And, my friends, if it were not for the fact that Arizona failed to sign the seven-State compact, as it was directed to do by the Arizona-Colorado River Commission in Santa Fe in 1923, Utah would still be in this six-State compact. The Governor of Utah has never said a solitary word in opposition to this bill.

Mr. DOUGLAS of Arizona. Mr. Chairman, will the gentleman yield?

Mr. ARENTZ. I am not going to yield to the gentleman from Arizona. He can have all the time he wants after I get through. This is a controversial question, to be sure. If my statements are incorrect, he can correct them on the floor after I get through.

The Governor of Utah, at Denver, Colo., said he was going to do everything he could to bring about the signing of the compact by the State of Arizona. He said he would do all he could to adjust the differences and when Arizona came into the friendly family of States Utah would be among those present.

What are the differences? The only difference that existed in Denver, Colo., last year—that is, the year 1927—was the difference in the amount of water that Arizona said she was entitled to. As nearly as I can determine, they decided it was 450,000 acre-feet of water, and, as I understand it, Arizona, Nevada, and California within the last six months have reached several points where their differences, so far as water was concerned, were eliminated. But all at once some other points came up.

Mr. DOUGLAS of Arizona. Mr. Chairman, will the gentleman yield there?

Mr. ARENTZ. No; I can not, with all due respect to the gentleman from Arizona.

Mr. DOUGLAS of Arizona. Just to state the facts as to what the agreement was.

Mr. ARENTZ. I can not yield. I say that every time California, Arizona, and Nevada reached an agreement—and I repeat it—every time they reached bordering on an agreement something else came up to disturb the equilibrium of the conference, and Arizona wanted something else. They say they do not want the dam at Boulder Canyon. Why? Because they want Glen Canyon, Bridge Canyon, or Marble Canyon dam sites selected. Why? Because both wings of the dam would then rest on Arizona soil, the dam would be strictly a power dam, the silt problem would be unsolved, the head gates so far upstream from the point of diversion that control would be impossible not alone because of the distance but because of intervening streams flowing into the Colorado below the dam, presenting a flood menace.

Now, as to the opposition of Arizona with reference to the construction of Boulder Canyon Dam at Boulder Canyon. If this great development is perfected and consummated at Boulder Canyon, one arm of the dam will rest on the soil of Nevada and one arm on the soil of Arizona. But, mark you, the money necessary for the construction of this dam will be advanced by the Federal Government at the rate of about $9,000,000, $10,000,000, or $12,000,000 a year, and 4 per cent interest will be paid on this amount. Under what conditions will this be done? First, the Federal Government, through the Secretary of the Interior, must meet with municipalities, with counties, and with States, and then after that with individuals, to determine who want the contracts and will offer the best price for the power developed. If they agree to take 50,000, 75,000, 100,000, or 200,000 horsepower, what do they do? They enter into contracts with the Government relative to payments over a sufficient term of years to repay the Government, with 4 per cent interest, every penny expended in the construction of the

works enumerated in this bill. Such contracts must guarantee amortization payments with interest. The ability to pay must be unquestioned, and no work can be performed upon the dam or canal until the power developed and the water stored is contracted for at a price sufficient in amount to return all costs, with interest, over a period ranging from 25 to 50 years.

Now, as to the economics of the situation. The gentleman from Arizona is an expert in that line. He has many figures to offer showing that the "capital set-up" is wrong. I want to say to him that the first thing that enters his mind in any consideration of the Boulder Dam bill is the question of Government operation and that the dam should not be built at this particular place. Ask him where it should be located. He will say up in Arizona, 100 or 150 miles farther up on the Colorado River at Marble Canyon, Bridge Canyon, or Glen Canyon.

Mr. DOUGLAS of Arizona. Will the gentleman permit a statement of fact for the RECORD?

Mr. ARENTZ. No, if you please; the gentleman can have all the time he wants. If I make a misstatement, he can correct it in his own time. Every time you ask me a question, undoubtedly without meaning to, you are throwing me off my line of thought.

Mr. DOUGLAS of Arizona. No; I am trying to get a statement of fact in the RECORD.

Mr. ARENTZ. It seems to me, my friend, you are too much bound up in this thing and in your opposition to it, and you have been opposed to it ever since you cast your vote in the Arizona Legislature which prevented the signing of a compact; I understand you were the one who, by a single vote, prevented Arizona from going into the compact. Since that time you have done everything in your power to prevent action on this legislation, not because, forsooth, Hearst may be in favor of it, and not because Los Angeles has been in favor of it but simply because you are opposed to every feature of it; you want it your way or no way.

Now, my friends, as to the seven-State compact. The waters of this river flow through seven States, comprising an area of 244,000 square miles. The river is 1,750 miles long, heading away up in the mountains of Wyoming, in the Continental Divide in Colorado and in New Mexico, and flowing down into this one stream, forming the boundary of several States and flowing into Mexico. Two hundred thousand acres of land are already under cultivation in Mexico, and each year they try to put into cultivation tens of thousands of acres in addition to what they now have.

We know as well as we know anything in the world that when it comes to a settlement or agreement, a friendly agreement, with Mexico they will take every acre under cultivation and count that as a perfected water right, and it means that every acre under cultivation in Mexico will be taken away from the total acreage in the upper-basin States. I want to repeat, my friends, that if Arizona were in the compact to-day Utah would be in the compact, contrary to what our friend [Mr. LEATHERWOOD] says. The Governor of Utah has stated that time after time. The only other question in the governor's mind is that he believes some day oil will be found in the bed of the Colorado River in Utah, and he wants it stated definitely that Utah has a perfect right and title to the bed of that stream. Why should she not have the title to the bed of that stream? She certainly is entitled to it. Under all the laws that have ever been passed upon by the Supreme Court the bed of a navigable streams belongs to the State and Utah should have it. Utah is entitled to it; but the seven basin States own the water in this river—and he is interested in that, too—and with the compact four States in the upper basin would be entitled to 7,500,000 acre-feet, and three States in the lower basin would be entitled to 8,500,000 acre-feet of water. And how will they divide this water after they have it allocated. The four States in the upper basin will get together. Have they quarreled over what the division will be in the future? No. They have concluded they will get together in a friendly, quiet spirit, and they will allocate among the four States a division of that 7,500,000 acre-feet of water. And the three lower basin States, what have they done? They have gotten together day after day, day after day, in summer and winter, for years, trying to settle their differences.

There is very little difference of opinion as to what is an equitable division of water in the lower basin States. They have almost agreed and have almost settled on what the allocation should be, and as I understand from a recent letter from a gentleman in New Mexico who is on the New Mexico-Colorado River Commission, at the present time there is not over 150,000 acre-feet of difference between the States of Arizona, Colorado, and Nevada. Do you think that Arizona could carry on a 50-year lawsuit for 150,000 acre-feet of water? I think not and so do you. Then, there must be something else in the mind of Arizona that we know nothing of that prevents an agreement.

As far as I am concerned, I would be perfectly willing to tell my governor to-morrow that if he can settle this difference, he should take a portion of the water that has been allocated to Nevada and give it to Arizona. [Applause.] But Arizona would not be satisfied, my friends, and just as soon as the water question is settled she wants something else. For the life of me, I do not know what that something else is unless it be death and interment of the Swing-Johnson bill.

In order to partly satisfy the gentleman from Arizona, the Arizona-Colorado River Commission, and the Governor of Arizona, I have offered an amendment, which will be offered as a committee amendment, allocating to Arizona 18¾ per cent and allocating to Nevada 18¾ per cent of any surplus that may exist in the fund after meeting the amortization cost yearly to repay the Government. I do not believe the Congress is willing that one solitary cent should be given to the States until the Government is paid the yearly payment due it, but if there is a surplus after paying the Federal Government the amount due each year, I think the States of Arizona and Nevada are entitled to it; but, my friends, I do not think the State of Arizona any more than the State of Nevada is entitled to say, "You shall not build this plant until we get what we want."

There are seven States in this family of States and the State of Arizona has no more right to come here and say that we must stop at this line and go no further than the State of Maine or the State of New York or any other State.

This bill contemplates holding for the people of the seven States an asset which in 50 years will be one of the greatest assets they possess.

The gentleman from Arizona possibly may question this and may say it is not in the bill—of course, it is not in the bill—but we are going to leave this entirely to the good faith of the American Congress 25, 40, or 50 years hence, that after the Federal Government has been fully repaid for every dollar that has been expended in the construction of this wonderful work, a work to adjust the water differences between the seven States, to increase navigation on the Colorado River, to prevent floods in the Imperial Valley, to supply water for the Government lands scattered from central Wyoming to the Mexican line, then the basin States shall receive from the profits accruing from this wonderful development a certain share, because it is an asset, it is a silver vein running through these States.

After all our mineral is gone, after all our mines have been depleted, this water resource will be the only thing remaining to a State that is 84 per cent at the present time in Federal ownership. [Applause.]

The CHAIRMAN. The time of the gentleman from Nevada has expired.

Mr. DOUGLAS of Arizona. Mr. Chairman, I yield myself four minutes.

The generosity of the gentleman from Nevada [Mr. ARENTZ] is comparable to the extravagance of his statement. I defy the gentleman from Nevada to find anything of record which I may have said by way of advocating a dam, both ends of which will rest within the boundaries of the State of Arizona.

The gentleman knows, and he knows as well as I know, that the only position I have taken with reference to the location of a dam on the Colorado is that it should have the support of competent engineers. If this be unreasonable I do not know what can be considered to be reasonable. The gentleman knows that in my substitute bill there is a provision for a board of engineers which shall locate and designate a site or sites at which structures shall be erected.

Mr. ARENTZ. Will the gentleman yield?

Mr. DOUGLAS of Arizona. I will not. If that be unreasonable, then I do not know what can be reasonable. Now I will yield.

Mr. ARENTZ. I just want to direct the gentleman's attention to several Government reports where they have delved into this matter month after month, year after year, and all that sort of thing.

Mr. DOUGLAS of Arizona. All by the same men and all employed by the Bureau of Reclamation or the Los Angeles Bureau of Power and Light.

Mr. ARENTZ. And better engineers do not exist than those men.

Mr. DOUGLAS of Arizona. And the gentleman can not find a report by any other department or any other bureau of the Government written by any engineer which approves the Boulder Canyon project. He can, however, find a provision in the appropriation act for the War Department of 1925 which excludes Army engineers from investigating the Colorado.

The only position which I, as the Congressman from Arizona, have taken in this Congress with reference to the location of a dam, is that the location shall be selected by an independent board of engineers, not by engineers employed by a bureau anxious to increase its power over the destinies of peoples, and not by engineers in the service of the Los Angeles Bureau of Power and Light.

Mr. JACOBSTEIN. Will the gentleman yield?

Mr. DOUGLAS of Arizona. I will be delighted to yield to the gentleman.

Mr. JACOBSTEIN. Will the gentleman state why it was this board of engineers was refused the right to investigate the location of the dam?

Mr. DOUGLAS of Arizona. It is my understanding, sir, although I do not know that there is anything of record, that California specially requested that the Army Corps of Engineers be excluded from investigating the Colorado River.

The CHAIRMAN. The time of the gentleman from Arizona has expired.

Mr. SMITH. Mr. Chairman, I yield 15 minutes to the gentleman from California [Mr. CRAIL].

Mr. CRAIL. Mr. Chairman and my colleagues, the Government has been studying and planning operations on the Colorado River for 40 years but little else has been done. The Government has many great obligations on the Colorado River.

The first duty is river regulation and flood control. That is vital. There is no question that the Government owes that duty, not only on the Colorado River but on every navigable river, and this House has recognized that duty always and more recently in the Mississippi flood control bill. Control of the Colorado against floods is vital to the people of the Imperial Valley, the Palos Verdes Valley, and the Coachella Valley in California. It is also of great interest to the people of the Yuma project in Arizona.

The Government also has the obligation of navigation on navigable streams under the interstate commerce provision of the Constitution. This obligation is well recognized. The right and duty of the Federal Government to take charge of navigable streams for the purposes of interstate commerce have been upheld by the Supreme Court of our land in numerous decisions going back from the present to early beginnings.

Then there is the duty of reclamation and irrigation in which our Congress has shown great interest and in which it has been liberal, even generous, in appropriations of millions of dollars, particularly for the benefit of the arid States of the West. Arizona has been the greatest beneficiary of this governmental duty.

Now, others are going to speak on these features of this legislation, men who know more about them than I do, and men who are better prepared to tell you about them than I am. But I do want to say this, that these duties of the Government on the Colorado River can be taken care of properly only by a high dam at Boulder Canyon. There is no other way that it can be properly done.

Not only that, if a high dam is built there the Government eventually will get back every dollar that it puts into this project with interest. It will do so in such a short time, compared with the length of time the dam will be in service, that it will seem almost as though a gracious Providence had made a gift of this great dam to the Government and its people.

Mr. LINTHICUM. Will the gentleman yield?

Mr. CRAIL. With pleasure, to the gentleman from Maryland.

Mr. LINTHICUM. Is the gentleman to be assured of a contract that will pay for the dam; and if so, in how long a time?

Mr. CRAIL. The bill provides that no money shall be spent, no operation shall be commenced, until the Secretary of the Interior has entered into valid, binding contracts with parties who are financially responsible, and whose agreements can be legally enforced, to the effect that the Government will be repaid every dollar that is spent on this project with interest. The bill fixes a maximum of time within which every dollar must be repaid.

Mr. SWING. The contract provides that repayment must be within 50 years.

Mr. CRAIL. Yes. I thank the gentleman from California. While the time limit is fixed at 50 years, it is expected that full repayment will be made in a period of 30 years.

Now, a good deal has been said about the interest of Los Angeles in this project, and intimations have been made on this floor by opponents of the bill that this is a Los Angeles enterprise, and as something to be put over on Congress.

There is nothing of that kind whatever. Los Angeles has done nothing in this matter to be ashamed of, and it has nothing to conceal or to apologize for.

Los Angeles, a city of 1,300,000 people is right there on what was a desert. Is it not marvelous that a city of that size should spring up on what was once a desert?

Water, which nature did not supply, was brought to the city by men. Courageous pioneers went back into the high Sierras, 250 miles, and harnessed a river and brought its waters over desert plains, across deep gorges, and through steep mountains to the city. Nearly everything that lives and grows in Los Angeles depends for its life upon water supplied by the hand of man. The same applies to southern California. Arizona and New Mexico and Utah are much the same. They were once the Great American Desert.

Go through southern California and see the extensive truck gardens, the green lawns, the fruit-ladened orchards, the waving fields, and the magnificent trees there in abundance with all of their heavy foliage. It is a Garden of Eden, a paradise on earth. A generous Creator furnished a marvelous climate and everything man could wish but water. Man's ingenuity, man's ability, and man's foresight brought to this fertile desert the waters necessary to make it the land where flowers grow, where the sun shines, and where everyone is happy. But water is scarce out there. Our rivers are dry, and we have reached the limit of our supply of developed water.

Waters which have been used for irrigation are gradually being withdrawn for domestic use. Domestic use is the highest use that water can be put to. People have a right to drink water and to use water in their kitchens and to water their stock. Southern California and all of the coastal cities—30 of them—that are comprised in the metropolitan water district are now depending, the records of the hearings before the committees of this Congress show, upon stored water for their domestic supply. The only available, sure, and adequate source of supply left is the Colorado River. Here is an opportunity for the Government to perform its duty to Imperial Valley, which is hundreds of feet below sea level and under the dreaded flood menace and suffering the constant encroachment of silt. Here is the opportunity for the Government to do its duty by Imperial Valley and at the same time help Los Angeles and the other coastal cities, and in a way that ultimately will not cost the Government a dollar.

Mr. WAINWRIGHT. Mr. Chairman, will the gentleman yield?

Mr. CRAIL. Always to my colleague from New York.

Mr. WAINWRIGHT. What has the gentleman to say to the assertion of the gentleman from Arizona that the State of California insisted that the Army engineers should not be taken in on this project?

Mr. SWING. Mr. Chairman, will the gentleman permit me to answer that question?

Mr. CRAIL. I gladly yield to my friend from California, who knows the facts.

Mr. SWING. What the gentleman refers to was what took place in the Senate on the river and harbor bill in which a general survey of all of the rivers in the United States was being ordered, which the War Department engineers said would take them 10 years to make; and since the United States Reclamation Bureau had already made a survey of the Colorado River, covering 30 years of time, and the War Department engineers had done nothing on the Colorado, to save money and to save time the Colorado River was excluded from the blanket authorization.

Mr. DOUGLAS of Arizona. Does the gentleman know that Major Raymond, of the Corps of Engineers, made a survey of the Colorado——

Mr. CRAIL. Please, can not the gentleman from Arizona put that in his speech when he takes the floor?

Mr. DOUGLAS of Arizona. I shall be delighted to. I beg the gentleman's pardon.

Mr. CRAIL. I have only a short time. There is not any section of the country, even the Imperial Valley, so vitally interested in this project as is the city of Los Angeles, in which I live.

This is not a real-estate promotion scheme, as has been malevolently alleged on this floor. It is life or death not only to Los Angeles but to all of the southern California coastal cities. It is as if our growth and prosperity and development depended upon this one thing. It is vital to us. Without more water we must become stagnate. Stagnation means only death.

Mr. ABERNETHY. Mr. Chairman, will the gentleman yield?

Mr. CRAIL. I could not deny my friend from North Carolina.

Mr. ABERNETHY. What authority has this Government to go into this proposition? On what basis are we justified in the expenditure of this money as a Federal proposition?

Mr. CRAIL. I tried to explain that in the beginning of what I had to say. Probably the gentleman was not in the Chamber at the time. But though it takes my time of which I have but little, I shall repeat it. The Government owes three great duties here. The first duty that the Government owes is river regulation and flood control. Second, there is the duty to make possible navigation and interstate commerce, which has always been recognized by our Government and is stated in the Constitution as a duty of the Federal Government.

Then there is the third duty of reclamation and irrigation, which is also of vital interest to the Government of the United States. Any one of these duties would fully justify the expenditure, even if the Government were not going to get back every dollar of its money with interest, within 50 years. Not a dollar will be spent of this $125,000,000 until there are contracts satisfactory to the Government that the money will be returned with interest.

Mr. MORTON D. HULL. Mr. Chairman, the gentleman himself and the promoters of this bill have in the background of their minds some definite guaranty. What is the nature of this guaranty which can be given?

Mr. CRAIL. It is the guaranty of 30 municipalities of southern California, of the Imperial irrigation district, and other irrigation districts. Los Angeles has a bonding capacity which has not been used of almost a hundred million dollars available for this very purpose. We are not asking the Government to do this because we are not financially able to do it or would not like to do it. It is because this is an international and an interstate problem, and the city of Los Angeles or the metropolitan water district of southern California can not take hold of it.

Mr. ABERNETHY. Why?

Mr. CRAIL. Because the law will not permit it, because only the United States Government can do it from any point of view. That is a problem which men who have the time will discuss at length. Everyone in the House knows that that is true, and there is no use of me arguing it.

Mr. COX. The guaranty to which the gentleman refers upon the part of the cities in the group he has in mind is not that they will refund to the Government the amount expended, but it is simply guaranteeing a market for the power and the water that the Government will produce.

Mr. CRAIL. No; it is that they will enter into definite contracts with the Government to purchase power at a fixed price and for long periods of time, until the cost of construction and cost of operations and interest and carrying charges are all repaid to the Government.

Mr. LINTHICUM. How long do you contemplate it will take to complete this dam?

Mr. CRAIL. Ten years.

Mr. LINTHICUM. Then you would draw money in 10 installments from the Government?

Mr. CRAIL. Moneys would become available only as needed. The bill provides that the work shall be done under the direction of the Secretary of the Interior. I wish I had time to answer more fully. I hope the gentleman from Maryland will not think I mean to be short or discourteous. I have so many things in my mind which I wish to say and so little time to say them in.

It is not often that the Government is asked to undertake a development where the return of the money expended is guaranteed in advance. Even in its great undertakings where it has been expected that revenue will be produced there has been no assurance of a return of the cost. Time and results only could tell the story.

Here, however, in the bill pending before us for the construction of the Boulder Dam we have a combination where the Government is taking care of its national obligations and at the same time is receiving a guarantee in advance that the money expended will be returned. The proponents of this measure have not only told the Congress that the communities to be directly benefited are willing to repay the costs, but they have come before the committees and produced abundance of evidence establishing beyond doubt their ability to repay the cost. To make perfectly clear their good faith they have written into the bill a provision that nothing is to be done, no money is to be expended, no contracts let for construction until there have been presented to the Secretary of the Interior perfectly good legal contracts for the full repayment of the cost with interest. If the communities of Southern California had the jurisdiction and could serve the multitude of purpose that will be served by a Government-built Boulder Dam, they would not be here asking anything of the Congress. They have the ability to finance and they have the ability to utilize the products so that Boulder Dam would be built by these communities if they were in a legal position to build it.

In most cases where the Government is asked to undertake any development it is essentially one where the assets must be largely created. In other words, the Government investment creates the ability to repay the cost. Here the commodity produced will be used for that purpose. The communities to be served are already in such prosperous condition that the contracts when made will be secured, thoroughly and automatically.

The all-American canal will be paid for largely by communities already thoroughly established and in excellent financial condition.

Domestic water will be contracted for by a large group of coastal cities with a combined population of perhaps 3,000,000 and assets of billions of dollars.

The power will be contracted for by power corporations who are already in the business and have assets of hundreds of millions of dollars, and by cities with assessed valuations of billions of dollars, and, indeed, by States with the whole of their resources back of their contracts.

No such offer has ever heretofore been made to the Federal Government, and yet this is a public improvement which the United States would not only be justified in constructing, but would be under obligation to construct even if there were no hope of return of the money.

The United States has already expended in flood protection on the Yuma reclamation project about $2,840,000. There has been expended for flood protection alone on the river front threatening Imperial Valley something like $10,000,000, mostly by the local communities. Large sums have likewise been spent by local interests in the Palo Verde Valley of California. But the flood menace is more acute now than it has ever been in the past. The United States owns hundreds of thousands of acres of public lands of great potential value along the lower Colorado. This land is all threatened with the flood menace and should the river get beyond control in the Imperial Valley these lands will never be reclaimed. Indeed a great flood on the lower Colorado would destroy the Yuma reclamation project, including the Laguna Dam, which is owned by the United States. The Parker Valley and the Yuma Valley in Arizona and Palo Verde and Imperial Valleys in California, with a combined population of more than 100,000 are constantly menaced by the floods. Clearly it is the Government's obligation to afford protection against floods. As a matter of good business on the part of the United States, flood protection should be assured for the benefit of its own property, even if its citizens and privately owned property are not taken into account. The Boulder Dam would give the greatest possible assurance against flood menace. In fact, the construction of this great dam would solve the flood menace.

A dam that will give flood protection and nothing else on the Colorado is estimated to cost not less than $28,000,000. Indeed, some of the engineers who have studied the problem state that a dam of that size would not solve the flood menace. Of course, money spent solely for flood protection could not be repaid. This bill, however, guarantees not only to repay the additional cost that will make water available for irrigation and domestic use and relieve the communities below of the intolerable silt burden, but it guarantees to repay all of the cost including money spent on the Government obligations of flood control and reclamation and regulation of commerce.

During the years that the Government has practiced flood control it has never asked the local communities to repay all of the cost thereof. At no time has any local community been asked to pay more than a small part of it. But by the provisions of this bill instead of asking the Government to pay a large part of the cost it is guaranteed in advance that the communities benefited will pay all of the cost. If contracts are not made for the repayment of all the cost, then the works will not be constructed or even commenced.

The fact that it can be so paid for can not well be disputed. Something like 550,000 firm horsepower of electrical energy will be generated at Boulder Dam. The revenue therefrom will be very large.

All of this power will not be thrown on the market in one block so as to disturb the market. On the contrary, as the witnesses have explained before the committees of the House and Senate when the dam is finished to a height of 200 or 300 feet, the first units of power will begin to flow into the market and will come in thereafter at the rate of perhaps 100,000 horsepower per year until the works are finally completed. The power market will absorb this power just about as fast as it is brought in. Speaking conservatively, it will all be used within two or three years after it is available. It will be known at least three or four years in advance when the power will be available and the power distributing agencies will shape their new production program accordingly.

The Southern California Edison Co. is one of the several agencies distributing power in Southern California. It has recently issued a statement that its power consumption is increasing at the rate of 130,000 horsepower per year. It serves perhaps one-third of the power load of the territory to be served. It is a safe assumption, therefore, that the power market in the Southwest is increasing at the rate of perhaps 300,000 horsepower per year. For a long time the power market has doubled every four years in southern California, and it will quickly take all of the Boulder Dam power and will require more to supply the demand.

Prof. William F. Durand, of Stanford University, who is an eminent expert on the subject, in his report to the Secretary of the Interior, printed in part 4 of the hearings on this bill, says:

Regarding this question it may be noted that the record of the various hearings before Congress is particularly full on this point and gives strong evidence for the conclusion that by the time the dam and plant could be completed, the demand due to normal growth in the territory susceptible of economic service from Boulder Canyon should be sufficient to absorb a very large percentage of the available power from the plant; and that within a period of two or three years from completion, a market should be found for the entire product.

A careful independent study of this subject by Messrs. Ready and Butler, consulting engineers of San Francisco, and the details of which have been carefully examined by the undersigned, support these same general conclusions.

Under these conditions there can be no doubt about the ability of the power market in the southwestern portion of the United States to absorb this power and to pay the cost thereof. However, as I have said before, these contracts must be made in advance and if the power market would not justify the making of the contracts then the project simply will not be built and the United States will have expended no money. Those of us who live in the communities affected are sanguine that the contracts will be made and that the power will be used and are therefore willing to have this rigorous provision in the bill. We do not regard it as an injury. We are willing to be required to thus finance in advance. At the same time the plan fully protects the Federal Treasury.

I have been referring to repayment and pointing out that the United States can not lose any money in this development. I wish to refer now to merely one other economic question. It is of considerable magnitude. It is also one of the many reasons why this great project should be completed. I refer to the conservation of oil resources.

From time to time we have heard it suggested that electric power in the extreme Southwest can be generated more cheaply by steam than by water at Boulder Dam. The facts do not substantiate this claim. It will be remembered that there is no coal in southern California, Nevada, or Arizona. The big power market is southern California. The nearest coal fields to southern California are something like 800 miles away. In transporting coal over this distance, mountain ranges are crossed so that the cost of coal in southern California is very great. It is so great that in order to generate power in southern California by steam, fuel oil and gas must be used. In recent years immense oil fields have been discovered, enormous quantities of petroleum have been taken out, but we do not know just how much remains. In any event, how long this fuel supply will last is very problematical.

On this subject, Professor Durand in his report had this to say:

At the present time the cost of fuel oil is about $1 per barrel. Certain users of fuel oil at the present time, however, are understood to be enjoying the advantage of a considerably lower price, due to the terms of long-time contracts made some years ago when the prevailing prices were $0.70 to $0.80 per barrel.

Users of oil fuel are able also to realize marked economies by the installation of a double system of combustion, suited alternately to oil or natural gas. Favorable contracts for such gas have been made (and are understood to be now operative) which give heating values equivalent to oil at about $0.80 per barrel.

On the other hand, it is understood that no time contracts for oil, of any extended duration, can now be obtained at any such price as $1 per barrel. The future trend of the price of fuel oil, looking forward to a period of 10 years, is doubtful in the extreme, and for longer periods of time is quite beyond the reach of any reasonable basis of estimate.

Without going here into details, the broad facts are these:

We are unquestionably exhausting our liquid-oil reserves.

A few years ago it was estimated that at the then rate of production such reserves would be practically exhausted in a period of 20 to 25 years.

Since those estimates, some new fields have been discovered.

Methods of extracting oil from the ground are improving.

The demand is constantly increasing.

Enormous reserves are available in the oil shales, awaiting only the development of some economic method of extraction of the oil from the rock. No methods are at present known which will produce such oil in competition with its extraction in liquid form from the ground.

While California territory has been generally prospected for oil, there may be still large fields as yet unknown and uncounted. The same is, of course, true of other territory in the United States and to still higher degree in the world at large.

In a situation of such complexity and with such diverse and unknown elements, the uncertainty of any forecast regarding the cost of fuel oil over any period of future time is clearly apparent. It may seem proper to conclude that over a long period of years the probabilities will be for a rise in price rather than for a fall, but as to how much or how soon, it is quite impossible to forecast.

In considering fuel-oil prices over any considerable period in the future, it would seem proper to use figures of $1, $1.25, and $1.50. The first as possibly representing present conditions or those in the very near future, while the higher figures seem within the limits of probability for a future period of any considerable extent.

In this connection it should also be noted that prices of power based on the low fuel prices which may be enjoyed at the present time as a result of earlier favorable contracts have no significance in the present inquiry, since the competition of Boulder Dam power with that from steam will be based primarily on the fuel conditions of the next half century.

Even though it were assumed that electric power could be generated in southern California by steam at the same price that it could be delivered from Boulder Canyon, it would be an extremely wasteful and short-sighted policy to so generate it. This is a mechanical age. There has not yet been discovered any satisfactory substitute for mineral oils as lubricants. While the demand for lubricants as well as for gasoline and other petroleum products is greatly on the increase, it is well known that the supply of these products will some day be exhausted.

In 1922 Professor Durand testified before the House Committee on H. R. 2903 (p. 1194). His testimony was reproduced in the hearing in 1924, as follows:

The only further point I have had in mind and which I do believe is of importance is that with regard to the significance of this power at Boulder Canyon Dam in reference to our oil reserves. Last week while here I had a conference with Director Smith, of the Geological Survey, and was provided by him, as set forth in authorized estimates which have been made by a special commission intrusted with the duty of determining as far as was humanly possible the amount of our oil reserves. The amount of such reserves is represented by a figure of about 9,000,000,000 barrels, according to the best estimate which can humanly be made at the present time.

Our present rate of production is a little under 500,000,000 barrels per year and the consumption a little over 500,000,000 barrels, which means that we have to go abroad for the balance. If these various conditions should continue about as they are we should exhaust these resources in about 20 years.

Importations will have to increase in order to balance the increased consumption. Now, if we equate the power at Boulder Canyon into fuel oil, we find that the 600,000 horsepower a year equated into terms of oil represents something like 23,000,000 barrels.

Mr. Walter G. Clark, consulting engineer of New York City, testified before the Senate Committee on Resolution 320 (p. 160) in 1925, and stated:

At the present time the fuel used to generate electric power within transmission distance of Boulder Canyon is equivalent to the continuous discharge of fuel oil from an 8-inch pipe at the rate of 5 feet per second every second of the year. This oil should be conserved for the use of the Navy and for marine shipping.

From all of which it clearly appears that in studying the economics of Boulder Dam we must not only regard it from the standpoint of the Treasury in dollars and cents, important as this is, but from the standpoint of the conservation of natural resources.

My conclusion is that the coastal cities of southern California will cheerfully and speedily enter into contracts with the Government to purchase all of the power which can be developed at Boulder Dam, and there is no doubt that every dollar will be returned to the Treasury. At the same time that the taxpayer's money is being saved, the natural resources of our country, which mean more than dollars and cents, are also being saved.

Here we have a situation where a wealth which does not now exist in Arizona, Nevada, and southern California will actually be created. All of the money required for that creation will be returned to the Federal Treasury with interest and the

natural resources of the Nation will be conserved. Surely no one can object with reason and in good faith to such a program.

Mr. DENISON. May I inquire of the gentleman if it has been arranged for some Member to discuss the constitutional question involved?

Mr. CRAIL. That is for the chairman of the committee to answer.

Mr. SMITH. That will be covered.

Mr. CRAIL. This project is entirely feasible. It has been declared constitutional by the most eminent legal authorities. It has been declared practical by the most eminent engineers of national and international reputation.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. CRAIL. May I have two minutes more?

Mr. SMITH. I yield to the gentleman five minutes more.

The CHAIRMAN. The gentleman is recognized for five minutes more.

Mr. CRAIL. As I was saying, this project is feasible, it is practical, it is constitutional. It has been approved by the United States Reclamation Service. It has been indorsed in the national platforms of the two great political parties of this country. President Coolidge on numerous occasions has indorsed it and expressed a wish that it would soon pass Congress. Members of the President's Cabinet have approved it, and have appeared before the committees of the House and of the Senate to indorse it and to urge its passage.

And now, friends, Congress has the golden opportunity. The time has come. The Colorado River is the last great undeveloped natural resource of the United States. Water is life in the great Southwest, and this Congress at this session should make a reality of this great dream which means so much not only to the people of the Southwest but to all the people of this country. [Applause.]

When this great dream of the people of the Southwest rounds into fulfillment Boulder Dam will be one of the great national assets. [Applause.]

The CHAIRMAN. The time of the gentleman from California has again expired.

Mr. SMITH. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. LEHLBACH, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, had come to no resolution thereon.

FURTHER MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed without amendment bills of the House of the following titles:

H. R. 5475. An act authorizing the New Cumberland Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near New Cumberland, W. Va.; and

H. R. 12479. An act authorizing the sale of all of the interest and rights of the United States of America in the Columbia Arsenal property, situated in the ninth civil district of Maury County, Tenn., and providing that the net fund be deposited in the military-post construction fund.

The message also announced that the Senate had passed with an amendment, in which the concurrence of the House of Representatives was requested, a bill of the House of the following title:

H. R. 12821. An act to authorize an appropriation to provide additional hospital, domiciliary, and out-patient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, 1924, as amended, and for other purposes.

The message further announced that the Senate agrees to the amendments of the House of Representatives to bills of the following titles:

S. 2535. An act granting to the State of New Mexico certain lands for reimbursement of the counties of Grant, Luna, Hidalgo, and Santa Fe for interest paid on railroad-aid bonds and for the payment of the principal of railroad-aid bonds issued by the town of Silver City and to reimburse said town for interest paid on said bonds, and for other purposes; and

S. 3808. An act to authorize the construction of a temporary railroad bridge across Bogue Chitto River at or near a point in township 5 south, range 13 east, St. Helena meridian, St. Tammany Parish, La.

The message also announced that the Senate had ordered that Mr. SIMMONS be excused from service on the committee of conference on the bill (H. R. 1) entitled "An act to reduce and equalize taxation, provide revenue, and for other purposes," and that Mr. HARRISON be appointed in his stead.

ADDITIONAL HOSPITAL FACILITIES FOR WORLD WAR VETERANS

Mrs. ROGERS. Mr. Speaker, I am authorized by the Committee on World War Veterans' Legislation to ask unanimous consent to take from the Speaker's table the bill H. R. 12821, with a Senate amendment, and agree to the Senate amendment.

The SPEAKER. The Clerk will report the bill and the Senate amendment.

The Clerk read as follows:

A bill (H. R. 12821) to authorize an appropriation to provide additional hospital, domiciliary, and out-patient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, 1924, as amended, and for other purposes.

The Senate amendment was read.

The SPEAKER. The question is on agreeing to the Senate amendment.

The Senate amendment was agreed to.

NEW DIVISION, DISTRICT COURT, NORTHERN DISTRICT OF TEXAS

Mr. SUMNERS of Texas. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill S. 3864, which is identical with House bill 12692. Mr. JONES, the author of the bill, is here and joins in the request.

The SPEAKER. Will the gentleman say there is an emergency?

Mr. SUMNERS of Texas. Yes.

The SPEAKER. The gentleman from Texas asks unanimous consent to take from the Speaker's table the bill S. 3864. The Clerk will report it.

The Clerk read as follows:

A bill (S. 3864) to create a new division of the District Court of the United States for the Northern District of Texas

Be it enacted, etc., That there is hereby created, in addition to those now provided by law, a new division of the District Court of the United States for the Northern District of Texas, which shall include the territory embraced on the 1st day of July, 1928, in the counties of Bailey, Borden, Lamb, Floyd, Kent, Motley, Hale, Dickens, Crosby, Lubbock, Scurry, Hockley, Cochran, Yoakum, Terry, Lynn, Garza, Dawson, and Gaines, which shall constitute the Lubbock division of said district. Terms of the district court for the Lubbock division shall be held at Lubbock on the third Monday in May and the second Monday in December: *Provided*, That suitable accommodations for holding court at Lubbock shall be provided by the county or municipal authorities without expense to the United States.

The clerk of the court for the northern district shall maintain an office in charge of himself or a deputy, in addition to the places now provided, at Lubbock, which shall be kept open at all times for the transaction of the business of the court.

SEC. 2. All laws and parts of laws in conflict herewith are hereby repealed.

The SPEAKER. The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote whereby the Senate bill was passed was laid on the table.

THE PRESENT AND FUTURE OF DISARMAMENT

Mr. RATHBONE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting an address delivered by myself recently before the American Academy of Religious and Social Science on the subject of disarmament.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

Mr. RATHBONE. Mr. Speaker, under leave granted to extend my remarks, I insert the following address delivered by myself at the annual convention of the American Academy of Political and Social Science, held at the Bellevue-Stratford Hotel, Philadelphia, May 12, 1928.

ADDRESS BEFORE CONVENTION OF THE AMERICAN ACADEMY OF POLITICAL AND SOCIAL SCIENCE BY HON. HENRY R. RATHBONE, CONGRESSMAN AT LARGE FROM ILLINOIS

War is the most terrible scourge that afflicts humanity. The greatest irony of our boasted civilization is that it is still led captive behind the chariot of the god of war.

Peace is the crown of civilization. The assurance of a just and lasting peace would be the greatest blessing ever conferred on mankind.

THREE PROPOSED ROADS TO PEACE

There are three roads which humanity is invited to take and which we are told will lead us toward the temple of peace that shines afar from its lofty heights and beckons us on. There are three lines of attack against the forces of Mars.

Each of these proposed plans for abolishing war has its especial champion and sponsor among the great nations or groups of powers.

First, we have the proposal to outlaw war, which originated with and is championed by the United States. This would probably involve some form of codification of international law and the establishment of a tribunal for the settlement of justiciable disputes, the decisions of which would be based upon such code.

Secondly, the covenant of the League of Nations, which rests upon the principle that disputes between nations should be settled by the maintenance of the status quo and the peace of the world by economic pressure or force of arms.

Thirdly, we have the recent proposal made by the Soviet Government of disarmament, to be accomplished as speedily and completely as possible.

DISARMAMENT ONLY A PARTIAL REMEDY

It can hardly be claimed that disarmament is the sole or even the most important road leading to peace. It is negative rather than affirmative. Nevertheless, it should not be belittled for that reason. It is as important that the farmer first clear his raw land as it is for him later to plant his crop.

Disarmament is one of many changes which will have to take place before the world can rid itself of war. In order to achieve success the attack upon the enemy's forces should be made all along the line of battle, and disarmament is a vital point in that line.

PRESENT PROSPECTS FOR DISARMAMENT

At first blush the prospects would not appear especially bright for any movement in the direction of disarmament. Despite the declarations of its covenant the League of Nations has accomplished practically nothing in bringing about disarmament. The Geneva conference ended in total failure. The recent proposal of the Soviet Union was so lightly, if not scornfully, received by most of the great powers as to induce the belief that the world was not prepared for any considerable reduction of armament.

FORCES WORKING TO BRING ABOUT DISARMAMENT

In spite of every discouragement, however, I believe that there are great fundamental forces at work, the influence of which will sooner or later have its effect upon future armaments. It has been well said that "nothing succeeds like success." Disarmament has been achieved and the inference therefore will be drawn that it may in the future be made a success in a yet wider field than ever before.

True, such forms of disarmament are only partial and on a strictly limited scale, but still the success made gives great hope for the future.

The international boundary between the United States and Canada, which for over 100 years has been unguarded by fort, a soldier, or a gun, is one shining example of successful disarmament.

The Washington conference is another. Although it dealt solely with capital ships and left untouched other problems of disarmament, yet it marked the beginning of a new era. For the first time in the history of the world great nations, by their chosen representatives, met about the council table and were able to agree upon a limitation and reduction of armament, to take a naval holiday, to lighten the burden of their taxpayers by many millions of dollars, and to turn the thoughts of men, at least for the time being, away from preparation for war and in the direction of peaceful commerce and industry.

Again, the advance of science will tend to do away with armaments. It may well be that in the not far distant future battleships and cannon will be rendered obsolete. Mighty armaments will be replaced, if war is to continue, by the chemical laboratories, where the asphyxiating gases nad deadly poisons will be concocted with which conflicts of the future will be waged.

Moreover, economical forces in the long run are well-nigh irresistible and it is likely that they will in the end exert a most potent influence against great armaments. Those nations which, like Germany, have been compelled to disarm will be thereby relieved of such a staggering weight that they will hold a position of great advantage over those nations which must still bear the colossal burdens of preparedness for war. The peoples who are taxed to maintain armaments will note the difference and sooner or later are likely to insist on a lightening of their burdens.

PUBLIC OPINION WILL MAKE ITS INFLUENCE FELT

Recently we had an example of the power of public opinion when aroused on the subject of increased armament. This happened in connection with the program of naval construction laid before Congress at its present session. At the outset it seemed as if nothing could stop a wave of sentiment in favor of a great program of naval construction. But then came what amounted almost to an upheaval of public sentiment in opposition to an extreme expenditure on new cruisers, which was so powerful that Congress was at once constrained to take heed and to adopt a moderate program of construction.

Finally, the reception given to the proposal of the Soviet Government for immediate and total disarmament, and later for a reduction of armaments by degrees, was not so wholly unfavorable as might, perhaps, have been expected. The comments of many leading newspapers at the time were far from unfavorable.

The most significant thing, however, of all, to my mind, was the total failure on the part of those who scornfully rejected the Soviet proposal to assign any good reason for rejecting it. Litvinov's jibe has remained unanswered, when in his address he said, "On the one hand the criticism of our proposal was based upon deep international mutual suspicion, upon the assumption that a solemnly adopted international convention is inevitably bound to be violated. On the other hand, we are being told: When two neighbors, armed to the teeth, give a solemn promise not to attack each other, then they believe that a fight is impossible. But when these neighbors, in addition to their solemn promise, engaged themselves to disarm and actually do disarm, then we are told that this will not only increase, but, on the contrary, even diminish the existing security."

THE CONDITIONS OF SUCCESS

There are certain conditions that must be met before any success in the matter of disarmament can be achieved. First, disarmament must be mutual. As Abraham Lincoln once said, "A house divided against itself can not stand; I believe that this Nation can not permanently endure half slave and half free." So we might well say, "The world can not permanently continue half armed and half unarmed."

Secondly, disarmament must be voluntary. One of the most deep-seated things in human nature is that it resents discrimination and rebels against an assumed superiority. If disarmament is involuntarily imposed on some nations while others are permitted to be armed to the teeth, the disarmed nations will most deeply resent their impotence. "To be weak is miserable, doing or suffering." It may be regarded as certain that at the earliest opportunity nations forced to disarm against their will will repudiate any agreement which they may have made and will insist on their being treated as the equals of those which are armed, even though they are compelled to go to war to reestablish their equality.

Thirdly, disarmament must be general. Either nations like Germany must be allowed to arm or the powers which are now armed must disarm.

DISARMAMENT MUST BE BASED ON JUSTICE

If the nations are to lay down their arms, above everything else a new spirit must prevail among them. There must be a new standard of international ethics established. We must take this as the motto for our international conduct: "Nothing can be right between nations which is wrong between men." Emerson was eternally right when he closed his great essay on self-reliance with these words: "Nothing can bring you peace but the triumph of principles."

This new international spirit must be manifested by the adoption of higher and better principles in international relations.

RENUNCIATION OF IMPERIALISM IS NECESSARY

Renunciation is the word which best expresses the moral lessons which nations so sadly and urgently need to learn. It is the spirit of imperialism that more than anything else stands like a mighty rock to block the onward progress of the nations toward peace and disarmament. All forms of commercial or other advantage enjoyed by one nation over others should be surrendered. Colonies and spheres of influence should be abandoned. The system of mandates should be done away with and one of joint control should take its place. The civilized nations should be guaranteed equal opportunity to participate in the development of backward countries. The doctrine of the "open door," one of the fundamental principles of American diplomacy, should be broadened and universally recognized.

If we expect the great powers to surrender the advantages that they enjoy, the United States must be prepared to do the same. What has been said would apply to the Philippines and to our spheres of influence in Central America and in the Caribbean Sea. Moreover, it may well be that the war debts should be considered as part of a general international settlement. The surrender of war claims should form part of the inducement extended to other nations to take part in such a settlement.

Not only must nations be prepared to surrender their advantages on land, but also any which they may enjoy on sea. The doctrine of the "freedom of the seas" should be enlarged to take in all the elements. No nation should be the ruler of the land or of the sea or of the air.

Every civilized nation should be pledged to a belief in and a strict observance of the principle of self-determination, which is none other than the doctrine proclaimed in the Declaration of Independence of Government by the consent of the governed.

CONCLUSIONS

Armaments are a very great and growing evil. Every effort should be made to bring about disarmament, whether partial or total. The choice before the nations is somewhat similar to that which confronts a man who has for a long time past been indulging to excess in intoxicants and whose physician informs him that he must stop, if he is to

live. He may decide never to take another drop or he may determine strictly to limit and perhaps gradually to reduce the amount of his potations. No doubt the first course would be for him the best, but the latter is the one which he is more than likely to follow. Total and permanent disarmament would be of immense and incalculable benefit to humanity. It is so difficult to attain to the conditions, however, under which total disarmament would be possible, that it can hardly be considered as practical at the present time.

I believe, however, that in the comparatively near future we shall see a substantial step taken in the direction of some reduction of armaments and that this will be brought about through an international conference.

Let us hope that this will come before the catastrophe of another great world war. Let us bend every effort to keep constantly before the eyes of the peoples of the world the tremendous importance of the problem of disarmament. Let us do our best to speed the coming of the time of "Peace on earth, good will to men."

LEWIS MORRIS, SIGNER OF THE DECLARATION OF INDEPENDENCE

Mr. GRIFFIN. Mr. Speaker, I ask unanimous consent to extend in the RECORD my remarks at St. Ann's Church, the Bronx, New York City, July 5, 1926, on the occasion of the sesquicentennial of the birth of Lewis Morris, a signer of the Declaration of Independence, and in that connection an address made by the Hon. Charles W. Parker, justice of the Supreme Court of New Jersey, upon Lewis Morris, the grandfather of the signer and the first Governor of New Jersey.

The SPEAKER. Is there objection to the gentleman's request?

Mr. CRAMTON. I have no objection to the gentleman printing his own address, but I shall have to object to the other address.

Mr. GRIFFIN. It has a connection. The grandfather of Lewis Morris, the signer of the declaration, was the first Governor of New Jersey, referred to in the address of Mr. Justice Parker.

Mr. CRAMTON. I would not object if the gentleman would modify his request.

The SPEAKER. So far as the extension of the gentleman's own remarks is concerned, is there objection?

There was no objection.

The address was as follows:

LEWIS MORRIS, 4TH, ONLY SIGNER OF THE DECLARATION OF INDEPENDENCE WHO WAS BORN AND BURIED IN THE CITY OF NEW YORK

It is a great privilege to be afforded the opportunity to address this distinguished gathering upon this doubly significant occasion, for we celebrate not only the sesquicentennial of the birth of our Nation but also the two-hundredth anniversary of the birth of a great patriot and statesman, who was born and who died and was interred in the city of New York. We are standing on sacred ground. The mortal remains of Lewis Morris are interred in the crypt in the basement of this historic edifice.

I hope the celebration here to-day will revive the interest of the people of New York in historic landmarks. If this delightful old church were in Pohick, Va., or somewhere around Boston, its steps would be worn smooth with caravans of patriotic tourists who would be directed to its doors. Because it is in New York it seems to have been forgotten.

I made an address at the Bunker Hill celebration in Boston a few years ago and was delighted, as well as amazed, at the local pride manifested in all of the Revolutionary landmarks. The house where Benjamin Franklin lived, the old church in whose tower the lanterns were hung to signal to Paul Revere the news that the British troops were about to begin the march on Lexington and Concord, and other historic landmarks were pointed out to visitors with pride and reverence. All the way from Boston Common to Lexington and Concord, where the embattled farmers stood and "fired the shot heard 'round the world"—every rod of it was marked by some historic recollection and is idealized into a shrine for patriotic devotion.

Recently I journeyed through the Yorktown Peninsula, and every acre of it was held sacred—Jamestown, the scene of the first settlement; the little church at Williamsburg, where Pocahontas was baptized; Yorktown, where Cornwallis surrendered; and the sites of the famous battles of the Civil War—all were marked and emphasized with patriotic fervor.

New York City is not lacking in equally interesting landmarks of great historic interest, but in our overwhelming devotion to commercial and industrial progress we have apparently allowed ourselves to forget our obligations to the finer sensibilities of pride in the origins and traditions of our city. To the student of history whose heart is warmed by contact with places having a historic significance our great city offers for our devotion numerous Revolutionary landmarks.

Bowling Green, where the sons of liberty tore down the leaden statue of George III and used its metal for bullets, there stands to-day the iron railings once capped with the ornamental iron balls which were chipped off and used as shot for patriot cannon.

Fraunces Tavern, where Washington bid his officers farewell, the old structure being preserved in the same state in which it stood in Revolutionary days.

Trinity and St. Paul's churchyards, on Broadway, containing the remains as well as monuments of patriotic statesmen and heroes.

The Subtreasury Building, on Wall Street, where Washington was sworn in as the first President of our Republic and where the first Congress of the new Government met.

The anchorage of the Brooklyn Bridge, at No. 3 Cherry Street, which now occupies the site where once stood the colonial mansion which Washington occupied as the first White House.

City Hall Park, the site of the old British prison, where so many patriots languished and died. There stands the statue of Nathan Hale who, before he died on the scaffold on that very spot, is said to have defiantly exclaimed: "My only regret is that I have only one life to give for my country!" Whether he said it or not, we can easily believe that was his thought.

I was born and brought up on the east side of the Island of Manhattan, within a stone's throw of the shore, on which the boats of Washington's army were beached when he led them on that foggy night after the disastrous defeat on Brooklyn Heights. To cover his retreat through the Island of Manhattan, intrenchments and block houses were built at intervals. One of these block houses was built at Broadway and Houston Street by General Putnam. Another, which is still standing, may be seen in the northwestern corner of Central Park.

I shall not take time to enumerate the many points of Revolutionary significance to be found in the Bronx. Suffice it to say that, beginning at this historic church, the whole county which was then a part of Westchester, is filled with historic sites and recollections. When the British occupied New York City, which was then at the tip of Manhattan Island, the Bronx was the fighting ground of guerrillas from both sides all during the Revolutionary conflict. And in that fighting, Lewis Morris, to whom I am to pay my tribute to-day, had a vital and conspicuous interest.

When I accepted the honor to speak here to-day I confess I assumed the task in a most light-hearted manner, believing that my mere casual acquaintance with the subject could be easily fortified and augmented sufficiently for the purpose by reference to the encyclopedias. What was my surprise then to find that Lewis Morris, one of the signers of the Declaration of Independence, was not deemed of sufficient historic importance to entitle him to even a paragraph? In one encyclopedia, for instance, was the brief statement at the end of the memoir of Gouverneur Morris in these casual, almost flippant, words: "His elder brother, Lewis, was one of the signers of the Declaration of Independence."

Such was my predicament that I began to fear that I would have to come here to-day and apologetically make the disgraceful admission that the annals of American history were silent upon the life of Lewis Morris, the modest, able, brave statesman and soldier, who really paved the political way for his younger and more famous brother.

One of the most discouraging embarrassments of the student of history is the inequitable appraisal of the relative merits of historic characters. I know of no great man in our early history whose memory has suffered more from this disparagement of bias and utter neglect than the patriot whose memory in great measure we are assembled here to honor on this distinguished occasion.

Lewis Morris was born here in the Bronx on April 8, 1726; so that by a strange historic coincidence this occasion is not only the sesquicentennial anniversary of American independence but the two hundredth anniversary of his birth.

The name Morris is inseparably connected with the Bronx, forming as it does the root of Morrisania. It is of Welch origin, being derived from the word "Maur" (meaning great) and the term "Rhys" (meaning a chief). "Maur Rhys" was the appellation for Rhys Fitzgerald, a Cambria chieftain, who invaded Ireland in the reign of Henry II. He was given a large domain in Wales and dropped the name of Fitzgerald. The compound name "Maur-Rhys" was later corrupted into "Maurice" and finally "Morris."

The founder of the Morris family in America was Richard Morris, a captain in Cromwell's army. On the restoration of Charles II he decided that it might, perhaps, be more comfortable for him to reside outside of England. At first he sought refuge in the Barbadoes, where he married, and later came to New Amsterdam, which was soon to be conquered by the English and its name changed to New York. He purchased a large tract of land in the Bronx, building a mansion on the slope of the hill leading down to the old mill stream that used to meander along about the location of the present Brook Avenue. He died in 1673. His son Lewis (born 1671) became the first colonial Governor of New Jersey. He died May 21, 1748, and his remains are interred in this church. He left two sons, Lewis Morris, who became a justice of the court of vice admiralty of New York, and Robert Hunter Morris, who became chief justice of New Jersey under the Constitution of 1776. Lewis Morris had four sons.

Lewis Morris, the fourth of the name, the subject of this address, was the eldest and was born at the old homestead, within a stone's throw

of the historic church in which we are now gathered, on April 8, 1726. He was sent to Yale College when 16 years old and graduated in 1746. For 20 years he devoted his energies to the cultivation of his immense estate, which covered an area of 3,000 acres. In the meantime he married Miss Mary Walton, a young lady of large fortune. Six sons and four daughters blessed the union.

His, indeed, was a home of supreme domestic felicity when the rumblings of the Revolutionary struggle began. When the infamous stamp act was promulgated by the British Parliament in 1765 it elicited immediate and emphatic protests. The newspapers published editions in black borders to symbolize the death of liberty. With everything to gain, except the consolation of his conscience, Lewis Morris (whose wealth and social standing might well have tempted a mercenary man to ally himself with the Tories, of whom there were many in the colony) forgot self-interest and arrayed himself upon the patriotic side of the controversy.

The stamp act was repealed in the following year but was soon followed by other acts of oppression. Parliament, it seemed, would concede one point to recede and then insist upon some other point equally objectionable to American sensitiveness.

An old statute of Henry VIII was revived in Massachusetts under which persons charged with political offenses could be brought to England for trial instead of being permitted to be tried where the alleged offense was committed. You will recall that this was one of the chief grievances subsequently enumerated in the Declaration of Independence.

In other colonies similar acts of oppression, but varying in their character and intensity, forced the colonies into a cohesive combination of resistance and in the aggregate forced the calling of the first Continental Congress in 1774. Its resolutions of protest were spurned.

This cavalier treatment of the first Continental Congress drove the patriots to more determined preparations for the next. The provincial congresses in the different States at the ensuing sessions passed resolutions indorsing the stand of the Continental Congress and elected a full representation to participate in the session of 1775. The New York Convention of Deputies met at White Plains on April 22, 1775, a few days after the Battle of Lexington, and chose Lewis Morris, of Morrisania, as a delegate to the Continental Congress.

When the Continental Congress met in 1775 he was placed on the committee, of which George Washington was chairman, to provide military stores and ammunition for the rapidly forming Continental Army. In the following fall and winter he was among the foremost in shaping and perfecting the preparations for what he saw was to be a long military struggle. He went into the western part of the country and took up negotiations with the Indian tribes in an effort to detach them from their alliance with Great Britain.

I see before me in this audience Chief Fair Cloud, a full-blooded descendant of one of the Indian tribes which Lewis Morris visited. What a curious coincidence is this! It would seem as though his presence here to-day had been planned to give emphasis to this phase in the life of Lewis Morris; and yet I venture to say that neither Chief Fair Cloud himself nor Major Davis, who invited him to be present, were, up to this moment, acquainted with the relationship he occupies to the renowned subject of this address.

When the Continental Congress met again in 1776 Lewis Morris was made a member of the committee to contract for the purchase of muskets and bayonets and the encouragement of the manufacture of saltpeter and gunpowder. He was also a member of the Committee on Indian Affairs.

In June, 1776, the committee, composed of Jefferson, Adams, and Livingston, were appointed to draft a suitable declaration justifying the attitude of the Colonies before the world. On June 28, 1776, Washington announced the arrival of Gen. Sir William Howe in the *Greyhound* off Sandy Hook with a convoy of 130 vessels. It was generally known that Admiral Lord Richard Howe was near at hand with nearly 300 more transports and warships, all aiming at the capture of New York.

Imagine the state of mind of Lewis Morris in the Continental Congress when the draft of the Declaration of Independence came up for consideration. His home and large estate in Morrisania he knew would soon be given over to Howe's mercenaries; but, abandoning all thoughts of self-interest, and never wavering for an instant, he threw his whole heart and soul into the balance in favor of American liberty.

His signature to the immortal document of American liberty is in a fine and clear though not so large a hand as that of John Hancock. It is, indeed, significant of the simplicity, modesty, and integrity of his noble character. He was not wrong in foreseeing the reprisal of the British for his activities in behalf of American liberty. Washington was beaten at the Battle of Long Island, and the British troops soon tore through the beautiful valleys of the Bronx. His splendid woodland of over a thousand acres was destroyed, his cattle driven off, and his estate given up to plunder and conflagration, so that when he returned after the evacuation of New York on November 23, 1783, he found himself impoverished, his only consolation being the honor and esteem in which he was held by his fellow citizens.

The distinguishing characteristic of Lewis Morris was his modesty, his integrity, and disinterestedness. For instance, it is not generally known that he declined to run for a second term in the Continental Congress, waiving his rights in favor of his younger half-brother Gouverneur Morris, thus giving the opportunity to that young statesman to lay the foundations for his subsequent renown. Lewis Morris sincerity. To do a good act was to him its own reward. He never sincerity. To do a good act was to him its own reward. He never looked for praise or blame. To use a commonplace expression, "he never blew his own horn." He left no autobiographical records of his achievements, and has thus been neglected by historians. Gouverneur, on the contrary, had the gift of oratory and wielded a facile pen. The confidence of Lewis in his younger brother was not misplaced. There is no doubt that the younger was the better fitted for a parliamentary career, and his splendid achievements confirm and justify the wisdom of a brother's sacrifice.

Lewis Morris thus passed from a parliamentary career into the sphere of military action, for which he was perhaps more fitted. He resumed his connection with the State militia, attaining the rank of major general, and participating in the many skirmishes which ensued during the British occupation of New York. For the Bronx was then a sort of "No man's land" and the scene of almost continuous guerrilla warfare. He also served in the State legislature, where he was distinguished for his patriotic zeal and rare sagacity.

It is not alone the contribution of Lewis Morris himself to the patriotic cause that should entitle him to honor and esteem. It must also be accorded to his glory that three of his sons bore an active part in the Revolutionary armies. Their remains also are interred within the sacred bounds of this historic church.

The great struggle for independence over, Lewis Morris returned to his ravished and ruined estate and devoted his declining years to rebuilding it to its former magnificence. He was content to live in bucolic peace and happiness and passed peacefully out of a life well worth while at the age of 72 years on the 22d day of January, 1798.

His remains are now interred in the crypt over which I am at this moment standing. Outside in the great mausoleum are the remains of his more distinguished brother, and all around us in vaults and graves in the modest churchyard of this inclosure lie the remains of noble men and women of conspicuous renown in war and peace. This little church is therefore historic. Its significance should be better appreciated. We live in an environment where patriotism is not sufficiently fostered. There is no future for America unless we maintain the spirit of reverence for the virtues of courage and self-sacrifice which characterized the signers of the Declaration of Independence.

It is my most sincere hope that one of the results of this anniversary, which I trust from hence forward is to become an annual celebration, will be the stimulation of a revival of interest among New Yorkers in its many vital historic landmarks which stand as mementoes of the highest form of human disinterestedness, devotion, and patriotism.

SENATE BILL REFERRED

A bill of the following title was taken from the Speaker's table and, under the rule, referred to the appropriate committee, as follows:

S. 3554. An act to authorize the Public Health Service and the National Academy of Sciences jointly to investigate the means and methods for affording Federal aid in discovering a cure for cancer, and for other purposes; to the Committee on Interstate and Foreign Commerce.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled a bill of the following title, when the Speaker signed the same:

H. R. 971. An act for the relief of James K. P. Welch.

The SPEAKER announced his signature to enrolled bills and a joint resolution of the Senate of the following titles:

S. 1284. An act amending the act approved April 30, 1926, entitled "An act amending the act entitled 'An act providing for a comprehensive development of the park and playground system of the National Capital,' approved June 6, 1924";

S. 1369. An act to authorize and direct the survey, construction, and maintenance of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge across the Potomac River at Washington;

S. 1661. An act to authorize the Secretary of the Interior to transfer the Okanogan project, in the State of Washington, to the Okanogan irrigation district upon payment of charges stated;

S. 2327. An act to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes;

S. 2370. An act to amend section 24 of the immigration act of 1917;

S. 2542. An act for the construction of a private conduit across Lincoln Road NE., in the District of Columbia;

S. 2823. An act amending the statutes of the United States with respect to reissue of defective patents;

S. 3693. An act authorizing the city of Council Bluffs, Iowa, and the city of Omaha, Nebr., or either of them, to construct, maintain, and operate a free highway bridge across the Missouri River between Council Bluffs, Iowa, and Omaha, Nebr.;

S. 3867. An act to provide for the extension of the time of certain mining leases of the coal and asphalt deposits in the segregated mineral land of the Choctaw and Chickasaw Nations, and to permit an extension of time to the purchasers of the coal and asphalt deposits within the segregated mineral lands of the said nations to complete payments of the purchase price, and for other purposes; and

S. J. Res. 97. Joint resolution authorizing the President to appoint three delegates to the Twenty-third International Congress of Americanists, and making an appropriation for the expenses of such congress.

JOINT RESOLUTIONS AND BILLS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States for his approval joint resolutions and bills of the House of Representatives of the following titles:

H. J. Res. 39. Joint Resolution authorizing the Secretary of War to receive, for instruction at the United States Military Academy at West Point, two Chinese subjects, to be designated hereafter by the Government of China;

H. J. Res. 40. Joint resolution authorizing the Secretary of War to receive, for instruction at the United States Military Academy at West Point, two Siamese subjects, to be designated hereafter by the Government of Siam;

H. R. 7373. An act providing for the meeting of electors of President and Vice President and for the issuance and transmission of the certificates of their selection and of the result of their determination, and for other purposes;

H. R. 8546. An act authorizing an appropriation of $2,500 for the erection of a tablet or marker at Lititz, Pa., to commemorate the burial place of 110 American soldiers who were wounded in the Battle of Brandywine and died in the military hospital at Lititz;

H. R. 9495. An act to provide for the further development of agricultural extension work between the agricultural colleges in the several States receiving the benefits of the act entitled "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," approved July 2, 1862, and all acts supplementary thereto, and the United States Department of Agriculture;

H. R. 11338. An act authorizing the Kansas City Southern Railway Co., its successors and assigns, to construct, maintain, and operate a bridge over the Missouri River near Randolph, Mo.; and

H. R. 11990. An act to authorize the leasing of public lands for use as public aviation fields.

LEAVE OF ABSENCE

Mr. CLANCY, by unanimous consent (at the request of Mr. MCLEOD), was granted leave of absence, on account of the death of his mother.

Mr. CONNERY, by unanimous consent (at the request of Mr. DOUGLASS of Massachusetts), was granted leave of absence, indefinitely, on account of illness in his family.

ADJOURNMENT

Mr. SMITH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 30 minutes p. m.) the House adjourned until to-morrow, Wednesday, May 23, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Wednesday, May 23, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON BANKING AND CURRENCY

(10.30 a. m.)

To amend the act approved December 23, 1913, known as the Federal reserve act; to define certain policies toward which the powers of the Federal reserve system shall be directed; to further promote the maintenance of a stable gold standard; to promote the stability of commerce, industry, agriculture, and employment; to assist in realizing a more stable purchasing power of the dollar (H. R. 11806).

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

To regulate the distribution and promotion of commissioned officers of the line of the Navy (H. R. 13683).

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

539. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Waddington Harbor, N. Y. (H. Doc. No. 322); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

540. A letter from the chief scout executive of the Boy Scouts of America, transmitting copy of the eighteenth annual report of the Boy Scouts of America (H. Doc. No. 323); to the Committee on Education and ordered to be printed, with illustrations.

541. A letter from the Secretary of the Treasury, transmitting report of the Federal farm-loan board for the year ended December 31, 1927 (H. Doc. No. 324); to the Committee on Banking and Currency and ordered to be printed, with papers.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. LUCE: Committee on the Library. H. R. 11800. A bill to establish a commission for the participation of the United States in the observance of the one hundred and fiftieth anniversary of the Battle of Rhode Island; without amendment (Rept. No. 1809). Referred to the Committee of the Whole House on the state of the Union.

Mr. ELLIOTT: Committee on Public Buildings and Grounds. H. R. 13929. A bill to provide for the enlarging of the Capitol Grounds; without amendment (Rept. 1810). Referred to the Committee of the Whole House on the state of the Union.

Mr. DALLINGER: Committee on Civil Service. S. 3116. An act providing for half holidays for certain Government employees; with amendment (Rept. No. 1811). Referred to the Committee of the Whole House on the state of the Union.

Mr. MORIN: Committee on Military Affairs. H. R. 11469. A bill to authorize appropriations for construction at the United States Military Academy, West Point, N. Y.; without amendment (Rept. No. 1812). Referred to the Committee of the Whole House on the state of the Union.

Mr. UNDERHILL: Committee on Claims. S. 3294. An act for the relief of certain newspapers for advertising services rendered the Public Health Service of the Treasury Department; without amendment (Rept. No. 1813). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAUGEN: Committee on Agriculture. H. R. 13882. A bill to extend the benefits of the Hatch Act and the Smith-Lever Act to the Territory of Alaska; without amendment (Rept. No. 1816). Referred to the Committee of the Whole House on the state of the Union.

Mr. PORTER: Committee on Foreign Affairs. H. J. Res. 311. A joint resolution to provide an annual appropriation to meet the quota of the United States toward the expenses of the International Technical Committee of Aerial Legal Experts; without amendment (Rept. No. 1817). Referred to the Committee of the Whole House on the state of the Union.

Mr. GRAHAM: Committee on the Judiciary. S. 3097. An act for the relief of the State of North Carolina; without amendment (Rept. No. 1818). Referred to the Committee of the Whole House on the state of the Union.

Mr. PARKS: Committee on Interstate and Foreign Commerce. H. R. 13108. A bill granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a toll bridge across the White River at or near Newport; with amendment (Rept. No. 1820). Referred to the House Calendar.

Mr. HUDDLESTON: Committee on Interstate and Foreign Commerce. H. R. 13747. A bill authorizing the Northwest Florida Corporation, its successors and assigns, to construct, maintain, and operate a bridge across Perdido Bay, at or near Innerarity Point in Escambia County, Fla., to the mainland of Baldwin County, Ala.; without amendment (Rept. No. 1821). Referred to the House Calendar.

Mr. RAYBURN: Committee on Interstate and Foreign Commerce. H. R. 13777. A bill authorizing the State of Louisiana and the State of Texas to construct, maintain, and operate a free highway bridge across the Sabine River at or near Burrs Ferry; without amendment (Rept. No. 1822). Referred to the House Calendar.

Mr. PEERY: Committee on Interstate and Foreign Commerce. H. R. 13848. A bill to legalize a bridge across the Potomac River at or near Paw Paw, W. Va.; without amendment (H. Rept. No. 1823). Referred to the House Calendar.

Mr. PARKS: Committee on Interstate and Foreign Commerce. S. 4344. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across White River at or near Clarendon, Ark.; with amendment (Rept. No. 1824). Referred to the House Calendar.

Mr. BURTON: Committee on Foreign Affairs. H. R. 13930. A bill to authorize an appropriation for the American group of the Interparliamentary Union; without amendment (Rept. No. 1825). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. HOFFMAN: Committee on Military Affairs. H. R. 2651. A bill for the relief of David F. Richards, alias David Richards; without amendment (Rept. No. 1814). Referred to the Committee of the Whole House.

Mr. FURLOW: Committee on Military Affairs, S. 2894. An act for the relief of Robert O. Edwards; without amendment (Rept. No. 1815). Referred to the Committee of the Whole House.

Mr. GUYER: Committee on Claims. H. R. 11749. A bill for the relief of H. A. Russell; with amendment (Rept. No. 1819). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. HASTINGS: A bill (H. R. 13955) to provide for the construction of a military road at the United States cemetery at Fort Gibson, Okla.; to the Committee on Military Affairs.

By Mr. PARKS: A bill (H. R. 13956) for the purchase of a site and the erection of a public building thereon at Warren, Ark.; to the Committee on Public Buildings and Grounds.

By Mr. DOWELL: A bill (H. R. 13957) to repeal certain provisions of law relating to the Federal building at Des Moines, Iowa; to the Committee on Public Buildings and Grounds.

By Mr. PORTER: Joint resolution (H. J. Res. 316) authorizing an appropriation in the sum of $12,350 to pay for the expenditures involved in the participation by the United States in the International Juridical Congress on Wireless Telegraphy to be held at Rome in 1928; to the Committee on Foreign Affairs.

Also, joint resolution (H. J. Res. 317) authorizing an appropriation in the sum of $19,800 to pay for the expenditures involved in the participation by the United States in the International Telegraph Conference to be held at Brussels in 1928; to the Committee on Foreign Affairs.

By Mr. REED of New York: Concurrent resolution (H. Con. Res. 39) to provide for the printing of additional copies of the hearings held before the Committee on Education of the House of Representatives on the bill "To create a department of education"; to the Committee on Printing.

By Mr. PARKER: Resolution (H. Res. 219) to pay additional compensation to the clerks of the Committee on Interstate and Foreign Commerce; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BULWINKLE: A bill (H. R. 13958) granting a pension to Uttie Grooms; to the Committee on Invalid Pensions.

By Mr. BURTON: A bill (H. R. 13959) for the relief of Lieut. David O. Bowman, Medical Corps, United States Navy; to the Committee on Naval Affairs.

By Mr. FULBRIGHT: A bill (H. R. 13960) granting a pension to Isadore Hitchcock; to the Committee on Invalid Pensions.

By Mr. GARDNER of Indiana: A bill (H. R. 13961) granting a pension to Elvira Burton; to the Committee on Pensions.

By Mr. GRAHAM: A bill (H. R. 13962) granting a pension to Nellie Bell; to the Committee on Invalid Pensions.

By Mr. HASTINGS: A bill (H. R. 13963) granting an increase of pension to Sarah E. McHolland; to the Committee on Invalid Pensions.

By Mr. HAWLEY: A bill (H. R. 13964) granting an increase of pension to Nancy Elizabeth Armstrong; to the Committee on Invalid Pensions.

By Mr. HOFFMAN: A bill (H. R. 13965) for the relief of the dependents of Vincent A. Clayton; to the Committee on Claims.

Also, a bill (H. R. 13966) granting a pension to William A. Hankinson; to the Committee on Invalid Pensions.

By Mr. HUGHES: A bill (H. R. 13967) granting a pension to Nancy R. Gibbs; to the Committee on Pensions.

By Mr. WILLIAM E. HULL: A bill (H. R. 13968) for the relief of James Hayden; to the Committee on Claims.

By Mr. SANDERS of New York: A bill (H. R. 13969) granting an increase of pension to Phila Cross; to the Committee on Invalid Pensions.

By Mr. UNDERHILL: A bill (H. R. 13970) granting an increase of pension to Olive A. Baker; to the Committee on Invalid Pensions.

By Mr. UPDIKE: A bill (H. R. 13971) granting an increase of pension to Mary Eva Turner; to the Committee on Invalid Pensions.

By Mr. WOLVERTON: A bill (H. R. 13972) granting an increase of pension to Matilda A. Davis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13973) granting an increase of pension to Anna M. Dielkes; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13974) granting an increase of pension to Hester A. Darlington; to the Committee on Invalid Pensions.

By Mr. ZIHLMAN: A bill (H. R. 13975) for the relief of Morris Pondfield and Kalman Steiner; to the Committee on Claims.

By Mr. MENGES: Resolution (H. Res. 220) to pay a sum not to exceed $500 to Kate Gilbert for expenses of William R. Palmer, late an employee of the House of Representatives; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7741. By Mr. BARBOUR: Resolution adopted by the Kern County Beekeepers Club, Bakersfield, Calif., protesting against the passage of House bill 10022 and Senate bill 2806, which would modify the pure food and drugs act; to the Committee on Agriculture.

7742. By Mr. GARBER: Petition of J. E. Stiles, president Minnesota Retail Jewelers Association, New Richland, Minn., in support of Capper-Kelly bill; to the Committee on Labor.

7743. Also, petition of Dr. L. L. DeLano, in opposition to the passage of House bill 12947 and Senate bill 3936; to the Committee on the District of Columbia.

7744. Also, petition of Oklahoma Press Association, Norman, Okla., in support of Oddie bill in regard to stamped envelopes; to the Committee on the Post Office and Post Roads.

7745. By Mr. O'CONNELL: Petition of Baugh & Sons, Baltimore, Md., opposing the Muscle Shoals bill as agreed by the conferees; to the Committee on Military Affairs.

7746. Also, petition of the National Fertilizer Association, Washington, D. C., opposing the report of the conferees on the Muscle Shoals bill; to the Committee on Military Affairs.

7747. Also, petition of the National League of District Postmasters of the United States, Washington, D. C., favoring the passage of House bill 7900 for fourth-class postmasters and to override the President's veto; to the Committee on the Post Office and Post Roads.

7748. Also, petition of the Federal Grand Jury Association, New York City, N. Y., opposing the passage of the Senate bill purporting to take from the Federal judges their ancient power freely to comment upon the evidence in trials by jury; to the Committee on the Judiciary.

SENATE

WEDNESDAY, *May 23, 1928*

(Legislative day of Thursday, May 3, 1928)

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the President of the United States.

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that on May 22, 1928, the President approved and signed the following bills and joint resolution:

S. 744. An act to further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States, and for other purposes;

S. 1829. An act to authorize the collection, in monthly installments, of indebtedness due the United States from enlisted men, and for other purposes;

S. 3057. An act authorizing the Secretary of War to transfer and convey to the Portland Water District, a municipal corporation, the water pipe line including the submarine water main connecting Fort McKinley, Me., with the water system of the Portland Water District, and for other purposes;

S. 3556. An act to insure adequate supplies of timber and other forest products for the people of the United States, to promote the full use for timber growing and other purposes of forest lands in the United States, including farm wood lots and those abandoned areas not suitable for agricultural production, and to secure the correlation and the most economical conduct of forest research in the Department of Agriculture, through research in reforestation, timber growing, protection, utilization, forest economics, and related subjects, and for other purposes;

S. 3793. An act authorizing the St. Croix Interstate Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the St. Croix River near Grantsburg, Wis.;

S. 4216. An act to authorize the adjustment and settlement of claims for armory drill pay;

S. 4345. An act authorizing the Interstate Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Kansas City, Kans.;

S. 4357. An act authorizing Henry Horsey, Winfield Scott, A. L. Ballegoin, and Frank Schee, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Des Moines River at or near Croton, Iowa.;

S. 4381. An act authorizing H. A. Rinder, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Niobrara, Nebr.; and

S. J. Res. 125. Joint resolution authorizing the President of the United States to accept a monumental urn to be presented by the Republic of Cuba, and providing for its erection on an appropriate site on the public grounds in the city of Washington, D. C.

(Mr. Latta also communicated to the Senate a message in writing and returned Senate bill 3752.)

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Edge	Locher	Sheppard
Barkley	Edwards	McKellar	Shipstead
Bayard	Fess	McLean	Shortridge
Bingham	Fletcher	McMaster	Simmons
Black	George	McNary	Smith
Blaine	Gerry	Mayfield	Smoot
Blease	Gillett	Metcalf	Steck
Borah	Glass	Moses	Steiwer
Bratton	Greene	Neely	Stephens
Brookhart	Hale	Norbeck	Swanson
Broussard	Harris	Norris	Thomas
Bruce	Harrison	Nye	Tydings
Capper	Hawes	Oddie	Tyson
Caraway	Hayden	Overman	Vandenberg
Copeland	Heflin	Phipps	Wagner
Couzens	Howell	Pine	Walsh, Mass.
Curtis	Johnson	Pittman	Walsh, Mont.
Cutting	Kendrick	Reed, Pa.	Warren
Dale	Keyes	Robinson, Ark.	Waterman
Deneen	King	Sackett	Wheeler
Dill	La Follette	Schall	

Mr. BROUSSARD. I desire to announce that my colleague the senior Senator from Louisiana [Mr. RANSDELL] is detained from the Senate by illness. I desire that this announcement may stand for the day.

The VICE PRESIDENT. Eighty-three Senators having answered to their names, a quorum is present.

CONSTRUCTION AT MILITARY POSTS FROM PROCEEDS OF SALE OF SURPLUS WAR DEPARTMENT REAL PROPERTY

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read:

To the Senate:

In compliance with the resolution of the Senate of May 21, 1928 (the House of Representatives concurring), I return herewith the bill (S. 3752) entitled "An act to amend section 3 of an act entitled 'An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surpuls War Department real property, and authorizing the sale of certain military reservations, and for other purposes,' approved March 12, 1926."

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 22, 1928.*

Mr. FLETCHER. I want to correct one word in the bill. It was a mistake which occurred in engrossing the bill. I submit the following concurrent resolution and ask for its adoption.

The concurrent resolution (S. Con. Res. 21) was read, considered, and agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That the action of the Speaker of the House of Representatives and the Vice President of the United States in signing the enrolled bill (S. 3752) to amend section 3 of an act entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes," approved March 12, 1926, be, and the same is hereby, rescinded, and that the Secretary of the Senate be, and he is hereby, authorized and directed, in the reenrollment of the bill, to make the following correction: On page 2, line 11, of the engrossed bill strike out the word "therefore" and insert the word "theretofore."

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed without amendment the bill (S. 3864) to create a new division of the District Court of the United States for the Northern District of Texas.

The message also announced that the House had passed the bill (S. 3593) to authorize the leasing or sale of lands reserved for agency, schools, and other purposes on the Fort Peck Indian Reservation, Mont., with an amendment, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED

The message further announced that the Speaker had affixed his signature to the enrolled bill (H. R. 12821) to authorize an appropriation to provide additional hospital, domiciliary, and out-patient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, 1924, as amended, and for other purposes and it was signed by the Vice President.

MUSCLE SHOALS—CONFERENCE REPORT

Mr. NORRIS. Mr. President, I ask unanimous consent that the Senate take up the Muscle Shoals conference report and that we vote on it at not later than 3 o'clock this afternoon.

Mr. BLEASE. I object.

Mr. NORRIS. I would like to ask the Senator from South Carolina if he would object if we should extend the time of voting to a later hour than 3?

Mr. BLEASE. Mr. President, I do not intend to consent to fixing a time to vote on the conference report until I have had an opportunity to discuss it. We had some discussion of the conference report last night. I objected to taking a vote at 10.30 o'clock last night, and I gave my reason. I was right. Last night at 10 o'clock one Senator had finished his speech on the conference report. Then one of the other conferees took the floor—the senior Senator from South Carolina [Mr. SMITH], with whom, I regret to say, I differ on this matter. He took the balance of the time of the evening session. None of us had the slightest opportunity to state our position on the matter, let alone discuss it. I am not going to consent to a time being fixed to take a vote at a certain hour, because it would enable one Senator to take the floor and hold it, and none of the rest of us would have an opportunity even to state our position.

Mr. NORRIS. I will change the request. I ask unanimous consent that we take up the conference report and that two-thirds of the time be given to those who are opposed to it. Will the Senator object to that?

Mr. BRUCE. Mr. President, I feel bound to make an objection to that, so far as I am concerned.

Mr. NORRIS. Would the Senator object to making it 4 o'clock?

Mr. BRUCE. Oh, yes. I want to have an opportunity to discuss the conference report.

Mr. NORRIS. Would the Senator object to taking the vote at 4 o'clock if we provide by unanimous consent that all of the time shall be given to those who are opposed to the report?

Mr. BRUCE. I would. Let us let things drift along a little further.

Mr. NORRIS. That is the trouble. If we let them drift along, the session will end and we will have no vote.

Mr. HEFLIN. Mr. President, I suggest to the Senator from Nebraska that later in the day he try to arrange for another night session, and then for further night sessions until we can get some action on the measure.

Mr. NORRIS. I would like to submit to the Senate that here is a conference report upon a matter which has been pending before the Congress for seven or eight years. I am perfectly willing, so far as I am concerned, that those who are opposed to it shall take all the time. I did not want to debate it last night. I asked that those who were opposed to it take the time. But, with some reason, I think, it was thought that some one representing the conferees ought to explain the report.

The point is this: We will undoubtedly adjourn very soon. If the conference report is to be rejected, it ought to be rejected so that the conferees can have another meeting and try to comply with the action of the Senate. That is the reason, it seems to me, why we ought to do with this conference report like we almost invariably do with conference reports. We ought to vote on it as soon as possible and, if it is rejected, then the conferees can bring in another report.

Mr. HEFLIN. Mr. President, I am in thorough accord with the Senator in his stand on the question. I am anxious to have a vote on the conference report. We have discussed it for the last 8 or 10 years. We know who is on the side of the Fertilizer Trust and who is on the side of the farmers of the country. I am anxious to get a vote on the measure at the earliest date possible. The joint resolution is not at all as I would like to have it, but I would vote for the report rather than have the measure bandied back and forth, and submit to the swarm of lobbyists who are here, every time we take it up, to defeat it, meddling with the business of the Congress and meddling with the business of the people. If we do not get an agreement to vote on the conference report, I want to have a chance to discuss it, and I intend to say something about the lobby and the tremendous power that is back of it.

PROPOSED AMENDMENT OF COTTON FUTURES ACT

Mr. CARAWAY. Mr. President, there is a matter I regret to speak about because it puts me in the attitude of complaining. However, the most important bill recently before the Committee on Agriculture and Forestry, the bill (S. 4411) to amend the United States cotton futures act approved August 11, 1916, as amended, by providing for the delivery of cotton tendered on future contracts at certain designated spot-cotton markets by defining and prohibiting manipulation, by providing for the designation of cotton-future exchanges, and for other purposes, a bill important to every grower of cotton in America, was this morning ordered reported by the Committee on Agriculture and Forestry, when I am certain that only two of its members have ever read a line of it. I wanted an opportunity to discuss it before the committee, but for reasons which I do not purpose to go into I failed to have that opportunity, although I am a member of the committee and have been interested in the legislation.

The bill which has been reported purports to amend, as it states, the Smith-Lever Act. I doubt very seriously that anybody could give an intelligent guess at what some of its provisions mean and what the results would be if it were enacted into law. There is one very decided change, however, of the present law. By that amendment the boards of governors of the exchanges are given the power to name a committee of their own members, men who are engaged in speculating in cotton, and that committee is given the power to strike down trading whenever it shall decide that it is for the best interest of, I should say, the exchanges.

We complained, Mr. President, very bitterly because the Department of Agriculture issued a statement last fall in which it said that the price of cotton was too high; a decline was predicted, and there followed a radical decline. It was believed then by cotton growers—I then believed it and I yet believe it—that the producers of cotton were robbed of millions of dollars by that unauthorized assumption of power on the part of the Department of Agriculture to say that cotton prices were too high and that, therefore, they ought to decline. In justification of that act one member of the committee on economics in the department said it was his belief that cotton was selling too high; so it was the desire and intention of the department to strike down the price that the farmer was getting for his cotton. That was an indefensible act, and the Senate has passed a bill to make it a felony to repeat that performance.

The Senate is not willing to trust the Department of Agriculture or anyone else with the power to say when a farm product is selling too high and thus to break the price. I concur in that; but at least, Mr. President, it was a department of this Government which did that, without any direct interest—it was supposed, at least, to have no direct financial interest—in the actual manipulation of the prices of farm products. I have heard nobody charge that it had. However, it assumed the right and did destroy the market for cotton. Everybody concedes that. We banned that by legislation. This bill, Mr. President, proposes to give to a board appointed by the governors of the exchanges, a board consisting of members who themselves are speculating in cotton, the right to say whenever there is too much speculation; in other words, when the price climbs too high, they can say, "You are speculating too much, and you must stop." The power that the Secretary of Agriculture exercised was of negligible effect as compared to this. That committee could stop every exchange in America with a stroke of its pen and kill the market as dead as a killing frost can kill a tender plant.

That power, Mr. President, is lodged not in a disinterested governmental agency but it is lodged in the hands of people who themselves are interested in the very manipulation of the market they can destroy. The only control over that unthinkable power is that somebody, indefinitely mentioned, may appeal to a Government board consisting of the Attorney General, who would not know cotton from hay, of the Secretary of Agriculture, who would not know a cow from a horse, if the cow were dehorned, and the Secretary of Commerce, whose specialty is something else. That is the appellate court. How long, Mr. President, it would take to get action before that body no man has the faintest idea. Certainly the growers of cotton that year would have no relief.

That is one of the things, Mr. President, which is in this bill; one of the most indefensible things that anybody ever thought of writing into a farmers' market control bill. We have said heretofore, and we have said, I think, with some effect, that the future markets in a way do control the farmers' prices; that those who deal in futures are able to manipulate the market, and are able to destroy the producers as well as to penalize the consumers. That has been most strenuously denied by some members of the committee who reported out this bill. It was said they could not manipulate the market; that futures are an actual reflex of the world's market. Now, they abandon that, and say that speculators could manipulate the market. In the very beginning the bill says——

Mr. HARRIS. Mr. President, I should like to ask the Senator from Arkansas who is the author of the bill?

Mr. CARAWAY. I am coming to that. I have not been able to find out as yet. The Senator, whose name it bears, says he is the author of it, and I accept his statement, although I have a letter here which says that the author of it is the attorney for the New Orlans Cotton Exchange, and Mr. Clayton. I think that is not true, because the Senator denies it. I have a telegram lying here on my desk from a cotton man, and a good man of my State, and who is associated with one of the greatest cotton firms in this country, taking me to task for opposing it and saying he helped write it. At least before we are asked to put our neck in the noose we ought to know who prepared the noose. I say right now, sir, that, aside from the Senator who claims its authorship, there is not another member of the committee, unless it be the Senator from Louisiana [Mr. RANSDELL], who ever read it or knows one provision of it, and I yield for anyone of them to stand up and tell what any provision of it means. I am going to say, with all due deference to my friend from South Carolina, that I would risk everything I have on earth on the statement that he does not know what its effect would be.

No one can read this bill and see how it tries to dovetail the new amendments into the trading in grain act and the old Smith-Lever law with its amendments and know what it means, except for the one outstanding provision that the exchanges themselves shall have the power to stop trading when they want to do it. Whenever they get into a corner they can say, "Stop," and there is no power to restrain them whenever they please to do it. The bill gives them a power that nobody ever suggested heretofore of putting into the hands of speculators—the power of industrial life and death over every producer of cotton in America. I defy anybody to read the bill and deny that it gives such power. The governors of the exchanges have the power to name a committee, and that committee is to have even more power than I have indicated, for it will have the right, to start with, to say that so-and-so, naming him, may buy so many bales of cotton or sell so many hedges, and he may buy no more; that other people may buy so much and they may buy no more, and they can say that they can not even buy spot cotton in some markets under certain conditions. It is open to two interpretations; but that provision is in the bill, and when I get the time I will discuss it further, and I hope we may obtain intelligent consideration for it, because it has had no consideration in the committee. Those

of us who were opposed had no chance to do so. There is not a member of the committee on the floor who knows what it means, and, outside of two members of the committee, there is not a member who read it. Yet we are asked to put the fortunes of the growers of cotton in America in the hands of a committee created by this bill.

The best way to know what a thing is is by finding out who is for it. I want to read a telegram from Haley Bennett. He is a fine man; I do not fall out with him; he came here to protest against my bill because he wanted to trade on the future market, and he has a right to do that so long as the law permits it. He was frank with me about that; he said, "I am against your bill." However, here is his telegram about the bill to which I am referring. It is dated Little Rock., Ark., May 22:

Senator T. H. CARAWAY,
Senate Office Building, Washington, D. C.:
You are quoted in the morning papers saying that Clayton is in effect the author of Smith bill.

I do not know what the newspapers said. I have, however, letters here which I intend to read stating that that statement is true. The Senator from South Carolina denies it, and I accept his statement. However, I wish to read further this interesting telegram:

You have been misinformed. This and the Vinson bill—

Whether they are one and the same now I do not know—

You have been misinformed. This and the Vinson bill embody the principles for which the smaller cotton merchants—

Is Golman & Co. one of the smaller cotton merchants? Is Anderson, Clayton & Co. one of the smaller cotton merchants?

the smaller cotton merchants have been working for years.

That will at least acquit my friend from South Carolina of the "honor" of origination, because they say they have been working on it for years. These men, whose business it is to speculate on the cotton market, say they have been working on it for years.

I personally helped in the framing of these measures—

I will say to the Senator from South Carolina, I think Mr. Bennett is wrong about that, for I think the Senator's bill was rewritten after he went home.

Mr. SMITH. I will explain the matter in my own time.

Mr. CARAWAY. Very well. I am perfectly willing the Senator should do so. I know Mr. Bennett thinks that he helped to write the bill. Now, he asks me to vote for it because he thinks that he is the author of it. If he is not the author of it, then it is not the bill he thinks he is getting, and his indorsement ought not to bind him. He says in his telegram:

I personally helped in the framing of these measures, and believe, if enacted, will go far toward correcting apparent evils and still not destroy necessary hedging.

That means necessary gambling; that is, they can play the game with other people's property just as they have done heretofore.

You and the New York Cotton Exchange are the only opponents of our bill I have heard mentioned.

Not "your" bill, I will say to the Senator from South Carolina, but "our bill," the bill of the people who hedge in the exchanges.

Believe me, dear Senator, I am most sincere and have no ax to grind.
HALEY BENNETT.

Now, the interesting part of what he said was that I and the New York Cotton Exchange were the only ones that were fighting this bill. Why, God bless your soul, I want to show you that he does not know all about this. Here is the New York Journal of Commerce, and it declares that every big member of the New York Cotton Exchange is for the bill. Let me read you the roll. You will recognize your old friends:

Southern delivery in Vinson bill may go to aid passage—New York cotton dealers wire Senators urging Smith measure.

This is the bill Haley says he wrote, and this is the bill that the Senator wrote, and this is the bill that others say others helped write; but the New York Cotton Exchange is for the Smith bill. That is the bill the committee reported out this morning. If you have any friends on that exchange, we will find their names here indorsing the Smith bill; and, what is interesting, the paper says that the telegrams are so much alike that it is suspected that somebody inspired them.

Provisions requiring the designation of not less than two spot markets of the South for the delivery of cotton on futures contracts, as contained in the Vinson bill, may be sacrificed by their sponsors as a means of securing the approval of the House of Representatives to that measure. To-morrow morning the companion bill introduced in the Senate by Senator ELLISON D. SMITH, South Carolina, will be considered by the Senate Committee on Agriculture and Forestry.

The committee did not consider it. It reported it—

with the appearance of Representative VINSON, Georgia, to discuss the legislation.

What he had to say about it, I do not know. We had at least to import whatever talent we had before the committee to tell us what the bill was.

Senator CARAWAY, Arkansas, also is expected to oppose the bill at this meeting.

Well, I was a few minutes late and it was reported when I arrived.

Senators COPELAND and WAGNER, of New York, have received a great many telegrams from cotton dealers in New York, urging that since Senator SMITH has amended his bill to provide for the inclusion of New York as a delivery point for cotton they support the measure and aid in securing its early passage. * * *

Among the senders of telegrams were La Mar L. Fleming, who is associated with William L. Clayton in the firm of Anderson, Clayton & Fleming.

William L. Clayton was the man that Marsh said so manipulated the cotton exchange that he ruined not only the growers but the dealers and the hedgers alike. He was the principal witness before the committee. It was his investigation, and, incidentally, he was the man who took to New York 172,000 bales of cotton, that I will be able to show you, I think, without doubt, a large part of it was untenderable on contracts, to beat down the price of cotton. In answer to a question I asked him, Mr. President, he said, "If I had not had this cotton there they would have taken my shirt off my back"; but he had it there, and instead of their taking the shirt off of his back he took the shirt off the back of every grower of cotton in America. He manipulated the price of cotton until he destroyed the grower; and, according to the best information of men who manipulate the markets themselves, he did it in such a way that he ought to have been indicted, and they appealed to the Attorney General to indict him for violation of the law by his manipulations.

That was a row between cotton gamblers and I am not much concerned about it, but his representative indorses this bill. It was said, as I said, that his attorney wrote the bill. The Senator from South Carolina denies it, and I accept that statement; but at least he indorses it. It is his bill by adoption.

Now, he is not all:

Wallace Fleming, Philip G. McFadden, W. Levie Harriss, L. H. Reid & Co., William J. Walsh, E. J. Schwabach—

I am reading you now the roll of these growers of cotton on the New York Cotton Exchange—

William Mitchell, B. Conlin, Eugene Basho, D. B. Cannafax, Clayton E. Rinh, D. Holder, Frank G. Brown, William F. Higgins, T. C. Figgat, Leslie J. Healy, Spencer Waters, and H. L. Goss. Among other things they stated that they give the bill in its present form their most hearty indorsement.

Mr. Haley Bennett, who said that the New York Cotton Exchange and myself were the only ones opposing it, must amend his statement in two respects: First, he said he is the stepfather of the legislation. That is denied, and I accept it. Next, he said the New York Cotton Exchange and myself were the only people opposing it; and now he will have to admit that he and the cotton exchange are indorsing it, alongside of my good friend here from South Carolina.

Now let us see who Clayton is and how much the cotton growers ought to be put at his mercy.

I have here the statement of Mr. Brown, who was appointed, among others, to examine the cotton Clayton had in New York for the purpose of destroying cotton values. I understand from the Senator that he has changed that statement. I do not know. I am reading the one that he gave out. Whether it was true or not, I do not know. If he has made another statement, I would not know which to accept. But, anyway, if I may have the attention of Senators who are at all interested in the future of the cotton growers of America, under the cotton market rules, where people sell cotton, when delivery day comes, if they give notice five days in advance, they may tender that cotton—not the cotton they sold, but cotton that falls within certain grades, although the man who bought may not be able to use a single bale of the cotton tendered. Mr. Clayton shipped to New York and kept there for at least 18 months—I think it was 2 years—about 200,000 bales of cotton, and whenever he was caught short he would tender this to those people who held

his contract. They could not take it. They did not want it. They could not have paid for it. They were just gambling in futures, as he was. They were gambling in other people's products, as was he; but, since they could not take it, he could beat down the price, and he settled his contracts at a lower figure. He said himself, "If I had not done this, these cotton gamblers would have taken my shirt off my back"; but, inasmuch as he had this cotton there and they could not take it or use it, he took the shirts off of their backs. That was not all. He took the shirts off the backs of all cotton growers.

Among other things, the cotton has to be seven-eighths of an inch in staple. When this committee was told that Anderson, Clayton & Co. were manipulating the market, and among the agencies they were using was this 200,000 bales of cotton kept in New York for two years, at an expense, admitted by him, of about $9,000,000—a dead loss so far as economic laws were concerned, but a profitable investment so far as gamblers' needs go—they examined it and they found that 6,700 bales could not have been tendered on contract. Mr. Jones is quoted that *about 25 to 42* per cent of the remainder did not meet the Government standard; and yet for nearly two years Anderson, Clayton & Co. tendered this cotton over and over and over again, and beat down the price of cotton, and every cotton grower in America suffered. The Department of Agriculture never raised its hand, although it knew the facts; the board of governors of the exchanges had to know, and they made no protest. And yet, and yet, and yet, now the proponents of this bill want to give them still greater power, so that they do not even have to ship cotton to New York; but this board of governors can say "No," and save Mr. Clayton the $9,000,000 that he has heretofore had to expend in keeping this cotton in New York to beat down the price of cotton.

I will put his statement in its entirety in the RECORD. My friend here from South Carolina says he is wrong. He saw the cotton, and the Senator did not; but, of course, I presume the Senator from South Carolina knows more about the cotton than those who saw it.

The two men who came here came first to me, I believe, if I may be permitted to say it, complaining of the manipulation of the cotton market. I sent them to the Senator from South Carolina. They furnished the bases and statements that made the investigation possible. They were the ones who called attention to the gamblers that were manipulating the cotton market. They wrote me a letter yesterday about this bill. They are not camouflaging. They want a cotton market on which they can hedge, but one that other people can not literally strip them of their very shirts, as Clayton said. They say:

THE WILLARD,
Washington, May 22, 1928.

HON. THADDEUS CARAWAY,
United States Senate, Washington, D. C.

DEAR SENATOR CARAWAY: In response to your request for our criticism of the Smith cotton bill.

We are practical cotton men, but are not allied to any cotton exchange or trade body. We were, however, the first to expose to Congress the methods in use in the manipulation of the cotton market, and the Vinson bill is largely the product of some constructive and corrective suggestion given to Congress by us. On the other hand, it is generally reported that various members of exchanges and others, some of whom have been actively engaged in manipulations, assisted or participated with Senator SMITH in writing his bill, * * *.

I do not assert that that is true. Haley states that he did. I do not think he did. I think the bill he helped write has been discarded and another is here.

There is a paragraph of the letter which I shall not publish.

There are a number of good features in the Smith cotton bill, practically all of which, however, have been taken verbatim from the Vinson bill; but there are other provisions and loopholes in the bill which, together with the southern delivery clause, will probably result in making the way of the manipulator even easier than it is under the present law. One of the most serious objections in the bill is that it places the control of manipulation in the hands of the cotton exchanges, which, in turn, are almost completely dominated by the manipulators themselves; and this is confirmed by the testimony of the New York Cotton Exchange president, Mr. Hubbard, before the investigating committee to the effect that the exchange was powerless to correct certain abuses.

The Vinson bill, on the other hand, places the control directly in the hands of the Secretary of Agriculture and should be far more deterrent, if not effective. We think it a mistake under any circumstances to delegate any additional powers to the cotton exchanges, which are almost certain to be abused by selfish interests and therefore fail in their purpose.

The rest of their letter I shall put in the RECORD, with the permission of the Senate.

There being no objection, the remainder of the letter was ordered to be published in the RECORD, as follows:

We think the southern delivery plan as set forth in the Smith bill, where cotton may be delivered in as many as five or more different points so that the purchaser can not tell beforehand where he is going to be forced to take delivery or whether it may be all in one place or part in a number of other places. It is bound to have a depressing effect on the price, as it is a well-known fact that anything which increases the uncertainty of the buyer's position makes him that much more reluctant to take actual delivery.

The Vinson bill has a provision enabling the prospective buyer to examine samples of the certificated cotton delivered on contract, so that he does not have to buy a cat in a bag, as is the case to-day. The necessity for this has been fully demonstrated by the recent reclassification of the New York certificated stock, where some fifty thousand-odd bales have been found to be below minimum legal requirements, although used for delivery purposes the past two years. The Smith bill contains no such provision, it having been purposesly excluded by Senator SMITH himself, at whose behest we do not know.

If there is any further information you require, please command us.

Respectfully yours,

L. M. GANIER.
LOUIS N. OSMOND.

Mr. CARAWAY. Suffice it to say that the men who unearthed the crookedness in the exchanges, and called attention to it, and out of which this bill grew, say that they had rather have no legislation than this legislation, that it means ruin to the honest interests. Whether they are right is a matter of opinion.

Mr. President, most bad legislation, though not designedly bad, goes through Congress in the last three or four days of a session. I am perfectly willing to repeat what I said: There is not a man on this floor who knows just what this bill would do, except we do know that it shackles the farmer to the exchanges, and he will live or die by their grace. Why, Mr. President, it goes so far in its effort to prevent retendering that it actually stops people from buying spot cotton.

Mr. HEFLIN. Mr. President, will the Senator read us the provision that enables anybody to prevent people from buying spot cotton?

Mr. CARAWAY. Yes, sir.

Mr. HEFLIN. I should like the Senator to read it to the Senate.

Mr. CARAWAY. If the Senator had read the bill he would have found out that under certain conditions, where a man has bought cotton to sell, and it is decided that he is going to manipulate the price, the exchanges can absolutely stop him from buying or selling.

Mr. HEFLIN. I differ with the Senator about that, and I challenge him to point out the provision.

Mr. CARAWAY. If the Senator had read the bill he would know that.

Mr. HEFLIN. I will discuss it in a moment. I do understand it.

Mr. SMITH. I will explain the bill, when the Senator gets through, and all the circumstances surrounding its drafting.

Mr. CARAWAY. And its reporting out.

Mr. SMITH. Yes; and reporting it out.

Mr. CARAWAY. Will the Senator say whether or not there is a provision in his bill which would stop anyone from buying spot cotton now?

Mr. SMITH. There is not a provision in the bill that would stop anyone from buying spot cotton in any particular unless he has sold so many hedges against actual spot cotton as to threaten a corner in the market. That is what is in the bill.

Mr. CARAWAY. That is the provision, so that if prices were going up they could stop him.

Mr. SMITH. I will explain that.

Mr. CARAWAY. I know the Senator will explain it; but the Senator from Alabama said it was not in the bill.

Mr. HEFLIN. I will ask the Senator this question: Is there any provision in the bill that will prevent any farmer in the Cotton Belt from selling cotton when he pleases, or any merchant or any spinner in the Cotton Belt from buying it? There is no such provision in it.

Mr. CARAWAY. Nobody said there was any such provision in it.

Mr. HEFLIN. The Senator's argument suggested that they were going to stop trading in cotton.

Mr. CARAWAY. That is what is provided. The Senator from South Carolina agrees.

Mr. HEFLIN. The Senator now says that what I suggest is not in the bill.

Mr. CARAWAY. The Senator does not say that.

Mr. HEFLIN. I ask him again.

Mr. SMITH. There is nothing in this bill that can stop anyone from buying and selling cotton any time, anywhere, under any conditions, except some member of the exchange.

Mr. HEFLIN. Who is engaging in a speculative deal.

Mr. SMITH. Who is trying to bring about a corner.

Mr. HEFLIN. Or who is in a speculative deal, dealing in fictitious cotton.

Mr. SMITH. If the Senator is opposed to legislation designed to prevent an actual breach of the Sherman antitrust law, he can say so.

Mr. CARAWAY. If there is a breach of the Sherman law, there is a law on the statute books to prosecute the one breaking the law.

Mr. SMITH. We at least could call attention to it here, and warn the exchanges that their charters will be forfeited if they sit down and permit this to be done before the suit can be brought.

Mr. CARAWAY. To show that the Senator from Alabama has not read the bill, the Senator from South Carolina says that there is a provision in it to prevent people on the exchange from buying spot cotton and selling spot cotton where there is to be a corner. A corner in cotton is threatened where somebody has bought so much cotton that he is about to raise the price too high, and when that is attempted it can be stopped so that the price can not be raised sky high. On the other hand, there is no provision in the bill to keep anyone from knocking the bottom out of the price. The only check is against getting it too high; there is nothing against getting it too low. The Senator from South Carolina laughs. Let him point out the provision.

Mr. SMITH. Mr. President, there is no such provision in the bill.

Mr. CARAWAY. I know it.

Mr. SMITH. I do not care to interject any comments here, but I will take my own time and I will state in my very feeble way, and out of my very limited knowledge of the business, what I have attempted to do.

Mr. CARAWAY. It is conceded, then, there is in the bill a provision that if somebody buys too much cotton and the price is going up, he can be stopped; but if he sells and sells until the bottom drops out of it, there is nothing to stop him.

Mr. HEFLIN. I do not concede that.

Mr. SMITH. Certainly; nobody concedes any such thing.

Mr. CARAWAY. The Senator just said there was no provision in the bill against overselling.

Mr. SMITH. The whole bill, from start to finish, as I will show, is for that very identical purpose.

Mr. CARAWAY. It is not in the bill.

Mr. SMITH. It is all through the bill.

Mr. CARAWAY. It is not.

Mr. MAYFIELD. Let us have order.

The VICE PRESIDENT. The Senate will be in order.

Mr. CARAWAY. Mr. President, one of the strong backers of the bill—and I am sorry he is not on the floor—is the senior Senator from Louisiana [Mr. RANSDELL]. When we had before us an amendment to the tax bill, which has just passed, on the 10th day of this month the Senator said what I shall read about the present law. This bill indicts the present transactions on the exchanges, and the Senator is just now trying to brand me as being unwilling to help stop certain criminal practices in the cotton exchanges. Yet the Senator from Louisiana on the 10th day of this month said this, speaking about the present cotton law, passed in 1914:

> That law was found to be unconstitutional and was reenacted in 1916.
>
> It has been in existence ever since, with slight amendments, and has functioned admirably.

Mr. GEORGE. To what bill was he referring?

Mr. CARAWAY. To the present law.

Mr. GEORGE. The Smith-Lever Act?

Mr. CARAWAY. Yes. That was on the 10th of this month, when he wanted to defeat an amendment I had offered. He said the present law was functioning admirably. Now I am told that if I do not let that "admirable law" be amended in the last minutes of this session, I am protecting criminals. Is it not strange that it was "admirable" on the 10th of this month——

Mr. HEFLIN. Mr. President, will the Senator yield?

Mr. CARAWAY. I yield.

Mr. HEFLIN. Is the Senator referring to something I said?

Mr. CARAWAY. The Senator did not say this.

Mr. HEFLIN. The Senator referred to "the Senator from Alabama."

Mr. CARAWAY. Then I was mistaken. This was said by the Senator from Louisiana. The Senator from Alabama need not defend himself on this. He did not say it.

Mr. HEFLIN. I was going to say that the old law which we repealed, the Smith law, which was the best one ever enacted up to that time, did away with the old grades, about 32.

Mr. CARAWAY. Yes.

Mr. HEFLIN. And reduced them to about nine.

Mr. CARAWAY. What I am talking about is this: The Senator from Louisiana who is, I will say, the stepfather of this bill, told the Senators on the 10th day of this month, in appealing to them to vote down an amendment I had offered, that the present law is working admirably. That appears in his printed speech of the 10th of May, on page 8261, in the RECORD. If it was an admirable law on the 10th of May, what has gone wrong with it between that and the 23d day of May? He could not defend this change on the ground that he had not heard the results of the Smith investigation, because he was a member of the committee, and was present when some of the testimony was being given. I know, because I was present and saw him.

In the same admirable speech about that same "admirable law" made by the Senator from Louisiana on the 10th of this month, he made another statement to which I wish to refer. He and another Senator were commending that law, because there was a provision in it, it was suggested, for the selling of livestock on the stock exchanges—a hog exchange. God knows it would be funny trying to sell a hog on a future market. One would not know whether he was big or little, black or brown, poor or fat, whether he had the cholera or gallstones. Those would all be interesting details in considering a future market for hogs.

Mr. GEORGE. Mr. President, let me ask the Senator if that is not just about what they do with cotton under section 5 of the Smith-Lever Act?

Mr. CARAWAY. Yes; and what they are going to do with it better under this proposed law.

Mr. SMITH. If the Senator will yield——

Mr. CARAWAY. I yield.

Mr. SMITH. If I catch the implication of the question of the Senator from Georgia, they do no such thing, because trading is restricted to one of the standard commercial grades, and also to a certain length of staple. They can not go below that in delivering cotton. When I take the floor in response to the remarks that have been made I think I can show the Senator that he was not justified in making that remark.

Mr. GEORGE. I understand he must deliver one of the grades, but he can deliver any one of the grades.

Mr. SMITH. Does the Senator also understand that under a test made by the Department of Agriculture all of the grades of a given length of staple make exactly the same quality of cloth and yarn?

Mr. GEORGE. So it may be, Mr. President, but it is still the sale of the pig in the bag. Under section 5 it makes no difference what cotton you sell or what cotton you buy, the seller can deliver you any grade of cotton recognized.

Mr. SMITH. The grade governs nothing but the color. Let me say, since such great stress has been laid upon the length of the staple that I have simply proposed to amend the present law so as to include staple length, emphasizing it a little more than it was in the first instance.

Mr. GEORGE. I merely desire to say—and I can say it very briefly if the Senator from Arkansas will permit me——

Mr. CARAWAY. I yield.

Mr. GEORGE. There will never be a proper regulation of the exchange unless your contract calls for something specific, or unless you stop short selling, as the Senator from Arkansas has proposed in his bill.

Mr. SMITH. May I make just one statement in reference to that, not in reference to the general argument the Senator is now making?

Mr. CARAWAY. I yield.

Mr. SMITH. If we shall have southern delivery, in view of the fact that the farmer disposes of his cotton within 60 to 90 days, he can then sell his cotton while it is growing, and under the Smith-Lever Act can then deliver every grade he makes, providing it does not go below seven-eighths in staple, and below middling in color, at the market price for any grades below middling, and any above middling, and deliver that cotton at the time he promised to deliver it after it is produced. The Senator from Georgia grows cotton. He knows that while his cotton is growing he could not determine what grade he was going to make or what particular length of staple. Therefore, if you had a specific contract, you would have a mill contract, and the grower would be out of it.

Mr. CARAWAY. The Senator from South Carolina knows that a farmer can sell his cotton, but he can not sell that cotton on the exchange. He can buy a future contract or sell a future contract, but there is nothing in the old law and there is nothing in the proposed law that will make the man who bought the contract take the cotton. They settle on commercial differences, and the law provides for the method of ascertaining the proper figures.

Now I want to digress a moment. Under the old law, and under the proposed law, the seller of the contract can give notice and make the buyer accept cotton. There is nothing in the bill that can make the seller deliver if the buyer gives notice that he is going to demand cotton. They settle on commercial differences. In other words, the exchange man can gamble in my cotton all he wants to, and he can deliver or not deliver. The option is with him; it is not with the purchaser. When delivery time comes, if he can beat down the price of spot cotton, so he can buy it cheaper than the figure at which he sold his future contracts, then under the present law he can give 5 days' notice, under the proposed law 10 days' notice, and make the buyer take it. But the option is his option. If he does not want to give notice, they do not exchange a bale of cotton. But if he wants to beat down the price by giving notice that he is going to deliver, he can do it so as to make money on his future sales, on his gambling contract; but the buyer can give a dozen notices and never get a bale of cotton under his contract.

Mr. SMITH. Oh, no. The law is equal in each case.

Mr. CARAWAY. There is no provision at all of that kind.

Mr. SMITH. There is none about the seller either.

Mr. CARAWAY. Oh, yes. He can give 10 days' notice and make the buyer accept it.

Mr. SMITH. And the buyer can demand specific performance.

Mr. CARAWAY. But if the seller has not got it, they settle on commercial differences. He can demand, but he can not get it. They settle on commercial difference.

Mr. SMITH. If they agree to do it.

Mr. CARAWAY. Oh, they can make him do it.

One of the best arguments made against the amendment that I was trying to put on the tax bill in the interest of the farmer, as I said, was made by the Senator from Louisiana [Mr. RANSDELL]. He was the only man who did make a speech. My friend from South Carolina made a speech after the amendment had been defeated, but the only argument made against it was by the Senator from Louisiana [Mr. RANSDELL]. In his concluding appeal to the Senate he said this:

> If I may just put it in this way, the difference between the Senator from Arkansas and the Senator from Louisiana is this: The Senator from Louisiana stands by the existing institutions, by something that has been used for years and years and years. The Senator from Arkansas wants to destroy them. He wants to put in something else. "He who asserts must prove" is a principle of law with which the great Senator from North Carolina certainly is familiar. I am not seeking to do anything here except to maintain the status quo; that is all. I do not want to do a thing but let these exchanges alone.

That was the 10th of this present month, and now, on the 23d day of the same month, it is said that if we do not pass this bill crime will flourish.

Mr. SMITH. Mr. President——

The VICE PRESIDENT. Does the Senator desire to take the floor?

Mr. SMITH. I do.

The VICE PRESIDENT. Will the Senator suspend until the Chair lays before the Senate a message from the President of the United States?

Mr. SMITH. Certainly.

The VICE PRESIDENT. The Senator from South Carolina will be recognized afterwards.

FARM RELIEF—VETO MESSAGE (S. DOC. NO. 141)

The VICE PRESIDENT. The Chair lays before the Senate a message from the President of the United States, which will be read.

The Chief Clerk read the message, as follows:

To the Senate:

Senate bill 3555, called the surplus control act, is in some respects an improvement over Senate bill 4808 of the last Congress. It includes several provisions, which, if unencumbered by objectionable features, would form a basis for a measure that should do much to develop stronger business organizations in agriculture. But the present bill contains not only the so-called equalization fee and other features of the old measure prejudicial, in my opinion, to sound public policy and to agriculture, but also new and highly objectionable provisions. In its entirety it is little less undesirable than the earlier measure. The bill still is unconstitutional. This position is supported by the opinion of the Attorney General, which is hereto attached.

In its essentials the objectionable plan proposed here is the stimulation of the price of agricultural commodities and products thereof by artificially controlling the surpluses so that there will be an apparent scarcity on the market. This is to be done by means of a board having supposedly adequate powers and adequate funds to accomplish such purpose through various agencies, governmental and private. The surpluses of the different selected commodities so accumulated by the board are then to be sold by export and otherwise directly or through such agencies at whatever loss is necessary in making the disposition. The fund to pay the losses and other costs while at first furnished by the Government is ultimately to be replaced and thereafter replenished from time to time by means of a tax or fee charged against the product. The theory is that the enhanced price of the commodity would enable the producer to pay the equalization fee and still reap a profit.

The recurring problem of surpluses in farm products has long been a subject of deep concern to the entire Nation, and any economically sound, workable solution of it would command not only the approval but the profound gratitude of our people. The present measure, however, falls far short of that most desirable objective; indeed, although it purports to provide farm relief by lessening the cares of our greatest industry, it not only fails to accomplish that purpose but actually heaps even higher its burdens of political control, of distribution costs, and of foreign competition. It embodies a formidable array of perils for agriculture which are all the more menacing because of their being obscured in a maze of ponderously futile bureaucratic paraphernalia. In fact, in spite of the inclusion in this measure of some constructive steps proposed by the administration, it renews most of the more vicious devices which appeared in the bill that was vetoed last year. This document is much altered from its previous form, but its substance, particularly as to its evident ultimate effect of tending to delude the farmer with a fantastic promise of unworkable governmental price regulation, is still as repugnant as ever to the spirit of our institutions, both political and commercial.

A detailed analysis of all of the objections to the measure would involve a document of truly formidable proportions. However, its major weaknesses and perils may be summarized under six headings:

I. Its attempted price-fixing fallacy.

II. The tax characteristics of the equalization fee.

III. The widespread bureaucracy which it would set up.

IV. Its encouragement to profiteering and wasteful distribution by middlemen.

V. Its stimulation of overproduction.

VI. Its aid to our foreign agricultural competitors.

These topics by no means exhaust the list of fallacious and indeed dangerous aspects of the bill, but they afford ample ground for its emphatic rejection.

I. Price fixing: This measure is as cruelly deceptive in its disguise as governmental price-fixing legislation and involves quite as unmistakably the impossible scheme of attempted governmental control of buying and selling of agricultural products through political agencies as any of the other so-called surplus control bills. In fact, in certain respects it is much broader and more flagrant in its scope. The heights to which price lifting might be promised are freed from the limitations fixed in previous measures. The bill carefully avoids any direct allusion to such price-fixing functions, but there can be no doubt about its intentions and authorizations to the Federal farm board in this respect. There is apparently no change in the import of the bill in the resolution to impose upon the farmer and upon the consumers of farm produce a régime of futile, delusive experiments with price fixing, with indirect governmental buying and selling, and with a nation-wide system of regulatory policing, intolerable espionage, and tax collection on a vast scale.

These provisions would disappoint the farmer by naïvely implying that the law of supply and demand can thus be legislatively distorted in his favor. Economic history is filled with the evidences of the ghastly futility of such attempts. Fiat prices match the folly of fiat money.

The board would be compelled to arrive in some way at the premium on the domestic price which would be demanded from the consumer, and this figure would have to be fixed in the contracts which it would make with the millers, packers, canners, spinners, and other processors. Such prices and other terms fixed in the contracts would be used by the board to calculate the losses upon which it will base the size of the equaliza-

tion fee. This procedure is the very essence of price fixing no matter how cumbersome and crudely camouflaged it may be. By throwing the very large resources of the Government into this operation the present bill gives the widest latitude for the most vicious temptations adherent in autocratic authority in complete command of vast industries and trades.

In previous bills definite yardsticks have been determined by which prices were to be established by the Government. They are omitted from this bill, which thereby leaves almost no restraint whatever upon the discretion of the board in this respect. The present measure, therefore, has even less merit than its predecessors in this regard since it carries no limitation as to the extent of price inflation which it can undertake.

II. The equalization fee, which is the kernel of this legislation, is a sales tax upon the entire community. It is in no sense a mere contribution to be made by the producers themselves, as has been represented by supporters of the measure. It can be assessed upon the commodities in transit to the consumer, and its burdens can often unmistakably be passed on to him.

Furthermore, such a procedure would certainly involve an extraordinary relinquishment of the taxing power on the part of Congress, because the tax would not only be levied without recourse to legislative authority but its proceeds would be expended entirely without the usual safeguards of congressional control of appropriations. This would be a most dangerous nullification of one of the essential checks and balances which lie at the very foundation of our Government.

Incidentally, this taxation or fee would not be for purposes of revenue in the accepted sense but would simply yield a subsidy for the special benefit of particular groups of processors and exporters. It would be a consumption or sales tax on the vital necessities of life, regulated not by the ability of the people to pay but only by the requirements and export losses of various trading intermediaries. It would be difficult indeed to conceive of a more flagrant case of the employment of all of the coercive powers of the Government for the profit of a small number of specially privileged groups.

It has been alleged that these operations would be inaugurated only as a last resort, but this would be scanty assurance indeed, since no board would be able to resist the pressure of the political forces which could be mustered in behalf of every staple commodity to demand that the Government should undertake the responsibility of attempting to legislate its prices above those fixed in the normal operations of the law of supply and demand.

III. Widespread bureaucracy: A bureaucratic tyranny of unprecedented proportions would be let down upon the backs of the farm industry and its distributors throughout the Nation in connection with the enforcement of this measure. Thousands of contracts involving scores of different grades, quantities, and varieties of products would have to be signed by the board with the 4,400 millers, the 1,200 meat-packing plants, the 3,000 or more cotton and woolen mills, and the 2,700 canners. If this bill had been in operation in 1925, it would have involved collections upon an aggregate of over 16,000,000,000 units of wheat, corn, and cotton.

The bill undertakes to provide insurance against loss, but presumably only against reasonable and unavoidable loss. Just what this might be would involve judgment on the part of Government employees upon tens of thousands of transactions running into billions of dollars. This is bureaucracy gone mad. Cooperative associations, flour mills, packing plants, and grain elevators will cease to be private and become public agencies. If there is any conclusion that we can announce as final with regard to governmental business operations, particularly after the bitter and excessively costly war-time experiences with such enterprises, it is that we can not maintain a bureacracy of such vast proportions engaged in buying and selling without constant danger of corruption, mismanagement, and prodigious tax burdens. No private agency of so gigantic and complex a character attempting to juggle with profound economic principles in such fashion could survive under such circumstances, and the chances for a governmental trading organization would be even less.

Swarms of inspectors, auditors, disbursers, accountants, and regulatory officers would be let loose throughout the land to enforce the terms of these contracts and to curb the inevitable attempts at evasion of the equalization fee. This plague of petty officialdom would set up an intolerable tyranny over the daily lives and operations of farmers and of every individual and firm engaged in the distribution of farm products, intruding into every detail of their affairs, setting up thousands of prohibitory restrictions and obnoxious inspections.

Such autocratic domination over our major industry, its dependent trades, and the everyday activities of hundreds of thousands of our citizens would indeed be profoundly repugnant to every instinct of our institutions. It would undermine individual initiative, place a premium upon evasion and dishonesty, and poison the very wellsprings of our national spirit of providing abundant rewards for thrift and for open competitive effort.

The arbitrary powers in the hands of the 12 members of the board are almost incredible. But even more extraordinary would be the veto power over the board which this measure places in the hands of the commodity advisory councils.

Acting with the board, these men could throw the entire machinery of the Government into an attempt to raise or lower domestic prices at will. Even though such efforts would ultimately be doomed to certain failure, these men would meanwhile, during the course of costly experiment, hold in their hands the fate of vast industries using farm products employing millions of persons and of great cooperatives with thousands of farmer members. They could disrupt the settled channels of trade and commerce; they could alter at will the cost of living, influence wage levels in all lines of industry, and affect conditions of business in every part of the country. The mere enumeration of such powers is the complete answer to the proposal that they be granted.

IV. Encouragement to profiteering and wasteful distribution by middlemen: As was pointed out in the veto last year, it seems almost incredible that the farmers of this country are being offered this scheme of legislative relief in which the only persons who are guaranteed to benefit are the exporters, packers, millers, canners, spinners, and other processors. Their profits are definitely assured. They have, in other words, no particular incentive toward careful operation, since each of them holding a contract, no matter how unscrupulous, wasteful, or inefficient his operations may have been, would be fully reimbursed for all of his losses.

This would be bound to encourage wholesale profiteering at the expense of the farmer and of the consumer. Every one of these processors could charge what he chose to his domestic trade and recoup the loss incurred on any one of his products thus made unsalable at home through excessive prices by dumping it at reduced rates in foreign markets. With such a complete guaranty of profit these concerns would be entirely without restraint or limitation as to profiteering and as to slovenly and wasteful processing and selling operations.

Surely there could be no more direct means of destroying the very germ of American commercial genius which is so frankly envied by our foreign rivals—the tireless search for better and more efficient business methods, the competitive zeal for superior service, and for adequate returns through large sales of better merchandise at lower prices.

The packers could be commanded by the board to buy hogs enough to create a near shortage at home and then raise the prices to a fixed level. The unsalable surplus would then be dumped abroad at a loss, which would thereupon be made good out of the pockets of all taxpayers, including the farmers. The operations would involve an impenetrable maze of contracts between the board and hundreds of packers and provisioners. The result would be a bewildering snarl of entangled accounting problems, because packing houses buy one kind of product and sell a wide range of highly differentiated specialties. To "equalize" the losses on these would indeed be a task of overwhelming difficulty.

These objections were raised against the previous measure and apparently an attempt has been made to meet them by broadening the discretionary powers of the board so as to escape the necessity of describing its functions and limiting its authority. The result, however, has been entirely the reverse from that which was intended. The board is endowed with vast powers over our basic industry, but, unlike every other agency in the Government, it would not be limited by congressional control over its appropriations, since it would have within itself the power to raise funds without limit by means of the compulsory equalization fee.

V. Stimulation of overproduction: The bill runs counter to an economic law as well settled as the law of gravitation. Increased prices decrease consumption; they also increase production. These two conditions are the very ones that spell disaster to the whole program. The vaguely drawn clause in the measure to meet this obvious danger merely amounts to moral suasion and, as a last resort, the withdrawal of the equalization fee. Thus, if 90 per cent of the growers of a given commodity heed the admonitions of the board and refrain from production, they will nevertheless be punished because of the evasions of the remaining 10 per cent who have ignored the board's requests. In other words, no farmer will be safe in directing his planning upon his individual judgment, for should the result be a stimulation of an increased yield, the board will be likely to withdraw the support which encouraged the sur-

pluses and allow the prices to collapse under the weight of that artificially created excess. The annals of the industrial and agricultural world are replete with the catastrophes that have come in the wake of such attempted distortions of one of the most fundamental principles of commercial relations.

VI. Aid to our foreign agricultural competitors: This measure continues, as did its predecessor, to give substantial aid to the foreign competitors of American agriculture and industry. It continues the amazing proposal to supply foreign workers with cheaper food than those of the United States, and this at the expense of the American farm industry, thereby encouraging both the foreign peasant, whose produce is not burdened with the costs of any equalization fees, and also affording through reduced food prices the means of cutting the wage rates paid by foreign manufacturers. The latter step would promptly impair the prosperity of our manufacturing population, which is by far the leading and most profitable market for our farm produce. It is nonsense to say that our farmers are not interested in such a development, which can only result in unemployment and in consequent decreases in food consumption in the great industrial districts. It is surely poor business to transfer the farmer's market from an employed American workman to the latter's competitor in the low wage-scale countries across the seas, whose potential buying power and standards of living even at best are far below those of this country.

This is indeed an extraordinary process of economic reasoning, if such it could be called. Certainly it is a flagrant case of direct, insidious attack upon our whole agricultural and industrial strength. By the inevitable stimulation of production the bill can only mean an increase of exportable surplus to be dumped in the world market. This in turn will bring about a constantly decreasing world price, which will soon reach so low a figure that a wholesale curtailment of production in this country with its attendant demoralization and heavy losses would be certain. Where is the advantage of dragging our farmers into such folly?

Furthermore, as the board undertakes to dump the steadily mounting surplus into foreign countries at the low-cost figures, it will come into direct conflict with the dumping and similar trade laws of many foreign lands which are interested in the maintenance of their own agricultural industries. We might, therefore, expect immediately a series of drastic, retaliatory discriminations on the part of these consumer countries. This will drive our surplus into narrower market channels and force even further price reductions with consequent increases in the burdens of the equalization tax.

Lastly, and most important, in connection with this aspect of the bill as an aid to our foreign competitors, the measure will inevitably devastate many of our important farm areas. For instance, the board is expected to obtain higher prices for the American farmer for corn by removing the surplus from the home market and dumping it over our borders at a lower level of prices. In other words, the hog grower in Ontario, Canada, may buy American corn at a very much lower level than the hog grower in the State of Ohio. Both being situated equally as to the European market for their pork products, we shall see immediately the migration of the Ohio hog industries across the border into Canada with consequent losses to our pork industry by this Canadian competition.

Likewise the dumping of cheaper American feeds for Dutch and Scandinavian producers of dairy products further subsidizes them in direct competition with the American industry. In other words, the framers of this measure naïvely submit a proposal to save the American livestock grower and dairyman by supplying his overseas rivals with abundant feedstuffs at reduced rates. It would be difficult indeed to conceive of a more preposterous economic and commercial fallacy.

To take another illustration, our cotton-manufacturing industry, which now has some 18,400,000 spindles in the cotton-growing States and 16,400,000 in the New England States, has been in a precarious condition for several years. Further handicaps imposed upon it by this bill might spell its ruin and the consequent serious crippling of our entire cotton-growing belt. Under this bill it would be quite conceivable that foreign mills could obtain American cotton for prices substantially less than those paid by domestic mills. Foreign mills could ship cotton goods to this country in spite of the tariff, since the equalization fee in this measure is not applied to cotton fabrics. Furthermore, foreign mills would undoubtedly capture our existing export markets for the 600,000,000 square yards which we ship abroad annually, valued at over $75,000,000. The very serious hardships thus inflicted upon the nearly 500,000 wage earners in the cotton-manufacturing industries and the consequent impairment of their consumption of farm produce, as well as of the raw cotton in the mills, would be indeed a tragic, if not disastrous, episode.

All of this assumes that the foreign countries will permit the carrying out of the plan, but many of those countries are interested in the production of their own agricultural industries and will not hesitate to impose higher tariff duties or antidumping laws to prevent such undue depression of their own markets. Furthermore, they would be inclined to institute discriminatory measures in favor of our competitors by way of retaliation. The markets for our surpluses would thus be limited if not fatally obstructed. To stake the future prosperity of American agriculture upon the course of action to be taken by foreign governments acting under such hostile impulses is altogether too hazardous.

Many of the objections urged in my former veto message apply with equal force to the present bill. No good purpose would be served, however, by repeating them in detail.

The bill now under consideration also includes objectionable features not found in the one of the last session.

The present measure would authorize the board to insure cooperative associations against price decline and require the nonmembers as well as the members to bear the cost under the so-called "nonpremium insurance." All producers would be compelled not only to bear the risk of the few, but also to insure them against the consequences of bad management.

We all believe in sound cooperation; the Government has gone far in recent years to aid it, and I have recommended additional steps for its encouragement; but no system of cooperation founded on the favoritism contemplated under the name of "nonpremium insurance" could be of lasting benefit to agricultural cooperation.

This bill also provides that the equalization fee collected on any agricultural commodity produced in the United States shall in addition be collected on importations of that commodity. This provision would empower the board to do the following:

1. Regulate foreign commerce, for the equalization fee on imports would be in fact a tariff. This surely would be a delegation of legislative power, since no logical rule is prescribed to govern the board's actions in making this addition to import duties.

2. Raise the domestic price to the consumer, not only to the full amount permitted by the tariff but as far above that amount as the board might deem proper and expedient. This effect on domestic prices was clearly contemplated by the Committee on Agriculture of the House. Speaking of the effect of this provision on wheat, the committee said:

> Therefore the maximum price for all wheat, whether of domestic or foreign origin, would approximate a level that included both the tariff and the equalization fee.

3. Nullify the provision of the tariff act that tariff rates shall be based on differences in cost of production here and abroad, so far as that provision relates to agricultural products.

An effort has been made to create the impression that the present bill is an important concession to my recommendations for the control of agricultural surplus. It has been emphasized that the loan provision is what this administration has recommended and that loans to cooperative associations for the control of crop surplus constitute one or two alternatives, with the equalization fee the other alternative. It is said that the first alternative will be tried first and that the equalization fee will be resorted to only if the loan provision should prove inadequate. It becomes apparent, however, upon careful study of the present bill and of the supporting committee reports that these alleged alternatives can afford no real test of any plan of the kind I have recommended.

The board is authorized to invoke the trade agreement and the equalization fee only upon finding three facts: (1) "That there is or may be during the ensuing year a seasonal or year's total surplus * * * in excess of the requirements for orderly marketing or in excess of the domestic requirements for the commodity"; (2) "That the nature of the commodity—its durability, preservability, methods of marketing, etc.—adapts it to the operations contemplated"; and (3) that the cooperative associations are unable or unwilling to handle the surplus under the loan provision—i. e., that the "first alternative" is inadequate.

These conditions are always present. It is provided (sec. 8) that the board shall inquire into these facts upon request of the advisory councils, or organization of producers, or upon its own motion. The board could not escape making the three "findings" and would therefore be obliged to enter into trade agreements and to use the equalization fee from the beginning.

A surplus in excess of orderly marketing, *or* (the word "and" is not used) in excess of domestic requirements is always

present in many agricultural commodities. The exportation of any part of the domestic output proves the existence of such a surplus.

The second "finding" is equally inescapable because it is based on ever-present and obvious facts. Numerous commodities—cotton, wheat, corn, rice, tobacco, processed meats, and other products—always have the durability, preservability, etc., that render them adaptable to the operations contemplated in this bill.

The third "finding" is also assured in advance because it is certain that the cooperative associations would be both unwilling and unable to handle the surplus under the terms of this bill. Under the first alternative (the loan provision) the cooperative associations would be obliged to repay their loans with 4 per cent interest and pay their losses, if any, in the normal course of trade. Under the second alternative (the equalization fee plan) not only would the board make advances to the associations without interest but would also guarantee to pay their "losses, costs, and charges." Moreover, the equalization fee and the nonpremium insurance would enable the board to insure them against decline in the market price and against the consequences of bad management in merchandising their products, and to compel all producers of the commodity—members and nonmembers—to pay for the insurance. These inducements are surely sufficient to insure unwillingness of the cooperative associations to accept the first alternative.

Both unwillingness and inability of the cooperative associations to handle the surplus under the loan provision are made doubly certain by the central objective of the bill, which is to inflate domestic prices and to dump the surplus abroad at a loss. These associations, and everyone else who has given thought to the matter, know that this can not be done by loans and that it never was contemplated under the plan I have proposed.

The objectives of the type of legislation I have suggested and of this bill are radically different. The two proposals are therefore incompatible as practical alternatives. The object of my proposal is to aid in adjusting production to demand, to afford farmers a greater bargaining power, to handle surplus due to seasonal and other causes beyond the control of producers when unaided by strong business organizations, to minimize price fluctuations, and to reduce the margin between the price paid by the consumer and the price received by the producer.

The real objective of the plan in this bill is to raise domestic prices to artificially high levels by governmental price fixing and to dump the surplus abroad.

While agriculture has been distressed in many countries since the World War, the severity of the agricultural depression in the United States must not be underestimated. It is true there has been an increase in prices and purchasing power of agricultural products. Many important farm products have increased rapidly in price in recent months. Nor should we overlook the fact that our farmers have made noteworthy progress since 1921 both in the purchasing power of their products and in the output per worker in agriculture. The latter is the result of improved methods and equipment, and is in keeping with the fundamental cause of American prosperity—high productivity per worker. Moreover, we should avoid the error of seeking in laws the cause of the ills of agriculture. This mistake leads away from a permanent solution, and serves only to make political issues out of fundamental economic problems that can not be solved by political action.

In conclusion, if the measure is enacted one would be led to wonder how long it would be before producers in other lines would clamor for similar "equalizing" subsidies from the public coffers. The lobbies of Congress would be filled with emissaries from every momentarily distressed industry demanding similar relief of a burdensome surplus at the expense of the Treasury. Once we plunged into the futile sophistries of such a system of wholesale commercial doles for special groups of middlemen and distributors at the expense of farmers and other producers, it is difficult to see what the end might be.

I have believed at all times that the only sound basis for further Federal Government action in behalf of agriculture would be to encourage its adequate organization to assist in building up marketing agencies and facilities in the control of the farmers themselves. I want to see them undertake, under their own management, the marketing of their products under such conditions as will enable them to bring about greater stability in prices and less waste in marketing, but entirely within unalterable economic laws. Such a program, supported by a strong protective tariff on farm products, is the best method of effecting a permanent cure of existing agricultural ills. Such a program is in accordance with the American tradition and the American ideal of reliance on and maintenance of private initiative and individual responsibility, and the duty of the Government is discharged when it has provided conditions under which the individual can achieve success.

I am still hopeful that legislation along the lines suggested in my last annual message, with which many of the provisions of this bill are in harmony, may be enacted, but this bill embodies substantially all of the objectionable features which I said, in that message to the Congress, I could not indorse. I am therefore obliged to return Senate bill 3555, entitled "An act to establish a Federal farm board to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce" without my approval.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 23, 1928.*

OFFICE OF THE ATTORNEY GENERAL,
Washington, D. C., May 22, 1928.

SIR: In response to your request for an opinion as to whether the bill to establish a Federal farm board (S. 3555, 70th Cong., 1st sess.), if approved, would contravene the provisions of the Constitution of the United States, I submit my conclusions.

The bill resembles in many respects S. 4808, which you returned without your approval February 25, 1927, and which was dealt with in my opinion to you rendered February 25, 1927.

Much that was said in that opinion applies to the bill now under consideration, but the importance of the subject and the differences between the two measures justify an extended statement of my views.

The first question is whether this legislation may be sustained under the commerce power.

The Federal Government is a Government of limited powers. It has only such powers as have been expressly given to it by the people in the Constitution or are implied as incidental to the powers as expressed.

In general, legislation under the commerce clause has been directed at carrying out the primary purpose of the commerce clause, which, as discussed in the decisions, was to prevent undue discriminations against and burdens or restraints upon interstate commerce, and most of the decisions of the Supreme Court under the commerce clause deal with such legislation.

Since heretofore Congress has never enacted legislation based on an assumed existence of a power to fix prices of merchandise bought and sold in interstate commerce, no case identical with this may be found.

The bill declares the policy of Congress to be, "through the execution of the provisions of this act, to provide for the control and disposition of surpluses of such commodities, to preserve advantageous domestic markets for such commodities, to prevent such surpluses from unduly depressing the prices obtained for such commodities, and from causing undue and excessive fluctuations in the markets for such commodities, to minimize speculation and waste in marketing such commodities"; the provisions of the act to be executed are for limiting the available supply of commodities by keeping them off the market by purchase and withholding in the country or sending them out of the country for the purpose of increasing the price in this country; and influence on the movement of merchandise in interstate commerce is only such as may incidentally result from the attainment of the primary result; and the question is whether fixing and maintaining prices of goods bought, sold, moving in interstate commerce, because of the incidental effect it may have on the movement of such goods, is or is not a valid regulation of commerce within the meaning of the commerce clause.

Another way of stating the question is: Has the Federal Government authority under the commerce clause to enter into the business of buying and selling—manipulating a market in—goods flowing in interstate commerce for the purpose of raising the prices of such goods between producers and consumers?

That I do not misinterpret or overstate the matter when I say the real objective is price maintenance, and effect upon commerce only an incident in the operation of this bill, I quote from the report of the committee of the House (p. 25):

> * * * The board is authorized and directed to enter into "marketing agreements" with cooperative associations or corporations created and controlled by them, under which such associations or corporations agree either to withhold from the market or to buy, remove from the market, and export or otherwise dispose of such quantities of the agricultural commodity as are agreed upon.
>
> The fundamental purpose of this act is to enable the board to assist in controlling and handling crop surpluses. It is expected that prices will respond readily. (House committee report, p. 26.)

It is suggested that the tariff acts and laws regulating immigration and other legislation have an effect on domestic prices

of merchandise and labor. In such legislation the effect on prices is the incidental result of the exercise of admitted powers under the Constitution. Here the fixing, establishing, and maintenance of prices of merchandise is not the incidental result of the exercise of power under other clauses of the Constitution, but is the primary result to be accomplished.

Because it has been held that the fact that an otherwise constitutionally authorized enactment may incidentally in its operation affect prices of goods flowing in such commerce does not make such regulation invalid, this legislation is said to be valid because the attainment of its purpose—raising and maintaining prices by governmental action in keeping off the market a portion of the supply of goods—may incidentally affect the flow of such goods in commerce.

* * * this current [of commerce] may find itself stimulated at times and restrained at other times, as surpluses are disposed of or withheld. (House committee report, p. 40; Senate committee report, p. 25.)

It is further said:

As to the * * * objection that the commerce power does not give Congress direct power to fix, establish, and maintain prices in interstate and foreign commerce, * * * the answer is * * * that no such direct power is given.

Let us examine this:

In the whole bill there is no provision for any action affecting commerce other than the removal from commerce—taking out of the market—and putting into commerce—selling—merchandise for the sole purpose of controlling the price of such goods in the interest of the producer.

In view of the further provisions of the act, section 8 (b) must be construed to read:

(b) Whenever upon such investigation the board finds, subject to and with the approval of the advisory council for such commodity—

The action provided for is—

"The board (subject to the approval of the advisory council) shall arrange for the marketing of the surplus through marketing agreements" providing for withholding from sale any part of the surplus or for the purchase of any part of the surplus and holding it off the market at Government expense, with the risk of gain or loss in such transactions borne by the Government, all done with Government funds, and all done "through the execution of the provisions of this act" "to provide for the control and disposition of surpluses," "to preserve advantageous domestic markets," "to prevent surpluses from unduly depressing the prices obtained and prevent causing undue and excessive fluctuations in the markets."

The board "may make such regulations as are necessary to execute the functions vested in it by this act." (Sec. 3e.)

The member delivering to a cooperative association a commodity for withholding is to receive from the association an advance payment "fairly reflecting the current market value of such commodity," and, further, is to be insured against decline in price during the period of withholding the goods from the market.

In order that a cooperative association * * * may with reasonable security make payments to its members at the time of delivery of such commodity by the members, * * * the board is authorized to enter into an agreement * * * for the insurance of such cooperative association against price decline * * *. (Sec. 11a.)

Any such agreement for insurance against price decline shall provide for the insurance of the * * * association * * * against loss to such association of its members due to decline in the average market price for the commodity during the time of sale * * * from the average market price * * * during the time of delivery to the association. (Sec. 11b.)

So the producer will deliver his goods to his association, receive from it an advance of Government funds to the amount of the then market price of the goods, and at the same time be insured against loss by decline from such price to any time when his commodity is sold within the year the insurance may run, notwithstanding how much higher the price may have been at any time between delivery and sale.

Not only are there these provisions for the control of such of the commodity as is delivered to associations by members, but further marketing agreements shall provide for the purchase of any part of such commodity not delivered to such association by its members and the withholding and disposal of the commodity so purchased and for the payment of the losses, costs, and charges arising out of such purchase, withholding, and disposal or of contracts therefor. (Sec. 8, c-2.)

And finally—

During a marketing period fixed by the board (with the consent and approval of the advisory council) for any commodity, the board may enter into marketing agreements for the purchase, withholding, and disposal of the food products of such commodity, and all provisions of this section applicable to marketing agreements for the purchase, withholding, and disposal of a surplus of the commodity, shall apply to the agreements in respect of its food products. (Sec. 8 f.)

This seems to put the Government and its agents, the board and the advisory council, and the cooperative associations, and other authorized agencies into the market to buy up the crop and hold it or ship it out of the country, as the interest of the producer requires, and of manipulating the market, not only in the agricultural products themselves but in the food products made from them.

How can the price of any staple article of food be raised more certainly and effectively than by substantially diminishing the available supply?

Is there any limit to the height to which prices may be forced by the Government's purchase and withholding from use of goods?

The price at which a surplus or any part thereof is to be purchased or disposed of under any marketing agreement is not in any way regulated or limited.

At any time the state of the market, so far as purchases are concerned, must include, then, governmental action artificially limiting the supply available for domestic consumption, taken by agents of the Government acting in the interests of the producers and not responsible to the board or anyone for the prices at which they buy or the sacrifices in price they make in disposing of goods out of the country in order to make a scarcity here.

The theory of this measure is not that the board shall fix artificial prices through definite prices named in the agreement, but that it shall assist cooperatives to influence the prevailing price indirectly through control and disposition of the surplus supply of the commodity under the marketing agreements. (Senate committee report, p. 5.)

What is to prevent the representative of wheat, corn, or any other crop in which the board authorizes trading from forcing the price to consumers of food made from it in this country to any height?

Without reviewing again the decisions cited in my former opinion, it is enough to say that in my opinion Congress has not been given power to fix the prices at which merchandise may be bought and sold.

Another question is whether this bill delegates legislative power to the board and the advisory council.

It has been said, and repeated many times in various forms, that the marketing agreements equalization-fee plan of surplus control is not to be applied by the board to any commodity unless and until the provisions for surplus control through loans to cooperative associations have proven ineffective.

But such are not the provisions of the act as passed.

Quite to the contrary, the terms of the act are that the board shall arrange for marketing agreements when it finds, with the consent and approval of the advisory council, that there may be a surplus and that operation of the loan provisions will not be effective.

The board shall investigate the supply and market condition, and if it finds, with the consent and approval of the advisory council, that there is—or may be—a surplus, and that the operation of the loan provisions of the act, either because of inability or unwillingness of cooperative associations to control surplus, will not be effective to control surplus, shall arrange for marketing of surplus by means of marketing agreements and nonpremium price-guaranty contracts to commence when the board and the advisory council determine.

Of course, there always may be a surplus.

We produce, and we can not well avoid producing, a surplus above domestic requirements of certain agricultural commodities. (House committee report, p. 14; Senate committee report, p. 7.)

There is no rule of law laid down for their guidance and observance. To say that they shall arrange for marketing agreements when they find that the operation of the loan provisions of the act will not be effective to control surplus, because of the inability of associations to control surplus with the aid of loans, is to say they shall do it when they think best.

What quality of fact has a conclusion of the board and advisory council that loan operations will not be effective because of inability to control when no trial of loan operations has been had; when nothing is known as to what associations can accomplish with two hundred millions of capital at their disposal under a law giving them authority to buy up and hoard the food supply, and to sell, send out of the country, much or little when they please—manipulate the market as they will?

To say that the board and advisory council may find that operations under the loan provisions will not be effective,

because of the inability of cooperative associations, with the assistance of loans, to control a surplus, leaves action to the opinion of the board and advisory council, based not upon any experience with loan operations but their own views as to what will happen if they should be undertaken.

Under the provisions of the act giving the board and the advisory council authority to decide whether operations under the loan provisions will be effective to control surplus, the Congress delegates to the board and advisory council authority to determine whether operations under the loan provisions shall ever be tried.

As elsewhere discussed, the purpose of this bill is to raise, maintain, control prices to consumers of food in the United States in the interest of the producers.

The officials intrusted with its administration are to be persons who are "producers" "interested in and representative of producers," persons selected by "cooperative associations," "other organizations representative of the producers of the commodity," "heads of agricultural departments, and governors of States," interested in the production of the commodity.

Seemingly every opportunity that can be devised is given for the full exercise under authority of law of selfish interested control of price.

And, in addition, there is created a direct financial inducement to producers and those interested in and for them to reject all attempt at operations under the loan provisions.

The act provides that not exceeding $200,000,000 shall be available for loans to cooperative associations for carrying out the policy of the act, at 4 per cent interest (sec. 5b), and provides that at least $200,000,000 shall be available for advances to the stabilization funds for financing marketing agreements (sec. 12) without interest (sec. 8d), so the whole $400,000,000 authorized to be appropriated may be used for financing marketing agreements without interest.

The equalization fee "is a payment directly or indirectly by the producers for benefits received by them," but—

> The payment of the fees will in most instances be reflected in the price paid the producer for the commodity. (House committee report, p. 42; Senate committee report, p. 26.)

That is, the equalization fee paid by the producer for benefits received by him is to be passed on to the consumer and paid by him.

There is not a word in the act as finally passed requiring a trial of the loan plan before determining that it will not be effective, or the ascertainment of any fact as to its operation, nor any implication to that effect. Facts are things which have come to be, which are, the existence of which has been demonstrated. What will happen if given experiments should be undertaken is opinion, not fact.

In considering whether the operation of the loan provisions will be effective, the board and advisory council will have before them one plan under which producers operating at their own risk and expense can borrow for use in limiting the domestic supply of foodstuffs $200,000,000 at 4 per cent interest, as against another under which they can have for the same use four hundred millions without any charge for interest, such funds being provided either by the Government or by the consumers in this country through the price paid by them, which is to include—"reflect the payment of"—the equalization fee, or by both, without expense or risk to the producer.

To the board and advisory council under such conditions is delegated the power to decide whether the loan provisions will be effective, with the resulting conclusion, of course, whether they shall be undertaken, because the board is not directed, but authorized only, to make loans.

Such a determination, being without foundation upon prescribed ascertained facts, is only an opinion; and action upon such opinion is only an exercise at discretion.

The continuance of the operations of removing from the available supply, and hoarding or other disposition, is to be so long as the board and advisory council judge it to be advisable "to preserve advantageous domestic markets" and "prevent depressing of prices obtained."

It does not help to say that another element which may enter into the decision is the unwillingness of the cooperative associations handling the commodity to control the surplus, for that only makes one further delegation of authority—to the cooperative associations—to say whether the marketing-agreement provisions of the bill shall or shall not come into and continue in force; and then the whole matter of the beginning and end of the use of marketing agreements, including the establishment and collection of the equalization fee, is legislated into or out of existence, not by Congress but by the cooperative associations.

And, further, there is no way provided by which the unwillingness of the cooperative associations shall be ascertained. Does it mean unwillingness of any part of them, or a majority of them, or all of them?

If, as pointed out above, the primary duty of the board and advisory council is to determine the price at which certain agricultural commodities shall be bought and sold in the domestic markets, then to the board has been given the legislative power to determine that price in its entire discretion, without any rule or formula to guide its judgment prescribed by Congress, such as a provision that the price to be maintained as the objective of operations shall be based on cost of production, or reasonableness, or anything of that kind. The power of the board to control the price is absolute and the discretion unlimited.

The Congress undertakes to delegate to the board and advisory council authority to determine whether the provisions of this act shall or shall not be the law under which the business of selling and buying food commodities shall be conducted.

That is a legislative function which can not be delegated.

The board set up by the act is a governmental agency set between those who produce food and those who must eat to live, an arbiter whose sole guide is its own views as to what those who eat ought to pay to those who produce, an arbiter authorized, empowered, and directed to control by manipulation of the market the price.

> This provision makes it clear that the fundamental purpose of this act is not to have prices fixed by the board but to enable the board to assist in controlling the handling of crop surpluses. It is expected that prices will respond to such surplus control without any arbitrary price fixing by the board. * * * (Senate committee report, p. 13.)

Assuming that the board is composed of men of absolute rectitude, of wholly impartial attitude, who will in all they do under the powers conferred upon them attempt to be fair to—look to the welfare of—the whole people of the country, not of producers of food alone, still this act does by its terms, as they appear to me and as claimed by its sponsors, commit to them absolute power to control, regulate, raise, and lower at will at all times, so long as they deem it advisable, the prices which producers may obtain for their products, and all the people must pay or go without.

In addition to the decisions cited in the former opinion as to the delegation of legislative authority, reference may be made to the recent decision of the Supreme Court in J. W. Hampton, Jr., & Co. *v.* The United States, No. 242, October term, 1927, decided April 9, 1928.

It is not the purpose of the act that the board shall act impartially and in what it does under the powers conferred upon it look to the welfare of the whole people.

> The current will be so controlled, however, that the surplus will be withheld or eliminated from a glutted market, and its flow regulated in such manner as in the judgment of the board will immediately further the best interests of the domestic producers of the commodity. * * *. (House committee report, p. 40; Senate committee report, p. 24.)
>
> * * * the measure would permit producers of surplus commodities to receive an assured benefit from operations financed by fees collected upon such commodities. (House committee report, p. 2; Senate committee report, p. 2.)

The marketing operations by the Government are to continue so long as the board and advisory council judge advisable in furtherance of a policy "to preserve advantageous domestic markets" and prevent "surpluses from unduly depressing prices obtained."

The act itself provides, and its sponsors understand and expect, that the board will not be an impartial arbiter between producers and consumers, but that it shall act in the interest of producers alone.

The amount of the fee is to be based upon the estimate of the board and advisory council from time to time of the probable expense and losses, and necessarily their estimate of the amount of the product which will be marketed; and whether it shall be paid on the sale, processing, or transportation of the goods is to be determined by the board.

Results of operations under marketing agreements can not be known until the goods withheld, bought, and removed from the market have been disposed of and proceeds collected and expenses paid.

So, any deficit arising from transactions under any equalization fee established can not be restored to the stabilization fund by increased exactions upon the goods involved in those transactions, and must stand as a loss to the fund; and the other way around, if the fee in force at the time of any transaction produces more than is required to reimburse the stabilization

fund, the excess above such reimbursement will remain in the fund, with no provision for its return to those producers from whom it has been exacted and taken.

The expressed purpose of the act is to compel some producers to contribute to gains or making up the losses upon products of others.

The consequence of any excess or deficiency in the amount of the fee is to be corrected through revision in the amount of the fee to be collected subsequently. (House committee report, p. 27; Senate committee report, p. 15.)

The law contemplates that the collection of the equalization fee shall cease when the operation ceases. If it is found when operations end that the equalization fee fixed has been too low to produce enough to meet the losses, the losses will be borne out of public funds raised by taxation, constituting the revolving fund, by loans from it to the deficient stabilization fund, which must remain unpaid.

It is not important to decide whether this charge is a tax or is not. Treating the equalization fee as not a tax, it is obvious that what is attempted by this act is to enable certain agencies under Government direction and supervision to engage in the business of buying, selling, hoarding, and otherwise disposing of agricultural products for the sole purpose of controlling prices.

The theory of the act is that giving producers permission to organize combinations in restraint of trade is ineffective to enable them to combine and fix prices, because some producers who do not contribute to the enterprise realize a gain without bearing any of the expense; and the purpose of the act is to force all producers, directly or indirectly, to make a contribution, not in the nature of a tax, toward the losses and expense suffered in operations for the common benefit of all producers wherever their products may be sold. Compelling some citizens to participate in business operations by requiring them to contribute to the loss and expense thereof is, in my opinion, in violation of the provisions of the fifth amendment and a taking of property without due process of law. (Parkersburg *v.* Brown, 106 U. S. 487.)

On the other hand, if it be a tax, then its proceeds constitute public funds in the Treasury, with the result that the Public Treasury would bear the losses and expenses and take the profits, if any, of the business of buying, storing, and selling of agricultural commodity.

Because the equalization fee is not called a tax, does not purport to be imposed as a tax, is not exacted on any provided basis of equality, is not to be paid into the Treasury of the United States, is to be imposed and collected or not at the will and favor of interested administrative boards without congressional chart or compass directing as to the time when it shall be imposed, the time it shall remain in effect, the amount of it or upon whom it shall be levied, I think it can not be sustained under the taxing power of the Constitution.

And, further, notwithstanding the length to which the courts have gone in sustaining legislative authority, I am unable to believe that in an act which provides, in substance, that, through governmental agencies, prices of certain farm products shall be determined upon, established, and maintained, Congress may lawfully delegate to Federal officers the unlimited discretion to decide whether the price-fixing operation shall be commenced; may lawfully delegate the complete discretion without any prescribed rule to determine what the price shall be; or may lawfully delegate the power to determine on whom shall be directly placed the burden of collecting the charge to provide the fund to conduct operations.

I think and advise that this legislation providing for the control, in the interest of the producer alone, by the Government, of prices of goods moving in interstate commerce, by keeping out of the channels of commerce a part of the supply of such goods available for consumption, is not a valid regulation of commerce between the States and with foreign nations within the authority of the commerce clause of the Constitution.

That the members of the advisory councils hold posts in the service of the United States is shown by the facts that their office is created by an act of the Congress, their term of office is fixed by an act of the Congress, their duties are prescribed and their authority conferred by an act of the Congress, their compensation and expenses "within the limitations prescribed by law" are fixed by an act of the Congress, and they are specifically constituted a Government agency.

Under the provisions of this act, agencies entirely separate and apart from any department of the United States Government participate in their appointment.

The act provides that the board shall create an advisory council of seven members, selected annually only from lists submitted by the cooperative associations and other representative organizations and the governors and heads of agricultural departments of States where the commodity is produced.

Under these provisions, the board has no choice but to appoint from such lists, and all that the cooperative associations, other organizations, governors, and heads of agricultural departments need to do is to limit their list to seven persons, and they have made the appointment of the entire council.

But if they do not go that far, in any event the character, capacity, integrity, and judgment required in members of the advisory council are passed upon by persons, corporations, officers, in no way connected with or responsible to any department of the Government of the United States.

The board can take only what is offered to it; can make no independent selection on its own judgment.

Conceding that the legislative branch may prescribe qualifications to be possessed by an appointee to an office, still the exercise of the judgment and discretion to determine whether or not an individual possesses those qualifications, as well as other qualifications of ability, training, judgment, and character necessary to make a good public officer, may only be committed by the Congress to the appointing officers provided for that purpose and charged with that duty by the Constitution.

To provide that corporations, associations, organizations, and State officials who are not even officers of the United States shall designate a list from which only can appointees be selected, is not in any sense prescribing qualifications, but is authorizing these outside agencies to participate in—even control—the Executive function of appointment.

I am unable to find any constitutional authority for vesting the appointment of inferior officers of the United States by the Congress in anyone, outside of the President, with or without the advice and consent of the Senate, the courts of law, and the heads of departments.

The Constitution, for purposes of appointment, very clearly divides all its officers into two classes. The primary class requires a nomination by the President and confirmation by the Senate. But foreseeing that when offices became numerous and sudden removals necessary, this mode might be inconvenient, it was provided that in regard to officers inferior to those specially mentioned, Congress might by law vest their appointment in the President alone, in the courts of law, or in the heads of departments. That all persons who can be said to hold an office under the Government about to be established under the Constitution were intended to be included within one or the other of these modes of appointment there can be but little doubt. This Constitution is the supreme law of the land, and no act of Congress is of any validity which does not rest on authority conferred by that instrument. (United States *v.* Germaine, 99 U. S. 509, 510.) See Springer et al. *v.* Government of the Philippine Islands, Nos. 564 and 573, October term, 1927, decided by the Supreme Court May 14, 1928.

Therefore I think and advise you that the delegation of authority to dictate the selecting of individuals for such appointments to cooperative associations, other organizations, governors, and heads of agricultural departments of States, and conferring upon the board the authority to make appointments, whether so selected or not, is not only without warrant in the Constitution but contrary to its express provisions.

The appointment of advisory councils failing, because of no constitutional provision for their appointment being made in the act, might not be so serious a matter, as perhaps those officers might be dispensed with and the balance of the provisions (if otherwise valid) carried out, but for another matter which seems to be inextricably interwoven into the whole fabric of the bill.

It is provided that none of the marketing operations, including fixing the amount of and collection of the equalization fee, shall be begun—or once begun, ended—without the consent and approval of the advisory council for the commodity concerned.

The act vests—

the advisory council with power to be exercised concurrently with the power of the board to examine the facts upon which the board's decision to commence or terminate a marketing period is based, or to approve the estimates which form the basis for determining the amount of equalization fees. Substantially the same delegation of power as to findings of fact is made to both governmental agencies, and their joint agreement is required as to the presence of certain prescribed conditions before part of the legislative power exercised in the bill becomes effective. (Conference committee report, 4, third paragraph.)

So the Congress delegates the final authority to determine whether the act shall go into effect, and how long it shall remain in force, to a body of officials for whose existence there is no constitutional warrant—a delegation to a body which can not exist of legislative power which can not be delegated.

I have considered these questions with realization of the grave responsibility involved in passing on the validity of acts of Congress and with appreciation of the rule that the courts will indulge in every presumption to support the validity of legislation and that no act of Congress will be declared invalid unless plainly so, but nevertheless I feel bound to advise you that the act in question, if approved, would violate the Constitution of the United States, in that legislation having for its main purpose the control of the price of food in the interest of the producer is not authorized by the Constitution; in that if Congress possessed the power to do the things attempted by this act it could not delegate it, as it is legislative in character; in that it vests in those not officers or agents of the United States the power and duty of participating in appointments to fill places in the service of the United States; in that it contravenes the provisions of the Constitution against the taking of property without due process of law.

Respectfully,

JOHN G. SARGENT,
Attorney General.

THE PRESIDENT,
The White House.

The VICE PRESIDENT. The question is, Shall the bill pass, the objections of the President to the contrary notwithstanding?

Mr. McNARY. Mr. President, I ask that the message of the President of the United States be entered in the Journal, and that it lie over for the day.

The VICE PRESIDENT. Is there objection?

Mr. SMITH. Mr. President——

The VICE PRESIDENT. The Senator from South Carolina.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. SMITH. I should like to have this matter disposed of because I want to take the floor on another subject.

Mr. NORBECK. Mr. President, I have great respect for our President, but I have an entirely different view of this matter. There may be room for difference of opinion; but I want to say that I should be pleased indeed to have an opportunity to vote for this bill. I feel that we owe it to the producers of the country to try to pass it notwithstanding the veto. While I have no objection to its lying over for one day, I hope the chairman of the committee will bring it up to-morrow, so that we may pass upon it.

I am not going to discuss the veto message at length to-day, but I can not refrain from noting two objections which the President raises to the bill. The first is that the bill is a price-fixing bill.

It truly is, if the tariff is a price-fixing instrumentality. The farmers of this country, Mr. President, are operating under a disadvantage that has come on of late years. I think it is mainly due to the fact that the prices of the products of others have been "fixed." The price of manufactured products are largely fixed by the tariff—Government price fixing. The earnings of the railroads and other public-service corporations are fixed on the cost-plus plan—guaranteeing a profit. The earnings are virtually guaranteed by the Government. When operating costs increase, freight and passengers rates are boosted to make up the difference.

Prices are not only fixed by the Government. They are sometimes fixed by the monopolistic conditions of the business. Where there is no competition the price goes high.

Salaries are increased from time to time by the Government to meet changing conditions. Will the farmer believe that nothing can be done for him? Wages are to a considerable extent "fixed," sometimes by trade agreements, sometimes by the law itself. It is this "fixing" that has become a real burden upon the producer, who has no way of adding the increased cost to the price of his goods.

The farmer has a right to complain about price fixing, especially if the price is fixed for others, and to a point where it operates to his disadvantage. It is the high cost of goods and service that has depreciated the farmer's dollar. He is trying to get back to normal—those good old conditions we had before the World War, when the Agricultural Department found by careful investigation that the farmer's earnings averaged $600 a year, of which $200 was cash and the balance was the advantage of living on his farm.

Now, as to the claim that this bill will stimulate overproduction, I can only remark that if the prices that prevailed before the war had stimulated overproduction, there would be some basis for the fear; otherwise, I can see none.

Mr. SMITH. Mr. President, a point of order.

The VICE PRESIDENT. The Senator will state his point of order.

Mr. SMITH. Had not the Chair recognized me?

The VICE PRESIDENT. The Chair had recognized the Senator from South Carolina.

Mr. NORBECK. I will close. I beg the Senator's pardon.

Mr. SMITH. I am very much interested in what the Senator is saying, but I am a little more interested in a very personal matter.

The VICE PRESIDENT. Is there objection to the request of the Senator from Oregon [Mr. McNARY]? The Chair hears none, and it is so ordered.

DEFICIENCY APPROPRIATIONS

Mr. CURTIS. Mr. President, I ask the Senator from South Carolina to yield to the senior Senator from Wyoming [Mr. WARREN] that he may ask unanimous consent temporarily to lay aside the unfinished business, and proceed with the consideration of the deficiency appropriation bill.

Mr. SMITH. I yield for that purpose.

Mr. WARREN. I make that request, Mr. President.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 13873) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. WARREN. Mr. President, I ask that the formal reading of the bill be omitted, and that the bill be read for amendment, the committee amendments to be first considered.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

ORDER FOR EVENING SESSION

Mr. CURTIS. Mr. President, I ask unanimous consent for the entry of the order I send to the desk.

The PRESIDING OFFICER (Mr. CUTTING in the chair). The clerk will read the order proposed.

The Chief Clerk read as follows:

UNANIMOUS AGREEMENT

Ordered (by unanimous consent), That to-night at not later than 6 o'clock p. m., the Senate take a recess until 8 o'clock p. m., and that at the evening session, which shall not extend later than 10 o'clock and 30 minutes p. m., the Senate proceed to the consideration of unobjected bills on the calendar.

Mr. JOHNSON. Mr. President, before that is entered, I want to add to it that at the conclusion of the evening session a recess be taken until 11 o'clock to-morrow, and that then we proceed with the unfinished business; and I give notice now that when we proceed with it to-morrow we will proceed with a continuous session.

Mr. HARRISON. May I ask the Senator in that connection if we are not to take a vote to-morrow on the President's veto of the farm bill?

Mr. JOHNSON. I understand that is privileged, and I could not prevent it if I desired.

Mr. SMITH. Mr. President, I would like to have the order disposed of without further debate.

Mr. TYDINGS. Will the Senator yield just a moment?

Mr. SMITH. I can not. I must get to what I have to say.

Mr. CURTIS. I ask that the order be modified by adding "and that at the conclusion of to-day's business the Senate recess until 11 o'clock a. m. to-morrow."

The PRESIDING OFFICER. The modification will be made. Is there objection to the order submitted by the Senator from Kansas? The Chair hears none, and it is agreed to.

PROPOSED AMENDMENT OF COTTON FUTURES ACT

Mr. SMITH. Mr. President, I have been assailed, directly and indirectly, and insinuations have been made, and, perhaps, charges, that I have now yielded to certain influences that are not friendly to and have been disastrous to the grower and the producer of cotton.

Practically for years I have devoted my life in Congress to trying to bring about a system of marketing that would, as nearly as may be, reflect the real intrinsic value of that which is the currency of the South. There are comparatively few men in the Nation who realize the importance of cotton in our commercial life. So insignificant does it appear to a great many that the man who devotes his life to it is discredited; it is considered of such little importance that he necessarily is of small caliber, in the opinion of some, or he would not devote his life to it. I have devoted, in the main, my senatorial life to bringing about a solution, as nearly as may be, of this stupendous problem.

Cotton has held the balance of trade in favor of this country for more than 60 years. It is used by nations whose combined population is more than 900,000,000. Sixty-odd per cent of the liquid capital of the British Isles is devoted to the manufacture and distribution of American cotton. I have no criticism to make of those who do not appreciate this wonderful American asset if they do not agree with me that it is a thing that should receive the serious consideration of every American citizen, and particularly of those who are dependent upon it for their livelihood.

There is brought into the Senate a great cry that a bill has been introduced which Mr. "A" wrote or Mr. "B" wrote, and gentlemen can not find the author of it. With the exception of a few amendments there is not a line in this bill that is not either in the grain futures act or the cotton futures act.

Mr. HEFLIN. Mr. President, will the Senator permit an interruption?

Mr. SMITH. I yield.

Mr. HEFLIN. The Senator discussed with me the various provisions while we were having hearings investigating the cotton exchanges. When we would come out of the hearing room he would say to me frequently, "We must put in a provision to meet this objection and this evil." The Senator from Arkansas is entirely mistaken, and I want the Senator from South Carolina to know in the outset that the southern Senators generally do not feel as the Senator from Arkansas does about this matter. I regard the Senator from South Carolina as the best authority in the United States on the cotton question, and I would rather follow him blind on this question and vote for measures he would introduce, than for those of any other Senator or any other Member of Congress.

I have the utmost confidence in the Senator, and the country has. The Senator knows this subject. He has done more for the cotton producers than any man who ever came to the Congress from the South in either branch, and I, with the Senator, resent the attack that has been made upon him, and I will have something to say on the subject myself later on.

Mr. SMITH. Mr. President, I certainly am much obliged to my long-time friend from Alabama, and I do not believe there is a man on the floor of the Senate who has served with me who would impute any such motives or such acts as were attempted to be injected into the debate this morning. I am not responsible for the opinions men have; I am responsible only for my integrity. I certainly thank the Senator from Alabama for this tribute, which I may really indulge the hope is the majority opinion of my colleagues.

Mr. President, quotation was made here this morning from the speech of the senior Senator from Louisiana [Mr. RANSDELL] made, in which he took occasion to say that the Smith-Lever Cotton Futures Act had been a splendid measure. Is there any man here who recalls any piece of constructive legislation which has not been amended from time to time as necessity indicated? The original not repealed, but as certain amendments to it appeared necessary we have from time to time added them to the act. Let me state to my colleagues that the only change in the present law made by the first three or four pages of this pending bill is a rewriting of the Smith-Lever Act and amending it by placing the interstate-commerce feature in place of the taxing feature. The balance of it is word for word with that act, and the reason I followed that course was that there were certain other amendments I wanted to place in the bill, and it has been decided by the Supreme Court that taxation invoked for the purpose of regulation is not constitutional. Of course, I had my doubts about the consistency of that decision, in view of the State bank tax and the oleomargarine tax, but, anyway, this bill with subsequent amendments might lead to court procedure which might upset the law.

In regard to who wrote this bill, the provisions that are new I dictated myself. The balance of it, as I have said, is simply a reprint of the old law, made necessary to incorporate the features of interstate commerce as against the taxing feature.

The bill needed no hearings. It is simply a reenactment of the law with some provisions that every man was at liberty to hear divulged in the hearings that we had.

There have been letters read here in reference to certain men indorsing the bill. I am not responsible for any man that indorses anything that I do. Men may draw any inference they please. I certainly will not insult a man for indorsing what I do, even though he may have a sinister motive in doing so.

I hold no brief for any cotton merchant or any speculator, but why should we start out on the assumption that every man engaged in the cotton business, other than producing it, is a thief and a rogue? I do not propose to start out on any such premise. I take for granted that every American citizen has the right to engage in any legitimate business and to follow that business as his interests may dictate.

The Senator from Arkansas [Mr. CARAWAY] stands here and declares that in this wonderfully iniquitous bill the power is given to a board of control on the exchange to limit how much a man shall buy and thus control the price. There is no such provision in the bill. I will read the provisions before I get through.

I want to state in this connection that Mr. Clayton's name has been mentioned from time to time. Any man that took the time or trouble to go into the committee room where we were holding the hearings will understand that the controversy between Mr. Marsh and Mr. Clayton was a controversy that came into our committee accidentally. The Senator from Alabama [Mr. HEFLIN] will bear me out in that statement; he was on the subcommittee. These men had fallen out about certain practices, or the results of certain practices, which had been indulged in, and which they alleged had not caught the producer alone that time, but had caught the speculator and skinned him, and they came in to give their testimony. The main object of our investigation was to find what were the causes that brought about the slump in cotton in 1927. Any man who was there and heard the testimony as to what Mr. Clayton did, will see, in reading the bill, that every provision which is a new amendment to the bill is aimed at the things he is alleged to have done. The Senator from Alabama will bear me out in that statement. Every new provision here was drafted for the purpose of making impossible the very things that Mr. Clayton was alleged to have done.

Now, let us see. The Senator from Arkansas [Mr. CARAWAY] said that the bill gives unlimited power to a board to stop trading. They can do that without the law. Every man here knows that the exchanges, as they now exist, can now put a limit on trading and stop it any hour they please. They know that they have 200 points, or $10 a bale limit, and if cotton goes up that high they automatically stop trading. If it goes down to 200 points, they automatically stop trading. They do that in order, as nearly as they can by their rules and regulations and by-laws, to correct what might be a runaway market either up or down.

It was alleged in the testimony that Mr. Clayton, of the firm of Anderson, Clayton & Co., had bought so much cotton, had sold so much cotton, either in the form of hedges or contracts or actual spot, as to put them in possession of the situation so that he could control the market up or down as he saw fit.

The testimony was to the effect that not only did he dominate the American market, both New Orleans and New York, by virtue of his credit and capital, but that he dominated Liverpool, Barcelona, Munich, Alexandria, and even the markets in Japan and in China. That was the testimony as presented to our committee.

Therefore, when I came to draft certain amendments to the Smith-Lever Act—and let me say in passing, with reference to the fundamental principles of the Smith-Lever Act, that if any Member of this body will study and acquaint himself with the processes of purchasing and marketing cotton, he would not change a line of that act. I shall take the time right now to call attention to what the present act is and what it did until conditions changed and led to the necessity of still further legislation. It is not a reflection on the original act, not of any sort, but because, though it appears it was all right when things went right, it has not under present conditions gone far enough. Now let us see what it does.

The Senator from Georgia [Mr. GEORGE] called attention a while ago to certain things that were done. Before we had that law the Congress took up the matter of the alleged wrongdoing on the New York Exchange and appointed a commission to study conditions and recommend legislation. Herbert Knox Smith was chairman of the commission and he came back and made a report. The cardinal principle of that report was that that exchange allowed gin-cut, water-pack, dog-tail, perished-fiber, anything that had bagging and ties on it that they called cotton, to be delivered on a contract, and then, when the party that bought a contract called for delivery, they would deliver him this miserable stuff at a price fixed by the seller at the time of delivery called the "fixed price." He recommended that the practice should be abolished. I introduced the bill that later became the law, providing that no cotton should be tendered on contract that was not standardized by the Government.

One step further. The Government up to that time had only standardized some six or seven grades. The cotton futures act provided for the delivery of cotton standardized by the Government. But the Government did not stop there. They standardized all cotton. They standardized it from the lowest grade, which is called "good ordinary," to the highest grade that is called "middling fair," so that the law was without

effect in view of the standardization of all cotton, because under it they could deliver practically the same kind of stuff that they have been delivering before.

I offered an amendment to the law which provided that nothing below low middling in color should be tenderable. Get the difference, now. To those of you who do not understand the technical terms used in cotton, let me say that grade has to do with the color and staple has to do with the length of the fiber. I then provided, by an amendment to the law, that no cotton shorter than seven-eighths inch in staple or below low middling in color should be tendered on a contract. That became the law. I maintain now that any man buying a contract has the right to demand the delivery of his cotton and he will not get one pound of cotton that is not highly commercial and easily disposed of.

Mr. GEORGE. Mr. President, I hope the Senator did not misunderstand what I said. I concede that the Smith-Lever Act remedied a great defect in the marketing of cotton as it was theretofore marketed; but I contend, and we might as well face the situation, that under the Smith-Lever Act the seller can deliver any one of those nine grades.

Mr. SMITH. I am coming to that right now.

Mr. GEORGE. And while, as the Senator said, it is all a merchantable and marketable cotton, the cotton mill or the man who wants actual cotton can not use all of it. There is not a mill in the world that would undertake to use any one of those grades.

Mr. SMITH. Let me call the Senator's attention to this fact: I brought about an appropriation of $50,000 to enable the Government to test the actual value of all the grades of cotton of a given length of staple. We took 1-inch upland cotton and we took it from good ordinary to middling fair. Of course, we did not take gin-cut or water-packed or dog-tail, but we took dry, sound, 1-inch staple, and tested every grade as to its value for spinning and as to its bleaching qualities. The result after the tests were made is set forth in a report which I have in my office now. There is not one scintilla of difference between 1-inch staple cotton, good ordinary to middling fair, either as to its cloth-making or its bleaching qualities. The differentiation in grade is a thing to which we have got to address ourselves. It is a habit of the trade that has no basis in commercial fact. If we will take out the trash and foreign matter incident to conversion, and ordinary of the same length of staple is just as good for cloth-making purposes as middling fair of 1-inch staple.

The point the Senator from Georgia made is that no mill will take it. Most of them will not take it because they want to keep up the fiction of a difference in grades that does not exist. I have had millmen come into my office and tell me that in the spinning of yarn and the making of cloth, as long as it was uniform staple and dry and sound, they could produce and did produce the same cloth. And yet they will go on to your market and my market, not the speculators and gamblers alone, but the cotton buyers, and will get in the northern light to see if it has a yellow tinge or whether it is exactly middling or not, or exactly low middling or not, when all the facts in reference to its value are, Is it dry and sound, and what is the length of staple, and how much trash is in it? That is another feature that I propose, if God spares me, to bring to the attention of this body. Perhaps Mr. Clayton will help in that. Perhaps some other cotton dealer will help in that. I do not give a "shot" who helps, as long as the help is right.

I am calling attention now to the basic principle of the original act. There has been an advancement and development. We have found that certain traders were alleged to have bought cotton in such volume and sold hedges against it in such volume that a "corner" resulted like the cornering of wheat when a certain individual bought all the wheat in sight and began to raise the price or to pour it on the market and depress the price. So we put in this provision.

Mark you, this was alleged to have been the practice of Anderson, Clayton & Co. Here is what I propose. I mentioned it time and again to my colleagues on the subcommittee.

Let us see what this awful surrender to the exchanges is. Bear in mind that it was alleged by the ex-president of the New York Cotton Exchange that the volume of hedges and the volume of actual cotton bought and controlled by Anderson, Clayton & Co. destroyed the parity of the market and put others out of business. I ask Senators to listen. I see present one member of the subcommittee. The question was asked, "How many bales of spot cotton did you have? How many hedges did you have?" That is in the record. When the number was given they said that was practically a monopoly in any active month, and therefore destroyed anybody else dealing in the market. So it is provided in the bill that before any exchange can obtain a charter to do business it shall have amongst its by-laws this provision:

When the governing board—

The iniquitous combination that has the power to do right now what we propose to require them to do by law—

When the governing board shall establish a control committee with the necessary powers of investigation for the purpose of determining and preventing manipulation and/or the cornering of cotton by dealers or operators upon such exchange and specifically provide—

This is what they must have in their by-laws and constitution—

That the interest in futures contracts on said exchange for delivery in any one month of any individual, firm, or corporation, and his or its affiliation shall not exceed a prescribed limit, which limit shall be publicly announced from time to time—

And that limit will stand until the board sees fit to change it, and then only after—what?

after investigation, at which all interested parties shall have the right to be heard, but this limit shall not apply to an interest in any one month wholly composed of hedges against the purchase or sale of spot or cash cotton.

Thus it is provided that the board of governors shall incorporate in their by-laws and constitution a provision that no one firm, individual, or corporation shall buy or sell to such a limit by virtue of their capital and credit as to create a monopoly in any one month; that they shall prescribe the limit and promulgate it before any season opens, and that limit will stand so that all those interested will know of it and accommodate themselves accordingly. The last appeal is to the Secretary of Agriculture, and he is only to be appealed to when it is manifest that this power is used for the purpose of artificially affecting the market.

The allegation of Mr. Marsh and his attorney was that Clayton did this thing. The query of the investigating committee was how to stop it. It can not be stopped without a rule of the exchange providing a definite limit. It is a good suggestion along the lines of a normal flow of the law of supply and demand.

What kind of a double-twisted fool would a man be to write a bill to stop himself from doing that which made him millions, as Mr. Clayton was alleged to have made? I invite Senators to read the language. This measure is the outcome of an investigation that lasted 90 days. Am I to be held up here, after 20 years of fighting in this cause, as catering to men who prostitute the market place? Let me say right here, Mr. President, I shall never vote to destroy the market place, but I will vote to drive out with scourges the scoundrels who do prostitute the market place.

Mr. HEFLIN. Mr. President, if the Senator will yield to me at that point, let me say that the provision he has read tries to confine the speculation as much as possible to the actual cotton in existence.

Mr. SMITH. And to a legitimate movement of supply and demand.

Mr. HEFLIN. Certainly. Instead of their selling without let or hindrance hundreds of millions of bales of cotton, they have got to be confined more to the actual production of cotton?

Mr. SMITH. Precisely, that is its object, which the Senator from Alabama and I discussed during the hearings before the committee, and I have incorporated the provisions as a necessary amendment because of conditions that have developed since the passage of the Smith-Lever Act.

As I said a moment ago, I do not propose to be such an imbecile as to burn down a house in order to get rid of the rats, or to destroy a church because I do not like a certain preacher. I prefer to get rid of the rats and the preacher and let the house and the church stand.

Now, I wish to take up the next point. These are the new features to which I call attention. It is provided:

For the purposes of this act the word "manipulation" shall be construed to mean, among other things:

(1) Shipping or transferring to any contract market any cotton—

I hope Senators will pay particular attention to this, because it was alleged that Mr. Clayton—bear that in mind—shipped cotton from New Orleans to New York at an obvious loss according to the quotations of the two markets on that day for the purpose of putting a block of cotton in New York to tender on the contract and depress the market. That was developed. I made a point of it, and asked if it was a fact, and the testimony seemed to prove that it was. I believe Mr. Clayton admitted that he did ship cotton from New Orleans to New York

at an obvious loss and said that if he did not do it they would have taken the shirt off his back. I believe the Senator from Alabama will recall that. Therefore we incorporated as a part of the Smith-Lever Act the provision that no contract market shall have a license unless it shall have in its by-laws and constitution the following provision:

(1) Shipping or transferring to any contract market any cotton for the purpose of delivery on such contract market at an obvious loss on the transaction for the purpose of artificially influencing prices.

Mr. HEFLIN. That is one of the best provisions of the bill.

Mr. SMITH. And Mr. Clayton was the man who was charged with this very thing.

Mr. HEFLIN. Yes.

Mr. SMITH. And it has been said that Mr. Clayton backed the bill and Mr. Clayton wrote it, and yet the very things that Mr. Clayton was alleged in the hearing to have done and alleged to have made millions by doing, we provide under the bill that he shall not do again.

Another thing was alleged against Mr. Clayton. It was alleged that Mr. Clayton, of the firm of Anderson, Clayton & Co., in affiliation with Pennyfather & Co., of Liverpool, and certain Japanese and other foreign organizations had been guilty of another practice. We took weeks of testimony, heard every phase and side of it. It was alleged that he would buy one month and sell another month what they call straddles or would buy in this market and sell in that market in such volume that, having so much money, he could put one up and the other down, and then he would liquidate at a profit; thus play both ends against the middle, and never handle a bale of cotton. That was alleged and voluminous testimony was taken. We asked if under the rules of the exchange that could be done. The reply was, "We can not determine where a man shall buy or where he shall sell unless there shall be provided a law in response to an obvious wrong that is being done and that needs corrective legislation." After patiently listening to the testimony, we were convinced that that practice had been indulged in, and we proposed an amendment to the existing law which I shall read. I hope all of those that do me the honor of listening to me will try to find where I have been a party to a sinister proposal which will ruin the producers. Just follow the reading and see in what respect I am guilty. If you find that it is a mistake of judgment, very well; but I thank God that I can claim at least what Paul said about the Jews, "They have a zeal of God, but not according to knowledge," and I think I have got both.

Mr. HEFLIN. We think the Senator from South Carolina has got the zeal and the knowledge, while some of those who attack him have intense zeal but not so much knowledge.

Mr. SMITH. It really appears thus. Now let me read this provision:

The purchase in one contract market of a given number of bales of cotton for delivery in one month and a corresponding sale in the same contract market of a like number of bales of cotton for delivery in a later month, accompanied by the receipt of any cotton on the purchase and the tender of the same or other cotton on the sale, when such transaction is done at an obvious loss, for the purpose, and with the effect, of artificially influencing the price relationship of the two months.

It was charged by Mr. Marsh, ex-president of the exchange, against Mr. Clayton that he was the culprit who influenced the price. What would induce Clayton to write a bill that put the halter around his neck and stopped him from doing what he was alleged to have made millions out of doing?

The Senator from Arkansas said that nobody had read the bill. Anyone interested in cotton sufficiently to get up here and criticise others who are interested had the door open to him to come in and hear every word of the testimony, and those who did not avail themselves of the privilege have themselves to blame. We were at it for 90 days—exhaustively at it.

Mr. HEFLIN. Not only that, if the Senator will permit me, but we permitted the Senator from Arkansas (Mr. CARAWAY) to interrogate the witnesses two or three times when he was admitted.

Mr. SMITH. The room was wide open for him or anybody to come in who was a Member of the Senate and was sufficiently interested to try to get the facts.

I am just taking up this "iniquitous, this horrible, this damnable, this diabolical surrender of Senator SMITH to the influences." I propose to show how much surrender it is.

Let us see the next charge.

The next charge, and one that was voluminously testified to, was that Anderson, Clayton & Co. would buy up a lot of cotton and carry it to New York. It was alleged that Mr. Clayton had 200,000 bales there. He had sold cotton in the New York market, and it was charged that he had put 200,000 bales there to meet delivery, and he would give notice that he was ready to deliver. It was alleged that Mr. Clayton or his firm would go on notice day and tender this cotton, and buy it back himself, and immediately retender it to another one, and buy it back himself, and retender it, so that when the transactions for that month were over with he would have every bale of the cotton ready to repeat the same thing next month without having to ship it in.

Mr. HEFLIN. So that he could satisfy a million bales of contracts with the same 200,000 bales.

Mr. SMITH. With the same identical 200,000 bales of cotton.

Mr. HEFLIN. Without ever actually delivering and getting rid of the actual cotton.

Mr. SMITH. Precisely. It was alleged that he would tender this cotton, his brokers would buy it up, he would recertificate it, and tender it again and again that day and during that month, until he had satisfied and met all the buyers of that month, and still had his cotton to do the same trick the next month.

That was alleged before the hearings. I see in the Chamber a gentleman from the House who, by courtesy of the committee, was allowed to sit in, and he will verify every word I am saying; and he is one of the men who are reported to have said that this bill was absolutely iniquitous.

All right. Now, let us see what we say about that tendering and retendering. Mark you, now, I was charged here with writing the bill, or Mr. Clayton with writing the bill. I am taking the charges that were brought against Mr. Clayton and voluminously testified to, and the proposed legislation in reference thereto.

Let us listen to the next item.

This board of control and this exchange shall not be allowed under this law to exist if, amongst the things that I have already enumerated, it permits this:

Tendering and repeatedly retendering on futures contracts in any designated contract market notices of delivery of the same cotton for the purpose of artificially influencing prices upon such contract market.

It was alleged and testified under oath that Clayton did that thing with that 200,000 bales of cotton. Do you think Mr. Clayton wrote that, or had a single thing to do with it? It was the result of the investigaion that I broke my health down holding, and trying to keep everything to the main issue, to find out what had been the cause of the depression in 1927.

Let us see what else there is, now.

It was alleged against Anderson, Clayton & Co. that they were the ones who developed and put into operation these extraordinary practices that temporarily ruined the cotton market during the months that they operated.

Now, let us see what else is charged.

Along the very same line of this tendering, we put this into the law:

The tender upon futures contracts more than once by the same person in the same calendar month of notices of delivery of the same cotton, or otherwise trafficking in notices of delivery for the purpose of artificially influencing market.

Does any man here with sense enough to sit in the Senate think that Will Clayton, or anybody of the firm of Anderson, Clayton & Co., wrote that? This is a thing that he was charged to have done, and the testimony went so far as to convince us that it had been done. Therefore it was incumbent upon us, if we were going to keep the market place, that we should by law divest it of those things that were prostituting the market place.

This "iniquitous" bill, a "gamblers'" bill! I wonder if the Senator from Louisiana would like to be operated on in this manner if he was alleged to have done the things that Anderson, Clayton & Co. were alleged to have done?

Next, it was alleged and admitted, as I referred to a moment ago—and here is an additional section of the bill to take care of that—that they would buy Liverpool and sell New York, or sell New York and buy Liverpool, in such tremendous volume as to get them both out of whack. It was alleged, and solemnly sworn to before that committee, that they sold Liverpool down to such an extent, and held the menace of a load of cotton over them of such undesirable grade, that they practically stopped trading in the Liverpool association. It was alleged that they bought New York and sold New Orleans, or, bought New Orleans and sold New York, until they sold New York down so low that it was profitable really to buy cotton in New Orleans and ship it to New York, that the parity was absolutely destroyed, when it takes 80 points to carry cotton

from New Orleans to New York. That was what was known as straddling. I have already described it.

What do we propose in this amendment as a part of the Smith-Lever Cotton Futures Act? We propose to prohibit—

> Engaging in straddle operations in and between various markets described by the Secretary of Agriculture as contract markets, with the purpose of artificially influencing the movement of prices in any such designated contract market.

Do you think Mr. Clayton wrote that?

Mr. HEFLIN. Mr. President, it has been the purpose of the Senator from South Caroiina and myself, and all who are interested in the cotton producer, to do something that would prevent artificially controlling the market.

Mr. SMITH. Why, to be sure, and that is all this bill does from Genesis to Revelations; and yet a speech is made here to leave the impression that I, who have devoted my life to that crowd that I am proud to say socially I am one of but sorry to say financially I am one of the growers of cotton—here in the evening of life, when the shadows are growing long, and by the very statute of God's limitation my work must cease, I must stand in this place which I am proud to occupy and which I have so zealously striven to honor, and by insinuation and otherwise I am accused of selling the darling of my heart for not even a miserable mess of pottage, but to sell it for what purpose God in His wisdom only knows!

Now, next: I am only reading you these provisions of the bill that we thought essential to amend the present act with as they occurred in our investigations:

> For the purposes ot this section a straddle shall be understood to mean—

I have stated that. Outside of that there is not a line in the bill—not a line—that is not either in the grain futures act or the cotton futures act; and where the cotton futures act was changed it was simply changed to put in the interstate-commerce feature rather than the taxing feature.

Now, I want to call attention to another thing, and that is about the grading of that cotton in Washington.

Under the cotton futures act the Agricultural Department is charged with the duty of promulgating from time to time certain standard grades which shall be the basis of certification and delivery on the contract markets of this country. Under the law they can not certificate anything shorter than seven-eighths of an inch staple or below low middling in color. Complaint came to us that somebody had bamboozled the Agricultural Department and slipped over something, and that the New York warehouses were filled with gin cut and punk and God knows what else. I do not think, according to their description, that a decent rat would have built a nest in it. They were so loud-mouthed that they not only said that Anderson, Clayton & Co. had been guilty of shipping 200,000 bales of cotton gathered from the delivery points in the South up to New York but they said that they had certificated cotton that would not come up to the Government standard and was absolutely unusable.

After various attempts to get the best way we could to investigate thoroughly that allegation, we first said that we would ship all the cotton samples here to Washington, and then get independent graders to come in and grade it under the supervision of the committee. We found that that, perhaps, would take too long, and be too tedious; and upon the recommendation of Mr. Jones, one of the observers that we appointed—we appointed two to represent the committee in New York—it was finally agreed that we would take the samples of the 200,000 bales which the Government had drawn from each bale in its process of certification, and have six spot markets of America furnish us two expert graders from each market, so that they would take every one of these samples and take the Government standard, put it right down, and grade the cotton by the box, as they called it, according to the Government standard, just as you would take a Government yardstick and measure what a man had sold you for a yard to see whether it was a yard or not. These men reexamined one hundred and seventy-odd thousand bales; and out of that one hundred and seventy-odd thousand bales, they reported—and I have their signed report right here with their signatures on that report as to what they found—6,700 bales were, according to their opinion, a little shy of seven-eighths in length for some of it, and some was shy as to grade; but every one of them testified that it was what is called "line cotton."

Now, mark you, get this point, and get it clear in your minds: If anything was wrong with that cotton, according to their testimony, it was because of the Agricultural Department, and not because of the parties dealing in cotton; for all of them testified that they thought the Government seven-eighths staple was shy of what the trade would call seven-eighths. That would not be your responsibility or mine. If you and I were out to buy cotton according to the Government standard, and the Government furnished us the standard, and we went according to the standard, and the standard was found wrong, it was not you and I; it was the Government that was at fault.

I told them that I proposed to take it up here with the Government and see whether or not by actual measurement and by actual test it was up to seven-eighths or not. Here is their testimony. There was not one word said to me by any member of that grading committee as to the amount of cotton that they considered was not according to Government standard outside the 6,700.

The law says that no cotton shall be tendered on contract under certification unless it is seven-eighths inch in length and low middling in color. Suppose I were to have the Government certificate a tender to me, and you had sold me the cotton, and you had tendered it to me, and I by pulling found that it was three-fourths staple and strict good ordinary or ordinary. Do you not know I would have the right to appeal and have it actually measured and actually graded? The right is given in the law. We have the monstrous proposition made here that the Government loaned itself wholesale to allowing individuals to tender cotton that was notoriously below the requirements of the law.

Just one other point, and then I will be through, as I am very tired. I have a brand-new feature in this bill, and Mr. Clayton, the alleged archdevil of the cotton world, according to those who would denounce me, has for years been an advocate of southern delivery. Any man who has a grain of sense who is not an advocate of southern delivery is an advocate of the manipulation of the market. What does southern delivery mean? Before I get to that, however, let me call attention to what is to be done now. Every contract bought or sold in New York contemplates delivery of cotton in New York; you can not deliver elsewhere. It takes about 80 points to carry any cotton from the South to New York. Therefore every contract recording a sale in New York has to be so much above what spot cotton of like character would bring in the South to cover the carrying charges. In other words, in round numbers, if cotton were 21 cents a pound basis middling in New York, you would expect to get 20 cents a pound in the South, because it costs a cent to carry it to New York. It also will cost you a cent if you take it up to New York, to get it back to the South, if you are going to spin it in the South. So that you have in round numbers an additional cost of $10 a bale to fulfill your contract in this uneconomic market.

Every man who is in the cotton business, who is buying and selling cotton, advocates southern delivery, and what does that mean? It means that if I go to New York and buy a contract or sell a contract, when specific fulfillment is to take place, you deliver it where the cotton is grown and where there is no carrying charge attached. So that your hedge or your sale in New York will represent a flat price for cotton where it is going to be delivered, and not subject to manipulation and overhead and uneconomic delivery. That is all it means and all there is to it. Camouflage it as much as you please, it means that New York can still remain the greatest hedging market in the world, as Liverpool is to-day, a market where American contracts are bought and sold; but who contemplates delivering in Liverpool? The cotton is bought and sold upon the net basis in the South. Why should not New York do the same? Do you not see the reason why we want to keep it a spot market?

Suppose you have sold on the New York market a contract, let us say, for 100 bales, and the month of maturity arrives, and the party who bought it were to demand the cotton and the cotton were not there. It would cost you $10 a bale, or $5 or $6 a bale, to rush down into the South and buy and ship the cotton up there, and perhaps even if you shipped it by express, you could not get it there in time to specifically fulfill your contract. The seller could squeeze that market, as was done, and put it out of sight. On the other hand, on account of the uneconomic situation, they can put cotton in the warehouse and sell contracts, and then when you come to take it up, they say, "Here is the cotton." You say, "No; I would rather settle on the best price. Let me go down South and buy the cotton you have sold me. You just give me the money and I will go down there and buy." "Oh, no; you take this cotton." I not only have to take that cotton, but I have to pay the freight clear back down to the South, or wherever else I am going to ship it. It is uneconomic, and an artificial manipulation of the price. What is wrong in buying and selling cotton in New

York, with the understanding that you are going to deliver where the cotton is made, so that there is no stevedoring, no monkey business, just a plain sale of cotton to be delivered where it naturally belongs?

Mr. President, that is all there is in the bill. Is it such an infernal piece of iniquity?

As to the other features of the bill, I did, at the request of Mr. VINSON, of the House, add certain administrative features of the grain futures act which he thought might help in tightening up the execution of the things to which I have called attention.

Mr. President, I was born on a South Carolina farm. I was educated principally in my State. When I had gotten my degree, I felt and still feel that I might have made a success along professional lines. But I did not follow my inclinations for reasons very intimate and dear to me. I had a mother whose other children had grown to manhood and womanhood and left the old roof tree. I was the last one, and she was in the old home alone, and for seven long years I gave up my desire to enter a profession in order that my mother might have with her at least one of those to rear whom she had given her life. I could not do otherwise; I could not pay my debt of love and obligation to her in any better way than by being her support and stay as her years came to a close. That is a closed chapter in my life, and I thank God for what I did. When we laid her away in old St. Luke's churchyard I looked upon that as one completed duty that I had performed, and I am glad that I did. But during those seven years I had gotten interested in and intimate with the affairs that pertain to cotton. God knows, if the men on this floor could understand the intolerable burden that rests upon the devoted cotton producers of the South, they would not hesitate to come to the aid of those who are trying to lighten that burden.

When President Wilson and this body fixed the price of wheat, I was at the White House, and the President asked me why it was not reasonable to fix the price of cotton along the same average lines on which we had fixed the price of wheat. I said, "Mr. President, have you ever considered the difference between the production of wheat and the production of cotton? Machinery sows wheat, machinery breaks up the ground, machinery reaps the wheat, machinery threshes it, machinery elevates it, and machinery grinds it, while human fingers cultivate every hill of cotton, human hands with hoe and plow intimately touch every stalk of cotton on 48,000,000 acres, human fingers touch every lock in an 18,000,000-bale crop. Human hands load it into wagons and carry it to the gin. It is intimate with not only the labor of humanity, but it is burdened with the hopes of millions of people."

There is no device known to the ingenuity of mankind that can ever pick cotton outside of God's machinery. No human has ever created a machine that can cultivate it. We furnish the balance of trade for America and help clothe 900,000,000 people, and I have devoted my life to trying to bring to the realization of my colleagues what is involved in this problem. I have plead with them not to see cotton alone, but to see America, to see her monopoly of the world, to see the hopes of the purest American stock extant on the American Continent to-day, the southern whites, to help me to solve that problem that will in no sense impoverish them but will enrich them, and in enriching them help to enrich that devoted land, the South.

At this hour, after all my life, from the time I left the university until this good hour, I have lived on that same spot, the heritage from my forebears. The old colonial home in which I lived stands on a part of a land grant from King George III.

If anybody knows the burdens that the cotton grower bears, I should know them. I have devoted my life from my schooldays until now to that industry, and then, in the evening of my effort, crowned, thank God, with some success, I am to come into this body and hear a southern man charge me with apostasy to the crowd to whom I belong, and whom, thank God, neither he nor any other man can keep me from loyally serving.

Mr. HEFLIN subsequently said: Mr. President, I am not going to speak upon the cotton-measure question that has been injected into the Senate this morning. The Senator from South Carolina [Mr. SMITH] has covered that question so fully, so ably, and so completely that it is not necessary for anyone to say a word on the subject now. I feel that he has impressed every Senator who has heard him with the soundness of the provisions he has submitted. The bill was just this morning ordered to be reported out by the committee. The Senator from Arkansas [Mr. CARAWAY] precipitated the debate. I shall discuss it when it comes up for consideration by the Senate, and I hope that will be at an early date.

LETTER OF GEN. ROBERT E. LEE

Mr. BLEASE. Mr. President, I present a letter from Mrs. Mary D. Carter inclosing a letter from the greatest general this country ever had, Gen. Robert E. Lee, to Lord Acton, of England, published in the Libertarian of Greenville, S. C., January, 1924, which I ask may be printed in the RECORD.

There being no objection, the matter indicated was ordered to be printed in the RECORD, as follows:

DID THE SOUTH RETRACT?

Editor THE LIBERTARIAN,

Greenville, S. C.

DEAR SIR: I am inclosing a copy of General Lee's letter to Lord Acton, of England, published for the first time in this country in Doctor Riley's recent life of Lee, "Robert E. Lee after Appomattox," Lee as a college president, that I believe would be enjoyed by your readers, should you find space for it at any time. General Lee's position has been so often misstated that I believe it would be a fine thing for the readers of your magazine to have this first-hand, documentary evidence on the subject.

Dr. Newell Dwight Hillis, in his book entitled "The Battle of Principles," has the following to say:

"To-day the leaders of thought in the South believe that Lee and Gordon were right in the statement that they thanked God that they failed to establish State rights and that northern men had succeeded in maintaining the Union."

Compare this statement with what General Lee says in his letter to Lord Acton on State rights, written in 1866, just four years before his death, and you will see how grievously Doctor Hillis has misstated General Lee's real sentiments on this subject. You have an opportunity to correct this misstatement, at least so far as the readers of the Libertarian are concerned, by publishing this letter.

I think a number of other northern writers also are catering directly to this error, so it behooves those of us who are in possession of the facts to correct this injustice to General Lee whenever occasion offers.

I took this matter up directly with Doctor Hillis, and sent him a copy of General Lee's letter to Lord Acton, and asked him to correct this misstatement in the next edition of his Battle of Principles. I received a most gracious letter of thanks and appreciation from Doctor Hillis, telling me that he had filed my letter for future reference; and I am led to believe from this and the gracious tone of his letter that he will correct this manifest injustice to Lee in the next edition of his book. He will certainly do this if he is an honest man, after being supplied with documentary evidence as to General Lee's real sentiments.

General Lee belongs in the group of southerners like Dr. Lyon G. Tyler, of William and Mary College; Chief Justice White; L. T. Everett, author of Living Confederate Principles a Heritage for All Time; and other, who are now being joined by an ever growing northern group, of which Dr. A. L. Littlefield, of Boston, is an illustration, who believes that Appomattox was a triumph for imperialism in this country, and a blow that many fear it will never recover from. Appomattox utterly failed to "save the union of the fathers," which was a union of choice based on law, though this false claim has been repeated so often that there is danger of its being accepted because of its very repetition in spite of its falsity.

Dr. Arthur W. Littlefield, of Boston, writes:

"'The South tried to divide the country; Lincoln saved it'—that is the erroneous notion in these parts still; nobody up here, with very few exceptions, understands that the South tried to save federalism and the constitution of the fathers as against imperialism and the constitution of the protectionists. The South, though defeated, really saved to America, and, as we now see, to the world, all that was best in American nationality—the constitution of the confederacy furnishes ample proof of that. Lee's shrine at Lexington, not Lincoln's tomb, will become the shrine of American patriotism, when once history is told correctly."

Again, Doctor Littlefield says on this subject:

"Both Henry and Calhoun saw clearly that federalism would develop eventually into imperialism and that the central government could and would coerce the States whenever one section got control of that government.

This, of course, actually happened in the tariff legislation inaugurated and controlled by the North. I know that sounds utterly disloyal to the North, especially from a Massachusetts man; but in order to be true to the American ideal one must know no sections nor mere habitat. I am simply an American patriot trying to be true to principles, and loving the South, not only for her own sake, but because she was true to the principles that the fathers thought they had established and secured in the Constitution of 1787–1789. Therefore I stand squarely opposed to the perversion of that Constitution committed by Hamilton, Webster, and Lincoln, all of them arch imperialits at heart, in my judgment.

In the recent biography of Jefferson Davis by Gen. Morris Schaff, the following tribute to the Confederate cause is voiced:

"In spite of disasters and privations the southern people were willing to fight on. That spirit in Davis was the color bearer and never quailed; the trumpet for him, and for Lee, and the self-respecting, was the principle involved, a principle, we venture to prophesy, which will be the rallying ground for the people of the United States when the rights under the Constitution are all in the constricting folds of the Lernean Hydra of complete centralization."

Sentiments like these from ranking northern men, and the extensive State rights "Back to the Constitution" movements now being staged in the North, bear witness to the fact that so-called "Lost cause" is one of the liveliest issues of the day.

Very truly yours,

MARY D. CARTER,
Historian Welby Carter Chapter.

LETTER OF GENERAL LEE TO LORD ACTON

This letter, written while General Lee was president of Washington College, is unique, since its author was extremely cautious and reticent among his own people on the subject which he here discussed freely with his foreign correspondent. It will be found in Lord Acton's Correspondence I, 302–305:

LEXINGTON, VA., *December 15, 1866.*

SIR: Although your letter of the 4th ultimo has been before me some days unanswered I hope you will not attribute it to a want of interest in the subject, but to my inability to keep pace with my correspondence. As a citizen of the South I feel deeply indebted to you for the sympathy you have evinced in its cause, and am conscious that I owe your kind consideration of myself to my connection with it. The influence of current opinion in Europe upon the current politics of America must always be salutary; and the importance of the questions now at issue in the United States, involving not only constitutional government in this country, but the progress of universal liberty and civilization, invests your proposition with peculiar value and will add to the obligation which every true American must owe you for your efforts to guide that opinion aright. Amid the conflicting statements and sentiments in both countries, it will be no easy task to discover the truth or to relieve it from the mass of prejudice and passion with which it has been covered by party spirit. I am conscious of the compliment conveyed in your request for my opinion as to the light in which American politics should be viewed, and, had I the ability, I have not the time to enter upon a discussion which was commenced by the founders of the Constitution and has been continued to the present day. I can only say that while I have considered the preservation of the constitutional power of the General Government to be the foundation of our peace and safety at home and abroad, I yet believe that the maintenance of the rights and authority reserved to the States and to the people not only essential to the adjustment and balance of the general system, but the safeguard to the continuance of a free government. I consider it as the chief source of stability to our political system, whereas the consolidation of the States into one vast republic, sure to be aggressive abroad and despotic at home, will be the certain precursor of that ruin which has overwhelmed all those that have preceded it.

I need not refer one so well acquainted as you are with American history to the State papers of Washington and Jefferson, the representatives of the Federal and Democratic Parties, denouncing consolidation and centralization of power, as tending to the subversion of State governments, and to despotism. The New England States, whose citizens are the fiercest opponents of the Southern States, did not always avow the opinions they now advocate. Upon the purchase of Louisiana by Jefferson, they virtually asserted the right of secession through their prominent men; and in the convention which assembled at Hartford in 1814, they threatened the disruption of the Union unless the war should be discontinued. The assertion of this right has been repeatedly made by their politicians when their party was weak, and Massachusetts, the leading State in hostility to the South, declares in the preamble to her constitution, that the people of that Commonwealth "have the sole, exclusive right of governing themselves as a free, sovereign, and independent State, and do, and forever hereafter shall, exercise and enjoy every power, jurisdiction, and right which is not, or may hereafter be by them expressly delegated to the United States of America in Congress assembled." Such has been in substance the language of other governments, and such the doctrine advocated by the leading men of the country for the last 70 years. Judge Chase, the present Chief Justice of the United States, as late as 1850, is reported to have stated in the Senate, of which he was a member, that he "knew of no remedy in case of the refusal of a State to perform its stipulations," thereby acknowledging the sovereignty and independence of State action. But I will not weary you with this unprofitable discussion. Unprofitable because the judgment of reason has been displaced by the arbitrament of war, waged for the purpose as avowed of maintaining this union of the States. If, therefore, the result of the war is to be considered as having decided that the union of the States is inviolable and perpetual under the Constitution, it naturally follows that it is as incompetent for the General Government to impair its integrity by the exclusion of a State, as for the States to do so by secession; and that the existence and rights of a State by the Constitution are as indestructible as the Union itself. The legitimate consequence, then, must be the perfect equality of rights of all the States; the exclusive right of each to regulate its internal affairs under rules established by the Constitution, and the right of each State to prescribe for itself the qualifications of suffrage. The South has contended only for the supremacy of the Constitution and the just administration of the laws made in pursuance of it. Virginia to the last made great efforts to save the Union, and urged harmony and compromise. Senator Douglas, in his remarks upon the compromise bill, recommended by the Committee of Thirteen in 1861, stated that every Member from the South, including Messrs. Tombs and Davis, expressed their willingness to accept the proposition of Senator Critteneo frdm Kentucky, as a final settlement ofthe controversy, if sustained by the Republican Party, and that the only difficulty in the way of an amicable adjustment was with the Republican Party. Who, then, is responsible for the war? Although the South would have preferred any honorable compromise to the fratricidal war which has taken place, she now accepts in good faith the constitutional results, and receives without reserve the amendment which has already been made to the Constitution for the extinction of slavery. That is an event that has been long sought, though in a different way, and by none has it been more earnestly desired than by the citizens of Virginia. In other respects I trust that the Constitution may undergo no change, but that it may be handed down to succeeding generations in the form we received it from our forefathers. The desire I feel that the Southern States should possess the good opinion of one whom I esteem as highly as yourself, has caused me to extend my remarks further than I intended, and I fear it has led me to exhaust your patience. If what I have said should serve to give any information as regards American politics, and enable you to enlighten public opinion as to the true interest of this distracted country, I hope you will pardon its prolixity.

In regard to your inquiry as to my being engaged in preparing a narrative of the campaigns in Virginia, I regret to state that I progress slowly in the collection of the necessary documents for its completion. I particularly feel the loss of the official returns showing the small numbers with which the battles were fought. I have not seen the work of the Prussian officer you mention and, therefore, can not speak of his accuracy in this respect.

With sentiments of great respect, I remain,

Your obedient servant,

R. E. LEE.

PREVENTION AND CURE OF TUBERCULOSIS

Mr. MAYFIELD. Mr. President, I present a paper by Dr. J. Morrison, of San Antonio, Tex., relative to the public health, entitled "Original research into the causes, nature, pathology, prevention, and cure of tuberculosis," which I ask may be printed in the RECORD.

There being no objection, the paper was ordered to be printed in the RECORD, as follows:

IN THE MATTER OF THE PUBLIC HEALTH—ORIGINAL RESEARCH INTO THE CAUSES, NATURE, PATHOLOGY, PREVENTION, AND CURE OF TUBERCULOSIS

In the long catalogue of human maladies there is none more destructive to human life than tuberculosis. It has existed in the human race from time immemorial all down through the historical ages in all countries and climates. It has been called the great "white plague" by reason of its greater prevalence among the white races than among the colored. It is very slow and insidious in its onset, lingers a long time, becomes chronic, and eventually hurls its victims into a premature grave.

Millions of our people are slowly dying of it to-day all over the land. During the decade 1913–1923, it is stated by competent authorities that over 100,000 died from the disease in New York City and suburbs alone, and that in the entire United States more than 200,000 perish annually from tuberculosis, and further it can be safely affirmed that for every person who dies of it at least 15 living have symptoms of it and require immediate medical attention.

For many centuries the medical profession have been treating the disease with all kinds of drugs and compounds, such as vegetable and mineral tonics, emulsions of cod liver and other oils, stimulants, inhalations of different gases, hypodermic injections of antiseptics, mineral waters, baths, living in elevated situations in winter and summer, etc., and all to no purpose—a downright failure in every case.

While the profession was in this condition of ignorance and inability to do anything for the relief—not to say prevention or cure of suffering humanity—an obscure and unknown German physician, Doctor Koch, thirsting for fame or notoriety, announced to the scientific world that he had discovered the cause of tuberculosis to be a "living animalculum, microbe, bacillus, or bug," which was actually boring into and gnawing at the very vitals of the victim, and also that he had formulated what he called a "serum" which, when injected into the patient hypodermically, would kill the microbe or bacillus and permanently cure the patient. This astounding news was telegraphed to the earth's remotest regions as the greatest discovery in medicine since the time of Hip-

pocrates, 2,300 years ago. Many of our physicians rushed to Germany to interview Doctor Koch and to secure a quantity of his "serum," which they distributed to their friends on their return, and a few weeks afterwards there were to be seen in our cities and large towns signs painted on both sides in golden letters announcing the "Koch cure for tuberculosis"—an announcement a little too previous.

Doctor Koch himself followed closely on their heels with object of exploiting his discovery among American physicians and selling his serum for $50,000, but he failed to find a purchaser. He was given an opportunity of testing the merits of his serum in the hospitals of Boston, New York, and other eastern cities, but it proved to be a dismal failure; instead of even relieving the patients it made them worse, and Doctor Koch returned to Germany a wiser and a poorer man.

But while many of our physicians rejected the serum treatment of Doctor Koch they accepted the germ theory of the cause, became actually obsessed by it, and many of them remain so to the present day. The medical journals and the public press proclaimed the germ theory far and wide. The craze spread with amazing rapidity. In many places the people were alarmed by it, were thrown into a panic, and afraid to sit down where another had sat for fear that the germs would crawl into their bodies. This wave of pseudoscience, as it has proved to be, led to an immense amount of deception even in high places.

While the people were being quieted down and regaining their breath, some wondering why they had escaped, others why they were alive at all, because the patients were supposed to be exhaling microbes or bacilli by the millions, and they had been in constant contact with them in the same house for years, a new disturbance broke out unexpectedly. Another obscure and unknown German, Dr. Franz Friedmann, announced that he had discovered an error in Doctor Koch's formula which he had carefully corrected, and also had passed the new serum "through a turtle"—an animal noted for its longevity—which he claimed would most certainly kill the bacilli or germs in the lungs and also prolong life to an extent never before anticipated. Doctor Friedmann did not exploit his new serum at home, but at once set out for America. In New York and Washington he was given ample opportunity to test the merit of his serum, but, like that of Doctor Koch, it also proved to be an ignominious failure—absolutely useless.

At this stage the Federal Government took a hand in the game, ordered an investigation of this so-called cure, and a report thereon. Accordingly, committees of the most competent physicians in New York and Washington made an exhaustive examination of its therapeutic powers, and their reports are briefly summed up thus: "That Doctor Friedmann's serum is a dangerous and cruel fraud."

This report put an end to any further introduction of German serums but not of the belief in the "germ theory" as the cause of disease in general. It is the greatest medical fallacy of this or any other age, as will be proved further on; no sane person can believe in it in its entirety. Truth is simple and appeals to reason and common sense; error is complex and appeals to ignorance and superstition.

A HOMEMADE SERUM

The disturbance in the profession caused by the Friedmann cure had hardly subsided when a new serum, American made, was announced, which, of course, demands full consideration. The entire country from ocean to ocean and from our northern boundary to the Gulf of Mexico was flooded with literature proclaiming this new serum, which, unlike those of Koch and Friedmann, was not kept a secret but was openly divulged. It is well known that the bite of a rattlesnake is fatal, and that, too, in a short time; hence it was reasoned out that the tenth, or even the twentieth, decimal or centesimal dilution of rattlesnake poison could hardly fail to kill the tuberculosis germs or bacilli in the lungs and at the same time be nontoxic or harmless to the life of the patient. This supposed cure was proclaimed far and wide from pulpits by overenthusiastic preachers, but was not favorably received. A wealthy person financed the building of a sanitarium in Washington, D. C., for the curing of tuberculosis on this theory, but like all other similar experiments it proved a failure and disappeared long ago; it had a short and inglorious career. Very few people indeed would care to have rattlesnake poison thrust into their system, and those who did had good reason to regret it, for they became visibly worse.

MEDICAL CONVENTIONS

The next move of the profession was to request the governments of all the civilized countries to appoint their most eminent specialists in lung diseases to meet as delegates at some appointed place in order to discuss the subject of tuberculosis in all phases, to get an exchange of opinion on it from physicians living in different climates and latitudes, and to devise some means of curing or at least arresting the progress of this formidable malady which is levying such a high toll of death on the people of all nations. Some three or four such conventions or councils were held in European capitals, and one was held in Washington, D. C., about 1888–1890, but nothing of any value was accomplished in any of them.

From the preceding brief history of tuberculosis during the last century the reader can hardly fail to perceive that the medical profession at large has no conception of the causes and nature of the disease and much less of its pathology and treatment. In all the treatises on the practice of medicine, in the English language or in any other language, not one definition of tuberculosis is given, because the authors did not know, and 90 per cent of them do not know it yet, as they still hold to the germ theory—a world-wide delusion.

DEFINITION

TUBERCULOSIS IS A SLOW DECAY OF VITALITY

That is to say, a slow and continuous decay of the vital functions—respiration, circulation, nutrition, and assimilation—a disease in which the decay of the body exceeds the growth or repair.

It is not hereditary or contagious; no child was ever born with tuberculosis, but the parents may hand down to their progeny the predisposition or tendency to contract the disease on exposure to certain conditions of environment.

CAUSES

There are four principal causes, all of which are capable of being removed; all are acquired, not inherited. And here it may be laid down as an axiom that if the cause of a disease can not be found and wholly or partially removed, no permanent cure can be made; the disease will prevail in spite of everything that can be done.

FIRST CAUSE

Neglected or badly treated cases of pneumonia or bronchitis very frequently degenerate into tuberculosis, and the number of such cases is legion.

SECOND CAUSE

Vaccination or inoculation of the body with animal matter or poisons (ptomaines) which impair wholly or partially the function of the lymphatic glands whose function is to take up the waste or dead matter and eliminate it from the system.

THIRD CAUSE

A deficiency of iron in the blood. Such persons are pale, anemic, weak, have flat chest, soft muscles, insufficient lung expansion, are easily fatigued, lack endurance, etc. Iron is absolutely necessary for our very existence. We receive it in our food, which can never be too rich in that metal. A person can never have too much iron in his blood; it maintains health and strength.

FOURTH CAUSE

The use and abuse of alcohol in any form has been a prolific cause of tuberculosis, especially among the aboriginal inhabitants, the Indians. Alcohol has a strong affinity for water, it dries up the brain and nerves, causes sclerosis of the liver, jaundice, dyspepsia, and all the disastrous results that flow from them, and very frequently terminates in tuberculosis.

Now, in order to understand the action of these causes and the nature and treatment of tuberculosis, it is absolutely necessary to describe as briefly as is consistent with clearness the composition and molecular constitution of the human body. It is recorded in Genesis that the Lord God created man out of dust of the ground—"dust thou art, and to dust thou shalt return," a statement which chemistry proves to a demonstration.

If a human body which has never been drugged by mineral, vegetable, or animal compounds be burned and the results of combustion carefully anayized it is found that out of the 70 or more simple substances found on the surface of the earth, only 14 of them enter into the composition of the human body, 5 of which are metals (potassium, calcium, sodium, magnesium, and iron), 5 are gases (oxygen, hydrogen, nitrogen, chlorine, and fluorine), and 4 are nonmetallic bodies (carbon, sulphur, phosphorus, and silicon). Every organ and tissue of the human body is made up of compounds of these 14 elements; 70 per cent consists of water, a compound of oxygen and hydrogen; bone consists of calcium (lime), phosphorus, fats, oils, these last two being compounds of hydrogen and carbon; the brain and nerves of phosphorus, potassium, sodium, calcium, iron, and oxygen; and so on.

The entire structure of the human body is built up with a vast number of exceedingly small organisms, called cells, which differ in size and function according to the tissue or organ to which they belong; thus one drop of blood contains between two and three millions of red blood cells or corpuscles, circular in shape like a penny, slightly concave on one side and convex on the other, and contain oxide of iron. So small are they that at least 5,000 of them placed in line are required to make an inch, and their function is to carry oxygen from the lungs to the heart, by which it is distributed through the blood to all parts of the system. The cells float in a liquid called serum, which consists of a solution of chloride of sodium—common salt—in which are also albumen, fibrin, and all the other compounds of the aforesaid elements necessary for the building up of all the various tissues and organs. Each cell absorbs from the blood such material as is required to build its own structure; for instance, the bone cells abstract phosphate of calcium; brain and nerve cells, the phosphates of potassium, calcium, magnesium; and so on.

The walls of the cells consist chiefly of albumen, fibrin, and other compounds. The cells are short lived; millions of them die every hour, but nature provides for their reproduction. Every one of these elements and every compound formed by them—carbonates, sulphates,

chlorides, phosphates, etc.—has a special function to perform in the system; they are the vital portions and active builders of every part of the human structure.

These 14 elements reach our system through our food and also through vegetable and mineral drugs; for instance, 1 pound of rice contains about 1 grain of iron worked into it by nature, as it were, in an organic condition. Wheat and other cereals contain phosphate of potassium, calcium, etc.; mustard, radishes, cabbage, eggs, etc., contain sulphur; and so on. In regard to vegetables for food or medicine, their value depends largely if not entirely on the amount of mineral matter they abstract from the soil, and just here it is worthy to remark that trees and plants do not take up from the soil mercury, arsenic, lead, copper, etc., but only those found in the human body.

It is also necessary that the patient have a knowledge of the structure and function of the lungs, because they are the organs most frequently affected, but the tubercular matter may be deposited in other organs, as the bowels, bones, throat, etc.

STRUCTURE AND FUNCTION OF THE LUNGS

Take a bunch of grapes, say as large as your fist, and let us assume that the pulp has been taken out, leaving a thin, unbroken skin, and that the stems are tubes through which air can pass in and out freely. This will fairly well represent a small lobe of the lungs; the empty grape skins the air cells, and the stems the large and small bronchial tubes.

Now, around and between these air cells there is spread a thin layer of elastic tissue through which ramifies a fine network of arteries, veins, and nerves. As already stated, millions of the blood cells, also of the muscles, skin, brain, nerves, liver, etc., die every hour. This dead matter—composed, of course, of all the 14 substances composing the human body—is called heteroplasm, and is taken up throughout all the tissues and organs by the absorbents or lymphatic vessels which accompany the large and deep blood vessels, and poured into the veins, and thence into the heart, by which it is sent to the lungs; and while passing around and between the air cells, an extraordinary exchange of substances takes place. The blood sent to the lungs by the heart is venous blood—light blue, as seen in the veins on the arms and back of the hands—and is charged with carbon dioxide gas, the result of the oxidation of the carbonaceous portion of the heteroplasm; of course, the bowels, liver, and kidneys take part in eliminating the remainder of it.

While the venous blood is passing through the lungs, the cells or corpuscles, by virtue of the iron in them, take up another molecule of oxygen from the air cells and carry it to the heart, which distributes it to all the organs and tissues of the body, and at the same time the carbon dioxide gas in the venous blood passes out into the air cells and is exhaled along with the nitrogen and some aqueous vapor.

This interchange of gases (oxygen and carbon dioxide) through the same membranes and in opposite directions is called endosmosis and exosmosis—a wonderful provision of nature without which we could not exist for a single hour. During the circulation of the blood through the general system the extra molecule of oxygen taken up by each cell while in the lungs is set free for the purpose of disintegrating and oxidizing the old cells and other dead matter, and of eliminating it from the system.

The function of the lungs is the removal of the deleterious or poisonous carbon dioxide gas, and the taking in or absorption of oxygen from the air in order to carry on and maintain the marvelous operation of this body in which we move and live. That portion of the heteroplasm which seeks an outlet through the lungs is deposited in the elastic tissue between and around the air cells. Its additional accumulation and the pressure exerted on it by the action of the heart through the circulation gradually flattens and finally obliterates the air cells and thus shuts off the supply of air and, of course, of oxygen.

This heteroplasm or dead matter may permeate the whole lung or render a large part of it impervious to air, or it may separate and form an abscess, destroy the small blood vessels, the lung tissue, the walls of the air cells, and produce serious hemorrhage. The decaying and offensive contents of the abscess are expectorated, sometimes in enormous quantity, and a cavity as large as a hen's egg is formed. When an abscess is not formed the heteroplasm becomes semisolid or of a cheesy consistence, of a dark color, offensive odor, and possesses a greasy feeling when rubbed between the fingers. This substance is called "tuberculin," and it has been injected into patients on the old theory of what will cause tuberculosis will cure it, but always with fatal results.

DIAGNOSIS

The characteristic symptoms are easily recognized; there is diminished respiratory murmur in the upper part of the lungs, dullness on percussion, deficient lung expansion, a general wasting away, loss of weight and strength, etc. There may be a distressing cough, the result of capillary bronchitis, the sputum may be clear, frothy, or tough and stringy, but the microscope shows that there are no germs or bacilli in it. This confounds the philosophy of the physician who can not understand how this can be, because it is quite evident to anyone that the patient is seriously afflicted with the disease, but the chief internal evidence—the presence of bacilli—is wanting.

In children, and sometimes in adults, the lungs become rapidly infiltrated with the heteroplasm to such an extent that a large portion of them becomes impervious to air, very severe dyspnœa occurs, and pneumonia or bronchitis sets in and hastens the fatal issue. This is what some people call "galloping consumption"; in such cases the so-called bacilli do not appear in the sputum because abscesses have not had time to form. This condition has led the authors of works on medical practice to state that tuberculosis may exist whether bacilli appear or not.

The medical profession very generally believe that these so-called microbes or bacilli are generated in the air cells of the lungs only and thence exhaled in millions into the atmosphere; this is a great error into which they have fallen through ignorance of their nature and composition. The bacilli originate in the system, in the blood, in the heteroplasm, and in order to reach the outside world would have to penetrate the walls of the capillary blood vessels, the elastic tissue, and the walls of the air cells, and therefore they can never appear in the sputum until all these barriers are removed by abscesses. The bacilli are never exhaled under any condition, but always expectorated in the dark-colored, offensive sputum after abscesses have formed.

This is in direct opposition to the teaching in medical schools. They declare that the bacilli are exhaled in countless numbers, that they adhere to the walls of the room, to the furniture, to anything and everything with which they come in contact, and that a sound person can contract the disease by sleeping in a room which a consumptive occupied several years before. Such teaching is absolutely and superlatively false.

NATURE OF THE SO-CALLED BACILLI

If a quantity of the sputum—not less than three or four quarts from several tuberculosis patients who have abscesses—be collected and spread out on a clean surface to evaporate or dry up, the bacilli or germs, if living animalcula would, under this treatment, perish and disappear, but, on the contrary, they can now be more easily seen and examined with the microscope in the dry dust than ever before. The dust containing them can now be bottled up and preserved for any length of time.

As already stated, the heteroplasm or effete matter deposited (tuberculin) around the air cells of the lungs, is composed of the albuminoids, fibroids, oils, fats, etc., together with the sulphates, chlorides, phosphates, and carbonates of the five metals that enter into the composition of the human body. The tiny drops of the solution of these salts mixed up in the heteroplasm can not blend with it no more than oil with water, but when expectorated and cooled crystallize out and form exceedingly minute rods or crystals, clear and transparent, whose length varies from about three to four or five thousandths of an inch; in shape they are hexagonal or octagonal prisms with ends capped with pyramids of the same number of sides, with sharp angles and polished sides which no art can imitate. This inorganic portion of the heteroplasm is, of course, motionless, lifeless, and harmless; they are the result and not the cause of tuberculosis or of anything else.

CHEMICAL ANALYSIS OF THE "BACILLI"

Put a quantity of the dried sputum prepared, as already described, into a suitable glass vessel and pour on 5 or 6 ounces of boiling distilled water acidulated with nitric acid in order to insure the decomposition of any carbonates that may be present and carefully filter. The filtrate—the liquid which passes through—contains in solution all the sulphates, chlorides, phosphates, and nitrates of the five metals which enter in the composition of the human body—viz, potassium, calcium, sodium, magnesium, and iron—and the dark or black substance on the filter is tuberculin, the organic portion of the heteroplasm.

To the filtrate add carefully drop by drop, stirring with a glass rod, a solution of barium nitrate; a white precipitate of barium sulphate will be thrown down characteristic of sulphur. Filter and set it aside for subsequent examination if deemed necessary. The filtrate is now free from all sulphates. The next step is the removal of the calcium which would interfere with the subsequent examination for magnesium; therefore add drop by drop, stirring always with a glass rod, a strong solution of oxalic acid, which will throw down a white precipitate of oxalate of calcium (lime), which filter off as before. The filtrate now contains the salts of four metals—potassium, sodium, magnesium, and iron.

Now add a solution of silver nitrate; a pale yellow or dirty white precipitate of the chloride and phosphate of silver will be thrown down, and to this add strong nitric acid, which will dissolve the phosphate but not the chloride. Remove the precipitate by filtration as before, dry it and expose it to sunlight, when it will turn black, highly characteristic of chlorine. The filtrate now contains only phosphates and nitrates. Now add more nitrate of silver, when a yellow precipitate of the orthophosphate of silver characteristic of phosphorus will be thrown down, which remove by filtration as before.

The sulphates, chlorides, and phosphates have now been decomposed and nitrates remain in their place; calcium has been removed and sulphur, chlorine, and phosphorus shown in the precipitates which can now be dried, weighed, and estimated in the usual way if a quantitative analysis is required.

The filtrate—now a solution of nitrates—is now to be evaporated to dryness and heated to redness or as long as nitrous fumes are given off, when there will remain the oxides of the four metals—potassium, sodium, magnesium, and iron. The first two are soluble in water, the other two are not. Dissolve in distilled water and separate by filtering. The filtrate now contains only potassium and sodium hydrates. Wash off the mixture of magnesium and iron hydrates on the filter with sufficient nitric acid to dissolve them, which reduces them again to nitrates, divide the solution into two equal parts, to one add ferrocyanide of potassium. A white precipitate falls and rapidly becomes blue by the absorption of oxygen of the air, intensely characteristic of iron. To the other add chloride of ammonium, aqua ammonia, and phosphate of sodium; a white precipitate falls off the double phosphate of magnesium and ammonium having the composition of $MgNH_4PO_4$—highly characteristic of magnesium. There is no direct test for this metal, but only by forming double salts as above.

To the balance of the filtrate which now contains only potassium and sodium hydrates, add a few drops of hydrochloric acid, thus converting them into chlorides. Now add a drop or two of the perchloride of platinum, a yellow precipitate of the double chloride of platinum and potassium having the composition of $PtCl_4 2KCl$ will be produced characteristic of potassium.

There now remains in the filtrate only chloride of sodium—common salt—for the sodium, of which there is no chemical test or reagent. A drop of the solution imparts an intensely yellow color to the flame of an alcoholic lamp, distinctly characteristic of this metal, and the spectroscope gives the distinctive yellow line which distinguishes this metal from all others.

Here ends the chemical analysis of these minute crystals of the salts which enter into the composition of the human body—the first and the only one ever made or on record in any country in the world.

These crystals of inorganic matter, erroneously believed to be animalcula, that is, living microscopic germs consuming and gnawing at the very vitals of the unfortunate victims, have caused an incalculable amount of trouble and distress to millions of our people, and as a result of which very many of them fill premature graves.

The vital statistics published annually by the Census Bureau of Washington, D. C., show that the mortality from tuberculosis is simply appalling. This is a matter of tremendous national importance and demands the serious consideration of the statesman as well as of the physician.

TREATMENT, PREVENTION, AND CURE

The treatment is medicinal, dietetic, and hygienic.

The prevention and cure of tuberculosis depend on two conditions, viz, a sufficient intake of oxygen from pure air and the disintegration and normal elimination of the heteroplasm or daily waste of the system through the excretory organs of the body. Enough of oxygen can not be taken in unless there is a sufficiency of iron in the blood, and there is only one preparation of that metal which is suitable for this purpose, viz, the phosphate, a mixture of the ferrous and ferric salts. It is prepared by taking a given weight of the salt and nine times its weight of sugar of milk and triturated several hours or even days, and reduced to the finest practical state of subdivision and administered in powder or tablet form dry on the tongue or in water. When it enters the blood, the cells or corpuscles take up the iron, which colors them red, and the phosphorus combines with the albumen, fibrin, oil, fat, etc., to form lacithin, which largely enters into the structure of the brain, spinal cord, and nerves, which furnish energy to the entire system.

The iron also confers tonicity, resiliency, elasticity, and strength to the circular fibers in the muscular walls of both arteries and veins, reduces their caliber, prevents congestion, inflammation, and hemorrhage. Therefore those persons who have inherited from their ancestors the predisposition to contract tuberculosis, as well as those who have not, should take phosphate of iron—from five to eight of the 1-grain tablets of the 3x or 6x potency every three or four hours every day for months.

This will not only prevent tuberculosis but will also render them immune from all the so-called contagious diseases such as smallpox, typhoid fever, etc., for no disease can go from person to person when the blood is well fortified by a sufficiency of iron; but at the same time good digestion must be maintained, constipation avoided, and all dietetic and hygienic measures faithfully carried out in order to avoid auto-intoxication. Elimination of the heteroplasm or daily waste of the system is essentially necessary in all diseases, but more especially in tuberculosis, in which the waste exceeds the repair.

The so-called epidemics of any disease can only "catch" those who have poisoned or impure blood, and stop short where there is no auto-intoxication. Persons who are pale or anemic, weak, and neurasthenic should also take the phosphates of calcium and potassium along with the phosphate of iron. The former enters largely into the composition of bone to the extent of about 58 per cent. It also unites with albumen, fibrin, fats, etc., to form the walls of the cells of the blood, muscles, etc.; while the latter, the phosphate of potassium, constitutes a larger portion (about 20 per cent) of the gray matter of the brain.

These three phosphates, prepared as already described, are the foundation on which the muscular, bony, and nervous structures of the body depend for their energy and the performance of their functions. They enter our body through the food, but very frequently not in sufficient quantity to satisfy the demand of the various organs and tissues which by pains, aches, coughs, etc., are calling for help (food); hence the necessity of supplying these very essential substances which are both food and medicine to the system in molecular form just as nature furnishes them in our food.

These three compounds—the phosphates of iron, calcium, and potassium—are the most valuable medicines ever discovered by man; they will accomplish more to prevent disease, to maintain health and strength, to prolong life, and to keep people out of the lunatic asylum than all the other drugs of the materia medica put together. They are nonpoisonous; they are natural constituents of the human body, and no harm can ever result from the use of them in any dose. They may be taken together, but better separately and alternately, dry on the tongue, through which they penetrate and enter the blood at once.

Now, in regard to the middle-aged and older persons who have actually contracted tuberculosis from any of the causes already mentioned these phosphates just described are to be taken continuously for months, and indeed as long as any symptoms of the disease remain, and at the same time any one of the following powerful tonics and blood purifiers:

(1) Sp. med. echinacea (Lloyd).—Dose, 10 to 25 drops in water four times a day, half hour before meals and on retiring, to be continued as long as necessary. This drug is a powerful antiseptic and nonpoisonous. It is the only medicine which antagonizes blood dyscrasia, removes morbid accumulations of the heteroplasm, and thereby prevents the formation of tumors and abscesses.

Impure blood, septic conditions, and impaired nutrition, with their consequent waste and decay, are preeminently the conditions over which it manifests its manifold and powerful influence. It is still further aided by the following combinations, which are to be preferred in very severe cases, especially if complicated with scrofula or other poisonous taint:

(2) Sp. med. echinacea (Lloyd) two parts, sp. med. berberis aquifolia one part. Mix. dose: 10 to 30 drops in water four times a day before meals and on retiring. Repeat as long as necessary. If a scrofulous taint exists in the system use:

(3) Tinct. echinacea (Luyties) two parts, tinct. cascara amarga one part. Mix. dose: 10 to 20 drops in water four times a day, half hour before meals and on retiring, to be repeated; or

(4) Tinct. echinacea (Luyties) two parts, tinct. N. A. calendula one part. Mix. dose: 20 to 30 drops in water four titmes a day, before meals and on retiring. To be repeated.

For that "hydraheaded monster," scrofula, generally inherited but very frequently the result of blood poisoning, and only one step removed from tuberculosis, the third and fourth formulæ are preferred, together with any one or two of the following tablets, to be taken between and after meals:

(5) Ferri Phos 3x, Kali Phos 3x, Calci Phos 3x. Dose of each: Five or six dry on the tongue four or five times a day, or oftener, at any time.

The liquid medicines—one to four—must be those of Lloyd, Cincinnati, Ohio, or Luyties, St. Louis, Mo., because they are made from the green plants gathered at the time when they are most potent in therapeutic activity.

Echinacea and Calendula are "nature's royal and genuine antiseptics"—they stand without an equal; they not only prevent but also retard, when possible, the disintegration, waste, or decay of healthy tissue. Pus can not exist where they hold sway.

These medicines, comparatively few in number, will not only prevent but cure any case of tuberculosis that is preventable or curable at all, but the patient must not deceive himself. They can not do it in a day, a week, or even in a month. They must be taken as long as any symptoms appear.

The treatment outlined above is not founded on any of the false theories of cure but on the solid rock of human experience—on truth, reason, and common sense. It aims at removing the cause, without which no disease can be cured.

In this general outline of treatment it is hardly practicable to enter into all the minor details which may require attention. For instance, the patient may have obstinate constipation due to inactive liver, for which sodium phosphate may be taken or any good vegetable pill or compound. Again, if hemorrhage threatens, even to the extent of a mere streak of blood in the sputum, the phosphate of iron must be taken freely for several days, and if dyspnea or cough appear the phosphate of magnesium is the remedy, 5 to 10 of the 3x tablets in

warm water every hour or two for a day or more until the symptoms disappear.

In aged persons far advanced in tuberculosis who have had frequent hemorrhages, who have cavities in their lungs, and in whom vitality is well-nigh exhausted, no promise of cure can be made, but by the general treatment already stated, they can be much relieved, made more comfortable, and their life prolonged.

The prevention and cure of tuberculosis are now reduced to one condition, viz, a sufficiency of oxygen taken into the system, and this can only be fulfilled by having a sufficiency of iron in the red blood cells or corpuscles which are the receivers and carriers of oxygen from the air in the lungs to the heart, and therefore the phosphate of iron is the essential and infallible remedy. No other preparation must be used.

But to emphasize again, do not deceive yourself, it will not do it in a day or a week or a month; but in several months continuously. It is the one of the very few drugs which will infuse life and energy into tubercular and scrofulous patients in all stages of these maladies. Tuberculosis is preeminently a chronic disease and requires chronic treatment. Nature cures but not by jumps and bounds, but slowly and certainly. The physician can only aid by removing waste and supplying what is needed to enable her to carry on the marvelous operations of life.

Tuberculosis is not strictly speaking a disease of the lungs, per se, although almost universally believed to be so, but rather a disease of the entire system—a slow and continuous decline of vitality, a general decay which always exceeds the growth or repair. It most frequently manifests its destructive power on the lungs, but often attacks the throat causing paralysis of the vocal organs, or it may expend its force on the bones, especially those of the spinal column.

Under the name of *Tabes mesenterica*, it invades the bowels, especially in children. It is a factor in cerebrospinal meningitis and in that terrible affliction, lupus. It may invade the glandular system, as the kidneys, liver, etc.

In all these forms a liberal use of echinacea, calendula, cascara amarga, with the phosphates of potassium, calcium, and iron in the 3x or 6x trituration, must be faithfully carried out as already indicated in order to build up and strengthen the nervous system.

DIETETIC TREATMENT

It is not practicable to lay down a course of diet to meet all phases of any disease. Tuberculosis, however, is a slow mode of dying from beginning to end, and therefore calls for a generous and nutritious diet of proteids and carbohydrates. All meats, fish, cereals, vegetables and fruits, except the following, which are absolutely prohibited: Tomatoes, rhubarb, cream (except in coffee), fresh bread, ice cream, sweet milk, tea, rich gravies, pickles, salads, alcoholic liquors, hard cider, the use of tobacco, and other narcotics.

The foods rich in minerals should be preferred, such as spinach, rice, rolled oats, lentils, beans, whole wheat bread, rye bread, lettuce, and apples, all of which contain iron. Calcium and potassium are in all the cereals, and phosphorus in beans, cheese and eggs, beef, barley, and potatoes; and sulphur in eggs, radishes, cabbage, celery, onions, turnips, dates, figs, and other stone fruits.

HYGIENIC TREATMENT

In no disease are hygienic remedial measures of more importance. All the excretory organs—lungs, skin, kidneys, and bowels—must be maintained in a normal condition in order to guard against autointoxication.

Deep breathing should be frequently practiced day and night. Whenever practicable, inflate the lungs, gently at first, to their utmost capacity, force air into all parts of the lungs, breathe through the nose and not through the mouth. Frequent magnesium sulphate baths should be taken, winter and summer. This form of bath cleanses the skin as no other can, and leaves the pores open to facilitate elimination. No soap must be used in this bath, best taken just before retiring.

It is absolutely necessary that the consumptive and those who are merely predisposed to it, keep in the open air and sunshine whenever practicable and never be confined to bed in a closed room, starved, and deprived of fresh and pure air—the "rest cure," so called. Sunshine has a tremendous influence over both vegetable and animal life.

The vibrations of the ether sent forth by the sun on coming in collision with our atmosphere are by the law of the transformation of energy converted into heat and light without which no life could exist on the earth. By this genial warmth and marvelous light our hills and valleys are clothed in their glorious garb of green so pleasing to our eyes, and by the action of the invisible or chemical vibrations beyond the violet, this same green mantle is gradually transformed into the golden tints of autumn. Animals and plants will not grow and mature in the dark. Sunshine exerts a powerful influence over matter, and its numerous combinations both in the body and out of it, and it is here for the first time recognized as a remedial curative agent in the treatment of the consumptive. Sunshine carries with it those vibrations of the ether which, with the oxygen and ozone of the air, will disintegrate and destroy the most virulent gases that can emanate from any decaying animal or vegetable matter. Without the sun's friendly aid our atmosphere would, in a few centuries, become unfit for the support of animal life and the earth rendered uninhabitable.

Do not sleep in tents during the winter, but in warm and well-ventilated rooms; pure air is, of course, essentially necessary, but you also require a normal amount of heat and not a freezing temperature. Do not reside in regions in which sand storms occur or work in flour or cotton mills or in other dusty places.

Avoid the seacoast, all large bodies of water, such as the Great Lakes on our northern boundary, all river bottoms, such as along the Mississippi and its large tributaries, and all low, foggy, wet, or marshy localities wherever they are, because the air over such places is charged with too much moisture or aqueous vapor, and therefore deficient in oxygen. On the other hand, elevated places over 2,000 feet are not to be recommended, because the air, though pure and dry, is also slightly deficient in oxygen. An elevation of from 500 to 1,000 feet is to be preferred, and many such can be found along the foothills of the Blue Ridge, Allegheny, and Rocky Mountains, also in Arizona, New Mexico, and western Texas.

If the treatment here outlined be faithfully carried out in all its details, before another quarter of a century shall have passed away tuberculosis will be remembered only as a disease of the past, a matter of history, because all the old incurable cases will have passed over; the new cases that will arise during that time can for the most part be cured, and in the rising generations—boys and girls, the young men and women—the disease can be absolutely and permanently prevented.

All the facts as to the cause, nature, prevention, and cure briefly discussed in the preceding pages are the result of long-continued observation, experimentation, and research extending over a period of more than 60 years while engaged as a professor and practitioner of medicine; they are scientific, positive, rational, and true.

Here the author rests his case and respectfully submits it to the jury of all thinking men and women in this great country, who prefer truth and reason to ancient errors and modern pseudoscience, and here also he throws down the gauntlet and challenges anyone to come out in the open, take it up, and controvert what is stated herein.

Respectfully submitted.

J. MORRISON, M. D., Ph. D.,
1523 East Houston Street, San Antonio, Tex.

PROF. HIDEYO NOGUCHI, JAPANESE SCIENTIST

Mr. COPELAND. Mr. President, on the 24th of February I introduced a bill (S. 3364) to provide for the placing of the names of certain individuals on the rolls of the War Department, and to authorize the Board of Regents of Smithsonian Institution to make certain recommendations. In special recognition of the high public service rendered and disability contracted in the interest of humanity and science as volunteer subjects for the experimentations during the yellow-fever investigations in Cuba, the bill proposes to direct the Secretary of War to place on the rolls of the War Department the names of Mrs. Walter Reed and about 25 other Hospital Corps pensioners, and to pay them during the remainder of their natural lives the sum of $250 per month in lieu of any and all pensions now received.

We thought we had ended yellow fever. But yesterday Prof. Hideyo Noguchi, who was in West Africa under the Rockefeller Institute, caught the African form of yellow fever, and died from the effects of the disease.

I ask that the editorial I send to the desk from this morning's Washington Post entitled "He died for mankind," which has to do with the nobility and the sacrifice and the loss of the life of this great medical hero, be printed in the RECORD in connection with these remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 23, 1928]

HE DIED FOR MANKIND

The world has lost another hero in the death of Prof. Hideyo Noguchi, of the Rockefeller Institute for Medical Research, a victim of African yellow fever. The Japanese scientist, in his last works a follower in the footsteps of Walter Reed, had for more than a quarter of a century devoted his life to the study of human ills. He had established new and important conclusions as to the causes of African yellow fever, before he succumbed to that malady. He had previously made his own illness the subject of experiment and was thought to be on the way to recovery when a recurrence caused his death.

It was not in a single field of medicine, however, that Doctor Noguchi attained fame. He ranked with such scientists as Metchnikoff and Pasteur in the work of alleviating the ills of the human body. His tireless efforts in the field of medicine and bacteriological research were invaluable in combating trachoma, infantile paralysis, rabies, and yellow fever, and he did much toward identifying the causes of paresis and locomotor ataxia. No other member of his race was so distinguished in the field of pathology.

Doctor Noguchi was the discoverer of many serums that have revolutionized the treatment of rabies, rattlesnake bite, and infantile paralysis. With Dr. Simon Flexner, of the Rockefeller Institute, he isolated the germ of the latter disease, and later produced a smallpox vaccine, said to be free from bacterial impurity. He identified paresis as a manifestation of a dreaded blood disease germ. He had been decorated by his native Government and other countries, and was the recipient of degrees from a number of universities.

Doctor Noguchi undertook the task of studying African yellow fever after extensive work in combating the South American variety. He chose the Gold Coast for his work. Having contracted the disease, he directed further research work from his hospital bed. Monkeys inoculated with blood from his own body developed symptoms of the disease, and after further tests Doctor Noguchi felt confident that he had identified the carrier. Full reports on his research work had already been received in this country. He was to have sailed for home last Saturday. In the meantime the fever seized him again, and because of weakness following his first attack he lacked resistance to throw off the disease.

Few men have done as much for the general advancement of health as Doctor Noguchi. The sufferings of hundreds of thousands of persons have been lightened through the success of his laboratory experiments. In all probability he had no regrets that he had given his life in behalf of the science to which he had devoted so many years. The world can pay its debt to him only by cherishing his memory.

MUSCLE SHOALS—CONFERENCE REPORT

Mr. HEFLIN obtained the floor.

Mr. NORRIS. Mr. President, will the Senator from Alabama yield to me to make just a brief statement and submit a motion?

Mr. HEFLIN. I yield.

Mr. NORRIS. It is quite evident to me that the conference report on Muscle Shoals is not going to be voted on at this session, or if it is that it would probably be defeated. I want to say, in prefacing the motion I am about to make, that the conferees, both of the Senate and the House, have been actuated by a fairness and a desire to compromise the different views of the House and the Senate in order that we might reach a conclusion which would be satisfactory to both branches. The provisions which have been the subject of the greatest criticism in the Senate are provisions which were put in, it was believed at the time they were put in, to satisfy Members of the Senate.

I feel, however—and I reach this conclusion after talking with other members of the conference committee on the part of the Senate and of the House—that under the parliamentary situation in which both bodies now find themselves and the anxiety that we all have that the controversy, after so many years of struggle, shall finally be determined, that it will be necessary for a further compromise to be made in order to bring about the legislation.

Mr. HEFLIN. I trust that can be done, because I am not satisfied with the report myself as it stands, and I am willing that the Senator should make his motion.

Mr. DILL. Mr. President, is it the Senator's hope to bring back a report before final adjournment?

Mr. NORRIS. It is my hope, and I have the hope after talking with the conferees, that we will bring back a report to-morrow.

Mr. DILL. I am very glad to have the Senator make his motion, then.

Mr. NORRIS. I want to ask the assistance of Senators who wish to dispose of the measure, that we meet it in a spirit of compromise, as the conferees have had to do and as they will do to-night if my motion prevails, and help us to get the conference report disposed of by both the House and the Senate.

Mr. HEFLIN. I myself am willing to do that.

Mr. DILL. I do not want to see the report go back and be pigeonholed and not come to the Senate again.

Mr. NORRIS. There is no such intention, I assure the Senator.

Mr. ASHURST. Mr. President——

Mr. HEFLIN. I yield to the Senator from Arizona.

Mr. ASHURST. I have on several subjects truly followed many of the ideas of my friend, the senior Senator from Nebraska, and I am pleased that he is going to make the motion to recommit this conference report. I could not vote for this conference report in its present form, and for this reason: I am asserting that by the Boulder Dam bill the arm of the Federal Government is about to enter Arizona and take away one of Arizona's greatest resources, without our consent, and deliver that resource to California. Therefore, by the same rule of fairness, I could not, with any degree of morality, vote to permit the Federal Government to reach its hand into the State of Tennessee and take from Tennessee, over the protest of Tennessee, an asset worth $50,000,000 without so much as, "By your leave." For me to vote to deprive Tennessee of her own resources without her consent would be an act of injustice in which I refuse to participate, and which I shall oppose.

Mr. NORRIS. I am about to make the motion.

Mr. HEFLIN. I hope the Senator will make the motion.

Mr. NORRIS. I move that the conference report on the Muscle Shoals measure, being Senate Joint Resolution 46, be disagreed to, that the Senate further insist upon its disagreement to the House amendments and ask for a further conference with the House, and that the Chair appoint conferees on the part of the Senate.

Mr. BRUCE. Mr. President, let me say——

Mr. WARREN. Mr. President, this is a conference report which requires an immediate vote. It is not open to debate.

Mr. HEFLIN. I hope the Senator will permit the motion to be made.

Mr. BRUCE. It is a motion to remand the conference report.

Mr. WARREN. It is necessary only to vote "aye" or "no" on the motion the Senator from Nebraska has made.

Mr. BRUCE. Let us see whether that is so.

Mr. WARREN. It is so, and I hope the Senator will let the rule of the Senate be applied as it governs the matter.

Mr. BRUCE. This is the first time the Senator has made any reference to the rules of the Senate. He has seemed to think that his dictum was all that is necessary to confirm the statement. If that is the rule of the Senate, I have nothing further to say.

Mr. NORRIS. Mr. President, inasmuch as the House has not yet had an opportunity to act upon the conference report and can not act until the Senate does, I desire to change my motion. I move that the conference report on Senate Joint Resolution 46 be recommitted to the conference committee.

Mr. BRUCE. Mr. President, I am not going to discuss the conference report. I was merely going to express the hope that when our conferees go back to a further conference they will bear in mind that, in addition to other opinions in relation to the Muscle Shoals project, there are some of us who are opposed to the Government entering upon any form of manufacturing enterprise at Muscle Shoals, whether it be the manufacture of nitrogen or whether it be the manufacture of fertilizer or whether it be the manufacture of boots and shoes. I hope that that phase of opinion in this body will be reflected in the interchange of views that will be had between the Senate and House conferees.

The PRESIDING OFFICER (Mr. SHIPSTEAD in the chair). The question is on agreeing to the motion of the Senator from Nebraska that the conference report be recommitted to the committee of conference.

The motion was agreed to.

GOV. ALFRED E. SMITH

Mr. HEFLIN. Mr. President, there are a great many matters of great concern to the American people just now, matters in which the people are vitally interested. In spite of the position taken by a subsidized press, which I regret to say comprises about four-fifths of the big daily newspapers of the United States, the people are thinking. The masses of the people are doing a great deal of thinking to-day. They are not satisfied with the things going on here and elsewhere in our country. They are not satisfied with the steps taken by the subsidized press to nominate two particular men as presidential candidates for the two major parties of the country.

On the same day, in the same column, Republican newspapers are boosting Hoover for the Republican nomination and boosting Smith for the Democratic nomination. I have never seen this situation before. The life story of these two gentlemen has been taken up and published, page after page of it, by newspapers throughout the country. Those of us who have been charged for space by certain newspapers know that those stories and other advertising matter have cost these men and their friends millions of dollars. This thing has never before, that I know anything about, occurred in the history of the Government. After the nominations have been made, then the newspapers have usually published the life story of the nominees of the two parties.

The Democrats have their candidate put forward and the Republicans do likewise. This time, in advance, the largest slush fund, in my judgment, ever raised has reached the coffers of these newspapers for sale, and they have been induced to pick out these two men that the Roman machine and special interests have decided to foist upon the country. Some of the special interests would be satisfied with either.

Mr. President, it is a regrettable situation. No man or woman who loves this country, who wants to see its free institutions

preserved, who wants to see decency in government and right principles upheld, can look upon the situation without fear and trembling for the safety of the country. Things have transpired here in our Nation that have been brought to the attention of this body, that are stirring the people as they have never been stirred before in recent years.

Senators will pardon me for this personal reference, but my mail has never been so heavy in my life as it has been since I spoke in this Chamber on the 18th day of January last. I have received thousands and thousands of letters, and thousands of them I have not yet had a chance to read. My mail will probably average from 350 to 500 letters a day, coming from people who tell me about reading my speeches in the RECORD, and how they are getting the newspapers to print them and having to pay for it, and how they are putting them in circular form and handing them around in the various communities and saying that something must be done to arouse the people to the dangers that threaten.

Senators, I fear that we are reaching the time that Babylon reached just prior to her downfall.

It looks like some of our leaders have gone to sleep and stopped talking. Babylon reached the time when appeal to the people did not seem to stir them. In fact, the truth was kept from them in the main. The leaders seemed to be dazed or dead to the evils and the dangers that infested Babylon. Through their indifference or stupidity they drifted on toward ruin—from bad to worse until God Himself sent His angel down to pronounce a curse on Babylon. God forbid that such evil and corrupt forces shall drag down to ruin the great Government of the United States. God give us the courage to fight to preserve it.

Mr. President, this great free Government is the hope of the world. Dynasties have fallen and thrones have crumbled since Jefferson wrote the Declaration of Independence. The eyes of oppressed peoples the world over have looked to this Government, hopefully, expectantly; and now it seems that we have reached the time when the corrupt use of money has become the terrible master and dominating force in our national politics.

I believe that certain Al Smith supporters down in North Carolina who appeared before the Senate Committee stultified themselves. The idea of Al Smith's leaders down there swearing that they have not received and expended more than $3,500 in the whole Smith campaign in the State which has been going for 12 months and more. They have been working in precincts, counties, and districts for more than six months. Yet, on yesterday, some of them said that they had not seen any money except $3,500 of which Gordon Battle, of New York, gave them $2,500. That is the plan of the Al Smith bunch. They are following the same tactics and telling the same story wherever they are called before the Senate Committee to testify.

Mr. OVERMAN. Mr. President——

Mr. HEFLIN. I yield to the Senator from North Carolina.

Mr. OVERMAN. Has the Senator any proof that any North Carolinian has received money except as has been testified before the committee investigating campaign expenditures?

Mr. HEFLIN. I have not any proof; but nearly every citizen I talked to in the Senator's State—and they were among the best men in the State—said, "We can not prove it, but they are spending money; they have a lot of money; we know by the men who are handling the situation. Many of them are men who do not get very much interested unless they are getting money."

Mr. OVERMAN. The men who were subpœnaed in North Carolina—I do not know who had them subpœnaed—all testified that they did not receive any money. They are as responsible and high-toned men as there are in the Senator's State or in any other State of this Union. I am sorry that the Senator has brought this matter up again. After he first made his charges I said nothing, because I thought there might be something in them; but the committee has gone to North Carolina and examined these good men, and they swore they had received no money. Does the Senator think it is right for him now to charge that these men, who have taken an oath on the book of the Holy Evangelists of Almighty God, that they have received no money, swore falsely and contrary to the facts in the case? It is improper, it seems to me, after the investigation made by the committee for the Senator to make these charges when these men can not be heard.

Mr. HEFLIN. Mr. President, no corruptionist will admit that he has been bribed. Before God, I believe that the Asheville newspaper man Webb has received money from the Smith people. I will tell you more about that later on.

Mr. OVERMAN. I am just as certain that he has not.

Mr. HEFLIN. That man would not have been attacking Senator SIMMONS, as I am told he has done, after he claimed to be his life-long friend. However, I do not want to have any controversy with my good friend from North Carolina. I am willing for him to say what he wishes to say regarding these men.

Mr. OVERMAN. I do not believe he has attacked him [Mr. SIMMONS]; I know he has not done so in his newspaper; I do not believe that he has received a cent. He swears he has not and he says the statement that he has is a gross slander, and I believe it.

I hope the Senator will let North Carolina alone, so far as that is concerned. Anything else he may say is all right. I am fond of the Senator; he knows what I think of him; we are old friends; but I do not want him to stand up here after these good men have sworn before the Senate committee they did not receive any money, to reiterate the charge that they did. I say that such a course is unfair and improper, particularly when these men can not defend themselves. [One man clapped his hands in the gallery.]

Mr. HEFLIN. You Romanist, do not you dare interrupt these proceedings with your handclapping in the Senate gallery. If I see which one of you is doing it, I will put you out myself, if necessary.

The PRESIDING OFFICER (Mr. SHIPSTEAD in the chair) rapped with his gavel.

Mr. OVERMAN. Mr. President, I do not know whether they are Romanists or not; but the people are indignant after these men have been sworn and testified—and although I have not seen the testimony, it is here, I suppose—that they should be denounced. It seems to me that it is unfair for my friend to stand here and repeat these charges upon this floor when those against whom the charges are made can not be heard in their own defense.

Mr. HEFLIN. The Senator I am sure has not been down into North Carolina as recently as I have, and he does not know what good Democrats are saying about some of the Smith leaders. But I repeat I am glad for the Senator to make a statement in my time if he desires to do so; I am going to make some more statements about them, however, right now.

This newspaper man Webb, when I spoke in Asheville last year, attacked me editorially most viciously when I criticized the candidacy of Al Smith in my speech there as I had a right to do, and when I told about the efforts of Roman Catholic machines to involve the United States in war with Mexico. On that occasion the largest crowd that had assembled at Asheville in a long time, I was told, hundreds of them standing, cheered my speech and indorsed it when I had finished. The people of North Carolina every where I have spoken have indorsed my speeches, and they indorse them now. They indorse the fight I am making in the Senate. This man Webb, however, assailed me; he made one of the most insulting and vicious attacks that has ever been made on me in a newspaper. And yet on Monday he told the committee at Raleigh—the New York Times says that—

> Senator HEFLIN is uttering slanders and lies in the Senate.

Mr. President, I denounce this little hireling of the Roman Catholic political machine as a liar. And I am responsible for that statement inside or outside of the Senate.

I make no reflection on my good friend, the able Senator from North Carolina [Mr. OVERMAN]. I am very fond of him, and I can understand that he, perhaps, feels that he should have said something, but this man Webb is a wolf in sheep's clothing. I think he is much better off financially than he was when he met the Al Smith bunch. I know how some of these newspapers are reached. If Webb had not been courted by the Tammany tiger he would not have been inspiring secret attacks on Senator SIMMONS and whispering around that they ought to have new leadership in North Carolina. Mr. President, they have never had an abler or more faithful leader in North Carolina than Senator SIMMONS. He and his able colleague, the junior Senator from North Carolina [Mr. OVERMAN], have represented that State faithfully and well. So, when Mr. Webb undertook to say before the committee of the Senate, to my colleagues on that committee, that I was uttering slanders and lies here, he knew that he was a corruptionist and liar.

They are spending money in that State. That is the report of Democrats all over the State. They can not catch them; of course, not, for they are employing the Tammany tactics. They send the money itself; there are no receipts that pass; no record is kept; but a man who will sell his vote will lie until he is black in the face; a man who will barter his country will swear he has never sold it. Of course, you would not expect him to swear that he did.

One of the Al Smith leaders, a man named Dawson, has some serious charges against him in North Carolina. Some of them are of a criminal nature, obtaining money under false pretenses, and hints at embezzlement.

Guffey is leading Smith's fight in Pennsylvania, and he embezzled money from the Government. And Dawson and Webb are leading the fight in North Carolina. It looks like Al Smith gets tied up with crooks and embezzlers wherever he goes. Birds of a feather flock together. Now, so much for that.

Mr. OVERMAN. The Senator has no proof whatever of these charges.

Mr. HEFLIN. Yes; I have. I know what Democrats of North Carolina told me about Dawson and his Al Smith side partners last Monday in North Carolina.

I am not going to permit the Democratic Party of the South and the country to be imposed upon and lied to by the sorry hirelings of Al Smith's in the South, who, in supporting him, put his candidacy and all that that means above the things most dear to the people of the South and the country.

Three thousand five hundred dollars all told for a Tammany-Romanist campaign for President long drawn out over 12 months. Of course, they forgot to tell the truth. Those who will barter this Government, those who will obtain this nomination by the corrupt use of money will tell a lie about it, and laugh in your face. If the committee should say, "Mr. Jones, you are managing this campaign?" "Yes, sir." "It is rumored that they paid you $50,000. Did they?" "Yes, sir." Then you have got him.

What does he do before he goes in? The Tammany tiger trainer says: "Do you know anything?" "No, sir." "Are you going to admit anything?" "No, sir." Why, of course, if he is a crook, if he can be reached by the use of money, and goes and does their bidding, he is not going to come in and say he did it. Men who are charged with crime on the witness stand in the courts will swear that they are innocent, and witnesses who saw them commit the crime have to convict them. You can not convict them by their own testimony. I do not expect Webb to admit the crooked influences that have been at work to cause him to attack southern Senators who have interfered with his very strange Al Smith program! He bitterly assailed me last year. I had met him and he seemed to be a pretty clever fellow, and I said, "This is very strange. Some evil influence has gotten hold of this fellow." His editorial attack read like it was bought and paid for. He had been Senator SIMMONS's friend for years and years, but now he is one of those down there who are picking around on the side. He is being criticized all over North Carolina for his conduct.

Mr. President, I am a Democrat, and I do not intend that my party shall become crooked if I can help it. Whenever I find crooked work going on in it, it is my duty to point it out, and to help clean it out. I have assailed the Republican Party for that; I have helped drive Republicans out of the Senate for that.

We have recently had before us the Frank Smith case. He was public utilities commissioner of Illinois deciding cases for Insull, the power king, and Insull was giving him campaign funds; and here is Gov. Alfred Smith, of New York, who is called a Democrat, with his utility man appointed as the head of his campaign committee to go out and do exactly what Frank Smith did and get money from the public utilities, as Frank Smith got it from Insull. Why are we not justified in assailing Governor Smith for doing what Frank Smith did? Frank Smith was a Republican; Governor Smith, they say, is a Democrat, although he and his bunch bolted Wilson, bolted Cox, and bolted Davis. If a Democrat is involved, shall the Democrats say, "Let him alone; Democrats keep silent"; but, if he is a Republican, "Attack him; go to it. If he is a Democrat, say nothing, let him employ any means possible; let him buy the nomination, just so he gets it. Don't tell it, you will hurt the Democratic Party."

Ah! Mr. President, the man who serves the Democratic Party best is the man who attacks crooked Democrats and keeps the corruptionists out of control of the Democratic Party.

Mr. SIMMONS. Mr. President, I very much dislike to engage in this discussion. I do not mean in any way to impeach the integrity or the veracity of any person who testified before the committee or the two members of the investigating committee on campaign contributions who went to North Carolina. They were there only one day; they heard the testimony of certain people. I do not say that those gentlemen did not testify to the truth with regard to their personal knowledge of campaign receipts and expenditures; but I do say that the people of North Carolina, if I am not altogether misled by the information that I have received, are under the impression that vast sums of money are being expended in North Carolina for the purpose of organizing the Smith campaign.

I have been connected with campaigns in North Carolina and I know that the plan of organization which they have inaugurated in North Carolina can not be carried out in that State without a large sum of money. One gentleman, who asked to be permitted to testify before that committee, said that the plan of organization which my friend and colleague put in the RECORD, and which it was understood had been imported from Tammany Hall, was the plan which I applied when I was a candidate for the Senate against the late Governor Kitchin in 1912—a statement which was false upon its face, because in 1912, when I ran against Governor Kitchin, I ran in a senatorial primary, and the precinct and the county conventions and the State convention had nothing to do with that result.

To say that I had organized a plan of that sort in my campaign is absolutely ridiculous, because I was elected or defeated in the primary election held to determine whether Governor Kitchin or Chief Justice Clark or myself should be elected to the Senate, and I got 25,000 or 30,000 votes more than both of them together.

If the committee which investigated the Teapot Dome scandal had been satisfied with the statement of Mr. Fall, and the statement of Mr. McLean with reference to how Mr. Fall got that $100,000, and had stopped there, we never would have had an exposure of the corrupt methods by which the Government was deprived of this great naval reserve deposit of oil. But the great Senator from Montana [Mr. WALSH] was not willing to accept those statements. He preferred to trace down the lead that was given him. He had ample time. He went to Florida. He examined McLean under oath, and McLean exploded the whole scheme which Fall had manufactured for the purpose of excusing his bribery. An investigation to bring out the facts in the case of North Carolina can not be made in one day, and it can not be determined by the result of the testimony of a few people who are called there. It might require weeks to do it, and you would have to follow up leads that you might get.

I am not impugning the testimony of any of those gentlemen. I have nothing to say against what they testified, except that fellow who testified to the manifest falsehood with reference to my plan of organization in the senatorial primary held between Mr. Kitchin and myself, but I do say that there is a conviction in the minds of the voters of North Carolina that large sums of money are being expended down in North Carolina for the purpose of bringing about packed conventions, packed precinct conventions, packed county conventions, and a packed State convention. I assert this without fear of contradiction. That is the objective of the present plan of organization that has been inaugurated there.

The people in North Carolina asked that the executive committee permit them to vote. Confronted with this powerful, all-embracing organization that went down to the precincts and up to the county conventions and the State convention, they asked that the people be allowed to have a primary on the same day on which the State primary was held to determine who should be the preference of that State for the Presidency.

In the last legislature they repealed the presidential primary, but they let the rest of the State and county primary remain. That primary is to be held on the second day of June; and the people asked the executive committee of that State to permit them to hold at that time a primary vote to determine how the majority of the people of the State stood with reference to the nomination of candidates for the Presidency. They were refused that privilege; they were denied that privilege, because if the individual voters in North Carolina were permitted to register their views and their wishes as to who should be their nominee, Alfred E. Smith would not get one-fourth of them.

That opportunity for an expression of the will of the people on this matter has been suppressed. It was suppressed by the State executive committee. A large part of the votes of the executive committee were proxy votes. The Smith men had been previously tipped off that this meeting was going to be called; and they got the proxies and voted the proxies against the right of the people of North Carolina to express their will upon this question in a primary.

But, Mr. President, the action does not leave us without a remedy in North Carolina. The precinct conventions are yet to meet. In those meetings the people can assemble. I am somewhat apprehensive about getting out the full vote, because those precinct meetings have no function now except to appoint delegates to the county conventions. All the State officers and all the county officers, from constable up to governor, are to be elected in the primary. The precinct conventions, therefore, have no functions to perform except simply to appoint delegates to the county conventions; and with that limited power the people have not heretofore been disposed to attend these meetings.

But this year we hope, in the interest of the rule of the majority, in the interest of a fair expression of the opinion of the people of North Carolina on this question—this vital question, affecting, in my judgment, the life of the Democratic Party—I hope we will be able to get them to come to the polls next Saturday when the precinct meetings are to be held. If they do go out to the polls, there will be registered against Alfred E. Smith a vote of 4 or 5 to 1.

I mention now that during the 12 years that I was chairman of the executive committee I never did anything to thwart the will of the people.

Mr. President, this is a Republic. This is a Federal Government. The people still have the right to name their officials. A well-laid plan has been in operation since the convention of 1924 on the part of the Smith following in North Carolina to arrange it so that the voice of the people would be suppressed. They are continuing to carry out that program as far as they can. In my judgment, however, they will not succeed. There will be an uprising against it. There will be an expression of the vote of the people, because the people of North Carolina do not stand for the things that Alfred E. Smith stands for. They stand against the things that Al Smith is known to stand for. He is not known to stand for anything except his record as Governor of the State of New York and his connection with Tammany Hall with its affiliated alliance with Wall Street. Upon the other great national questions we have not heard from him. Upon immigration, restricted or unrestricted, we have not heard from him. Upon the tariff we have not heard from him. Upon the agricultural situation we have not heard from him. Upon none of the fundamental issues of Jeffersonian Democracy have we heard from him.

His followers would not let us hear from him until we have nominated him. If we nominate him, we must take the "pig in the poke"; and if we do nominate him, Mr. President, what will we get? We will tie to the neck of Democracy in this country Tammany Hall, with all of its terrifying record of corruption in the past, with all it has stood for from the days of Tweed and Croker and Murphy up to the present time—a veritable body of death—and then nominate a man about whose position we know nothing, who has had no connection with politics in America, whose vision has been confined to the things of New York, who never went to the South until he went down there for the purpose of inaugurating a campaign with a view to securing his own election, and possibly to crush me—crush me, Mr. President! How can 15 per cent of the votes of North Carolina crush a man who is standing with 85 per cent of the people of the State solidly behind him?

Mr. Smith can not do it, with all the cunning of Tammany Hall and New York politics. That was his first visit to the South. He never had been there before. He knows nothing about it. His publicity organs now say that he must not be hamstrung with a Vice President who stands for prohibition, because it would interfere with his scheme to run a campaign upon the wet issue, to be elected by the united wet vote of the Democratic Party and the Republican Party; that he must not be hampered and hamstrung by the nomination of a southern Democrat as his associate!

Mr. President, the southern Democrats are not anxious to be his associates on that ticket. I know of no southern man of outstanding ability who will consent to run on that ticket as Vice President.

What does Mr. Smith know about national politics? Has anybody ever heard any utterance from him on national questions? Tammany leaders have never been interested in America. Their vision is confined to local affairs in New York City. All we know is that the New York World, his chief champion, says that if he is nominated the main issue will be "wet or dry." Upon that he will stand or fall. Upon that he will be elected or defeated. The other great issues which Jeffersonian democracy presents to the country, the great questions which divide the two major parties of this country with reference to finance and economy, and every other conceivable thing that connects itself with politics—they are to be thrown into the background. If we attempt to discuss the scandals that grew out of the Harding administration, the prostitution of justice by Daugherty, the robbery of the poor, decrepit veterans of the World War by Forbes, the bribery of Fall—if we attempt to discuss all those things, the answer will be, "Look at Tammany—Tammany! That is the answer.

If we undertake to discuss any of the major questions relating to the differences between the major parties in this country we will have the same answer; the only question raised by the candidacy of Al Smith is the question of whether we shall again have barrooms and liquor or have prohibition in this country.

I will ask the Senator from Alabama to pardon me for thus interrupting him.

Mr. HEFLIN. Mr. President, I am indeed glad to yield to the Senator from North Carolina [Mr. SIMMONS]. He is truly a great Southerner, a great leader of the Democratic Party in his State and here, and he is a fine American statesman. He knows what it all means to the South if that Smith régime goes in. He knows what the people of North Carolina are saying about the slush fund down there. He knows, as a man who has led political battles, that it would take a vast sum of money to carry on in any State such a campaign as the Smith supporters have carried on in North Carolina for the last 12 months. He knows and he has dared to tell you that Democrats all over his State say that the Smith crowd are spending in North Carolina a great deal of money to capture the State delegation for Governor Smith. I am going to read the newspapers to-morrow to see if they tell North Carolina and the country just what Senator SIMMONS said here to-day. I want them to tell the country what the Senator from North Carolina said to-day about Governor Smith and about how the Democratic Party would be hamstrung and hog tied if he should be nominated and speakers go out in a national campaign discussing Fall and Denby and Daugherty and Frank Smith and the Newberry case, and the Republicans just stand up and laugh in our faces and say, "How about Tammany Hall and Al Smith? Cleveland, Wilson, and Bryan all condemned and denounced Tammany Hall, and you went there and took the chief of the corrupt Tammany machine and nominated him for President."

Mr. President, as long as I have the strength to fight, I am going to fight against turning over my party to such a disreputable and corrupt régime. I would be unfaithful to the mother who bore me, and my good father, both gone to their reward, if I did not protest as long as I have strength to fight against putting this man's rule over the South and the Nation. I would be unfaithful to myself and all that is dear to me if I should not protest day by day against the corrupt and dangerous work that is going on in the country.

The idea of these people going out gathering their slush fund from contractors in New York, holding up the public-utilities people, putting a man over them with a club who has the power to punish them by reducing their rates or the power to reward them by raising their rates, making them contribute whether they want to do so or not, to gather up funds to send out and secretly slip into the precincts and counties and obtain delegations, and when you inquire into it, they stand up and say they have spent two or three thousand dollars in a State. Of course they are not telling the truth.

Mr. President, a corruptionist will not convict himself. He will damn his soul swearing a lie. You can not get a corruptionist to convict himself. You can not get a thief to give testimony that will incriminate him. You can not get those who are manipulating and managing a corrupt machine to expose the machine and send themselves to the penitentiary. It is not expected, and I do not expect it. But where there is so much smoke, there is fire.

I have made four speeches in North Carolina, and wherever I have gone they said, "They have money galore, but you can not catch them with it. You can not prove it. We know, from the automobiles that are going up and down the roads, traveling day and night, and the forces that are at work." It costs money, and we are told that those who are manipulating and managing Smith's campaign do not work without pay.

That is the situation. Then they stand up, when they are afraid, if anything should happen and he should be nominated and elected, he would be impeached because he had corruptly obtained the office of President, they are preparing in advance to cover up their tracks and to hide every dollar they expend. That is what some of the so-called Democrats seem to have come to. God help the party, and help it in this body.

I thank the able Senator from North Carolina. His State owes him a debt of gratitude it can never pay. Nobody knows better than I how he has led the Democrats of North Carolina in the past. He took up the battle of the Democratic Party and restored it to control in every congressional district in the State, and to-day, in my judgment, he is loved, honored, and revered as no other man in it has ever been—just as Alabama loved and revered John T. Morgan. Morgan led the fight in the Senate that defeated the force bill, which sought to place Federal soldiers with bayonets around every ballot box in the South. Senator SIMMONS led the "red shirts" in North Carolina, organized that brave band, triumphed in every county, restored white man's rule, drove out carpetbag and negro rule; and North Carolina, God bless her, stands with head erect and basks in the sunshine of Democratic rule and white supremacy.

I point with pride to the fact that my grandfather, Wyatt Heflin, was born in North Carolina. I love the State. I do

not want to see that State go into the Smith column. It would be a reflection upon her.

Some few of them who have been following Senator SIMMONS, who now, in his absence have gone wrong and refused to give the Democrats of North Carolina a presidential primary have started a reaction, and it has put the fighting spirit in the real Democrats, and what they will do to Alfred E. Smith Saturday will be a plenty; but a few of them—and they must have been those witnesses, Webb and Dawson, the latter of whom is charged with serious offenses—they must have given out this statement for the New York Times:

> That Senator SIMMONS, for more than a quarter of a century the recognized Democratic leader of the State, for the first time in all those years is out of harmony with a powerful and influential element in North Carolina Democracy, was evidenced by nearly every witness down there.

Here he was on that day battling in the Senate, taxing his strength to the utmost, fighting to reduce the tax burdens of the people of North Carolina, and here were these men coming over—just one side—to testify briefly, spreading the news around that Senator SIMMONS was losing out and that a new and powerful element was coming on. One of them runs a newspaper that is flourishing now, and the other is charged with things that I will not discuss in the detail if I can help, and I am not now ready to say all I have heard about Webb. These are the men who discredit Senator SIMMONS secretly. His record is as pure as light and stainless as a star. Nobody can assail his record. Nobody can attack his honor. Nobody but a fool doubts his great ability. He is a strong man, a faithful, upstanding American, and because he would not yield to the solicitations of those who were sent here to Washington by the Smith machine of North Carolina, because he stood out here and would not bow the knee to the Al Smith Baal, they went down and tried hard to work up opposition to him. Let me tell Senators what happened in New Bern, N. C., the other day.

Mr. OVERMAN. Mr. President, will the Senator yield to me one moment?

Mr. HEFLIN. I yield.

Mr. OVERMAN. Is it not a fact that the testimony shows that every witness who testified before the investigating committee indorsed Senator SIMMONS, spoke of him in the highest terms, and that not one among those witnesses branded him in any way whatever?

Mr. HEFLIN. I have just read to the Senate what the New York Times said on the subject.

Mr. OVERMAN. I am not talking about the New York Times. I am talking about the witnesses about whom the Senator has been speaking, the same men the Senator says have received these bribes and who are against Senator SIMMONS; if they did not all indorse him and say they were for him and not fighting him.

Mr. HEFLIN. Yes; they indorse him before the Senate committee since they have been discovered and uncovered and are about to be defeated and whipped out next Saturday.

The situation is different altogether now. The Al Smith men who have attacked him will be through next Saturday. Senator SIMMONS is going to win. These men now see it. They feel the lash of the people's love for SIMMONS falling on their backs, and no wonder they are saying, "Oh, well, I don't have anything against Senator SIMMONS. Personally I am for him." But the paper says that the witnesses said that this opposition to him was there.

Mr. OVERMAN. Let us have the truth. Here is my friend the Senator from New Mexico [Mr. BRATTON], who was on the subcommittee that went to North Carolina and who heard these witnesses testify. I will ask him whether any witness slandered Senator SIMMONS or criticized Senator SIMMONS, and whether it is not a fact that they all indorsed him?

Mr. HEFLIN. I am not saying they criticized him before the committee. They told these newspaper boys, practically all the witnesses; that is what the paper says. It did not say they said it before the committee. They said one thing there and another thing to the newspapers.

Mr. BRATTON. Mr. President, will the Senator yield?

Mr. HEFLIN. I yield.

Mr. BRATTON. I want to answer the inquiry propounded by the junior Senator from North Carolina by saying that every witness who referred to Senator SIMMONS in any way spoke of him in the tenderest language and with the fondest expressions of fidelity and loyalty to his leadership of the Democratic Party through the years. Some of them went to the point of speaking with quivering lips in declaring their love for Senator SIMMONS.

Mr. HEFLIN. If they knew all that was coming to them Saturday their lips would have quivered more. [Laughter.]

Mr. BRATTON. I am confining myself to what was said before the committee. There was not the slightest evidence of any unfriendly feeling or lack of loyalty or confidence or abiding belief that Senator SIMMONS would continue to lead the Democratic Party in North Carolina in the future with faithfulness and fidelity, as he has in the past.

Mr. SIMMONS. Mr. President, will the Senator yield?

Mr. HEFLIN. I yield.

Mr. SIMMONS. I have never charged and do not now charge that the adherents of Governor Smith in my State are trying to injure or undermine me. I have not made that charge. What I have charged, and what I do charge, is that the Smith people, yes, Smith himself, and his New York followers are trying to retaliate against me because I have been singled out and falsely charged, as leading the opposition to Smith in the South, and as leading a battalion of death—they, thus, in retaliation against me, are trying to destroy me in North Carolina. It is not the people of North Carolina but these forces from without my State operating in my State that would undermine me.

Mr. HEFLIN. I am sure of that.

Mr. SIMMONS. I want to say to the Senate now that I have been approached by some of the best friends I have and asked not to speak of these things against Smith, especially not to expose his connection with Tammany Hall and Tammany Hall's connection with this campaign. I have said to them, "So far as that is concerned, it is far better that the Democratic Party of this country should know what Smith stands for, should know his environment and his connections in New York, before he is nominated, rather than have the story reserved to be told by the Republicans after he is nominated."

I said to them that the metropolitan newspapers of this country—illustrating with the Washington Post and the Washington Star, both strong Republican papers—in every issue of their papers of this morning, under the name of a man named Fox, whom I have heard denounced in the most bitter terms upon this floor, are boosting Smith's campaign—boosting it more than they are Hoover's campaign. I want to ask the Senator, before he completes his speech, to tell the country why it is that the Republican metropolitan papers of the country, including those published in the city of Washington, have been exhibiting so much anxiety about the nomination of Alfred E. Smith.

When I have been approached about this matter I have said that we have not elected a Democrat to the Presidency since the war who was not an anti-Tammany man. The country nominated Tilden because he stood like a rock wall against the methods of Tammany. The phrase in that day, "We love him because of the enemies he has made," had reference to Tilden's antagonism to Tammany Hall. Grover Cleveland was anathema to Tammany Hall. Wilson fought Tammany Hall at the time he was a candidate, and he fought it during his whole administration; and his Secretary of the Treasury fought Tammany Hall likewise.

Every Democrat that we have nominated and elected since the war has been an anti-Tammanyite. When in the convention of 1912 Champ Clark had polled in that convention more votes than are now credited to Smith, both pledged and claimed, William Jennings Bryan, the great tribune of the people, arose and exposed to that convention the fact that Tammany Hall and a like organization in Chicago were standing behind the candidacy of Mr. Clark. His house of cards tumbled and he was repudiated, and Wilson, an antagonist of Tammany Hall, was nominated.

Now, if anybody wants to know anything about Tammany Hall let him read a recent book just off the press, written by Mr. M. R. Werner, entitled "Tammany Hall." In that book Alfred E. Smith plays a conspicuous part in one of the most disgraceful episodes in the history of American Government. Read that book and ponder before being swept away with Smith.

Mr. HEFLIN. I have here a copy of it.

Mr. SIMMONS. I say I make these statements now rather than later against the advice of friends, because I believe it is my duty to the party to put the people on notice before this man is nominated, because I know that as soon as he is nominated the Republican papers which are now boosting him, which are now vaunting him, which are now praising him for his great virtues with their magazines filled with derogatory matter will open fire, will put all the power that lies in the great Republican propaganda agencies of the country upon his trail, and will expose every one of his derelictions and every one of the acts of his life that discredit him. It is better to know in advance before we nominate him than to wait until after he is nominated. The Republican press is already preparing slogans for their onslaught. One of them I am told is to be, "Shall we Tammanyize the White House?"

May I ask every reading man and woman to read and reflect on the letter by former Senator Robert L. Owen, as written on this subject and which appears on pages 9432 and 9433 of the CONGRESSIONAL RECORD of May 22, 1928?

Now, so far as my position is concerned, I have had friends come to me and ask me to restrain my opposition or rather to refrain and be silent, because they said that "Smith is sure to be nominated; he is a certain winner; he is a great vote getter," notwithstanding the fact that he has never been able to carry four counties out of the sixty-odd counties in the State of New York outside of New York City, "and will be certain to be elected."

I have answered that he would not be certain to be elected, that he was the weakest candidate in my judgment that we could nominate, that the Republican press would literally obliterate him if we nominated him. Would literally crush and destroy him if we nominated him; that the material exists and is in their hands and ready to be exploded the minute he is declared the Democratic nominee.

I have said that this is a conviction with me. I am conscientiously of the opinion that his nomination would mean the ruin of the Democratic Party in my State, the disruption of the Democratic Party in many States in the South. It would create a condition of chaos in the Democratic Party throughout the country from which we would not recover in 25 years. His nomination would entail the loss of Congressmen in my State, and loss of Senators and Congressmen in many other States. He is not supported by delegates from a single State that can be relied on to cast Democratic electoral votes.

I have said that, grateful as I am to the people of North Carolina for the honors they have conferred upon me—and they have showered on me honors for 40 years and never denied anything that I have asked of them—grateful as I am to them for this, and shall be to the end of my life, I would rather be stripped of all, stripped of my earthly possessions if they will but leave me the home in which I was born, the home of my ancestors since the Revolutionary War, than to see this man Smith nominated. I pity the weak man who can not assert his convictions in times like these, because of his fear of some possible danger to his political fortunes. I would rather give it all up and end it and retire to the quiet and the peace of a little country home than to retain it by the sacrifice of my honest and conscientious convictions upon public questions.

I conscientiously believe it to be my duty to the people who have for nearly 30 years honored me with a seat in this Chamber, and have made me one of the national committeemen of my party, to warn them against the appalling disaster which I think now menaces that party, both in the State and in the country at large.

I believe it to be my duty to stand for, and demand in behalf of the people I represent, a free and untrammeled opportunity to express their will with reference to the presidential nomination.

I have so far discharged and shall continue to discharge my duty as I see it, without fear, and regardless of consequences to myself.

Mr. HEFLIN. Mr. President, again I thank the able Senator from North Carolina. His speech has the right ring to it. By such as that and such as he this Republic has got to be preserved. Some men come into public life who in time fall for influences that are not good for the Republic. Sometimes, after being in service a long time, they drift into camps which they pretended to scorn in other days. A crisis is upon our party and upon the country, and the time for speaking plainly has arrived. The Senator from North Carolina has the right spirit. The man in public life who, when he comes face to face with an issue that means ruin to his party and ruin to his country, will not stand up and fight has no business in this body or in the other body or in any other public office. When we get to where we have to cringe and cower before the corrupt interests, it is time for a man or a party to get out of office or to be put out of power by the people.

The situation in North Carolina appeals to the Senator. He knows what is going on. The men down there who appeared and testified and professed, with trembling lips, their affection for the Senator that they are secretly trying to destroy, are not the best specimens of the manhood of that State. I would hate to have them as my only friends and followers. The fellow who would stab me with a dirk, and then stand with quivering lips and say, "I love you, I thought the loss of blood would help you, I am for you, affectionately for you, and I am devoted to you," is the most dangerous kind of man. They are talking that way now because they know what will happen to them. The people of North Carolina are resenting the betrayal of the party in the South when certain people have gone over and championed the Smith cause, and carrying on their strange doings day after day and night after night.

I do not wonder that the Senator from North Carolina feels so deeply on the subject. The things he has fought for since his youth time are imperiled. The ideas and ideals that he has stood for all his lifetime to this splendid hour in his great service are now threatened by a new order of things.

High ideals, the ideals that lifted North Carolina to the glorious position she now occupies, are now being assailed. It is said that they must come down and that the ideas and ideals of Tammany must be put up in their place, that we are ready to surrender the South, the Gibralter of the Democratic Party, and follow on our knees in the wake of the Tammany tiger, with Al Smith, the head of the Roman Catholic political machine, leading the march.

I want to propound a few interrogatories to this Mr. Webb, of Asheville. The Senator from New Mexico [Mr. BRATTON], who is on the committee, said they showed great respect. I am not talking about that. The newspaper writers who went there, who talked to Webb privately, got the impression that he was attacking Senator SIMMONS. They put it in their papers and heralded it all over the country. But on the witness stand they quailed, they spoke with trembling lips. That is frequently the case when we get the guilty in the presence of those who are interrogating them about their crimes; they frequently show their guilt and have trembling lips when talking about it.

Mr. President, I want the committee to go back to North Carolina. I want some more gentlemen questioned and two of those who have already been before the committee to testify again. I want to enlarge the committee also. I understand that one of the members of the committee is going to be on the Democratic campaign committee when the Senate adjourns.

If that is true I do not care whether it be Democrat or Republican, no Member ought to remain on this investigating committee, to investigate the corruption of a candidate who might be nominated, when he is at the same time trying to elect him by virtue of his membership on a political campaign committee. That ought not to be and it must not be.

I agree with the Senator from North Carolina [Mr. SIMMONS] that a trip to Raleigh of two or three hours to interrogate a few witnesses, and bidding them good bye and coming back, is not the way to investigate this very serious question. Senators, it is too big and too important. Senators may think that it will be easily brushed aside. It has not started good yet. The ball will roll, growing bigger and bigger, until election time. The people are going to demand the truth and the whole truth, and surely—surely the Democratic Party leadership held at the Capitol will not deny the truth.

Mr. BRATTON. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from New Mexico?

Mr. HEFLIN. I yield just for a statement, because I have no time to go into any lengthy discussion on matters not entirely pertinent.

Mr. BRATTON. The Senator suggests that the investigation of the committee was not complete and that the committee should return to North Carolina to complete the investigation. Obviously the committee ought not to incur the expense and spend the time unless it has some concrete suggestions to follow. The Senator from Alabama has been there three or four times. I want him to state now if he can furnish the committee anything definite with reference to the expenditure of money in North Carolina beyond what was developed during the session there day before yesterday?

Mr. HEFLIN. Mr. President, I hope the Senator will not permit himself to appear as defending the other side on this important question. He has been appointed as a prosecuting officer of the Senate. That is the way I look at it. He represents the whole people. He has been appointed to go out and investigate—to find testimony and tell us what is going on, and now he says they are waiting for me to find it for them.

Mr. BRATTON. Oh, no!

Mr. HEFLIN. The Senator can not wait on me to go out and find testimony for the committee. We thought the committee were going to hunt it up. I suggest to the Senator now to summon Mr. R. O. Miller, head of the civic league of the State of New York, from Albany, and ask him if he knows anything about a Democratic chairman from a Western State coming to New York and saying that he needed money, and that his desires were met to the extent of $25,000. Summon him and ask him that. I talked to him about it. He told me that he would come if he was summoned. He is a fine man; he is a

man of high character; he is a great moral and Christian leader in the United States.

But I have not any time to hunt up evidence for the Senator's committee. I told the Senator a while ago that these people said, "They have the money, they are spending it, but we can not catch them." The Senator from North Carolina [Mr. SIMMONS] himself said that they are spending money in large volume in North Carolina. That is the opinion of all the people he has talked to about it. I have not the time to go out and hunt up evidence for the committee. I hope the committee will get busy itself and show me, before the Senate adjourns, that it is after this question in dead earnest, trying to find out every crooked thing that is going on.

My God! I do not want the impression to get out that everything that can be done is not being done to find the facts in this grave and serious matter.

Mr. BRATTON. Mr. President, will the Senator yield further?

Mr. HEFLIN. I will yield to the Senator to ask a question or make a suggestion.

Mr. BRATTON. Which does the Senator want me to do, ask a question or make a suggestion?

Mr. HEFLIN. Either one; but do it quickly.

Mr. BRATTON. I did not ask the question a while ago to enter into any colloquy with the Senator. I asked it in the best of good humor in search of truth.

Mr. HEFLIN. But the Senator asked me, as I had been down there, to give him a concrete case.

Mr. BRATTON. No.

Mr. HEFLIN. Do you suppose these crooks would let me catch them? [Laughter.] I am the last man in the world they would like to have know the truth about their crookedness.

Mr. BRATTON. Mr. President, I simply want to assure the Senate that the committee is serious in its effort to discharge its duties under the resolution, and if there is more to be done in North Carolina the committee is certainly willing to do it. I asked the question with the hope of securing aid in discharging our duties under the resolution, and for no other purpose.

Mr. HEFLIN. I am giving the Senator aid to-day. I am going to do it every day that I can.

Mr. BRATTON. Very well.

Mr. HEFLIN. Because I want this thing fanned into a flame until the people will know the facts. A hundred thousand dollars for the Smith crowd in the 48 States! It comes nearer being ten million, as I have said before, and then palming that statement off on the people. They say that when Van Namee, Al Smith's champion and campaign manager, came down here and told the committee he had only received $103,000 in all, the Tammany tiger laughed that night until he was sick [laughter]; they said he laughed—and he has not been seen to laugh in a long time—he laughed until he was sick. One hundred thousand dollars for carrying on a campaign of publicity since 1924; books written, inspired by that group, sent over the country, given away; and yet they stand up here and swear that they have spent but $103,000 in the whole United States.

Mr. President, they are seeking to barter the Presidency of the United States. I do not want it sold to Hoover or to Smith; and they are not going to do it if I can help it.

Now, I want to ask Mr. Webb, of North Carolina, some questions.

Mr. WARREN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Wyoming?

Mr. HEFLIN. I yield for a question.

Mr. WARREN. I will ask the Senator if we may not go on with the appropriation bill very soon?

Mr. HEFLIN. We will get on to it now pretty soon. I am on it now.

Mr. WARREN. As the Senator knows, we have to recess at 6 o'clock this evening.

Mr. HEFLIN. I know we have to recess at 6 o'clock, but I shall be through long before that.

Mr. CURTIS. Mr. President, will not the Senator conclude his remarks so that we may get through with the bill by 6 o'clock? It is very important that the bill be passed?

Mr. HEFLIN. I do not know. I am opposed to some of the items in the bill. I have not yet come to them.

Mr. CURTIS. But the Senator can discuss them when they are reached in the consideration of the bill.

Mr. HEFLIN. Mr. President, I am anxious to get through with the business of the session, but I am not going to neglect these big questions for the temporary expediency of any local situation. It means more to the people who are living now and those who are to come after us when we are gone that this Government be kept clean than it does to pass this bill, which carries a million or two million dollars for keeping the marines in Nicaragua to hold Diaz, a Roman Catholic, in the office of president by the force of arms from the United States.

I ask Mr. Webb, of Asheville, N. C., "Mr. Webb, do you run a newspaper? Do you keep up with the CONGRESSIONAL RECORD? Did you read where I brought to the attention of the Senate from the Washington Post an editorial condemning Governor Smith's campaign managers for permitting Tremaine, one of his appointees, a State officer of New York, to go down into Virginia and make a speech threatening the Democrats of the South if they failed to fall in line to support Governor Smith for the nomination for the Presidency?"

"Mr. Webb, you used to claim to be a pretty true southerner. What has now caused you to fail to speak out against that brutal and contemptible threat against the South? The South and her statesmanship; her newspapers in the past have always resented such things, but when the Al Smith crowd that you are with, the candidate you are supporting through his side partner in the State government, a member of his cabinet, Tremaine, the comptroller of the State, who goes down to Virginia and tells the people in a speech that if the South does not support Smith for the nomination for President the Smith bunch will punish the South by withholding from her the passage of meritorious measures because the southern Democrats would not vote for Smith for the nomination for the Presidency. Mr. Webb, why have you not cried out against that situation? Why have you remained silent during all this time? Why do you continue to support Smith when he has never repudiated that speech and that threat against the southern people? I charge that that speech was made with his knowledge and consent.

"In the face of these things why do you still support Governor Smith?

"Mr. Webb, you know something about immigration. Governor Smith is for open doors and unrestricted immigration. Do you know that the immigration law is violated to-day in New York City more than in any other port in the United States; more foreigners are being smuggled into New York, more Roman Catholics slipped in in Governor Smith's State than in any other place in the country, where he as governor of the State, and Mr. Walker as mayor of the city, have full control. That law is violated as it is violated nowhere else in the Union. Mr. Webb, are you for restricted immigration? Would you protect and preserve America in her integrity? Do you want to turn over America and have an influx of unfit foreigners to come in here and swamp this country and control it and, as Jefferson said, Europeanize our American institutions?" Answer those questions, Mr. Webb.

"Mr. Webb, the New York World—and Governor Smith does not deny it—has put him down as favoring social equality. Mr. Webb, you are running a newspaper in a white community in North Carolina, in one of the greatest States in the Union, and the white people are supporting your paper; do you favor social equality, Mr. Webb? Will you continue to support a man as candidate for President who, as Governor of New York, sanctions social equality?

"Mr. Webb, what would you do if a Republican candidate for President should announce, or his friends should announce, that he stood for social equality? You would assail him in your paper, would you not? You would say he is the most dangerous man that could be put in the White House, would you not? Now, tell me and tell the country, you who grew so indignant at the insinuation that you had received money from the Smith forces, what is it, Mr. Webb, that is causing you to continue to support Governor Smith when you know that he, a candidate for President, stands for social equality.

"What is it, Mr. Webb, that is making you continue to support him, when you know that he stands for social equality, when his friends declare it and he does not deny it? Why do you, in the face of these facts, continue to support him, Mr. Webb? Are you faithful to the people who support your paper in North Carolina? Are you faithful to the State in which you live? Are you faithful to the white race in the South and all over America?

"What else? Mr. Webb, I read in the Senate an article from the Manufacturers Record, known and respected the country over, published by Richard H. Edmonds, of Baltimore. In that article he sets out that in New York City under Tammany rule they run open dance halls in New York City, where Mr. Walker, a Tammanyite, is mayor, and where Governor Smith lives and in the State where he is governor—they run open dance halls where negro men dance with white women and white men with negro women, and the Manufacturers Record said some of the conduct was so indecent on the dance floor that he would not publish the details. Think of that, Mr. Webb.

"Now, Mr. Webb, you used to claim to be for decency and order, clean society, and white supremacy; Governor Smith does not deny this; it has been charged on the floor of the Senate; the Manufacturers article was read two weeks ago, and he has not denied it as yet, and he can not deny it. Are you still supporting him, Mr. Webb? If you are still supporting him—a man who sanctions these things—if you are supporting a man who belongs to Tammany, an organization that Wilson condemned as strongly as he knew how, if you are supporting a Constitution nullifier, if you are supporting a wringing 'wet' who would bring the barrooms back to mix up liquor with gasoline, with the negro problem of the South, tell the North Carolina white men and women why you are still supporting him, Mr. Webb. In view of that, in view of his position on social equality, and on the dance halls in New York, are you still supporting him, Mr. Webb? What is it, Mr. Webb, that makes you turn your back upon the people who support your paper and made you financially what you are?

"What is it that will cause you to attack and slander a southern Senator in your paper when he came to your town and told the truth and challenged anybody to refute anything he said, and they have not done it to this day? What excuse can you give, Mr. Webb? Explain these things before you talk about me, and let the people of North Carolina know why you in spite of all these things still support Governor Smith—Mr. Webb the burden of proof is on you."

The man whom I want summoned next is Rev. O. R. Miller, State superintendent of the New York Civic League. He lives at 452 Broadway, Albany, N. Y. I will get up all the evidence that I can for you. It works me mighty hard. I would have been on the committee, perhaps, if the resolution creating it had not passed the Senate the day I was in North Carolina. I do not know why the hurry was so great on that day. I had the resolution written and on my desk for two weeks, and was just waiting. I had been telling Senators in speeches for four or five weeks that we ought to adopt it so we worked the sentiment up to the point where we could adopt it. If we had passed it at that time, I would have been on the committee, but they did not want me on it. And so while I was away, the resolution went through one day. I wish I had been on the committee; I would have had the authority then to call them in. It works a hardship on me now to have to hunt up evidence.

I have talked with the Senator from Oregon [Mr. STEIWER]. He has given me some valuable suggestions, and let me read over the notes of his hearings, as I have a right to do. He seems very much interested in it, and I believe he wants to do all he can.

I think that will be the situation with the committee in the main. I hope it will, because I am not going to spare anything touching this question. I would criticise my brother if he were on the committee if I did not think he was going to it, and going to it in earnest. The people know very well about how and in what spirit we do these things, whether we are much in earnest or not. The Bible says, "By their fruits ye shall know them." A man must prove his faith by his works. He can not be for these things whole-heartedly without getting worked up and enthusiastic over them.

In conclusion—I am only going to speak a few moments—I want to give the country warning again about the danger that threatens not only the Democratic Party but the Republic. I hold in my hand a Roman Catholic periodical called America. Here is an article published in this paper by Charles J. Mullaly, a Roman Catholic and a Jesuit priest entitled "Does it pay editors to insult Catholics?"

Senators, that is the most startling document that I have seen in the mail. It is the boldest and most brazen pronouncement against a free press, and announcing a program of coercion and intimidation, that I have ever seen before. This article was sent to a number of Senators. It was sent to me by some Roman Catholics, probably a dozen and a half copies, some of them from Buffalo. They wanted to be sure that I got it. They wanted to educate me up to fear them. Here it is. You can see the title: "America, a Catholic Review of the Week."

I had this printed in the RECORD. I am not going to read all of it. I am going to tell you the story.

They themselves cite here a case where, in 1913, a Roman Catholic girl in what they call a Good Shepherd Home here in Washington undertook to escape. She tied dresses together to make a rope down which she could swing in order to escape from that institution. She fell, and the fall killed her. People in the city were startled next day to learn that she had died out there in this fashion. It was quite natural that a humane man or a humane woman would inquire how this girl came to lose her life. I take it that human beings are still interested in such things, and that they will be for a long time to come, and that they would naturally inquire how this girl came to lose her life, and what the trouble was.

One of the newspapers of Washington—it must have been the Star—wrote stories about it, and urged that an investigation should be made to inquire into the death of this girl. Why should they not do that? Why should not all of Washington have been aroused? If there is an institution where a thing of that kind could or did happen—a Protestant institution, a Jewish institution, or a Catholic institution—why should it not be investigated? Where are we—in Spain, in Italy, or in the United States?

The American spirit in Washington demanded an investigation: "Go and look into this institution. It is not above the jurisdiction of the United States. A human being has lost her life. She is dead, trying to escape from that institution. What is it that would make that girl take this leap in order to get away?" People who were interested said, "Let us investigate"; and they wrote articles, and they were printed in this paper—the Star, I think; one of the Washington papers—and then people wrote back indorsing the call for an investigation: "Why not investigate?"

What do you suppose happened? The Catholics here organized. They sent the word out to punish that newspaper, the priest from his pulpit; they wrote letters around to the members; they put women to work going about whispering to others, to do what?

To boycott the paper that asked for an investigation of the death of a girl, a child of God, who lost her life in her 'teens trying to get away from that institution, to get home to her parents, dead on the sidewalk; and the people outside and the paper wanted an investigation made.

Why did not the Catholic authorities want it made? Why did they not say, "Come and investigate. The institution is open. There is nothing here to hide. Come and make your investigation?"

But what did they do? They made that paper feel the power and sting of Rome. They organized; they went after it; and what happened? They boycotted it. What do you think they did? Here is what they said:

I do not know what kind of Catholics each of you may be, but as for me, I will fight insults to Holy Mother Church. I do not know what you will do, but I will fling any offending newspaper from my house and I will never buy it again.

The effect was magical. A news stand opposite one church had 400 copies for sale. At nightfall the 400 copies were still untouched. In every part of the city it was the same story. Catholics refused to buy the paper. As the days passed, even the newsboys refused to handle it.

In a large parish, on the Sunday after the pastor had spoken to his people, one of the parishioners who had been away from the city for several weeks and had returned only that morning, called a newsboy and requested the paper. The little fellow looked at the would-be purchaser first in surprise and then with withering scorn:

"Mister, don't you know we won't sell that sheet around here?"

At the same time the officers of the Washington Truth Society (Catholics) privately interviewed priests in charge of young ladies' sodalities in the various parishes of the city. They knew that women are more active workers than men in matters of this kind, provided they have leadership. As a result, letters began to pour in to the business manager, pledging the writers never to buy his paper again. These young ladies persuaded friends to do the same, and these, in turn, spoke to their friends.

Listen to this, Senators:

The business office of this newspaper admitted the loss of 40 per cent of its circulation in two weeks. The counterattack did not stop here. An even more tender spot was hit.

Members of the society interviewed merchants who advertised in the paper and suggested that they demand an immediate change of editorial policy if they hoped to keep Catholic trade. No intimation of boycott was given, but these business men understood perfectly well that the paper was supported by their advertising, and they hastened to show sympathy for their insulted Catholic patrons. In one instance an advertiser who daily used a page and a half immediately cut his space, with the warning to the business office that if any more insults were published against his Catholic customers he would withdraw all advertising.

Mr. President, let me again ask what are we coming to in the United States of America? Here is a power in our midst that will suppress the truth at any cost. Here is a power in our midst that would deny a Protestant or Jewish newspaper the right to tell the truth about a strange death occurring in the community. Here is a power in our midst that uses the pulpit in the Catholic Church, the Truth Society, to spread its poison, to reach not only the newspapers and cause people to stop

buying the papers at the news stands but to go to the merchant who sells to all—Jew and Gentile, Protestant and Catholic, white and black—and hold him up and say, "If you do not write this paper and make it promise never again to publish the truth about the Catholics, we will quit trading with you." That is the forerunner of what may be.

Do you want to turn this Government over to Governor Smith and his régime? Do you want to foster and establish here such a spirit as that? Do you want to put that power in control of Al Smith and his bunch? I am talking to you about the vital life of this Nation. If you destroy a free press, you have gone a long way toward destroying free institutions in America.

Jefferson said, "When the press is free, and all men and women can read, the country will be safe." Now, they can read, and here is an effort to keep the truth from getting to them. Here is a case where a girl lost her life trying to escape from a Catholic institution; and because a Protestant paper protested against this situation and insisted on an investigation, they rise up and they severely punish that paper.

Listen to what happened to the paper.

I read from the article:

The lesson was a lasting one. This was shown several years later. One of the other Washington papers had changed its editor. This new editor requested the vice president of the Washington Truth Society (Roman Catholic) kindly to give him the history of the whole affair.

"I do not mind telling you," he said, "that the owners of the paper have warned me not to publish anything that might be considered objectionable by you. They believe it does not pay to insult Catholics."

My God! I tremble at the approach of such a power upon the Capitol of the Nation. They wrote that and printed it in this periodical and mailed it to Members of Congress, and saw to it that I got at least a dozen or a dozen and a half copies; and some of them were sent to me by Catholics from Buffalo, N. Y.

Senators, are you going to permit this thing to steal upon the American people without serious protest and earnest opposition?

Listen. Just a word or two more and I am through.

A few weeks ago Senator NYE, of North Dakota, made some remarks about Governor Smith appointing Sinclair, the oil king—who buys his way out of court, laughs at the statutes, and defies the Senate of the United States—on the race commission of New York State.

Senator NYE got after him about appointing this man in his administration and referred to a letter that he received from a man named White, who worked on a newspaper in New York, the Herald-Tribune. What do you suppose happened to that newspaper man who was trying to be of service to the Senate and the country? He was discharged. He lost his job. He had held it for years. He was a faithful newspaper man. He crossed the Roman path. He assailed Governor Smith. He pointed out facts. He lost his job under this relentless power that they employed up there, the same kind of cruel power employed on that paper here in Washington. He lost his job.

In conclusion, listen to this. A man by the name of Broun—Heywood Broun—a brilliant writer, who had been an editorial writer for years on the New York World, I am told, made a statement to the effect that New York needed a daily paper that dared to speak the truth and would tell the truth on any denomination and all of them. He is right. But what happened to him? He lost his job. The New York World put him out because he dared to make that statement, and the statement is the truth. Listen to what he said after he went out. This will go in the RECORD, and I hope be preserved for all time to come.

And still more precarious is the position of the New York newspaper man who ventures any criticism of the Catholic Church. There is not a single New York editor who does not live in mortal terror of the power of this group. It is not a case of numbers, but organization.

I leave this matter with you, Senators, with that dreadful indictment of this newspaper man of New York. You see what the Roman machine has done for an American free press in New York where Catholics control. Do you want that control extended all over the United States? I take it that the paper here intimidated is the Washington Star, because the Star to-day is the handy instrument of the Romanists of Washington. It has a Romanist editor, I understand. Let me tell you what happened here with it not long ago. I want the people of Washington to know, and if the Protestants and the Jews have any courage left, let them know that the Catholics, inclined to do so, can not control the press at the Capital.

Not long ago Miss Eva Moss, an ex-nun, who tells a fearful story about how she was punished trying to escape from the Good Shepherd's Home and broke her ankle jumping off a high wall, and how she was taken back and put into a dark room each day and kept for so many hours, spoke over in Virginia, and a Knight of Columbus had her arrested. A Virginia court tried her and acquitted her. She came here, and the people insisted on her speaking in this city. They rented the Washington Auditorium. She came up with her husband, and invited me to come down and hear her address. I said, "I will be glad to hear it." They went down to the Star with an advertisement, saying just this:

Miss Eva Moss, an ex-nun, will speak to-night at the Washington Auditorium. Senator HEFLIN will be there. Will you?

That is all there was to it. They went down to see the Star people, and those people looked it over and called in everybody in the building, talked it over, and discussed it, and finally one of them said, "Yes, take it; that is just an advertisement giving notice about a speaking." They said, "All right, we will take it."

They paid them $43, and went their way. In two or three hours the officials of the paper called them back over the phone and told them that the priests and the Knights of Columbus were raising so much Cain that they would not be allowed to print the advertisement, and they must come and get their money back. That happened right here in this city of Washington. God deliver us from the further encroachment of this spirit. Prepare the people to combat it. I am not fighting the Catholic's right to worship. I want him to worship as he chooses and work out his own salvation, but when he comes with his Roman encroachments upon American institutions, I dare to fight him in this body and elsewhere.

Senators, we have come to the parting of the ways. We are either going to back off and yield to these things or we are going to stop them where they are. If I am doing anything contrary to the genius of American institutions, and you will show me that I am, I will stop it. If they are doing things contrary to these institutions and the American standard, they ought to stop them. They must stop them. They shall stop them.

Mr. President, the people of the United States are a patient and long-suffering people, but they have a right, and it is their duty, to stand for their rights, the rights of their children, the rights of those who are to come after them; but, strange to say, whenever a man stands up and contends for American rights and principles some feeble-minded, weak-kneed, spineless Protestant gets up and says, "I don't believe in intolerance," and the Catholic priests applaud him, just as that hickory-nut-headed Roman Catholic tried to applaud condemning me a while ago. When a man stands up and exposes a wrong and points the right way, they have a Protestant, so called, to get up and lecture and say, "I want you people to be more tolerant," and the Catholics sit up and cheer him, and when they get off they laugh about it and nudge each other. I will say this of that sort of a Protestant, that you would not have to knock his brains out with a club; you could pinch them out with your fingers. [Laughter.] He is a misfit in the universe and a stumbling block to Americanism. He is blind and does not know it. He has eyes to see, perhaps, and sees not; ears to hear, and hears not.

Let us to-day reconsecrate ourselves to the highest and best interests of our common country. Let us treat the Catholic right, and let him know that so far shall he come toward American ideals and institutions with Romanism and no farther. We are going to preserve these institutions and preserve them at any cost.

If the Catholic wants to get along well here, let him change his conduct in certain things; do right, worship as he chooses, but he can not control America and set up a Catholic state, or fly a Catholic flag above the American flag. We are not going to submit to it. Wake up, Americans! God help North Carolina to do her duty next Saturday. Unless all signs fail, she will beat Governor Smith from 5 to 8 to 1 in that State. The people are aroused now because the primary was repealed on them in the closing days of the legislature last year without a minute's warning, and then when the little giant from North Carolina, Senator SIMMONS—that is what they call him, and a giant he is; they love him devotedly—when he asked them to provide a way for letting the people, who had to come to the polls anyhow the 2d of June, to express their preference, their choice for President, and the committee by about 60 to 30 decided that they would not do it, stirred the Democrats greatly. Now the people are saying, "Is Tammany and the Roman machine going to be allowed to come down here and run this State? SIMMONS is right and we are with him."

When I closed my speech at New Bern I said: "The Senator from North Carolina expects you to hold the line. Your sister States in the South, who have the same issues that you have, expect you to hold the line. The women and children of the

South, who know what social equality would bring, expect you to hold the line. Those who want to see American ideals and institutions preserved are looking to you to hold the line. Those who would hold this Government true to its American form expect you to hold the line. I want all of you who want me to take the word back to Senator SIMMONS that you will held the line against Al Smith next Saturday to stand up." Everybody stood up except one Catholic priest and three others. The great audience stood as if they were receiving a benediction in church. The priest was already standing—there were three or four hundred standing who were unable to get seats—and when I put that question he dropped down in a chair made vacant by another who stood up. He was so anxious to make his protest he would not stand up against Alfred the Romanist. He wanted to be listed on the other side. But those people stood up, and I brought the message to the able Senator from North Carolina.

God help the South when his kind dies out, and God help America when his kind fails to come to this body. God pity the country when we grow up a statesmanship that will barter itself and follow where the money bags are, and betray the best interests of the country, and surrender all that is sacred and dear in order to drift with those from whom they think they might gain power and take care of them and theirs in a political way.

Senators, I felt that it was my duty to bring this matter to your attention. I wanted you especially to know about what is going on in North Carolina and about this Catholic attack upon the press. I have an article here from business men assailing this Catholic article, which I will bring to your attention in a few days.

I have no feeling of prejudice against anybody's religion. I am willing for everyone to worship as he chooses. I do not want that right of mine and of those who are dear to me who are to come after me ever disturbed. I want every American to worship as he chooses, and I do not want the Pope of Rome ruling this Government from the Vatican. He is not going to do it if I can help it. He has diplomatic connections with nearly every country on earth, and if Alfred Smith were made President, he would have a secret diplomat at the White House as sure as you live and I live and God reigns.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed without amendment the bill (S. 3620) granting certain land to the congregation of St. Joseph's Roman Catholic Church, in the parish of East Baton Rouge, La.

The message also announced that the House had agreed severally to the amendment of the Senate to each of the following bills:

H. R. 1951. An act granting six months' pay to Frank A. Grab;

H. R. 2657. An act for the relief of Thomas Huggins;

H. R. 5897. An act for the relief of Mary McCormick;

H. R. 6908. An act for the relief of Michael Ilitz; and

H. R. 11978. An act granting six months' pay to Alexander Gingras, father of Louis W. Gingras, deceased private, United States Marine Corps, in active service.

The message further announced that the House insisted upon its disagreement to the amendments of the Senate to the bill (H. R. 12030) to amend Title II of an act approved February 28, 1925 (43 Stat. L. 1066, U. S. C., title 39), regulating postal rates, and for other purposes; agreed to the further conference requested by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. GRIEST, Mr. RAMSEYER, and Mr. BELL were appointed managers on the part of the House at the conference.

ENROLLED JOINT RESOLUTION SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled joint resolution (S. J. Res. 23) providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779, and it was signed by the Vice President.

GEORGE ROGERS CLARK SESQUICENTENNIAL COMMISSION (S. DOC. NO. 143)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation for the George Rogers Clark Sesquicentennial Commission amounting to $200,000, fiscal year 1929, to remain available until expended, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

MOUNT VERNON MEMORIAL HIGHWAY (S. DOC. NO. 149)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation amounting to $2,500,000 for the Department of Agriculture, fiscal year 1929, to enable the Secretary of Agriculture to carry into effect the provisions of the act entitled "An act to authorize and direct the survey, construction, and maintenance of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge across the Potomac River at Washington," approved May 23, 1928, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

HOSPITAL FACILITIES, VETERANS' BUREAU (S. DOC. NO. 151)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation for the United States Veterans' Bureau, fiscal year 1928, amounting to $7,000,000, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

FOREIGN MAIL TRANSPORTATION (S. DOC. NO. 150)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation for the Post Office Department, fiscal year 1929, amounting to $7,500,000, for foreign mail transportation, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

SURVEY FOR A NICARAGUAN CANAL (S. DOC. NO. 145)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States transmitting an estimate of appropriation for the War Department, fiscal year 1928, to remain available until expended, for investigation and survey for a Nicaraguan Canal, amounting to $150,000, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

CONSTRUCTION LOAN FUND, SHIPPING BOARD (S. DOC. NO. 146)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States transmitting a draft of proposed legislation relating to the United States Shipping Board in connection with obligations that may be entered into by the board for loans to be made from the construction loan fund, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

WOOL STANDARDS, BUREAU OF AGRICULTURAL ECONOMICS (S. DOC. NO. 148)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation to carry into effect the provisions of the act entitled "An act to authorize the appropriation for use by the Secretary of Agriculture of certain funds for wool standards, and for other purposes," approved May 17, 1928, amounting to $50,000, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

COOPERATIVE AGRICULTURAL EXTENSION WORK (S. DOC. NO. 144)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation amounting to $980,000, for the Department of Agriculture, fiscal year 1929, for cooperative agricultural extension work, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

PAVING OF RINGGOLD ROAD, GEORGIA (S. DOC. NO. 147)

The PRESIDENT pro tempore laid before the Senate a communication from the President of the United States transmitting a supplemental estimate of appropriation for the War Department, fiscal year, 1928, for paving and improving the Government road known as the Ringgold Road, Georgia, amounting to $117,000, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

LANDS ON THE FORT PECK INDIAN RESERVATION, MONT.

The PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S.

3593) to authorize the leasing or sale of lands reserved for agency, schools, and other purposes on the Fort Peck Indian Reservation, Mont., which was, on page 2, to strike out all after the name "Indians," in line 9, down to and including the word "purposes," in line 11.

Mr. WHEELER. I move that the amendment of the House be concurred in.

The motion was agreed to.

PROTECTION OF FISH IN THE DISTRICT

The PRESIDENT pro tempore laid before the Senate the request of the House of Representatives for the return to the House of the bill (S. 2972) for the further protection of fish in the District of Columbia, and for other purposes.

Mr. CAPPER. I move that the request of the House of Representatives be complied with.

The motion was agreed to.

PETITION

Mr. COPELAND presented a petition of sundry citizens of the State of New Mexico, praying for the passage of legislation requiring that the finger and foot prints of mother and child be taken at birth on joined cards, the identification of persons injured, lost, or otherwise unmarked, and also requiring that every alien and traveler carry an identification card with his own fingerprints thereon, etc., which was referred to the Committee on Education and Labor.

REPORTS OF COMMITTEES

Mr. REED of Pennsylvania, from the Committee on Military Affairs, to which was referred the bill (H. R. 11981) to authorize officers of the Medical Corps to account certain service in computing their rights for retirement, and for other purposes, reported it without amendment and submitted a report (No. 1269) thereon.

Mr. BORAH, from the Committee on Foreign Relations, to which was referred the bill (H. R. 10166) to amend the Foreign Service buildings act, 1926, reported it without amendment.

Mr. MOSES, from the Committee on Foreign Relations, to which was referred the joint resolution (S. J. Res. 161) authorizing the President to invite representatives of foreign governments to attend an international aeronautical conference on civil aeronautics in Washington on December 12, 13, and 14, 1928, reported it without amendment and submitted a report (No. 1271) thereon.

Mr. BLACK, from the Committee on Military Affairs, to which was referred the bill (H. R. 6432) for the relief of James E. Moyer, reported it without amendment and submitted a report (No. 1272) thereon.

Mr. SACKETT, from the Committee on Commerce, to which was referred the bill (H. R. 13512) to amend the act entitled "An act to create the Inland Waterways Corporation for the purpose of carrying out the mandate and purpose of Congress, as expressed in sections 201 and 500 of the transportation act, and for other purposes," approved June 3, 1924, reported it with amendments and submitted a report (No. 1273) thereon.

Mr. SMITH, from the Committee on Agriculture and Forestry, to which was referred the bill (S. 4411) to amend the United States cotton futures act, approved August 11, 1916, as amended, by providing for the delivery of cotton tendered on futures contracts at certain designated spot-cotton markets, by defining and prohibiting manipulation, by providing for the designation of cotton-futures exchanges, and for other purposes, reported it with amendments.

Mr. BORAH. As in executive session, from the Committee on Foreign Relations, I submit three different reports for the Executive Calendar.

The VICE PRESIDENT. The reports will be placed on the Executive Calendar.

MEMORIAL FOR WINNING OF OREGON COUNTRY

Mr. FESS, from the Committee on the Library, to which was referred the joint resolution (S. J. Res. 102) authorizing the erection of a memorial building to commemorate the winning of the Oregon country for the United States, reported it with amendments.

Mr. McNARY subsequently said: Mr. President, during the afternoon the Senate Committee on the Library made a favorable report on a joint resolution authorizing the erection at the little town of Champoeg, Oreg., of a memorial to commemorate the winning of the Oregon country.

I have in my possession an unusually able article covering this important history, prepared by Hon. Peter H. D'Arcy, of Salem, Oreg. I ask unanimous consent that it may be incorporated in the RECORD immediately following the report of the Committee on the Library.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter referred to is as follows:

HISTORICAL REVIEW, CHAMPOEG, THE PLYMOUTH ROCK OF THE NORTHWEST

By Peter H. D'Arcy

Champoeg, the Plymouth Rock of the Northwest. What romance, trials, and vicissitudes surround this historic spot! What grandeur in contemplating the heroic conduct and sturdy patriotism of the pioneers of the Oregon country!

From 1830 to 1843 Champoeg was the important settlement of the Oregon country.

The Oregon country consisted of the States of Washington, Idaho, and parts of Wyoming and Montana west of the Rocky Mountains, and Oregon. A vast empire of territory.

President Jefferson, with a vision looking into the future, secured the Louisiana Purchase and in furthering the idea of what was necessary for the welfare of the United States, procured the services of Lewis and Clark to explore the region of our Nation west from Missouri to the Pacific Ocean. This exploration was one of the reasons why the United States claimed the Oregon country.

In reading the history of the world, one is greatly impressed with the migration westward. The exodus of the Israelites from Egypt to the land of promise, the eruption of the hordes of the north, the Goths, the Huns, and the Vandals, who overran the Roman Empire, the invasion of England by the Normans, the landing of the Pilgrim Fathers at Plymouth Rock, the settlement of Virginia and Maryland and what was known as the Western Reserve—Kentucky, Mississippi, Missouri—and what was particularly denominated the Southern States, the migration to the Pacific coast from the Atlantic seaboard, and from the valleys of the Ohio, Mississippi, and Missouri Rivers, form some of the great epochs in the world's history. In the migration to Oregon and the Northwest there is a romance of enterprise, endeavor, patriotism, adventure, and ambition illustrating the genius and pluck of the American people.

Those who came to Oregon as pioneers were composed of every class of people, almost all nationalities and religious belief. They came from what was known at that time as the Eastern, Middle Western, and Southern States; from Virginia and Maryland; from the Alleghenies; from the blue and green hills and vales of Kentucky and Tennessee. The history of the world does not furnish anything to equal the dangers, uncertainties, and toil which surrounded the early pioneers to Oregon, except the landing of the Pilgrim Fathers at Plymouth Rock, and those who settled in the pathless wilds of what was in early days termed the Eastern, Middle, Western, and Southern States of this continent. The migration of the Israelites from Egypt to the land of Canaan was not like the early migration to this country. They traveled but one-tenth of the distance the pioneers did. It took 40 years to travel to their destination. They were undergoing a pilgrimage in order that they might be capable of self-government at the end of their journey. It was a state of evolution with them. Our pioneers were capable of self-government, intelligent, self-restrained men; had all the characteristics and qualifications of men capable of forming the best kind of a government.

The migration of the Goths, the Vandals, and the Huns, the invasion of England by the Normans were of a different character from that of the settlement of the Oregon country. The Normans, it is true, brought civilization, such as it was, to England, and Norman blood and customs had a beneficent effect upon the English people. With the exception of the Normans, these people were rude and uncultured barbarians. They were all warlike and fierce races, who carried everything before them by the prowess of their arms.

Such was not the case with our pioneers. While they were ready, willing, and able to defend themselves, and families, they were actuated by a spirit of peace. Descended from hardy and sturdy races, they had all the elements that make a good and strong government. They were animated by the same spirit which prompted the Pilgrim Fathers to land upon the inhospitable shores of the Atlantic Ocean, the cavaliers in Virginia, the burghers in New Amsterdam (New York), the Quakers in Pennsylvania, the Catholics in Maryland, the Huguenots in South Carolina.

It is proper briefly to refer to the claim of the United States to the Oregon country. At the time the early emigrants came to the Oregon country they found an organization known as the Hudson Bay Co. strongly intrenched and assuming to govern and direct the destinies of the Northwest. Its principal business was hunting, fishing, and trafficking in pelts of wild animals. The Hudson Bay Co. was constituted by royal charter given by Charles II on the 16th of May, 1670. At the time of the early settlement of the Oregon country, this company assumed a sovereignty over the Pacific Northwest second only to that of the King of England. It had become enormously rich, and was filled with the arrogance and power that riches sometimes brings. It had absorbed all the other fur-trading companies, which had undertaken to do business in the Northwest, and was in control. The chief factor and head of this powerful organization was Dr. John McLoughlin, who was a remarkable man in every way; intelligent and able. If his lot had been cast in a civilized community, he would have filled conspicuous positions of trust and honor. His di-

plomacy and honesty of purpose were constantly called on in dealing with the rights of the company. He had a high sense of honor, and his integrity was beyond question. He took care of, fed, and clothed the destitute immigrants after their long trip across the plains.

The claim on the part of the United States to the Oregon country was based on, first, our claim by right of discovery; second, early settlements in the Oregon country; third, the Louisiana Purchase (contiguous territory); fourth, the Spanish treaty of 1819.

The discovery of the mouth of the Columbia River by Capt. Robert Gray on the 11th day of May, 1792, was one of the real and just bases of our claims to the Oregon country. It was explored from its head to the mouth of this river by Lewis and Clark in 1805. A settlement of Americans was begun at Oak Point in 1809; a fur-trading fort was built by Americans on Snake River in 1810, and Astoria was founded by John Jacob Astor in 1811; was captured by the English in 1813 and restored to the United States in 1818, thereby acknowledging the right of this country to this territory. Finally, by agreement between England and America, the forty-ninth parallel as far west as the Rocky Mountains became the border line. It was claimed by reason of the Louisiana Purchase (1803) that the contiguous territory belonged to the United States, and in the treaty with Spain in 1819 we became the owners of the Oregon country, particularly when Spain was afterwards limited on the north to 54 degrees and 40 minutes.

From 1818 to 1828, by treaty, the United States and England occupied the Oregon country by what was known as "joint occupancy," and this joint occupancy was continued until the 15th of June, 1846, when the disputed boundary line was finally adjusted. From 1818 up to 1843 "joint occupancy" was the law, so far as Oregon was concerned, but "English occupancy" was the fact.

The immigrants from 1838 to 1843 had petitioned and memorialized Congress and the Government at Washington to assume some control of the Oregon country, but their cry for help and protection was not listened to. The country during this period was engaged in a struggle that afterwards culminated in the Civil War. The contest over the question of slavery was so strenuous that the Oregon question was overlooked except so far as it might assist in or interfere with this system. Even at this early period of our history the slavery question entered into all matters in the acquiring of new territory. The Oregon country, in spite of the representations that it was a splendid section for settlers, was not kindly considered to be acquired by the United States. Among the few friends that Oregon had in this struggle were Senators Benton and Linn. They comprehended the worth of this section of the United States and fought manfully to secure the assistance of the Government in behalf of the people of the Oregon country.

While the people of the Oregon country had frequently endeavored to bring about some kind of government for themselves, having had meetings known as "Wolf meetings" off and on from 1841 to 1843, no serious action was taken until the 2d of February, 1843. On the first Monday of March, 1843, a committee of 12 was appointed to take into consideration the protection from beasts of prey, such as bears, panthers, wolves, etc., and "consider measures for the civil and military protection of this colony." This committee was to report on the 2d of May, 1843, at Champoeg. On the 2d of May the committee of 12 reported in favor of a provisional government, and the organization of the people so that they would be governed by the laws of the United States, and that this provisional government should owe its allegiance to this Nation.

On the 2d day of May the settlers met in mass meeting. The committee, among other thing, reported in favor of a permanent civil and political organization until such times as the United States should establish a Territorial government. One hundred and two pioneers were present on this occasion. Joseph L. Meek, the famous mountaineer, trapper, and hunter at this meeting cried out in a loud and ringing voice: "Who's for a divide?" and added: "All for a report of the committee and an organization follow me." Upon a count of the persons present it was found that 52 of them voted in favor of the report and 50 in opposition. Thus was organized the first American government west of the Rocky Mountains, and in consequence thereof the whole Oregon country was saved to the United States, and each of the States carved out of this section has been added to the bright constellation of stars which compose our glorious banner and signifies that they have become a part of our great country, owing allegiance to this Republic and proud of its development and growth. This meeting of the pioneers of the Oregon country forms an important event in the history of pioneer days. The provisional government thus adopted lasted from May 2, 1843, until August 14, 1848, when the Territorial government was extended over the people. From August 14, 1848, to February 14, 1859, Oregon remained a Territory, at which latter date it was admitted into the Union as a State. The organization of the provisional government in May, 1843, gave additional impetus to the friends of the Oregon country, who were desirous of securing it to the United States, also by reason thereof the United States acquired the annexation of Texas in 1845, the ceding of Mexico in 1848 of the large extent of territory composing the States of Colorado, Nevada, Utah, Arizona, and New Mexico.

The "Oregon question" became an important one in the presidential election of 1844. The cry of "50-40 or fight" was the rallying one of this election, which elected James K. Polk. One would naturally think that the demand would have been made for the boundary line to be established at that point; but no sooner had President Polk been inaugurated than it was advocated by him that the disputed line should be established at 49°, claiming that his predecessors in office had embarrassed him to such an extent that he could not make any other claim. It is aggravating to think how little the early pioneers were assisted by this Government, and how few public men favored the acquisition of the Oregon country. Senator Benton, with a prophetic vision, in a public address at St. Louis, October 19, 1844, said: "I say the man is alive, full grown, and listening to what I say (without believing it, perhaps) who will yet see the Asiatic commerce traversing the North Pacific Ocean, entering the Oregon River, climbing the western slope of the Rocky Mountains, issuing from its gorges, and spreading its fertilizing streams over our wide-extended Union! The steamboat and the steam car have not exhausted all their wonders. They have not yet found their amplest and most appropriate theaters—the tranquil surface of the North Pacific Ocean, and the vast inclined plains, which spread east and west from the base of the Rocky Mountains. The magic boat and the flying car are not yet seen upon this ocean and upon this plain, but they will be seen there, and St. Louis is yet to find herself as near Canton as she is now to London, with a better and a safer route by land and sea to China and Japan than she now has to France and Great Britain."

Believing in liberty in its purest and best sense, they were loyal and patriotic Americans. The divine gift of freedom was cherished by them with an intensity that time and distance from the Capital of the Nation could not lessen, notwithstanding the fact that the National Government was so tardy in recognizing the value of the Oregon country and extending its protection over them. The people realized to its fullest extent that the Republic of the West was the most beneficent nation ever established, and longed for its protection.

These pioneers, by the organization of the provisional government in 1843, made it possible to secure the vast extent of country which was acknowledged as our right by the treaty of the 15th of June, 1846. The victory obtained by the "embattled farmers" at Saratoga and the surrender of Cornwallis at Yorktown are no greater events than the peaceful victory obtained by our people in the treaty which secured the Oregon country to this Nation principally by the individual efforts of our pioneers through the provisional government. "Peace hath its victories as well as war."

As time goes on and our population increases and we are further removed from the important event of the 2d of May, 1843, the celebration of this day will be celebrated with an éclat, pomp, and circumstance not realized by our people at this time. What Plymouth Rock in Massachusetts, Jamestown in Virginia, and the landing at St. Marys in Maryland are to the people east of the Rocky Mountains, so the action of the grand old pioneers of '43 in inaugurating a civil government for their protection and in obedience to their loyalty to the noblest government that has ever been instituted among men will be commemorated with more display than it is possible for me to describe.

Through the heroic efforts of our pioneers a great extent of territory was added to the United States by the treaty of the 15th of June, 1846, assisted by the subsequent admission of pioneers up to and inclusive of 1846. Without the action of the pioneers on the 2d of May, 1843, and the organization of a government to protect them, it would have been impossible for us to acquire this large section of country which was done by treaty on the 15th of June, 1846.

During the last session of the Legislature of Oregon it appropriated sufficient money to purchase some 20 acres of land at Champoeg, which makes in all about 41 acres of land now owned by the State of Oregon. In addition thereto some 10 years ago a small and insignificant building was erected on the land owned by the State in remembrance of the pioneers of Oregon and their action on the 2d of May, 1843. The building is a disgrace to their memory and it is nothing more than right that the United States Government by an appropriation by Congress should build a building worthy of the efforts made by the Oregon pioneers to secure to the United States the Oregon country and prevent England from procuring it. It was through the efforts of the pioneers that this large extent of territory was secured and should be gratefully remembered by a Government which ought to take pride in what our pioneers accomplished.

From 1830 to 1859, the expiration of the pioneer period, it is estimated between 25,000 and 30,000 emigrants were buried in nameless graves between Missouri and the Oregon country.

At the first year of the celebration of Champoeg day there were about 250 people present. This year, the twenty-eighth annual celebration, 2,000 autos and 10,000 people were in attendance.

WHITE RIVER BRIDGE, ARKANSAS

Mr. DALE. From the Committee on Commerce, I report back favorably without amendment the bill (S. 4504) granting the consent of Congress to the State of Arkansas, through

its State highway department, to construct, maintain, and operate a toll bridge across White River at or near Augusta, Ark., and I submit a report (No. 1270) thereon. I call the attention of the Senator from Arkansas [Mr. CARAWAY] to the report.

Mr. CARAWAY. I ask unanimous consent for the present consideration of the bill.

There being no objection, the bill was considered as in Committee of the Whole, and it was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the State of Arkansas, through its State highway department, to construct, maintain, and operate a bridge and approaches thereto across the White River, at a point suitable to the interests of navigation, at or near Augusta, Ark., in accordance with the provisions of an act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. If tolls are charged for the use of such bridge, the rates of toll shall be so adjusted as to provide a fund sufficient (1) to pay the reasonable cost of maintaining, repairing, and operating the bridge and its approaches; (2) the interest on borrowed money necessarily required and financing charges necessarily incurred in connection with the construction of the bridge and its approaches; and (3) to provide a sinking fund sufficient to retire the bonds issued and sold in connection with such original construction. All revenue received from the bridge shall be applied to the foregoing purposes, and no bonds issued in connection with the construction of the bridge and its approaches shall be made to mature later than 20 years after the date of issue thereof.

After a fund sufficient to retire such bonds in accordance with their provisions shall have been so provided, the bridge shall thereafter be maintained and operated as a free highway bridge, upon which no tolls shall be charged. An accurate and itemized record of the original cost of the bridge and its approaches, the expenditures for maintaining, repairing, and operating the same, the interest charges paid, and the tolls charged, and the daily revenues received from the bridge shall be kept by the State Highway Commission of Arkansas, and shall be available at all reasonable times for the information of all persons interested.

SEC. 3. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ENROLLED JOINT RESOLUTION PRESENTED

Mr. GREENE, from the Committee on Enrolled Bills, reported that this day that committee presented to the President of the United States the enrolled joint resolution (S. J. Res. 23) providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. REED of Pennsylvania:

A bill (S. 4536) for the relief of Elizabeth C. Randolph; to the Committee on Finance.

By Mr. THOMAS:

A bill (S. 4537) for the relief of the State of Oklahoma; to the Committee on Claims.

By Mr. ROBINSON of Arkansas:

A bill (S. 4538) for the relief of Abbott Ford Kinney; to the Committee on Military Affairs.

By Mr. BINGHAM:

A bill (S. 4539) to equalize the pay of certain captains and majors appointed to the Regular Army prior to April 6, 1917; to the Committee on Military Affairs.

By Mr. PHIPPS:

A bill (S. 4540) making an appropriation for National Capital Park and Planning Commission; to the Committee on the District of Columbia.

By Mr. HAWES:

A bill (S. 4541) granting an increase of pension to Virginia Whitehead (with accompanying papers); to the Committee on Pensions.

By Mr. JOHNSON:

A bill (S. 4542) granting a pension to Dorothy Simpson; and

A bill (S. 4543) granting an increase of pension to Helen F. Lasher; to the Committee on Pensions.

A bill (S. 4544) to authorize the Secretary of the Navy to proceed with the construction of certain public works, and for other purposes; and

A bill (S. 4545) to authorize the Secretary of the Navy to proceed with the construction of certain public works, and for other purposes; to the Committee on Naval Affairs.

By Mr. GEORGE:

A bill (S. 4546) for the relief of William N. Hammontree; to the Committee on Military Affairs.

By Mr. McKELLAR:

A bill (S. 4547) authorizing and directing the Secretary of Agriculture to establish and maintain a dairy and livestock experiment and demonstration station for the South at or near Lewisburg, Tenn.; to the Committee on Agriculture and Forestry.

A bill (S. 4548) for the relief of the dependent relatives of Edgar C. Campbell (with an accompanying paper); to the Committee on Military Affairs.

By Mr. GEORGE:

A bill (S. 4549) to establish an assay office at Dahlonega, Lumpkin County, Ga.; to the Committee on Mines and Mining.

By Mr. BROUSSARD (for Mr. RANSDELL):

A bill (S. 4550) authorizing the President to reappoint Briscoe A. Trousdale, jr., formerly a second lieutenant of Field Artillery, United States Army, an officer of Field Artillery, United States Army; to the Committee on Military Affairs.

AMENDMENT TO DEFICIENCY APPROPRIATION BILL

Mr. BRUCE submitted an amendment proposing to appropriate $18,547.88 to pay the Charlestown Sand & Stone Co., of Elkton, Md., for additional freight charges and the increased cost of labor and material incurred by said company in the fulfillment of the requirements of the United States engineer office under contract of August 23, 1917, and so forth, intended to be proposed by him to House bill 13873, the second deficiency appropriation bill, which was ordered to be printed, and, with the accompanying paper, to lie on the table.

CLAIM OF THE CITY OF BALTIMORE, MD.

Mr. BRUCE submitted the following resolution (S. Res. 246), which was referred to the Committee on Claims:

Resolved, That the Comptroller General of the United States be, and he is hereby, authorized and directed to readjust the claim of the city of Baltimore for amounts advanced at the request of Maj. Gen. R. C. Schenck, dated June 20, 1863, to aid the United States in the construction of works of defense, as allowed by the accounting officers of the Treasury and reimbursed pursuant to the sundry civil act, approved March 3, 1879 (20 Stat. L. 385), and to allow to the city of Baltimore reimbursement for interest paid on its bonds issued to raise amounts advanced to aid the United States, and in so doing the Comptroller General of the United States shall adopt and apply the rule established in the case of the State of New York *v.* The United States (160 U. S. 597, decided January 6, 1896), and the case of the State of Indiana (VIII Decisions of the Comptroller, p. 729, April 14, 1902), and report the amount so ascertained to the Senate for consideration.

NIGHT WORK IN THE POSTAL SERVICE—VETO MESSAGE

The PRESIDENT pro tempore laid before the Senate a message from the House of Representatives announcing that the President of the United States had returned to the House of Representatives in which it originated the bill (H. R. 5681) to provide a differential in pay for night work in the Postal Service and had proceeded in pursuance of the Constitution to reconsider the same and resolved that the bill do pass, two-thirds of the Representatives present voting in the affirmative.

The PRESIDENT pro tempore. The question is, Shall the bill pass, the objections of the President to the contrary notwithstanding?

Mr. LA FOLLETTE. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Couzens	Hale	McKellar
Barkley	Curtis	Harris	McMaster
Bingham	Cutting	Harrison	McNary
Black	Dale	Hawes	Metcalf
Blaine	Deneen	Hayden	Moses
Blease	Dill	Heflin	Norris
Borah	Edge	Howell	Nye
Bratton	Edwards	Johnson	Oddie
Brookhart	Fess	Kendrick	Overman
Broussard	Fletcher	Keyes	Phipps
Bruce	George	King	Pine
Capper	Gerry	La Follette	Pittman
Copeland	Glass	Locher	Sackett

Schall	Smith	Swanson	Walsh, Mass.
Sheppard	Smoot	Thomas	Warren
Shipstead	Steck	Tyson	Waterman
Shortridge	Steiwer	Vandenberg	Wheeler
Simmons	Stephens	Wagner	

The PRESIDENT pro tempore. Seventy-one Senators having answered to their names, there is a quorum present.

Mr. WALSH of Massachusetts. I call for the yeas and nays.

Mr. CURTIS. Mr. President, this is a question of the highest privilege. The Senate must recess at 6 o'clock. There are a number of Senators now absent who want to be here to vote on the vetoed measures. I ask Senators in charge of them to let them go over until to-morrow.

Mr. McKELLAR. Why not vote this afternoon?

Mr. CURTIS. Several Senators went away when we got an agreement to take a recess at 6 o'clock, believing that nothing would be brought before the Senate this afternoon except the appropriation bill.

Mr. LA FOLLETTE. Can we have an understanding as to a time for a vote?

Mr. CURTIS. It is a question of the highest privilege and it can be taken up at any time.

Mr. LA FOLLETTE. But it is debatable.

Mr. CURTIS. It can be taken up at any time. We are anxious to pass the deficiency appropriation bill to-day.

The PRESIDENT pro tempore. May the Chair suggest that, the presence of a quorum having just been ascertained, it is perfectly feasible to ask unanimous consent to take it up immediately on the convening of the Senate to-morrow.

Mr. LA FOLLETTE. Mr. President, I ask unanimous consent that the two messages from the President concerning the two measures may be taken up to-morrow at the convening of the Senate at 11 o'clock, and that they shall be disposed of not later than 11.30 o'clock.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Wisconsin?

Mr. BORAH. Mr. President, I have no objection to taking up the matter and disposing of it, but I would like a little more time than 30 minutes, perhaps. I suggest that we vote at 12 o'clock.

Mr. SMITH. That is all right.

Mr. LA FOLLETTE. I will accept that modification.

The PRESIDENT pro tempore. Is there objection to the request as modified?

Mr. LA FOLLETTE. Provided that it be modified that the vote shall be taken at not later than 12 o'clock upon the two measures.

Mr. BLEASE. Mr. President, I have just entered the Chamber. What is the request?

The PRESIDENT pro tempore. It relates to the President's veto message on House bill 5681.

Mr. BLEASE. I object. I want a vote on it now.

SEVERAL SENATORS. Regular order!

Mr. BORAH. I have no desire to discuss the matter, but I would like to have some member of the committee advise us a little more in detail, if we are going to take a vote, what the bill does and what is the obligation which it imposes upon the Treasury? What is it we are about to override?

The PRESIDENT pro tempore. It is the veto message on the bill providing for night differential pay for employees in the Postal Service.

Mr. WALSH of Massachusetts. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. WALSH of Massachusetts. Can we proceed to vote upon the veto message now?

The PRESIDENT pro tempore. We can unless the unanimous-consent agreement suggested by the Senator from Wisconsin is agreed to.

Mr. BORAH. Mr. President, I ask for a reading of the veto message.

The PRESIDENT pro tempore. The veto message will be read.

The Chief Clerk proceeded to read the veto message.

Mr. LA FOLLETTE. Mr. President, I desire to renew my request——

Mr. DILL. Mr. President, this is the order of business. I demand a vote now.

The Chief Clerk resumed and concluded the reading of the veto message, which is as follows:

To the House of Representatives:

Herewith is returned, without approval, H. R. 5681, a bill to provide a differential in pay for night work in the Postal Service.

Night work has always been a necessary and characteristic feature of employment in the Postal Service, and notwithstanding the continuous campaign that has been carried on by the Post Office Department for a number of years, with some measure of success, to induce the public to mail early in the business day rather than just before its close, it is evident that the expeditious distribution, dispatch, and delivery of the mails will continue to require the greater part of postal work to be performed between the hours of 6 o'clock in the evening and 6 o'clock in the following morning.

It is estimated that the provisions of the bill now returned would add $6,456,000 to the present annual cost of the Postal Service. The operating deficit in postal revenues for the fiscal year ended June 30, 1927, payable from the general fund of the Treasury derived from taxes, duties, and miscellaneous receipts, was over $31,500,000. For the fiscal year 1928 it is estimated that the deficit will be about $32,400,000, and for the fiscal year 1929 about $28,300,000. There is now pending before the Congress a bill (H. R. 12030) revising postal rates. As passed by the House of Representatitves it is estimated that the bill will cause an annual decrease in postal revenues, and a corresponding further increase in the postal deficit, based on current mailings, of $13,585,000. As passed by the Senate it is estimated that the bill will cause an annual decrease in the revenues and a corresponding further increase in the deficit of $38,550,000.

With these figures before me I am not disposed further to increase the burden on the taxpayers of the country for the maintenance and operation of the Postal Service, especially in view of the very substantial increases in pay given postal employees under the so-called postal reclassification act, approved February 28, 1925. Moreover, it is my understanding that a proposal to establish a night-work differential was considered by the proper committees of Congress in connection with the reclassification legislation, and eliminated by them because of the substantial flat-rate increases in pay that had already been agreed to and which were subsequently included in the reclassification act. If night work in the Postal Service has any basis whatever for a differential in pay, the action of the committees referred to would indicate that the present pay schedules include it.

It should be recalled that the postal-pay increases, which I approved, caused an increase in the Budget for 1926 of about $65,000,000. Every committee that approached me urged that this increase be granted because of certain night work that was involved in the duties of the postal clerks. It is well known that the pay received by those so employed is in excess of that which is paid for corresponding work in private enterprise. While I believe in good wages, they can only be advanced as our economic position improves. The burdens of the war debt have to be borne by all our people. The almost irresistible tendency of Government expenditure is to mount higher and higher. All increases which are not absolutely necessary ought not to be incurred. The officials of the Government who are charged with the conduct of its affairs ought not to yield to constant and organized clamor for increases in pay, unless they are justified by the clearest evidence.

CALVIN COOLIDGE.

THE WHITE HOUSE, *May 18, 1928.*

Mr. SHORTRIDGE. Mr. President, it appeals to me that a decent respect for the message of the President requires it to be given some consideration. If it be in order, therefore, I suggest and move that the further consideration of the matter be taken up at the convening of the session of the Senate to-morrow.

The PRESIDENT pro tempore. That motion may be entertained. The question is upon agreeing to the motion of the Senator from California.

Mr. JOHNSON. Mr. President, what does that mean in respect to the unfinished business?

The PRESIDENT pro tempore. It does not interfere with it whatever.

Mr. JOHNSON. Very well.

Mr. DILL. Mr. President, I understand this is a matter of the highest privilege and we have a right to take action on it at this time.

The PRESIDENT pro tempore. Yes; but a motion may be made to postpone it.

Mr. DILL. But not to take a vote at a certain time.

The PRESIDENT pro tempore. A motion to that effect might be made.

Mr. DILL. It would not be in order.

The PRESIDENT pro tempore. The present occupant of the chair would hold it to be in order.

Mr. DILL. I think the present occupant of the chair would be overriding the rules of the Senate.

The PRESIDENT pro tempore. It is quite within the rule.

Mr. McKELLAR. Mr. President, I want to say about this bill that it has been recommended twice by the Postmaster

General. It has been considered time and again by the Committee on Post Offices and Post Roads, and has passed the Senate. There is a real reason for it. The President in his message says that this increase was provided for in the 1925 pay bill. The 1925 pay bill applied to all classes of employees. It did not raise the pay of the night clerks over the day clerks. There was no such question in that bill.

It has been believed by many for a long time that those who work in the hours of the night are justly entitled to better pay than those who work in the daytime. I think that should appeal to almost any fair-minded person. It appeals to me. I think the bill ought to pass. I think it is just and fair. For these reasons I sincerely hope that the Senate will vote to override the President's veto just as the House did. The House on yesterday, by a tremendous majority, disapproved of the President's veto on the subject and I think that the Senate should do the same thing.

Mr. WARREN. Mr. President, I hope that action on the veto message may be put over until to-morrow. What is before the Senate now?

The PRESIDENT pro tempore. The question is on the motion submitted by the Senator from California [Mr. SHORTRIDGE] that consideration of the question be postponed until the convening of the Senate to-morrow.

Mr. CURTIS. Mr. President, I have stated to a number of Senators that there are several Senators absent who are paired, but who did not know this matter was coming up. I hope we can let the matter go over until to-morrow morning. I ask unanimous consent that further consideration of the veto messages by the President be postponed until 11 o'clock to-morrow morning.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 1145. An act to authorize an appropriation for roads on Indian reservations;

S. 2965. An act authorizing the State of Indiana, acting by and through the State highway commission, to construct, maintain, and operate a toll bridge across the Wabash River at or near Vincennes, Ind.;

S. 3864. An act to create a new division of the District Court of the United States for the Northern District of Texas;

H. R. 2808. An act for the relief of Ella G. Richter, daughter of Henry W. Richter;

H. R. 5475. An act authorizing the New Cumberland Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near New Cumberland, W. Va.;

H. R. 5898. An act to authorize certain officers of the United States Army, Navy, and Marine Corps to accept such decorations, orders, and medals as have been tendered them by foreign governments in appreciation of services rendered;

H. R. 6569. An act for the relief of Frank Hartman;

H. R. 8926. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across Red River at or near Garland City, Ark.;

H. R. 10014. An act for the relief of A. F. Gallagher;

H. R. 12479. An act authorizing the sale of all of the interest and rights of the United States of America in the Columbia Arsenal property, situated in the ninth civil district of Maury County, Tenn., and providing that the net fund be deposited in the military post construction fund;

H. R. 12676. An act to amend section 2 of an act approved February 14, 1926, granting consent of Congress for the construction of a bridge across Red River at or near Fulton, Ark.;

H. R. 12677. An act to amend section 2 of an act approved March 12, 1928, granting consent of Congress for the construction of a bridge across the Ouachita River at or near Calion, Ark.; and

H. R. 13342. An act to authorize a per capita payment to the Pine Ridge Sioux Indians of South Dakota.

DEFICIENCY APPROPRIATIONS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 13873) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes.

The PRESIDENT pro tempore. The clerk will read the bill for action on the amendments of the committee.

The Chief Clerk proceeded to read the bill.

The first amendment of the Committee on Appropriations was, under the heading "Legislative," on page 2, after line 1, to insert:

SENATE

To pay Natalia S. Jones, widow of Hon. Andrieus A. Jones, late a Senator from the State of New Mexico, $10,000;

To pay Mary E. Ferris, widow of Hon. Woodbridge N. Ferris, late a Senator from the State of Michigan, $10,000;

To pay Allie D. Willis, widow of Hon. Frank B. Willis, late a Senator from the State of Ohio, $10,000.

The amendment was agreed to.

The next amendment was, on page 2, after line 10, to insert:

To enable the Secretary of the Senate to pay from the appropriation "Salaries of officers and employees of the Senate, fiscal year 1928," to Vernon V. Thompson for services as a folder in the folding room of the Senate from February 6 to March 2, 1928, both dates inclusive, at the rate of $1,140 per annum.

The amendment was agreed to.

The next amendment was, on page 2, after line 16, to insert:

To enable the Secretary of the Senate to pay from the appropriation for "Salaries of officers and employees of the Senate, fiscal year 1927," to Florence L. Gulliver, for services rendered as assistant clerk to Hon. Frank L. Smith, of Illinois, from June 1 to 30, 1927, both dates inclusive, at the rate of $1,830 per annum.

The amendment was agreed to.

The next amendment was, on page 2, after line 22, to insert:

To pay William A. Folger for extra and expert services rendered the Committee on Pensions during the first session of the Seventieth Congress as an assistant clerk to said committee, by detail from the Bureau of Pensions, $1,200.

The amendment was agreed to.

The next amendment was, on page 3, after line 2, to insert:

For payment to Hicklin Yates for services rendered as clerk to the Special Committee Investigating Campaign Expenditures in Senatorial Primary and General Elections, pursuant to Senate Resolution 195 of the Sixty-ninth Congress and Senate Resolution 10 of the present Congress, fiscal year 1928, $2,500.

The amendment was agreed to.

The next amendment was, on page 3, after line 8, to insert:

For services performed during the summer of 1927 in the removal and cleaning of books and documents incident to the renovation of the Senate library and document room as follows: To James Payne, $300; to Richard Blount, $200; in all, fiscal year 1928, $500.

The amendment was agreed to.

The next amendment was, on page 3, after line 13, to insert:

For additional compensation to the messenger of the Committee on Appropriations, fiscal year 1929, $250.

The amendment was agreed to.

The next amendment was, on page 3, after line 15, to insert:

For payment to William S. Cheatham, an employee of the Senate under supervision of the Sergeant at Arms, at the rate of $1,770 per annum in lieu of the salary he is now receiving, from December 1, 1927, to February 29, 1928, $190.

The amendment was agreed to.

The next amendment was, on page 3, after line 20, to insert:

For additional compensation to laborer in the office of the Secretary, fiscal year 1929, $130.

The amendment was agreed to.

The next amendment was, on page 3, after line 22, to insert:

For payment to J. Mark Trice for services rendered the Senate and committees thereof, fiscal year 1928, $600.

The amendment was agreed to.

The next amendment was, at the top of page 4, to insert:

For driving, maintenance, and operation of an automobile for the Vice President, fiscal year 1928, $500.

The amendment was agreed to.

The next amendment was, on page 4, after line 2, to insert:

For miscellaneous items, exclusive of labor, fiscal year 1928, $50,000.

The amendment was agreed to.

The next amendment was, on page 4, after line 4, to insert:

For stationery for Senators, officers, and committees of the Senate, fiscal year 1928, $5,000.

The amendment was agreed to.

The next amendment was, on page 4, after line 6, to insert:

For expenses of inquiries and investigations ordered by the Senate, including compensation to stenographers of committees at such rate as may be fixed by the Committee to Audit and Control the Contingent Expenses of the Senate, but not exceeding 25 cents per 100 words, fiscal year 1928, $40,000.

The amendment was agreed to.

The next amendment was, on page 4, after line 11, to insert:

For folding speeches and pamphlets, at a rate not exceeding $1 per thousand, fiscal years 1928 and 1929, $5,000.

The amendment was agreed to.

The next amendment was, on page 4, after line 13, to insert:

For repairs, supplies, and personal services for Senate kitchens and restaurants, Capitol Building and Senate Office Building, to be expended from the contingent fund of the Senate, under supervision of the Committee on Rules, fiscal year 1928, $10,000.

The amendment was agreed to.

The next amendment was, on page 7, after line 20, to insert:

JOINT COMMITTEE ON PRINTING

Biographical Directory of the American Congress: To enable the Secretary of the Senate to pay, upon vouchers approved by the chairman of the Joint Committee on Printing, for the necessary expense of collecting additional information incident to the research work, preparing of manuscript for the printer and the maintenance and preservation, for ready reference, of a current file of biographies of all Members and ex-Members of Congress, fiscal years 1928 and 1929, $20,000; and said sum, or any part thereof, in the discretion of the chairman of the Joint Committee on Printing, may be paid as additional compensation to any employee of the United States.

The amendment was agreed to.

The next amendment was, under the subhead "Architect of the Capitol," on page 8, after line 9, to strike out "To enable the Architect of the Capitol to pay to Steuart's garage for labor and material furnished during the following fiscal years: For 1921, $40.71; for 1922, $301.23; and for 1923, $291.35; in all, $633.29, to be paid out of the appropriation for the Capitol power plant for the fiscal year 1927" and in lieu thereof to insert:

To enable the Architect of the Capitol to pay to Steuart's garage for labor and material furnished during the following years, viz: For the fiscal year 1921, $107.87; for the fiscal year 1922, $626.27; and for the fiscal year 1923, $706.23; in all, the sum of $1,440.37, to be paid out of the appropriation for the Capitol power plant for the fiscal year 1927.

The amendment was agreed to.

The next amendment was, on page 8, after line 22, to insert:

To pay Richard H. Gay for extra services in connection with the proposed heating, ventilating, and air conditioning of the Senate Chamber, $500.

The amendment was agreed to.

The next amendment was, on page 10, after line 2, to insert:

BUREAU OF EFFICIENCY

The sum of $1,092.33 of the appropriation for salaries and expenses, Bureau of Efficiency, fiscal year 1928, is hereby made available for the payment for contract services since April 1, 1927, to secure actuarial data in connection with various retirement plans for teachers in the District of Columbia and for civil-service employees.

The amendment was agreed to.

The next amendment was, on page 11, after line 22, to insert:

GENERAL ACCOUNTING OFFICE

To enable the General Accounting Office to furnish such data, reports, etc., as may be required by the Committee on Indian Affairs of the Senate in accomplishing the survey and investigation authorized and directed by Senate Resolution 79, Seventieth Congress, first session, which shall be available for the employment in the District of Columbia and elsewhere of the necessary personnel without regard to civil-service laws and regulations, fiscal years 1928 and 1929, $45,000.

The amendment was agreed to.

FARM LEGISLATION

Mr. DILL. Mr. President, the Senator from Nebraska [Mr. NORRIS] to-day, much to my regret, moved to recommit the conference report on the Muscle Shoals joint resolution to the conferees. I had hoped that the conference report might be adopted, and I still hope that the conferees will report the measure back in such form that Congress may adopt the report, in order that some legislation may be enacted at this session of Congress in the interest of the farmers of the country. In view of the fact that the President's veto of the McNary-Haugen bill was not overriden, the Muscle Shoals measure will probably afford the only chance for Congress to help the farmers by legislation at this session.

SUPPORTED M'NARY-HAUGEN BILL AND GRANGE DEBENTURE PLANS FOR FARM RELIEF

Mr. President, I voted for the McNary-Haugen bill this year and have voted for it at every session of Congress when it has been before us. President Coolidge has attacked this bill and it might not prove as beneficial to the farmers as we believe it would, but it was intended to bring some measure of fair treatment to agriculture and we owe the farmers fair treatment. Congress has legislated in the interest of the railroads by permitting railroad rates high enough to guarantee dividends on railroad stock; in the interest of laboring men, by immigration laws; in the interest of bankers, by the Federal reserve act; and in the interest of manufacturers, by exceedingly high tariffs. Why not legislate for the farmers too?

I have taken every opportunity to help them I could find. A few days ago I voted for the debenture plan for farm relief sponsored by the National Grange when it was offered as an amendment to the revenue bill. It would probably prove to be the fairest, the most just, and the most beneficial of all plans yet proposed for giving the farmers a square deal.

SUPPORTED TARIFF AMENDMENTS ON FARM PRODUCTS

I voted for the tariff amendment to the revenue bill, which would have provided substantially higher tariff rates on eggs and poultry, on milk and butter, cattle and sheep, on onions, potatoes, and on cherries. Congress refuses to lower the profiteering tariff rates on the manufactured products which the farmers must buy. There is no defense for the failure to raise the tariff on what the farmers produce, and especially when those products are in competition with similar products from other countries, particularly Canada and the Orient. I believe in "Tariff for none or tariff for all." I supported the amendment to the revenue bill also to provide a drawback system of freight rates to farmers on products shipped abroad.

The Senate defeated all these proposals on the theory that they were improper legislation on a revenue bill. My own opinion was, and still is, that when the industrial, commercial, and agricultural conditions of the country are such that an average of 400 farmers per day are going into bankruptcy in the United States as they have been doing for the past few years, and when farmers everywhere are getting deeper and deeper into debt, the time has come to disregard parliamentary proprieties and to do justice to those who till the soil. This is especially true when upon their prosperity all other prosperity finally depends.

SHOULD USE FEDERAL-AID ROAD MONEY FOR RURAL MAIL-ROUTE ROADS

We should pass legislation also which will guarantee to the farmers that a part of the Federal-aid road money shall be used on rural mail-route roads instead of spending all of it on the main automobile highways. I have been able to secure many extensions to rural mail routes in my own State, and I shall continue to assist the farmers in getting mail routes whenever possible, but I believe it is equally important that the roads should be improved so that the mail can be delivered. Such improved roads will enable the farmer to market his products more quickly and economically, so that such rural road improvements are doubly desirable.

LOWER FREIGHT RATES ON FARM PRODUCTS

As a member of the Interstate Commerce Committee of the Senate, I have helped report legislation directing the Interstate Commerce Commission to lower the freight rates on farm products, even though such lowering of freight rates might necessitate the raising of freight rates on other articles of commerce.

I voted also to abolish the extra 2-cent rate on parcel-post packages, which is in the interest of the farmer. I have made special effort to assist the farmers living on irrigation projects in my own State, particularly those on the Okanogan project and in the Yakima Valley.

MUSCLE SHOALS WILL LOWER COST OF FERTILIZER

The adoption of the conference report on Muscle Shoals will insure to the farmers of the Nation that the Government will experiment in the production of nitrate and fertilizers on a large scale and will actually produce and sell commercial fertilizers with a view to lowering the cost to the farmers of the entire country. This will be a real benefit to the farmers, because it will lower the cost of production.

The manufacture of fertilizer was one of the original purposes for which Muscle Shoals was built. Congress has waited too long already to carry out that purpose. We have a chance now to show our good faith with the people as a whole, because it

was the people's money that built the dam and power plant, and with the farmers, because we have told them for so many years that this plant was to benefit them.

DEFICIENCY APPROPRIATIONS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 13873) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1928, and prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1928, and June 30, 1929, and for other purposes.

The reading of the bill was resumed. The next amendment of the Committee on Appropriations was, on page 12, after line 8, to insert:

GEORGE WASHINGTON BICENTENNIAL COMMISSION

To carry out the provisions of the act entitled "An act to authorize and direct the survey, construction, and maintenance of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge across the Potomac River at Washington," approved May —, 1928, fiscal year 1928, $500,000, to be available until expended.

The unexpended balances of the appropriations for the celebration of the one hundred and fiftieth anniversary of the Battle of Bunker Hill, and of the one hundred and fiftieth anniversary of the battles of Lexington and Concord, are reappropriated and made available for the necessary expenses of the United States Commission for the Celebration of the Two Hundredth Anniversary of the Birth of Georgia Washington, which, together with amounts heretofore appropriated for the use of said commission and not expended, are hereby reappropriated and made available until expended.

Mr. WARREN. Mr. President, I move to amend the amendment by striking out from line 11 to line 17, inclusive. That item will be cared for by a subsequent amendment.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The CHIEF CLERK. In the amendment reported by the committee it is proposed to strike out:

To carry out the provisions of the act entitled "An act to authorize and direct the survey, construction, and maintenance of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge across the Potomac River at Washington," approved May —, 1928, fiscal year 1928, $500,000, to be available until expended.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. GLASS. What amendment is that?

The PRESIDENT pro tempore. The portion of the committee amendment on page 12, from line 11 to line 17, was stricken out because the committee intend to offer an amendment at a later stage in the bill which cares for the subject, if the Chair understands the situation correctly.

Mr. FESS. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. FESS. What amendment was stricken out?

The PRESIDENT pro tempore. The amendment on page 12, beginning in line 11 and extending to line 17. At a later stage in the consideration of the bill the committee intends to offer an amendment on page 31, under the heading of Bureau of Public Roads, which will care for the entire subject.

Mr. FESS. I call the attention of the chairman of the committee to the last paragraph on page 12, beginning with line 18; that is not on the subject of roads.

The PRESIDENT pro tempore. No. The amendment on page 12, beginning in line 18, was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Appropriations was, on page 13, after line 3, to insert:

MOUNT RUSHMORE NATIONAL MEMORIAL COMMISSION

To carry out the purposes of the act approved May —, 1928, entitled "An act creating the Mount Rushmore National Memorial Commission and defining its purposes and powers," toward part of the one-half cost of the memorial and landscaping to be borne by the United States, fiscal years 1928 and 1929, $75,000.

Mr. KING. I wish to make an inquiry concerning that amendment, which makes an appropriation of $75,000 for the Mount Rushmore National Memorial. I want to inquire what it is for.

Mr. PHIPPS. It is for the memorial being erected on Mount Rushmore, in South Dakota, consisting of a number of allegorical and heroic figures. The amount proposed to be appropriated is a contribution by the Federal Government and represents much less than one-half of the entire cost. The matter was gone into by the committee; I do not have the statement concerning it at hand at the moment, but I think the Senator can be satisfied that this is a proper expenditure.

Mr. FLETCHER. Is that the memorial of which Gutzon Borglum is the sculptor?

Mr. PHIPPS. I so understand.

Mr. FLETCHER. I hope he will do it better than he did the work at Stone Mountain.

Mr. PHIPPS. He was not given a fair chance at Stone Mountain.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment was, on page 13, after line 16, to insert:

PERSONNEL CLASSIFICATION BOARD

For the purpose of enabling the Personnnel Classification Board to meet the expenses of field investigations, including the employment of personal services in the District of Columbia in accordance with the classification act of 1923, and elsewhere, traveling expenses, supplies, and equipment, and such other miscellaneous expenses as may be necessary, fiscal years 1928 and 1929, $75,000.

Mr. KING. I wish to make an inquiry concerning that amendment. What is the necessity for the $75,000 for the Classification Board? We have made very liberal appropriations for that board, and now we are proposing to appropriate $75,000 more.

Moreover, may I ask, What is the good of having a classification board, in view of the fact that we pass bills repeatedly changing salaries without any reference to the classification organization or the work of the classification board? It seems to me that it is a futility to appropriate large sums for the classification board; it is positively absurd, because the classification act—and we passed one a short time ago—was supposed to readjust salaries, so that we would be free from constant importunities for increases and for the stepping policy which in the past has been pursued. Yet we pay no attention to the classification act.

Mr. CURTIS. Mr. President, the reason given by the board for this appropriation is that it is required to enable the board to secure information regarding the compensation of positions in private industry that are comparable with positions in the Federal service. The investigations are necessary to enable the Personnel Classification Board to make recommendations regarding salary schedules for Federal employees. The need for information necessary to make such recommendations was forcibly brought out during the hearings before Congress on the Welch bill. The board feels that this work can not be properly performed without direct provision for funds to defray the expenses of the investigations. No part of the requested appropriation is intended for the compensation of persons now engaged in the regular work of the board.

Mr. KING. I am opposed to the appropriation. The classification board has been in existence for some time; it has had liberal appropriations, and its work, whether satisfactory or unsatisfactory, has been done.

Let me say further that, judging from the action of the Senate and the House of Representatives, apparently the work of the classification board has been wholly unsatisfactory. If they desire to ascertain the compensation paid in private employment, the Labor Department is furnishing daily reports showing the compensation paid in every activity in our industrial and economic system. The Census Bureau is also engaged in ascertaining the salaries and compensation paid in all the activities of private life. This is simply to provide a private junketing trip for this organization at an expense of $75,000.

I have had occasion repeatedly to inquire of the Department of Labor as to the salaries and compensation paid in various vocations, and that department responds very promptly and it has quite accurate information. That department and the Census Bureau can furnish all the information that the Classification Board needs, if it needs any information. I think that this would be a waste of money; it is merely to furnish a junketing trip throughout the country to a number of Federal employees who are now paid too much.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

Mr. FLETCHER. Mr. President, may I inquire if there are involved in this amendment some traveling expenses for Members of Congress, either of the House or of the Senate? Is it contemplated that some members of this committee or some other committee are to take trips on this field investigation?

Mr. CURTIS. Not to my knowledge. It was not intended that any members of the committee should do so.

Mr. FLETCHER. We had a somewhat similar provision in one appropriation bill, and certain Members of Congress got a trip to Europe out of it. That was for so-called "field investigations." I do not know whether that is intended here or not, but I should like to be informed about it. I think, with the Senator from Utah [Mr. KING], that it is intended as a junketing proposition for the benefit of these employees, and perhaps some members of some committee of either the House or the Senate.

Mr. CURTIS. It is not so intended.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. KING. Mr. President, I shall ask for a vote upon this amendment in the Senate.

The PRESIDENT pro tempore. The Senator from Utah reserves a vote upon the amendment when the bill reaches the Senate.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the heading "Public buildings and public parks of the National Capital," at the top of page 15, to insert:

For an additional amount for general expenses in connection with the maintenance of public buildings in the District of Columbia, including rent, and salaries for maintenance and operation of the buildings when such maintenance and operation is not furnished by the owner under terms of the lease, for the fiscal year 1929, $68,000: *Provided,* That any funds heretofore or hereafter appropriated for the fiscal years 1928 and 1929 for rents and maintenance of buildings in the District of Columbia for any of the executive departments and independent establishments may be transferred, with the approval of the Public Buildings Commission, to the Director of Public Buildings and Public Parks of the National Capital.

The amendment was agreed to.

The next amendment was, on page 15, after line 22, to insert:

UNITED STATES SHIPPING BOARD

For carrying out the purpose and provisions of "Title III, construction loan fund, section 302, merchant marine act, 1928, approved May —, 1928," the United States Shipping Board is authorized to incur obligations by entering into contracts to make loans from the construction loan fund to the extent of $125,000,000 in addition to the amount now standing to the credit of the construction loan fund: *Provided,* That said obligations to make such loans shall not call for actual disbursements of moneys during the fiscal year ending June 30, 1929, in excess of the amount now standing to the credit of the construction loan fund.

Mr. WARREN. Mr. President, I send to the desk an amendment which I ask to have stated.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. On page 15, line 23, it is proposed to disagree to the committee amendment and to insert in lieu thereof the following——

The PRESIDENT pro tempore. Without objection, the vote whereby the committee amendment was agreed to will be reconsidered.

The CHIEF CLERK. It is proposed to insert the following:

UNITED STATES SHIPPING BOARD

To enable the United States Shipping Board to carry into effect the provisions of sections 301 and 302 of the merchant marine act, 1928, approved May 22, 1928, the board is hereby authorized to enter into contracts to make loans from the construction loan fund in such amounts which, when added to the amount of outstanding loans and to loans that may be made under authority of law from the amount credited to such fund, shall not exceed in the aggregate $150,000,000: *Provided,* That said contracts to make such loans shall not obligate said board to make actual disbursements of moneys for this purpose during the fiscal year ending June 30, 1929, in excess of the available cash balance standing to the credit of said fund.

Mr. KING. Mr. President, I understood that there was now in this fund something like seventy or eighty million dollars. Is this intended to supplement it to the extent of $150,000,000?

Mr. WARREN. One hundred and fifty million dollars is the limit, and it is restricted so that it can not be loaned beyond what is already in the fund, or will be in it from time to time, to match it. There is in the Treasury probably something like $70,000,000 or $80,000,000 now, if I remember correctly.

Mr. PHIPPS. I think it was nearer $60,000,000. I think it was less than $70,000,000.

Mr. KING. It was stated the other day in the discussion, when the Shipping Board bill was before us, that there was $70,000,000 in the fund.

Mr. BINGHAM. Not quite $70,000,000.

Mr. KING. Sixty-eight millions plus.

Mr. PHIPPS. That is about it.

Mr. WARREN. This item was sent up by the Budget under the bill which we have just passed, the amendment to the merchant marine act. Of course, it was necessary to disagree to the other amendment, because before we had received the Budget estimate we had put in an amendment on the basis of the best knowledge we had. That left it perhaps subject to a challenge on the ground of being out of order. Now, we have heard from the Budget exactly what it recommends.

I will ask that the clerk read the concluding line of the amendment.

Mr. KING. I should like to ask whether the merchant marine bill which passed the Senate several days ago has been signed by the President.

Mr. WARREN. I conclude so, because this request is from the President.

Mr. BINGHAM. It was signed yesterday.

Mr. KING. We have not been advised of it; at least, I have not heard of it.

The CHIEF CLERK. In lieu of the committee amendment on page 15, commencing with line 23 and ending on line 10, page 16, it is proposed to insert the following:

UNITED STATES SHIPPING BOARD

To enable the United States Shipping Board to carry into effect the provisions of sections 301 and 302 of the merchant marine act, 1928, approved May 22, 1928, the board is hereby authorized to enter into contracts to make loans from the construction loan fund in such amounts which, when added to the amount of outstanding loans and to loans that may be made under authority of law from the amount credited to such fund, shall not exceed in the aggregate $150,000,000: *Provided,* That said contracts to make such loans shall not obligate said board to make actual disbursements of moneys for this purpose during the fiscal year ending June 30, 1929, in excess of the available cash balance standing to the credit of said fund.

Mr. BINGHAM. May I say to the Senator from Utah that the merchant marine bill authorized loans to the extent of $250,000,000?

Mr. KING. Yes; I know that.

Mr. BINGHAM. This merely authorizes the Shipping Board to make contracts for $150,000,000.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the heading "District of Columbia, general expenses," on page 17, after line 3, to insert:

For the purchase of mechanical office equipment, accessories and supplies, filing cabinets, printed forms, loose-leaf binders, employment of personal services, and other necessary incidental expenses, fiscal years 1928 and 1929, $15,000.

The amendment was agreed to.

The next amendment was, under the subhead "Public schools," on page 18, line 11, after the name "Western High School," to strike out "$45,000" and insert "the erection thereon of seats and buildings for locker and dressing rooms, and otherwise fully equipping said field, $100,000"; so as to read:

For the grading, including retaining walls and fencing, of the athletic field for the Western High School, the erection thereon of seats and buildings for locker and dressing rooms, and otherwise fully equipping said field, $100,000, to continue available until June 30, 1929: *Provided,* That the Commissioners of the District of Columbia are hereby authorized to close, vacate, and abandon R Street NW. between the west side of Thirty-eighth Street and the east line of parcel 28/9, and to close, vacate, and abandon S Street NW. between the west side of Thirty-ninth Street and the east line of parcel 29/1, upon the written consent of all the owners of the property abutting on said R Street and S Street between the points named, the property lying within the lines of said streets so closed, vacated, and abandoned to revert to the abutting property owners: *Provided further,* That the Commissioners of the District of Columbia are hereby authorized to close, vacate, and abandon Thirty-ninth Street NW. between the north side of Reservoir Road and the south side of S Street, upon the written consent of all the owners of the property abutting on said Thirty-ninth Street between the points named, the property lying within the lines of said Thirty-ninth Street so closed, vacated, and abandoned to revert to the District of Columbia as part of the site for an athletic field for Western High School.

The amendment was agreed to.

The next amendment was, under the subhead "Public welfare," for care and treatment of indigent patients under con-

tracts to be made by the Board of Public Welfare with certain institutions, on page 23, after line 10, to insert:

Children's Hospital, fiscal year 1926, $2,316.25;
Children's Hospital, fiscal year 1927, $9,355;
Providence Hospital, fiscal year 1926, $604;
Providence Hospital, fiscal year 1927, $490;
Garfield Memorial Hospital, fiscal year 1926, $1,718.50;
Georgetown University Hospital, fiscal year 1926, $741.50;
Georgetown University Hospital, fiscal year 1927, $441.50;
Washington Home for Incurables, fiscal year 1926, $17.16.

The amendment was agreed to.

The next amendment was, on page 25, after line 6, to insert:

Temporary Home for Former Soldiers and Sailors: For maintenance and repairs to building, fiscal year 1928, $800.

The amendment was agreed to.

The next amendment was, under the subhead "Public Buildings and Public Parks," on page 26, after line 5, to insert:

Construction of bathing pools, District of Columbia: For an additional amount for completing the construction of two bathing pools, for which an appropriation of $150,000 was contained in the District of Columbia appropriation act for the fiscal year 1928, $20,000.

Mr. KING. Mr. President, may I inquire of the Senator from Colorado [Mr. PHIPPS], with reference to the item in lines 6 to 10, page 26, whether the appropriation bill for the District of Columbia did not carry this item, or one sufficiently large to meet the expense of constructing these bathing pools?

Mr. PHIPPS. I will say to the Senator that the estimate of cost for the two bathing pools was $150,000, which was appropriated. In carrying out the work it was found that that was insufficient, and it was necessary to add about $10,000 to the cost of each pool; so that we are now appropriating $20,000 in order to enable them to be completed.

Mr. FLETCHER. Will the Senator state where these pools are located?

Mr. PHIPPS. At the two high schools, I believe—Central and Western.

Mr. KING. I think the appropriation we made before is sufficient. It seemed so to me from the testimony; but there is no limit to the expenses that we incur.

Mr. PHIPPS. This was gone into by all the authorities, and approved.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was under the subhead "Judgments," on page 28, line 4, before the word "House," to insert "Senate Document No. 108 and"; and in line 5, after the word "Congress," to strike out "$16,117.28" and insert "$16,633.93," so as to read:

For the payment of final judgments, including costs, rendered against the District of Columbia, as set forth in Senate Document No. 108 and House Document No. 272, Seventieth Congress, $16,633.93, together with the further sum to pay the interest at not exceeding 4 per cent per annum on such judgments, as provided by law, from the date the same became due until date of payment.

The amendment was agreed to.

The next amendment was, under the heading "Department of Agriculture," on page 29, after line 18, to insert:

BUREAU OF PLANT INDUSTRY

Salaries and expenses: For an additional amount for the investigation of diseases of forest and ornamental trees and shrubs, to enable the Secretary of Agriculture to conduct experiments and investigations for the control of the European larch canker, including the same objects of expenditure specified for this purpose in the act making appropriations for the Department of Agriculture for the fiscal year 1928, $35,000, to remain available until June 30, 1929.

The amendment was agreed to.

The next amendment was, on page 30, after line 2, to insert:

Horticultural experiment and demonstration work, Southern Great Plains area: To enable the Secretary of Agriculture to carry into effect the provisions of the act entitled "An act providing for horticultural experiment and demonstration work in the Southern Great Plains area," approved April 16, 1928, fiscal year 1929, $35,000.

The amendment was agreed to.

The next amendment was, on page 31, after line 2, to insert:

FEDERAL HORTICULTURAL BOARD

Establishing and enforcing noncotton zones: To enable the Secretary of Agriculture to carry into effect the provisions of the joint resolution entitled "Joint resolution to provide for eradication of pink bollworm and authorizing an appropriation therefor," approved May 21, 1928, including necessary expenses for the purchase of equipment and supplies, employment of persons and means in the District of Columbia and elsewhere, rent outside the District of Columbia, purchase, maintenance, repair, and operation of passenger-carrying vehicles as may be necessary for executing the purposes of such joint resolution, fiscal years 1928 and 1929, $5,000,000, of which amount $20,000 may be expended for personal services in the District of Columbia: *Provided*, That the appropriation herein made shall be available only for compensation for the crop of 1928, unless the State in which any noncotton zone is established shall thereafter appropriate and pay a sum in each year equal to the amount expended in such State by the United States under this authorization.

Mr. KING. Mr. President, I should like to inquire about that. The agricultural appropriation bill passed recently carried very large appropriations.

Mr. WARREN. This refers to the pink bollworm matter that was brought directly before the committee. It comes from the Budget. The hearings we had explain how necessary it is to have this.

Mr. KING. Mr. President, I should like the RECORD to show that this bill passed the Senate without very much discussion or consideration. It provides $5,000,000, to be utilized not so much for the extermination of a cotton pest, but to pay persons who it is alleged might farm or grow cotton not to grow it, without any contribution whatever from the State or the local community.

In other words, the Federal Government now not only appropriates tens of millions of dollars for the extermination of pests and insects that are destructive of agricultural products but we go further and pay farmers, horticulturists, and agriculturists not to till the ground, not to plant crops, and they are to be paid whatever the Department of Agriculture—and there is no limitation—may determine their profits would have been; so that the farmer who does not farm can represent to the board that his profits would have been $50 an acre or $100 an acre, and he is to be paid for not farming; and under this appropriation the State makes no contribution whatever.

Mr. FLETCHER. Does the Senator say the State makes no contribution?

Mr. KING. No; not a penny, under the bill which was passed, as I understand, which this is merely to carry out.

Mr. GLASS. Mr. President, the amendment provides that the State shall appropriate the same amount.

Mr. KING. Mr. President, if the Senator from Wyoming had reference to the pink bollworm, the $5,000,000 authorization which was passed a few days ago on behalf of Texas, attention was called then to the fact that under that bill no contribution was to be made by the State, and it was conceded that that was the case; and I understood that this was the appropriation therein authorized.

Mr. GLASS. I understood differently from this amendment to the bill, which says:

Provided, That the appropriation herein made shall be available only for compensation for the crop of 1928, unless the State in which any noncotton zone is established shall thereafter appropriate and pay a sum in each year equal to the amount expended in such State by the United States under this authorization.

Mr. KING. It is for the next year, not for the coming year. It was stated that this $5,000,000 is to be appropriated, and no corresponding appropriation is to be made by the State this year; but thereafter, the next year, if a subsequent appropriation shall be made by Congress, it is to be paid. It was admitted, however, by the Senator from Louisiana [Mr. RANSDELL] that no corresponding payment was to be made now, and the representation was made that perhaps Texas was not in condition now to make the payment, but if we continued the appropriation for a subsequent year payment was to be made. It was stated definitely upon the floor of the Senate that no payment was to be made now.

Mr. WARREN. Mr. President, payment must be made.

Mr. KING. Not for 1928.

Mr. WARREN. For the next year.

Mr. KING. If we continue the appropriation for the following year, but not for this fiscal year. So we are now laying down the proposition that we will pay farmers, for not farming, whatever they establish to this organization in the Agricultural Department their profits would have been; and the State makes no corresponding appropriation.

I submit that it is a very dangerous thing. We will find that we will have applications from every part of the Union to have the Federal Government make appropriations to those who do not plant, without any corresponding appropriation by the States.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, on page 31, after line 2, to insert:

BUREAU OF PUBLIC ROADS

Mount Vernon Memorial Highway: To enable the Secretary of Agriculture to carry into effect the provisions of the act entitled "An act to authorize and direct the survey, construction, and maintenance of a memorial highway to connect Mount Vernon, in the State of Virginia, with the Arlington Memorial Bridge across the Potomac River at Washington," approved May 23, 1928, including not to exceed $12,000 for departmental personal services in the District of Columbia, fiscal year 1929, $2,500,000, of which $500,000 shall be immediately available.

The amendment was agreed to.

The next amendment was, under the heading "Department of Commerce, office of the Secretary," on page 32, after line 6, to insert:

Enforcement of wireless communication laws: For an additional amount covering the same objects and purposes as specified under this head in the act making appropriations for the Department of Commerce for the fiscal year 1928, $140,000, to remain available until June 30, 1929.

The amendment was agreed to.

The next amendment was, at the top of page 33, to insert:

AIRCRAFT IN COMMERCE

Aircraft in commerce: For an additional amount covering the same objects and purposes as specified under this head in the act making appropriations for the Department of Commerce for the fiscal year 1928, $197,500, to remain available until June 30, 1929, of which amount not to exceed $45,000 may be expended for personal services in the District of Columbia: *Provided*, That the sum herein appropriated shall be available for the purchase of not to exceed 11 airplanes.

Air navigation facilities: For an additional amount covering the same objects and purposes as specified under this head in the act making appropriations for the Department of Commerce for the fiscal year 1928, $1,000,000, to remain available until June 30, 1929, of which amount not to exceed $15,360 may be expended for personal services in the District of Columbia.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Standards," on page 34, line 17, after the word "exceed," to strike out "$4,340" and insert "$26,800," so as to read:

Radio research: For an additional amount covering the same objects and purposes specified under this heading in the act making appropriations for the Department of Commerce for the fiscal year 1928, $30,000, to remain available until June 30, 1929, of which amount not to exceed $26,800 may be expended for personal services in the District of Columbia.

The amendment was agreed to.

The next amendment was, on page 35, after line 17, to insert:

COAST AND GEODETIC SURVEY

Pay, commissioned officers: For an additional amount for the pay and allowances of commissioned officers, including the same objects as specified under this head in the act making appropriations for the Department of Commerce for the fiscal year ending June 30, 1928, $10,520.

Pay, commissioned officers: For an additional amount for the pay and allowances of commissioned officers, including the same objects as specified under this head in the act making appropriations for the Department of Commerce for the fiscal year ending June 30, 1929, $47,955.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Fisheries," on page 36, after line 8, to insert:

Inquiry respecting food fishes: For an additional amount for the same objects as specified under this head in the act making appropriations for the Department of Commerce for the fiscal year ending June 30, 1928, to remain available until June 30, 1929, $25,000.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Mines," on page 37, after line 12, to insert:

Mineral mining investigations: For an additional amount covering the same objects and purposes as specified under this head in the act making appropriations for the Department of Commerce for the fiscal year 1928, $25,000, to remain available until June 30, 1929.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Indian Affairs," on page 40, after line 8, to insert:

Survey, classification, and allotment of lands on Shoshone or Wind River Reservation, Wyo.: For necessary surveys, classification of lands, and all other expenses in connection with the allotment of lands on the Shoshone or Wind River Reservation, Wyo., authorized by the act of May 21, 1928, fiscal years 1928 and 1929, $50,000.

The amendment was agreed to.

The next amendment was, on page 40, after line 14, to insert:

Land and improvements, Indian colony, Winnemucca, Nev.: For the purchase of land in the vicinity of Winnemucca, Nev., to be used as an Indian colony, $500; and for moving the cabins of Indians residing in that vicinity to the location above described, for making necessary repairs to said cabins, erecting new cabins, and building roads in the colony, $2,000; in all, fiscal years 1928 and 1929, $2,500, as authorized by the act of May 21, 1928.

The amendment was agreed to.

The next amendment was, on page 40, after line 22, to insert:

Construction of fence, Papago Reservation, Ariz.: For the construction of a fence along the east boundary of the Papago Indian Reservation, Ariz., as authorized in the act of May 21, 1928, fiscal years 1928 and 1929, $15,000.

The amendment was agreed to.

Mr. CURTIS. Mr. President, on page 41, line 11, after the word "title," the words "at a total cost of not exceeding $1,200,000, which is hereby authorized," should be included in brackets and then stricken out. It was a Senate amendment and was left out entirely by mistake.

The PRESIDENT pro tempore. Without objection, the amendment is agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 42, line 9, after the word "site," to strike out "or" and insert "and," so as to read:

Water system, Consolidated Ute Agency, Colo.: For the construction of a water system (including purchase of reservoir site and the sinking of one or more wells) and employees' cottages at the Consolidated Ute Indian Agency and School, Colorado, $41,000, to remain available until June 30, 1929.

The amendment was agreed to.

The next amendment was, on page 43, after line 19, to insert:

Improvement, maintenance, and operation, Hogback irrigation project, Navajo Reservation, N. Mex. (reimbursable): For repair of the diversion dam, Hogback project, New Mexico, fiscal years 1928 and 1929, $1,200.

The amendment was agreed to.

The next amendment was, on page 44, line 8, after the word "reimbursable" and the parenthesis, to insert a colon and the following proviso: "*Provided*, That no part of the sum herein appropriated shall be paid to the middle Rio Grande conservancy district until such time as construction work on or in behalf of Indian lands is begun: *Provided further*, That no part of this sum shall be paid for purposes other than construction work for irrigation, drainage, or flood control on or affecting the Pueblo Indian lands," so as to read:

Middle Rio Grande conservancy project, New Mexico: For payment to the middle Rio Grande conservancy district in accordance with the provisions of an act entitled "An act authorizing the Secretary of the Interior to execute an agreement with the middle Rio Grande conservancy district providing for conservation, irrigation, drainage, and flood control for the Pueblo Indian lands in the Rio Grande Valley, N. Mex., and for other purposes," approved March 13, 1928, fiscal year 1929, $100,000 (reimbursable): *Provided*, That no part of the sum herein appropriated shall be paid to the middle Rio Grande conservancy district until such time as construction work on or in behalf of Indian lands is begun: *Provided further*, That no part of this sum shall be paid for purposes other than construction work for irrigation, drainage, or flood control on or affecting the Pueblo Indian lands.

The amendment was agreed to.

The next amendment was, on page 45, after line 2, to insert:

Haskell Institute, Lawrence, Kans.: For the construction of an adequate septic sewage disposal system, $18,000; for the replacement of buildings, material, and equipment, and for necessary repairs to adjoining buildings and light poles destroyed and damaged by fire on March 27, 1928, $8,000; in all, fiscal years 1928 and 1929, $26,000.

The amendment was agreed to.

The next amendment was, on page 46, after line 9, to insert:

Hospital and equipment and physician's quarters, Menominee Reservation, Wis. (tribal funds): For construction of hospital and equipment, and for physician's quarters, Menominee Reservation, Wis., fiscal years 1928 and 1929, $50,000, payable out of tribal funds of the Menominee Indians.

The amendment was agreed to.

The next amendment was, on page 48, after line 6, to insert:

Bridge and road, Hoopa Valley Reservation, Calif.: For one-half the cost of a bridge and road on the Hoopa Valley Indian Reservation, Calif., as authorized by the act of May 16, 1928, fiscal years 1928 and 1929, $35,000.

The amendment was agreed to.

The next amendment was, on page 48, after line 11, to insert:

Construction of road, Zuni Reservation, N. Mex.: For the construction of a road on the Zuni Indian Reservation, N. Mex., as authorized by the act of May 12, 1928, fiscal years 1928 and 1929, $8,000.

The amendment was agreed to.

The next amendment was, on page 48, after line 15, to insert:

Memorial tablet at Medicine Lodge, Kans.: For the erection of a tablet or marker at Medicine Lodge, Kans., to commemorate the holding of the Indian peace council at which treaties were made between the United States and the Kiowa, Comanche, Apache, Cheyenne, and Arapahoe Indians as authorized by the act of May 7, 1928, fiscal years 1928 and 1929, $2,500.

The amendment was agreed to.

The next amendment was, on page 48, after line 22, to insert:

Upkeep of Puyallup Indian Cemetery, Washington (tribal funds): For upkeep of the Puyallup Indian Cemetery in the city of Tacoma, Wash., fiscal year 1929, $1,000, payable from interest on the fund set aside for this purpose by the act of March 28, 1928.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Reclamation," on page 50, line 1, after the figures "1929," to insert "for the same purposes, including test borings"; and in line 3, after the name "Carson River," to strike out "examination and survey of lands susceptible of irrigation from waters that may be practicably so impounded" and insert "investigations of dam sites at such storage reservoirs," so as to read:

Newlands project, Nevada: The unexpended balance of the appropriation of $50,000 for the survey and examination of water-storage reservoir sites on the headwaters of the Truckee River, and for other purposes, contained in the act making appropriations for the Department of the Interior for the fiscal year 1928, shall continue available during the fiscal year 1929 for the same purposes, including test borings, and shall also be available for the survey and examination of water-storage reservoir sites on the Carson River, investigations of dam sites at such storage reservoirs, and estimates of costs with recommendations in regard thereto.

The amendment was agreed to.

The next amendment was, at the top of page 51, to insert:

Damage claims: For payment in full settlement of all claims against the Government for flood damages to the owners of certain lands near Hatch and Santa Teresa, N. Mex., fiscal year 1929, $70,000, payable from the reclamation fund in accordance with section 2 of the act of February 25, 1927: *Provided*, That in addition to the above amount there shall be available for the same purpose such portion of the appropriation of $5,000 contained in the deficiency act of December 22, 1927, as may not be required to defray the expense of ascertaining the amount of such damages.

The amendment was agreed to.

The next amendment was, under the subhead "United States Geological Survey," at the top of page 52, to insert:

For a topographic survey of the boundaries of the proposed Shenandoah National Park in the State of Virginia for expenditure by the Geological Survey under the direction of the Secretary of the Interior, including personal services in the District of Columbia and elsewhere; the computation and adjustment of control data; the office drafting and publication of the resulting maps; the purchase of equipment, not to exceed $700 for the purchase and not to exceed $1,000 for the hire, maintenance, repair, and operation of motor-propelled passenger-carrying vehicles for field use; and for the securing of such aerial photographs as are needed to make the field surveys, fiscal years 1928 and 1929, $65,000.

The amendment was agreed to.

The next amendment was, under the heading "Department of Justice," on page 55, after line 12, to insert:

OFFICE OF THE ATTORNEY GENERAL

Salaries: For salaries, office of the Attorney General, including the same objects specified under this head in the act making appropriations for the Department of Justice and for the Judiciary for the fiscal year 1929, $40,300.

The amendment was agreed to.

The next amendment was, on page 55, after line 17, to insert:

CONTINGENT EXPENSES, DEPARTMENT OF JUSTICE

Traveling and miscellaneous expenses: For traveling and other miscellaneous and emergency expenses, authorized and approved by the Attorney General, to be expended at his discretion, fiscal year 1929, $4,700.

The amendment was agreed to.

The next amendment was, under the heading "Department of Labor, Employment Service," on page 62, after line 17, to insert:

For an additional amount for the Employment Service, Department of Labor, including the same objects specified under this head in the act making appropriations for the Department of Labor for the fiscal year 1929, $20,000.

The amendment was agreed to.

The next amendment was, under the heading "Navy Department, office of the Secretary," on page 62, after line 23, to insert:

Pay, miscellaneous: Not to exceed $20,000 of the amount appropriated for "Pay, miscellaneous," in the naval appropriation act for the fiscal year 1929 shall be available for expenses (including contracts for the services of experts) in connection with research and investigation of safety devices and appliances for submarines.

The amendment was agreed to.

The next amendment was, under the subhead "Public works, Bureau of Yards and Docks," on page 65, line 15, after the figures "1923" and the parenthesis, to insert "fiscal years 1928 and 1929," so as to read:

Ammunition storage facilities, Navy: Toward providing ammunition storage facilities in accordance with the recommendations contained in House Document No. 199, Seventieth Congress (and the Secretary of the Navy is authorized to enter into contract or contracts for such facilities at a cost in the aggregate not to exceed $9,179,500, which amount will include the establishment and development of a naval ammunition depot in the vicinity of Hawthorne, Nev., at a total cost not to exceed $3,500,000, the establishment and development of a naval ammunition depot in the Territory of Hawaii, at a total cost not to exceed $3,540,000, and the replacement of storage facilities at the naval station, Cavite, P. I., subject to and in conformity with the treaty limiting naval armament, ratified August 17, 1923), fiscal years 1928 and 1929, $1,193,998, of which sum $638,998 shall be available for the acquisition of land, and $80,000 shall be available for the employment of classified personal services in the Bureau of Yards and Docks and in the field to be engaged upon such work and to be in addition to employees otherwise provided for.

The amendment was agreed to.

The next amendment was, at the top of page 67, to insert:

INCREASE OF THE NAVY

Construction and machinery: On account of hulls and outfits of vessels and machinery of vessels authorized in the "Act making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes," approved August 29, 1916, fiscal year 1929, $200,000, to remain available until expended.

The amendment was agreed to.

The next amendment was, under the heading "Department of State," on page 69, after line 19, to insert:

OFFICE OF THE SECRETARY

Damage claims: To pay a claim for damages to or loss of privately owned property adjusted and determined by the Department of State, under the provisions of the act entitled "An act to provide a method for the settlement of claims arising against the Government of the United States in sums not exceeding $1,000 in any one case," approved December 28, 1922, as fully set forth in Senate Document No. 124, Seventieth Congress, $77.

Refund of passport fees erroneously charged and paid: For the refund of fees erroneously charged and paid for the issue of passports to persons who are exempted from the payment of such fee by section 1 of the act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1921, approved June 4, 1920, fiscal years 1928 and 1929, $200.

The amendment was agreed to.

The next amendment was, under the subhead "Diplomatic Service," on page 70, after line 17, to insert:

For an additional amount for the payment of traveling expenses of Diplomatic, Consular, and Foreign Service officers incurred in connection with leaves of absence, fiscal years 1928 and 1929, $31,870.

The amendment was agreed to.

The next amendment was, on page 77, after line 22, to insert:

International Exposition at Seville, Spain: For an additional amount for the International Exposition at Seville, Spain, including the same

objects specified under this head in the act making appropriations for the Department of State for the fiscal year 1929, $100,000.

The amendment was agreed to.

The next amendment was, on page 78, after line 2, to insert:

Payment to the Government of France on account of damages sustained by the French steamship *Madeleine:* For payment to the Government of France in full settlement of its claim for reimbursement for damages sustained by the French steamship *Madeleine* in a collision with the U. S. S. *Kerwood* in the harbor of Brest, France, on May 11, 1918, of a sum equivalent to £3,550 2s 5d., as authorized by the act approved May 14, 1928, fiscal years 1928 and 1929, $17,395.59.

The amendment was agreed to.

The next amendment was, on page 78, after line 11, to insert:

American International Institute for the Protection of Childhood: For the annual contribution of the United States of $2,000 per annum to the American International Institute for the Protection of Childhood at Montevideo, Uruguay, as authorized by public resolution No. 31, approved May 3, 1928, fiscal years 1928 and 1929, $4,000.

The amendment was agreed to.

The next amendment was, on page 78, after line 17, to insert:

Relief of Joseph C. Grew and other officers of the Foreign Service: For the payment to Joseph C. Grew, formerly American minister at Copenhagen, Denmark, the sum of $6,150.65, such sum representing the amount embezzled from Government funds in the United States legation at Copenhagen by the cashier of the legation between March 31 and July 1, 1921; to Francis B. Keene, formerly American consul general at Rome, Italy, the sum of $95.21, such sum representing the amount of Government funds stolen from the safe cabinet in the American consulate general at Rome, Italy, on the night of April 28, 1921; to Norton F. Brand, as American consul at Fernie, British Columbia, the sum of $1,397.25, such sum representing the unpaid balance of the United States Government funds deposited by him in the Home Bank of Canada, at Fernie, British Columbia, such bank having suspended payment of deposits on August 16, 1923; to Richard L. Sprague, as American consul at Gibraltar, the sum of $1,897.87, being reimbursement for moneys actually expended by him in the settlement of a judgment of the Supreme Court of Gibraltar, dated April 17, 1926, in favor of Smith Imossi & Co., covering a claim of that company for the relief of American seamen from the steamer *Kanabec* at Gibraltar in 1920, and the sum of $278.95, being reimbursement for moneys personally advanced by him for the relief of said seamen, as authorized and directed by the act approved May 21, 1928, fiscal years 1928 and 1929, $9,819.93.

The amendment was agreed to.

The next amendment was, under the heading "Treasury Department, Office of the Secretary," on page 80, line 7, after the word "in," to insert "Senate Document No. 124 and," and at the end of line 9, to strike out "$2,367.21" and insert "$3,209.28," so as to read:

Damage claims: To pay claims for damages to or losses of privately owned property adjusted and determined by the Treasury Department, under the provisions of the act entitled "An act to provide a method for the settlement of claims arising against the Government of the United States in sums not exceeding $1,000 in any one case," approved December 28, 1922, as fully set forth in Senate Document No. 124 and House Document No. 271, Seventieth Congress, $3,209.28.

The amendment was agreed to.

The next amendment was, under the subhead "Public buildings, repairs, equipment, and general expenses," on page 84, after line 17, to insert:

Outside professional services: To enable the Secretary of the Treasury to further the provisions of the act of May 25, 1926, in providing suitable accommodations in the District of Columbia for the executive departments and independent establishments of the Government, fiscal year 1929, $210,000; and authority is hereby granted to employ the services of private architects to prepare, as a basis for estimate, preliminary drawings for such buildings which, while not yet authorized, are contemplated in the general group as projected for location within the boundaries of the land to be acquired under authority of the act approved January 13, 1928: *Provided*, That the total fee for such preliminary drawings shall not exceed that customarily paid for such services.

Mr. KING. Mr. President, I make inquiry of the chairman of the committee whether in a former appropriation bill authority was not given and an appropriation made for architects to aid in the preparation of plans for our public buildings?

Mr. WARREN. Mr. President, this is a direct appropriation of $210,000. The Secretary of the Treasury appeared before the committee and explained that it would be necessary to have this sum so that there might be a harmonizing of one building with another, and a general scheme that we could hardly get from the Treasury architects alone. The Supervising Architect was before us at the same time and also made request that this amount should be appropriated. I think it is a very proper appropriation.

Mr. KING. My recollection was that an adequate appropriation had been made for just such contingencies in a former bill, but if not, I do not object.

The amendment was agreed to.

The next amendment was, on page 103, at the end of line 13, to strike out "$910,000" and insert "$1,115,000," so as to read:

Salt Lake City, Utah, post office, courthouse, etc.: For acquisition of additional land and commencement of extension and remodeling, for the accommodation of the post office, courts, and other Government offices, $400,000, under an estimated total cost of $1,115,000.

The amendment was agreed to.

The next amendment was, on page 108, at the end of line 8, to strike out "$5,000,000" and insert "$9,750,000," so as to read:

ACQUISITION OF TRIANGLE PROPERTIES IN THE DISTRICT OF COLUMBIA UNDER THE ACT APPROVED JANUARY 13, 1928

For the acquisition of property as authorized by the act entitled "An act authorizing the Secretary of the Treasury to acquire certain lands within the District of Columbia to be used as sites for public buildings," approved January 13, 1928, fiscal year 1929, $9,750,000.

The amendment was agreed to.

The next amendment was, on page 108, after line 9, to insert:

NOGALES, ARIZ., INTERNATIONAL STREET

For grading and paving, with the necessary retaining walls, storm sewers, the installation of an ornamental lighting system, and other items necessary in connection therewith, of the Federal strip known as International Street, as authorized in the act approved May 16, 1928, fiscal years 1928 and 1929, $40,000.

The amendment was agreed to.

The next amendment was, at the top of page 109, to insert:

OFFICE OF THE JUDGE ADVOCATE GENERAL

Settlement of war claims, act of 1928: For every expenditure requisite for and incident to the work of the War Department in connection with the settlement of war claims as authorized by the act entitled, "An act to provide for the settlement of certain claims of American nationals against Germany, Austria, and Hungary, and of nationals of Germany, Austria, and Hungary, against the United States and for the ultimate return of all property held by the Alien Property Custodian," approved March 10, 1928, including the authorized traveling expenses of commissioned officers and other employees, rent in the District of Columbia and in foreign countries, the employment of personal services in the District of Columbia and elsewhere, without regard to the civil service laws and regulations or to the classification act of 1923, printing, binding, photographing, stationery, office supplies and equipment, and such other expenses as may be necessary and proper for carrying out the provisions of the act herein referred to, fiscal years 1928 and 1929, $160,000.

The amendment was agreed to.

The next amendment was, under the subhead "Finance Department," on page 110, line 3, after the word "in," to insert "Senate Document No. 124 and"; and at the end of line 5, to strike out "$137.75" and insert "$152.25," so as to read:

Damage claims: To pay claims for damages to or losses of privately owned property adjusted and determined by the War Department under the provisions of the act entitled "An act to provide a method for the settlement of claims arising against the Government of the United States in sums not exceeding $1,000 in any one case," approved December 28, 1922, as fully set forth in Senate Document No. 124 and House Document No. 271, Seventieth Congress, $152.25.

The amendment was agreed to.

The next amendment was, on page 110, after line 12, to insert the subhead "Quartermaster Corps"; in line 19, after the figures "1928" to insert "Fort Benjamin Harrison, Ind., $375,000; and," and in line 22, after the words "in all" to strike out "$732,975" and insert "$1,107,975," so as to read:

QUARTERMASTER CORPS

Construction at military posts: For construction and installation of buildings, utilities, and appurtenances thereto, at Schofield Barracks, Hawaii, $65,000, as authorized by the act approved March 27, 1928; Fort Humphreys, Va., $80,000, as authorized by the act approved March 28, 1928; Fort Benjamin Harrison, Ind., $375,000; and new primary flying school and flying field, San Antonio, Tex., $587,975, as authorized by the act approved February 18, 1928; in all, $1,107,975, to remain available until expended.

The amendment was agreed to.

The next amendment was, on page 112, line 5, after the name "Virginia" to insert "Fort Benjamin Harrison, Ind.," so as to read:

And provided further, That the several sums herein appropriated or made available for expenditure at Schofield Barracks, Hawaii, Fort Humphreys, Va., Fort Benjamin Harrison, Ind., and the new primary flying school and flying field, San Antonio, Tex., shall be available for the engagement, by contract or otherwise, of the services of architects, or firms, or partnerships thereof, and other technical and professional personnel as may be deemed necessary without regard to civil-service requirements and restrictions of law governing the employment and compensation of employees of the United States.

The amendment was agreed to.

Mr. FLETCHER. Mr. President, with regard to these public buildings, I favor erecting public buildings where they are needed, and since we have trusted the allocation of the funds to a committee, I presume there is nothing to do but to abide by the determination of that committee. I have been looking at this bill to some extent, and it seems to me as if this committee have to some extent been unfair to certain localities. For instance, in Florida we have three building sites the Government has owned for 10 or 12 years, and the sites are all vacant, people need post offices, and have been applying from time to time to have post offices built on these sites. The sites are off the tax roll, they are eye sores in the community, simply because the Government does not take any care of them, and we can not get any public buildings. That is the situation at Lake City, at Kissimmee, and at Key West. Yet, there are provisions in this bill, numerous provisions, for new sites as well as for new buildings.

Mr. SMOOT. The Senator will remember that the act itself restricted the number of post-office buildings that could be erected in any State, and I think the Senator will find that the appropriations made for Florida comply with the law as to the number.

Mr. FLETCHER. There is not a single new building provided for Florida.

Mr. PHIPPS. I call the Senator's attention to page 105, where he will find a provision for Tampa, Fla., $550,000, for which the first appropriation is made.

Mr. FLETCHER. $100,000.

Mr. PHIPPS. $100,000 to begin with.

Mr. FLETCHER. This $550,000 is the total cost of enlarging that building. It is a building the Government now owns, they own the ground surrounding it, and they are enlarging it by building on their own land, something which ought to have been done years ago.

Mr. PHIPPS. I am inclined to think the Senator will find an item for Florida in a former bill.

Mr. FLETCHER. No; that is the only item for Florida.

Mr. SMOOT. There must have been some in the former bill, because it was all agreed to. The Senator from Virginia remembers that every State was taken care of, and the names listed.

Mr. FLETCHER. That bill did not pass.

Mr. GLASS. Yes; it passed early in this session.

Mr. FLETCHER. Florida was not included in it.

Mr. SWANSON. Will the Senator permit an interruption?

Mr. FLETCHER. I cite some instances: Connecticut, for instance, has an appropriation of $1,400,000 in this bill, and the estimated cost of the buildings is to be $3,200,000. Illinois has an appropriation of $450,000 in this bill, the estimated cost of the buildings there being $14,500,000. Indiana has an appropriation of $375,000, the estimated cost of the buildings being $1,165,000. Maine has an appropriation of $384,000, the estimated cost of the buildings being a good deal more than that; I have not figured it up. Massachusetts has an appropriation of $1,500,000, with an estimated cost of the buildings there of $6,000,000. This bill carries appropriations to the amount of $1,200,000 for buildings for New Jersey, the estimated cost of them being $2,585,000. New York has appropriations in this bill of $2,131,500, with an estimated cost of the buildings of $6,913,000. Ohio has an appropriation of $650,000 in this bill, the estimated cost of the buildings being $1,880,000. Pennsylvania has an appropriation of $350,000, the estimated cost of the buildings being $6,550,000. So it goes on through the bill. Wisconsin has an appropriation of $400,000 in this bill, the estimated cost of the buildings being $2,650,000.

Florida has an appropriation of $100,000 for the extension and completion of a building which the Government already owns, and owns the land upon which the extension is to be built, at a total cost of $550,000. We have presented this need a number of times, the needs of these various communities. I am not complaining. I expect the cities that are provided for need the buildings, but it looks to me as if this commission is not making a proper division of the lump sum.

Mr. WARREN. I will say to the Senator that, from investigation I have made, the Post Office Department and the Treasury Department are working together, and they have recommended those that they feel are the most necessary.

Mr. FLETCHER. I understand that.

Mr. WARREN. The State of Wyoming has nothing in this bill except one small appropriation. But we say nothing, because we expect to be taken care of later.

Mr. FLETCHER. I am living in hope, and I have been living in hope for some time, that something will be done down there. Jacksonville needs a building and Miami needs one.

Mr. WARREN. We went over 10 or 15 years and had nothing done.

Mr. FLETCHER. I appreciate that.

Mr. WARREN. That has thrown us far behind.

Mr. CURTIS. Mr. President, I ask unanimous consent that the hour for taking the recess be extended to not later than 7 o'clock, so that we may finish this bill.

The PRESIDENT pro tempore. Is there objection?

Mr. BRUCE. I would like to hear what is the request.

Mr. HOWELL. I object.

The PRESIDENT pro tempore. Objection is made.

Mr. KING. A number of Senators already have left. I would object myself if some one else had not.

Mr. CURTIS. I would like to have a short executive session, and I think we could pass this bill by half past 6.

Mr. KING. Let me say to the Senator from Kansas that several Senators who are not here want to speak on one particular item in the bill.

The PRESIDENT pro tempore. Objection is made, and the clerk will state the next amendment.

The next amendment was, at the top of page 113, to insert:

For the acquisition of approximately 1 acre of land at Selfridge Field, Mich., for a railroad right of way, as authorized by the act approved May 16, 1928, fiscal years 1928 and 1929, $1,750.

The amendment was agreed to.

The next amendment was, on page 113, after line 4, to insert:

To complete the acquisition of a tract of land known as the Kalena tract, as authorized by the act entitled "An act to authorize an appropriation to complete the purchase of real estate in Hawaii," approved May 16, 1928, fiscal year 1928, $34,700.

The amendment was agreed to.

The next amendment was, under the subhead "Corps of Engineers," on page 114, after line 17, to insert:

In addition to the sum authorized under this head in the War Department appropriation act for the fiscal year 1929, approved March 23, 1928, further expenditure of not to exceed $29,200 from appropriations heretofore made is authorized for employment only in the office of the Chief of Engineers of the services of skilled draftsmen, civil engineers, and such other services as the Secretary of War may deem necessary to carry into effect the various appropriations for rivers and harbors, surveys, and preparation for and the consideration of river and harbor estimates and bills, to be paid from such appropriations.

The amendment was agreed to.

The next amendment was, under the heading "War Department—Nonmilitary activities, Quartermaster Corps," on page 117, after line 7, to insert:

Zachary Taylor National Cemetery: For the establishment of a national cemetery, to be known as the Zachary Taylor National Cemetery in Jefferson County, Ky., authorized by the act approved February 24, 1925, as amended by the act approved May 10, 1928, fiscal years 1928 and 1929, $24,215: *Provided*, That no part of this appropriation shall be expended until title to the land to be donated, as provided for in the act approved May 10, 1928, has been vested in the United States.

The amendment was agreed to.

The next amendment was, on page 118, after line 16, to insert:

Paving of Government road from Lee & Gordon's mill to La Fayette, Ga.: For improving and paving the Government road, known as La Fayette Extension Road, extending from Lee and Gordon's mill to La Fayette, Ga., as authorized by the act approved May 9, 1928, fiscal years 1928 and 1929, $193,500.

The amendment was agreed to.

The next amendment was, on page 118, after line 22, to insert:

Government road, known as the Ringgold Road, extending from Chickamauga and Chattanooga National Military Park to the town of Ringgold, Ga.: For carrying out the provisions of the act entitled "An act to provide for the paving of the Government road, known as the Ringgold Road, extending from Chickamauga and Chattanooga National Military Park, in the State of Georgia, to the town of Ringgold, Ga." approved May —, 1928, fiscal years 1928 and 1929, $117,000, to be subject to the terms and conditions as set forth in such act.

The amendment was agreed to.

The next amendment was, on page 120, after line 2, to insert:

Flood control, Mississippi River and tributaries: For prosecuting work of flood control in accordance with the provisions of the flood control act, approved May 15, 1928, $14,000,000.

The amendment was agreed to.

The next amendment was, on page 120, after line 6, to insert:

Emergency fund for flood control on tributaries of Mississippi River: For rescue work and for repair or maintenance of any flood-control work on any tributaries of the Mississippi River threatened or destroyed by flood, in accordance with section 7 of flood control act, approved May 15, 1928, $1,000,000.

The amendment was agreed to.

The next amendment was, on page 122, after line 2, to insert:

PANAMA CANAL

Civil Government, Panama Canal and Canal Zone: For revision and codification of the laws of the Canal Zone as authorized by the act approved May 17, 1928, fiscal years 1928 and 1929, $25,000.

The amendment was agreed to.

The next amendment was, under the heading "Judgments, United States courts," on page 123, line 24, after the word "in," to insert "Senate Document No. 126 and"; on page 124, line 2, after the name "War Department," to strike out "$1,873.88" and insert "$6,326.19," and in line 3, after the words "in all," to strike out "$75,438.22" and insert "$79,890.53," so as to read:

For the payment of judgments, including costs of suits, rendered against the Government of the United States by United States district courts under the provisions of an act entitled "An act authorizing suits against the United States in admiralty for damage caused by and salvage services rendered to public vessels belonging to the United States, and for other purposes," approved March 3, 1925 (43 Stat. 1112), certified to the Seventieth Congress in Senate Document No. 126 and House Document No. 283, under the following departments, namely: Department of Labor, $2,102.18; Navy Department, $71,462.16; War Department, $6,326.19; in all, $79,890.53, together with such additional sum as may be necessary to pay interest as and where specified in such judgment.

The amendment was agreed to.

The next amendment was, on page 124, line 10, after the word "in," to insert "Senate Document No. 125 and," and in line 13 to strike out "$26,021.69" and insert "$628,329.94," so as to read:

For payment of the judgments rendered against the Government by the United States District Court for the Northern District of California under the provisions of the act approved June 7, 1924 (43 Stat. 595), and certified to the Seventieth Congress in Senate Document No. 125 and House Document No. 284, as follows: Under the Treasury Department, $628,329.94.

The amendment was agreed to.

The next amendment was, under the heading "Judgments, Court of Claims," on page 124, line 24, after the word "in," to insert "Senate Document No. 127 and"; on page 125, line 1, after the word "namely" and the colon, to insert "United States Shipping Board, $1,785,598.29"; in line 4, after the figures "$2,190," to insert "Department of Labor, $2,159.25"; in line 5, after the name "Navy Department," to strike out "$138,000.58" and insert "$158,263.97"; in line 7, after the name "War Department," to strike out "$871,867.78" and insert "$1,008,306.58"; and in the same line, after the words "in all," to strike out "$1,050,262.12" and insert "$2,994,721.85," so as to read:

For payment of the judgments rendered by the Court of Claims and reported to the Seventieth Congress, first session, in Senate Document No. 127 and House Document No. 280, under the following departments and establishments, namely: United States Shipping Board, $1,785,598.29; United States Veterans' Bureau, $472.67; Department of Agriculture, $90.72; Department of the Interior, $2,190; Department of Labor, $2,159.25; Navy Department, $158,263.97; Post Office Department, $35,490.02; Treasury Department, $2,150.35; War Department, $1,008,306.58; in all, $2,994,721.85, together with such additional sum as may be necessary to pay interest on certain of the judgments at the legal rate per annum as and where specified in said judgments.

The amendment was agreed to.

The next amendment was, on page 137, after line 20, to insert:

AUDITED CLAIMS

SEC. 3. That for the payment of the following claims, certified to be due by the General Accounting Office under appropriations the balances of which have been carried to the surplus fund under the provisions of section 5 of the act of June 20, 1874, and under appropriations heretofore treated as permanent, being for the service of the fiscal year 1925 and prior years, unless otherwise stated, and which have been certified to Congress under section 2 of the act of July 7, 1884, as fully set forth in Senate Document No. 128, Seventieth Congress, there is appropriated as follows:

INDEPENDENT OFFICES

For Interstate Commerce Commission, $1.20.
For medical and hospital services, Veterans' Bureau, $6.30.
For salaries and expenses, Veterans' Bureau, $42.70.

Total, audited claims, section 3, $108,982.03, together with such additional sum due to increases in rates of exchange as may be necessary to pay claims in the foreign currency as specified in certain of the settlements of the General Accounting Office.

The amendment was agreed to.

The next amendment was, on page 141, line 13, to change the section number from 3 to 4.

The amendment was agreed to.

The next amendment was, on page 141, line 19, to change the section number from 4 to 5.

The amendment was agreed to.

The PRESIDENT pro tempore. That completes the committee amendments. The reading of the bill was concluded.

Mr. BRATTON. Mr. President, I send an amendment to the desk which I ask to have read.

The PRESIDENT pro tempore. The clerk will read.

The CHIEF CLERK. On page 3, after line 5, insert:

To enable the Secretary of the Senate to pay to Natalia S. Jones, widow of Hon. Andrieus A. Jones, from the appropriation for mileage of Senators, fiscal year 1928, $839.20 for mileage of the said Hon. Andrieus A. Jones, late a Senator from the State of New Mexico.

EXECUTIVE SESSION AND RECESS

Mr. CURTIS. Mr. President, it is apparent that we can not finish this bill by 6 o'clock, at which time we are to take a recess, and a short executive session is desired. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 6 o'clock p. m.), under the order previously entered, the Senate took a recess until 8 o'clock p. m.

EVENING SESSION

The Senate reassembled at 8 o'clock p. m., on the expiration of the recess.

SOUTH CAROLINA LAND BANK

Mr. BLEASE. Mr. President, since I made my speech on last Monday with reference to the land-bank investigation in South Carolina, at which time I stated I had not received a reply to my telegram sent to the district attorney with reference to the matter, I have received a reply in which he denies having made the statement which was reported to me and by me attributed to him. I desire that this statement may appear in the RECORD in order that I may do the district attorney no injustice.

ADDITIONAL REPORT OF A COMMITTEE

Mr. CAPPER, from the Committee on Agriculture and Forestry, to which was referred the bill (H. R. 53) to provide for the collection and publication of statistics of tobacco by the Department of Agriculture, reported it without amendment and submitted a report (No. 1274) thereon.

THE CALENDAR

The PRESIDENT pro tempore. Under the unanimous-consent agreement the calendar will be called for the consideration of bills to which there is no objection, and the clerk will call the first bill on the calendar.

The bill (S. 2787) providing for the appointment of governors of the non-Christian Provinces in the Philippine Islands by the Governor General without the consent of the Philippine Senate was announced as first in order.

Mr. LA FOLLETTE. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States prohibiting war was announced as next in order.

Mr. LA FOLLETTE. Over.

The PRESIDENT pro tempore. The joint resolution will be passed over.

The bill (S. 1414) for the prevention and removal of obstructions and burdens upon interstate commerce in cottonseed oil by regulating transactions on future exchanges, and for other purposes, was announced as next in order.

Mr. FESS. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1728) placing service postmasters in the classified service was announced as next in order.

Mr. BLEASE. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1462) for the adoption of the Columbia Basin reclamation project, and for other purposes, was announced as next in order.

Mr. FESS. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1266) to create in the Bureau of Labor Statistics of the Department of Labor a division of safety, was announced as next in order.

Mr. BAYARD. Let the bill go over.

Mr. SHORTRIDGE. Mr. President, I want to make inquiry of the Senator who objected whether any appeal on my part would avail?

Mr. BAYARD. I objected.

Mr. SHORTRIDGE. No appeal on my part would persuade the Senator to withdraw his objection?

Mr. BRUCE. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2292) providing for the employment of certain civilian assistants in the office of the Governor General of the Philippine Islands, and fixing salaries of certain officials, was announced as next in order.

Mr. LA FOLLETTE. Over.

The PRESIDENT pro tempore. The bill will be passed over.

CLASSIFICATION OF MATERIAL FOR MILITARY AND NAVAL USE

The bill (S. 1831) to authorize the Secretary of War and the Secretary of the Navy to class as secret certain material, apparatus, or equipment for military and naval use, and for other purposes, was announced as next in order.

Mr. FLETCHER. Over.

Mr. REED of Pennsylvania. Mr. President, I ask the Senator to notice that the bill has been amended so as to put the discretion only in the President and not in the Secretary.

The PRESIDENT pro tempore. Is the objection maintained on the part of the Senator from Florida?

Mr. FLETCHER. I will withdraw my objection.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Military Affairs with amendments which had heretofore been considered and agreed to so as to make the bill read:

Be it enacted, etc., That the President is empowered, in his discretion, to class as secret or confidential any material, apparatus, or equipment for military or naval use which is of such nature that the interests of the public service would be injured by publicly divulging information concerning them, and may authorize purchases and award contracts for the development, manufacture, or procurement thereof without public advertisement for bids or notice to the trade: *Provided*, That such purchases and contracts shall not be made or awarded except under circumstances where it shall be impracticable to develop, manufacture, or procure such material, apparatus, or equipment in Government establishments: *Provided further*, That when such material, apparatus, or equipment has been classed as secret or confidential the head of any Government department, establishment, or agency shall take proper measures to maintain the secret or confidential nature thereof and of the contracts and pertinent papers relating thereto: *And provided further*, That the decision of the President as to what material, apparatus, or equipment shall be classed as secret or confidential, and as to whether or not it is practicable to develop, manufacture, or procure such material, apparatus, or equipment in Government establishments shall be final and conclusive.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to authorize the President to class as secret certain material, apparatus, or equipment for military and naval use, and for other purposes."

BILLS AND JOINT RESOLUTIONS PASSED OVER

The bill (S. 759) to give the Supreme Court of the United States authority to make and publish rules in common-law actions was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2859) for the relief of Francis J. Young was announced as next in order.

Mr. KING. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2864) to establish the standard of weights and measures for the following wheat mill, rye mill, and corn mill products, namely, flours, semolina, hominy, grits, and meals, and all commercial feeding stuffs, and for other purposes, was announced as next in order.

Mr. KING. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1093) to prevent the sale of cotton and grain in future markets was announced as next in order.

Mr. METCALF. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The joint resolution (S. J. Res. 57) requesting the President to immediately withdraw the armed forces of the United States from Nicaragua was announced as next in order, and that it had been adversely reported.

Mr. BORAH. Over.

The PRESIDENT pro tempore. The joint resolution will be passed over.

The bill (S. 2532) to provide for the designation of clerks or employees of the Department of the Interior to serve as registers and receivers in the land offices in Alaska was announced as next in order.

Mr. LA FOLLETTE. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2679) to limit the period for which an officer appointed with the advice and consent of the Senate may hold over after his term shall have expired was announced as next in order.

Mr. SHORTRIDGE. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 728) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, was announced as next in order.

Mr. ASHURST. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1263) to amend section 4 of the interstate commerce act was announced as next in order.

Mr. DENEEN. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The resolution (S. Res. 173) expressing it as the sense of the Senate that Andrew W. Mellon should resign as Secretary of the Treasury, was announced as next in order.

Mr. BRATTON. Over.

The PRESIDENT pro tempore. The resolution will be passed over.

The bill (S. 1748) relating to the qualifications of jurors in the Federal courts was announced as next in order.

Mr. BRATTON. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3151) to limit the jurisdiction of district courts of the United States was announced as next in order.

Mr. BRATTON. Over.

The PRESIDENT pro tempore. The bill will be passed over.

ADDITIONAL LAND OFFICES, MONTANA, OREGON, IDAHO, AND SOUTH DAKOTA

The bill (S. 1794) establishing additional land offices in the States of Montana, Oregon, Idaho, and South Dakota, was considered as in Committee of the Whole. The bill had been reported from the Committee on Public Lands and Surveys with amendments which were agreed to on March 3 last.

Mr. WATERMAN. Mr. President, I offer an interrelated amendment.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. The Senator from Colorado offers the following amendment: On page 3, after line 17, insert a new section as follows:

SEC. 9. That all that portion of the State of Colorado included within the present boundaries of Eagle, Delta, Garfield, Gunnison, Mesa, Moffat, Montrose, Ouray, Pitkin, Rio Blanco, and San Miguel Counties is hereby constituted a new land district and that the land office for said district shall be located at Glenwood Springs, in the said county of Garfield.

On page 3, line 18, following the abbreviation "SEC." strike out the numeral "9" and insert the numeral "10."

On page 4, line 1, following the abbreviation "SEC." strike out the numeral "10" and insert the numeral "11."

On page 4, line 5, following the word "Idaho" insert the word "Colorado."

Mr. ROBINSON of Arkansas. Mr. President, may I inquire if this amendment was considered by the committee reporting the bill?

The PRESIDENT pro tempore. The Chair understands it to be an individual amendment offered by the Senator from Colorado.
